No. 26

Ready For Grand Celebration

KENDRICK TEAM WAS VICTORIOUS LAST SUNDAY

Won From Genesee by Score of 5 to 3.

In a six-inning game, called on account of rain last Sunday, Kendrick won by a score of 5 to 3 against the Genesee team. It was an interesting exhibition and the fans regretted that it couldn't have been continued for the full nine innings, but a downpour of rain made the field too muddy for play.

Kendrick had its infield rearranged and it was working like a well-oiled machine. Stanton was transferred from shortstop to first base and it was a treat to the crowd to watch him work. He was about the fastest first baseman seen here for many moons. Armitage was taken from third to shortstop and he seemed thoroughly at home there. Kulick, who has played first base for several games was put back on third, at which position he is a very consistent and flashy player.

One of the features of the game was a running catch by Bumpass for Genesee. Olson and Weber of Genesee each netted a three-base hit, while Armitage, Kulick, Anderson and Eichner each secured a two-bagger, these two-base hits being made in succession in the same inning.

Following is a resume of the game in detail:

Genesee	Ab	R	H	SO	E

Edward Perry Kimberling

Edward Perry Kimberling passed away at his home in Juliaetta, Friday, June 24, after a long illness. Mr. Kimberling was born in Bland County, Virginia, April 15, 1885. He was united in marriage to Miss Jane Hutchinson, December 18, 1904. To this union four children were born: three boys, Wallace, Henry and Wilfred; one girl, Myrtle.

Mr. Kimberling had been a resident of Idaho for thirty years. A greater part of this time was spent farming on Fix ridge where he owned a farm and took active part in the social and religious affairs of the community.

Funeral services were held at 11 o'clock Sunday at the Baptist church, Rev. A. E. Janes officiating. The church was filled with relatives and friends of the deceased and after the services there the body was conveyed to the Fix ridge cemetery where the Woodmen of the World, held a short burial service.

He is survived by his wife and four children; four sisters and four brothers, Mrs. I. G. Williamson, Mrs. Dan Martinson, Mrs. R. B. Wichard, Joseph, Thomas and S. E. Kimberling, all of Moscow; Mrs. Ida Brett of Myrtle, Idaho and Chan Kimberling of Colville, Wash.

Hail Storm Damage \$850,000

Reports received from Cottonwood are to the effect that the first estimate on the damage resulting from Sunday's hailstorm over that region are not exaggerated, meaning that the \$750,000 reported loss still stands. Aside from the destruction of growing grain over an area of more than 100 square miles, garden truck suffered a serious blow, as well as poultry, the loss from these two sources being estimated at an additional \$100,000.

Insurance men, interested banking officials and the railroad men made a careful survey of the situation. Union Pacific and Northern Pacific officials estimate their tonnage loss from the afflicted region to be 600 cars. Agency men state that not more than 5 per cent of the loss was covered with insurance.

O. E. S. Had Good Meeting

Canyon Chapter No. 67, O. E. S., held a very interesting and enjoyable session last Tuesday evening, before taking its regular recess for the summer months. There was a large attendance gathered to hear the report of the worthy matron, Mrs. Mary Adams, on her return from the grand chapter.

After closing lodge a banquet was served in the dining room, followed by a number of interesting talks by the members.

Conscientious Witness

The old-time practice of kissing the bride received a jolt at a recent Rowan County wedding when an awkward-looking guest was asked if he had kissed the bride, and replied: "Not lately."—Hardware Age.

THIRTY MINUTES FOR DINNER

7:00 p.m. Open Air Dance at Pavilion. Music by 6-piece Jazz Band. Geo. P. Barnum in charge.

Rev. Bell To India

Rev. and Mrs. William Bell and children who have been visiting at the home of Mr. Bell's parents, Mr. and Mrs. C. D. Bell, and other Moscow relatives and friends, left Monday for Rangoon, India, where they return for seven years after a furlough of several months. Rev. Bell is pastor abroad from the Moscow Methodist church.

He spoke at the 11:00 o'clock service Sunday morning, many attending from Kendrick and from many of the local churches. Following the sermon a basket dinner was served in Epworth hall and at 3 o'clock in the afternoon Rev. Bell spoke again. At 8 o'clock a final farewell service was held. Dr. C. W. Tenny, president of Gooding college, being the speaker.—Star-Mirror.

The Flatter Flats

"Well," remarked a married man after examining his friend's new flat, "I wish I could afford a place like this."
"Yes," said his friend, "You married men may have better halves, but we bachelors usually have better quarters."—Ex.

T. Y. Ellis stated yesterday that he had carried the mail from the local postoffice to the depot, four trains a day for the past 28 years and never missed a mail in all those years. It would cost him a dollar if he missed a mail.

Ransack Home of Dr. Hoyt

Their home at W1014 Sixteenth was completely ransacked during the week's absence of Dr. John Hoyt and family. Among the articles missing were a .32 caliber colt revolver, a pair of Eastern Star cuff links, an emerald ring and a child's bank. The house was entered by using a pass key on the rear door.—Spokesman.

Committees to Meet Tonight

The various committees in charge of the celebration to be held here next Monday, are requested to meet at the city hall tonight. Reports of the committees will be received at this time and all details concerning final arrangements discussed and completed. A good attendance is desired.

Special Services at Cameron

Sunday morning, July 3, beginning at 10:30 a. m., confirmation services will be conducted in the Lutheran Church at Cameron. A class of five young people will be confirmed and taken into communicant membership. The young people to be confirmed are: Edna Lohman, Myrtle Gertje, Irene Meyer, Walter Meyer and Ernest Brammer. The public examination will be held during a special service Friday evening, 7:45. The public is invited to attend these services.

Death of Mrs. Southwick

Mrs. Martha Southwick, wife of Stephen R. Southwick, passed away at her home in Southwick at 7:10 a. m. Saturday, death resulting from injuries received a week previous, when she suffered a fall at her home, sustaining an injury to her hip. Up to the time of the accident she had enjoyed good health, considering her advanced age, which was 80 years.

Mrs. Southwick with her husband located at the place now called Southwick, 44 years ago. The village was named after them and Mr. Southwick was the first postmaster. They were popular and hospitable people, their home being a favorite place for neighborhood gatherings.

Mrs. Southwick was a splendid character, a staunch Christian, a devoted wife and mother. She was born in Illinois and was married to Mr. Southwick 64 years ago.

Those of her family who survive her are a husband, four sons and four daughters, LeRoy of Southwick, for many years commissioner of Nez Perce county; Harve of Lenore, Albert of Reubens and Edward of Alberta; Mrs. Myrtle Davis and Mrs. Mattie Brown, both of Los Angeles; Mrs. Mary Daggett of Lenore and Mrs. Emma Terry of Caven-dish.

Funeral services were held at Southwick Tuesday morning and interment made in the Southwick cemetery.

The board of commissioners of Nez Perce county, in session at Lewiston this week, recessed Tuesday in order that the members might attend the funeral.

Last Day to Pay Taxes

Saturday, the last day for paying June tax accounts, was a busy one at the county treasurer's office. A total of \$125,785.20 has been collected of the \$225,000 installment estimated by H. H. Hoagland, deputy county treasurer.

Of the \$100,000 remaining outstanding, Mr. Hoagland believes \$50,000 will come in the next few days' mail. The treasurer's books will be closed at the end of the week and turned over to the auditor, H. A. Thatcher, and no one will be able to settle their delinquent accounts until the fourth Monday in July, which is the 25th.

In addition to the regular two percent penalty for delinquency, a regular interest rate will be added to the principal for at least seven months. About three per cent of the total collections are delinquent each year, said Mr. Hoagland.

The amount represented in this collection is about \$2000 more than was in last year at this time. \$381,670.25 was collected in the December installment.—Star-Mirror.

One On The Banker

A Scotchman went into a bank and said he wanted to borrow a dollar for a year. "But you are a stranger to us," said the cashier. "What security can you give?" The Scotchman pulled out a bundle of papers and answered: "I offer these." The cashier took them and found there were \$35,000 of Liberty bonds. He at once made out the requisite papers and handed the Scotchman the dollar less the years' interest. Then, turning to the Scotchman, he said: "Now I am curious to know just why you would put up \$35,000 security for one dollar." "It is just this way," said Sandy. "I want my bonds taken care of for a year. If I should hire a safety box from you you would charge me \$2, but now you will take care of them for me for ten cents."—Leavenworth Times.

ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

Mr. and Mrs. G. H. Gerlach, who have been visiting the Betts families, left for their home in Spokane, Sunday morning.

Miss Minnie Bunker and brother, Wayne, and Nellie Henderson spent Sunday at the home of Mr. and Mrs. Homer Hayward.

Mr. and Mrs. Hunter and children of Walla Walla, who have been visiting with her father, A. W. McCoy and other relatives, since last Wednesday, left for their home, Monday.

Ray Triplett and wife left for Camas last Wednesday.

Mr. and Mrs. A. H. Smith and son, Ralph, and Mr. and Mrs. Harry Smith and two children of Leland, Walter Hunter and family of Walla Walla, Elton McCoy and Nellie Berriman were dinner guests of Mr. and Mrs. Ben McCoy last Thursday.

Mr. and Mrs. Gerlach, Emma Betts, Mr. and Mrs. Wm. Berriman and Doc Betts and family spent Friday at the Homer Betts home.

Mr. and Mrs. Ralph Wright and son, Marion, of Potlatch, spent Saturday night and Sunday at the home of her sister, Mrs. Darl Wright. Mrs. Wright accompanied them home for a short visit.

Mr. and Mrs. Pete Blake, who expected to spend the summer here have moved to Orofino.

Mrs. Gill of Peck is visiting her daughter, Mrs. Fairley.

Mr. and Mrs. Doc Betts and three children and Homer Betts and wife spent Sunday at the home of Mr. and Mrs. Fred Hassinger at Gifford.

Mrs. Fred Whiting is spending a few days at the home of Roy Blankenship of Bed Rock, canning strawberries.

Mr. and Mrs. Harold Whiting and children and Mrs. Dave Schoeffler went to Kookkia last Friday where they visited with their parents, Mr. and Mrs. Ross Hoffman. They returned home Sunday evening.

Southwick and vicinity was visited by a hard electrical storm Sunday afternoon. The rain came down in torrents for about fifteen minutes. No damage was done however.

Dr. Watts and Mr. Carter of Gifford attended the funeral of Grandma Southwick, Tuesday.

Mrs. Geo. Jones reports the birth of a baby boy to Mr. and Mrs. Mahaffy of Elk River the 17th of this month.

The funeral of Grandma Southwick, who passed away at her home last Saturday, was held at the M. E. church, Tuesday, Rev. Addelem of Clarkston delivered the sermon to a large number of sorrowing relatives and friends. Grandma Southwick has the sympathy of the whole community in his bereavement.

Sunday guests at the Wm. Whiting home were Frank Thornton and family, Mr. and Mrs. Wm. Henderson, Milton Benjamin and wife and Fred Whiting and family.

Mr. and Mrs. Carl Koepp and son and Grandma Brammer visited at the home of Henry Brammer, Sunday.

Milton Haines and cousin of Lewiston are spending the week at the home of his aunt, Mrs. Martin Sackett.

Elton McCoy, Russell Baker and Lester True were dinner guests of Mr. and Mrs. Jim Cook of Bed Rock.

Miss Nellie Henderson was the overnight guest of her sister Tuesday night.

Mr. Homer Hayward has purchased a combine.

Mr. and Mrs. Adam Rose and sons of Ontario, Oregon, arrived Tuesday for a visit with friends.

Entered at the Post Office at Kend-
rick as second class mail matter.

Last year the farmers in the Potlatch had to contend with an early frost that ruined the beans. Let's hope that those army worms won't come out from Kansas and eat up our navy beans this year.

An exchange remarks that a big crop would come nearer thawing out frozen assets of the banks than anything else.

When you see a particularly careful driver, one who takes good care of his car, you can't help surmizing that maybe he has it paid for.

The national clothiers agree that newspaper advertising is the best advertising.

If you can remember the time when you took your best girl for a ride in a rubber tired buggy—don't kid yourself—you are getting old.

A medical authority says that lipstick is injurious to feminine health. He doesn't say what it does to masculine health.

PRINCE NOW ARTIST

Prince August Wilhelm, one of the younger sons of ex-Kaiser Wilhelm, has changed sword for brush and can be seen daily in Potsdam, sketching or painting picturesque scenes of the old town.

Owed Reputation to Dante

Sordello, a Provençal troubadour, who lived from 1180 to 1255, owes his reputation chiefly to Dante, who mentions him eight times in his "Purgatorio." Nothing survives of his prose and only a few poems.

Pip Daniels says a Kansas City man reached home late the other night, told his wife he was delayed because he had a flat tire. The stenographer heard that she had been called a flat tire, and the next time they met there was a scene.

Tommy Hodge, who had been apprenticed to Farmer Hicks, had not proved a conspicuous success. When old Hodge came along to ask what progress the lad was making the farmer looked dubious. "Well," he said, "'tisn't as I want to discourage you or your son either. He don't do nothing wrong—or nothing at all if he can help it. But I will say that, in my opinion, if your son had another hand he would want another pocket to put it in."—Ex.

Coming out of the Mud

One of the chief benefits the farmer derives from really good roads is that of being able to market over them quickly, cheaply and without inconvenience. The farmer's crops are his stock in trade. If he can market them without delay when the price is up, he is the gainer; if, because of bad roads, he is unable to get his crops to market until the price has declined, he loses.

In the old days when roads were good only in good weather, the farmer could do little satisfactory marketing. He was forced to take a chance on getting his products to the buyer on a rising market.

One decided advantage in good roads is that they encourage the use of motor vehicles by

the farmer, effecting a saving in time and worrying moving his crops, and in getting his family to church and the children to school.

Thousands of miles of poor roads which act as feeders for main highways are being made practical for modern traffic at a minimum of expense, by protecting the old base with a water-proof wearing surface. This farm land is made available for use, which would otherwise be isolated due to distance from schools and markets and prohibitive cost of building standard types of state highway pavements.

The modern tractor and road machinery, plus the waterproofing qualities of asphalt and oil are enabling hundreds of communities to come out of the mud.—Genesee News.

Bullfrogs, Snakes, Liars

A farmer who found that his cows were not giving the usual quantity of milk followed them and learned that they were serving as wet nurses to a large family of bullfrogs, is the substance of a story passed along by Ed Skinner of the Emmett Index. Yes, sir; it is told that during his investigation the farmer found four frogs, each standing on its sturdy legs, sucking their fill—and that when their tummies had taken on the contour of an Earle Boyes bread-basket they retired and others came to dinner. That's a very fair story—as stories go. Fact is that as a liar Brother Skinner constantly improves with age; and he is no spring chicken. Although we realize that a writer who is always circumscribed by the bounds of truth can't hope to compete with him, we recall a true incident that is almost as unusual as his fabrication. It is said that a Caldwell man who formerly liked a drink of wine, but is now an ardent prohibitionist, last fall placed four gallons of grape juice in a five gallon keg, leaving a bung-hole at the top open for ventilation. It seems that a water snake worked its way into the cellar and seeing the hole in the keg, crawled in and made a home for itself. When the man went to test the wine he upended the keg without result. Finally, he knocked in the top and found instead of the expected laughing water, the mother snake and thirty-nine baby snakes to greet him. Believing that the presence of the snakes was in the nature of a miraculous warning, he now refuses to eat even sauerkraut because of its supposed alcoholic content.

Note—If thirty-nine baby snakes are too many for a self-respecting mother snake to have while imprisoned in a keg Brother Skinner is privileged to reduce the number in the interests of exact truth. In these matters there should be no misrepresentation.—Caldwell News

McCormick-Deering

Tractor Power---for All Work!

EVERY YEAR McCormick-Deering Tractors stand stronger with local farmers. The name McCormick-Deering has become the symbol of reliable power farming because it stands for carefully built, practical, many-sided, long-lived farm power—and the kind of service cooperation we are able to offer our customers.

Men who have used International Harvester tractors—for months or for years—are steadfast friends of McCormick-Deering farm power. They will recommend McCormick-Deering when you come to buy. Other men, who risked using cheaper, lighter tractors, found themselves underpowered. They fell short of reaching full production with the least possible labor and in the shortest possible time. After this experience they were ready for new and better power. There are many like these, too, who will recommend McCormick-Deering when you make your power investment.

December Eggs Are Desirable

Possible to Increase Profits by Developing Better Laying Strain.

(Prepared by the United States Department of Agriculture.)
The average farm hen lays less than 60 eggs a year and she lays them during the season of lowest prices. It is quite possible to increase the egg profits from the farm flock, says Dr. M. A. Jull, poultry husbandman of the United States Department of Agriculture, by developing a flock that will not only produce more eggs in a year but will produce them in the fall and winter. Ten eggs laid in December, he says, are worth 20 laid in April or May.

Lowest Egg Prices.
A study of the trend in the average monthly farm prices from 1910 to 1924 shows that the lowest wholesale egg prices prevail in April, and that there is a slight increase in July and August, with a more perceptible increase beginning in September. The highest price is reached in December. The important point for farm flock owners to realize is that it takes fewer eggs from October to January to pay for a given quantity of feed than during any other time of the year. Although the price of grain or of eggs cannot be controlled on the farm, egg production can be regulated to a considerable extent.

Ability to Lay Eggs.
The ability to lay eggs is inherited. To develop an egg-laying strain requires careful selection and the adoption of a consistent breeding policy. The average farm hen should not only lay at least 144 eggs in a year but most of them should be laid from October to March. This can be accomplished by building up the flock from selected females that have these characters and with males produced by such females. Four guides to improvement are the selecting each year of (1) those hens which mature early; (2) those which lay best after they begin; (3) those which seldom go broody; and (4) those which lay well throughout the late summer and fall. Furthermore it is important to hatch the chicks as early as possible.

Increasing Demand for Capons at High Prices
As there is a growing demand for good capons at top prices, a few of the more important things to follow to

produce good capons may be of some benefit.

In the first place, only stock from good vigorous breeders should be used. While most any breed may be used for producing capons, a bird of good size and plumpness makes the better carcass. The different breeds of the American class such as the Rocks, Reds, Wyandottes, Lavas, Rhode Island Whites, etc., make fine capons. In the English class are the White or Buff Orpington or Dorking, The Asiatic, the Brahma, White Cochin or Langshan. The Jersey Giant also makes an exceptionally fine capon. The Mediterranean, while very easily caponized, do not make top price birds.

Important That Chicks Be Confined Near Stove

It is important that chicks be confined near the brooder stove when they are first put into the brooder. This may be done by putting a wire screen around the brooder so that the chicks cannot get out of the warmth until they have learned to go where the heat suits them best. If there is any floor draft it is advisable to make this retainer out of tin or some similar material. After such a retainer is removed, the corners of the brooder house should be rounded off with some material so as to prevent the chicks from crowding into the corners. Proper regulation of the heat will also prove an important factor in preventing chicks from crowding.

Adding New Blood

Although promiscuous and yearly additions of new blood is undesirable, an occasional introduction is advantageous where the poultryman does not have time to trap-nest his stock. Decided improvement can be made by this method if it is known that the stock from which the blood comes is superior to one's own flock. The purchase of hatching eggs is one of the cheapest methods of introduction of new blood.

Agricultural Items

Garden slogan: Weed 'em and reap.

Modern farming requires brain as well as brawn.

The hoe is a mighty good machine sometimes. But it is a mighty slow wealth producer.

Where wheat or rye pasture can be used it cheapens the winter ration both for cows and young stock.

Agricultural Items

Good machinery will cut costs.

A community without an organization is on the skids.

A month without adequate feed destroys the value of 11 months of plenty.

Production is the first consideration, but marketing is of almost equal importance.

After much experimenting the Ohio station concludes that nine pecks of seed oats to the acre is best seeding.

Farming is hard work, but the biggest waste in farming is the waste of time in an unbalanced farming plan.

Soy beans are planted at the rate of one bushel for two to three acres. If drilled in, six to seven pecks per acre are needed.

A hydraulic ram will operate if the water delivered to it has a fall of at least three feet and flows at a rate of at least two to six gallons a minute.

Ohio vegetable experts claim that dusting soil heavily with two applications of 20-80 copper lime dust reduced the "drop" or botrytis disease of lettuce from 44 to 11 per cent.

A permanent pasture insures a permanent income.

Check the grain drill before using to see that it is planting right.

There are only two reasons why a man should farm: because he likes farming and because he can make money at it. The good farmer combines the two.

Washing horses' collars with warm water keeps them clean and smooth. Collars scraped with a knife are likely to become rough and be the cause of sore shoulders.

More than half of the total area of woodland on farms in New York state is pastured and therefore is on the down grade toward final extinction.

To be well built a silo must have air-tight walls, be round in shape, have smooth, perpendicular walls, have strong walls which will not bulge, and be deep in proportion to its diameter.

STEEL WHEELS

Just the thing to make your old worn-out wagon into a handy farm wagon. If you are interested, see me before ordering elsewhere.

The wheels I handle are made by one of the most reliable manufacturers in the country, and are second to none. Prices right. I can furnish wooden wheels to those who prefer them. I also handle wagons of all sizes and can save you money.

Phone 222, Southwick or Kendrick

POULTRY

DIRECTIONS FOR SETTING A FOWL

In setting a hen the first thing is to make the nest. A box should be so arranged that the front can be closed and the hen shut onto the nest. The nesting material may be of fine hay or straw. There should be a sufficient quantity to fill the corners. Make the nest nearly flat, a little lower in the center.

See that the hen has been broody and stays on her nest two or three days before she is given her new nest, and always move her at night. Put her carefully on the nest. For the first 24 hours close the front of the box. After a day or two, according to the disposition which she shows on the nest, remove the nest eggs and give her from eleven to thirteen eggs, according to the season of the year.

After the first 24 hours see that the hen leaves the nest, at least once a day for food and water. Whole corn makes the best feed. Keep a dust box in the pen. Keep grit and fresh water before them at all times.

Set several hens at a time if possible, as the eggs can be tested about the seventh day. Remove the eggs that do not show a good germ. Take the eggs from one hen and replace these and start her on fresh eggs.

Always give the hen a dusting with some good lice powder before placing the eggs under her, and sprinkle a good quantity in the nest material. Give her a dusting again in ten days and also another dusting a few days before the hatch is due.—E. J. Peterson, North Dakota Agricultural college.

Cleanliness Essential in Growing Chickens

Next to proper feeding there is nothing so essential in growing chicks to vigorous, profitable layers and breeders as cleanliness. Be sure the feed is of the highest quality and not moldy, dusty or damp.

If wet mashes are fed, care should be taken not to feed leftovers as a wet mash will soon sour or mold. Mix only enough for one feeding at a time and if there is any left, feed it either to the mature fowls at once or give it to the hogs. Be sure the troughs or boards that the wet mash is fed on are kept clean. No matter how sour or moldy the mash may be, the chicks will eat it if they are hungry enough and bowel trouble will be the inevitable result.

The litter should never be allowed to become damp as nothing will cause brooder pneumonia quicker. When the chicks are first put in the brooder house or under the hover, an inch and a half of litter will be enough, but as they get old enough to really scratch, the depth of the litter will have to be increased to seven or eight inches.

The milk fountains or vessels should be washed every day and thoroughly sterilized throughout the summer. The water fountains should also be washed frequently and care be taken to give the chicks clean, fresh water every day.

Poultry Hints

Do not place the incubator up against the walls. Let the air circulate freely around it.

Alfalfa is one of the best vitamin-containing feeds for the hen. When a high grade of alfalfa leaf meal can be obtained, the amount equal to 10 per cent of the mash mixture can be fed.

Early pullets are the most profitable because they begin to produce eggs in the fall and lay through the winter season. As everybody knows, the fall and early winter eggs always bring profitable prices.

The poultry business was not intended for persons who become discouraged easily, or at trifles. Beginners are liable to make a good many mistakes, but these if looked at in the right light only tend to stimulate one.

One disadvantage of the early chick is the cold weather, making extra heat necessary for chicks.

Market only strictly fresh eggs. If you find any that you are in the least doubtful about, put them in the basket for home use, where they can be looked after.

Although promiscuous and yearly additions of new blood is undesirable, an occasional introduction is advantageous where the poultryman does not have time to trapnest his stock.

The early hatched chicks, if the pullets are kept for egg production, are most likely to make good egg producers.

An egg is two-thirds water, and nothing contributes more to high egg production than a constant and abundant supply of water.

Emblen and Toulouse geese are the best commercial breeds; standard weights, 20 pounds for the gander and 18 for the goose and young gander, 16 for young geese.

DAIRY FACTS

BETTER STOCK FOR DAIRY DEMANDED

The increasing demand for better dairy cattle has placed a large premium on animals having proved productive capacity and known ancestry. Consequently, breeders are getting over twice as much for stock that has been tested under the advanced registry of production as for those that have not.

A study of 51 Holstein-Friesian cattle sales held throughout the United States during 1926 shows that the average price for advanced registry females with yearly records was \$444. This was \$273 more than the average price of animals without advanced registry records and out of untested dams.

In 38 auction sales of pure-bred Guernseys the contrast was equally striking. Cows having both advanced registry records and advanced registry dams averaged \$523; those with registered dams but no official records on themselves averaged \$330, and those without tested dams, but with official advanced registry records, \$261.

Commenting on this, W. R. Robbers, superintendent of the advanced registry testing for the state of New Jersey, says: "The results of these large auction sales in various states give an accurate measure of the monetary value of knowing and being able to prove to prospective buyers the ancestry and milk producing ability of an animal. The buyers at the auctions throughout the country were ready to pay a premium of \$273 on Holsteins with official records showing their own and their dams' milking capacity. With Guernseys similar records were worth \$271."

One High-Producing Cow Good as Seven Poor Ones

One cow that produces 400 pounds of butter fat in a year will net the owner as much profit as seven cows that produce 250 pounds of butter fat, according to records kept by five Paulding county dairymen during 1926, and summarized by Ivan McKellip, dairy specialist of Ohio State university.

"These records show that a cow that produces less than 200 pounds of butter fat in a year is not paying expenses, while a cow that produces 400 pounds is netting the owner nearly \$100 above all costs including labor.

"These figures show," stated Mr. McKellip, "that a herd of ten cows that averages 400 pounds of butter fat in a year, will pay for their feed, pay all other miscellaneous expenses, pay a wage for the labor expended on them, and still slip nearly \$1,000 into the pocket of the owner, while a herd of ten cows producing an average of 150 pounds of butter fat in a year will require the payment by the owner of over \$400 for the privilege of keeping them."

Dairy Cows Will Thrive if Fed Cottonseed Meal

While most experiments indicate that linseed oil meal is slightly superior to cottonseed meal for beef cattle it seems that there is little difference for dairy cows. In fact, an Indiana experiment indicates that choice cottonseed meal has a slight advantage over linseed oil meal for milk cows.

Do not feed more than two pounds per cow daily. In the South they have fed as much as four pounds without injurious results. Large quantities of cottonseed meal in the ration, however, predispose to udder trouble. It is much safer to feed large quantities of cottonseed meal when there is silage in the ration than when there is no succulence.

Pure Water One Element That Insures Best Milk

Much sport has been had about the dairyman adding water to milk, but nevertheless it is a fact that good dairymen do add water to their milk during the manufacturing process—not afterwards at the pump.

Pure water is one of the elements that insure pure milk. Milk is fully 87 per cent water. A large cow drinking heavily daily because she produces heavily will take as much as 100 pounds, or nearly 10 gallons of water in a day.

Closely stabled cows should have water at least twice a day and it is always simpler and better to supply the water in drinking cups at the stanchions. The matter of temperature of the water is important. It is bad practice to oblige cattle to consume icy cold water. The water should be at least 20 degrees above freezing point in order to avoid too sudden shocks to the animal's system.

Agricultural Facts

It pays to plant good seed.

Arsenate of lead and lime, dust or spray, gets cabbage worms.

Clean cultivation is as good a thing to use in combating garlic as anything.

Bacterial wilt is a disease which is carried by the striped cucumber beetle and causes the cucumber vines to wilt and die.

The adoption of a good crop rotation is one of the easiest and surest ways of placing the farm on a systematized business basis.

Crop rotation is practically the only satisfactory means to control corn smut. A crop system also holds the nematode in check where a field is planted to sugar beets no more frequently than once in four years.

POULTRY FACTS

BUILD UP FLOCK OF STRONG HENS

Only by continuous selection for health and vigor is it possible to build up a flock that will produce fertile eggs, strong chicks capable of making quick growth, and pullets with sufficient stamina to withstand the strain of heavy egg production.

The appearance of a bird is not always a sure indication of its vigor, but appearance and action taken together are a fairly reliable guide for picking out vigorous birds.

The comb, face, and wattles should have a good bright color; the eyes should be fairly bright and fairly prominent, and the head should be comparatively broad and short, having a fairly short, well-curved beak and showing no tendency to be long, "snaky," or "crow-headed."

The bird should be alert and have a strong, vigorous carriage; the legs should be set well apart and strongly

support the body, giving no indication of weakness or a knock-kneed condition. The toes, as seen in the shank, should be strong and not too fine for the breed, while the toes should be strong, straight, and not too long. The plumage should be clean and smooth, as a lack of condition often accompanies soiled, roughened plumage. The condition of flesh should be good, as a very thin bird is usually in poor health. Sick fowls, or fowls that have apparently recovered from sickness, should never be used for breeding.

Scaly Leg Will Submit to Efficient Treatment

Scaly leg is recognized by the enlarged, roughened appearance of the feet and legs. It is caused by a little mite which burrows beneath the scales and causes the formation of a yellowish, powdery substance which keeps raising up the scales until they present an unsightly appearance. In severe cases, if the birds are not cared for, the joints of the toes become inflamed, sometimes so laming the birds that they are unable to walk.

Wash the bird's legs well with soap and warm water and remove all loose scales. Rub well with a half-and-half mixture of kerosene and linseed oil (melted lard may be used in place of linseed oil); or fill a can with the mixture, and at night, after the birds have gone to roost, dip each bird's legs into it, allowing them to soak for a minute, then return the bird to the roost. Repeat the treatment every three or four days until the scales are removed. Oil of caraway used in the same manner is also very effective. To prevent the disease, spray the roosts, dropping boards, and all nearby cracks and crevices thoroughly and often so as to keep them free from mites.

When birds are in confinement, allow 300 chicks to a brooder pen, 10 by 12 feet in size. When the birds are given free range allow 350 to 400 chicks to the flock. Remove all males four to five weeks of age. Furnish perching space early to prevent crowding.

FEEDING TRIALS FOR THE CHICKS

Feeding trials during 1926 on the experiment station poultry farm at Rutgers university have shown that by means of a new ration it is possible to make White Leghorns average 1 1/2 pounds in weight when eight weeks old and show steady gains to a maturing weight of four pounds.

The new ration used was designed to meet all nutritive requirements of birds raised in confinement for the prevention of coccidiosis, black head, round worms and tapeworms, and consisted of the following ingredients: Twenty pounds of wheat bran, 20 of Red Dog flour, 20 of yellow corn meal (whole ground corn), 20 of ground rolled oats, 10 of meat scrap (50%), 5 of dried milk, 2 of oyster shell meal, 1 of salt and 1 quart of cod liver oil. The scratch ration consisted of 2 parts of fine cracked corn and 1 part of fine cracked wheat.

For the poultrymen who wish to use this ration the poultry depart-

ment gives the following directions:

For First Three Days—Give milk to drink, either sour skim milk or a commercial condensed skim milk or buttermilk. These two commercial products must be diluted one part in seven parts of water. It is preferable to continue feeding the milk indefinitely, thus promoting best possible growth.

Three Days to One Week—Feed mash in pans twice daily, all the chicks will eat in 20 minutes; scratch feed 3 times daily, all they will eat in 20 minutes.

One Week to Twenty Weeks—Furnish plenty of mash hopper space, add fresh mash daily. Give scratch feed three times daily. Green feed must be tender and succulent; feed small amounts at start, then increase to what the chicks will eat in 15 minutes. Infertile eggs from the incubator, boiled, make a splendid delicacy for the chicks.

When birds are in confinement, allow 300 chicks to a brooder pen, 10 by 12 feet in size.

When the birds are given free range allow 350 to 400 chicks to the flock.

Remove all males four to five weeks of age. Furnish perching space early to prevent crowding.

Fresh Air and Light Are Best for Growing Chicks

Plenty of fresh air and light are necessary to get the best results with growing chicks. In addition to ventilators in the back of the house, both at the plate and at the floor line, the windows should be adjustable. When the weather permits, the lower sash may be removed in order to admit more direct sunlight. In a 10 by 12 brooder house it is desirable to have at least four 4-light sashes made of 12 by 14 panes.

Brooder-house temperatures should be kept as uniform as possible and to this end the walls and floors must be tight. Drop siding for walls should be put on dry. If it is put on wet it may dry out, crack and open up. Double wall construction has not always proved satisfactory because it is hard to keep such houses free of mites.

Feed Costs of Growing Pekin Ducks for Market

The feed cost of growing Pekin ducks to ten weeks of age, when they weigh from five to six pounds, is estimated at from 13 to 15 cents a pound. Green ducks are marketed from April to November, and bring from 20 to 45 cents a pound when sold to commission men at wholesale. The highest prices are paid for ducks marketed early in the spring, decreasing as the season advances and the supply becomes more abundant. The demand for green ducks has been built up in large cities in the East and on the Pacific coast, and there is very little demand for such ducks in small cities and towns. Many farmers market their ducks in the fall as spring ducks at a lower price per bird than is received for green ducks in the spring.

Turkey Eggs in Incubator

Turkey eggs are successfully hatched in any incubator which will do effective hatching of chicken eggs. The incubator is being used more and more for this purpose each year and some of the largest turkey producers hatch exclusively with the incubator and raise the turkeys with artificial brooders. The young turkeys must be kept clean and dry, especially during the first four weeks. Turkeys do not require quite as much heat as chickens.

Consumers

The intermediate consumer is one who is buying things to be used in making other products. Such a person is consuming goods used in the production of other goods. The ultimate consumer is one that uses the completed product.

Influenced by Equinox

A line storm is an equinoctial storm—that is, a storm occurring at or near the time of an equinox, the time at which the sun crosses the equator, which is about March 21 and September 22.

LOCAL NEWS

Mr. and Mrs. A. R. Shumaker drove down from Pullman Sunday to spend the day at the Joday Long home.

Mr. and Mrs. Charles G. Pool and little daughter of Whitebird spent the week end at the home of Mr. and Mrs. Kester Dammarell. Mr. Pool is cashier of the bank at Whitebird.

E. H. Emery and family spent the week end at the home of his brother near Palouse.

Miss Helen May, who was a guest at the McKeever home last week, returned to her home in Spokane, Sunday.

Mr. and Mrs. A. V. Dunkle and children arrived Sunday evening from Kellogg to visit Mrs. Dunkle's father, A. Wilmot, and friends in Kendrick. They left this morning in their car over the state highway for Valley County, Idaho, where Mr. Dunkle will have charge of the electrical end of a big mining project near Deadwood. They expect to remain there until late next fall.

Henry Galloway drove a Ford car up to a gas pump in Kendrick Tuesday and when he raised the seat cushion to fill the gas tank he found a big, gray rat curled up on the tank. It had evidently "bummed" a ride all the way from the ranch on Bear ridge to town.

Miss Edna Emery of near Palouse arrived the first of the week to visit her cousin, Doris Emery.

R. M. Wright returned Wednesday afternoon from Lewiston where he spent a week in the hospital. He is considerably improved in health.

Mr. and Mrs. Earl Kulick were Moscow and Pullman visitors the first of the week.

Manford Nutt of Juliaetta was transacting business in Kendrick last Wednesday.

W. A. Perryman was a business visitor in Lewiston Tuesday of this week.

Ben Calison and son, Norla, made a trip to the Salmon River country the first of the week, beyond Whitebird, after a pet cub bear, which will be used by the Callisons to train a pair of Cocker spaniels for bear dogs. The first time the spaniels were turned loose after the bear they put it up a tree in short order.

W. F. Behrens stated this week that he had sold a number of his four-row bean cultivators in various parts of the Potlatch country and that they were giving satisfaction and proving to be efficient machines. The cultivator was invented by Mr. Behrens last season.

Bulger's animal circus, under contract to show here at the New Kendrick Theatre last Friday evening, skipped its date and showed in a neighboring town that night. Action was instituted against the show for damages but it left the state before the proper papers could be served.

A tennis team from Moscow has challenged the two local net artists, R. H. Ramey and J. G. Gardner, for a match game here on the evening of July 4th. The challenge has been accepted.

The committee in charge of the Fourth of July celebration has arranged to have four peace officers on duty here during the celebration. Tom and Jerry, Old Crow and White Mule are politely requested to stay away from Kendrick as they have no place on the day's program.

Ed Collins of Moscow, deputy game warden, was a Kendrick visitor Wednesday afternoon. He was on his way home after "planting" some Chinese pheasants in the country northeast of Deary.

Joday Long closed a deal this week for the purchase of Mrs. Bump's residence on East Main Street. He expects to take possession in the near future.

R. Haizlip left Tuesday for Spokane. He expects to be gone all summer.

Dr. and Mrs. Moorhead arrived home last Sunday afternoon from their honeymoon. On their way here from Henry, South Dakota, they toured Yellowstone Park and also drove through the Black Hills of South Dakota, passing the lodge where President Coolidge is spending his summer vacation.

Dr. Moorhead added 4800 miles to his speedometer reading on his trip.

Mrs. Charles Thompson and son, Charles Jr., of Moscow spent the week end at the home of Mr. and Mrs. Ralph Knepper.

L. F. Davis, real estate and insurance dealer of Corvallis, Oregon, arrived the first of the week to visit friends here.

A. V. Dunkle and A. Wilmot drove to Deary last Tuesday on business.

Mr. and Mrs. Eddie Deobald and children, Mrs. Otto Schupfer and children drove to Moscow Tuesday afternoon.

Miss L. Bedford of the Lewiston Children's Home was in Kendrick Tuesday morning getting funds to help along with the good work that is being done at that institution. She stated that there are now 80 children being cared for at the home, a much larger number than usual. The home is partially supported by state and county funds but Miss Bedford stated that public donations were required for at least one-third of the expense of maintaining the home.

Mrs. James Ashton and daughter of Seattle are visiting at the Petrick home.

Louis Otnis of Moscow was transacting business in Kendrick this week.

The Bell telephone company has a crew of men replacing the four wire circuit from Lewiston to Kendrick with new copper wire and is adding four more wires to the line. The crew is working from Lewiston toward Kendrick and the work is progressing rapidly. This new line will give Kendrick very good long distance service.

Gus Ziemann of Southwick is having a tennis court made on his lots at the rear of his residence this week.

M. O. Raby has installed a frigidaire machine in his place of business this week.

Mr. and Mrs. Cyrus Roberts were transacting business in Moscow last Tuesday.

Linden Items

Mr. and Mrs. Geo. Lockhart have rented the McCalister place and took possession the first of last week.

Mr. and Mrs. Claud Pippenger and family of Cavendish spent Saturday at the Geo. Garner home.

Clem Israel finished sawing at his mill near Southwick, Friday, and he and his family returned home that evening.

Edgar Bohn went to Three Bear Sunday evening to work at Chambers mill.

Louis Alexander and family and Mrs. Sylvia Jenks spent Sunday at the C. E. Fonburg home.

C. E. Fonburg and H. J. Starr each delivered a load of hogs to the Kendrick market last week.

Mrs. H. J. Starr, who has been suffering with inflammatory rheumatism, is slowly improving.

Grandma Keeler is visiting with Miss Eva Smith.

Miss Alice Wegner visited her sister, Mrs. Roy Bohn the first of the week.

Mrs. McPhee spent Monday with Mrs. C. E. Harris.

Mr. McPhee, Joe Perry and Melvin Garner left the first of last week for a camping trip near Elk River, hoping the trip would benefit Mr. McPhee's health, who has been poorly for some time.

Mrs. Sylvia Jenks and grandson, Wallace Dunham of Clarkston, are visiting at the Louis Alexander home.

Mrs. McPhee and son, Cleve, Mr. and Mrs. Geo. Garner and family, Grandma Keeler and Eva Smith spent Sunday with Mr. and Mrs. Edgar Bohn. The occasion was in honor of Mrs. Bohn's and Archie Garner's birthdays.

Mr. and Mrs. C. P. Israel and children spent Sunday with friends in Moscow.

Mr. and Mrs. Harry Langdon and sons of American ridge called at the Arley Allen and Ray Cuddy homes Sunday.

Crescent Clippings

Mr. and Mrs. Percy Rew and family enjoyed a visit from Mr. Rew's brother, Harry, of Tyler, Wash. Accompanying him were his wife, and father-in-law, W. J. Bennett, a civil war veteran, and Prof. and Mrs. Charles Gabby of the University of Idaho at Mos-

cow. All were Sunday dinner guests at the Axel Ekman home. Bob Chilberg of Clarkston. W. Zimmerman and Dick Winegardner were callers at the A. Ekman home Sunday.

Lucille and Maybelle Darby visited at the John Darby home Thursday afternoon.

Mr. and Mrs. Axel Ekman had dinner at Wm. Zimmerman's Saturday.

Dana Brown of Clarkston and Leonard Bowman of Lewiston visited with Bob Chilberg at the Percy Rew home, Thursday.

George Torgerson and brother and two sons of Elk River were business visitors at Axel Ekman's, Friday.

Date of First War Loan

The first war loan was made to an ally of the United States on April 25, 1917. Two hundred million dollars was loaned to Great Britain on this date. Other loans followed.

Why Vase Was Broken

The hired girl came in to tell the missus something. "You know the old vase, mum, that you said was handed down from generation to generation?" "Yes," said the missus. "Well, mum, this generation has dropped it."—EX.

"Doc" Brady, "The Rube" Will Be Here Tonight in Person.

"Doc" Brady, the funny "Old Uncle Si" will be here in person at the New Kendrick Theatre, tonight and Saturday night, with his Big Country Store. He will give away 100 prizes. KENDRICK STORE CO.

"The Quality Store"

Old Marine Policy

Marine insurance is really older than the Christian era. Lloyds still possesses a copy of a policy (not its own, of course) dated 1680. This was believed to be the oldest marine policy in existence until, six years ago, a document dated 1656 was found.—Exchange.

Well to Remember

If you came from a monkey there's nothing you can do about it, but if you are going to the dogs you can detour.—Boston Transcript.

Left Record for Caution

Politically, "Fabianism" is the doctrine or method of "making haste slowly," the term being from the name of Quintus Fabius Maximus, a Roman general noted for his very cautious and dilatory tactics.

Are you in need of letterheads or envelopes? If so, try the Gazette for a good job.
