

## NEWS FROM THE NEIGHBORING TOWNS

Clipped From Papers Published in Latah County.

### New Water Mains

The village of Troy has let to the Pacific States Cast Iron Pipe Co. an order for 2604 feet of six inch cast iron pipe at 87c per foot and 3000 feet of four inch pipe at 60c per foot. Delivery of this pipe is expected by April 20, and work on laying it is expected to begin as soon as it is received, with the work completed by May 10.

For the past four years plans have been under way to replace all the wooden mains with iron pipe, and now that it is about to be an accomplished fact, the town feels well satisfied that the improvement in the water system will be well worth the expense.

It is expected that water users will not be seriously inconvenienced by the laying of new mains, as the interruption or service will be made as brief as possible.—Troy News.

### Strawberry Weevil Control

An effective method of controlling the strawberry root weevil is to set poisoned dried apples about the plants at the close of the berry season, is announced made from the agriculture college at Pullman.

The strawberry weevil occurs in virtually every berry growing section and attacks plants both as a beetle and as a grub. The beetle feeds on the foliage and fruit, and the grub destroys the root system. The plants infested with weevils appear stunted and offer little resistance when pulled.—Deary Press.

### Please Look at Traps

In the classified column of this issue you will find where Frank Jones is advertising for one of his cougar dogs that has been missing for some three weeks and he fears that it might have gotten into a trap and may have starved to death.

Mr. Jones found two of his dogs Monday in traps, that had been gone for several days. They had been caught in traps and were said to be in a horrible condition when he found and released them.

Mr. Jones asks the News to please ask those who have large traps set to look at them often in order that they may release or kill any animal that may be caught and not allow them to suffer needlessly.

Mr. Jones says he tries to keep his cougar dogs at home but that it is necessary to turn them loose occasionally for exercise and they sometimes go out to hunt coyotes and in the chase they may go several miles from home and they might accidentally get into traps, as did the two found Monday evening.

Dumb animals suffer with pain the same as human beings do and when people set traps of any kind it is a good idea to keep a close watch on them in order that suffering by animals caught in them may be reduced to the minimum.—Genesee News.

### Princeton Stores Burned

Fire which started at 12:15 o'clock Tuesday noon, destroyed three of the principal business buildings and damaged several others, causing a loss estimated at close to \$14,000.

Buildings destroyed were the Johnson hotel, the Edgar Adair general store, Princeton's principal merchandise establishment, owned by H. L. Hawkins but operated by John Adair. A large storage barn to the rear of the two buildings, situated side by side, and several smaller frame buildings were destroyed while the Princeton Garage took fire several times but was saved and all automobiles and equipment in the building rescued.

The fire was still burning at 3 o'clock but was under control and danger of its spread believed

## ACTIVE IN CHINA

Above is an exclusive portrait of Owen O'Malley, counsellor of the embassy of the British legation in Peking, who has been conducting negotiations with Foreign Minister Chen of the Cantonese government.

### "Light on The Mountains"

Three hundred persons will be used in the production of the "Light on The Mountains," historical pageant of the state of Idaho, to be given during commencement week in June this spring. All of the cast, with the exception of the Nezperce Indians who will take part in several scenes, will be selected from the student body.

Of the 300 characters, 50 will have speaking parts, as called for in the script. Twenty-five principal parts are to be assigned to students, probably to those in dramatic classes. The production of the pageant will be under the direction of John H. Cushman, head of the dramatic department who directed the production when it was given on the campus in 1923 for the first time. The script, which was written by Talbot Jennings, graduate of the university and now a member of the English faculty, has been completely revised.

Selection of the cast for the production has not been made. This will probably be done the latter part of April when actual work of rehearsing will be started.

### District Has Two Boards

Lewiston—The Clearwater highway district of Nez Perce county is now in the unique position of having two sets of directors, two chairmen, two attorneys and the same number of meeting places, with both bodies functioning, and just what the outcome will be as to any actions taken by these boards is uncertain.

For several years there has existed strife over the affairs of the district, resulting in two separate and distinct elements being constantly at loggerheads, and culminated on March 11 in a delegation of residents, headed by Thomas A. Daugherty or Agatha, a member of the board serving with W. S. Powell and P. J. Steensma, visiting the office of Attorney P. E. Stookey and seizing the seal of the district, the minute book and many other records which they removed to the village of Agatha. Stookey, since the formation of a district, has served as secretary-treasurer.

Steensma and Powell met in Lewiston for their last meeting and Daugherty and Woodruff at Agatha. Owing to illness, Secretary-Treasurer Stookey was not able to attend the Lewiston meeting.

The minutes of the Agatha meeting show that the bond of Thomas A. Daugherty as secretary-treasurer was approved and that Eugene A. Cox of Lewiston was selected as legal adviser.

G. P. Anderson was a Moscow visitor yesterday morning.

Origin of the fire is unknown. It was first detected in the Adair store, and quickly spread to the adjoining hotel.—Star-Mirror.

## Sold Ranch

M. O. Raby sold his ranch near Kendrick this week to Henry Garoutte of Cedar Creek ridge. The new owner expects to take immediate possession. The land is located on a bench of American ridge in Brady gulch, about one mile from Kendrick. The consideration is understood to have been \$2,000.

## BASEBALL GAME HERE SUNDAY, APRIL 17th

Uniontown Meets Kendrick on Local Diamond at 2:30.

The opening game of the Valley League schedule starts Sunday, April 17. Uniontown will play Kendrick here in what promises to be a mighty interesting contest. The strength of neither team is known except that Uniontown has always turned out a good team in the past and has many seasoned men in the lineup this year.

Kendrick has some new material this season that looks good. Earl Coulick who will probably play third, is an old head at the game and fills that position better than it has been filled here for some time. He is fast and has a good peg to first. "Smoky" Anderson will play behind the bat and his ability is well known to local fans. Bill Sparber is scheduled to start the game Sunday and so far this season he has shown good form. He pitched for a fast team on the coast last year and made a good record. He throws a tricky ball with plenty of speed. Turnbull will probably take an infield position. He has played in the Inland Empire at various towns for years and has a big rep as an infielder and pitcher. Local fans are expecting big things from him. Other men in the lineup will be chosen from Gus Blum, Claud Stanton, Herman Wilson, Cecil Chamberlain, Harry Flaig, Harley and Clarence Perryman, Ira Bolon, Harley Eichner, Armitage and Harry Ross.

The game Sunday will start at 2:30. With favorable weather conditions a big crowd is expected to attend as much interest has been shown in the opening game. Manager Bolon feels confident that his lineup will give the crowd their money's worth of thrills. Every man in the lineup is a heavy hitter and there ought to be something doing in this game.

J. G. Gardner and R. H. Ramey are official umpires for the locals, the former for out of town games and the latter for home games.

Everybody should plan to attend this game and give the boys the support they deserve to start the season right. The admission will be 25c.

## Commercial Club Met Tuesday

The ladies joined in the regular meeting of the commercial club last Tuesday and a very pleasant and profitable evening was spent.

The regular business of committee reports and other routine matters were disposed of. Among other questions discussed that of reorganizing the Kendrick band was included. The chairman appointed a committee consisting of E. H. Emery, Marvin Long and N. E. Walker to make arrangements to secure an instructor and to take up other arrangements with band members.

A number of the ladies made brief talks and said they hoped that this would not be the last time they would be invited to attend these meetings.

## Band Meeting Monday

The committee in charge of reorganizing the band requests that all band men meet at the city hall at 8 o'clock sharp next Monday night. Important matters will be brought up for discussion.

Mr. and Mrs. Wm. Hedges of Moscow visited friends in Kendrick yesterday.

## Lodges Will Go To Church

Sunday Morning, April 24, the members of the I. O. F. and Rebekah lodges are requested to meet at the Fraternal Temple at 10:30 a. m. The members will form in procession and march to the Presbyterian church where Rev. Taber will preach at 11 o'clock sharp. The Methodist and Presbyterian churches will hold union services at that time.

## NEWS NOTES FROM THE KENDRICK SCHOOLS

What The Students Are Doing This Week.

The 7th grade is taking the regular six weeks examinations. The 8th grade is taking the April state examinations. As this is a nine months' school the papers are not read by the County Superintendent until in May. The April papers are corrected by the teacher. These grades count as the regular six weeks' grades. The writing at this time serves as a review and will prove very beneficial. Because our papers are not sent to Moscow at this time the County Superintendent furnished no examiner.

The second graders have started their new reader, "The Hygenic Pig." The first grade also has a new reader, "Stories of Animal Village."

Last week the little folks were all given a carrot. They cut in in half, dug out the center. Then a string was tied around the carrot and the children filled it with water. This made a little hanging basket.

The first and second graders are little workers, for each one has made a fine May basket.

The first and second graders have made vocabulary booklets. The children cut from magazines, letters which would spell their name and pasted these on the front of their books. Also they found a picture to paste on the cover. For the pages inside, they cut from magazines, words which they know.

The primary children are working hard with their counting. They have learned to count by 2's, 5's, 10's and 100's.

The general assembly program given by the Seniors was: Bible reading, Claude Cook; Jokes, Wilbur Corkill; Duet by Pearl Johnson and Mabel Taber; Song, Raleigh Smith and Wilbur Corkill; general song.

The report cards were given out Wednesday, but the honor roll has not yet been prepared, so will be published next week. Some of the students showed marked improvement.

As the Ancient History class has finished the book, the students are having a rapid review of nearly the entire book.

The Latin class has been translating the story of Persens. This is considered interesting by most of the students. It is mixed with the other work, which gives the students a desire to progress rapidly.

In the typewriting class Margaret McDowell has won her 50 word speed medal and Dorothy Holt and Elbert Long their 40 word speed medal.

"Pasteurization means to have a cow in the pasture all the time or a pasteurized cow" is a definition written by one of the members of the domestic science class.

## Dumas Started It

A person more famous for inquisitiveness than correct breeding once took the liberty of questioning Alexander Dumas rather too closely about his genealogical tree. "Are you a quadroon, Mr. Dumas?" "I am, sir," quietly replied Dumas. "And your father?" "Was a mulatto." "And your grandfather?" "A negro," hastily answered the dramatist whose patience was waning. "And may I enquire what your great grandfather was?" "An ape, sir," thundered Dumas, fiercely, "an ape, sir! My pedigree commences where yours terminates!"—Herrington Sun.

## FOUND'S LABORATORY

James Ward Packard, founder of the Packard Motor company, who has given a million dollars for the erection of a model electrical and mechanical laboratory at Lehigh university from which he graduated in 1884 as a mechanical engineer.

## Nominate Village Trustees

At a caucus held last Tuesday evening candidates to fill the four vacancies on the village board were nominated as follows: E. A. Deobald, M. O. Raby, N. E. Walker and Herman Schupfer. Mr. Deobald and Mr. Raby are now serving on the board and Mr. Walker has served for several terms in past years. Mr. Schupfer is a new man but will no doubt make a very efficient member.

Mr. Walker served as chairman of the board during the time the three improvement districts were formed. He will be a very valuable member during the time the two last improvement districts are settled up. The sewer improvement district has but one more year to go and the sidewalk district two years. Mr. Walker is familiar with all of the details concerning the handling of the bonds and his assistance will be important.

It is not thought there will be an opposition ticket as the four nominees will no doubt prove very satisfactory to the general public.

## Pinochle Stag Party

O. E. MacPherson and R. H. Ramey entertained a number of friends at a pinochle stag party Wednesday evening in honor of Walter Thomas who was visiting here from Spokane. Frank Boyd walked off with the high score for the evening and was presented with a bottle of grape juice. A midnight lunch of sandwiches, cookies and coffee was served by the hosts. Those present were: Walter and Harold Thomas, E. H. Emery, Frank Boyd, Percy Ware, Ed Long, A. H. Daubenberg, Wm. Watts, Ralph Knepper, George Leith, R. H. Ramey and O. E. MacPherson.

## Crescent Clippings

Sunday guests at the A. Dorendorf home were: Mrs. Anna Kimbley and children, Mr. and Mrs. Mike Forest and children and Mr. and Mrs. Wm. Dorendorf and daughter.

Mrs. M. L. Robeson was pleasantly surprised, Sunday, by some of her neighbors who arrived about dinner time with well filled baskets to help celebrate her sixty-first birthday.

Alice Cramer visited with her mother, Mrs. Wm. Kauder, last week. She left Friday to spend a few days with her sister, Mrs. Leroy Southwick of Lenore, before returning to Lewiston to Normal.

John Darby was a business visitor in Kendrick, Tuesday. Henry Davis carried the mail for Grant Bateman, Saturday.

The Okoko bridge club met at the home of Mr. and Mrs. Ralph Knepper last Saturday night. High scores were won by Mr. Daubenberg and Mrs. Ramey. Light refreshments were served after several hours of cards.

## SOUTHWICK'S FAREWELL TO REV. GEO. CALVERT

M. E. Church Slightly Damaged By Fire Last Sunday.

A farewell party was held at the home of Mr. and Mrs. Ben McCoy last Wednesday evening in honor of Rev. George Calvert and wife, sixty-six being present. Games were played by the young folks while the older ones visited. Cake and ice cream was served during the evening. Just before leaving Mr. Presnal gave a talk in behalf of the good work that has been done by Rev. and Mrs. Calvert during their residence here, and it was responded to by Mrs. Calvert and also by Rev. Calvert. After a song and prayer by Rev. Calvert, the neighbors and friends departed, wishing them the best of health and success along their journey through life. Rev. and Mrs. Calvert left Saturday for Clarkston.

The roof of the M. E. church caught fire last Sunday during the Sunday school hour and an alarm was given and the large crowd which gathered soon had the fire under control. It is supposed to have caught from sparks falling on the roof from the chimney. The building was insured.

H. A. Russell and son, Emil, were the overnight guests of Floyd Russell, Monday evening. Harland Hewitt and family went to Lewiston Saturday, returning home Monday.

Alonzo Douglas and Elbert Armitage returned to Lewiston after a weeks visit with their parents.

Miss Alta Phillips of Lewiston spent a few days of last week with her parents, John Phillips and wife.

The play given at the school house Saturday evening by the Leland high school was reported as being fine. A large crowd was present.

A party was held at the Tom Armitage home last Wednesday evening. Dancing was the order of the evening. A good time was reported.

George Christensen of Crescent was in town, Tuesday.

Mr. and Mrs. Kauder of Crescent were in Southwick last Friday.

Mr. and Mrs. Jap Triplett and children and Elton McCoy and wife spent Sunday with Mr. and Mrs. Elmer McCoy.

Sunday guests at the Ben Presnal home were: Mr. and Mrs. Milton Benjamin, Mrs. Wm. Henderson and Mrs. John McIver and two granddaughters.

Wm. Henderson went to Lewiston last Sunday, where he is taking treatment for rheumatism.

Vester Whiting, wife and daughter, and Mr. and Mrs. Zoel Fairly were the supper guests of Mr. and Mrs. Claud Craig of Leland last Wednesday evening.

Homer Hayward and wife spent Sunday with Mr. and Mrs. John Lettenmaier.

Mrs. W. H. Stump entertained at dinner last Sunday, Miss Hazel and Aumbra Allen of Moscow, Miss Joyce Brachett, who is teaching at Genesee, also Mrs. Stump's two daughters, Misses Earlen and Pearl, and Messrs. Harold Rudell, Mac McDonald, Elbert Burrows and Hartzel Edwards Virgil Clem. The young folks motored from Lewiston, Sunday.

George and Jane Ziemann of Moscow spent the week end with their parents.

Zoel Fairly enjoyed a visit with his brother from Peck, who spent the week end here.

## Purchased Town Property

C. C. Blackburn closed a deal recently for the purchase of the former Charles Lewis residence in Kendrick. Mr. and Mrs. Blackburn will make their home there. They are improving the property and getting it ready for occupancy.

Mr. and Mrs. C. J. Arstein of Spokane were week end guests at the home of Mr. and Mrs. Gust Lucken.

Entered at the Post Office at Kendrick as second class mail matter.

It has become a stock phrase that farmers don't need any help, that the trouble with conditions on the farm at this time is too much expensive machinery and automobiles that the farmers could just as well get along without. There's a lot of bunc in such a statement as that. Why shouldn't farmers be entitled to motor cars just the same as the business man in town? His farm represents just as big an investment as the town man's business and he works just as hard. If he buys a tractor in hope that he can more efficiently handle his farming operations, why should he be criticized? Farming today is a bigger problem than it has ever been. It takes a good business head to run a farm and make it pay even a small rate of interest on the investment. Many of those who criticize the farmer would starve to death if turned loose on a farm to make a living.

Are you in need of letterheads or envelopes? If so, try the Gazette for a good job.

#### Whats the Odds

Some young debaters from Northwestern university were in Kansas and created some excitement by declaring that they could get whisky in five minutes in any Kansas town. Granting them 10 minutes it is probably true. But what has that to do with an argument for the repeal of the prohibitory law? In 10 or 15 minutes in any Kansas town it would be possible to find a man who would go and steal a chicken, or to find another man who would lead him to a flappy. But is that any reason for repealing the laws against larceny or for abandoning the institution of marriage. Always the people who want evil will do evil. The only thing that prohibition does is to take away temptation from those who don't want whiskey. The saloon which organized the overstimulation of consumption of alcohol—a bad thing for society—has been stopped. The bootlegger and the chicken thief and the producer always will be in the world, human nature being what it is. The young debaters were not logical. The thing they got excited about was not important—Emporia Gazette.

#### Select Vigorous Males

In selecting males to be retained as breeders, vigor should be one of the primary considerations. The vigor of the male, as well as the female, will be reflected in the hatchability of the eggs and the livability of the chicks. Although early maturity should be sought for in the heavier breeds, it should not be emphasized to the detriment of size. Males which mature exceptionally early may be undersized individuals and not desirable for breeding.

#### Emanuel Lutheran Church

Rev. E. A. Rein, Pastor, Caceron, Idaho

Sunday School ..... 9:30 a. m.  
Church Service ..... 10:30 a. m.  
Church Council first Monday in the month.

Easter offering for Missions will be taken.  
You are welcome.  
L. E. Taber, Pastor.

## JULIAETTA COMMUNITY NEWS

### Sunday School Convention Held

The Latah County Council of Christian Education held their annual Sunday School convention in the Methodist Church, Tuesday. Mr. A. M. Locker of Spokane, the general secretary of the Inland Empire council, and Rev. J. McKee of Walla Walla, the director of Religious Education for the M. E. Church South, were the principal speakers. The county officers present were: President, Roy W. Horning of Potlatch; Vice-president, Arta Groseclose of Juliaetta; and Secretary, Ruth Leland of Juliaetta.

The sixty-eight registered delegates were from the various churches as follows: Genesee Christian Church, 7; Juliaetta M. E. Church South, 34; Juliaetta Baptist 12; Kendrick M. E. Church 4; Potlatch Union 1; Troy M. E. Church South, 4; American Ridge Union, 1; Kendrick Presbyterian, 2; Blaine M. E. Church, 2; Genesee Congregational, 2.

At the council meeting a budget of \$250 was pledged to help carry on the work of the County council. The following officers were elected for the ensuing year: Roy W. Horning, re-elected president; Secretary, Mrs. J. E. Vaught of Potlatch; Treasurer, Rev. Dale Lanphere of Kendrick; Vice-presidents for the various towns represented were: Rev. N. E. Beach, Genesee; Miss Arta Groseclose, Juliaetta; Mrs. Osear Nelson, Troy; Prof. H. Adams, Elk River.

The worship program for the morning was conducted by Mrs. Roy Metcalf and in the afternoon it was conducted by Miss Edna Jones.

A sumptuous lunch was served in the basement of the church at noon.

The Genesee Christian Church delegates, having traveled 192½ miles, won the books for the Workers Library which was given by the County Council.

In the evening there was special music and some interesting addresses. The convention closed after the evening service.

### Baptist Missionary Meets

The Women's Baptist Missionary Society held their monthly meeting in the church, Thursday afternoon April 7th, at which time a missionary program was given. After the program the officers were elected as follows: President, Mrs. Willis Buchanan; Vice-president, Mrs. S. Gruell; Secretary, Ruth Leland; Assistant secretary, Mrs. Laughton; Treasurer, Mrs. Ed Taylor and Pianist, Mrs. Gamble. Lunch was served in the basement by Mrs. Willis Buchanan and Mrs. George Spray.

### Juliaetta Locals

Mrs. B. N. Traut left last Thursday for a visit in Lewiston. J. A. Heacox is serving on the jury in Moscow this week.

Mrs. Irene Holder transacted business in Lewiston last Wednesday.

M. W. McClintie was a visitor in Kendrick Thursday.

D. M. Wilson came up from Arrow last Thursday to transact business here.

Mrs. W. L. Fields visited a few days last week in Garfield.

Mrs. Fred Anderson was a visitor in Kendrick one day last week.

Alvin Nye and Gerald Millard motored to Lewiston, Sunday.

Miss Ada M. Gregory who came to Spokane to attend the teachers meeting came down and spent the day, Friday, with her parents, Mr. and Mrs. W. K. Gregory, before returning to her school in Walla Walla.

Wm. Cox was a Kendrick visitor last Friday.

T. O. Greene went to Moscow on business last Thursday.

Mrs. W. G. Lewis went to Kamiah, Saturday to visit relatives.

John Schetzle was a Lewiston visitor Saturday.

Charles Talbott, Jr., who has been visiting his grandparents, Mr. and Mrs. N. M. Talbott, returned to his home in Potlatch, Sunday.

W. L. Fields and Mr. and Mrs. E. R. Carlson drove up to Spokane on business, Sunday.

Corrine Snyder of Kendrick spent Sunday with her parents, Mr. and Mrs. J. Draper.

Mabel Connick, who visited a

few days with home folks returned to Lewiston, Monday.

Mrs. E. M. Griffith of Grangeville is visiting her daughter, Mrs. A. W. Behrens.

Mrs. Robert Morgan and children returned Sunday after visiting for a time with relatives and friends here.

Loey Huntsberger who is employed on the bridge crew at Pullman, spent Sunday at his home here.

Ernest Guthrie of Orofino spent the week end with his parents, Mr. and Mrs. Guthrie.

G. C. Bowen of Elk River visited a few days with his family.

B. H. Claypoole attended the teachers meeting in Spokane last week.

Alonzo Guthrie of Pullman spent Sunday with home folks.

Mrs. Sophie B. Taylor returned home Monday from Spokane where she has been visiting for some time.

Mrs. Herb Millard returned to Lewiston, Monday, where she is taking treatments.

Mrs. Geo. Miller, who has been visiting for the past week with her parents, Mr. and Mrs. T. O. Greene, returned to her home in Moscow, Tuesday.

Mr. and Mrs. Frank Dygert of Fix ridge spent Sunday with Mr. Dygert's mother.

George Spray transacted business in Moscow Tuesday.

The program which was given by the Junior Club girls last Thursday evening was a great success and it was attended by a large crowd.

Born to Mr. and Mrs. Robert Heimgartner of Potlatch ridge last Thursday a fine baby girl.

Mrs. Allen Goans and Forest Gallahr visited the Leland school

and at the Asa Calvert home last Wednesday.

Miss Mabel Heimgartner of Potlatch ridge visited in Clarkston two days last week.

### Keeping Silage From Freezing Is Easy

### First Thing to Do Is to Keep Silo Tight.

Many farmers who have trouble with silage freezing blame the trouble on the type of silo, but careful observers believe that there is no noticeable difference among silos as to freezing and that the trouble is due largely to the way the silo and silage are managed. How can freezing be prevented?

First of all, the silo must be kept tight, so that the air above the silage will act as a sort of insulation. The silo roof must be tight, the windows kept closed, the silo doors put back in place as the silage is fed down, only one or two doors being left open at the top of the silage, and these openings must be kept closed with heavy blankets or rugs or sacks of straw which can be pulled into place when leaving the silo. A cover over the bottom of the chute will also help.

Then the silage must be handled properly. It should be kept higher in the center and should be broken loose from the wall down two or three inches at the close of each feeding period. Two or three heavy rugs or blankets spread over the silage, especially around the walls, will help a great deal in preventing freezing from one period to the next. Any small amount of frozen silage pulled loose from the wall should be put at the center of the silo and covered with a rug or carpet or tarpaulin, and the natural heat from the silage will usually thaw it out before the next feeding period. It should be remembered that the large body of silage has quite a lot of heat and that freezing from the walls is not very deep or very severe so long as this heat is kept from escaping upward.

### Improving Physically

The public health service says that as a whole American children of today are probably a little taller than the children of the same age were one generation back, because of improved sanitary conditions and health habits.

# HOW FAKE AUCTIONS GET YOUR MONEY

By W. R. MOREHOUSE

Public Relations Commission, American Bankers Association

(This is one of a series of articles exposing the wiles of sharpers who are after your money.)

NEARLY everyone is ready "to take a fling" at getting something for nothing or at least for less than it is worth. Because of this many are duped into paying more than regular market prices for things they buy. This class of people is especially susceptible to the appeal of anything resembling an auction. Fake auctions with the cards stacked against the buyer are very common. They rank high among the fraudulent schemes of the country.

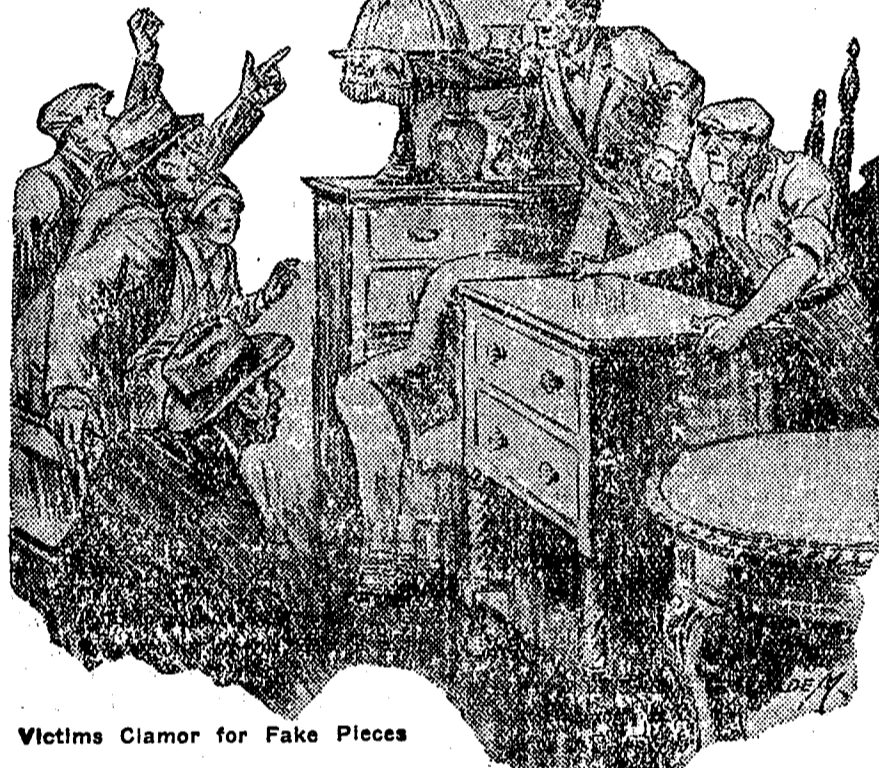

W. R. MOREHOUSE

The "here today and gone tomorrow" auction faker rents a fine looking house in some high-class section of the city in which he plans to operate. He furnishes this house with the cheapest imitations of high-class furnishings, with here and there a fine piece which is to serve for bait. Certain pieces are alleged antiques with a thread of glorious history behind them. Of others it is claimed that they have been handed down for generations, originating with some person noted in history or with some famous Southern family. Of other pieces it is maintained that they are made of rare and precious woods imported from far across the sea. The overstuffed furniture, it is claimed, is all high grade of standard manufacture.

Regardless of its superiority and antiquity, the furniture must be sold at once, for the owner is compelled to take an extended trip, the family physician having ordered travel and a change of climate as a means of saving his life. Nothing is to be spared and the deep slashings of the auctioneer's axe must go on with no price too low. Individual pre-auction sales, of course, will be arranged for persons who are unable to attend the auction.

The day of the sale is here. Purchasers are arriving. They are met at the door by the woman member of the outfit—a dramatic person who knows when to shed tears at the thought of having her happy home broken up and her valuable furnish-

ings find hanging in the front window a sign, "For Rent." The birds have flown, without leaving any address. Fake auctions are not exclusive to residences, but are sometimes staged in stores. We have reports of a certain furniture firm that failed, having on hand stock invoiced at \$42,000. An auction sale was announced. As usual the stock must be closed out to satisfy creditors within a few days, regardless of cost. On the windows appeared glistening announcements of big bargains. Although represented as a legitimate sale, it had the earmarks of an auction by

Victims Clamor for Fake Pieces

ings torn from her. She tells her sad story—how she must leave her home and go to distant lands with her husband whose health is broken and life in danger. But she is resigned to her "awful calamity" and will sell all her lovely furniture even at a great sacrifice.

As she directs attention to certain pieces of furniture her voice quavers. She almost sobs aloud as she names the price she is forced to accept. "Less than half the original cost, but price is no object. We must take the train tomorrow," and she wipes a tear from her eye. Fully convinced the sale is genuine, and sympathizing with the unfortunate woman, buyers clamor for the furniture.

But no sooner are the articles transferred from their setting in the slightly darkened rooms of their original owner and displayed in the sunlight of the purchaser's home, than the truth about the sale begins to dawn in the mind of each new owner. Close examination reveals that evidently this wonderful collection of furniture was but odds and ends and unsalable pieces picked up from second-hand stores by these fly-by-night fakers. Some proves to be the rankest of imitations of the cheapest grade, and the overstuffed is so poorly constructed that it squeaks and weaves under the lightest weight.

### The Birds Have Flown

When those who have been cheated rush back to the house the next day, intent on making it "hot for the faker,"

(A future article will present means to foil crooked promoters wiles and tell to separate good from bad investments.)

Messrs. Catch 'em and Skin 'em. An investigation of the store made six months later disclosed that its stock was then larger than the day it announced the auction. Its sales in the interim had exceeded \$600,000. The facts are that two trucks had backed up to the rear of the store nightly and unloaded new merchandise, principally odd lines and job lots picked up here and there at a bargain. Under the guise of a legitimate auction, or private sale at auction prices, fourteen times as much furniture was sold in the six months as the store contained at the time of the failure. Comparison of sale prices disclosed that victims were persuaded to buy liberally on the assurance they were getting sacrifice prices, when as a matter of fact they were actually paying from five to 25 per cent more than reliable stores were charging for better goods.

Fake auctions and private sales are used not only for furniture but also in the sale of jewelry and other merchandise. The lesson which this story teaches is that there is nothing to be gained by patronizing such sales. On the other hand, there is a better than 50-50 chance of sustaining a loss.

Not all auctions are fraudulent, for some are conducted fairly and honestly, but before you draw your savings from the bank and spend them for auction goods it will pay you to get the facts. For your own protection make it an unbreakable rule to confine your expenditures and investments to reliable firms and individuals. In dealing with them you are assured a square deal

that their growth would closely follow the amounts spent each year for advertising.

The local newspaper is the most highly regarded advertising medium. It was disclosed. In all, 929 companies answering the questionnaire used the local papers and 338 did not. The institutions buying space in local papers are evenly divided among all sections of the country. Comparing six media for selling personal trust services and considering their effectiveness from the standpoint of producing results, the speaker declared that the local newspapers should head the list. Folders and booklets can reach a limited audience, he observed, but the newspaper is the best medium for acquiring prestige and mass circulation. It should never be omitted, he urged.

### TRUST COMPANIES RANK NEWSPAPER ADVERTISING HIGHEST

The outstanding trust institutions of the United States are those that were pioneers in using advertising as a means of selling their services, a speaker told a conference of trust companies held in New York recently. He presented the results of a questionnaire sent out by the Trust Company Division, American Bankers Association, making an inquiry into the advertising practices of institutions doing a trust business. Three out of every four trust companies and banks engaged in extending trust service were found to be advertising. The opinion was expressed by the speaker

## Novelty Evening Frock of Pink Taffeta

Two-piece evening frock of pink taffeta, trimmed with chenille of vari colors and ornamented with ruffles and bows of pink chiffon. The bodice is semi-fitted, while the skirt achieves a novelty appearance with its points falling in the middle of the front and back. Silver kid slippers are worn.

## DAIRY FACTS

### DAIRY HINTS FOR SEVERE WEATHER

The dairy cow is a home market for feeds produced and if she is to pay the highest prices by producing milk, she must be kept comfortable in winter. That's just the way it is and the owner who doesn't keep his milk cow warm and dry will find that she will not produce milk at a profit.

"The cow that is not kept warm by a good barn and a dry bed will use a large part of her feed for this purpose and thus reduce the amount of nutrients available for milk production," says John A. Arey, dairy extension specialist at the North Carolina State college. "Then, too, grain must be fed liberally on those farms where it will be necessary to use low grade roughage for legume hays."

Mr. Arey recommends that fresh, clean water of a medium temperature be given the cows during winter. Cold water chills their bodies and feed energy must then be used to warm them. The water supply must also be convenient for the cows to use. Cows forced to go long ways through mud and rain for water do not drink enough for heaviest milk production. It is advised that an accurate feed and milk production record be kept on the cows during winter because some cows pay well for the feed consumed, while others do not. Accurate records are needed to locate the unprofitable cows. Mr. Arey states that the new year might be started in the right manner by the dairyman buying a pair of milk scales.

Another winter suggestion by Mr. Arey is to give the young heifer calves some extra feed and care during the cold months of December, January and February. A stunted heifer never makes a good cow, he states, and many dairy cows are under-sized because they were not properly fed when calves.

### Big Production Records Possible on Small Farms

Expensive equipment and high-priced herdsmen are not always necessary for making advanced registry records with cows, according to the dairy department of the New Jersey College of Agriculture. Good cows are the first requirement for good records, and many a man does not realize how good his cows are until he gives them a chance.

Fame and fortune have come to many a small breeder because he started official testing of his herd with what equipment and means he had instead of waiting until he had everything just right. It isn't necessary to break any records to make official testing a very profitable venture. Good ordinary records make additional values that pay big dividends on the money and labor involved.

The department further points out that the small breeder has some distinct advantages in his favor. He lives closer to his cows. He knows them better and they know him. He can always rig up some place to make his test cows comfortable, and by his personal care and attention overcome many of the advantages the big breeder may have in the way of elaborate equipment and expensive herdsmen. If the small breeder brings out a sensational producer, the credit, fame and fortune are all his and he doesn't have to divide it with anyone, except to give his wife due credit for her encouragement.

### Selecting Herd Bull Is Serious Dairy Problem

Every breeder of dairy cattle should study seriously the problem of herd improvement as the whole future of the herd is at stake when the bull is selected, says R. E. Waters, extension dairy specialist, Clemson college.

The problem of getting a better herd is largely one of having better young stock coming on. This is a matter of breeding and particularly of selecting the right bull.

The ability to produce milk is inherited through both the sire and dam, but since the sire is responsible for half the inheritance of each animal born in the herd, he is clearly the most important single factor in the development of the dairy herd.

To obtain the greatest possible improvement by use of the bull it is very important that due consideration be given to his pedigree, for both type and production. And where possible, select a bull that has some daughters, preferably some that have been in milk and proven their ability as producers. With the above points in mind a breeder can select a bull that will, with reasonable certainty, transmit to his offspring the desired type and production.

### Balanced Ration Helps

A slight change in the ration of eight dairy cows reported recently made a difference of more than \$40 a month in net profits from them. The change consisted in adding a por-

## The Great American Disaster Eye Strain

The strain of civil life falls most heavily upon the eyes, the most delicate and the hardest worked of any of the organs of the body. There is an intimate relation between eye strain, inefficiency and physical ills. All the physical activities of the body are made possible only through the expenditure of nerve force, which is our vital motive power.

Nerve exhaustion is the cause of most of our physical ills. Defective eyes, out of focus, use more than their allotted portion of this vital energy, thus robbing other organs of their energy and we often find under such conditions stomach, heart, liver and kidneys cease to do their work properly for lack of nerve force. This is what is known as reflex or "reflected" nerve trouble, with which millions of people suffer.

These facts lead to another important phase of the matter. The eyes, by making an extra effort, are some times able to overcome a considerable amount of defect, still holding themselves in focus so that the owner sees, although he is using much more nerve energy than he should.

Save your eyes and health by consulting a reliable experienced specialist. Remember it costs no more to consult Dr. Jones, the old reliable specialist, than one of little experience. Remember JONES' GLASSES SATISFY, There's a Reason. For superior service and better glasses call and consult

**Proper Hitch Will Save Tractor Power**

Much of Trouble Is Due to Incorrect Attachment.

Many farmers experience serious difficulty when they begin the operation of tractor plow outfits. Perhaps 75 per cent of this trouble may be laid to incorrect hitching of the plow to the tractor. If the plow does not run straight, level, and cut at uniform depths and widths, an entire season's plowing may be ruined and the machinery itself quickly worn out.

The plow should be adjusted to have proper "suction," and "land." The weight due to cutting, lifting and pulverizing the soil must be equally distributed on all the wheels in order that undue wear will not come on any part, and to give the wheel which operates the power lift sufficient traction to cause positive action in removing the plow bottoms from the ground. The hitch should be made so that the center line of the pull of the tractor coincides with the center line of draft of the plow. The center line of draft of a 14-inch plow comes about 2 inches from the land side of the bottom. On a 2-bottom plow it comes about 18 inches from the edge of the furrow wall. If the plow cannot be hitched so that these lines coincide, the plow should be favored. This means that the hitch should be made half-way between the two lines or else nearer to the center line of draft of the plow than to the center line of pull of the tractor.

A high hitch is bad because it tends to lift the plow out of the ground and take the weight off the wheels. This slows up the lift and thereby causes poor plowing. A hitch which is too low causes the plow to run "on its nose," and creates unnecessary wear on the share, increasing draft and doing poor work. Proper hitching considerably reduces the power necessary for plowing.

**POULTRY**

**POULTRY SUFFER FROM DISEASES**

Poultry suffer from colds and associated troubles in winter just as do human beings, but a little care and doctoring will help to keep down the heavy annual toll that these diseases exact from poultrymen. According to Dr. B. F. Kaupp, head of the poultry department at the North Carolina State college, the birds suffer most from diseases of the respiratory tract in cold weather.

Common colds result from the birds becoming wet or chilled because of poor housing, quick changes in weather or cracks in the house permitting a draft to blow on the birds. One of the signs of this disease is a discharge from the nose. Any bird so affected should be immediately removed from the flock, states Doctor Kaupp, because the discharge will contaminate the drinking water and give the disease to the other birds. In the case of colds, the nose should be cleared out by syringing with a 10 per cent solution of argyrol or a purple solution of permanganate of potash. In the case of roup where there is a stinking discharge, pure iodine should be used in the syringe and the bird treated morning and night until cured.

Weak pullets come from crowding in the summer and they must have proper feed and care in the laying pens. Most of them will develop sore head even in a new house. These pimples should be greased with carbollized grease.

Sore eyes is another familiar winter-time trouble. The eyes need to be swabbed out, states Doctor Kaupp, and a drop of a 10 per cent solution of argyrol or a 1 per cent solution of sulphate of zinc placed in the eye twice each day.

Canker or diphtheritis is a winter disease which attacks the mouth. It forms a spot where the sore is covered with a cheesy material. Scrape this off, states Doctor Kaupp, and use on it a canker pencil, pure iodine or powdered chlorate of potash. Repeat once each day until the sore has been cured.

**Early Hatched Pullets Produce Eggs in Winter**

The results of laying tests at the Massachusetts experiment station show that early-hatched chicks of the heavier breeds make the best winter layers. Rhode Island Red pullets which were hatched in March gave a winter egg production of 42.05 eggs. April-hatched pullets gave a winter production of 35.40 eggs and May pullets gave a production of 22.50 eggs. The profit in producing eggs comes largely from producing them at a season of the year when they are highest in price. This means that we must plan to produce eggs during the winter months. The Massachusetts experiment shows that, with the general-purpose breeds, the early-hatched chicks are the ones which mature in time to start laying in the latter part of October and continue throughout the winter.

**Poultry Hints**

Cull out the hen that is persistently broody.

Isn't it funny? Almost everybody's hens start to lay like fun when the price drops.

The incubator should be located, preferably in a cellar, having good ventilation. If no such location can be had, a room facing the north is the next best place.

Goslings dress easier in warm weather than they do in cold, as the feathers do not set so tightly, and in picking them the flesh is not so likely to be torn.

Many of the old, unlit poultry houses now found on farms could be remodeled at little expense and trouble in such a way that they would provide a comfortable home for the flock.

Plan to get chicks out on the ground in the sunlight as soon as possible, or for a short while each day.

It will soon be the season for gupe worms, and all yards not sown to green feed should be spaded or plowed up. If the worms are thick, scatter lime about the yard before plowing.

Brood coops for the crop of growing young fowls need strong wooden floors and the openings in front should be closed tight each night to keep down the losses from rats and weasels.

When the eggs begin to hatch, the hen should be confined and not disturbed until the hatching is complete.

Hens in the breeding flock should be allowed out of doors in direct sunlight during the winter and encouraged to take plenty of exercise.

The little chicks are not one bit better off where you insist on feeding them before they are 48 hours old. In fact, their chances for developing into useful birds are much enhanced by such delay.

**This modern age knows that Camel goodness is dependable**

THIS modern age is the hardest to please ever known, and it delights in Camel. The smokers of today find tobacco enjoyment in Camels, for their goodness always is so dependable. The choicest tobaccos, and the most superb blending known to the smoking art are Camels.

In Camel you will find out what modern smokers demand—a smoothness, mildness and mellowness that you've never known before. That's why Camels never fail to meet the strict, exacting demands of present-day smokers. This modern age knows the sure call to smoke enjoyment: "Have a Camel!"

**The DAIRY**

**COMPLEX FEEDS FOR DAIRY COW**

When an animal is well it does not need medicine, and when it is sick it needs specific treatment for its disease. For this reason, dairymen who buy complex mineral mixtures to feed to their animals are not only wasting their money but may be harming their cattle as well, according to Prof. L. A. Maynard at the State College of Agriculture at Ithaca, N. Y.

Aside from common salt, the only minerals that are needed as supplement to ordinary farm rations are calcium, phosphorus, and sometimes iodine. Mixtures containing such substances as glauber's salts, epsom salts, copperas, potassium chloride, sulphur, iron oxide, and other compounds have no justification from the standpoint of nutrition, and the continued feeding of them may be positively harmful.

Magnesium, iron, potassium and sulphur, which are included in most mineral mixtures, are valueless ingredients because common rations are sufficiently rich in them. Laxatives, copperas, sodium bicarbonate, and sulphur are drugs rather than feeds and should not be fed to a well animal.

Some companies argue that epsom salts and glauber's salts are needed in the feed for farm animals because of their laxative action. In answer to this it should be recognized that the best way to make a ration laxative is to select properly the feeds included in it. Furthermore, the small amount of these purgatives in the mineral mixture cannot possibly have the desired effect when an animal is constipated.

Cod liver oil, which is sometimes included in mineral mixtures, helps calcium assimilation in growing pigs, but it has been proved ineffective for dairy cows. Also, when cod liver oil is fed at all, it should be purchased unrefined with other materials, since it gradually loses its value as an aid in calcium assimilation when mixed.

Compounds of calcium and phosphorus which are suitable for feeding may be purchased at from one to three cents a pound. Complex mixtures always sell at much higher prices than this, and the manufacturers try to justify their price by exaggerated and untruthful claims about their value. The complex products are actually worth less than the mixture containing calcium and phosphorus alone because the percentage of the needed minerals is lowered by including the other substances which serve only as a filler.

**Pumpkins Useful as Cow Feed During the Winter**

Where pumpkins are extensively grown they are used for sow feed in the winter months. Possibly they could be kept all winter under proper conditions of cold storage, but they

are such a bulky food that a large place is required to store enough of them to last a large herd through the winter months. They are not only hollow inside, but their shape makes them space consumers in storage. The pumpkin is nearly equivalent to silage for feed, but when we have the problem of feeding many cows, it is much easier to build a silo than to build a receptacle for several tons of pumpkins. Moreover, the pumpkins must be cold enough to prevent them from decaying, for the air will get into any receptacle in which they can be placed. With silage, the temperature makes little difference if it does not reach the point where it freezes. In the feeding of pumpkins about 40 pounds per day per cow may be fed to advantage, and with some cows the milk production will be greatly increased. With some cows, however, the effect of feeding pumpkins is to cause the cow to lay on fat and decrease their milk production.

**Dairy Hints**

Calves should have fresh water even though they are receiving milk.

Dairy barns need good floors. Concrete is a fine material for this purpose.

To insure fall freshening get cows with calf between December 1 and March 1.

Cows that are given a rest of from six to eight weeks and liberally fed before calving usually produce more milk during the succeeding lactation period than cows that calve in this condition.

Most cream separators will do a much better job of skimming the milk when it is warm.

Drinking cups in the barn are a good investment for most dairymen. Cows need lots of water and it should be supplied liberally.

Select a bull of good individuality. A bull should be equal to, or better in every regard, than the cows he is bred to, or his offspring will be bred down and not up.

**When Sheep Eat Wool**

Did you ever find that your sheep eat wool? Not very long ago a farmer found that a number of his sheep died. So he examined one of them and found wool in its digestive organs. The sheep ate wool because the rations fed were lacking in certain elements. A mixture, made as follows, solved the problem: Mix 10 pounds of common salt, 2 1/2 pounds of steamed bone meal, 1 1/2 pounds of air-slaked lime and 1/2 pound of iron sulphate. Keep this mixture before the sheep in boxes.

**Time to Plan for Next Winter's Egg Supply**

Culling the flock, early hatching and proper feeding and care will put pullets in the best condition for laying in October, November and December, months of rising prices for eggs, says

Cora Cooke, poultry specialist with the agricultural extension division of the University of Minnesota. In December, 1921, she says, eggs were worth 40 to 50 cents a dozen. In January they had dropped to 25 and 30 cents, with the feed cost about the same.

Urging immediate planning for next year's egg production, Miss Cooke advocates hatching of all heavy-breds by April 15 and light breeds by May 15. Culling through the fall and winter will help to raise the flock average and lower the feed bill. "The person who secures eggs in October, November and December makes the profit," she says.

**Protection for Bees in Winter Very Important**

On many farms where a few stands of bees are kept to furnish a home supply of honey, considerable losses are experienced during the winter months on account of failure to understand the habits of this insect. When going by a hive of bees in the winter time we often note the incessant humming and buzzing of the bees. The colder it is the faster they hum. They do this in order to keep up the temperature sufficiently to keep them alive. The harder they have to work the more likely they are to exhaust their vitality and be unable to gather honey the following summer. Wind-breaks around the hives, together with other protection in the way of making the hive close and free from all drafts, will pay back returns.

**Recommend That Mash Be Handy at All Times**

In addition to the scratch grain and the green feed, it is recommended that a mash be kept before the birds at all times. The following ones are economical and effective: (1) 200 pounds of ground oats, 100 pounds of ground corn and 60 pounds of a pack-meal and bone; (2) 100 pounds of ground corn, 100 pounds of ground oats, 100 pounds of bran, 100 pounds of middlings and 80 pounds of the meat and bone feed; (3) 100 pounds of ground corn, 200 pounds of ground oats, 100 pounds of middlings, 100 pounds of gluten feed and 100 pounds of the meat and bone product.

**Farm Hints**

Substantial and convenient farm buildings save feed and labor.

Egg white is a good remedy for slight burns or scalds. It excludes the air and gives instant relief.

The four horsemen of better farming are soil building, balanced cropping, quality production and orderly marketing.

Working with the head indoors in bad weather will make working with the hands outdoors in good weather more profitable.

A hydraulic ram will operate if the water delivered to it has a fall of at least three feet and flows at a rate of at least two to six gallons a minute.

**NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION**

In Joint Common School District No. 24, Latah County, Idaho.....  
Notice is hereby given, That the Annual School Meeting of Joint Common School District No. 24, County of Latah, State of Idaho, will be held on Saturday the 16th day of April, 1927, and the said meeting shall convene at 1 o'clock P. M. on said day and continue uninterruptedly until the business properly coming before said meeting is disposed of, at the school house in said district; that at said meeting the following business will be transacted:  
1. One trustee to serve a term of three (3) years will be elected.  
2. The length of time school shall be taught in said District for the ensuing year and the seasons of the year in which the same shall be taught will be determined.  
3. That at the said annual meeting in said District there will be determined the amount of money to be raised by special taxation, the levy for which purpose shall not exceed ten (10) mills on each dollar of taxable property of the District, and shall determine the purposes for which the money derived therefrom shall be expended, naming in each instance the proportion of the whole amount which is to be used for the various and separate purposes.  
4. That at said meeting general questions pertaining to school and school interests will be taken up and disposed of.  
The name or names of fall candidates for election of trustees together with the term for which nominated shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election.  
That the election at said meeting will be by secret and separate ballot.  
Dated this 25th day of March 1927.  
A. K. CARLSON,  
Clerk of Joint Common School District No. 24, of Latah County, Idaho. 13-3

**Flexibility Is Big Crop Factor**  
Rotation Is Long Recognized Principle of Farming Economy.

(Prepared by the United States Department of Agriculture.)  
Flexibility in crop rotation is a long recognized principle of farming economy. Agricultural history contains many illustrations of the use that has been made of this idea from the Middle Ages to the present time, especially in Europe. It is commonly observed, however, says the bureau of soils of the United States Department of Agriculture, that uniformity of soil, even on a single farm, is most unusual, and that one field may require an entirely different rotation of crops from another adjoining it. A rotation best suited to a low-producing sandy soil is unlikely to be suited to a highly productive silt loam. Again, a hillside field, subject to soil washing calls for different rotation management from a field on a flat area.

**Each Farm Has Problems.**  
Each farm presents its own problems. The farmer who farms more or less with live stock is not so much concerned with rotation as with the acreage of crops necessary to meet his feeding requirement. The truck grower is concerned primarily with the question of crops in relation to market conditions. In either case rotation is a means to an end, with two aspects: The growing of the desired crops in a manner, or in different rotations, best suited to the soil and crop conditions; and the dovetailing of the different rotations so as to enable the farmer to realize annually the required acreage of each crop he desires.

**Influencing Conditions.**  
Still greater flexibility in crop rotation may be needed, owing to local conditions which may arise, such as insect pests, crop diseases, or weeds. Changing the common fixed rotation may reduce army worm injury, or an additional intertilled crop may help combat some obnoxious weed. Changes in economic or market conditions may compel rotation changes. Any cropping system which will permit of easy alternation is preferable to one that does not possess this quality of elasticity.

**Hardest Alfalfa Seed Is Brought From Canada**  
For many years it was thought that Grimm was the hardest known variety of alfalfa and, for that reason, was most desirable for this region, but recently Ontario Variegated, although not a new variety, has come into prominence and has proved itself fully as hardy as Grimm, according to Prof. L. A. Dalton at the New York state college of agriculture at Ithaca, N. Y.  
When Grimm was considered the only good variety to plant, the farmers had to pay high prices, and, frequently, they resorted to common alfalfa as a substitute. The common alfalfa, however, came from many sources where the climate was mild, and therefore the seed was unadapted to our severe winters.  
Although Ontario Variegated has been grown in Canada for half a century, the production has not been large enough to meet the demand from the United States until during the past five years.  
Ontario Variegated is like Grimm so far as one can tell, says Professor Dalton, and this has a bearing on the question of Grimm versus Ontario Variegated. Grimm is higher priced,

and in some instances the Ontario Variegated is purchased and resold as Grimm.

The best way for farmers to get genuine hardy Ontario Variegated alfalfa seed, he says, is to buy from reliable seed men and insist on this variety.

**Value of Horse Manure When Properly Cared For**  
Experiments at Purdue university indicate that when properly cared for, the manure from a well-fed horse is worth \$14.75 per year; from a dairy cow \$18.75; from other cattle \$11.60; from a sheep \$2.25; and from a hog \$2.10. At present, however, only a few farmers are realizing these values because they do not care for the manure properly.  
Over half the total fertilizing value of the manure, solid and liquid, is contained in the urine; therefore every reasonable precaution should be taken to prevent its loss. The urine usually contains about three-fourths of the total nitrogen and four-fifths of the total potash. And these are two of the most important elements needed for plant growth.

Keep boarder cows—until you discover that they are boarders.  
Stinking snout which grows in wheat brings a loss that means defeat.  
More than 5,000,000 forest trees were planted in New York state this fall.  
Cutting the weed trees in the woodlot will improve the quality of the stand in future years.

**FARM NOTES**

Keep boarder cows—until you discover that they are boarders.  
Stinking snout which grows in wheat brings a loss that means defeat.  
More than 5,000,000 forest trees were planted in New York state this fall.  
Cutting the weed trees in the woodlot will improve the quality of the stand in future years.

ASSISTANT Q. M. G.

Brig. Gen. F. H. Pope at desk in the War department just after he was sworn in as assistant quartermaster general of the army.

**His Money's Worth**  
Springer—So you paid \$50 for a seat at the prize fight? Did you get \$50 worth of fighting?  
Hensley—I did when my wife found out about it.

**Artificial Light and Heat Good for Fowls**

Artificial heat is the latest modern addition to poultry management that may prove successful. Authorities say practical poultrymen have kept up egg production during cold snaps by taking the chill off the air and preventing the drinking water from freezing.  
Without lights the hens can only put in about half the time they have in the summer to consume feed. Artificial lighting methods have broken the long periods of idleness from darkness to daylight. Given more working hours, the hen has responded with a larger egg production for the year. The increase is obtained during the winter season when eggs are least plentiful.  
An all-mash method of feeding poultry has been reported favorably. The dry feeds are all crushed or ground and mixed in proper proportions and fed in a hopper to which the hens have access.

**Well Grown Pullets Are Best for Eggs in Winter**

Winter egg production is largely obtained from the pullets that are well grown, properly fed and carrying a surplus of flesh. Old hens that have produced eggs for one laying year normally rest during the winter and start laying in February and March, advises D. C. Henderson, extension poultry specialist at South Dakota state college.  
Mr. Henderson advises keeping a flock consisting of two-thirds pullets and one-third hens. The pullets should be forced for winter egg production through liberal mash feeding. The old hens should be allowed to rest during the winter and kept for the production of hatching eggs next spring.

**Dormant Spray for Cherries**

Sour cherries will not often require a dormant spray, but if needed the spray recommended for peaches may be used. The sprays are applied as follows, using blue-sulphur 1 1/2 to 50 or bordeaux 3-4-50 plus one pound of arsenite of lead: Make the first spray just before the cherry trees bloom, the second when the shucks are dropping from the young fruit, and a third spray following the second in about two weeks. To control cherry leaf spot, about two additional sprays should be applied after harvest. The interval between them should be about three weeks.

**Imported Varieties of Clover Not Recommended**

Tests of clover seed on experimental plots at Ontario Parish, in Knox county, Illinois, showed severe winter killing among all imported varieties of clover. Of the Chilean, Rumanian, Hungarian and English clovers more than 75 per cent were dead. The French seed, which is supposed to be fairly hardy in Illinois had less than a 10 per cent stand, and of the Italian there was hardly a plant remaining. The most successful stands were from seed from Ohio, Michigan, Canada and Idaho, in the order named.

Under present national regulations all of these foreign clovers are stained red so that the purchaser may recognize them immediately and be warned that they are not satisfactory for planting in this country.

**A Small Lock**

In the days of Queen Elizabeth, Mark Scallot, a blacksmith, made a lock consisting of 11 pieces of brass, iron, and steel, all of which, together with the key, weighed but one grain. He also made a gold chain with 43 links, and when he had finished it he attached it to the lock and key, put the chain round a flea, and that nimble insect easily drew the lot.

**Mining Term**

In mining, the term "mucker" is often applied to a laborer who performs unskilled work in and about the mine, including shoveling ore, loading and unloading mine cars, etc.

**Cleanup Notice**

Next Tuesday, April 19, has been designated by the Village Board as Cleanup Day. On this day all residents and property owners are requested and urged to collect in boxes or sacks or other convenient receptacles, all rubbish about their premises and place same in a convenient place to facilitate its removal to the dumping grounds by the trucks furnished by the Village. The rubbish must be ready Tuesday morning when the teams arrive as they will not make a return trip.  
By Order of the Village Board. 15-1

**PUBLIC SALE UNDER MECHANICS LIEN**

Public notice is hereby given that we will on Wednesday, April 27th at 11 o'clock A. M., 1927 at the front door of the Deobald Brothers Garage, Main Street, Kendrick, Idaho, sell at Public Auction to the highest bidder for cash; One Reo Six Roadster bearing Washington 1926 License No. 280704, to satisfy a bill for Twenty-eight dollars and twenty-three cents (\$28.23) for storage, repairs and other labor upon said car together with the costs of this sale. This car having been left with us on December 13, 1926, by party whose

name is unknown to us. Deobald Bros. 15-2t

**Notice of Village Election**

Notice is hereby given that an election will be held at the City Hall, April 26, 1927, according to law, to elect four members of the Village Board to succeed Trustee Newton, Trustee Long, Trustee Raby and Trustee Deobald, whose terms then expire. Nominations for these offices may be made by a mass meeting or caucus of ten qualified electors of the village who will certify their nominations to the Village Clerk at least ten days prior to said election. Nominations may also be made by petition signed by ten or more qualified electors of the Village, said petition to be filed with the Village Clerk at least ten days prior to said election.

Registration books are open at the office of the Village Clerk. By order of the Village Board, Ralph B. Knepper, Clerk. 13-4

**Statement of Ownership**

Of the Kendrick Gazette, published weekly at Kendrick, Idaho, for April 1927.  
State of Idaho )  
County of Latah ) ss  
Before me, a Notary Public in and for the State and county aforesaid, personally appeared the Publisher of the Kendrick Gazette.

That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of the total amount of bonds, mortgages, or other securities are: None.  
R. B. Knepper,  
Publisher and Owner.  
Sworn to and subscribed before me this 11th day of April 1927.  
F. K. Dammarell, Notary Public.

**Notice to Contractors**

Office of the Clerk of Good Road District No. 2, Juliaetta, Idaho.  
Sealed bids will be received at this office until April 30th, 1927, at 10 o'clock a. m. and then opened for the following improvements:  
Building of a 52 foot span wooden bridge across the Little Potlatch creek, Northwest of Juliaetta, near the James Whelan ranch, including two piers. Material to be furnished by said Good Road District No. 2. Plans and specifications may be obtained from the Clerk or Secretary of said District.  
Dated at Juliaetta, Idaho, this 14th day of April, 1927.  
A. W. BEHRENS,  
Clerk Good Roads District No. 2, Juliaetta, Idaho. 15-3

**The Modern Bank**

The modern bank not only provides the usual facilities represented by its several departments such as Commercial, Investments, Savings, Safe Deposit, etc., but in addition seeks to give council touching business problems—both general and special—advises in investment matters, and in every way desires to be helpful to its customers even beyond the receiving and paying of deposits and the loaning of money.

The facilities we offer for the whole range of financial transactions make it easy to transact business here and the helpful cooperation extended is often of great assistance to our customers.

**Kendrick State Bank**  
"Your Home Bank"  
KENDRICK, IDAHO

**LOCAL NEWS**

Born to Mr. and Mrs. Walter Thomas, Saturday April 9th, a son. He was named Walter Martin Jr.

Margaret McDowell spent the week end at the home of her brother, Egnaz, at Orofino.

Herman Schupfer returned last Friday from California where he spent the winter. He will have charge of the construction work of the new power line which will be built from Troy to Deary and Bovill by the Potlatch Consolidated Electric Co. this spring.

The town council has designated next Tuesday as spring cleanup day. Don't forget the date.

Mr. and Mrs. Lloyd Bennett of Kooskia were Kendrick visitors last Sunday.

Dr. Lyle of Lewiston spent the week end at the home of his daughter, Mrs. Harry Benscoter, on American ridge.

Mr. and Mrs. Robert Spencer and little son spent the week end at the home of Mr. and Mrs. Geo. Leith.

A. Wilmot went to Spokane last Friday on business.

Frank Crocker took delivery of a new Whippet coupet last Sunday. He sold his Chalmers touring car to J. L. Johnson.

Mitch Blackburn of Cavendish spent the week end at the home of his parents, Mr. and Mrs. C. C. Blackburn.

It is said that Henry Ford has enough money to buy the state of Vermont. He couldn't buy Idaho—it isn't for sale.

Mr. and Mrs. Roy Thompson and Mrs. Simpson of Craigmont attended the funeral of Mrs. Sarah Jacobus on American ridge last Sunday afternoon.

Carl Lohman bought a pair of new Ford cars recently. One is a touring and will be used by his boys and the other is a coach and will be reserved for the "old folks."

Mr. Brody of the Ruddach Motor Co. of Moscow, was transacting business in Kendrick Tuesday of this week.

Mrs. Silvie Cook visited her mother, Mrs. Dean Wright over the week end.

Herb Sloom of the Deary community was transacting business in Kendrick Tuesday of this week.

Carl Kinzer of Lewiston was a Kendrick visitor last Sunday.

Elmer Bechtol of Moscow was a Kendrick visitor last Sunday afternoon.

E. A. Deobald was transacting business in Moscow the first of the week.

Mrs. Theo. Hanson and son, Harold, and Miss Evelyn of Troy were Kendrick visitors Tuesday afternoon.

Miss Nannie Weaver spent the week end with her sister, Mabel, at the Wade Keene home on Big Bear ridge.

Mrs. Morley left yesterday afternoon for Greer to visit her son, Melvin.

L. S. LaHatt, local jeweler, was transacting business in Troy the first of the week.

Dr. and Mrs. Geo. W. McKeever and little daughter drove to Lewiston Wednesday afternoon.

Miss Louise Wilson, a student at the University of Idaho, arrived Thursday afternoon to spend the week with Miss Edna Janes.

Wm. Zum Hofe, one of the prosperous farmers of the Fairview section of Potlatch ridge, closed a deal Wednesday of this week for the purchase of 160 acres of fine land from A. E. Evans.

Mrs. Martin Thomas and Mr. and Mrs. Harold Thomas, accompanied Walter Thomas to Spokane, yesterday evening, to see the youngest member of the Thomas family, Walter Martin, Jr.

Mr. Headricks of Moscow is assisting at Cook's Barber shop this week.

Miss Elizabeth Lyle, trained nurse of Lewiston, arrived yesterday morning to care for the infant daughter of Mr. and Mrs. Walter Tinsley, who is quite ill.

Walter Thomas arrived Wednesday afternoon from Spokane

to visit home folks for a short time. Mr. Thomas is credit man for the Winship Music Co. and is also leader of the best orchestra in the city, consisting of eighteen highly trained musicians.

Mrs. Jennie Plummer returned Thursday afternoon from Spokane and coast points where she spent the winter.

Al McKee of Lapwai was transacting business in Kendrick Wednesday of this week.

Frank Boyd transacted business in Lewiston Thursday morning.

Harry Fowler of Lewiston was transacting business in Kendrick yesterday.

**One Minute Sermon**

What does Satan pay you for swearing? asked one man to another. Nothing was the reply. Well, you work cheap—to lay aside the character of a gentleman, to inflict such pain on your friends and to insult the God who made you; and to risk your own precious soul and lose heaven—all for nothing. You certainly work cheap. You can do better and more noble things and receive better pay. Thou shalt not take the name of the Lord thy God in vain, for the Lord will not hold him guiltless who taketh his name in vain.—Contributed.

**Linden Items**

W. M. Sadler and son, who have employment at Troy, spent the week end at home. They were accompanied home by Mrs. Joe Perry and children.

Mr. and Mrs. Gus Farrington and two small children returned from Lewiston the first of the week where they have been taking medical treatments.

Miss Virginia Allen returned Saturday from a few days visit with friends at Troy.

Aunt Carrie Allen spent Sunday with Mrs. Starr.

Walter and Cecil Darby returned the first of the week from a visit at Coeur d'Alene, driving a Chevrolet car which they purchased on their trip.

C. P. Israel started his sawmill last Tuesday.

Miss Helen Keeler is assisting Mrs. Clem Israel with cooking for her mill crew.

Mr. and Mrs. A. Alexander were Sunday visitors at the home of Louis Alexander.

Mr. and Mrs. Arthur Bohn, Miss Mae Enger and brother, Norman, were Spokane visitors several days last week.

Mr. and Mrs. Roy Bohn spent Monday afternoon at the Arthur Bohn home.

Mrs. McPhee spent the week end with her daughter, Mrs. Edgar Bohn.

C. E. Harris and Cleve McPhee have been grading the roads the past several days.

Mrs. Carr, Millie Abrams, Mrs. Edgar Bohn and daughter, and Mrs. McPhee spent Tuesday with Mrs. George Garner, the occasion being her birthday.

The seventh and eighth grade examinations were held at the church Wednesday, Thursday, and Friday, with Miss Virginia Allen as examiner.

**Dixie Jubilee Quartet Coming**

The Dixie Jubilee Quartet will appear at the Methodist Church on Monday April 25th at 8 p. m. This is said to be one of the finest entertaining troops on the road. Program consists of banjo and ukulele solos and duets, violin and saxophone selections, original cartoons, piano solos, vocal solos and lots of male quartet numbers. 15-1

**Background**

If he knows five or six French items on the bill of fare, can quote reviews of books he has never read and wear golf pants although he never plays, his friends say he has "background."—Detroit News.

**Religions in Egypt**

More than nine-tenths of the inhabitants of Egypt are of the Sunnite Mohammedan faith. In the remaining one-tenth are Copts, Jews and Christians of various denominations.

**Get, Save and Give**

John Wesley's motto concerning money is a good one and we pass it to you for what it is worth: "Gain all you can, save all you can, give all you can."—Ozark Southern Star.

**The Miserable Male**

A lecture was recently given on "How the Worm Conducts Its Courtship." Any married woman could talk at length on a subject like that.—London Passing Show.

**Treat Oats for Smut Control**

**Good Plan to Sprinkle Seed With Weak Solution of Formalin.**

The smut diseases of oats can be largely controlled by treating the seed before planting with a weak solution of formalin. The treatment will insure clean oats and bigger yields. There are nine important points to observe when treating the oats and these as outlined by G. W. Fant, extension plant disease specialist at North Carolina State college, are as follows:

1. Seed to be treated should be placed on a hard-surface floor (concrete or wood) where the moisture from the treating solution will not be injurious.

**Solution Required.**

- One-half gallon of treating solution is required to treat each bushel of grain.
- The amount of solution needed for treating the seed is calculated from the amount of seed to be treated.
- Prepare the solution in the proportion of 1 pint of commercial formalin to 40 gallons of water. If, for instance, 10 bushels of seed are to be treated, 5 gallons of treating solution will be needed. Prepare this by adding 1/4 pint of commercial formalin to 5 gallons of water (proportion the pint to 40 gallons water).

**Sprinkle on Grain.**

- The solution should be sprinkled on the grain as it is shoveled from one pile to another. Use the ordinary sprinkling can and scoop shovel for this purpose. See that all the grain is wet in the sprinkling.
- After the sprinkling is over, stir the seed with a shovel so as to insure all the grain being wet.
- Cover with sacks for one to two hours in order to hold the fumes. Then spread the seed out in the air to dry.
- The treating solution grows stronger with age because of the evaporation of water. Do not use a solution which has been allowed to stand for several days.
- Make allowance for the swelling of the grain by regulating the drill so as to sow the proper amount per acre.

**Five Essential Parts Complete Hen's Ration**

A complete ration consists of five essential parts:

- Grains and their by-products.
  - A protein concentrate, as skim milk, buttermilk, meat scraps, vegetable oil meals.
  - Minerals, as supplied by milk, meat scraps, bone meal, or a mineral mixture.
  - Vitamines, as found in yellow corn, green feed, and immature cut clover or alfalfa hay.
  - The anti-rachitic factor, as supplied by direct sunlight, cod-liver oil, and to some extent by green feed and immature cut clover or alfalfa hay.
- When it comes to the vitamins and anti-rachitic factor the path is straight and narrow; either the birds must be permitted out of doors where they can get direct sunlight and green feed, or if confined indoors, cabbage or alfalfa or clover hay must be fed, and as much direct sunlight admitted into the house as possible, if profitable egg production is to be maintained and high mortality of birds is to be prevented.

**Wise Poultry Breeder Prepares for Spring**

The wise poultry breeder will now be prepared for the spring months. It is advisable to breed from hens that have completed at least one year's lay. Hens must be good producers to pass rigid culling; broody individuals can be marked as pullets and discarded for breeding; hens must be physically strong to lay heavily in their pullet year; undesirable characteristics can be detected during the first year and these individuals left out of the breeding pens; hens usually produce larger eggs than pullets in the spring, and hence produce larger and better chicks.

The ideal fowl for the breeding flock should be early maturing, good size for the breed, have a short and broad head, bright red comb, bright eyes, well-shaped body and standard feathering for the breed.

**Good for Chick Mash**

Ground oats and bran would be good ingredients for a chick mash, especially if you sifted the hulls out of the oats which can be done by sifting through mosquito netting. Rolled oats are also acceptable, but should be rubbed in the hands to break the flakes. It would be better to use steel-cut oats. The addition of corn meal to the mash would make the mash a little more palatable and would improve it. Keep it before the chicks all the time.

**Protect Young Trees**

Young fruit trees must be protected from rabbits at all seasons of the year and the best method is to use a guard of galvanized wire screening or hardware cloth about six inches in diameter around the tree. Force it into the ground two or three inches and allow it to extend up the trunk at least two feet. This will guard against mice as well as rabbits. The use of cloth, paper, or corn stalks is undesirable as insects accumulate under them and they harbor rodents.

**The Glad Easter Time**

Easter time is here again and we are glad for the thoughts it brings, also that it is Spring's herald that the bright sunshine and flowers are here once more.

**Ladies Silk Hose**

Evenglow and pearl blush are two new shades added to our already long list of colors. We have them in full fashioned style with low cut sole for use with pumps. A rare beauty at the moderate price of

**\$1.95**

Others as low as 60c

**Men's Neckwear**

Your Easter tie is here. A full line of the very latest. Come in and see the newest "Bat Wing," this is the nobbiest thing ever and made of pure silk. Retains its shape. Price

**\$1.00**

Others as low as 22c

**New Collar and Cuff Sets**

Just received, a big assortment of Collar and Cuff Sets, made of lace, silk or linen, also pretty vestees. Come in and see them. Prices from 40c to \$1.75

**New Hats For Men**

To top off the new suit we had a new shipment of Men's hats arrive for Easter. Come in and get yours. Priced from \$1.75 to \$6.50

**Groceries! "Gold Crust" bread is simply great. No higher than the common kind, has about 4 slices more, sell for 10c**

Choice roasts or steaks from No. 1 prime steer. They are delicious. Also a full stock of choice fresh vegetables.

**KENDRICK STORE CO.**

"The Quality Store"
