Clipped From Papers Published in Latah County.

Work Into Seed Crops

Many may not really realize that such is the case, but it seems to be a fact that farmers of the upper Potlatch country are working more and more toward the production of seed crops. Dealers are learning that seeds grown in this section are of excellent and uniform quality, and are urging that more attention be given them by our farmers. This year there will be more than 1000 acres of peas alone grown here for seed, under contract.

A large percentage of the local potato crop will be absorbed by seed firms, who have found that seed potatoes grown here have no equal anywhere in the United States.

This section produces excellent grass crops. Alfalfa, used here entirely for hay, would yield well in seed. The same is true of timothy, vetch and other grasses.

Garden seeds produce here in abundance. Look at the radish, carrot, baga, beet, lettuce and other varieties that go to seed in the garden every year, after the family has used what they want. An old radish plant in full maturity and loaded with seed pods will cover a patch of ground 4 feet square and yield a pint of seed. What would an acre of such plants yield? How many five cent packages? Though the crop could not be sold that way, but it ought to be profitable anyway.

In time this will come to be known as a seed growing country and a good one. Seeds grown here will have preference in the markets, north, south, east and west, just as Idaho potatoes, now selling around \$4 at Chicago, have the preference over all others in the markets of the country.—Deary Press.

Are Making Progress

At the meeting of the Farmers Union last Saturday afternoon the question of erecting and equipping a potato storage warehouse was again taken up and discussed, but no definite action was taken. Several contractors and builders are figuring on the building but more data as to the best construction for such a building is being sought. However, it was the consensus of opinion of those present that it should be built of tile and made as near fire-proof as possible and that some system of heating should be used instead of undertaking to make it entirely frost proof in the extremely cold weather, this being the mode of construction used in southern Idaho where such houses are now in use.—Genesee News.

To Build New County Jail

Sealed bids for construction of a new Latah county jail will be received at the office of the clerk of the board of county commissioners to 1 p. m. June 6, according to notices ordered published by the commissioners in session Friday and Saturday.

Each bid must be accompanied by a certified check payable to the county for five percent of the amount of the bid. The commissioners reserve the right to reject any and all bids.

Plans for the building may be obtained from the office of Whitehouse & Price, Spokane contractors, with whom the county commissioners entered into an agreement for architectural work Saturday.

The jail is to be erected on the vacant lot directly east of the present court house, same block the building occupies, and is estimated by the commissioners to cost about \$20,000. The building is to be two stories and will be of modern brick construction.

In addition to housing from 25 to 35 prisoners there will be special quarters for women. Removal of the jail from the court house will give additional office

Appointed Local Registrar

Frank Nesbit received the appointment of local registrar of births and deaths from the State Board of Health last week. He will be registrar for Juliaetta, Cameron, Cavendish, Crescent, Leland, Linden, Park, Southwick, Teakean and Kendrick.

THE FIRST NEWSPAPER PUBLISHED IN KENDRICK

Copy of Advocate Found in Old House Here.

Oscar Raby brought a copy of the first issue of the first newspaper ever published in Kendrick, to the Gazette office recently. The paper was called the "Kendrick Advocate" and was published by H. L. Frost, the date of the first publication being July 4, 1890. The subscription price was \$2.50 a year. Oscar found the paper in the attic of the old house now owned by C. C. Blackburn. The name of the paper was later changed to the Kendrick Gazette. Following are a number of interesting items that appeared in the Advocate 37 years ago:

D. S. Wright sent in a sample of currents that would take a premium anywhere.

Townsite Agent Potter is now at his home on his fine fruit farm of 200 acres adjoining town, which he purchased for \$3,000. Mr. Potter would not take double that amount for his bargain.

Samples of spring wheat standing five feet high, with magnificent heads and of a healthy, dark green color were shown on the street today. The grain was from a field on George Wright's place, about a mile above town.

Around the world in sixty days is a common expression, but to move a printing office nearly fifty miles overland, set up and print a paper within the past sixty hours. The only assistance the publisher has had in accomplishing this feat—and pardon his pride in considering it as such—was that rendered by Mr. R. M. Hathaway, his able and valuable assistant, who has contributed his full share to the appearance of the Advocate, both mechanically and editorially, and to whom a large share of the credit is due.

Messrs. Helpman and Wilcox have arrived and commenced the erection of a cabinet store and furniture house.

The formations about Kendrick give every indication that in its hills are treasure deposits of high grade coal. Already one fine coal prospect is being worked. The grade of coal is better and the ledge more extensive as its course is pursued into the mountains. Several other coal locations have been made and the owners will at once proceed to prospect them. (The foregoing paragraph was written on the Fourth of July and published close to an advertisement of "Pure Wines and Liquors." In those days there was some excuse for such an editorial pipe dream.)

U. of I. Cow Completes Record

Waikiki's Esther's Margie No. 533373, a purebred Jersey cow owned by University of Idaho, Moscow, Idaho, has completed a 365-day official production test in which she yielded 554.45 lbs. of butterfat and 11,813 lbs. of milk. Margie was started on this test at 3 years and 7 months of age and she carried calf for 184 days of the year. Her milk averaged 4.69% butterfat for the test. With this record she qualified for the Register of Merit of the American Jersey Cattle Club.

Born to Mr. and Mrs. C. Hoisington Wednesday morning, a boy.

space for the lower floor. The sheriff's office probably will be retained in the court house.

Commissioners will not call another business session until the June meeting, having adjourned Saturday following an inspection trip to Good Roads district No. 26.—Star-Mirror.

KENDRICK DEFEATED BY CLARKSTON TEAM

Game Played on Muddy Field Last Sunday.

Kendrick suffered rather a disastrous defeat last Sunday afternoon, the game being started here in a drenching rain and heavy windstorm. Four runs were netted by the visitors in the first inning, which apparently shattered the morale of the locals for the balance of the game.

Hard hitting by the visitors and errors on the part of Kendrick allowed 8 runs for Clarkston while the locals made but 3. This game was not an indication of the comparative strength of the two teams, as will be clearly indicated when Kendrick plays at Clarkston, Sunday, June 5. It was an "off day" for the locals and they are going to stage a come-back at Uniontown next Sunday.

Following is a resume of the game in detail:

Clarkston	Ab	R	H	SO	E

Schedule for Sunday, May 8

Kendrick at Uniontown.
Genesee at Juliaetta.
Pomeroy at Clarkston.

Theatre Installs Second Machine

The New Kendrick Theatre this week installed another picture machine, which now enables the management to give the patrons of this house the same continuous program service, without stopping to change reels, as is given by city theatres. The try-out was made Tuesday evening and the results were very satisfactory. Starting tonight the two machines will be used hereafter, and the only stop will be in case of a broken film.

Arrangements were also made this week whereby O. E. MacPherson will continue to manage the theatre.

WALTER HOFFMAN DROWNED TUESDAY

School Teacher and Three Children Narrowly Escape.

Walter Hoffman, prominent farmer of the Agaha region, was drowned and three of his children and Miss Amy Tupper of Clarkston, who teaches in the Agaha schools, barely escaped with their lives when the private ferry on which they were crossing the Clearwater river was swept from its cables and carried down the stream, says the Tribune. Miss Tupper and the children clung to one pontoon of the ferry as it was swept downstream and were finally rescued by a neighboring farmer in a gasoline launch.

Mr. Hoffman's ferry is located two miles below Agaha and was used by him for private purposes. His children and their teacher, Miss Tupper, were in the habit of crossing from the schoolhouse on the south side of the Clearwater to the Hoffman home on the north side. The accident occurred about 4:30 Tuesday afternoon.

Mr. Hoffman was taking the children and the teacher home after school. He was at the wheel of the ferry, which consists of two pontoons and cross-boards. A floating tree struck the ferry breaking it loose from the cable and was swept away by the swift current of the river. The tree striking the ferry threw Mr. Hoffman into the river and broke one pontoon loose. The remainder of the ferry, teacher and the three children were carried downstream one-quarter of a mile where they were rescued.

Mr. Hoffman was about 40 years old and is survived by his wife and four minor children. He was an extensive land owner and well known throughout the Clearwater region.

No signs of the body has been reported up to time of going to press. Owing to the swollen condition of the river, it is not expected that recovery of it will be easy.

Thomas Buckles, father of Miss Nellie Buckles, county superintendent, was in Lewiston Wednesday. He has resided at Agaha for a number of years. Mr. Buckles states that it was Joseph Piper and one of the Stevens boys who rescued Miss Amy Tupper, school teacher, and the three small children of Mr. and Mrs. Hoffman, who were aboard the ferry at the time it broke and caused Mr. Hoffman to fall into the river. The men went out to the broken ferry and took those on board into their boat and ashore.

Mr. Buckles stated that Miss Tupper tried to reach Mr. Hoffman after he fell into the river but the ferry swerved to one side and caused her to return to the three little children to care for them. Mr. Hoffman started to swim and managed to reach a point within about 50 feet of the shore and within ten feet of a clump of bushes protruding from the water, but he became exhausted. He was wearing a heavy mackinaw and boots at the time.

Word reaching here Wednesday told of Mrs. Hoffman being a witness to the drowning of her husband and the danger that beset her children and Miss Tupper. The frantic woman ran along the bank calling words of encouragement to her husband, but he was unable to respond.

Wednesday was the last day of the term for the little school at Agaha and a picnic had been planned, but owing to the unfortunate occurrence this was abandoned.

Mr. Hoffman held the high esteem of his neighbors and the community at large. He is a brother of Ben and Jesse Hoffman, both Leland residents, Jesse Hoffman being state representative of Nez Perce county.

Mr. and Mrs. J. F. Brown left Wednesday for Berne, Wash., where they will spend the summer. I. N. Harris has rented the Brown residence for the summer.

Named Administrator

Judge Adrian Nelson appointed A. H. Daubenberg administrator of the estate of Mrs. Sarah Jacobus, deceased. The appointment was made Tuesday of this week. The estate comprises more than \$15,000 in real and personal property.

NEW VILLAGE BOARD ORGANIZED TUESDAY

Elected N. E. Walker Mayor of Kendrick.

The newly elected members of the board of trustees of the village were sworn in last Tuesday evening and the board duly organized. E. T. Long, who has served for the past two years as mayor of Kendrick, was the only one of the two retiring members present, R. D. Newton, having located at Colville since the previous board meeting.

After the trustees had taken the oath of office they proceeded to elect N. E. Walker chairman. Mr. Walker has held this office for two terms in previous years. Three members of the board, E. A. Deobald, M. O. Raby and Herman Schupfer drew lots to decide which one of the three should take the two year term, Mr. Deobald drawing the lucky number. Mr. Dammarell and Mr. Deobald are now to serve two year terms and the other three members four years.

Chairman Walker appointed the following standing committees: Finance: Raby and Schupfer; Water: Deobald and Raby; Cemetery-Park: Dammarell and Deobald; Street and Alley: Dammarell and Raby; Sewer: Raby and Schupfer.

Ralph Knepper, E. H. Emery and Joe Gardner were elected to the positions of clerk, treasurer and marshal, respectively.

By a motion of the board the park and vacant lots of the town were turned over to the Fourth of July committee for use during the celebration.

George Barnum appeared before the board and requested that permission be given the concessions committee for the July Fourth celebration, to conduct a bowery with the privilege of conducting dances 30 days prior and the same length of time after the celebration. The permission was granted by vote of the board.

M. O. Raby moved a resolution requiring all popular trees within the village to be cut down and replaced by other varieties, on the grounds that they are damaging the sidewalks and the roots plugging the sewer system. The meeting then adjourned.

To Build Spaulding-Arrow Road

The state highway department has invited bids for the improvement of the Lewis and Clark highway from Arrow Junction to a point several hundred feet west of the Spaulding bridge, the bids to be opened on May 13, says the Tribune. The highway department will also open bids at that time for the construction of a concrete bridge on the North and South highway between Craigmont and Lawyers canyon.

The improvement on the Lewis and Clark highway is what is known as federal aid project No. 33 and the grading between Arrow Junction and the end of the Spaulding railroad bridge was completed several years ago. The new plans provide for blading the old grade and installing macadam surface between Arrow Junction and the end of the railroad bridge and for constructing the grade and surfacing between the end of the railroad bridge and the west line of the Clearwater highway district, several hundred feet west of the Spaulding highway bridge. There will be about three-quarters of a mile of new grade to construct and about three and three-quarters miles of surfacing.

The plans provide for getting the work under way as soon as possible and a requirement will be made a part of the contract to have the entire improvement completed by early fall.

ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

Ray Cuddy left last week for Eagle, Idaho, on a business trip. Willis Berriman left Monday for Potlatch, to look for employment.

A daughter was born, Sunday, May 1, to Mr. and Mrs. Frank Thornton.

Miss Gertrude Baker of Moscow is visiting her brother, Russell, and other relatives this week.

Mrs. Harry Smith and little daughter, Shirley of Leland visited with her parents and other relatives from Saturday until Wednesday.

Rev. Conoyer held services at the U. B. church, Sunday morning, but owing to the rainy weather the attendance was very small.

Miss Alta Phillips of Lewiston spent the week end with her parents.

At the boy's declamatory contest Friday evening, Richard Jones won the gold medal in the fifth grade and Esther Whiting won in the girl's contest Saturday evening in the 6th grade.

Grandpa Southwick was quite ill at his home Sunday, but last reports are that she is improving. Mrs. Doc. Betts is ill with the mumps.

Sunday guests at the home of Elton McCoy were Floyd Russell and family, Ray King and Mrs. Harry Smith and daughter of Leland.

Mr. and Mrs. A. W. McCoy and daughter, Ruby, Minnie Bunker, Nadine McCoy, Rev. George Calvert and Rev. Conoyer were Sunday guests at the home of Mr. and Mrs. Homer Hayward.

Mr. and Mrs. Clinton Wright and son, Mr. and Mrs. Ralph Wright and son, Marion of Potlatch, attended the track meet at Southwick, Saturday, they returned to Potlatch the following Monday.

Mrs. Ivan Moretz visited with her brother, John Lettenmaier, over the week end.

Jay Thornton of Bed Rock was the guest of his sister, Mrs. Howard Southwick, Sunday.

Miss Joy Bell, who is teaching at Gifford, attended the track meet Saturday.

Mrs. Ziemann is enjoying a visit from her aunt and brother and family from Potlatch for a few days.

Track Meet at Southwick

A big crowd attended the Nez Perce county track meet for grade school children, held at Southwick last Saturday afternoon. The spacious school grounds were ideal for this occasion, allowing plenty of room for the various events. The meet was under the direction of Miss Nellie Buckles, county superintendent of schools.

Legume Cultures Available

Cultures for the inoculation of legumes are now available at the bacteriology department of the Idaho agricultural experiment station, and requests are being received. The department is equipped to handle a large volume of orders this season. Last year more than 13,000 acres of culture were sent to approximately 600 farmers.

In ordering cultures farmers are requested by Prof. G. L. A. Ruehle station bacteriologist, to state the kind of crop and the number of acres to be seeded. Only three-acre sizes are prepared, consequently all orders must be for three acres or multiples of three.

Leland Lodge Confers Degrees

The Leland I. O. O. F. Lodge conferred the initiatory degree upon two candidates last Saturday night. Good eats and the usual good attendance were enjoyed. This makes a total of nine new members taken into the lodge in the past few weeks and with several prospects in view, the outlook is very encouraging.

How about that printing job? Don't wait until you are clear out, bring it to the Gazette Office now. Prompt service

JULIAETTA COMMUNITY NEWS

Pomeroy Defeats Juliaetta

Juliaetta played the third game of ball this season at Pomeroy, Sunday afternoon. The boys played a very good game but it seemed that fate was against them, for thru a couple of errors they lost the game by a narrow margin to Pomeroy. The final score instead of being 2 to 1 in favor of Juliaetta as it would have been had the errors not occurred, was 4 to 2 in favor of the opponents. Albright pitched an exceptionally good game, securing 15 strikeouts, walked one, hit another and allowed only three hits.

Party Given

Last Saturday evening a party was given at the Loey, Huntsberger home, the occasion being to have one more good time before the crowd of young people got scattered to various places for the summer. In spite of the bad weather and no lights, a good crowd gathered and all had a very pleasant time. Lunch consisting of fruit salad, cake and coffee was served to "top off" the evening's pleasure.

Club Meeting Held

Miss Johansen of Moscow, who is interested in the women's extension work and girl's club work, visited the joint meeting of the women and the two girl's clubs held in the lower part of Oddfellow's hall, Monday afternoon. Miss Johansen brought reeds and gave us an interesting lesson in basketry. Several baskets were completed and more would have been finished if the supply of reeds had not been exhausted. The average price of the baskets was thirty cents and they are very practical as well as ornamental. In addition to this she gave interesting talks to the club girls and got an idea of what they were going to do this summer and encouraged them to work harder on their project.

The larger girl's club which is still carrying on the home decorating project were especially urged to use their ingenuity and to be as original as possible since it is the first and only club in Idaho to take up that line of work. They will be quite helpful in establishing home decorating as a permanent club in this state.

The junior girls made plans for their stunt which they are required to put on if they attend the short course at Moscow in June.

A sumptuous luncheon was served during the course of the afternoon.

Juliaetta Locals

Mrs. Kate Keller returned to her work in Lewiston last week. Mrs. August Hain was a Kendrick visitor last Friday.

Mrs. A. J. Hammond, who has been visiting for some time at the Oriel Dumbauld home, left Friday for California.

Mrs. Amos Nigh and Loey Huntsberger were business visitors in Kendrick last Thursday.

J. I. Combs left last Saturday for Potlatch.

Miss Gertrude Bowen was a Moscow visitor one day last week.

Mrs. S. A. Hammond was visiting in Potlatch a couple of days last week.

Melger Eaton transacted business in Kendrick, Saturday.

Bruce Glenn visited in Moscow Sunday.

Mrs. Susan Armstrong of Spokane arrived here Sunday to stay in the Eben Adams home while Mrs. Adams attends the Normal school in Lewiston.

Clark Jennings was a Troy visitor Saturday.

Frank Spray left Monday for Pullman.

Mrs. J. H. Milard returned to Lewiston Monday to resume her treatments.

John Hanson left Tuesday for a visit in Moscow.

J. Wren was a Kendrick visitor Tuesday.

Mrs. J. C. Groseclose was a business visitor in Lewiston Wednesday.

Mrs. Amanda Alexander returned to her home in Lewiston, Sunday.

Mr. and Mrs. Bert Ramey of Potlatch spent Sunday with Mrs. Ramey's grandmother, Mrs. Bu-

chanan. Mrs. J. A. Heacox is on the sick list this week.

Mr. and Mrs. Charlie Noble and family moved to their new home last week. They own the former home of C. C. Combs.

There will be a Mother's Day program at the M. E. church next Sunday.

Mr. and Mrs. Roy Metcalf spent Sunday in Gilbert where Mr. Metcalf held services.

Mrs. W. L. Lewis went to Kendrick Sunday to visit with her son.

Billie Elliott of Moscow is renewing acquaintances in Juliaetta this week.

Rev. Miller spent Sunday in Kendrick.

Quite a number of Juliaetta people attended the ball game in Kendrick, Sunday.

Terrill Alexander, Alvin Nye, and Henry and Wilford Kimberling were among those who were Lewiston visitors Saturday.

Juliaetta School Notes

The high school is planning to give a party next Friday evening at the school house. This party will be given by the Red and Blue sides in the Country Gentleman Contest. They are entertaining the Greens, the winners.

Mrs. Smith's and Mrs. Goan's rooms put on a very interesting exhibit in the 7th and 8th grade room last Tuesday. On display were examples of the work and projects carried on throughout the year, including penmanship, geography, arithmetic, hygiene, history, and drawing. Some articles of special interest were the 4th, 5th and 6th grade arithmetic graphs, some health posters and some notebooks made by the 7th and 8th grades. The day of the exhibit the room was beautifully decorated with pink and white crepe paper and apple blossoms. During the afternoon many visitors were present to look over the work.

The primary room has had excellent attendance this week. Very few were absent or tardy.

The ones that couldn't be caught in the multiplication wheel in the second and third grades were: Thomas Whalen, Carl Fliger, Bertha Richardson, Willard Bowen, Walter Millard and Bobby Claypool.

The third grade geography class has drawn and colored some very attractive maps of the United States.

The pupils in the seventh and eighth grades who received Improvement Certificates in Penmanship were: Thelma Spray, Harold Gruell, Helen Snyder, Carroll Groseclose and Mabel Nigh.

The seventh grade pupils who successfully passed the April examinations were: Jeweldine Hutchison, hygiene; Wm. Nigh, Thelma Spray, Jeweldine Hutchison and Helen Halliday, in geography.

An exchange says that one of the ladies in his town has an excellent reason for jumping rope in a determined effort to reduce. Not long ago one of her nightgowns that had been sent to the laundry was returned with the notation, "We don't wash tents."

Clip Dairy Cattle That Are to Be Exhibited

Dairy cattle that are to be shown this fall, particularly young animals, should be clipped all over at least six weeks previous to fair time. Clipping should be followed with a good washing with soap and water and a fairly light blanket. No further clipping will be necessary until just before showing, when the head, ears and tail should be trimmed up. Training in leading will do much toward improving the animal's appearance in the show ring. Fitting will do much to improve an animal's chance of winning, but good type individuals of large size for their age are of primary importance.

AS LABOR SEES BANKS

Vast sums of money are lost each year by wage-earners through investments hastily entered into. With the confidence of the wage-earners, banks will be enabled to more accurately advise such investors and thus save money which might otherwise be lost by unwise speculation. — William Green, President American Federation of Labor.

Silage fed to cows an hour before milking leaves an odor in the milk. Better feed it after milking, experienced dairymen agree.

Entered at the Post Office at Kendrick as second class mail matter.

It is bad enough for one paper to "swipe" stories from another, but to swipe them and mark them "Special", is rubbing it in.

Men have a distinct advantage as the warm spring days approach. They can put on lighter clothing, but what are the ladies going to do? Probably wear a fur in addition to their present wardrobe.

One of the most successful business men in North Idaho gave this advice to one of his employees: "Get a hobby and ride it hard." It is a sad time in a man's life when he has forgotten how to play.

An old maxim says: "He who loseth wealth, loseth much; he who loseth a friend, loseth more; but he who loseth his health, loseth all." So it pays to take care of your health. It is easier to keep it than to get it back if you lose it.

A good woman may tell her husband what she thinks of him at home, but if she is a good wife she won't say anything against him to anyone else. There is a wife in Kendrick who never loses an opportunity to boost her husband. No one dares criticize him in her presence. She never presents his short-comings in contrast to the good points of some model husband. This is a

golden virtue that meets with the approval of all men. Husbands deserve all the backing their wives can give them, because they don't amount to much at best.

The citizens of the United States are listed as spendthrifts in the eyes of the world. But why shouldn't we spend our money—we have more of it than any nation in the world.

The Same Old Line

They were talking "farm relief" thirty-seven years ago, according to an item in the Kendrick Advocate—and nothing done yet. Much the same line of bunc was being advocated then as now. Following is an excerpt from a long-winded speech by a U. S. senator: "The farmers of the United States do not receive on an average of more than 10 cents a bushel for their corn, 50 cents for their wheat, and from 2 to 3 cents a pound for their hogs. The time will come at no far distant day when the farmer will look upon the proposition to tax him and his wife and children for the protection and benefit of other people as he would a law of Congress to establish the army worm and weevil on his wheat or to infect his cattle with murrain or his hogs with cholera. Every pretense of a home market for the farmer is a fraud, and every pretense of taxing wheat, oats and potatoes for his benefit is a cheat and a sham." Sounds familiar, doesn't it?

Labor and Enjoy Life

Labor is a good cure for melancholy. We seldom hear of a laborer traveling the suicide route.

Test Seed Corn to Avoid Loss

Expense Involved Is Slight and Will Prevent All Weak Plants.

Poor seed means a poor stand, missing hills and weak stalks, producing little or nothing. It means waste land and wasted labor. It is sound business to know that the seed planted will grow. The only way to find out is to test. Satisfactory tests can be made by simple methods. The expense involved is slight. Considering the little time and effort required, testing of seeds has been thoroughly justified.

Corn lends itself to testing better than any other grain, as it is necessary to test only a few kernels from each ear to separate the unsound ears from those that give good germination. **Rag-Doll Method Best.**

The rag-doll method is best suited for testing seed corn and sorghums in the hand. The germination cloth should be 16 inches wide and 60 inches long. Draw a line with a pencil down the center of the strip of cloth. Mark the strips crosswise every four inches and number the sections. Moisten the tester before putting the kernels upon it. Always number the ears before removing the kernels. From different places on ear No. 1 take out ten kernels and place them in section No. 1. Similarly take ten kernels from No. 2 and place in section No. 2; continue until every section is filled. Place the kernels away from the dividing lines so a slight displacement caused by handling the tester will not mix the samples. Fold each side of the tester so that the edges meet in the middle. Press the cloth down firmly over the kernels and roll the tester using some cylindrical object as a core. Working the Tester. Soak the tester for ten hours in warm water. Then drain off the wa-

ter, leaving the tester in the pan with a loose-fitting cover where it is warm and moist. A temperature between 89 and 90 degrees during the day and 50 to 60 degrees during the night will give good results. The tester should at all times be moist and have good ventilation.

At the end of six days unroll the tester, taking care not to disarrange the sprouts. The results will indicate which ears grow with strong shoots, which are weak and which will not grow at all.

Idea of Seriousness of Corn-Borer Situation

Some idea of the seriousness of the corn borer situation can be gained from the report from the annual field survey made by the corn borer laboratory of the bureau of entomology at Sandusky, Ohio, in 179 cornfields representing the older portion of the infested area of Ohio. These fields showed an average increase of infestation slightly exceeding 400 per cent, as compared with a similar survey in the same or near-by field in 1925. Similar results are anticipated for the annual comparative surveys in western New York and southeastern Michigan, when these surveys are completed.

Feed Adult Geese for Eggs Along in February

Adult geese should be fed for eggs about February 1, or so that the goslings will be hatched by the time there is good grass pasture. In feeding for eggs give a mash of equal parts by weight of corn meal, bran, and middlings or low-grade flour with 10 per cent of beef scrap, in the morning, and a feed of corn at night. A constant supply of drinking water should be provided. If geese need grain when not laying, the beef scrap should be left out and the corn meal increased in this ration to three parts.

Satisfactory Ration

A simple mixture comprised of 40 parts corn and cob meal, 35 parts ground oats and approximately 25 parts of all meal makes a very satisfactory ration where the cows have good legume roughage. If the cows are getting silage many people prefer to feed cotton seed meal instead of the linseed meal, as the silage and legume hay are both somewhat laxative and therefore the laxative qualities of the linseed meal are not so badly needed. Whichever combination is used, however, will be found an ideal feed for dairy cattle.

Calf Feeds Necessary to Make Rapid Growth

If a calf eight weeks old is to make rapid growth it will be necessary to feed it some milk with grain and hay. If it is impossible to feed it milk it will make a fairly good growth on the following mixture: Shelled corn, 30 pounds; oats, 30 pounds; wheat bran 30 pounds, and linseed meal, 30 pounds. Mix and let the calf have all it will clean up without waste. The oats and corn may also be ground if desired. The calf should have all the bright clover hay it will eat and also all the water it will drink. Alfalfa hay can be fed instead of the clover hay, but it is not so good for young calves as is clover hay, since it is much richer in protein, which in some cases, does not agree with the calf. The calf should have a clean box stall and have plenty of sunlight.

Feed Adult Geese for Eggs Along in February

Adult geese should be fed for eggs about February 1, or so that the goslings will be hatched by the time there is good grass pasture. In feeding for eggs give a mash of equal parts by weight of corn meal, bran, and middlings or low-grade flour with 10 per cent of beef scrap, in the morning, and a feed of corn at night. A constant supply of drinking water should be provided. If geese need grain when not laying, the beef scrap should be left out and the corn meal increased in this ration to three parts.

Cull Out Poor Sows

It will not pay to carry sows through the winter if they are not satisfactory pig raisers. Sows that for any reason are not raising good litters should be fattened and sent to market. Old sows that are past the age of greatest usefulness should be replaced in the breeding herd by good gilts. Blindness, bad udders and sluggish disposition are frequently found with old sows. A sluggish, lazy sow is more apt to injure or kill her pigs.

FARM NOTES

One way to save labor is to put it on the best land.
 To keep the loafer hens from eating up the profits why not eat up the loafer hens?
 The term unit as applied to fertilizers means 1 per cent or 20 pounds in a ton.
 A farm inventory is the first step in keeping farm accounts. On the average farm it requires about one-half a day to take it.
 Many dairymen consider buckwheat middlings equal to gluten feed for milk production. They have about the same total feed value as wheat bran.

DAIRY THE DAIRY

SAVING MADE BY BALANCED RATION

Balancing up the ration which he was feeding to his cows made a difference of \$46.46 a month to one Moultrie county, Illinois, dairyman whose case is cited by dairymen at the college of agriculture, University of Illinois, as evidence that it pays to make sure that dairy cows are getting the right kinds and amounts of feeds. When this dairyman entered his eight Jersey cows in the County Dairy Herd Improvement association he was feeding every cow equal parts of a ration consisting of two parts ground corn and one part ground oats supplemented with alfalfa hay and corn silage. The production for the first month the cows were in the association was 2,494 pounds of milk containing 113 pounds of butterfat worth \$50.42. The feed which the cows ate was worth \$65.96, which meant a loss of \$15.54 without considering any expense other than feed.

Upon the advice of P. J. Smith, tester in the County Herd Improvement association, this member added one-half part of soy bean meal to the ration he had been feeding and cut down the amount of grain and silage to a little more than one-half what it had been. The next month the feed bill on his cows was \$43.16, a saving of \$22.80 compared to the previous month. Furthermore, on the balanced ration, the same eight cows increased their production to 3,597 pounds of milk containing 171 pounds butterfat worth \$7.08 or \$23.66 more than the previous month. This increased value of the butterfat and the \$22.80 saving in feed costs made a total improvement of \$46.46.

Another member of the same association fed his cows \$22.84 worth of clover hay, corn, oats, bran and oil meal during one month and got only 918 pounds of milk containing 46.8 pounds of butterfat worth \$19.14 in return, a loss of \$3.70. The following month a new cow was added to the herd and each cow was fed according to her production. The feed cost was increased only 80 cents to a total of \$23.70, while the production of the three cows was 1,844 pounds of milk containing 94.4 pounds of butterfat worth \$40.47, or a profit of \$16.77. The total improvement of \$20.47, which came as a result of changing a loss of \$3.70 into a profit of \$16.77, was accomplished by feeding the surplus feed which the two cows had been receiving to a third cow.

go to make milk. They also tell us that when the cow becomes dry this blood stream turns to the foetus and this same food supply goes to build up and nourish the body of the unborn calf. During the last three months before freshening, about 65 per cent of the development of the calf takes place. What then will be the result if the feed of the dry cow is materially reduced? It means that in order for a cow to freshen in good condition, maintain her original weight and go through her lactation period doing her best, she must be fed enough to put on 75 to 100 pounds of flesh. If an amount of feed for this purpose is not fed, the cow will take flesh from her own back for the nourishment of the foetus and will be thin and in poor condition at time of freshening.

Silk Ensemble Costume
 Popular for Street Wear

Ensemble costume of biscuit color crepe roma, consisting of two-piece dress and cape-coat. The blouse is made of clusters of tucks and has a real lace jabot, while the skirt is accordion pleated. A small t of tan horsehair lends an added delicate touch to the costume.

Money Is Well Spent in Feeds for the Dry Cows

Time was when the dry cow did not get any grain feed, or at best only a small percentage of her usual amount. But that time is past and practical dairymen agree that money spent on feed for the dry cow is money well invested.

Veterinary people say that the blood passing from the heart to the udder carries the food elements which

Save money -by clipping this coupon!

A FEW MINUTES spent in studying motor car values before you decide on your new car may save you many dollars afterwards. That is why General Motors wants to send you a finely illustrated little book about the great General Motors Proving Ground where cars are proved by day and night tests, and values are absolutely established. Every car owner should have a copy of this free book because it tells what points to look for in selecting a car, and how to make comparisons.

With this really interesting book, which will be sent free as soon as you fill in and mail the coupon, we want to send you illustrated booklets about the General Motors car which suits your purse. You know these cars; all are famous. But did you know that they are all made by General Motors? Did you know that General Motors, by building more than 1,000,000 cars a year, saves millions of dollars, and how these savings are passed on to you in better value, longer life for your car, and a higher trade-in value when you are through with it?

CHECK THE CAR THAT FITS YOUR PURSE

These facts mean hard cash to you. The coupon involves no obligation. Just check the car that interests you most. Booklets will come at once, and also the book about the Proving Ground. Make up your mind to buy your cars scientifically from now on. Mail the coupon TODAY.

GENERAL MOTORS

General Motors (Dept. A), Detroit, Mich.

PLEASE send, without any obligation to me, illustrated literature about the General Motors product I have marked below—together with the name of the nearest dealer in case I may wish a demonstration. ALSO SEND YOUR PROVING GROUND BOOK.

Name.....

Address.....

CHEVROLET 7 models—\$525 to \$745

The quality car of the low-priced field. 3-speed transmission. Strong rear axle. Smooth dry-disc clutch. Over-head valve engine. Fisher Bodies. Duco finish. Fully equipped. CHEVROLET TRUCK CHASSIS: 1/2-ton, \$395; 1-ton, \$495.

PONTIAC 5 models—\$775 to \$975

A low-priced "six" which is a quality product in appearance and construction. Value proved by unprecedented sale. Has largest 6-cylinder engine in its price class. Beautiful lines. Fisher Bodies. Duco finish. All conveniences.

OLDSMOBILE 11 models—\$875 to \$1190

A fine car at moderate cost. Gratifies your finer taste; satisfies every need. Beautiful Fisher Bodies. Duco finish. Powerful 6-cylinder engine. Harmonic balancer and other new improvements. 4-wheel brakes. And a wide choice of models.

OAKLAND 7 models—\$1095 to \$1295

Winning and holding goodwill everywhere because of its superior performance. Fisher Bodies. Duco finish. Rubber silenced chassis. 4-wheel brakes. A "six" whose quality is doubly assured as a product of General Motors.

BUICK 18 models—\$1195 to \$1995

Everybody knows Buick's worth. General Motors emphasizes Buick's statement that its new models represent "The Greatest Buick Ever Built." Vibrationless beyond belief. 6-cylinder valve-in-head engine. Fisher Bodies. Duco finish.

LASALLE 6 models—\$2495 to \$2685

General Motors' latest contribution to the fine car field. New and beautiful car designed and built by Cadillac as a companion car to Cadillac. Has V-type 8-cylinder engine. Fisher Bodies. Duco finish. Now on display.

CADILLAC 50 body styles and types—\$2995 to \$9000

The pioneer in the 8-cylinder field. Standard of the world. Improved V-type 90-degree engine. Marvelous bodies by Fisher and Fleetwood. Duco finish. Choice of 500 different color and upholstery combinations to emphasize individuality.

- DELCO-LIGHT electric plants. Another General Motors product. Brings you all the conveniences and labor-saving devices of electricity.

WAYS TO BLOCK CROOKED PROMOTERS

By W. R. MOREHOUSE
Public Relations Commission, American Bankers Association
(This is one of a series of articles exposing the wiles of sharpers who are after your money.)

MANY reliable corporations, firms and individuals are engaged in developing mining properties, drilling for possible new oil wells and promoting new inventions and enterprises. On the other hand many unreliable persons are ostensibly engaged in the same pursuits, but in reality are only promoting frauds. Therefore, every investor should first divide the sheep from the goats before he hazards his savings. Because there are many dishonest manipulators using mining, oil, invention and promotion terms to deceive does not mean that all promoters in these fields are crooked. The truth is, there are many trustworthy men engaged in promoting enterprises that are honest investments. The problem is to know the difference between promoters of the reliable type and the high-pressure variety. The former are engaged in legitimate business. The other group is engaged in fleecing the public.

W. R. MOREHOUSE

The number of those who deliberately scheme to defraud is large and they are shrewd and deceitful. For this reason those who cannot afford to lose their savings should not trust entirely to their own judgment in making investments.

In order to divide the sheep from the goats—to distinguish between reliable and unreliable promoters, to tell the good investor from the worthless—the inexperienced investor should consult his banker or let the National Better Business Bureau, whose headquarters are in New York City, advise him. It costs nothing to get such advice from either source. It is safe to say that if those who have lost their savings through fraudulent schemes had followed this simple course they would still be in possession of their money.

Get the Facts
Invariably, get the facts and take no substitute. There is nothing better and nothing just as good as the facts when it comes to withdrawing your savings from the bank and investing them. The facts about an investment either strengthen its position or show it up to be risky—oftentimes too risky for the person who cannot afford to lose.

others you know nothing about. Some time you may be approached to make a trade by a plausible person claiming to have better investments to offer than those you have. Recently a woman owning a block of gilt-edge public utility stock was approached by two smooth sharpers and urged to exchange it for stock in a fruit company which, she was told, was not only very valuable then but would increase rapidly in value and soon make her independently wealthy. Fortunately she told her neighbor about her offer. It happened that the neighbor had recently been defrauded in a similar way. She advised the second woman to report her offer to the local better business bureau. Having handled many similar situations the bureau instructed the woman to make an appointment for the traders to meet her in her home.

Good Advice that Prevented Disaster

New schemes to defraud are being hatched daily. The unscrupulous promoter never sleeps but is continuously plotting new methods of attack on the savers' hard-won accumulations. The liberties he takes with the law and the schemes he designs for belittling the sound advice of responsible persons makes it even more essential for investors to get the facts.

Remember that anything that is worth investing in is worth knowing about as to its safety, its income, and its marketability. Any investment which is enshrouded by a screen of glowing promises or is so complicated that neither you nor your banker can fathom it and get the hard facts isn't an investment you can afford to put your money into.

Make it an unbreakable rule to get all the facts, whether the investment be large or small, and you will save yourself the heartaches and bitter disappointment of losing your savings. Millions of dollars which have unfortunately been lost through poor investment might have been saved if the investors had taken time to investigate before investing. There is always need for capital in safe, honest business and so great is the legitimate demand for investors' funds that not one cent need be wasted by them on fraudulent schemes.

Don't Trade Good for Bad
Don't exchange your investments for (A future article will tell of more schemes by which people are defrauded of their savings.)

BANKERS HELPING

Three banks in South Carolina have inaugurated a plan to provide free of rent for two years a centrally located place to be used by the farmers of Greenville and neighboring counties for the purpose of establishing a creamery, a canning factory and a farm woman's club. The idea is to get the farmers to raise livestock, to raise their own food and feed and to have something extra to sell. The canning factory is intended to utilize the surplus garden and fruit products, and the club rooms for getting the support and co-operation of the farm women.

Georgia bankers have made great strides in furthering a diversified farming program the past year. They induced farmers to sow fifty-five carloads of vetch seed, furnished local prizes in sixty counties for the corn contest, the state prize of \$1,000 being furnished by a bank in Atlanta. A banker-farmer alfalfa demonstration was held at the college and attended by 250 bankers and farmers. Alfalfa acreage has increased from 1,800 to 5,000, the demonstration being credited with 50 per cent of this increase. This year the state has produced 12,000,000 more bushels of corn than last year, has sold 50 cars of truck, \$2,000,000 worth of pecans, and has produced 150,000,000 pounds of meat and enough corn and hay for its own use.

Notice of Sale of Real Estate by Latah County for June 6, 1927

NOTICE IS HEREBY GIVEN That in, under and by virtue of an order of sale and resolution made by the Board of County Commissioners of Latah County, Idaho, on Wednesday, April 20, 1927, the hereinafter described lots, pieces and parcels of

land, situated in the County of Latah and State of Idaho, will be sold by the Sheriff of said County at public auction, at the front door of the county courthouse in Moscow, Latah County, Idaho, on Monday, the 6th day of June A. D. 1927, at 2 o'clock p. m. of said day or at such time or on the day to which the sale may be postponed or adjourned, to the highest and best bidders for cash, subject to all delinquent state and county taxes, which property is held by Latah County, under and by virtue of tax deeds, and is known and described as follows, to-wit:

Northwest Quarter of the Northwest Quarter of Section 8, Township 38 North, Range 1, West of the Boise Meridian, assessed to MARY VAUGHAN.

Northwest Quarter of the Northwest Quarter (Lot 4), less Railway, Southwest Quarter of the Northwest Quarter, less 5 acres, Railway, Section 3, Township 38 North, Range 3 West of the Boise Meridian, assessed to W. S. BRANDT.

Southwest Quarter of the Southeast Quarter of Section 7, Township 39 North, Range 1 West of the Boise Meridian, assessed to KATIE MAYBEE.

Lot 3 (Southwest Quarter of the Northwest Quarter); Southeast Quarter of the Northwest Quarter, Northeast Quarter of the Southwest Quarter Section 17; Lot 6 (Southeast Quarter of the Northeast Quarter) Section 18; Southwest Quarter of the Southwest Quarter of Section 24, all in Township 39 North, Range 1 West of the Boise Meridian, assessed to GEORGE A. DAY.

Northwest Quarter of the Northeast Quarter; Southwest Quarter of the Northeast Quarter; Southeast Quarter of the Northeast Quarter; and the Southeast Quarter of the Northwest Quarter, all in Section 25, Township 39 North, Range 1 West of the Boise Meridian, assessed to J. W. HAYS.

Northwest Quarter of the Northwest Quarter; Northwest Quarter of the Northwest Quarter (Lot 1); Southwest Quarter of the Northwest Quarter (Lot 2), and the Southeast Quarter of the Northwest Quarter, in Section 34, Township 39 North, Range 1 West of the Boise Meridian, assessed to THOMAS W. RILEY.

Northwest Quarter of the Southwest Quarter, Northwest Quarter of the Southwest Quarter, Southwest Quarter of the Southwest Quarter (Lot 4); and the Southeast Quarter of the Southwest Quarter (Lot 3) all in Section 35, Township 39 North, Range 1 West of the Boise Meridian, assessed to H. B. DRESSER.

Southwest Quarter of the Northwest Quarter, Southeast Quarter of the Northwest Quarter, Northeast Quarter of the Southwest Quarter and Southeast Quarter of the Southwest Quarter, of Section 25, Township 39 North, Range 3 West of the Boise Meridian, assessed to D. H. BENNETT.

Southwest Quarter of the Northeast Quarter, Southwest Quarter of the Northwest Quarter, Southwest Quarter of the Northwest Quarter, and the Northeast Quarter of the Southwest Quarter, all in Section 15, Township 40 North, Range 4 West of the Boise Meridian, assessed to IDA NELSON.

West ten (10) acres of the Northeast Quarter of the Northeast Quarter, the Northwest Quarter of the Northeast Quarter of Section 28, the Northeast Quarter of the Northwest Quarter, and the Southwest Quarter of the Northwest Quarter and the Southeast Quarter of the Northwest Quarter all in Section 21, Township 40 North Range 4 West of the Boise Meridian, assessed to ROY MYERS.

Northwest Quarter of the Southwest Quarter and the Northwest Quarter of the Southeast Quarter of Section 6, Township 41 North, Range 1 West of the Boise Meridian assessed to J. B. BRODY and E. E. FRY.

Northwest Quarter of the Northeast Quarter (Lot 1), Northwest Quarter of the Northeast Quarter (Lot 2), Southeast Quarter of the Northeast Quarter, and Northeast Quarter of the Northwest Quarter (Lot 3) all in Section 6, Township 41 North Range 1 West of the Boise Meridian, assessed to MAGGIE EATON.

Morning Star Mining Claim, Violet Mining Claim, Atlas Mining Claim in Section 15, Township 41 North, Range 2 West of the Boise Meridian, assessed to the CONSOLIDATED MICA MINE COMPANY.

Northwest Quarter of the Southwest Quarter, Southwest Quarter of the Southwest Quarter, Southeast Quarter of the Southwest Quarter of Section 14; Southeast Quarter of the Southwest Quarter of Section 15; Township 41 North, Range 2 West of the Boise Meridian, assessed to ALEX MUNKO.

Northwest Quarter of the Northwest Quarter, less one acre; Southeast Quarter of the Northwest Quarter, less 4 acres in Section 22, Township 41 North, Range 2 West of the Boise Meridian, assessed to J. K. McCORNACK.

Northwest Quarter of the Northwest Quarter, Easthalf of the Northwest Quarter of the Northwest Quarter, of Section 26, Township 41 North, Range 5 West of the Boise Meridian, assessed to JOHN WELSH.

Northwest Quarter of the Southwest Quarter of Section 28, Township 41 North, Range 1 East of the Boise Meridian, assessed to L. H. BROOKS.

West half of the Northeast Quarter of the Southeast Quarter of Section 30, Township 41 North, Range 1 East of the Boise Meridian, assessed to MINNIE K. HOFFMAN.

Southeast Quarter of the Southwest Quarter of Section 20, Township 42 North, Range 1 West of the Boise Meridian, assessed to MARY HANSON.

Southeast Quarter of the Northeast Quarter; Northeast Quarter of the Southeast Quarter; Southwest Quarter of the Southeast Quarter; Southeast Quarter of the Southeast Quarter all in Section 20, Township 42 North, Range 1 West of the Boise Meridian, assessed to ADOLPH M. TATE.

Southwest Quarter of the Southeast Quarter of Section 28, Township 42 North, Range 1 West of the Boise Meridian, assessed to R. H. VOSE.

Northwest Quarter of the Southwest Quarter, Southeast Quarter of the Southwest Quarter, Northwest Quarter of the Southeast Quarter, and the Southwest Quarter of the Southeast Quarter of Section 24, and Southeast Quarter of the Northeast Quarter of Section 25, all in township 42 North, Range 1 West of the Boise Meridian, assessed to PHIL-LIPP S. BROOKE.

Northwest Quarter of the Southeast Quarter, and the Southeast Quarter of the Southeast Quarter, in Section 28, Township 42 North, Range 1 West of the Boise Meridian, assessed to M. E. METZ.

Northwest Quarter of the Southeast Quarter, and the Southeast Quarter of the Southeast Quarter of Section 22, Township 43 North, Range 5 West of the Boise Meridian, assessed to S. S. COLE.

Northwest Quarter of the Southwest Quarter, Southwest Quarter of the Southeast Quarter of Section 22, Township 43 North, Range 5 West of the Boise Meridian, assessed to ELMER J. ADAMS.

Lot 10, Block 16, Original Village of Deary, assessed to JOHN BENJAMIN AND SON.

West half of Lot Eight (8); West half of Lot Nine (9); Block Nine (9), Original Genesee, Idaho, assessed to L. H. KEERS.

Lot Seven (7), Block Eighteen (18), Original Genesee, Idaho, assessed to JOHN KEMPF.

West one-half of Lot Two (2), Block Nineteen (19), Original Genesee, Idaho assessed to GEO. HOBSON.

Lots One (1), Two (2), Three (3), Ten (10), Eleven (11) and Twelve (12), Block Eighteen (18), West Addition to Genesee, Idaho, assessed to LESTER and LEOLA PORTER.

Lot Thirteen (13), Block B, Original Kendrick, Idaho, assessed to MARY VAUGHAN.

Lots One (1), and Four (4), Block Twenty-one (21); Lot Eight (8), Block Thirty (30), Original Kendrick, Idaho, assessed to GEORGE F. WALKER.

Lot Eight (8), Block Sixteen (16), Original Kendrick, assessed to LATAH COUNTY.

Lot Eight (8), Block Thirty-one (31), Original Kendrick, assessed to A. H. HOVER.

Lots One (1), Two (2), Four (4), Five (5), Six (6) and Eight (8), Block Twenty-three (23), Original Kendrick, assessed to JOHN NISBET.

Lots Five (5), Six (6), Block Sixteen (16); Lot Seven (7), Block Twenty (20); Lot Ten (10), Block Thirty-eight (38) all in Original Kendrick, assessed to E. R. PORTER.

West half of Lot Four (4), and Lots Five (5), Six (6), Block Six (6); Lots Three (3) and Four (4), Block Eleven (11); Lot Four (4), Block Twelve (12); Original Kendrick, assessed to J. F. COLLINS.

Lots One (1) and Two (2), Block 102, Oak's Addition to Kendrick, assessed to J. F. COLLINS.

Lots Five (5), Block Ninety-six (96), Oak's Addition to Kendrick, assessed to HARRY CORNWELL.

Lot Three (3) (less Railway), Block One Hundred (100), Oak's Addition to Kendrick, Idaho, assessed to CHAS. BODENHOUSE.

Lots Nine (9) and Ten (10), less railroad right-of-way, Block 101, Oak's Addition to Kendrick, assessed to LATAH COUNTY.

Lot Four (4), less Railway, Block 101, Oak's Addition to Kendrick, assessed to LATAH COUNTY.

Lots Two (2), Eight (8), Ten (10), Twelve (12), Block E; Lot One (1), Block F, Addition to Kendrick, assessed to G. F. WALKER.

West Twenty (20) feet of Lot Seventeen (17); Block One (1), Original Juliatta, Idaho, assessed to F. KOHLBENBERG.

All of Block F, Original Juliatta, Idaho, assessed to SYLVIA PERRY.

Lots Three (3), Four (4), Five (5), Block A, Lieualen's Second Addition to Moscow, assessed to WILLIAM E. LEE.

Lots Eight (8) and Nine (9), Block B, Lieualen's Second Addition to Moscow, assessed to WILLIAM E. LEE.

Lots Nineteen (19) and Twenty (20), Block B, Lieualen's Second Addition to Moscow, assessed to LOUIS C. BARRETT.

Lots Thirty-one (31), Thirty-two (32) and Thirty-three (33), Block B, Lieualen's Second Addition to Moscow, assessed to H. H. MITCHELL.

North 50 feet of Lot One (1), Olsen's Addition to Moscow, Idaho, assessed to LATAH COUNTY.

Lots Twelve (12) and Thirteen (13), Block Thirty (30), Park Addition to Moscow, assessed to EARL AND ED ST. JOHN.

Lots Fourteen (14) and Fifteen (15), Block Thirty (30), Park Addition to Moscow, assessed to L. H. BROOKS.

Lots Eighteen (18) and Nineteen (19), Block Two (2), Original Troy, assessed to EFFIE SCHAFFER.

South forty (40) feet of Lots Twenty-three (23), Twenty-four (24) Block Three (3), Original Troy, assessed to S. W. LEWIS.

Center forty-eight (48) feet of Lots Twenty-three (23) and Twenty-four (24), Block Three (3), Original Troy, assessed to TROY NEWS.

Lots Twenty-three (23) and Twenty-four (24), Block Eighteen (18), Original Troy, assessed to OTTILIE H. HAUGE.

Lot Three (3) Block Three (3), and Lot One (1), Block Five (5), all in Daniel's Addition to Troy, assessed to R. H. CONDEN.

Lot One (1) and Two (2), Block Two (2), State Addition to Troy, assessed to NILS P. PETERSON.

Lots One (1) and Two (2), Block Twelve (12), State Addition to Troy, assessed to S. B. JOHNSON.

The Board reserves the right to reject any and all bids at the sale above mentioned.

Dated at Moscow, Idaho, this 25th day of April, A. D. 1927.

122 New 6th St. Lewiston, Ida

DAILY DAIRY

GIVE SEPARATOR GOOD ATTENTION

When using a cream separator on the farm the following precepts should be observed:

1. Put the separator in a bright dairy room that can be easily cleaned and that is always free from odors of all kinds.
2. Set the machine perfectly level and bolt it to a solid foundation, preferably concrete.
3. Oil thoroughly each time it is used.
4. Be sure that the parts are properly assembled, then start the machine gently and slowly.
5. Maintain the proper speed and keep an even pressure on the handle at all times.
6. When separation is completed flush the bowl with a quart of skim milk or warm water, but do not let skim milk or water run into the cream.
7. Having set the cream into cold water and disposed of the skim milk, take the bowl apart and rinse with lukewarm water.
8. Using hot water, washing powder and brushes, scrub all parts that come in contact with the milk.
9. Rinse with hot water, then place in boiling water or steam sterilizer for a few minutes and hang up to dry.
10. Wipe frame of separator.

The necessity for thoroughly cleaning and scalding the separator every time it is used cannot be too greatly emphasized. Cream from an unclean separator has very poor keeping qualities, soon develops a "off flavor" and becomes second grade. Cream of this kind brings financial loss to the purchaser whether he is selling it on a quality basis or not. Poor cream makes poor butter and poor butter returns a low price to the producer, whether creamery is cooperative or otherwise.

The financial loss caused by unclean separators is frequently not fully appreciated because it is indirect; it is, however, none the less real. Good business management of the dairy, therefore, demands that the separator be thoroughly cleaned each time it is used.—W. H. Woodley, College of Agriculture, University of Arkansas.

Veal of Prime Quality Result of Suckling Calf

Veal of the primest quality is the result of permitting the calves to suckle their dams, in which event it is necessary to allow them to have all the new milk they will consume, and often it is necessary to supply an additional nurse cow or else permit the calf to nurse his dam and partake in addition all the whole milk supply from other sources.

The addition of grain to the ration would really convert the product into beef rather than veal, for generally veal is the outcome of feeding calves exclusively on new milk. Much of the meat that is sold for veal is obtained from animals that have been fed some grain, but it is not difficult to realize the distinction if you have opportunity to compare the two products. Hence, your calf that is nine months old must be fed for beef rather than veal, for the prime veal calves run around 175 to 200 pounds.

Water Supply for Cows During Winter Months

G. A. Williams, dairy extension specialist of Purdue university, has just issued a timely hint regarding the water supply for cows during the winter months. He states that 87 per cent of milk is water, and that a cow needs about three pounds of water for every pound of milk produced. Water cannot be absorbed through the system until it is warmed up to approximately the temperature of the cow's body, and if the heat for warming this water must be supplied by the cow, herself, she will use a great deal of the energy from the feed furnished her for this purpose, rather than for the production of milk. For that reason, it is highly important that the cow be given ample supplies of pure water at moderate temperatures.

Dairy Facts

Any good salt gives results, but the cows should have it at all times.

There is nothing much smaller in actual dimensions than bacteria, but they can make the careful milkman plenty of trouble.

Thoroughly clean and disinfect all your utensils with which the milk comes in contact. The disinfecting may be done with boiling water.

Variation in the producing ability of cows ranges up to as much as 200 pounds of butterfat a year. Testing eliminates the poor producers.

Construction of wider roads is not only a great convenience, but a necessity to farm progress in all directions.

Pumpkins are an excellent feed for dairy cows. Two and one-half tons of pumpkins are equal in feeding value to one ton of good corn silage, according to official tests.

POULTRY

CHICKENS DON'T WATCH A CLOCK

Chickens do not watch the clock. The "best workers" in the flock start scratching as soon as it is light in the morning and continue until it is dark.

Many poultrymen are taking advantage of this natural tendency for activity by using artificial light to lengthen the working day of the farm flock during the winter months. The result is a larger production of eggs, provided the extra light is furnished for good hens which are properly fed and cared for.

"The biggest advantage of this system," says J. G. Halpin, poultry specialist at the Wisconsin College of Agriculture, "is that it stimulates the mature hens to lay, and hastens the development of late and immature pullets so they lay more eggs during the winter months." However, he believes that proper feed and good care will be of greater value to well-developed pullets than will the extra hours of light.

"Forcing the mature hens into early winter laying may result in reduced hatchability of the eggs during the hatching season. This is due more to the difficulty of supplying the flock with a complete ration that supplies all of their requirements in proper proportions, than to the mere fact that the hens are laying," he explains.

"One of the most difficult things to supply under our conditions is sufficient vitamin D to make it possible for the hens to lay during the winter without robbing their bodies. If these materials could be supplied in sufficient quantities, the hatchability of the eggs would not be seriously lowered."

The poultrymen who have used electric lights usually turn them on between four and five o'clock in the morning, although some use the light in the evening, at which time they give a heavy feed. An alarm clock may be used to throw on the switch automatically. If the chickens are to be aroused at these hours, the light should be distributed so as to cover the floor and shine on all of the roosts.

Feed Flocks Effectively to Get Greatest Profit

The greatest profits from the sale of eggs at any one season of the year may be obtained during the winter months. Eggs are high in price at this season of the year because few poultrymen are obtaining eggs. Eggs are low in price during the "flush season" in the spring, because they are plentiful. The cost of feeding varies slightly from winter to spring. That is, during the winter you have a greater difference between the cost of producing eggs and the price obtained from the eggs. As the price of eggs drops in the spring and the cost of feed remains practically the same we have less opportunity for making a profit. Since the cost of feed represents more than 60 per cent of the cost of producing eggs on the farm we must aim to feed our flocks as effectively as possible.

Poultry Notes

Sunlight is a better egg producer than red pepper.

A pullet, properly handled and fed, should gain in weight even though laying regularly.

If you have neglected to get a new cockerel, then order a setting or two of high grade eggs now, and raise your own cockerels for new blood next year.

A cheap treatment for mites, and a fairly good one, is to paint the hen house inside, walls, roosts and all, with a mixture of old crank-case oil and kerosene.

The market seems to be wanting bigger broilers lately—birds weighing between two and three pounds. Evidently, city folks are demanding meatier bones to pick.

Keep plenty of green feed for the pullets; it is essential for both health and egg production.

A broody hen, if taken the first day she is broody, will come back to production in three days if she is put in a cool, slatted coop and fed liberally with mash and milk.

Outbreaks of caecidiosis (bloody diarrhea) which is fatal to a great many chickens every spring, may be largely eliminated by plowing up the ground in the chick yard.

Pullets lay best when confined to the poultry house during the winter months and fed a laying mash.

In feeding poultry the heavy grain feed should come at the evening meal. The birds should have all the grain they will clean up at this time.

Duck eggs hatch in twenty-eight days. When the hatching is done by hens it is well to keep the hen covered until she may be introduced to the children. Otherwise she may peck

Mr. and Mrs. Claus Eichner and son, Kenneth, were Spokane visitors last week.

Mr. and Mrs. G. P. Anderson and children visited friends in Clarkston last Sunday evening.

Mr. and Mrs. L. J. Herres and daughter, Eleanor, Dr. Moorhead and his mother drove to Winchester and return last Saturday afternoon.

A. R. Shumaker of Pullman, formerly of Kendrick, purchased a clothing store in Pullman last week. It was a cash deal, the purchase price being reported at \$15,000. The friends of the Shumaker family in the Potlatch country will wish them success in their business venture. Those who know "Bob" are confident that his business will prosper.

Mr. and Mrs. Daubenberg, Mr. and Mrs. O. E. MacPherson were Lewiston visitors last Sunday evening.

Mr. Beyer, proprietor of the Deary Garage, was transacting business in Kendrick last Saturday.

Born to Mr. and Mrs. Ed Roth of Cavendish, May 1, a son.

Don Crosby a former Potlatcher, who lived in the Fairview community prior to 1917, writes that he is now living at Rome, Oregon, about 100 miles above where the new Owyhee dam is going in. He says, "The Potlatch remains as my ideal of a dry farming country."

Born to Mr. and Mrs. Albert Schulze of Cameron, Saturday, April 30, a son.

Carl Carlson went to Spokane the first of the week on business.

Dr. and Mrs. J. T. Moser of Lewiston were looking after their farming interests in the vicinity of Kendrick last Wednesday afternoon.

A. Wilmot was transacting business in Lewiston this week.

Herbert LaHatt returned Wednesday from South America where he spent the winter.

R. E. Densow of Lewiston was transacting business in Kendrick the first of the week.

Dr. and Mrs. McKeever and daughter, Paula, are spending the week in Spokane with relatives.

Moscow is taking on metropolitan airs, according to a ruling by the newly elected city council, requiring the city police to wear uniforms while on duty.

There was an error in the last week's issue of the Gazette stating that the children of the Ed Darby family were ill with scarlet fever. At the time Dr. Moorhead was called he found them all in good health, but that one of them might have recently recovered from a light case of scarlet fever.

Won Trip to New York

Bill Stamp won a trip to New York City with all expenses paid, recently, by selling the largest volume of insurance for his company of any agent in the Inland Empire, within a designated period of time. He was in competition with agents in some of the large towns in the surrounding territory, so that this feat is something to be proud of. He left last week for New York where he will visit the headquarters of his company.

Crescent Clippings

Elsworth Weaver started to work for John Darby, last Wednesday.

Gus Farrington is moving his family over to their house near the mill. We suppose that means the mill will be running steadily soon.

Mrs. E. J. Wells stayed out at her house in Southwick a few days last week, but is back again now with her daughter, Mrs. Frank Souders.

Warren Trail received word from his state eighth grade examinations last week. He got passing grades in all subjects but will take some over to raise his average.

Cameron News

Mr. and Mrs. Henry Meyer are visiting at the Carl L. Wegner home.

Mrs. Herman Wilken, who fell

and injured her hip several weeks ago, is still confined to her bed. Her daughter, Mrs. Wm. Johnson, has come home to help care for her.

Grandma Lohman is still very ill.

The Ladies Aid met Wednesday afternoon at the home of Mrs. Brunick. Mrs. August Brammer assisted Mrs. Brunick in serving a splendid lunch.

Mrs. Wolfe is visiting at the Albert Schultz home this week.

Should Cows Face in or to the Walls of Stable?

The old question of whether cows should face toward the center or toward the walls of a dairy barn is not settled by the New York State College of Agriculture, which says that both plans have their ardent supporters. It lists the advantages of each, and leaves the individual farmer to make his own choice.

The question arises, as far as the college is concerned, in connection with a new bulletin on the construction of concrete floors for dairy stables. It advocates well-laid floors for permanence and durability, and gives complete details for laying them, telling how to mix, lay and finish the concrete, with photographs and working drawings of the whole job, from start to completion, so that any handy man should not have trouble in getting a satisfactory result, and without prohibitive cost.

Farmers who are contemplating the building of new stables or the remodeling of old ones, are invited by the college to write to the office of publication of the New York State College of Agriculture at Ithaca for a copy of the bulletin which will be sent without cost. It is necessary only to use a plain 1-cent government postcard, giving the sender's name and address, written plainly, together with the symbol E 149, and the publication will be forwarded by return mail.

Attention to Give Cows Afflicted With Garget

Watch out for garget in a new milk cow these cold days. At the first sign of a swollen udder or stringiness in the milk, cut down the animal's grain ration until she is relieved, and give her a dose of physic—castor oil or epsom salts. Milk her gently several times a day, also kneading the udder with your hands, and keep the animal in a warm place. After the physic has worked an ounce of saltpeter daily for two or three days is helpful. So, too, are hot cloths applied to the udder for a few minutes every two or three hours—taking care that the udder does not afterward become chilled.

Kendrick School Notes

The students of the primary room are making doll aprons and rompers and are also learning to sew on buttons. They are doing this for the school exhibit.

The sand table is decorated to represent a May festival, with a May pole, many little girls and soldier boys. There is a clever background of trees.

Last Friday, the children went out after flowers to fill their May baskets. They also made May baskets.

The Commencement Exercises will be held at the New Kendrick Theatre, Thursday evening, May 19, at 8 o'clock. Dean Crawford of the University of Idaho will be the speaker.

In the assembly, Harold Parks suddenly asked: "Has anyone seen a book running around here?"

Mr. Lynch wrathfully replied: "If you do not keep still, you'll see something else running around here!"

The General Assembly program last Friday, was given by the Freshmen as follows: Bible reading, Leora Aiken; Song, Freshman class; Song by Robert Dammarell and Arthur Foster; Song by Marjorie Davidson; Song by Freshmen class; General song; Song by Neva Ware; Recitation, Leora Aiken.

Sam Wanted a Raise

An old colored man was asking a friend's advice on how to apply for a raise in wages. Said the friend: "Just you go up to the master, Sam, and say, 'Look here, master, you must give me a raise, or I'll—' Say it just like that' then he'll think you mean to leave unless you get the raise." Sam went to his master and said: "Look here master, you've got to give me a raise, or else I'll—" "Else you'll what?" snapped his employer. Sam scratched his head in perplexity; then answered: "Else I'll go on working for the same money." —Tacoma New Herald.

NOTICE TO MOVIE FANS

The picture "Lovers in Quarantine", was to have been shown here last Saturday night, but owing to the fact that the electric lights were out of commission we were unable to do so. We have therefore, made arrangements to bring this picture here again sometime in June. It is an extra good one and we want everyone to see it. New Kendrick Theatre. 18-1

Poultry Flock Mating

Poultry flock mating agreements must be received on or before June 30 this year, according to announcement by Prem Moore, poultry specialist of the university extension service. The deadline is set so that the volume of work to be handled may be definitely ascertained, thus permitting adequate and efficient organization.

Work of mating flocks will be started about July 1, according to Mr. Moore. The early start is desirable, he points out, because the work may then be concluded by November 1 and breeding flocks can be put in proper condition in time for best breeding results. Many eggs are set in January and flocks must be in condition early to be fitted for laying and reproduction by that time.

Owners who enter into the agreement with the extension service have their flocks accredited and their selected fowls are banded by Mr. Moore or an other authorized agent of the university. Under the terms of the contract the flock owner agrees that he will use for breeding purposes only those fowls that have been selected by the poultry specialist or an authorized agent, and that all of the breeding stock

be tested by the agglutination method for bacillary white diarrhea.

The agglutination test requirement is new this year, but 31,384 birds out of a total of 34,814 accredited, were tested last season when the matter was purely voluntary. This year the flock owner agrees also to remove and dispose of all birds in his flock that are found to be affected

with the white diarrhea.

The flock mating work has grown rapidly, and it is now developing at such rate that an association of flock owners may soon become desirable, or even necessary. Heretofore it has been carried on through voluntary agreement. In 1925 13,065 fowls were accredited. Last year the figure increased to 34,814, a gain of 21,749 in one year.
