

Miss Rogers "Showered"

At the home of Mrs. W. T. Farrish, on Wednesday evening, Miss Ethel Rogers, who is shortly to become the bride of Mr. Elmer Emery, of Kendrick, was given a very beautiful and elaborate shower. The large number present testified to the popularity of this young lady in the community, there being between seventy-five and one hundred guests present, from Lewiston, Cloverland, Anatone, St. John and Kendrick.

Miss Rogers was the recipient of many beautiful and useful gifts.

Prior to the shower, the company were entertained with selections of music and readings. Miss Nan Fryxell sang two numbers, "By the Waters of Minnetonka," and "Sing Me to Sleep," being accompanied by Mrs. Casey at the piano, and Mrs. Gleason on the violin. Miss Rogers gave a reading, "How Rubenstein Played." Mrs. Macfarlane, of Lewiston, sang "I Love You Truly."

Mr. Emery, the prospective groom, being connected with the Bank of Kendrick, the committee in charge planned the shower in accordance. Miss Rogers, after becoming identified with the bank, drew from its vaults a large basket which contained parcels of all sizes and shapes. These she proceeded to undo, but while in the act, the lights were suddenly dimmed and from the commotion it was evident that something unusual was happening. In rushed two desperate looking characters. It was a real hold-up. The bride-to-be fought valiantly for her newly acquired possessions. However in the nick of time, the police appeared on the scene, and the desperados were taken in charge. It is needless to say these desperate looking characters, likewise the police, after discarding their disguise proved to be friends of the bride-elect, and it was all a joke.—Asotin Sentinel.

The Freshman Banquet

Supt. C. A. Tenny, of the local schools entertained the Freshman Class of the high school at a reception and luncheon in the basement of the M. E. Church last Friday evening at 7 p. m.

The luncheon was served by the ladies of the church, who provided a very elaborate menu. The ladies had provided tasty decorations including the class motto, "Green but Growing." At each plate was an "all-day sucker" tied with the class colors of green and white, and lying in a sprig of evergreen.

All the class of 36 except three were present. Miss Ledbetter and Mr. Jarvis were also present as guests of the class. At the close of the banquet, speeches were made by the host, Mr. Tenny and by the other teachers present. Humorous stories relative to the class motto and words of commendation and admonition to the class were uttered by the speakers.

While sitting at the table, pencil and paper games were indulged in accompanied with much good cheer and hilarity. The company dispersed at an early hour reporting a very enjoyable time.

Got His Elk

Clarence Fry made a combination business and pleasure trip to the Hot Springs country near Elk City, recently, and returned with a fine elk which he killed after spending but two days hunting. He returned Tuesday, accompanied by his wife and family and Wm. Meyer, who spent some time there with a party of Linden people.

The roads were almost impassable and on the return trip it required 11 hours to cover a distance of 18 miles. Gus Farrington, who went in with his Sampson truck, tore out his spider gear and had to wait for repairs.

Mr. and Mrs. Jack Odem and family of Lewiston were visiting friends in Kendrick last Sunday.

C. T. Lewis Sold Farm

C. T. Lewis has closed a deal with a party from Dayton, Wn., for the sale of his farm, located on the point of Texas ridge. Mr. Lewis will give possession at once. He is going to sell his farm equipment and household goods at public auction, Saturday, October 29. Mr. and Mrs. Lewis will leave for Camas, Wash., soon after the sale.

Much Grain Not Threshed

While there is not much grain in the Potlatch country that still remains in the field, many sections of the surrounding territory are not so fortunate and still have many thousands of bushels that have not been threshed.

Two million bushels of grain, unthreshed still remains in the fields of the central Idaho grain belt and Asotin county, according to the estimate of R. W. Wallace of Kerr Gifford & company, who recently made a survey of the district for his head office.

About a million bushels of this amount is to be found along Craig Mountain and on Nez Perce and Camas Prairies, he said, and the remainder extending from the Gifford country through the Potlatch country to Moscow, and including Genesee and Uniontown, both large stations.

Probably less than 10 percent of the Asotin county crop remains in the fields, Mr. Wallace estimates, but large proportions of the crop in the Craig Mountain section are still to be threshed. On the prairie proper most of the grain has been harvested, and in the south Palouse country more than half of it is either in the sack or warehouses. Mr. Wallace bases his figures on an estimate of an eight million bushel crop in the Lewiston district, which includes Asotin county and the Genesee and Uniontown district.

Latah County Convict Escapes

Andrew Olson, age 32 years, who was sentenced from two to seventeen years in the Idaho state penitentiary as a persistent violator of the prohibition laws, escaped Sunday, according to word received by Sheriff Summerfield.

In July 1926 Olson pleaded guilty to manufacture and sale of intoxicating liquor and was sentenced by Judge Steele to serve the statute term. J. W. Wheeler, penitentiary warden, has posted a reward of \$50 for his capture or information leading to his whereabouts.

He Suspected

On the blackboard a boy with a certain amount of artistic genius had drawn a life like caricature of a certain teacher. Shortly after, to his horror, that teacher entered the room. Presently the portrait on the blackboard caught his attention. He looked at it in anger for a moment or two and then faced the class. "Who is responsible for this atrocity?" he asked in a voice of thunder. The artist got slowly to his feet and coughed nervously. "I strongly suspect his parents," he observed, and sat down.—Ex.

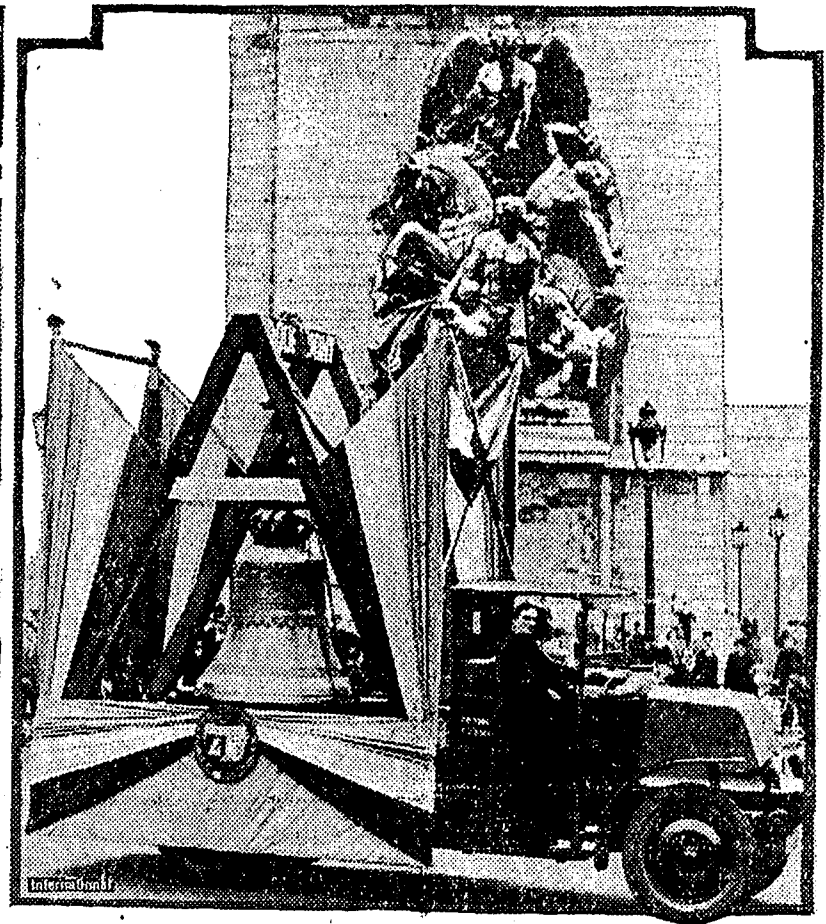

The Average Man

The average man gets his religion from his mother and his politics from his father. He remembers his fathers teachings during health, his mothers when death approaches.—Altoona Tribune.

Defeat

"So you're not going to marry that girl back east, after all?" a young man asked a very close friend. "What happened?" "Oh, it was quite simple," explained the confident friend. "I bragged a lot about my rich friend in order to impress her—then she met my uncle, now she is going to be my aunt.—Ex.

Bell of Douaumont Starts From Paris

The bell which is to hang in the tower of the monument to the dead at Douaumont, France, is shown starting on its long journey from the Arc de Triomphe, Paris, to Douaumont. The bell had an honor escort of fifty musicians, several churchmen and many others.

Second Latah Game Preserve

According to a statement by E. C. Collins, deputy state game warden, a second game preserve has been established in Latah county. The preserve comprises 4,000 acres and is located north-east of Genesee.

In addition to a number of Chinese pheasants, 100 other birds were planted in the new preserve. Birds have always been plentiful in the region until the last few years when hunters, most of them from outside the state, have depleted the supply.

Directors Elect New Cashier

At a meeting of the directors of the Kendrick State Bank, held recently, Hugh Thompson of Pullman, Wash., was elected cashier of that institution, to fill the vacancy left by the resignation of A. H. Daubenberg. Mr. Thompson has been associated with the First National Bank of Pullman for eleven years, and for a number of years has been cashier. He comes to Kendrick with years of splendid banking experience and training and under his direction the Kendrick State Bank will no doubt continue to prosper.

Mr. and Mrs. Thompson and two children expect to come here the latter part of this month if they can secure a suitable residence. Mr. Thompson will take charge of the bank here not later than Nov. 1 according to a statement by M. V. Thomas, president of the bank.

Cars Collide

Everett Frazer, driving his Star sedan, and Miss Josephine Wilken in her fathers Ford car, had a head-on collision at the corner of the old Standard Lumber Co. building near the depot, Monday morning. Both cars were damaged to some extent and the young lady with Miss Wilken was cut about the head by broken glass from the windshield, but her injuries were not serious. A number of accidents have happened at this corner as the street is narrow and the corner requires a right angle turn.

Hadn't Heard of It

"Where did the car hit this man?" asked the lawyer when questioning the attending physician at the trial. "At the junction of the dorsal and cervical vertebrae," responded the doctor. The foreman of the jury rose in his seat and remarked: "I've lived in this country for upwards of 50 years, I know every crossroad, but I never heard of any such place; I believe it's a made-up case."—Ex.

Car Over Embankment

Paul Schulze, Jr., while driving his father's big Marmon car down American ridge grade into Juliaetta last Sunday morning, had to turn over the embankment to avoid hitting another car being driven up the grade. His car remained right-side-up and was little damaged. George Davidson pulled it back on the grade with his tractor.

Wilmot in Auto Accident

A. Wilmot and son, Billy, who left for California last Sunday, were in an auto accident just as they were entering the Dalles, Oregon. They collided with another car, which came on to the highway from another road, which almost paralleled the highway at this point. Both cars were going at a good rate of speed.

Neither Mr. Wilmot or his son were injured but their car was practically demolished. It was a new Chrysler sedan. The driver of the other car jumped out and started on the run down the embankment to the railroad track and kept on going. He was either injured so that he was not conscious of what he was doing or trying to escape the consequences of his share in the accident. He had not been seen again up to the time the report was received here.

Mr. Wilmot's car was insured and he purchased another car and proceeded on his journey.

'Open House'

"Open House" has been declared at the new Chalenpower station of the Washington Water Power company, and the general public is invited to visit the power station and generally inspect this new power development which will have an ultimate capacity of 128,800 horsepower.

The first unit of the power station has been completed and is in operation and construction of the second unit has been started.

The development of this power project involved the construction of a dam in the Chalen river a short distance from Lake Chalen and the town of Chalen. Water is carried in a two mile tunnel, which was bored through a mountain and lined with concrete with an inside diameter of 14 feet. Steel penstocks conduct the water to the turbines, with an operating head of approximately 400 feet.

The power station building is located on the west bank of the Chalen river, near the town of Chalen Falls. The foundation of the building rests on rock and the lower structure is of reinforced concrete. The superstructure is of brick, with tile roof, the architecture being of the Italian Renaissance period. Every phase of the project includes the latest features of hydro-electric development and visitors will find it thoroughly interesting.

To Build Southwick Gymnasium

George Barnum has secured the contract to build the new gymnasium at Southwick. The contract price is \$4,200. Construction work will start immediately.

Governor Appoints District Judge

Governor H. C. Baldrige announces the appointment of Bert A. Reed to the judgeship of the eighth judicial district. Judge Reed succeeds Charles L. Heitma of Rathdum, deceased. The new judge has been intimately associated with Idaho government for several years at different times having held positions in Kootenai County as probate judge, prosecuting attorney and state senator in the 1925 session of the legislature.

Judge Reed announces he will establish his residence and chambers at Sandpoint, Bonner County. Other counties of the district are Boundary, Kootenai and Benewah.

Being Robbed of Fertility

The soil of the Palouse country is being robbed of its fertility as a result of soil erosion caused by the organic content being depleted under the present summer fallow system according to a recent bulletin "The Maintenance of Crop Production on Semi-Arid Soils," written by Professor F. J. Sievers and Henry Holtz of the Washington State College.

"The capacity of the soil to absorb water is in direct proportion to the amount of organic matter which it contains," the local experts say. "Consequently as the amount of this material is decreased by summer fallow, the soil tends to become dammed up thereby lessening its water-absorbing capacity. When this capacity is reached rain water collects on the surface and in running down the hillside carries much of the top soil with it.

"Continuous cropping of the land is being recommended with legume crops such as clover, peas and alfalfa rotated with the present crops to restore nitrogen and organic matter content. Where peas are alternated with wheat in continuous cropping system the yield of wheat after peas is as good or better than after common summer fallow."

School Notes

The friends and parents of the high school students are invited to the program given in the high school auditorium this afternoon (Friday) at one o'clock. Mr. Taber will conduct a short chapel service after which the Seniors will present the following program: Song by student body; short play by Senior class; piano solo by Hester Knepper; reading by Harold Parks; song by Senior girls and song by Pearl Johnson and Miss Ledbetter. After this the students will play games. This program is one of those of the last week in the six weeks period.

The Freshmen will entertain the high school at a party tonight. They have been planning it for several weeks and we are anxious to see how well they can manage their social affairs.

The students received their various subjects this last week and wrote their examinations on Thursday and Friday.

Doris Emery, of the Sophomore class, entertained a number of high school girls at her home last Thursday night. Refreshments of sandwiches, cocoa and cookies were served. Everyone had an exceptionally good time.

Jack Barnes, second grader, has entered the primary room.

The seventh and eighth graders elect a new reporter each month. Nettie Mae McDowell is the reporter for this month.

The seventh and eighth grades are having their exams and reviews for the first six weeks.

Mrs. Anderson visited the grade rooms of the school Tuesday.

Choral Society Met Wednesday

The Kendrick Choral Society met at the school house last Wednesday evening for the purpose of reorganizing and making plans for the winter months. It was voted to hold the rehearsals every Wednesday evening at 7:30 at the school auditorium. Everyone who sings is invited to join and to be present next Wednesday evening.

Members of the music committee were elected as follows: Mesdames Brown, Carlson and Long, and Dr. Morehead, Rev. Rein and N. E. Walker.

Last winter the Choral Society under the direction of Mrs. G. P. Anderson, was a most highly successful organization. It provided many pleasant and profitable evenings for the members and two pleasing entertainments for the general public. It was successful not only from a musical standpoint, but provided a splendid social contact among its large membership.

Doug Hunter of Peck is visiting friends here this week.

Sweet Clovers Are Variable

Offer Opportunity for Development of New Strains for Definite Uses.

(Prepared by the United States Department of Agriculture.)

All sweet clovers are variable in their habits of growth, and many individual plants of distinct type and form may be found in nearly any sweet-clover field. This offers an opportunity for the development of new strains of sweet clover for definite uses, according to L. W. Kephart, forage crop specialist of the United States Department of Agriculture.

Better Hay Varieties.

There is considerable interest at present in the production of better hay varieties, he says, since the common sweet clovers, especially the white-flowered species, are too coarse and heavy to make good hay from the second year's growth. Several good hay varieties have already been developed, notably the early flowering Grundy County, Crystal Dwarf and Early Dwarf varieties of white sweet clover, and the Albotrea and Switzer varieties of yellow sweet clover. Recently a type of sweet clover bearing many more and finer stems than the common sorts was found at two of the western Canadian experiment stations. It resembles alfalfa so closely that it is easily mistaken for that plant. This important discovery will no doubt add a distinct new type of forage plant to the present list.

The need for winter-hardy types has been met with the Arctic, or Hansen's Siberian, a white-flowered variety from western Canada. A sweet clover much better suited than the common sorts to the cold, dry climate of the northern Great Plains appears to have been developed at the Redfield (S. D.) field station of the United States Department of Agriculture.

On Acid Soils.

Several persons are endeavoring to find a sweet clover that will grow on acid soils, lack of lime being a serious hindrance to culture of the crop in many localities. Still others are trying to develop a strain suited to the

drought and hot winds of the southern Great Plains.

A type of sweet clover that would be exceedingly useful, according to Mr. Kephart, is one that would remain green late in the fall, start growth early the next spring, and remain green and in good feeding condition well into the following summer. A number of experimenters, both on farms and at experiment stations, have approached this type with selections of common white sweet clover. Perhaps even better results will come from tests now being made with species and varieties brought from Europe and eastern Asia, one such species this year having remained green six weeks later than any sweet clover heretofore grown.

Sweet Clover Doubles Wheat Yield in Dakota

J. M. Miller, who farms 1,800 acres in North Dakota, is an enthusiast when it comes to sweet clover. "Sweet clover," said Mr. Miller, "is the greatest soil builder ever discovered. One year I had a field of wheat. Half of this field had been in sweet clover the previous season. We took a crop of seed off of it and a large amount of hay, and then plowed the rest under. That part of the field which had been in sweet clover produced 35 bushels of wheat per acre. The other part produced 12 bushels per acre. The same variety seed was used and other conditions were similar."

"We have found that sweet clover will increase the yield of corn or any other crop which follows it. Not only does it add nitrogen to the soil, but it puts the soil in fine physical condition."

Lime for Chicks

An adequate supply of lime in the ration is important for growing chicks. Experiment station results have revealed the fact that the lack of this element leads to a drain upon the reserve supply of the bones and stunts growth. Even in the case of mature hens, a lack of lime will lower egg production. For mature fowls, oyster shell or other inorganic compounds are sufficient, but not for growing chicks. Lime must be added in the form of vegetable foods.

Chess Favorite Game, Whole Village Plays

Berlin. — Virtually every inhabitant of the little village of Stroebeck, near Halberstadt in the Harz mountains, can play chess. Proficiency in chess playing ranks with reading, writing and arithmetic in the Stroebeck village school.

Every year just before the Easter vacation the school conducts a chess tournament. The winners receive chess boards donated by the village.

Tradition has it that the Stroebeckers have known how to play chess since the Eleventh century. At that time Bishop Arnulf of Halberstadt defeated his opponent, Count Gunzelin, with the aid of the villagers of Stroebeck. The Stroebeckers held the count captive in an old tower, still known as the Chess tower, until he was ransomed by friends. To while away the time Count Gunzelin began to instruct his guards in chess.

The guards passed the knowledge on to the other villagers, until everybody knew the game. Since then it has been a matter of communal pride to instruct each succeeding generation in the art.

British Slave Owners Are Cleared by Court

London.—A judgment by which the Supreme court of Sierra Leone, British protectorate in Africa, quashed the conviction of slave ownership on charges of assault and conspiracy in

connection with slave owning, has brought to the attention of the British public the fact that slavery still exists within the empire.

In quashing the conviction the court declared that the law had always intended that slave holding in the protectorate should die out. The Sierra Leone protectorate, adjoining Liberia, was proclaimed in 1896, at which time slavery was an established custom there. Official action since then has inclined toward the elimination of slavery. Last year it was decreed

that children of slaves should be free and that slaves would become free upon their masters' death.

The Manchester Guardian, commenting editorially on the matter, says that the court's decision will give new prestige and power to slavery as an institution.

"The League of Nations is engaged in suppressing slavery," the editorial says. "With what face could we take our share in that task if we have on our conscience such a crime against freedom as this?"

Dog Parasite Control

With dogs the problem of parasite control is a serious one with certain complications which have only recently been ascertained. For one thing it is now known that prenatal infection with ascarids may occur and it seems reasonably likely at present that such infection may prove to be of rather common occurrence. To prevent this will involve the treatment of the mother before breeding and the provision of sanitary surroundings in the yards and kennels.

Are you in need of letterheads or envelopes? If so, try the Gazette for a good job.

WAY TO PREVENT SWINE PARALYSIS

There is at present considerable interest in the feeding of mineral matter to swine to prevent paralysis in brood sows and fattening hogs. A number of complaints are coming in from breeders regarding sows breaking down in the back after suckling litters. The following quotation from the forty-first annual report of the Ohio experiment station will be of interest to hog men who have had this trouble:

"Lameness, rickets, or partial paralysis is a common trouble with hogs in winter and early spring. This trouble can be prevented by feeding bright, leafy alfalfa or other legume hay. Brood sows ordinarily consume enough of such hay when it is kept before them in suitable racks. For fattening hogs it may be preferable to include 3 to 5 per cent of ground or chopped alfalfa or other legume hay in their feed mixture. The addition of a mineral mixture containing steamed bone meal, ground limestone, acid phosphate and common salt is likewise conducive to health and thrift. From 2 to 3 per cent of a similar mixture in even a poor ration, has prevented paralysis in our swine under experiment."—Charles I. Bray, Associate Professor, Animal Husbandry, Colorado Agricultural College.

Horns on Cattle Cost Too Much to Breeders

In the fighting days when bulls and cows fought to survive and be fit physically and fight, horns may have been of some use. This was extremely far-fetched when bulls for barbarous bull fights were in demand by men and women who loved bloody thrills. Any careful observer may look at the horned cattle as they come out of stock cars at the stockyards and see 50 to 90 per cent of the cattle injured by horns. All the beef cattle horn marks injure the hides and the meat. Then, horned cattle require more space for shipping. Again, horns injure and often kill cattle, horses, mules and men. The horns when polished and curved and balanced may appear ornamental. The polled head is safe and just as ornamental.

In some places the horned animal is surgically dehorned. The operation causes loss of blood and in fly time the wound or opening in the head may become infested with fly larvae and infected with germs. It costs something to surgically dehorn cattle. Horns on cattle cost too much. They are not worth the price paid for them. They are not required to make beef or milk. The best thing for all breeders and for all breeds of cattle is to breed off the horns. May the time speedily come when there are no more horned cattle.

Lice Easily Controlled by Proper Sanitation

The two most expensive parasites for hogmen to raise are lice and worms. Both can be controlled by proper sanitary methods and simple treatments. Now is the time to control hog lice.

Winter sleeping quarters are the very best places for the propagation and spread of lice. If lousy hogs go into winter quarters and nothing is done to control the parasites, one may be assured that the lice will have a lively time all winter.

The right thing to do is to rid the hogs of lice before real cold weather comes. The sleeping quarters, likewise, should be cleaned thoroughly and new bedding supplied.

Crude oil is one of the best treatments for hog lice. Spent crank case oil is also good. If one has only a few hogs to treat, they may be closely confined and sprayed. If the herd is large, dipping is advised, using a standard creosote dip. Dipping should be done only when the day is warm.

Standards Are Poultry Need

Necessity Arises Because Large Consuming Centers Are Widely Separated.

(Prepared by the United States Department of Agriculture.)

Standard grades of poultry products understood and applicable in all parts of the country are needed in the United States, asserted Rob R. Slocum of the United States Department of Agriculture, before the World's Poultry congress at Ottawa, Canada.

This necessity arises because of important areas of production and the largest consuming centers are widely separated. The United States Department of Agriculture has studied this problem in its relation to eggs and has promulgated a set of standards of quality applicable to individual eggs, the quality factors being the condition of shell, yolk, germ and size and condition of air cell.

Standards as Basis.
With these standards as a basis, said Mr. Slocum, the department formulated three sets of egg grades: Buying grades, wholesale grades, and retail grades for use at country buying points, in wholesale channels, and in retail channels of trade. A study of standards and grades for live and dressed poultry has been started with a view to issuing them in the near future in tentative form.

For maintaining a standard uniform quality in different markets and for settling disputes concerning grades, the department has established inspection facilities, permissive, not compulsory. These inspections are of two kinds: Shipping point and terminal market inspection. When shipments are ready for movement, the inspection enables the shipper to describe the quality to prospective purchasers. After arrival at the market, inspection is used to settle disputes to determine the grade and condition of the commodity.

Live poultry inspections are being supervised in one market, New York city, with an annual requirement of 12,000 cars, an approximate value of \$60,000,000, practically all of which are now inspected by a supervisor and 11 licensed inspectors. Egg inspections are made in New York city, Chicago, Philadelphia, San Francisco and Petaluma, Calif., and three points in Missouri.

Three Distinct Arrangements.
There are three distinct arrangements under which inspection services are operated: Straight federal inspection, federal-state inspection, and joint inspection. Under each arrangement, the appointment of supervisors and inspectors, and the kind of certificate issued conform to conditions of type of inspection.

Financing the inspection service also conforms to the arrangement under which it is operated. In federal inspection, fees collected are paid into the United States treasury and are not available for further inspection until reappropriated by congress. In federal-state inspection the fees collected by the state are placed in a revolving fund from which salaries of inspectors and other expenses are paid. In joint inspections, the fees collected by the co-operating agency are used for salaries of inspectors and other expenses, including payment into the United States treasury of an amount equal to that expended by the department.

Less than three years ago egg inspection was begun by the bureau of agricultural economics and that of live poultry only last November, yet in December, 1926, 979 egg inspections, involving over 51,000 cases of eggs were made, while during the same month 1,171 cars of live poultry were inspected and 8,814 baskets of live poultry received by express.

Agricultural Items

Sheep are good weed killers.
Concrete makes the best kind of a

dairy-stable floor.

The key to farming success is the three L's—lime, legumes and live stock.

Soy beans yield a valuable oil which is used in the manufacture of paints and varnishes.

As the soy bean plant is tender and easily killed by frost, it should not be planted until corn planting time.

Proper onion storage provides a free circulation of air around the individual bulbs. This is best provided by storing in slat crates.

Seed potatoes should be saved at digging time if one expects to keep his own seed supply and select it from potatoes of his own growing.

Alfalfa has been making friends rapidly in dairy sections. The large volume of hay produced, as well as the high feeding value of the hay when properly cured, makes it one of the most important feeds for the dairy cow.

When the soil is cold, fertility becomes available very slowly. Also there is considerable leaching of nitrates because of the continuous rains at this season. That is why an application of some nitrogenous fertilizer is so necessary to any growing vegetable.

The growing of lettuce on the same ground year after year leads to disastrous results in the mountain districts as well as elsewhere.

Demonstrations conducted during the past year show an increased production of all crops where cover crops and well-balanced fertilizer were used.

Cameron News
(Too late for last week)

Mrs. George Schultz of Spokane is visiting at the Wilken home.

Mrs. Herman Wilken, Sr. is reported as convalescing nicely but will probably be in the hospital several more weeks.

Mr. and Mrs. Fred Sillow, Sr. are visiting in Chicago and other eastern cities.

Mrs. Sillow's brother, Carl Lohman, Sr., has started on his return trip to Germany. He enjoyed America immensely and regrets that he cannot remain permanently.

Albert Schultz, Sr., had the misfortune of finding his cow dead, Tuesday.

Mr. and Mrs. Otto Sillow motored to Spokane, Tuesday. They will attend the wedding of one of Mrs. Sillow's brothers, while there.

The Ladies Aid met at the home of Miss Emma Hartung, Wednesday afternoon. The ladies were busy planning their annual sale which will probably be held in another month. Mrs. Mielke assisted the hostess in serving delicious refreshments.

Mr. and Mrs. George Wilken were Lewiston visitors Sunday.

Grandpa Ehlers fell one day last week, injuring himself so that he is still confined to his bed.

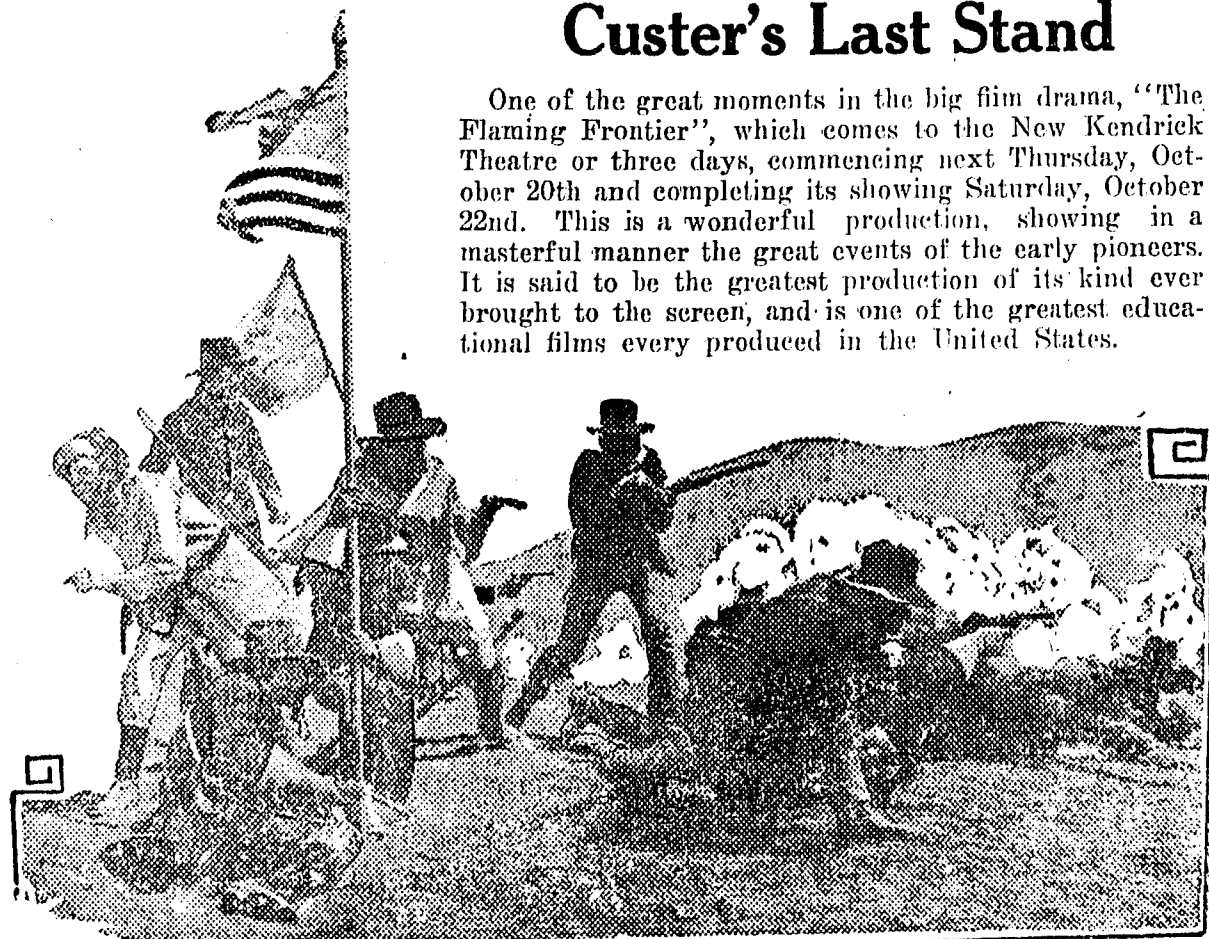

Mr. and Mrs. A. F. Wegner and family visited in Clarkston Sunday. Carl Wegner, Sr. accompanied them home.

Henry Winters of Arlington, Minn., who spent the summer at the home of Aug. A. Wegner, is now visiting relatives in Spokane.

Juliaetta need not brag about having green vegetables this fall. The Potlatch has a big variety, especially "green beans"; but really, we still have peas, string beans, cucumbers, green onions, etc.

Custer's Last Stand

One of the great moments in the big film drama, "The Flaming Frontier", which comes to the New Kendrick Theatre or three days, commencing next Thursday, October 20th and completing its showing Saturday, October 22nd. This is a wonderful production, showing in a masterful manner the great events of the early pioneers. It is said to be the greatest production of its kind ever brought to the screen, and is one of the greatest educational films every produced in the United States.

Scene from "THE FLAMING FRONTIER" - A UNIVERSAL PRODUCTION

The Dishes should be here for November 1st, if not if you'll save your purchase tickets you'll be sure of a set.

Home, Heavy Tax-Paying Institutions **WILLIAMSON'S**, Troy, Palouse and Orofino

Improve Dairy Herd by Sires

High-Class Bull Is Essential if Improvement Is to Be Made.

(Prepared by the United States Department of Agriculture.)

Every dairy herd needs a high-class bull at its head if the herd is to be improved, says the United States Department of Agriculture. For the dairyman who has a small herd and is short on finances, the cheapest and best way to obtain the use of first-class pure-bred bulls is through the work of a co-operative dairy-bull association.

Purpose of Organization.

A bull association is a farmers' organization whose chief purpose is the breeding of better dairy cows through joint ownership, use, and systematic exchange of prepotent dairy bulls of high-producing ancestry. Improvement of the herd that may be expected through membership in such an organization is discussed in Farmers' Bulletin 1532-F, "Dairy-Herd Improvement Through Co-operative Bull Associations," just issued by the bureau of dairy industry, United States Department of Agriculture.

Through the system of transferring bulls from block to block, the bull association makes it impossible to keep the desirable bulls as long as they live or are fit for service. This enables a bull's daughters to come in milk and be tested while he is still owned by the association, and furnishes a means of determining which bulls are siring the high-producing daughters. The bulls that do not get satisfactory daughters are disposed of.

Study of Records.

A study of the records of the daughters of bull-association bulls showed an average yearly mature production of 8,071 pounds of milk and 342 pounds of butterfat. In milk production the daughters excelled the dams by 13.5 per cent and in butterfat production by 14.4 per cent. Some of the sires are very outstanding. One sire, for instance, was mated with cows having an average yearly butterfat production of 347 pounds, yet his seven daughters from these cows excelled their dams by 57 per cent in milk production and 44 per cent in production of butterfat.

Much progress has been made by selecting bulls on the records of their dams and granddams. The most rapid progress cannot come until dairy sires are selected on the production records of their daughters.

A copy of the bulletin may be obtained by writing to the United States Department of Agriculture, Washington, D. C.

Crude Pine Tar Smear on Husking Mitts Helps

According to the Nebraska Agricultural college authorities, crude pine tar smeared on the husking mittens several times during the day will make them last longer as well as help the husker jerk the shucks. Excepting in wet weather, well tarred mitts should last about twice as long as those without tar. Enough thick tar to cover the thumbs and palms and then a layer of dirt to absorb the stickiness will make a surface on the mitts that will wear well and also be rough enough to pull the shucks quickly. A set of thumb stalls of heavy cotton flannel or light canvas are mighty handy if a mitt should rip or wear out more quickly than usual.

The handiest addition to a husker's yagon is a little box hooked on the rod of the front end gate in which he can keep his tar can, an extra pair of mitts and thumb stalls, and an extra husking hook or peg.

Cracked fingers and thumbs and chapped wrists can be healed by soaking them in hot water for about ten minutes and then rubbing them well with glycerin before going to bed each night.

Agricultural Facts

Barley is reasonably good as a cover crop, where a legume is not desired.

Shallow cultivation is best for row crops, as it does not injure their roots so much as deep stirring.

When planting seed potatoes be sure that it is good seed, free from diseases that will ruin crop and profit.

Sugar-peas have edible pods which are broken up, cooked and served like string beans. They make a good addition to the garden.

Hill selection of potatoes is the only rational method of seed improvement, since it is based upon the performance of the individual hill.

If you see smutted plants in the cornfield, pull them out and burn them. This will prevent reinfestation of the following corn crop.

The main purposes of cultivating corn are to kill weeds and to conserve moisture. Deep cultivation is more wasteful of water than shallow plowing.

Whether seed are dead or alive can now be determined within 12 hours by scientific test, so that farmers and nurserymen may no longer lose large sums by planting bad seed.

COMING FOR THREE DAYS | Thursday, Friday and Saturday | **October 20, 21, 22**

THE FLAMING FRONTIER

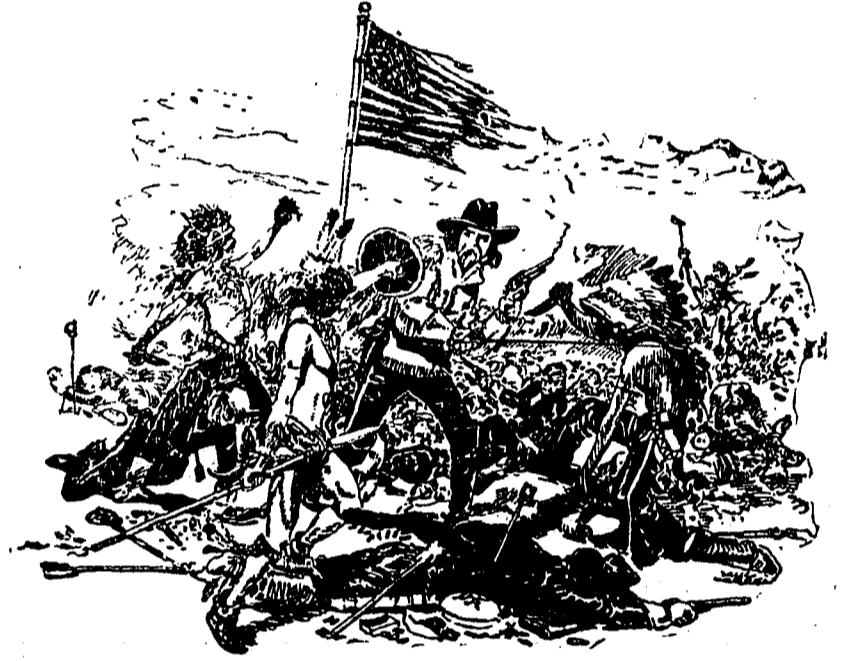

NOW for the first time in the history of motion pictures, you can see the one Supreme Super-Spectacle of the vanished glories of the old time west. A picture that will go down in history as the greatest achievement of the motion picture industry. This great picture has taken the country by storm---has broken all records for attendance of any film ever shown. Swift action, breath-taking suspense, thrills, tears, life and laughter, culminating in the great historical event, "Custer's Last Stand".

The Greatest Pioneer Film Ever Produced.

A picture that every child of school age should see. Parents should insist that the children see it. Every educational institution in the United States strongly endorse this film.

This picture cost over a million dollars to produce---took nearly 4 years to make it.

Admission: Adults 50c, Children Under 12 years 25c

THE NEW KENDRICK THEATRE

BIRDS IN CAPITAL FOR TOUR TO SOUTH

Flock Into Washington From Nearby States.

Washington.—Thousands of feathered members of the Purple Martin society have flocked to Washington from nearby states for their annual convention, preparatory to embarking on their usual winter tour of South America.

The birds have selected as their meeting place the wires atop the poles on Floral street, between Thirtieth street and Alaska avenue, where they hold early morning and night sessions to the wonderment of residents of the vicinity and passing motorists.

The other morning they rested side by side on the wires for a distance of two blocks, later taking off for an inspection tour and "bird's-eye" view of the city. In the evening they return again and one of these mornings they are going to adjourn suddenly and begin their flight southward, according to Dr. C. W. Richmond of the division of birds, Smithsonian Institution.

Doctor Richmond points out that the martins seem to have selected the national capital as an annual meeting place in the late summer. In previous years they have held their sessions at different points around town, one year selecting the elm trees near the Pan-American building, another year using the trees near the botanic garden and still another year meeting on Rhode Island avenue in the northeast section.

"After assembling from nearby places and from Virginia, Maryland, Pennsylvania and other sections near

Washington, they usually hang around for a few days before suddenly taking off in one group for the South." Doctor Richmond stated. "They will take up winter quarters probably in South America. Sometimes they number from 10,000 to 20,000 birds, according to various estimates."

Other large flocks meet in other cities about this time of year, Doctor Richmond said, and they, too, will journey to warmer climes.

While the exact date of departure of the visitors on Floral street can only be guessed, it appeared certain that leaders of the flock will see that the migration begins before the hunting season opens.

World Leisure Seen "When Atom Is Split"

London.—In half a century or so hardly anyone will have any work to do, says Dr. Percy Buck, professor of music in the University of London.

"In 50 years from now every human being will have a vast amount of leisure on his hands," explained Doctor Buck to the university teachers attending the summer vacation lecture course.

"If once the atom is split—and that is bound to happen in a certain number of years—there will be no need for coal, gas, electric light, steam or anything else like that. Think of it! We will be able to run a train from London to Edinburgh for half a penny, and to light the whole of London or New York for less than one single penny."

KANSAS CORN

Kansas farmers assert that this year's corn crop is the best ever raised in the state. Above is J. A. Ostrand of Shawnee county with some of his choice ears of corn exhibited at the Kansas Free fair at Topeka.

Quality butter can be produced in the summer time only if proper care is given to the cream from which it is manufactured.

Cottage cheese is an attractive all year food, and is a good means of utilizing the sour milk.

It is estimated that at least 34 per cent can be galmed every year by the proper conservation of all manure in the barn.

What He'd Do

On the first day of school, in a rural class in arithmetic, the teacher gave a boy this problem, "If your father had 2,000 bushels of wheat and sold it for \$1.25 a bushel, what would he get?" The boy answered, "A new car."—Ex.

No Tigerloof Truants

Mr. Cyril Wright of Leicester, England, who was on the teaching staff of the Tigerloof native institution for five years, declares that the most effective punishment for a native child is to order it to remain away from school for a day or two. Most native children, he says, would prefer to be whipped.

Butterwrappers printed at the Gazette Office.

Agricultural Notes

Crop rotation is the surest method of weed control.

Save the straw. It will help to take the place of hay this fall and winter.

Canada field peas probably make the heaviest cover—and to stop washing they are hard to beat.

In silo building, the first and most important consideration is its size in relation to amount of stock kept.

Early planted corn may not grow much larger than later planting, but the early planting will mature first.

Well-rotted barnyard manure is a good fertilizer for the garden. It should be applied at the rate of 20 tons to an acre and should be worked into the soil.

ANNE CORNWALL in "THE FLAMING FRONTIER" A UNIVERSAL PRODUCTION

THE KENDRICK GAZETTE

"The Pulse of The Potlatch"

Published every Friday at Kendrick Idaho, by
Ralph B. Knepper

Subscription Price - \$1.50

Entered at the Post Office at Kendrick as second class mail matter.

A man in business who refuses to use local newspaper advertising on the grounds that it doesn't pay, is putting his judgment against some of the largest and most successful business institutions of the country. The Gazette received a letter from the advertising manager of General Motors, this week, in which he states that the nation-wide advertising campaign put on by this company in country newspapers, during the past spring and summer, brought splendid results. The company has decided to use still more space in the small town weekly publications.

A press dispatch says that Governor Baldrige left on a trip that will take him into the big game country where he will get first hand information on reports to the state game department of increased numbers of deer and other big game. The writer recently made a similar trip to the Selway country, but not at state expense.

The amount paid in salaries to the United States senate as a body aggregates approximately \$450,000 a year. Jack Dempsey received a similar sum for forty-five minutes of labor during which he played second fiddle in a glove-tossing duet. Thus we have more substantial evidence that the trend of civilization is constantly onward and upward.—Caldwell News.

A headline says: "Farm Measure to be Framed." Now isn't that a good line? Farmers have about come to the conclusion that all farm measures are "framed."

You may commit suicide on the partial payment plan by drinking bootleg. The final installment comes due in a surprisingly brief period.

In the past five years auto accidents have killed 114,879 persons and injured 3½ million more. In spite of these alarming figures they are increasing speed limits and in Idaho, after January 1, are allowing children of any age to drive cars.

Southwick News

Hayman Stalnaker and wife of Ahsahka spent a few days of last week visiting Mrs. Stalnaker's sister, Mrs. Fred Whiting and other relatives. Harold Whiting made a trip to Spokane last Saturday, returning home Sunday evening.

A daughter was born to Mr. and Mrs. Lettenmaier, Tuesday, October 11th.

John Stalnaker received word from Marshfield that a daughter was born to Mr. and Mrs. Frank Wilmot, formerly of this place, October 1st.

Elton McCoy and wife spent Sunday at the home of Frank Thornton and family.

Jim Cook and wife, and Elma Moton of Bed Rock spent Sunday in town with relatives.

Kenneth Gill and family of Clarkston, spent Sunday at the home of his sister, Mrs. Zoel Fairley.

Southwick is soon to have a new gymnasium as work started on the building Tuesday.

Grandma Wells of Crescent spent Tuesday at the home of Mrs. Wm. Berriman.

Rowena Russell was an overnight guest of Eva McCoy, Monday night.

Edna Jones spent the week end at the home of Wm. Henderson and family.

Mr. and Mrs. Pete Blake of Orofino and Gordon Fairley of Peck were in town Friday visiting with relatives.

Mr. and Mrs. Ira Luce were visitors at the home of Austin McCoy, Sunday.

The teachers of the Southwick school attended the teachers meeting in Lewiston last Saturday.

Mr. and Mrs. Homer Betts spent Sunday at the home of his brother, Doc. Betts.

Miss Nadine McCoy went to Leland last Saturday and from there she and her sister, Mrs. Harry Smith went to Lewiston. She returned home the following day.

Mrs. Geo. Jones left for Mos-

cow Wednesday for a visit with her daughter, Mrs. August Benson.

Threshing started again Monday, but was delayed by the rain Monday night.

Crescent Clippings

Adaline Dorendorf was a visitor in Kendrick, Thursday.

Mr. and Mrs. Leroy Southwick and daughters visited at the Wm. Kauder home Sunday.

John Darby took a load of hogs and one load of sheep to Kendrick the first of the week.

Mrs. Anna Kimbley and children visited at the A. Dorendorf home, Sunday.

Mrs. Ida Carey, Miss Opal Southwick and Burton Souders visited at the Frank Souders home, Sunday.

Mr. and Mrs. Wm. Dorendorf and baby, Mr. and Mrs. John Darby and daughters, and Frank Sladoski visited with Mr. and Mrs. Axel Elman, Sunday.

Mrs. Henry Brown returned to the Wm. Kauder home Friday, after visiting a week with her sister, Mrs. Leroy Southwick.

Mr. and Mrs. Oral Craig and children visited at the M. L. Robeson home, Sunday.

Mr. and Mrs. Wm. Dorendorf and baby visited at the A. Dorendorf home, Thursday evening.

Mrs. Albert Dorendorf and sons and Miss Elizabeth Keeler visited at the John Darby home, Monday afternoon.

Substantial Floor for

Machine Shed Essential

Any implement house is better than none—even the simplest, most inexpensive type pays for itself in a season or two. But from the standpoint of convenience it pays to build machine sheds, and a floor of some kind is a good feature.

If of wood, the floor should be of two-inch planks, laid on joists or beams, which in turn should be kept off the ground by flat stones or concrete blocks. Such floors last quite long, especially if there be ventilation beneath them to keep the wood dry.

Concrete makes the ideal floor for a maching shed, of course. It can be laid right on the ground, if it is well drained.

See this beautiful picture at The New Kendrick Theatre, tonight and Saturday. You will remember it as long as you live.

Camel

The cigarette that leads by billions

Just to state a great truth in another way—Camel is so exactly what so many smokers want that no other brand is even a close second.

If all cigarettes were as good as Camel you wouldn't hear anything about special treatments to make cigarettes good for the throat. Nothing takes the place of choice tobaccos.

A picture that will linger in your mind "Forever After." At New Kendrick Theatre this week.

Never take the chances of putting a slightly defective specimen in a plate of fruit or vegetables for an exhibit. The judge is more than likely to find it.

It pays to ring face baskets of peaches, pears, or apples because then each fruit in the face gets its share of the pressure from the cover. Too, the package sells better because it is more attractive.

Get The Habit

Young man it will pay you to get the habit. We mean the saving habit. The banking habit will help you. If you are starting out in life with only your two hands to help you, the dollar on deposit will be the best friend you will have on the side. Start an account at this bank today. Don't check unless the need is urgent. Add to it rather than draw it out. You will acquire a standing among the men who do things. You will in time have a fund to do something with yourself. Get the habit. Start now. The opening of a bank account may be the turning point in your career. Come and start with us, no matter how small. Ask the successful man if this advice is good. He knows. See if he doesn't tell you the same thing.

Undesirable Taste and Odors to Milk

Department of Agriculture
Made Tests at Beltsville.

(Prepared by the United States Department of Agriculture.)

To determine whether dried beet pulp, green oats and peas, pumpkins, carrots, sugar beets, rape, soy beans and kale when fed to dairy cows impart undesirable flavors and odors to the milk, and to ascertain the best methods of feeding such crops and handling the milk, the United States Department of Agriculture has conducted feeding tests at its experiment farm at Beltsville, Md.

The cows selected for the investigations were giving milk relatively free from abnormal flavors and odors when fed a basic hay and grain ration, and varied in stage of lactation from those fresh to those nearing end of lactation period.

Besides the succulent feed the animals received, in proportion to milk produced, varying quantities of the following grain mixture: 100 pounds each of hominy feed, bran and oats and 50 pounds each of cottonseed meal and linseed meal. In addition they were given all the alfalfa hay they would readily consume. The cows were divided into groups of four each, and interchanged at intervals of four days.

Dried beet pulp soaked and fed wet one hour before milking in quantities up to 30 pounds produced but a slightly abnormal flavor and odor in the milk. The results followed the feeding of a like quantity of green oats and peas one hour before and after milking. Both kale and rape fed in similar quantities on hour prior to milking produced a decidedly abnormal flavor and odor in the milk, but had a negligible effect when fed afterward. Soy beans fed one hour before milking tended to improve the flavor

and odor of the milk. Further details of the experiments are given in Technical Bulletin No. 947, "Effect of Some Succulent Feeds on the Flavor and Odor of Milk," a copy of which may be obtained free upon request to the Department of Agriculture, Washington.

Origin of Word Chevon Is Clearly Explained

An interesting interview was had with B. M. Halbert of Sonora on the word "chevon," and its adoption as a universal trade name for goat meat. It was through Mr. Halbert's efforts that the national contest was held and a prize of a registered Angora buck was given for the most appropriate name submitted. This contest was held by the official organ of the association, the Sheep and Goat Raisers' Magazine, of San Angelo. Twenty-five hundred names were submitted, and out of this number Mrs. E. W. Hargraves, a ranchwoman, won with the word chevon. She created the word from the two French words "chevri," (goat) and "mouton" (mutton.) This was in 1922 and all the associations adopted this word as the official name, but it was not recognized by the United States Department of Agriculture until September, 1924.

Cutting Canada Thistle by Phases of the Moon

Cutting Canada thistle by phases of the moon, signs of the zodiac, on certain mysterious dates or according to the appearance of sun spots, methods all advocated by some farmers, will not eradicate the pest, but belief in these signs sometimes has the practical value of causing the thistle to be cut before seeding, is the opinion of A. A. Hansen of the Purdue extension staff.

The most valuable sign by which to cut the pestiferous thistle is found in the flowering head. If the spiny nuisance is cut as soon as the heads begin to show purple, the production of seeds is usually prevented and the plant will spread but slowly. The principal means by which Canada thistles spread is the wind-distributed seeds which are frequently blown considerable distances. A single seed may thus start a new patch several hundred feet from the parent plant.

Silage Should Be Used With Other Roughages

Silage is relished by all kinds of farm animals and is a reasonably safe feed for any except males kept for breeding purposes, or horses at heavy

labor. However, best results are not secured by feeding only silage, but it should be used in connection with other roughage and grain in proportions varying with the kind and condition of animals as well as the end one intends to effect through feeding. That a feed is cheap and plentiful is no reason for wasting it, and true economy in feeding is only to be found where there is a definite purpose in view.

Neglected Opportunity

Large areas of land in almost every section of the country are, or should be, in permanent pasture. The fact that much land which is in pasture was once covered with bluegrass and white clover and is now growing little but weeds and inferior grasses is evidence enough of declining fertility and explodes the theory that pasture land automatically maintains its fertility. Pastures need cultivation and fertilization just as much as any other crop.

Vitamines and Minerals

Heavy laying fowls require from three to four pounds of oyster shell per head per year. Even though the hens have enough protein and other food to produce a large number of eggs, they will cut their production down to meet the amount of minerals which they have for shells. A balanced ration does not mean merely supplying protein to balance the carbohydrates and fats. It also means supplying minerals and vitamins.

Cull the slow-maturing pullets. They will be cull hens when they grow up, if they ever do grow.

The glazed stage is right for harvesting silage, but frosted corn makes inferior silage; better harvest too soon than too late.

ASKS DIVORCE

William Jennings Bryan, son of the late "Commoner," who has filed suit in Los Angeles for divorce, charging his wife, Helen Virginia Bryan, with desertion. They were married in 1903, when both were students at the University of Nebraska. They have three daughters ranging in age from thirteen to seventeen years.

Hoboken's Treat

The Hoboken speak-easy proprietor who was arrested for putting "rubbing" alcohol into his refreshments should have known that that wouldn't prove grit to his gin mill.—Farm and Fireside.

FACTS

-AND THE OPEN MIND

THE MOST important element in business success—and the most difficult—is to be sure that you have all the facts before you act.

TO GET them all, from every possible source, is the first objective in General Motors. The Research Laboratories contribute some. These are nuggets, left in the crucible, after hundreds of ideas that looked good have been burned away. The Proving Ground contributes others. Dealers contribute. The public contributes. Every department contributes. Through the whole organization runs a spirit of inquiry and of rigid insistence on proof.

OUT OF such thinking come the new models announced from time to time by Chevrolet, Pontiac, Oldsmobile, Oakland, Buick, LaSalle, Cadillac—all with Fisher Bodies. And by Frigidaire. Each new model is a tested step forward. Nothing goes into it as a result of habit or guess or pride of opinion.

Nothing counts but hard-won facts, gathered and used with an open mind.

LOCAL NEWS

T. O. Greene of Juliaetta, traveling representative for the Lewiston Tribune, was transacting business in Kendrick, Wednesday of this week.

Jack Pickard of Troy was a Kendrick visitor Wednesday afternoon.

Kendrick Lodge No. 26, A. F. & A. M. held its first meeting last evening after an intermission during the summer months.

Mr. and Mrs. R. B. Parks, Mrs. Minnie McDowell, Mr. and Mrs. Frank Ellis will leave Sunday for Weiser to attend a meeting of the grand lodge of the Odd-fellows and Rebekahs. They will make the trip by auto.

S. D. White of Lewiston was transacting business in Kendrick this week.

Mr. and Mrs. Ira Bolon and Wm. Branson drove to Lewiston Wednesday evening to attend the carnival.

Mrs. R. H. Ramey was a Lewiston visitor Wednesday afternoon, returning on the morning train Thursday.

Mr. and Mrs. Wm. DePartee and H. P. Hull drove to Winchester last Friday on business.

A report was current here the first of the week that Everett Crocker died after an operation or was killed in an auto wreck, no one seemed to know which. His father telegraphed to the contractor for whom Everett was working and he wired back that there was no foundation for the rumor as Everett was driving a truck for him and was all right.

N. M. Talbott of Juliaetta was a Kendrick visitor the first of the week. Mr. Talbott stated that so far this fall the frosts have not injured anything on his place and that tomato vines, etc., are as green as they were in the summer. A few low spots in the Juliaetta section were nipped slightly by recent frosts but no damage was done on the higher ground.

Mr. and Mrs. Egnaz Flaig of Orofino spent Sunday in Kendrick with relatives.

A man came into a drug store, asked the price of sulphur and was told that it was 10c a pound. He said, "I can get it of Montgomery Ward for 7c." "Yes," retorted the clerk, "and you can go to hell and get it for nothing."—Ex.

Harold Thomas went to Lewiston last Saturday where he had a slight operation for sinus trouble.

Al McKee of Lewiston was in Kendrick this week looking after his farming interests in this section.

Mrs. Glenn England and two children, who have spent the past two months with Mrs. England's parents, Mr. and Mrs. R. Murphy, returned to her home in Gilford, Montana, Wednesday afternoon.

Mrs. Hugh Helpman of Lewiston spent Sunday in Kendrick with her mother, Mrs. Calista Grinolds.

Mr. and Mrs. Silvie Cook spent Sunday at the home of Mr. Cook's parents, Mr. and Mrs. Thos Cook, near Leland. They came home by way of Agatha where they visited Mrs. Cook's mother, Mrs. Dean Wright.

Mr. and Mrs. Jack Barnes have rented the Hull residence and moved in this week. Mr. and Mrs. Hull will leave some time next month to spend the winter in California.

Mr. and Mrs. Bob Spencer of Moscow spent last Sunday at the Leith home.

Born to Mr. and Mrs. Wilbur Fix of Lewiston, Monday, an 8½ pound son. Mr. and Mrs. Fix were former Kendrick residents. Mrs. Fix is a sister of Frank Boyd.

Emulus Brown and his mother, Mrs. J. P. Brown, of Berne, Wash., arrived the first of the week to visit friends here.

R. F. Bigham brought a green tomato to the Gazette office this week that measured 17 inches in circumference. It is large enough to serve a good sized family.

L. S. LaHatt and Clarence Perryman went to Culesac yesterday afternoon where they will have concessions at the Corn

Carnival today and tomorrow.

Dr. J. T. Moser and Mr. Hugo of Lewiston had a successful hunting trip in the Selway country, returning last Tuesday with an elk. They encountered bad weather and considerable snow in the higher country.

Mr. and Mrs. L. A. Grinolds of Lewiston arrived yesterday afternoon to visit Mr. Grinold's mother, who is quite ill.

A public reception will be given on October 21 at 8 p. m. in the Presbyterian church in honor of Mr. and Mrs. Joday Long and Mr. and Mrs. Elmer Emery.

The four deer hunters, Ed Deobald, Ernest Clem, Joe Gardner and Ralph Knepper, returned home last Friday evening from the Selway country with an alibi but no game. The Selway, as far as the falls, has been sheeped off last summer and this fall the game was found to be scarce. Frank Lyons of Linden came out the same day and has the same story to tell.

Takes Lewiston Position

George Brocke, who has been working for the Kendrick Hardware Co., for the past two years, went to Lewiston the first of the week where he has a position as manager of the Kolster Radio Shop.

Officers Make Another Raid

A second still, a large quantity of moonshine, mash and equipment was taken when a raid Sunday just over the Latah county line by federal and county officers resulted in one arrest and confiscation of a car.

H. M. Hewett, claiming to be 41 and giving his address as Seattle, was arrested just over the line in Shoshone county. He made no resistance and Monday morning was taken to Coeur d'Alene for federal arraignment.

A similar raid was made last week end although the two points are about six miles apart. A 75-gallon still, 30 gallons of moonshine liquor and nine barrels of mash were taken, with pressure burners, double sets of coils and bottles and numerous kegs. Hewitt will be charged on five counts.

Federal Officers Sam Webb and George Hesser, both of Sandpoint together with local county officers were in the raiding party. A touring car was confiscated. —Star-Mirror.

Linden Items

Mrs. Annie Morrison spent the day with Mrs. Carr, Wednesday.

T. P. Fisher returned to Moscow, Saturday, after spending the past ten days visiting with friends on the ridge and looking after business interests.

Mr. and Mrs. Ed Kent visited relatives in Juliaetta Friday afternoon and were accompanied home by their son, Roy, who is attending high school.

An enjoyable time was had by those who attended the Harvest ball here Friday evening.

Mr. and Mrs. Arthur Bohn spent Sunday evening at the Smith home.

Mrs. Jim Garner is visiting her son, George Garner and family.

Mr. and Mrs. Edgar Bohn spent Sunday with Mr. and Mrs. Chris Dahl at Park.

Mr. and Mrs. C. E. Harris and family and Mary Virginia and Pat Sterling spent Sunday at the C. H. Fry home.

Mr. and Mrs. Arthur Bohn went to Ruby creek, Monday, where they have employment.

Frank Meyer has been doing some repair work at the school house for the last few days.

The party consisting of Mrs. Fry, Grandma Keeler, Mrs. Gus Farrington and children, Wm. Meyer and Bob Fry, who have spent the past two months at the Red River Hot Springs, returned home Monday. Clarence Fry who brought some of the party out, bagged a fine elk while there.

Mrs. Jim Garner and Mrs. McPhee spent Saturday afternoon with Mrs. C. H. Fry.

Goes Bankrupt Trying to Make French Bathe

Paris.—The serenity of bathtubs in most of France is often the subject of jokes, but sarcastic critics have a new fact to give substance to their humor.

In the town of Bedarieux, near the southern coast, there are 7,000 people with very few bathtubs. A forward-looking gentleman transformed a villa into a public bathhouse, in a spirit of

civic pride, relying upon promises of a good subscription list. He set out to get the wealthy to buy season tickets, good for a bath a week. He finally got 36 to agree to take a bath a month for a year. After the first few weeks, according to reports of the enterprise, the subscribers reverted to primitive ideas of hygiene and demanded part of their tickets to be taken up.

"A bath a month is too often; once every three months is enough," they are quoted as saying.

The bathhouse finally closed its doors, unable to make a go of the bathing business, although there was no competition.

French Politeness

Includes Officials

Paris.—Just how polite one ought to be is debated, even in France.

A new discussion has been aroused by the ubiquitous tone of a form that hunters must sign if they wish a license in the cher department in central France.

"M. le prefect: I have the honor to solicit, through your kindness," etc., runs the preamble of the form. It concludes: "And I ask you to accept the expression of my great respect."

A Frenchman doesn't have to depend on an official's "kindness" for a hunting license, comment some critics, and he doesn't have to show any "great respect," but merely conventional, decent politeness.

Some suggest that the prospective hunter ought merely to write: "I, the undersigned, ask for a hunting license," etc.

Sliding Doors Coming Back in Paris Homes

Paris.—Sliding doors have been built throughout in a dozen modern homes by a Parisian architect. His view is that the hinged door is an antiquated waster of space. This view has found a good deal of support.

Those commenting on the idea express surprise that people never have rebelled against the swinging door.

"How ridiculous it is," says one, "to have to step backward to open or close a door!"

The old-fashioned door destroys the harmony of a room if left open at right angles to the wall, says another, and it is ugly and kills good wall space if it is swung back against the wall.
