

## STATE HIGHWAY THRU KENDRICK

### May be Realized if Proper Action Taken Here

One of the best propositions from the standpoint of highway prospects that has ever been put up to this community, developed at the meeting of Kendrick highway commissioners last Saturday. J. J. McCready, assistant state highway engineer, in charge of the Lewiston district, was present at the meeting, making a special trip here from Lewiston to divulge the proposition that the state had to offer.

His proposition, as stated by Wm. Cox, chairman of the local highway board, was to the effect that if Kendrick highway district would build the grade on Bear ridge, according to the survey made by C. C. VanArsdol, the state would take over the main trunk line thru the district, make it a state highway and do all maintenance work in the future. This lateral of the state highway system would extend from Arrow Junction to Deary.

The survey, as made by Mr. VanArsdol, extends from a point near the A. Swanson place east of Kendrick, where it intersects the present surfaced highway, to the Rimrock school house at the top of Bear ridge. The survey was made on a maximum grade of 5 percent, but Mr. McCready stated that if it would lessen the cost of construction to an appreciable extent, the grade might be increased for short stretches to as high as 6 per cent, except on curves, which must be held to a maximum of 5 percent. The survey also calls for a grade 18 feet wide with increased width on the curves.

The Kendrick Commercial Club has been working on this project for several years, endeavoring to have this stretch of road declared a part of the state highway system. Mr. McCready visited this section over two months ago and looked over the feasibility of the project. His visit here last Saturday and the statement which he made to the highway commissioners, shows that the hopes of the local road boosters have not been in vain.

There has been some misapprehension as to the location of the Bear ridge grade. Rumors were current to the effect that the grade would be built to the Bodenhouse bench and from there extended up Pine creek. This was not even considered by the state engineer. His proposition was based on the survey made by Mr. VanArsdol, which extended to the Rimrock school house. Mr. McCready stated that the state department would accept the grade as a part of the state highway system if built according to the location made by Mr. VanArsdol.

It has been suggested by a number of land owners on Bear ridge that the project include approximately half a mile of road from the Rimrock school house to the Forest mail box. This would place the top of the grade at a rather central point on the ridge. The sentiment in Kendrick is strongly in favor of this extension and it appears that a big majority of Bear riders also favor it. It is a matter that can be taken up with the local highway board and brot to a definite conclusion.

The road committee of the commercial club will have petitions ready in the near future to be presented to the Kendrick highway commissioners asking that they call a bond election for the purpose of voting funds to defray the cost of constructing the proposed grade. It is generally understood that the American ridge project will be taken up at the same time and money from the sale of bonds used to defray the cost of construction.

### Expression of Appreciation

I wish to express my appreciation to the Methodist Ladies Aid for their kindness and thoughtfulness in mending my clothing.

R. F. Bigham.

## NEWS NOTES FROM THE KENDRICK SCHOOLS

### What The Students Are Doing This Week.

The first grade is reading and dramatizing "The Bird's Nest," this week.

Myrtle Humphrey and Georgia Garroute have both been absent part of this week on account of illness.

The primary pupils are studying Indian and Pilgrim home life for language lessons. The sand table represents the "Landing of the Pilgrims," and an Indian village.

The members of the Senior class have received their rings. They are greatly pleased with them.

Lizzie Jones, of the Senior class, went to Lenore, Tuesday. She will stay there until Thanksgiving, as she is teaching school for her sister, Dorothy.

Minnie Craig, Shirley Clem and Margaret Broeke were absent from school Monday afternoon because they were in Lewiston.

The high school is busy preparing for the carnival. Everyone is interested in the affair. Don't forget the date, December 2nd.

Several more pictures were taken of the high school this week. One of the entire high school and two each of the four classes. Many of the students are buying these pictures.

Several of the students are absent because of sickness.

Muriel Crocker has returned to school, as she is back from a hunting trip she took with her father.

### JOKES

Mabel T.—"We ought not to have let Bill get away from us."

Elsie—"Why?"

Mabel T.—"Well, he's colorblind and is over there flirting with a colored washer-woman."

Minnie C.—"When we were in China I saw a woman hanging from a tree!"

Herber R.—"Shanghai?"

Minnie C.—"Oh about six feet!"

### No Infantile Paralysis Here

Rumors have been current to the effect that there were cases of infantile paralysis in Kendrick and also at Juliaetta. Dr. Morehead stated yesterday that there was no foundation for the rumors. That at this time there were no cases in either community. He said that in case anything of the kind were to develop here he would immediately call in the county health officer and the general public would be informed of the fact.

There is now one case of infantile paralysis in Moscow, which developed last Sunday. The case has been in strict quarantine for some time. If no other cases develop in Moscow it is reported that the schools there will open next Monday.

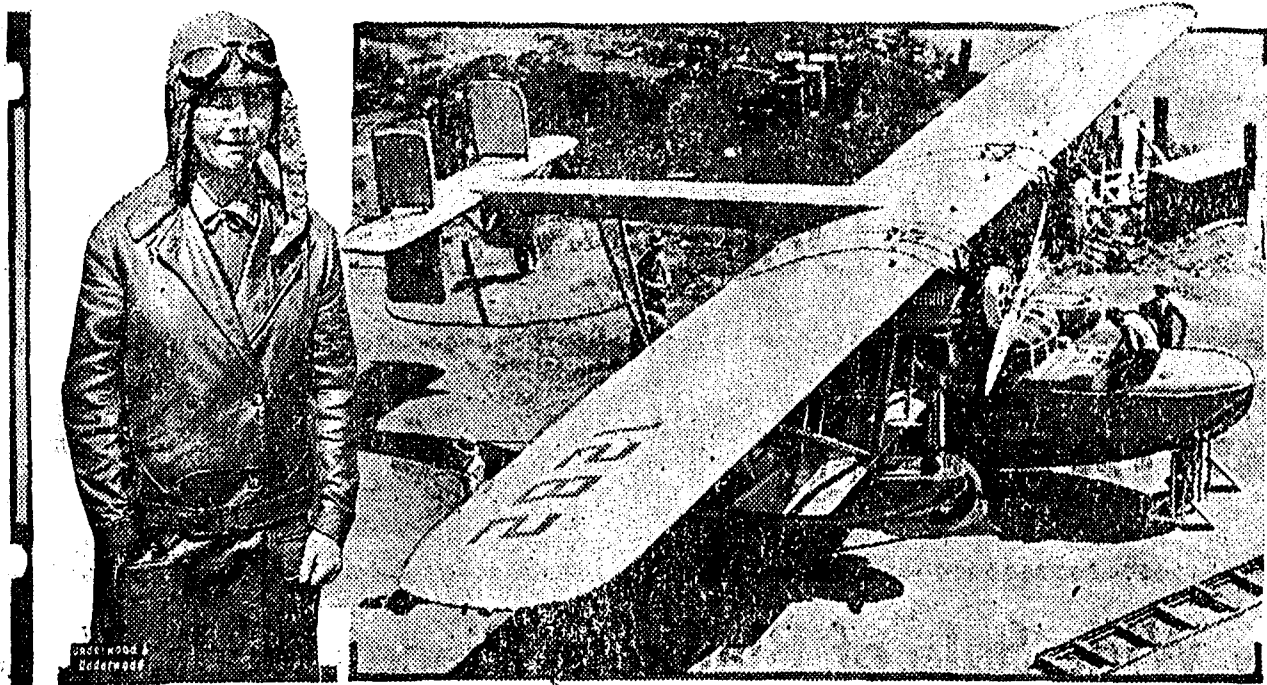

### Team Falls Thru Bridge

J. H. Garoutte and John Reid had rather a thrilling experience one day this week. They were on a load of hay driving a four-horse team across the bridge at the Garoutte place. Just as the lead team reached the opposite side the bridge gave way, allowing the wagon, four horses and men to fall thirty feet or more to the creek bottom. The men were not injured but one horse was badly hurt. It was necessary to cut the harness to release the horses. The wagon has a broken wheel but was not damaged otherwise to any great degree.

### Cooked Food Sale at Juliaetta

The ladies of the Baptist church will hold a cooked food sale at the I. O. O. F. hall at Juliaetta, November 23. They will also serve dinner. Come, everyone buy and eat and help the good work along.

## Another Transatlantic Flight Planned

Two-motored Sikorsky amphibian monoplane in which Miss Frances W. Grayson plans to try a flight from New York to Europe, with a pilot and a navigator-radio operator. At the left is Miss Grayson in flying costume.

### District Court Jury List

Jury term of the Latah county fall session of district court, which opened October 24, has been fixed for 9 o'clock Monday morning, November 28, according to announcement by Judge Edgar C. Steele.

Selection of 35 jurymen by the sheriff, probate judge and clerk of the district court, was made Monday morning at the Latah county courthouse, and in pursuance of the order of Judge Steele. Those chosen are ordered to report November 28 for service.

Criminal docket and a number of cases to be heard by jury will be announced the latter part of this week. The docket will be comparatively light this fall, it is believed.

Jurymen selected follow: Chas. E. Bowers, Ole Bowman, Peter Peterson, Frank Nero, Andrew S. Olson, Stanley Starner, W. H. Hengen, John Groh, John Kluss, Fred Stone, D. C. Helm, Erick Reierson, T. Driscoll, F. C. Lyons, C. E. Bunney, L. K. Rosa, Henry Bottjer, F. S. Curtis, Harry Gallup, Walter Johnson, P. B. Carter, F. A. Lienhard, E. C. Collins, Thos. LaBolle, Robert Whittier, Joe C. Pierce, Ben Vogel, J. B. Helpman, William Cox, Ed Lien, A. V. McCarthy, John Bysegger, Arthur Tegland, M. A. Palmer, Elmer J. Roth.—Star-Mirror.

### Depends on Oil Industry

Taking the country as a whole the motor vehicle drivers' last year paid taxes averaging 2.38 cents per gallon, on almost 8,000,000 gallons of gasoline. The aggregate of this tax was \$187,603,231. In addition they paid \$288,282,352 in motor vehicle registration and license fees.

About 95 per cent of gasoline taxes and 93 per cent of the motor vehicle registration fees went to building and maintaining highways. If to this total be added special taxes imposed on motor coaches and motor trucks, property taxes on motor vehicles, taxes paid by the petroleum industry and the motor vehicle manufacturers, a total of above \$1,200,000,000 is to be reached.

That is, the people who buy, operate and manufacture motor vehicles, and produce, buy and burn gasoline are more than paying the nation's road bill which now runs about one billion annually.—Genesee News

### Shooting Match Saturday

Tomorrow morning there will be a shooting match at the town park. The match will be put on by Manly & Roberts. This is the fourth year they have managed a Thanksgiving shoot and they have always had a good crowd. There will be plenty of turkeys for everyone, provided you can shoot straight enough to win one. Guns and ammunition furnished.

Fred Crocker returned from the Salmon river country near Lucile, Monday evening, with a big mule deer buck.

### Radio Nuts Rejoicing

For the past two month local radio nuts have been on the verge of nervous prostration. Their feelings have been harrowed to such a point that they were in a fit frame of mind to commit murder or suicide. The reason for this sad state of affairs was "local interference". No amount of inquiry brought to light the cause of the interference, but it was bad enough to put radio sets out of business for fifteen minutes at a time at intervals all night.

Jack Barnes, district manager for the Washington Water Power, located the trouble in his own kitchen at the H. P. Hull residence. The electric water heater had at some time been struck by lightning, which burned thru the insulation. A jar of any kind would cause sufficient vibration to start an arc in the heater and so long as it was arcing radio receiver sets in Kendrick had to close up shop.

Mr. Barnes now has the heartfelt gratitude and undying admiration of a host of radio nuts whose troubles have vanished into the ether.

### Buy More Clay Land

The Idaho Ceramic Materials Company purchased the John Calen ranch of 120 acres on Oct. 27th, 1927. This land adjoins the P. Johanson ranch and for the present completes the purchases of clay land contemplated by the company. This gives the company a total acreage of 288 acres, and, based on exploration and geological considerations embraces the area of economic importance.—Troy News.

### Giant Potlatch Turnip

C. G. Compton brot a giant turnip to the Gazette office yesterday that he raised on his place near town. It measured 35 inches in circumference. There are no scales in the office big enough to weigh such a monster. We believe that even in the Genesee country this would be considered some turnip—if they could raise them that big.

### Moscow Minister Resigns

Rev. Wayne S. Snoddy, for 10 years pastor of the Moscow Presbyterian church, resigned his position there. His resignation will take effect within a month. He will go to Azusa, a suburb of Los Angeles.

### Will Distribute Clark Estate

A. W. Behrens, cashier of the Bank of Juliaetta, was appointed administrator of the estate of Columbus Clark, deceased. The estate consists of \$25,000 in real estate and personal property and \$5,000 in life insurance.

Mrs. Henry Brown of Seattle visited friends in Kendrick, Wednesday morning. She left for her home on the afternoon train. Mrs. Brown will be remembered here as Miss Josie Craimer.

## ITEMS OF INTEREST FROM SOUTHWICK

### Written for Gazette by Special Correspondent

John Phillips and family spent Sunday at the home of Clarence Hewett.

Mrs. Vester Whiting is visiting in Wallace for a few days.

Miss Mae Grant of North Bend, B. C. is visiting with her grandparents and other relatives for a few weeks.

Russel Rodgers and wife spent Sunday at the home of Harland Hewett.

Mrs. Mary Stump left last week for Portland to visit at the home of her son.

Jake Berriman and family spent Sunday at the home of his father in town.

Miss Opal Southwick of Cream ridge is visiting at the home of her sisters this week.

Mrs. Souders of Crescent was in town Tuesday, her mother, Mrs. Wells, returned home with her.

Fred Whiting and family spent Sunday at the home of his father.

Mrs. Geo. Jones and daughter, Mrs. Mahaffy, spent Friday at the home of Mrs. John Lettenmaier.

Henry Jones of Elk River is visiting at the home of his parents.

Darl Wright went to Lewiston Sunday, enroute to Portland, where he has employment.

Eltton McCoy and wife, Nadine McCoy and Mae Grant were the dinner guests of Mrs. J. R. King Sunday.

Jim Cook of Bed Rock was in town Monday.

The basket social given at the Golden Rule school house, Saturday evening was well attended.

Mrs. Henry Brown, who has been visiting with her mother, Mrs. Kauder, for some time past, was an overnight guest of Mr. and Mrs. Homer Betts, Tuesday night, enroute to her home in Seattle.

Miss Emma Wagner was an over night guest of Miss Nadine McCoy, Tuesday night.

Mr. Harvey of Walla Walla spent Tuesday night at the home of Mr. and Mrs. Homer Betts.

Mrs. Mahaffy, who has been visiting her parents Mr. and Mrs. Geo. Jones, left for her home in Elk River, Tuesday.

Chester Melver and Floyd Russell and wife drove to Lewiston last Wednesday, returning home the following day.

### Idaho's Bonded Debt

BOISE—The bonded indebtedness of the state of Idaho is \$5,503,000, and annual interest payments total \$257,118.75, State Treasurer Byron Deffenbach says in a summary showing just what series of bonds, at what rate of interest and with what interest-paying dates, are now outstanding.

The average interest rate on Idaho's state bonds is 4.68 per cent, although 15 out of the 21 series now running were issued at four and a fourth per cent or less. The average is considerably affected by the fourth issue of state highway bonds, 1921, \$2,000,000, at five per cent.

### Lodges Spend Social Evening

Last Saturday the Rebekahs and Oddfellows of Kendrick lodges, together with a goodly number from Leland, met at an informal gathering. After being regaled with songs, recitations and speeches, contributed by the members, lunch was served after which dancing was indulged in until nearly midnight.

### Long's Sale Started Yesterday

N. B. Long & Sons' eighth Annual Raising Fall Sale started yesterday morning with a very satisfactory crowd at the opening. The sale and advertising matter is being handled by Marvin Long, a member of the firm. It will continue for at least two weeks. It is an annual event and is looked forward to by the people of the Potlatch.

### Proclamation By The Governor

As a means of giving expression to our nation's gratitude and thankfulness, the custom of observing one day in each year as Thanksgiving Day has been established, and it is in accordance with this usage and in harmony with the proclamation of the President, by authority of the law vested in me as Governor, I hereby designate and set apart Thursday, November 24, 1927, as a public holiday of THANKSGIVING AND PRAYER, that all our people may cease their ordinary labor and assemble in their churches and homes to render thanks to Almighty God for the many blessings bestowed upon us and to pray for a continuance of His Divine favor and protection.

Since this is a holiday distinctively American in origin and observance, I also recommend a general display of the American Flag as evidence of our love and fealty to the country which, through His gracious goodness, has prospered so abundantly.

The people of Idaho have reason for profound gratitude for the plentitude of material benefits of the past year and for the universal spirit of good will which exists throughout the state. We have seen our agricultural and industrial interests brought again to a state of prosperity, and our people are realizing the advantages of mental and spiritual training and are availing themselves of the facilities offered along those lines.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused to be affixed the Great Seal of the State of Idaho, at Boise the capital, this 12th day of November, A. D., 1927.

Signed, H. C. Baldrige,  
Governor of Idaho.

### How To Be Happy Tho Married!

A noisy bunch tracked out of club late one night, and up the street. They stopped in front of an imposing residence. After considerable discussion, one of them advanced and pounded on the door. A woman stuck her head out of a second-story window and demanded none too sweetly: "What do you want?" "Ish thish the residence of Mr. Smith?" inquired the man on the steps with an elaborate bow. "It is. What do you want?" "Ish it possible I have the honor of speakin' to Missus Smith?" "Yes. What do you want?" "Dear Missus Smith! Good Missus Smith! Will you (hie!) come down an' pick out Mr. Smith? Th rest of us wants to go home.—Ex.

### Dropped Dead at Game

Rev. Edker Burton, pastor of the Baptist church of Moscow since 1922, died from a sudden heart attack while attending the U. of I.-W. S. C. football game at Pullman last Friday. Few people in attendance at the game knew of his death until after the game was over.

### Growing Demand for Clean Milk

Need for Using Improved Methods in Production Is More Pronounced.

(Prepared by the United States Department of Agriculture.)

The need for using improved methods in producing the public milk supply becomes more and more pronounced as time goes on, says K. J. Posson, associate market milk specialist of the United States Department of Agriculture. As cities grow larger or become more numerous, the milk supply must necessarily be transported from greater distances and handled in larger quantities. To withstand such treatment it must be produced under the most sanitary conditions.

Furthermore, says Mr. Posson, there is an increasing demand for clean milk on the part of the consumer, and health officials are requiring that improved sanitary methods be used in its production. Unless care is taken in producing it, therefore, great losses may result from the rejection of milk by dealers or health departments and from the lessened demand for low-grade milk. The responsibility for clean milk at the source is placed squarely on the shoulders of the milk producer.

#### Produce Clean Milk.

By observing certain precautions, clean milk can be produced with very little more effort than milk which is not clean. These precautions are discussed by Mr. Posson in Leaflet No. 3, Improved Sanitation in Milk Production, just issued by the department. The first requirement for clean milk is a herd of healthy cows. Once it is determined by test that the cows are free from tuberculosis and are otherwise healthy, pains should be taken to clean them thoroughly before they are milked. Wiping the udders with a damp cloth removes the danger of contaminating the milk by falling hair and dust particles. Since bacteria cause milk to sour they should be kept out of it by every possible

means.

Further precautions in the production of clean milk require that only healthy people be employed in a dairy, that they wear clean clothing, and that milking be performed with clean, dry hands. The use of small-top pails is recommended as a means of reducing the amount of impurities that fall into the milk.

Every dairyman should be certain that he has a pure, safe water supply. Wells should be located on the highest available ground. A separate dairy house or milk room should be provided. Milk to be sold should never be handled in a dwelling as there is too much chance of dangerous contamination in case sickness occurs in the family.

#### Clean Utensils.

Milk utensils which are not properly washed or sterilized may be the greatest source of contamination. They should be rinsed inside and outside with luke-warm or cold water as soon as possible after use, then placed in a wash vat, scrubbed with a brush in warm water containing a soda ash or alkaline washing powder (not soap, rinsed placed in a sterilizing cabinet, and thoroughly steamed.

The best way to prevent multiplication of bacteria which unavoidably get into the milk is to cool the milk as soon as possible after it is produced and keep it cold. Bacteria are tiny single-celled plants, which, like most other plants, require warmth to grow. If milk is cooled to 50 degrees F. or below and held at that temperature, bacterial development is very much retarded. Milk should not only be kept cold until it leaves the farm but should also be protected from the sun and warm air while being transported from farm to city.

A copy of the leaflet may be secured by writing to the United States Department of Agriculture, Washington, D. C.

### Spoilage of Vegetables and Fruits Preventable

Spoilage of canned vegetables and fruits may result because they were not washed clean before they were canned. The soil contains bacteria which causes spoilage. Therefore, get rid of the soil. Wash vegetables, as beans and asparagus, thoroughly before cutting, and peas before podding. Berries should be washed before and after they are hulled. If they are washed in a strainer, the water may be run over them until it is clear as it comes through the strainer. A vegetable brush comes in handy for cleaning some vegetables.

A good slogan to follow in canning all vegetables is "Two hours from

garden to can. They should not stay overnight or for a half day or more, but rather should be handled while crisp and fresh. It is far better to pick beans, peas, sweet corn and other vegetables in the early morning and can them right away than to pick them the evening before while they are in a dry, wilted, and hot condition. Flat sour will start by morning in these vegetables that are allowed to lie over night before canned.—Nebraska College of Agriculture.

### Value of Wood Ashes as a Fertilizer Will Vary

The value of wood ashes as a fertilizer varies considerably, depending upon whether or not they have been leached, kind of wood they came from, method of burning, etc. Good quality wood ashes contain 5 to 7 per cent potash and 1.5 to 2 per cent of phosphoric acid. If the ashes have been leached by lying out in the weather they may contain not more than 1 per cent of potash and an equal amount of phosphoric acid. The amount of calcium will vary from 20 to 50 per cent but it usually runs between 30 and 35 per cent. By way of comparison high grade ground limestone may contain as much as 98 per cent calcium compounds.

### DIP HORSES IN FALL FOR LICE

(Prepared by the United States Department of Agriculture.)

If horses are lousy in the spring at shedding time it is more than likely they will go into the winter infested unless treated to eradicate the pests. When the animals shed their hair in the spring the lice seem to disappear, and the farmer is led to believe that his horses are free. Some of the lice usually remain on the animals throughout the summer, but not in sufficient numbers to cause annoyance or to be easily detected. The animals, therefore, usually go into the winter infested, and during cold weather lice increase very rapidly.

Since the best remedies are liquid dips, which cannot safely be used on horses during cold weather, fall dipping should be practiced whenever horses have been lousy at shedding time in the spring, says the United States Department of Agriculture. Three kinds of parasites are commonly found on the skin of the horse in the United States—lice, mange mites, and ticks. All three may be present on an animal at the same time. The lice can be eradicated by spraying or dipping the infested animals twice with an interval of from 14 to 16 days between treatments.

Mange is one of the most injurious skin diseases that affect horses. Four or more dippings at intervals of from 5 to 7 days usually eradicate the most common form of the disease. Lime sulphur and nicotine dips are suitable for controlling mange.

Many different kinds of ticks affect horses. The spinose ear tick is prevalent on horses in the Southwest and causes serious damage. The ticks enter the ears of animals, where they may be destroyed by a mixture of 2 parts pine tar and 1-part cottonseed oil injected into the ear canal.

Complete instructions as to the various dips and remedies suitable for eradicating these three parasites of horses may be had by writing to the Bureau of Animal Industry, United States Department of Agriculture, Washington.

#### Card of Thanks

We wish to express our sincere appreciation for the kind assistance and sympathy given during the death of our father, also for the beautiful floral offerings.

Mrs. D. M. Richardson and family.

#### The Solution

Two women in a railway compartment were quarreling about the window, insisted on calling the guard. "If it's opened I shall catch cold and die," said the one. "If it's closed I shall suffocate," retorted the other. A long-suffering man here inter-

vened. "First open the window," he told the guard, "that will kill one. Then shut it. That will get rid of the other. Then the rest of us can sleep."—Ex.

#### The Final Gesture

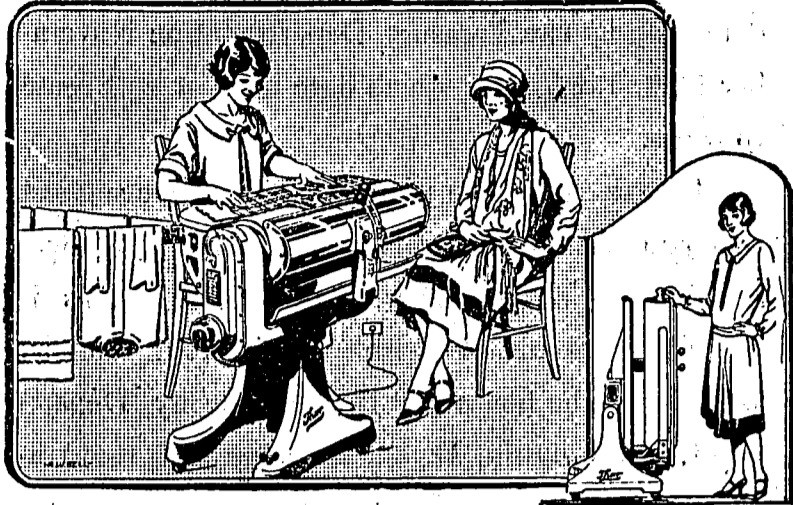

It was a morning in December, and the air was bitter cold. Two Jews were walking down the sidewalk, and one of the pair, amid great puffs of steaming breath, was talking and gesticulating earnestly. The other, however, remained silent. Finally the first Jew paused in his discourse long enough to say: "Vell, Moe, don'd you agree vid me, vat I say?" To which Moe replied: "Ikey, you can talk all you want, but I'm going to kip my hands in my pockets."—Ex.

# The New Thor Twins

## Thor No. 6 and 8 Electric Washer and Thor No. 40 Electric Ironer

Ironing is a pleasure with a Thor 40

THOR 40 Electric Ironer, is one of the greatest electric labor savers ever invented for use in the home.

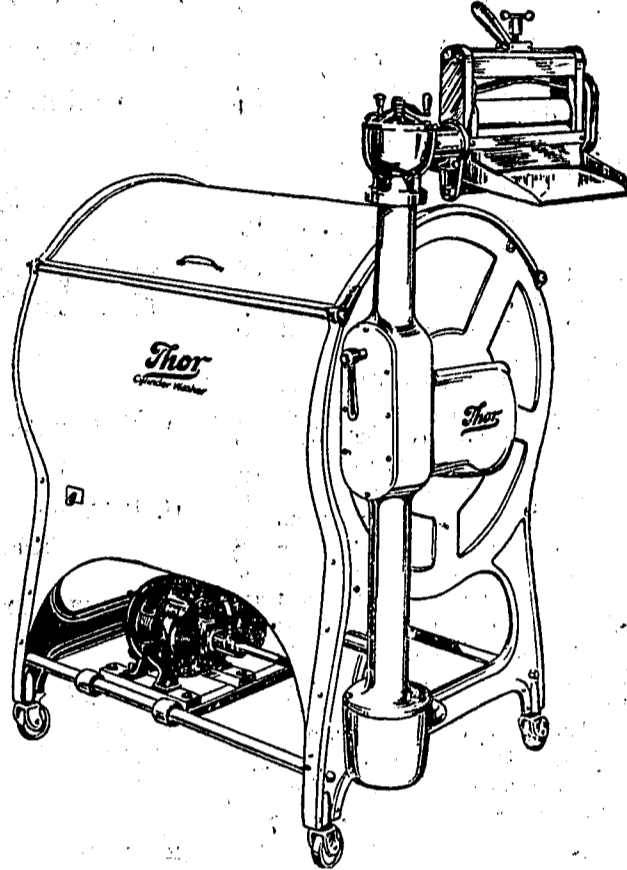

With this machine it is possible to cut ironing day to almost ironing hour. And it costs but very little more to operate than the common electric iron.

It is mechanically perfect in every way.

### Thor 6 and 8 Electric Washer

Like the Thor Electric Ironer are built to last a lifetime, they are mechanically perfect, they give you

- Faster Washing
- Safe Washing
- Cleaner Washing
- Most Sanitary Washing
- Best Washing Method
- Self Oiling
- Quiet Running
- No Belts
- Beautiful Duco Finish
- Clothes Live Longer
- Patented Aluminum Cylinder
- Long Life
- Low Cost

Thor 6 and 8 washes clothes cleaner, without wear and tear.

### SPECIAL

During the balance of this month. Pay Only \$5.00 down and the balance in easy monthly payments. **FREE** — One 25 pound pail of Harley Soap Powder with each new Thor Washer purchased during November.

### Excel Electric Pop-Corn Popper \$3.00

Every Home Will Want One!

#### NOVEMBER SPECIAL

Everyone likes delicious, crunchy pop corn—especially during the Fall and Winter seasons.

Here is a new Electric Pop Corn Popper that pops every kernel.

Just attach the connection cord to any outlet and the smokeless, odorless intense electric heat starts the corn popping.

You would never realize that pop corn was so good. For the first time—here is the new Excel Electric Pop Corn Popper. While our supply lasts—\$3.00. Have one charged on your light bill if you wish.

**FREE**—One 10-ounce tin of Jolly Time Pop Corn with each Excell Pop Corn Popper.

## DAIRY FACTS

### GREATER USE OF DAIRY PRODUCTS

Dairying has a highly promising future in the United States, judging from the remarkable increase in the consumption of dairy products during the past few years, it is pointed out by Dr. W. B. Nevens of the dairy department, college of agriculture, University of Illinois. The increase is not due to the increase in population alone, but is caused also by a more liberal use of dairy products by people generally, he said.

Figures sent out recently by the federal Department of Agriculture show that records of butter and cheese consumption have been kept since 1840. The amount of butter per person annually increased from about 14 pounds in 1840 to about 20 pounds in 1890, and is now about 17 pounds.

Cheese consumption has fluctuated somewhat and is now a little over four pounds a person a year.

Records of other dairy products are available for only a few years. The use of whole milk has increased steadily since 1917, about 29 per cent more being used a person now than nine years ago. Condensed and evaporated milk have also found a larger use per person during the same period.

The ice cream industry has had a very remarkable growth since 1909. There has been a steady increase in consumption until now about 11 quarts of ice cream are consumed annually a person, or more than 2½ times as much as in 1909.

The use of all dairy products a person, figured in terms of milk, shows an increase of over 86 per cent as compared with 1909. This fact is most significant and argues well for the continued stability and expansion of the dairy industry, Doctor Nevens said.

### Attention Essential to Calf During First Year

During the first year the calves should be kept in the barn in the daytime in the summer and turned out to

exercise at night. In the winter, the opposite practice should be followed. However, they should not be exposed to severe winds, storms, etc. Young calves will do better on hay than on grass the first year. Young stock should be fed to secure the maximum growth from birth to maturity, at no time neglecting them. Heifers should be bred at the age of eighteen months, or perhaps a little later if they have not done well during the earlier stages of development.

Keep stables clean and dry. Use disinfectant freely to rid stock of all lice and vermin, and to aid in keeping them in a healthy, thrifty condition, also to keep various diseases away which might otherwise affect the herd and do great damage. The most common ailment of calves is scours. Practically 95 per cent of all calf diseases in some way traces to scours.

### Alpine Plant

Edelweiss—the name meaning noble white—is a perennial plant belonging to the same natural order as the daisy. It grows in the high Alps of Switzerland, and in parts of Austria and Siberia, usually in places difficult of access.

### Coöperatives in Need of Data

Take Some of Guesswork Out of Formulation of Price Policies.

(Prepared by the United States Department of Agriculture.)

How co-operative associations can take some of the guess work out of the formulation of their price policies is suggested by the United States Department of Agriculture in summing up recent experience in co-operative marketing. It is impossible, the department says, for co-operative associations to fix prices arbitrarily for any length of time. When prices are named without reference to supply and demand conditions there is no way to compel consumers to pay such prices. In formulating a proper price and sales policy, co-operative organizations need the best available data as to the total supply of the commodities they handle and their average annual price. They need to be informed also as to the relation between these factors and any seasonal price trends that may ordinarily be counted on.

**Unsatisfactory Methods.** Rule of thumb methods and hunches, the department says, are treacherous guides in formulating price policies. Equally unsatisfactory, it declares, are such general ideas as the familiar notion that the price of a commodity should be its cost of production plus a profit. This idea is widespread among farmers and members of farm organizations. But it contains two fatal defects. In the first place there are nearly as many different costs of production as there are individual producers, so that a price representing even an average of costs would be unsatisfactory to about half the producers because, as individual producers, the costs would be greater than the average of costs. In the second place, the cost of producing a commodity, once it has been produced, may bear little or no relation to its price. It can only be sold for what the consumer will pay.

While these principles may seem rather elementary, the department observes that actually supply and demand factors are very complex and necessitate careful analysis. Oversimplifying the matter is a prolific source of mistakes and losses. An intelligent co-operative selling policy will take into account such factors as the general price level of all commodities, the relation to this price level of the particular commodity that is being marketed, the quantity of that commodity which is available, all known seasonal trends in the marketing period, the supply of competing commodities, and demand conditions as evidenced by the state of business and employment.

**Price and Production.**

Co-operatives should know the relation that normally exists between the average annual price of a commodity and the total annual production. In the case of perishables this is usually very close. It is also necessary to have information on the daily quantity present on different markets so that shipments may be regulated to avoid local gluts or shortages. Recent unhappy experiences suffered by growers of southern peaches, watermelons and lettuce are a striking illustration of the need for more careful control of shipments.

Although co-operatives should perhaps attach greatest importance to daily and seasonal price changes in formulating their sales policies, it is a mistake not to consider also the larger price tendencies of which these short-time movements are a part. Co-operatives, says the department, have an opportunity, through the control and regulation of supplies to market, to take advantage of normal seasonal price trends, as well as short-time changes. In order to do this, however, there must be careful analysis of long-time swings and basic supply and demand tendencies. A recognition, in short, of the powers and limitations of quantity selling, and a steady determination to substitute science for guess work are the foundations of success in modern merchandising, the department declares.

### Live Stock Facts

Roosters are confined or sold as soon as the breeding season is past. Hens that are not mated lay as good, and the quality of the eggs is improved.

Because a hen is pure bred it does not mean that she possesses the vigor and quality which are needed in the poultry yard during the hatching season.

A clean droppings board is necessary if the eggs are to be kept clean. Some poultry owners now use a screen that keeps the fowls off the droppings board during the day.

Alfalfa hay is the biggest aid there is in reducing the cost of making beef.

Genuine crude petroleum, just as it comes from the oil well and before it has been processed, is the most effective oil for treatment of hog lice and mange.

While chickens will stand neglect and sometimes do fairly well under primitive conditions in warm weather, it is very important to provide proper housing if you are going to make the chicken business pay in winter.

**Rye and Wheat Are Good as Spring Soiling Crop**

For a spring soiling crop, fall-sown rye and wheat are excellent and are especially adaptable in the North. These can be followed with either barley or oats for an early summer soiling crop in the North. Sudan grass is, also, an excellent soiling crop for this season, and in the South sorghums and Japanese cane in particular are probably the best. Sorghums may be cut at two to three feet, but much better yields are realized if they are allowed to head.

The big need for a soiling crop is in midsummer, however, when pastures are dry. For a short season crop at this time, corn is the leader in the corn belt. It is palatable, yields heavily, and remains in good condition over a long period of time.

**BUTTER MAKING DURING WINTER**

A number of important changes in the production of dairy products during the period from 1917 to 1925 have been noted by T. H. Pirie, dairy market specialist of the United States Department of Agriculture. One of these changes of importance to the milk producer is the increase in creamery-butter production of 79.2 per cent during the period. Only 17.8 per cent of the total milk production of the United States was used in the manufacture of creamery butter in 1917, whereas, the amount was increased to 25.54 per cent in 1925.

In this connection it is interesting to note that the seasonal trend of creamery-butter production has varied during the period. If the year is divided into two parts, namely the feeding season (November to April, inclusive), and the grass season (May to October, inclusive), it appears that the trend has been toward an increased production of butter during the winter feeding season. In 1917 the proportion of creamery butter made in the feeding season was 36.1 per cent and in the grass season 63.9 per cent. In 1925 the production in the feeding season had increased to 39.9 per cent of the total output, leaving 60.1 per cent for the grass season.

These figures indicate that winter dairying for butter production is increasing. There was a sound reason for this change, says Mr. Pirie. In Minnesota, for example, the average price of a balanced ration sufficient to produce a pound of butter in 1917, was 24.96 cents, and in 1925, 21.6 cents. The average price of 92 score butter in New York in 1917 was 42.7 cents per pound. In 1925 it was 45.3 cents. The feed cost had decreased 13.5 per cent while the price of butter increased 6.1 per cent for these two years.

**Young Bulls Need Feed for Proper Development**

Young bulls need to be liberally fed from birth until matured if they are to give the best results. Bulls that are stunted will not reach proper development and therefore will not be a good advertisement for people to look at when selecting breeding stock. In addition the bull will not give good results if he is lacking in vigor, that comes through proper development.

For the first six months the ration which is given to bulls need not differ from the ration fed heifers. From that time bulls will usually need a larger grain ration than females as they spend more time looking around and less time eating. Unless bulls get a fairly liberal grain ration in connection with good roughages they will probably become stunted.

The time to save feed used for bulls is when they are matured. If mature bulls are fed a heavy grain ration they will become heavy, sluggish and inactive. Mature bulls should never be allowed to become fat. Some bulls will require more grain than others, but as a rule the grain feed will need to be limited to get best results.

**POULTRY**

**CLEAN HOUSE IS FIRST ESSENTIAL**

A clean house is the first essential in good poultry management. The cleaning should be done before the pullets are put in the house for the winter, according to John Vandervort of the University of Illinois. Clean, healthy pullets cannot be expected to remain so if they are placed in a filthy hen house which is likely to harbor worm eggs and disease germs, he points out.

"Nests, roosts, water dishes and other utensils should be taken out of the house and cleaned and then left in the sunlight. Dropping boards should be cleaned and all litter and manure scraped from the floor. The floors, sidewalks and ceiling should then be swept, after which the interior of the house should be thoroughly scrubbed with hot water containing lye at the rate of one pound to 40 gallons of water. No disinfecting should be done until after the house has been thoroughly cleaned and allowed to dry out. The final step includes replacing the fixtures and putting clean litter on the floor and material in the nests. Houses should be cleaned and fresh material put in the nests monthly."

**Preparing for Eggs in Cold Weather of Winter**

With the coming of colder weather and the necessity of getting the pullets into winter quarters, poultry flock owners again are confronted with the matter of which ones to keep. Pullets should be well grown and healthy. Pullets that are undersized or stunted are seldom if ever worthy of their feed. The balance of the flock between hens and pullets will be determined by conditions such as the number of pullets available. The average is about two-thirds pullets and one-third old hens, the pullets being kept for winter egg production and the hens for breeding stock.

As insurance against an outbreak of colds and disease in the poultry flock, good housing and proper management of the flock are better and more reliable than vaccination or any other medical treatment. Providing plenty of room in the poultry house is necessary to the health and productivity of the flock. Three to four square feet is the proper amount of floor space for each bird.

**Prevent Fall Troubles in Farm Poultry Flock**

One of the most common diseases of the poultry flock during the autumn is roup. This disease is often found in damp, poorly ventilated houses and is most often contracted by birds that are poorly developed and of low vitality. Fowls of this type frequently get roup and are the means of spreading it throughout the flock. Obviously, prevention should consist of eliminating the weaklings from the flock and providing a house that will be dry and free from drafts, but well ventilated. An additional prevention against this disease is the following: Add as much potassium permanganate as will remain on the surface of a dime to each gallon of drinking water and keep before the fowls. This acts as an antiseptic and will help to keep the birds in good condition. An attempt to cure the individual of roup is not advisable, for, although in the majority of cases there may be an apparent cure, the danger of reinfection is great and frequently such birds cause the disease to spread throughout the flock.

**Don't Wash Eggs**

Experienced egg packers condemn the practice of washing eggs with either water or vinegar, most severely because such eggs do not stand up in storage. The fact that the eggs thus treated cannot be detected allows many of them to go into storage with the result that when they are taken out of the coolers next fall and winter their poor quality will result in lessened consumption. So don't wash eggs for sale.—National Poultry, Butter and Egg Bulletin.

**Teach Chicks to Roost**

Many people make a mistake in not teaching the young chickens to roost. It is usually advisable to do this when the chicks are from eight to ten weeks of age. When they are allowed to sit on the floor it is difficult to keep them clean and there is a tendency for them to crowd on cold nights, which often results in loss. The chicks can usually be taught to roost by putting perches close to the floor and placing one or two old hens with them.

**Whitewash Formula**

Here is a standard formula for exterior whitewash which has been found satisfactory. Dissolve 12 pounds of salt and 6 ounces of powdered alum in about 4 gallons of hot water. Add 1 quart of molasses. Make a thick cream by thoroughly mixing 50 pounds (1 sack) of hydrated lime, or 38 pounds (½ bushel) of quicklime, thoroughly slaked and screened before use, with about 7 gallons of hot water. Add the clear solution to the lime stirring vigorously.

**Plan for Determining Sex of Guinea Fowls**

In raising guinea fowls, many amateurs and some not so amateurish, are puzzled when the time comes for marketing, as they find it difficult to select males and females to be retained for breeding purposes.

To a casual observer the male and female of the species are identical in shape, size and plumage. But a closer inspection will reveal that one has a richer color of the neck feathers, its wattles are more plump and firm, and the plumage in general is more compact. This is the male.

The "buck-wheat" call that is so commonly supposed to come from the male is, in fact, the cry of the female, usually when frightened or excited. She may be further detected by her rougher coat of feathers, and by her wattles which are somewhat pale and shrunken.

When guinea fowls are in the prime of condition, as they should be after spending the summer on free range, the difference between the male and female will not be so pronounced as it is in the early summer, just after mating time, and one should study the birds carefully to insure a balanced selection of stock for breeding purposes.

**Harvest Silage Corn When Ears Are Mature**

When corn is to be harvested for silage, it should be cut when the ears are mature but the leaves and stalks are still green. Corn cut and bound to be fed as dry forage should be cut at the same time. It should be allowed to cure in shocks until dry and then hauled in and piled. By this method the ears are mature and well filled and all of the forage value of the stalks is saved.

Corn should not be shucked out of the field until it has dried for several weeks, after it has quit growing. Otherwise the corn will be hard to shuck, will be apt to heat and mold and make poor feed. In shucking from the field it is a good practice to have a box in which to throw the better ears. These can be specially dried out and sorted for seed supply if field-selection has not been practiced, or if there is a market for seed corn.

As the corn is shucked out it should be hauled to a crib that is well ventilated, and if possible protected against rats and mice.—Extension Bulletin 237-A, Colorado Agricultural College.

**Self-Feeding Dairy Cow Is Found Unprofitable**

What is good economics in feeding beef cattle and hogs is a waste when tried on dairy cows, according to the University of Illinois, which has just reached this conclusion after experiments in allowing dairy cows to "help themselves" to the feeds they want in the quantities they will eat. More feed than necessary was eaten, it was found. No two cows had the same preference for feeds, several different kinds of mill feeds as well as whole grain, ensilage and hay, being used in this experiment. Hence, the cow testing associations have been on the right track in teaching dairy farmers to house their cows in sanitary stalls with ventilation systems, feed and litter carriers, individual drinking cups and special attention to the individual production and demands of the dairy cows.

**Scrub Bull Lowers Herd Record to "Goat" Level**

In many of our dairy herds today culling should begin with the elimination of the sire, says Dr. J. C. McDowell of the bureau of dairy industry, United States Department of Agriculture. Breeding to inferior bulls may pull production down as fast as the culling of low-producing cows builds it up.

Doctor McDowell tells of one herd in which a scrub cow produced 146.8 pounds of butterfat in a year. Her daughter, sired by a scrub bull, produced 126.3 pounds, and the grand-daughter, sired by the same scrub bull, produced 99.7 pounds, hardly as much as the world's record for a goat.

The owner finally woke up, sold the scrub bull to the butcher, and purchased a good registered bull.

**Store Surplus Sunshine**  
What the irrigation dam is to lands of irregular or insufficient rainfall.

the silo is to carrying. It is, as it were, a reservoir in which the surplus sunshine of summer is stored up for use in winter, or against shortage at any time. In the absence of silos, roots are used to furnish succulence in winter, but the cost of production is greater while the range of profitable use is limited by difficulty of storage and extra labor in preparing the roots for feeding.

**Notice of Election of Commissioner of Kendrick Highway District,**

Notice is hereby given, That election of Commissioner of Kendrick Highway District will be held in said district, on Monday, December 4th, 1927, at the City Hall in Kendrick, Latah County, Idaho, at which time One (1) Commissioner will be elected for sub-district (3) for the term of Four (4) years.

The nominations must be from sub-district three known as the Village of Kendrick, but all in the Kendrick Highway District having a vote may vote on the Commissioner. Poll open from One to Five o'clock p. m.

Nominations may be made by petition with not less than thirty electors on said petition, and filed with the secretary up to and including the 30th day of November, 1927, for said nominee's name to be placed on the ballot.

Dated this 12th day of November 1927

William Cox, Chairman,  
G. F. Walker, Secretary Kendrick Highway District. 46-3

**COMING! United Doctors**

The Doctor who has charge of the State of Washington is

**A SPECIALIST**  
in Chronic Diseases and Clinical Medicine  
Will be at

**Davenport Hotel, Spokane**  
Wednesday, Thursday, Friday  
November 23, 24, 25  
**Cosy Nook Hotel, Palouse,**  
Saturday, November 26

Office Hours: 9 A. M. to 3 P. M.  
No Charge for Consultation

The doctor is a graduate in medicine and surgery, licensed in the State of Washington. He visits professionally the important towns and cities, and offers free consultation to all, except the expense of treatment when desired.

He treats Chronic Diseases of long standing and has to his credit many wonderful results in

catarrh, ulcers of the stomach, disease of gall bladder, bowels, blood and skin, nervous disorders and disease of heart, kidney and bladder, bed wetting, rheumatism, sciatica, leg ulcers, varicose veins, rectal ailments and chronic constipation.

If you have been ill for any length of time and do not get better, call on the doctor, as improper measures rather than disease are often the cause of your long standing illness.

Special attention is given to each case, and an earnest effort made to attain the best possible results.

Remember the above date and that the doctor specializes in Chronic Diseases.

**ORDER TO SHOW CAUSE**

**Order to Show Cause Why Order of Sale of Real Estate Should Not Be Made.**

In the Probate Court in and for the County of Latah, State of Idaho.

In the matter of the Estate of Sarah Jacobus, Deceased.

A. H. Daubenberg the administrator of the estate of Sarah Jacobus, deceased, having filed his petition herein praying for an order of sale of all of the real estate of said decedent, for the purposes herein set forth.

It is Therefore Ordered by the Judge of said Court, that all persons interested in the estate of the said deceased, be and appear before the said Probate Court, on Friday, the 9th day of December, 1927, at 10 o'clock in the forenoon of said day at the Court Room of said Probate Court in the Court House in said Latah County to show cause why an order should not be granted to the said administrator to sell all of the real estate of the said deceased Sarah Jacobus.

It is Further Ordered, That a copy of this order be published at least three successive weeks before the said 9th day of December 1927, in the Kendrick Gazette, a newspaper printed and published in the said Latah County, State of Idaho.

**ADRIAN NELSON,**  
Probate Judge.

**LOCAL NEWS**

John L. Woody and Wesley Thomas returned Tuesday from the Salmon river country where they each secured a deer.

Mrs. Egnaz Flaig and baby returned to Orofino, Wednesday afternoon, after visiting relatives here for a few days.

The Otto Schupfer and Ed Deobald families drove to Craigmont last Sunday where they spent the day at the home of Mr. and Mrs. Roy Thompson.

Mr. and Mrs. Harold Thomas and daughter, Phyllis, went to Lewiston, Wednesday, to spend the day at the home of Mrs. Thomas parents, Mr. and Mrs. J. W. Phillips. Mrs. Phillips will leave this week for a trip to New Orleans and from there to Florida.

Mr. and Mrs. E. H. Emery visited friends in Asotin, Tuesday afternoon of this week.

George Atchison of Spokane spent the week end here at the home of Mrs. Calista Grinolds.

Maude Compton and Hazel Stanton, who are attending the normal at Lewiston, spent the week end with home folks.

Frank Meyer and Bill Clem returned home last Saturday night from a deer hunt in the South Fork country, each with a fine deer. They report game plentiful where they were hunting.

L. A. Grinolds of Lewiston Orchards was transacting business in Kendrick last Saturday.

Miss Esther Janes and her friend, Miss Lucile Pachus both of Lewiston, spent the week end at the Janes home here.

Mrs. Roy Thornton was taken to a Lewiston hospital the first of the week on account of illness.

Ben Davis of Culesac was transacting business here yesterday.

Ernest Roberts, Harry Ameling, Ben Callison and son, Norla, returned Tuesday evening from the John Day Creek country, near the Salmon River, where they secured three fine deer.

Mrs. A. K. Carlson underwent a major operation at a Moscow hospital Wednesday morning of this week. Last reports are to the effect that her condition is considered satisfactory.

Mrs. Jessie Callison went to Spokane, Thursday, to visit her son, Louis. From there she will go to Coeur d'Alene to visit her brother, G. M. Lewis.

Mrs. Harvey Elliott of Wenatchee arrived yesterday to visit at the home of Mr. and Mrs. R. H. Ramey.

Born to Mr. and Mrs. Ed Darby of Cedar Creek ridge, Thursday morning, November 17, a son.

John L. Woody of American ridge is attending a meeting of the county commissioners at Moscow this week.

**Presbyterian Ladies Aid Sale And Tea**

The ladies of the Presbyterian Aid will conduct a Tea and Sale of their needle work, tomorrow afternoon, November 19. The work will be on display at the Commercial Hotel at one o'clock. There will be numerous useful articles and many pretty Christmas suggestions. The public is cordially invited to attend the tea and inspect the work. 2-t

**Full of Them**

A small boy, accompanied by two dogs, was accosted by a woman. "Have you licenses on both those dogs?" she asked. "No'm," he responded. "The big one is all right but the little one is just full of 'em."—Ex.

**Received Heavy Sentence**

Dave Schoeffler who was found guilty on four violations of the prohibition laws by a trial jury in federal court last week, was sentenced to pay a fine of \$500 and serve nine months in the Idaho county jail at Grangeville. He began serving his sentence this week.

**Long May It Wave!**

Most of the family were at the parlor window watching the king and queen ride by. Suddenly

the mother turned to her daughter. "Where's your auntie?" "Upstairs," came the reply, "waving her hair." "Mercy!" exclaimed the mother, "can't we afford a flag?"—Ex.

**Big Bear Ridge News**

Miss Helen Slind left Saturday for Portland, Oregon, for a visit with relatives. She plans on spending the winter on the coast.

Miss Mabel Weaver visited home folks the last of the week. Milo Slind was a Moscow visitor recently.

Mr. and Mrs. Thorvald Nelson and Mrs. Wade Keene spent Saturday and Sunday in Moscow.

Clarence Morey has purchased the Alber Estate farm.

Boost for better roads to your home town.

O. H. Forest made a business trip to Lewiston last week.

Misses Alma and Martha Aas, who are attending high school in Deary, spent the week end at home.

Mrs. Vaughan and Mrs. C. H. Fry spent Tuesday afternoon with Mrs. Clem Israel.

Mr. and Mrs. F. C. Lyons and family spent Sunday with Mrs. Longfellow.

**Cheapest Feed for Cows Said to Be Pure Water**

The owner of a cow which produced 10,584 pounds of milk and 542.6 pounds of butterfat last year was asked, "What is the cheapest and best form of food for dairy cows?" "Pure water," he replied. "Only be sure that the water is put in the cow and not in the milk can."

Milk is approximately 87 per cent water and if the cow does not have access to an unlimited supply of fresh, clean, palatable water, her milk flow is bound to suffer heavily. A high-producing cow will consume 25 to 30 gallons of water per day. Cow testers have found in numerous cases that the milk production of a herd was increased 7 to 8 per cent when automatic drinking cups were installed in the stalls, offering the cow unlimited supply of water whenever desired. A reliable automatic water supply system has proved to be one of the most valuable items of a dairy farm's equipment.

**Continued Progress in Eradicating T. B.**

Many Counties Complete Tuberculin Testing.

(Prepared by the United States Department of Agriculture.)

A summary of tuberculin-eradication work conducted by the United States Department of Agriculture in co-operation with the various states shows excellent results during the fiscal year ended June 30, 1927. An outstanding achievement was the large increase in the number of entire counties which have completed the tuberculin testing of all cattle within their boundaries. The summary of progress shows 347 such counties distributed among 27 states. Thus more than half of the states have one or more such tuberculosis-free counties. The three leading states in this respect are North Carolina with 82 counties on

the modified-accredited list, Michigan with 42 and Iowa with 30 such counties.

On July 1 a total of 17,000,380 cattle in the United States were under supervision for the eradication of bovine tuberculosis. Besides this number considerably more than four million cattle are on waiting lists and will be tested as soon as the federal, state and county veterinary inspectors complete other work for those owners who signed up earlier for tuberculin testing.

The total number of cattle in herds accredited as free from tuberculosis exceeds 1,885,000. The work of tuberculosis eradication is going forward systematically in all states. During the last month of the fiscal year the inspectors engaged in tuberculin testing applied the test to more than 800,000 cattle, of which approximately 24,000 were found to be affected with the disease. The removal of such reactors from contact with healthy cattle, followed by the slaughter of diseased animals under federal inspection, is gradually reducing the extent of bovine tuberculosis throughout the country and benefiting both the live-stock industry and public health.

**Prepare Chicken House for Fall and Winter**

To prepare the poultry house for fall and winter and to keep it sanitary at all times, the following is recommended: Thoroughly clean the inside of the house removing all portable fixtures. Then spray the inside with a solution made as follows: five quarts cream lime (fresh burned lime slaked with hot water and covered while slaking), one pint of a good coal-tar dip and one quart of kerosene. Dilute this mixture with an equal quantity of water and apply with a force pump or brush. The coal-tar dip will kill all disease germs that it touches and the kerosene will rid the house of mites and lice.

**Poultry Specialists Give Five Good Rules**

Poultry specialists at Ohio State university give five rules for poultry men to follow, if they wish to raise a large percentage of their chicks. They are as follows:

Keep the brooder house clean and disinfected.

Move the brooder house as often as the grass around it is killed, so that it has no poultry on it for a year.

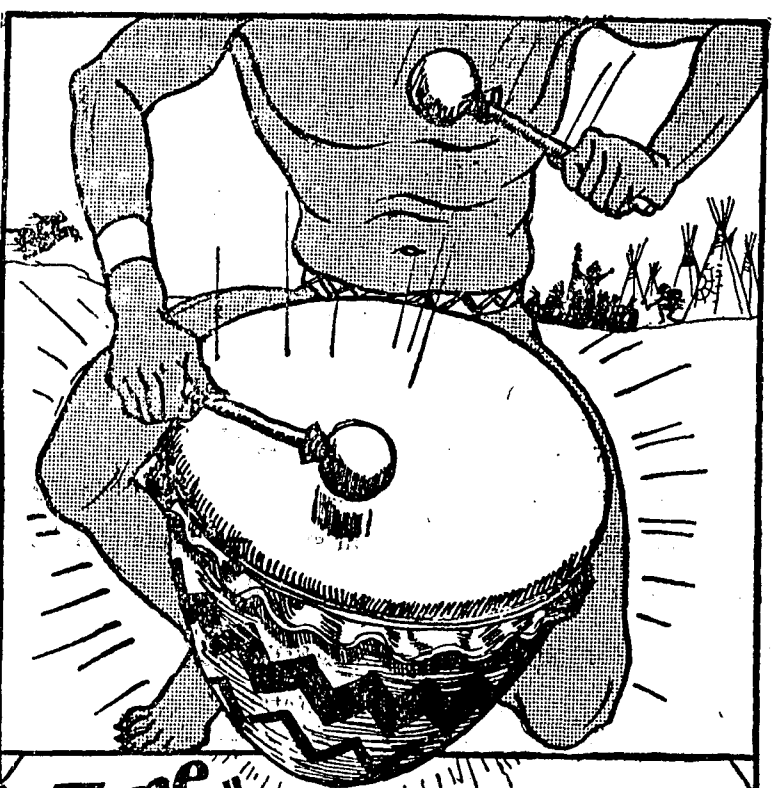

Provide plenty of clean, sweet litter.

Feed a good ration containing all nutritive essentials.

Raise chicks on range away from old stock to avoid disease and parasites.

Get your job printing done at the Gazette office.

**TONIGHT and Saturday**

**Zane Grey's DRUMS OF THE DESERT**

With WARNER BAXTER - FORD STERLING MARIETTA MILLNER
