No. 48

NEWS NOTES FROM THE KENDRICK SCHOOLS

What The Students Are Doing This Week.

Don't forget the carnival tonight, (Friday). No general admission. Given at the school house and beginning at 3 o'clock. Programs at 3 and 8 o'clock, p. m. Admission 10 cents in the afternoon and 25 cents at night. Lunches served from 5 to 7 o'clock consisting of ice cream, hamberger sandwiches, waffles, coffee, candy, pop corn and nuts. There will be several side shows and the following booths: Fish pond, fortune telling, cane stand, nigger babies, marriage guage, dart board and marble zig-zag. The ice cream stand is to be fixed like a confectionery where you can eat. Proceeds will be used for the benefit of athletics. Those who have seen the basket ball teams practice are very enthusiastic about them.

The students are voting for their King and Queen of the carnival. The following were nominated for Queen: Margaret McDowell, Shirley Clem, Marjorie Davidson, Doris Emery, Lillian Long and Helen Emmett. For King: Herbert Rogers, Elbert Long, Bob Dammarell, Harley Eichner, Don Brocke, Raymond Lyons and Charles Davis. Everyone is paying one cent a vote and the winners will be announced at twelve o'clock today. They will be crowned tonight by Lizzie Jones.

The following fifth and sixth grade pupils were neither tardy nor absent during the last month: Thomas Blevins, Bessie Candler, Bud Carlson, Margaret Daugherty, Jean Ramey Wayland Davis, Herbert McDowell, Alice Riley, Phyllis Cummings, Annabell Davis Josephine Davis, Roy Long, Oscar Onstott, Margaret Schulze, Jane Plummer and Johnnie Kite.

Otis Ross entered the sixth grade here Wednesday morning. He has been attending the Lenville school.

The fifth and sixth grades are very interested in their new language books. These books contain drill and test exercises and are designed to supplement and enrich the material of their regular text.

The seventh and eighth grades are planning on giving a play "Alias Santa Claus," sometime near Christmas. It has been arranged so every pupil may take part in the entertainment.

The pupils from the seventh and eighth grades who have not been absent nor tardy during the month of November are: Allie Foster, Nettie Mae McDowell, Ethel Cummings, Burneda Cummings, William Holt, Jack Plummer.

Removing Wreck Below Juliaetta

The engine and work train that went in the creek below Juliaetta last Friday morning about two o'clock, is being taken out today, according to a statement by Mr. Hays, roadmaster for the Northern Pacific. The wreck was caused by the roadbed sliding into the creek just as the train was passing over. It is believed the high water undermined the embankment and the weight of the train caused it to give way. The fireman narrowly escaped drowning.

Burglars Crack Genesee Safe

Some time early Wednesday morning burglars entered Raeder Bros. grocery store at Genesee, carried the safe thru the back entrance to the rear of the store and there pried it open with tools secured from a nearby blacksmith shop. Money to the amount of \$7 or \$8 was taken. No clue was left that would assist in learning the identity of the burglars.

Margaret Broeke entertained a number of girl friends at her home last Friday evening. A very pleasant time was enjoyed, games furnishing amusement for several hours after which dainty refreshments were served.

Death of Mrs. W. C. Johns

Mrs. W. C. Johns, a resident of the Juliaetta section, passed away at her home Monday of this week after a lingering illness. Funeral services were held in Juliaetta Tuesday afternoon, Rev. E. A. Janes officiating. The remains were taken to Moscow and interment made in the Moscow cemetery yesterday afternoon. The Rebekah lodge had charge of the service at the grave.

Jennie Waters Phillips was born at Onarga, Illinois, February 22 1872. She was married to William C. Johns, August 19, 1893. To this union four children were born, Mrs. Clifford Davidson, Phillip, Arthur and Adrian.

The deceased is also survived by her husband, three brothers and four sisters. One sister, Mrs. Emma Shaw lives at Onarga, Illinois. Mrs. Mary Broadbent at Gilliam, Illinois, Mrs. Hattie Lewis at Placerville, Cal., Mrs. Anna Duff at Pittsburg, Kansas. Her brother, George Phillips lives in Ohio, Harry Phillips at Paxton, Illinois and William Phillips at Los Angeles, Cal.

Death of A. N. Roberts

Word was received here Wednesday of the death of A. N. Roberts, one of the prominent farmers of American ridge and well known all over the country. His death occurred at 8 o'clock Wednesday morning and is reported to have been due to a stroke of apoplexy.

Mr. Roberts was doing the chores around his barn when he was stricken. His wife found his lifeless body a short time after death came.

Albert Nelson Roberts was born at Susquehanna, Penn., April 27, 1850. He is survived by his widow, two daughters, Mrs. Dan Helm of American ridge and Mrs. Parkins of Moscow; two brothers, Cyrus and Frank, both of American ridge.

Mr. Roberts was one of the oddest pioneers of the American ridge section. He served Latah county two terms as county commissioner and for a number of years was deputy assessor. He had always been active in county and community affairs and was one of the highly respected citizens of American ridge.

Funeral services will be held in Troy tomorrow morning. Interment will be made in the Moscow cemetery.

Assessors Approve Applications

Idaho's new motor vehicle law and anti-theft act are the source of many questions by people of the state, it is announced by Fred E. Luken, secretary of state, and in order to cause the least inconvenience to motor vehicle owners, methods used in other states have been studied carefully.

Instructions, copies of the law, and application blanks are being mailed to all owners. The law provides that licenses cannot be issued until titles are approved and certificates issued.

However, Mr. Luken says, the department does not wish to inconvenience car owners to the extent of forbidding use of cars while title is being approved and has asked the assessors, if they feel title should be issued, to approve applications and to send them to the state department where plates will be issued in the usual way. Provision has been made to speed up the handling of applications for title during the rush period.

If, however, assessors feel they cannot approve title they will accept fees pending an investigation to the car owner who may use it in lieu of plates until the title is approved and plates issued.

Hazel Stanton and Maude Compton returned to their school work at the Lewiston normal, Sunday, after spending their vacation with home folks.

Leland Items

The Leland Ladies Missionary Society will hold their annual dinner and bazaar Saturday afternoon and evening, December 3rd. Sale begins at two o'clock, all articles being priced. Dinner will be served from five-thirty until seven. All articles not sold in the afternoon will be auctioned off after the dinner is over.

Mrs. Ream and little son and Miss Jessie Lotspeich of Portland are visiting here at the home of their sister, Mrs. Julia Fleshaman.

Mr. and Mrs. Calvert have moved into the property formerly occupied by Mr. and Mrs. W. T. Beck.

Ralph Smith, who is teaching in the Lewis-Clark high school at Spokane, spent Thanksgiving with his parents.

Miss Alma Molten is visiting this week at the home of her cousin, Mrs. Harry Smith.

Rev. and Mrs. Gibbs were Sunday dinner guests at the Emil Larson home.

Mr. and Mrs. Clifford Powell and two daughters spent the week end with relatives in Clarkston.

Mr. and Mrs. Virgil Flesham and family and Mr. and Mrs. James Helton were Sunday visitors at the T. J. Flesham home.

Miss Blossom Watterer spent Sunday visiting Mrs. A. Peters.

Mr. and Mrs. Marvin Vincent and family and Mr. and Mrs. Robert Draper and family were callers at the S. J. Heffle home Saturday.

Mrs. H. C. Jones was called to Clarkston last week by the illness and death of her brother-in-law, Mr. McDonald.

Mr. and Mrs. Roy Davis and daughter and Mr. and Mrs. Lloyd Schoeffler and daughter of Pomeroy spent the past week at the Dennis Porter home.

Mrs. Wade Candler and children have been visiting at the home of her sister, Mrs. Wm. Gephart.

Mr. and Mrs. Claud Craig were Lewiston visitors last Saturday. F. M. Helton spent the past week visiting at the home of his son, James.

Next Sunday will be the beginning of a series of revival meetings. Rev. Gibbs will preach morning and evening. Rev. Hughes, conference evangelist, will reach Leland, Tuesday, Dec. 6 and will lead in the services until Dec. 18. Rev. Hughes has been very successful in evangelistic work. He held meetings in Leland about four years ago and at that time many were converted and received into the church. The general public is cordially invited to attend these special services.

Trap Fur Poachers

The state game department has started its fall roundup of illegal fur trappers, it was announced Monday, and already six violators have been fined. Seventeen violations of the law against shipping beaver fur are being checked up by the department.

As explained by Turner J. Sparkman, chief deputy warden, the method is as follows: A federal game warden checks up on the records of all fur buying houses; he reports the names of all Idahoans selling furs, together with invoices and cancelled checks, to the Idaho department; these names are then checked against those with permits to sell hides; those who have no permits are haled into court.

Arrests and fines so far under this drive are: J. S. Brandon, Cataldo, \$25; C. F. Sylvester, Samuels, \$25; Albert Otrado, Sandpoint, \$25; O. C. Lange, Hazelton, \$156.95; Orson Broadbent, Marysville, fine remitted because of his 80 years old; Peter E. Dawson, Clarks Fork, \$25.—Statesman.

Ben Callison has trapped eight coyotes this fall on his farm on American ridge. He reports their fur to be exceptionally heavy and of fine quality.

A Freak Season

Weather conditions this fall have been decidedly out of the ordinary. While this country has experienced an over-abundance of rainfall, severe frosts have been slow in making their appearance. Last Saturday Melvin and Stanley Murphy brought a perfectly good buttercup to the Gazette office, which they found on the hillside back of their home. Buttercups in November is something new under the sun. Last Sunday Walter Bigham saw a number of ground squirrels out feeding on the green vegetation on the south slopes of American ridge. It is presumed the weeks and weeks of rainfall has finally soaked into the winter quarters of the squirrels and driven them out.

Tuesday of this week Don Miller shot a ground hog, thus exploding the age-old theory that ground hogs won't come out of their winter quarters until February 2.

H. H. Sparber says that he shucked his corn not long ago and found the husks unusually light. He says that is a sign of a mild winter. It is reported that Indians are predicting a hard winter because the fur on muskrats, coyotes, etc., is unusually heavy. About next April we will have a pretty good idea whether the winter is to be a mild one or otherwise.

Crescent Clippings

Thanksgiving dinner guest at the A. Dorendorf home were: Mrs. Anna Kimbley and children of Waverly, Wash., Mr. and Mrs. Albert Dorendorf and sons, Mr. and Mrs. Wm. Dorendorf and baby, Mr. and Mrs. Mike Forest and children and Warren Trail.

Mr. and Mrs. Wm. Kauder were guests at the John Darby home, Thanksgiving day.

A family reunion was held at the M. L. Robeson home over the Thanksgiving vacation. Those present were: Mr. and Mrs. M. L. Robeson and family, Mr. and Mrs. Oral Craig and children of Leland, Mr. and Mrs. Vester Evans and baby, Mr. and Mrs. Arthur Anderson and children and Mr. Anderson's nephew, Clair of Agatha.

Miss Eva Slatter spent the Thanksgiving vacation with her parents at Leland.

Mrs. Otto Bleisner and children returned to their home in Waverly, Friday, after visiting a few weeks with Mrs. Bleisner's parents, Mr. and Mrs. A. Dorendorf.

Mr. and Mrs. LeRoy Southwick and daughters of Lenore, visited with Mrs. Southwick's mother, Mrs. Wm. Kauder, Saturday and Sunday.

Sunday guests at the Axel Ekman home were: Frank Sladoski, Wm. Zimmerman, W. H. Loeser and son, and Mr. and Mrs. Wm. Dorendorf and baby.

Mrs. Frank Souders visited school Tuesday afternoon.

Mrs. Gus Farrington and children visited at the Wm. Kauder home Tuesday afternoon.

Mrs. Axel Ekman visited at the Wm. Zimmerman home, Saturday.

Mrs. Mike Forest visited at the Wm. Dorendorf home, Tuesday.

Mrs. Mike Forest, Mrs. Wm. Dorendorf and baby, Mrs. Arthur Anderson and children, Sue Robeson and Avia Craig visited at the John Darby home Tuesday afternoon.

Old Story

Noting a photographer advertises 14 photographs for the price of a dozen reminds one of that venerable story of the lady with large flock of children who went into a photographer. "How much to take our picture?" the lady asked. "Six dollars a dozen," replied the photographer. The lady looked around, "One, two, three, four, five, six, seven, eight, nine and twins are eleven. Mister, we'll be back next year."—Exchange.

Death of Mrs. Calista Grinolds

Mrs. Calista Grinolds, a resident of Kendrick for many years, passed away at a Lewiston hospital last Sunday morning after a lingering illness caused by cancer of the stomach. She had been failing quite rapidly since last summer and for some time it had been generally known that she could not live long.

Funeral services were held at the Presbyterian church Tuesday morning at 10 o'clock, Rev. Dale Lauphere officiating. Burial was made in the Kendrick cemetery with the local Rebekah lodge in charge of the service at the grave.

Calista R Babcock was born near Manston, Wis., April 9, 1850. She was united in marriage, March 28, 1880, to Harry Grinolds. To this union six children were born, three of whom, together with seven grandchildren, survive her. In 1902 she came to Idaho, locating with her husband and family on a farm near Southwick where they lived for a number of years, later moving to Kendrick where she lived for eighteen years.

Early in life she united with the Christian church and since making her home in Kendrick became a member of the Presbyterian church, where her loyal, faithful service will be greatly missed.

The deceased is survived by a son, Leon of Lewiston and two daughters, Mrs. Hugh Helpman of Lewiston and Lucile of Kendrick.

Lecture Here December 15

Officials of the Washington Water Power Co. will be in Kendrick, Thursday, December 15, and give an illustrated lecture under the auspices of the local commercial club. The lecture will give a description in detail of the wonderful power development project at Lake Chelan in Washington. James B. Fiske, Jr., electrical engineer, will have charge of the lecture and will talk on the various phases of the high power development. The lecture will be free to the general public. A talk will be made to the students in the afternoon at the high school assembly room and in the evening the public is invited to attend.

Two other prominent officials of the Washington Water Power Co. will be here on the above date, W. H. Ude, director of the department of public relations and J. F. Farquhar, general agent, who has supervision of all towns outside of Spokane.

Idaho Has Grain Judges

Idaho's student grain judging team placed sixth in the judging and identification contest held in connection with the international Livestock exposition at Chicago last Saturday.

The teams placed as follows: North Carolina, Kansas, Iowa, Texas, West Virginia, Idaho, Oklahoma, Nebraska, Michigan, Illinois and Pennsylvania.

Idaho ranked third in Judging but the team was faulty on identification. The Gem state boys were faced with several products with which they were not very familiar such as cotton and sorghums, and identification was thus particularly hard for them.

Harry S. Gault, Buhl, high individual on the Idaho team, ranked eleventh in the entire contest. Judson Thompson, of Great Falls, Montana, placed third in judging but lost out on identification. Gault was seventh in the judging contest.

Considering the fact that the teams were the best in the country and that the Idaho boys were unfamiliar with several of the products placed before them, the showing of the team was very satisfactory to their instructors and friends here.

The team is composed of Harry Spence, Moscow, Gault and Thompson, and Bruce Sifton, of Emmett, alternate. H. W. Hulbert, professor of agronomy and coach, accompanied the boys.—Star-Mirror.

ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

Mr. Wm. McIntire, who has been visiting with relatives and friends here for the last two weeks, left Tuesday for his home in Anad, Montana.

Mr. and Mrs. Homer Betts entertained at Thanksgiving dinner Mr. and Mrs. Wm. McClelland and daughter, Lillian; Mr. and Mrs. Zoel Fairley, Miss Lottie Chladek, Mrs. Emma Betts, Glen Betts and family, C. A. Betts and family and Russell Betts. That day was also Mrs. Homer Betts' birthday.

Mr. and Mrs. W. J. Whiting and Vester Whiting and family spent Thanksgiving with Mr. and Mrs. Frank Thornton.

Mr. and Mrs. Atlee Mustoe, Given Mustoe and family, Mrs. Edna May and baby and Virgil Harris, Floyd Russell and family, J. R. King and son, Ray, spent Thanksgiving day at the home of Ray Southwick on Cream ridge.

Howard Southwick and family, Arnold Cuddy and family and Wm. Winters and wife were Thanksgiving guests of Mr. and Mrs. Roy Southwick.

Mr. and Mrs. Fairley, Vester Whiting and family, Harold Whiting and family spent last Thursday evening at the home of Homer Betts.

Mr. and Mrs. Wm. Stump and Given Mustoe and family were callers at the Atlee Mustoe home Sunday evening.

Miss Opal Southwick of Cream ridge has been visiting her sisters the past few days.

Miss Helen Jennings spent Sunday with Nadine McCoy.

Mr. and Mrs. Hoppe and Miss Binford returned from a three weeks visit with relatives in Oregon, Monday.

Gordon Harris and wife spent Sunday at the home of Harold Whiting.

Fred Whiting and family and Mrs. Myrtle Schoeffler and family were the Thanksgiving guests of Mr. and Mrs. Harold Whiting.

John McIver and wife of Roadene, Saskatchewan, arrived Monday. They expect to spend the winter here.

Mr. and Mrs. Zoel Fairley and Mr. and Mrs. Homer Betts were dinner guests of Mr. and Mrs. Vester Whiting, Sunday.

The Ladies Aid are making big preparations for their auction sale and chicken supper at their hall the 9th.

Mr. and Mrs. Elton McCoy spent Sunday at the home of her parents, Wm. Henderson and wife.

Mr. and Mrs. Wm. Jennings spent Sunday at the home of Wm. Cowger on Cedar creek.

George and Dan Ziemann spent Thanksgiving with their parents. Leslie Triplett and family spent Thanksgiving with her parents in Lewiston. They returned home Sunday.

Mrs. Grant Bateman spent last Tuesday at the home of Mrs. Armitage.

T. J. Armitage and family drove to Spokane last Wednesday, where they visited their son, Elbert and wife. They returned home Sunday.

Miss Gertrude Bager is visiting Mrs. Glen Betts this week.

Fire in Bechtol's Cabinet Shop

A bucket of tar exploding on the stove in Elmer Bechtol's cabinet shop in Moscow last Saturday morning, started a fire that caused considerable damage before it could be extinguished. It was necessary to call the Moscow fire department to put out the flames.

It was estimated the damage done to the building and equipment was approximately \$1,000.

Mistress: "So your matrimonial life was very unhappy. What was the trouble? December wedded to May?"

Chloe Johnson: "Lan sake, no, mam! It was Labor Day wedded to de day of rest!"—Ex.

Carry Assistants to Solicit Taxi Fares

Mexico City.—This capital offers to ambitious young men a possibly unique opportunity—that of becoming an assistant taxicab driver. Many of the taxi chauffeurs of Mexico City carry helpers. Their duties do not seem arduous.

While the driver, who is usually the owner, handles the car, his right-hand man busily engages himself in keeping a sharp lookout for customers. If he is a good assistant and a willing worker he crooks his finger in a questioning manner at passers-by and persons standing on corners. Naturally, if one wants a taxicab the assistant fails to spot this prospective fare. But theoretically he specializes in establishing contact with the public as a kind of outside salesman. Probably if he likes your appearance he will open the door for you when you get in.

Some of the assistant drivers, it is alleged, do not love their work as well as they should and are in it only for what they can get out of it—namely: continuous free travel. Others, it is said, get their jobs only because their employers cannot endure driving around all day without some one to talk to.

In still another category are those who act as bodyguards, safeguarding to some extent the danger of holdups at night.

Anatole France's Brain Like Fine Clock, Doctors Say

Paris.—Anatole France, noted French author, had a smaller brain than the average man, Dr. Guillaume Louis and Doctor Dubrieul-Chambardel, who performed an autopsy on the body, told the Academy of Medicine recently. M. France's brain weighed 1,017 grams, while the average weight for a man's brain is 1,360 grams. "It was the most beautiful brain I ever saw," one of the doctors said. "It looked like one of those pretty little clocks Julien Leroy used to make in the days of Louis XV, elegant and light, but beautifully chiseled and wonderfully precise."

Still Working

London.—There is a rumor that British engineers are working on a car that will get 50 miles on a gallon of gas.

Gloom-Chasing Cafe for Foggy Days in London

London.—An "anti-depression restaurant" for women shoppers on foggy days was recently opened by a large Piccadilly circus department store.

The restaurant stretches from one end of the store to the other. Artificial sunlight effects are obtained by the glowing golden walls and ceiling of the lounge.

Bennis stretch across the ceiling of the restaurant, which is papered in silver. On the walls are dull orange and green lights in alabaster globes. The carpet is yellow, with blue "suns" on it, with the chairs and tables of apple green. Shimmering green taffeta curtains give an illusion of leaves and woods outside.

"We wanted something that would cheer up women shoppers on dull, sunless days which are a sample of England in any season," one of the directors declared.

Features of the service are quick luncheons and American dishes.

SMUGGLERS COST U. S. MILLIONS

Secret Service Unable to Stop Illicit Traffic.

Washington. — Unset diamonds worth at least \$50,000,000 are being smuggled into the United States this year by a gang of international smugglers. The government of this country will be swindled out of \$10,000,000 duty due on the gems. Skilled American secret service agents have been sent to Antwerp, Belgium, headquarters of the gang, to try to capture the smugglers.

The smuggler gang has been in operation for several years, it has just been disclosed. Treasury officials in Washington have obtained no clues that would warrant arrests in the course of their investigations.

The gang, it is asserted, guarantees to deliver smuggled diamonds to purchasers in New York city. It even posts forfeits equal to the value of the gems to assure purchasers that they will not lose their money should the smugglers be captured and the gems confiscated.

Government officials admit that the manner in which the diamonds are smuggled into this country is a mystery they have been unable to solve. Customs inspectors seize on an average of \$150,000 worth of smuggled gems a year, it is explained, but it is doubtful if any of these gems were taken from agents of the Antwerp band. The directors of the international gang are believed to be Americans, and secret service agents are working day and night in their anxiety to end the gang's operations.

Holy Sepulcher Dome to Be Reconstructed

Jerusalem, Palestine.—The dome of the Orthodox portion of the Church of the Holy Sepulcher, which was cracked by an earthquake last July, has been condemned by the public works department. It will be reconstructed.

The Church of the Holy Sepulcher was consecrated in 336 A. D., early ecclesiastical records show. The dome is surmounted by a gilded cross. The church stands over the generally accepted site of the tomb of Christ. The church was burned in 1808 and rebuilt in 1810. The dome was restored by architects of various nationalities in 1808.

Too Many!

London.—Henry Chance Newton has seen 85 Hamlets and still lives. He is a dramatic critic who has devoted much of his seventy-three years of life to professional theater-going.

Tomb More Important Than Tut's Discovered

London.—The discovery at Sakkarah, near Cairo, Egypt, of what is believed to be the tomb of King Zoser, famous pharaoh of the third dynasty (about 4000 B. C.) is reported. The find is said to be more important archeologically than the discovery of the tomb of King Tutankhamen.

The work, which was being directed by F. M. Firth of the antiquities department of the Egyptian government, has been temporarily halted by the cave-in of a side shaft leading down to the tomb, but the glint of precious metals far underground has been seen, the dispatches say.

John Stalnaker and family, Given Mustoe and family, and Harold Whiting and family spent Sunday at the home of

Atlee Mustoe.

Impossible

A teacher from another part of the state was visiting not long ago in a little town not so awfully far from Garden City. She visited the school with the local teacher and suddenly became very interested in a certain little boy. "What is your name?" asked the visiting teacher. "John," replied the young man. "What grade are you in?" asked the teacher. "The second," "How old are you?" "Seven," promptly responded the boy. "Well, well," gasped the teacher, "it really doesn't seem possible. You're sure you are only seven? It really doesn't seem possible that you could get that dirty in seven years."—Ex.

As Essential as Sunshine!

Purest Norwegian Cod Liver Oil is certainly the most carefully selected high quality oil we know.

Second Liberty Loan Bonds Called

All Second Liberty Loan Bonds, whether in Coupon or Registered form were called for redemption by the Treasury Department on November 15th, 1927, after which date interest will cease to accrue.

In order to assure prompt payment we suggest that you arrange with this bank to have your Second Liberty Bonds sent in at this time. This is especially important with Registered Bonds, which must be forwarded to the Treasury Department, Washington, D. C., for release of registration, before payment can be made.

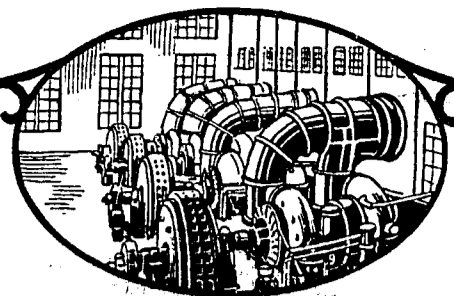

A receipt will be issued to you from this bank, and the bonds will be sent away for redemption without any cost whatsoever to you.

Call and see us about it.

GREAT STONE FACE IN PERIL, IS SAVED

Friends of Literary Landmark Buy Tract.

Concord, N. H.—A threat of despoilment has brought lovers of nature to the rescue of the great stone face, age-old sculpture of nature made famous by Hawthorne, Lowell and Webster.

The movement of lumbermen toward the wooded slopes of Franconia notch, above which the Old Man of the Mountain keeps his lone watch from a lofty bluff, and the possibility that quarrymen might come to blast granite from the mountain walls near the landmark have been checked by steps to purchase and set aside for the public 6,000 acres of forest land in the notch surrounding the great stone face.

\$300,000 in Two Gifts.

In the effort are allied the state of New Hampshire, the Society for Protection of New Hampshire Forests, the American Nature association and numerous individuals. The state has appropriated \$200,000 of the \$500,000 asked for the land; James J. Storow, late Boston banker, left another \$100,000 for the fund, and a nation-wide campaign is in progress to obtain \$100,000 from private contributors, each of whom is offered opportunity to name a forest tree in the region. The other \$100,000 would be paid out of revenue on concessions.

Acquisition of the region for a preserve will prevent the denuding of its hillsides and will avert danger of displacement of any part of the profile of the great stone face from blasts of quarrymen.

It was in 1805 that workmen, building the first rough road through Franconia notch, discovered the great stone face towering 1,200 feet above them.

Later Hawthorne in his story, "The Great Stone Face," wrote: "It seems as if an enormous giant or Titan had sculptured his own likeness on the precipice. . . . Its fast lips, if they could have spoken, would have rolled their thunder accents from one end of the valley to the other."

Daniel Webster, native of the vicinity, said: "Up in the mountains of New Hampshire God Almighty has hung out a sign to show that there He makes men."

Other Beauty Spots Near By. Close to the face are the fume, great chasm in the granite wall of the notch; the pool, Echo lake and Profile lake, and, high on Mount Cannon, Lonesome lake.

In the nation-wide appeal for aid in preserving the famous profile one of the first to respond was Mrs. Ellen F. Butterfield of Milwaukee, whose families for several generations were neighbors of the Old Man.

"My mother, Angelina Knapp Fuller, was born in Franconia, N. H., and my grandfather, Clark Knapp, was one of the early hotelkeepers in the White mountain region," she relates. "He entertained such celebrities as Jenny Lind, the Siamese twins, P. T. Barnum and Ole Bull. My grandmother, Elizabeth Newton Knapp, named Echo lake."

YAQUI INDIANS ARE IN PEACE AT LAST

Kept Northern Mexico in Shambles for Years.

Nogales, Ariz.—Peace hovers over the little kingdom of the Yaqui in the republic of Mexico.

When some 600 braves walked into Mexican army headquarters, laid down their arms and swore allegiance to the tricolor flag of the southern republic it was the first time in history the Yaqui have ever surrendered unconditionally.

Intermittently for a hundred years they have kept northern Mexico in the shambles of uncertainty and harassed the forces of organized government.

Only 2,000 Left.

The books of war are now being balanced. Today the recalcitrant tribesmen do not number more than 2,000, whereas ten years ago they were some 8,000 living in eight villages that constitute their domain. The country itself shows both farming and industry have suffered.

In the past farming or fighting was all one to the Yaqui. He would as willingly shoulder a rifle as trundle a tow sack filled with cotton, and he was far more willing to face almost certain death than to yield one iota of the points agreed upon between his tribe and the government.

Before, when he laid down his firearms to resume farming of the fertile lands along the north bank of the Yaqui river, the shadow of recurring hostilities always hung over him. He would grow just enough crops to keep his body and soul together.

Accept Government's Terms.

But this time the Yaqui has stopped fighting apparently without qualifications. He accepted peace on the government's own terms without asking or being granted amnesty. The Yaqui tribes have their own big chief or president, who in turn has eight advisers called governors. Each village is a voting unit in Yaqui affairs.

While the anthropologist regards the Yaqui as a retarded race, he has, despite his barbaric existence and elemental nature, great sincerity and a fervid fealty to those in whom he has confidence.

It was this trait that caused them to respond to the call of Adolfo de la Huerta when he rose against the government, although they held no serious grievance of their own.

Uncle Sam Lists Names

of Game Protectors

Washington.—For the convenience of game authorities, bird protection organizations, and others in procuring information concerning game and game laws, the twenty-eighth annual directory of officials and organizations concerned with the protection of birds and game, compiled by Tubbott Denmead, deputy chief United States game warden of the biological survey, has been issued by the Department of Agriculture as miscellaneous publication No. G-M. The organization and personnel of governmental establishments in this country, Canada, Newfoundland and Mexico are given, together with the names and addresses of officials of state-wide game and bird protective associations and societies, and of the principal national organizations interested in bird protection, including the advisory board, migratory bird treaty act.

Changes in the personnel of official organizations in the following states and provinces were made during the year since the previous directory was issued: California, Georgia, Idaho, Iowa, Michigan, Montana, Nevada, New Mexico, North Carolina, which for the first time has established a commission to administer game matters in the state), North Dakota, Oklahoma, Oregon, Pennsylvania (where two members have been added to the commission, making a total of eight), Washington, Wyoming, British Columbia, New Brunswick, Nova Scotia, and Prince Edward Island.

Copies of the directory may be obtained, while the supply lasts, by applying to the United States Department of Agriculture, Washington, D. C.

Bulldog Places Stones to Mark Son's Grave

Crooksville, Ohio.—Nearly all of Perry county is talking about the remarkable sagacity declared to have been exhibited by Lady, a bulldog owned by Walter Tipton, resident here, during her bereavement after the death of one of her five small puppies.

After sniffing and pawing the pup as if to make certain he was dead, the mother dog carried the body to an adjoining lot, dug a hole with her paws, deposited the dead member of her family in it and then replaced the dirt.

Then, according to Tipton and other witnesses, Lady scratched around until she found three small bowlders, which she finally succeeded in rolling, one at a time, to the grave.

Several times a day since then, it is declared, Lady goes to the grave and whines softly for several minutes.

Barred by Beans

Tacoma, Wash.—Two navy beans kept Arnold Phelps, nineteen, out of the navy when he took a physical examination and was rejected because his hearing was below par. He went to a specialist, who found a small white bean of the variety known as navy beans, in each ear.

DAIRY

COW STABLES TO SUIT DAIRYMAN

Dairy barns designed to meet the needs of the animal and make for convenience in labor are the trend of present-day construction. These features, together with the practice of avoiding waste of lumber are the result of modern, standard specifications.

Waste in cutting is avoided, advises D. B. Lucas, instructor in rural engineering at the New Jersey College of Agriculture in New Brunswick, by using standard lengths of lumber from the foundation to the roof. For gambrel roofs both the Shaver truss and the brace rafter are popular, and for curved roofs the Gothic arch. These types of light framing may be used up to 40-foot widths and will allow a spacious hay loft unobstructed by heavy timbers such as were formerly used at close intervals.

The Shaver truss projects somewhat inward at intervals of eight to twelve feet, but is entirely clear between braces. The brace rafter type, which requires approximately the same amount of lumber, projects slightly down at every rafter, thus making very little choice between the two. The Gothic arch leaves an entirely open loft and has a beautiful outside appearance.

Effort has been made by engineers to establish either the bent or cut rafter, the former being cheaper while the latter has a tendency to distort. With their economy and convenience these roofs of light plank framing will make a big appeal to farmers.

The rural engineering department at the college of agriculture has prepared standard plans for barn framings of the types discussed and these may be had free on request.

New Bulletin on Raising

Dairy Calves From Iowa

A bulletin which should be of much interest to dairymen has been published by the Iowa experiment station on raising dairy calves. Figures show that there are 24,000,000 dairy cows in the United States. The average age of these cows is six years. This makes the problem of raising dairy heifers for replacements an important consideration.

Fifty-four per cent of the dairy cows are used to produce whole milk. In sections where this is the case the problem of raising dairy calves is a greater problem on account of the shortage of skim milk. An owner of such a herd may be content to buy springers to keep up his herd or he must sacrifice some milk or raise his calves largely by the use of calf meals.

The proper growth of dairy calves has an important influence on their future production. Calves which are stunted will not produce as much when mature as heifers that have been properly grown. Men who pay attention to the breeding of their cattle have a greater opportunity for improvement both from the standpoint of proper growth as well as improvement in breeding.

Essential That Calves

Get First Milk From Cow

It is best to leave the calf with the dam for a few days so it can get the colostrum or first milk. If this cannot be done draw the first milk from the cow and feed it to the calf. The sucking of the calf also aids in relieving inflammation in the cow's udder at this time. From two days to four or five weeks old, the calf should receive two to five pounds of milk three times a day. There is more danger of over-feeding than under-feeding the young calf. In the case of the Jersey or Guernsey, it is sometimes practical to dilute milk with water, preferably warm water of the same temperature as the milk. If milk need be warmed it should be set in warm water. Scalded milk is hard to digest. During the sixth or seventh week the calf can gradually be changed from whole milk to skim milk. Foam on skim milk should not be fed to calves as it is liable to cause bloating.

Food Waste in U. S.

Is \$700,000,000 a Year

Chicago.—Housewives of the United States waste \$700,000,000 in foodstuffs annually, it was shown in a survey completed by A. J. Authenreth of the Middle West Utilities company, which was made public recently. Authenreth is vice president in charge of the ice engineering for the company.

His figures showed that each family wasted about 10 cents' worth of food daily by spoilage, or an equivalent of \$35 annually. This waste was not due to carelessness, but rather to a want of proper refrigerating facilities, he said.

"Only 55 per cent of the 28,750,000 American homes have refrigerators, and but 20 per cent of them use ice the year round," Authenreth found.

"Present-day diet is composed chiefly of highly perishable foods—green vegetables, fresh fruits, meat and dairy products," he said. "These foods contain a high percentage of moisture and are subject to quick spoilage. Refrigeration has become a necessity in the name of economy, because a constant temperature of 45 degrees or less is required to delay deterioration."

DAIRY TRADITION RUINED BY FACTS

Common belief among dairymen that cows freshening in the spring produce milk more economically than cows freshening at other seasons of the year does not check with the pure facts.

Evidence against this common opinion has come to rural economists at the Ohio State university from the study of records kept for five years by Medina county dairymen.

The economists divided the herds into three groups: Those in which less than 25 per cent of the cows freshened in three spring months—March, April, May—those in which between 25 and 35 per cent of the cows freshened in the spring, and those herds in which more than 35 per cent of the cows freshened in the fall.

Records on these groups showed that costs of feed and labor were reduced in both groups where spring freshening was practiced more extensively.

Milk production per cow increased, however, and cost of producing 100 pounds of milk decreased as the proportion of spring-freshened cows in the herd increased.

Production per cow during the five years averaged 8,154 pounds a year in herds where fall freshening predominated, 7,280 pounds in the half-way group, and 6,822 pounds in the herds where spring freshening predominated. Costs of producing 100 pounds of milk varied accordingly, from \$2.47 in the fall-freshening group to \$2.71 in the spring-freshening group.

Soy Beans Are Valuable

Feed for Dairy Cattle

Another experiment has been completed where soy-bean meal and soy-bean oil meal has been found satisfactory for feeding dairy cattle. This last experiment has been reported by the Delaware experiment station and substantiates other experimental data on this subject. In this experiment the different forms of soy beans were fed in comparison with peanut oil meal and the results showed that it was superior to this product.

In three experiments conducted by other stations in which soy-bean cake or meal was compared with linseed oil meal, the soy-bean cake or meal was found to be equal in one, and slightly superior in two for milk production. In one experiment where soy-bean cake was compared with cotton-seed cake, soy-bean cake was found to be slightly superior to cotton-seed cake for milk production.

All of these different experiments tend to show the possibilities of furnishing cows with home-grown protein supplements.

Camel

The cigarette that knows how to "be itself"

There is no "pose" about Camel. It's just a good honest cigarette—the best ever—and it doesn't try to be anything else.

If all cigarettes were as good as Camel you wouldn't hear anything about special treatments to make cigarettes good for the throat. Nothing takes the place of choice tobaccos.

ANCIENT SKELETON FOUND UNDER TREE

Remains of Tsimshian to Be Preserved.

Prince Rupert, B. C.—After reposing under ancient shells and refuse and covered by the stump of a huge cedar tree—the stump indicating an age of at least 325 years—the skeleton of one of the earlier British Columbia residents has been partly uncovered by archeologists engaged in research for the Canadian government. It is being removed and will be placed in a museum as a relic of Canada's early native peoples.

For some time the archeological party has been exploring in the northern part of Prince Rupert. An ancient refuse heap is in the process of being cleared away. On top of the heap stood a huge cedar tree, whose rings show an age of 325 years.

With the removal of this stump and of the upper layers of the heap, the skeleton has been brought to light. It is probably that of an adult man.

Only one skeleton from the Tsimshian area is known to be preserved in any museum in the world. This, however, is a modern one which is in the Field Museum of Natural History, Chicago. It was uncovered at Port Essington in 1897. The skeleton now being uncovered at Seal Cove is at least 200 years older than this.

It is reported that some 20 skeletons were found in the same refuse heap when the Grand Trunk Pacific, now part of the Canadian National railway, was being built, but none of them was scientifically excavated and little was learned of them.

The discoveries being made at Seal Cove are being closely watched, as it is thought they may indicate an earlier race of people on the British Columbia coast than so far discovered, and also they indicate that the Tsimshians were not always given to cremating their dead, as had been believed, previous to the arrival of the white man.

Scientists Say Red

Increases Strength

Chicago.—Found—an easy way to be a he-man.

Take a long look at something colored a saturated red.

Color, says the American Hospital association, plays a part that few suspect in affecting the lives and habits of people.

A normal man, research revealed, exposed to the influence of a saturated red showed a muscular development

of 50 per cent in excess of his physical power when exposed to a quieting blue.

If one's nerves are jumpy, the cause may not be the proverbial indigestion or the rigors of the daily stint. It may be the color of the surroundings.

The hospital association tested the theory of color on 63 students. It found that orange unconsciously excited the subject. Blue had a subduing influence and became more depressing to the unsuspecting student as it approached violet.

Grays in the spectrum of medium shades were found to be distinctly restful, being neither warm nor cold, stimulating or depressing.

The association suggests violet-red for X-ray rooms, since the color quiets without being too depressing and the red tends to relieve the feeling of depression.

Yellow, nearest to natural light, was found to be the best shade for large rooms and corridors because it brightens them.

What Next?

New York.—High school boys from the sidewalks of New York are being taught the proper way of inviting a girl to the movies and just what one does at an afternoon tea.

Extraordinary!

New York.—Two hundred and fifty girls—with a very few men—gathered at a dinner, and there were no cigarettes nor liquor.

Find Photographic Way to Trace Tuberculosis

Paris.—A photographic method of determining the existence of tuberculosis in mankind, even when unsuspected, was announced by Dr. Arthur Vernes, head of the Prophylactic Institute, whose work has been greatly facilitated by large gifts from Mr. and Mrs. Frank J. Gould.

Vernes asserted that more than 16,000 tests have verified the accuracy of his method which is based on a photometric test of the blood. Tuberculosis is frequently active when the lungs are entirely free of it, he said. He said cases had been found where tuberculosis was not suspected but that the test showed its presence and the hidden seat of the disease was then found.

AFRICAN FISH HAS ONE EYE IN TAIL

Canadian Fancy Fish Expert Finds Odd Specimen.

Toronto, Ont.—Channa Channa, recent arrival in Toronto from West Africa, never really knows whether he's coming or going, because, queer fish that he is, he has an extra eye in his tail. Fish story? Perhaps, but James M. Palmer of the Walker House aquarium, who is Canada's foremost fancy fish expert, says that all the other fish authorities agree with him when he states that the curious round area on Channa Channa's tail, if not a real eye, has mysterious powers of detection, and makes a very passable plesion optic.

Palmer has procured four of these marvels, one of them the largest specimen ever seen on this continent.

Every now and then Palmer goes adventuring, usually to New York, when he hears that a tramp steamer is making for port after a trip to the strange places of the earth. Sailors have learned that there are men like George Wright of the Walker house who will pay as much for something rare and beautiful in the fish line as other collectors will give for a first edition, or a Japanese print.

So they bring back funny treasures from their far voyaging and gain an honest penny to add to their seaman's wage. Palmer has just returned from one of these trips, and Channa Channa is only one of the several strange creatures that he has brought back to Toronto with him.

There are, for example, a pair of "jewel fish," their delicate, pinky-red sheen coruscating with brilliant metallic spots of emerald and crimson. These fish come from the Island of Haiti. There are a pair of pirana, beautifully marked, but vicious little fresh water fighters from the Amazon in South America, where they are the terror of swimmers.

When the pirana has a quarrel with his better half he does not take the case to court. His method is more direct—he chews her into shreds with his powerful jaws. That was the horrid fate of the mate of "Jack Dempsey," a big pirana that Palmer tried to lure into the domestic state last fall. The new pair, it seems, are more amiably disposed.

Oysters Now Must Have Federal Health O. K.

Washington.—Oyster lovers will rejoice to learn that their favorite sea food in the future must have a clean bill of health. To combat the possibility of more shellfish-borne typhoid outbreaks the United States public health service has decreed that health authorities of the various states will have to investigate shellfish producing concerns within their jurisdiction and issue certificates to those whose oysters are above suspicion. Every effort will be made to keep oysters from uncertified shippers off the market.

The federal health service will cooperate with the state agencies in deciding upon the minimum requirements for approval. The success of the plan as outlined at present will depend quite largely on ability of local health officials to keep their communities protected by shippers' certificates.

The practice of taking oysters from contaminated areas and attempting to make them safe by placing them in chlorinated water in storage tanks, a method that has come into recent popularity with some oyster producers, is not yet regarded as a safe procedure in the estimation of the United States public health service officials.

Penn Documents Found in Old Chest in England

Windsor, England.—Ancient documents belonging to the Penn family have been discovered in an antique chest here. A number of locks of hair are wrapped in one document. They are said to have belonged to William Penn, founder of Pennsylvania, and his wife. Some of the hair is inclosed in the invitation to the coronation of William of Orange, in Westminster abbey in 1689.

On the back of a miniature in oils is written "this portrait of Honorable Lady Julian Penn by George Romney." A water color of an old cottage at Stoke Poges, near Windsor, is inscribed as the gift to Lady Penn from Henry Raeburn.

Luminous Mist Over Jerusalem Two Hours

Jerusalem.—This city is puzzled by an unexplained luminous, sulphurous mist which swept over the city for two hours, causing discomfort to all who were out of doors at the time.

A local Hebrew newspaper published accounts of observers who told of the arrival of the mist at ten o'clock one night after two days of a very severe "khamseen," or dry, hot wind.

Sulphurous fumes, so oppressive as to make breathing out of doors difficult, descended over the city. The fumes showed a strange luminosity when seen from a distance. Carried northward by the wind, they disappeared by midnight.

16 PRESIDENTS ARE HONORED ON STAMPS

Three Women Also Given Similar Distinction.

Washington.—Only 16 Presidents of the United States have been honored by the use of their portraits on postage stamps, while 19 other persons prominent in American history, including three women, have had that distinction.

The women were Martha Washington, Queen Isabella of Spain and Pocahontas, the Indian princess.

A complete description of all United States postage stamps and postal cards issued since July 1, 1847, when the first adhesive stamps authorized by congress were placed on sale at New York, has been published by the Post Office department.

Three in Every Series.

Washington and Franklin and Jefferson and Lincoln have seldom been omitted.

Washington and Franklin have been honored in every regular series of stamps from the beginning and Jefferson and Lincoln have seldom been omitted. The other Presidents pictured on various issues are Madison, Monroe, Jackson, Taylor, Grant, Hayes, Garfield, Cleveland, Harrison, McKinley, Roosevelt, Harding and Wilson. Memorial stamps also have been issued for Lincoln on his one hundredth birthday anniversary in 1909, for Harding shortly after his death, and for John Ericsson, the inventor, on the occasion of the unveiling of a statue to him in Washington in 1926.

The other men whose portraits have been selected for stamp issues are, besides Franklin, Henry Clay, Daniel Webster, Winfield Scott, Alexander Hamilton, O. H. Perry, Edwin M. Stanton, William T. Sherman, John Marshall, David G. Farragut, Robert B. Livingston, William H. Seward, Nathan Hale, Capt. John Smith, Christopher Columbus and Vasco Balboa.

A Dozen Distinct Series.

There have been a dozen distinct series of regular postage stamps, with additions to each after their issue. There also have been 17 commemorative issues, not counting the Philadelphia centennial stamped envelopes. Those envelopes were almost the first to bear a stamp designed to commemorate a historic occasion.

Adhesive stamp commemorative issues include the Columbian, Trans-Mississippi, Pan-American, Louisiana Purchase, Jamestown, Alaska-Yukon-Pacific, Hudson-Fulton, Panama-Pacific, Victory, Pilgrim tercentenary, Huguenot-Walloon, Lexington-Concord, Norse-American, Philadelphia sesquicentennial, battle of White Plains, Burgoyne campaign and Vermont sesquicentennial.

Burbank's Secret Farm Found a Magic Garden

Los Angeles, Calif.—Contributions of new fruits, flowers and shrubs to the wealth of the world that may exceed the value of the introductions he made during his whole lifetime make up the legacy Luther Burbank left to the world.

This belief grows out of a survey now being completed by horticultural experts from the Stark Pomological Research laboratories of the trees and plants which Burbank had stored, without introducing them, on his experimenting farms at Santa Rosa and Sebastopol, Calif.

A partial list of the treasures inventoried in the report of the experts includes the following: 120 new plums, 18 new peaches, 28 new apples, 10 new plumcots, 10 new berries, 500 hybrid roses, 30 new cherries, 4 new nectarines, 34 new pears, 27 new prunes, 5 new grapes, 52 new gladioli, and a wide assortment of entirely new flowers and vegetables, including tritomas, Shasta daisies, petunias, a new "sun-proof" fire plant, or amaranthus combustio, improved varieties of Burbank's ornamental "rainbow corn," many new shades of giant zinnias; artichokes, asparagus, rhubarbs and corn; and some 20 new ornamental shrubs, including a magnolia tree that bears a cloud of tulip-like white blossoms and is an acclimatized variety of a Chinese tree.

Mosquito-Eating Fish

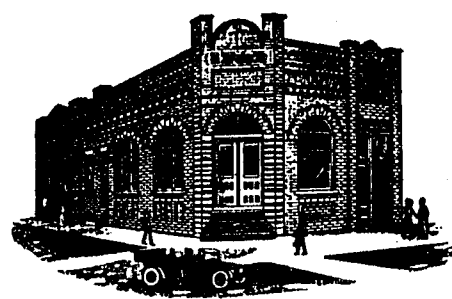

Thrives in Italy

Washington.—Gambusia, the little fish that befriends man by devouring mosquito wigglers, is finding things even more to his liking in the ponds and ditches of Italy than in his native American home, according to reports received here from Rome.

Carried first to Spain and thence to Italy to combat the malarial mosquitoes, this hungry little minnow has multiplied enormously throughout the region around the mouth of the Tiber, where it was first introduced, and has also been transplanted into shallow waters throughout the peninsula and along the Dalmatian coast. More favorable food and other environmental conditions, and probably the absence of natural enemies that take toll of its numbers in America, are credited with the gratifyingly abnormal rate of increase.

Not Bad Idea

Paterson, N. J.—Mr. and Mrs. John Schneider, married 40 years, are to celebrate by inviting a needy person to dinner every Sunday for a year. Charitable agencies will supply the guests.

NOTICE TO CREDITORS

Estate of Joday Long, Deceased. Notice is hereby given by the undersigned, administratrix of the estate of Joday Long, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers within six months after December 2, 1927, the first publication of this notice, to the said administratrix at Kendrick, Idaho, the same being the place for the transaction of the business of said estate, in Latah County, State of Idaho. Esther Compton Long, Administratrix.

Dated at Kendrick, Idaho, November 26, 1927. 48-5

Order to Show Cause Why Order of Sale of Real Estate Should not Be Made.

In The Probate Court of Latah County, State of Idaho.

In the Matter of the Estate of Albert R. Knight, Deceased.

It appearing to the satisfaction of this court from the petition of John B. Knight, Executor of the Last Will and Testament and Estate of Albert R. Knight, deceased, that it is necessary to sell the whole of the real estate of said decedent to pay the debts of decedent and the expense and charge of administration:

IT IS ORDERED that all persons interested in the estate of said deceased appear before the said Probate Court of Latah County, State of Idaho, on Monday the 17th day of December, A. D. 1927, at the hour of 10:00 o'clock A. M., at the Court room of said Court in the City of Moscow, State of Idaho, and show cause, if any there be, why an order should not be granted the Executor of the above entitled Estate to sell the following described real estate, to-wit:

The West half of the Northeast quarter (NW 1/4 NE 1/4) and Lot One (1) and Two (2) of section Thirty-six (36) in Township Forty-four (44) North, of Range Six (6) West of the Boise Meridian, in Latah County, State of Idaho, at private sale to the highest bidder therefor.

IT IS FURTHER ORDERED that a copy of this Order to Show Cause be published for two successive weekly publications in the Kendrick Gazette and that a copy of said order be mailed to the heirs and devisees of said decedent residing in the State of Idaho.

Dated this 18th day of November, A. D. 1927. ADRIAN NELSON, Probate Judge. 47-2

Notice of Election

Of Commissioners for Good Roads District No. 2.

Notice is hereby given that election of commissioners for Good Roads District No. 2, will be held in said district on Tues-

day, December 13, 1927, at the Union school house on Fix ridge, in Latah County, Idaho, at which time three commissioners will be elected for the term of two years.

Nominations may be made by petition with not less than 30 electors on said petition, and filed with the clerk not less than 10 days prior to the date of election, for said nominees' names to be placed on the ballot.

Dated this 22nd day of November, 1927.

By order of the Board of Commissioners.

Arnold Behrens, Clerk. Juliaetta, Idaho 47-3

NOTICE TO CREDITORS

In The Probate Court of Latah County, State of Idaho.

In the matter of the estate of Columbus N. Clark, Deceased.

Notice is hereby given by the undersigned administrator of the estate of Columbus N. Clark, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit the same with the necessary vouchers within six months after the first publication of this notice, to-wit: the 2nd day of December, 1927, to the said administrator at the Bank of Juliaetta, in the Village of Juliaetta, Latah County, State of Idaho, the same being the place for the transaction of the business of said estate in Latah County, State of Idaho.

Dated and signed on this 30th day of November, 1927.

A. W. Behrens, Administrator. 48-5

Dehorning Young Calves by Using Caustic Potash

A safe way to handle caustic potash when dehorning small calves by this method is to insert the pencil in a small rubber tube.

The usual method is to rub the very tip of the horn buttons with a stick of moistened caustic, continually wetting and rubbing until the spots are raw. This is done best when the calf is from three to ten days old.

A dime's worth of caustic potash is enough to dehorn ten or fifteen calves. It should not be so wet that the liquid runs as this will burn the skin of the calf. With the rubber tubing for the protection of the person's fingers there will be no burns.

Give Dairy Cows Plenty Water for Best Results

Dairy cows should be watered at least twice a day and best results are obtained when cows can have water at will. The higher the production the greater the benefit to be derived from frequent watering. A heavy producing cow requires from 75 to 150 pounds of water daily.

When it is not available, many successful dairymen have arranged some type of tank heater to remove the chill from the water, and they find that their cows drink more and produce more heavily.

Poultry Hints

Do not place the incubator up against the walls. Let the air circulate freely around it.

Alfalfa is one of the best vitamin-containing feeds for the hen. When a high grade of alfalfa leaf meal can be obtained, the amount equal to 10 per cent of the mash mixture can be fed.

Early pullets are the most profitable because they begin to produce eggs in the fall and lay through the winter season. As everybody knows, the fall and early winter eggs always bring profitable prices.

The poultry business was not intended for persons who become discouraged easily, or at trifles. Beginners are liable to make a good many mistakes, but these if looked at in the right light only tend to stimulate one.

One disadvantage of the early chick is the cold weather, making extra heat necessary for chicks.

Market only strictly fresh eggs. If you find any that you are in the least doubtful about, put them in the basket for home use, where they can be looked after.

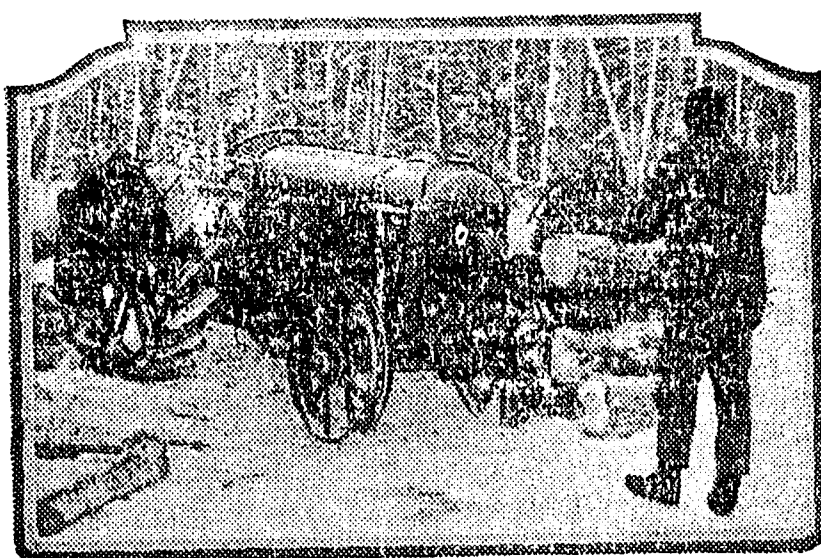

Although promiscuous and yearly additions of new blood is undesirable, an occasional introduction is advantageous where the poultryman does not have time to trapnest his stock.

The early hatched chicks, if the pullets are kept for egg production, are most likely to make good egg producers.

An egg is two-thirds water, and nothing contributes more to high egg production than a constant and abundant supply of water.

MAKING THE FARM TRACTOR EARN ITS "KEEP" IN WINTER

In Winter While the Horse is Standing in His Stall, This Fordson Tractor is Kept at Work.

THE tractor costs considerably less to keep than the horse during the winter period of comparative inactivity, but even during that period it can be put to a fairly active routine of work that will more than pay for its "keep".

On most farms there is wood to be hauled, sawed and stacked and, of course, the tractor in this case can do the work of several teams and many men—and do it in the face of such difficulties as snow and sleet.

But more and more the progressive farmer is finding other important work which his light tractor can perform in the winter time and thus make use of much of the time which used to go to waste on the average farm.

The Agricultural Department of the State College of Pennsylvania, is now conducting a series of experiments which are developing new uses for tractors on the farm and is making investigations to ascertain how farmers in various sections of the country are employing

their farm power units. In this work, the State College has found that a great many farmers are employing some of their winter time for the threshing of grain and here, of course, the tractor has been found invaluable. Many farmers also use their tractors for operating fodder chopping machines and for furnishing power for home grist mills.

Then there is always a certain amount of road work in the country districts in winter and many of the most progressive farmers have found that they can put their farm tractors to work for the county and state governments in scraping, rolling and repairing country roads. The work of clearing snow from the highways in winter also offers opportunities to the farmer to make his tractors work for the upkeep in winter.

So, the "power farmer" is keeping himself and his equipment busy in winter—much busier than he was when he depended upon mules and horses.

LOCAL NEWS

Edna and Esther James returned to their school work Sunday after spending their Thanksgiving vacation with home folks. Miss Wilson, high school teacher at Southwick was their guest over the week end.

E. H. Emery was in Lewiston on business Tuesday morning of this week.

Born to Mr. and Mrs. Paul Schulze, Saturday, November 26, a daughter.

Hiram Alber of Spangle, Wash., was visiting friends here over the week end.

Mrs. Jack Barnes and little son spent the week end in Genesee while Mr. Barnes made a business trip to Spokane.

Mrs. Dottie Stanton and two daughters, Mrs. Wayne Herres and Jaunita, of Lewiston, were Kendrick visitors last Saturday morning.

Clarence Bell, formerly of Kendrick, now attending the University of Idaho, is directing a thirty piece band composed of students of the Genesee schools.

Mr. and Mrs. Silvie Cook, the Misses Nannie and Mary Weaver went to Agatha last Thursday to spend Thanksgiving day.

Miss Edith Dammarell returned to her school work at Kamiah, Sunday, after spending her Thanksgiving vacation here with home folks.

G. P. Anderson, cashier of the Farmers Bank, went to Great Falls, Montana, the first of the week on business.

Wednesday of this week was the last day of the open season on Hungarian and Chinese pheasants. Because of the disagreeable weather during November there was less hunting done in this locality than is usually the case with normal weather conditions.

Word was received here this week that Billy Wilnot was quite seriously ill at Long Beach, Cal., with a severe case of pneumonia.

You are cordially invited to attend a chicken supper to be given by the Ladies Guild at the community hall on Bear ridge, Saturday evening, December 3. Following the supper there will be a fancy work sale.

The little son of Mr. and Mrs. Clyde Daugherty had rather a painful experience last Monday. He got his hand caught in an electric wringer and his hand and arm were quite badly bruised. No bones were broken and his injuries are not considered serious.

Jack Pickard of Troy was transacting business in Kendrick last Wednesday afternoon.

Mrs. J. F. Barnes of Lewiston arrived Wednesday afternoon to visit at the home of her son, Jack.

A young lawyer, pleading his first case, had been retained by a farmer to prosecute a railway company for killing 24 hogs. He wanted to impress the jury with magnitude of the injury. Twenty-four hogs, gentlemen. Twenty-four; twice the number there are in the jury box."—Tacoma News Herald.

The highwater in Potlatch creek last Friday did little or no damage, but for a few hours during the day it looked very much as tho the town might be flooded. Water ran down the gutter in Main Street but was carried off by the catch basins into the sewer.

A big slide has blocked the road at the foot of Little Bear ridge grade at the forks of the creek. It will probably take a week or more to remove the immense amount of debris that covers the road. A land slide on the railroad between Kendrick and Troy delayed the afternoon train yesterday for some time.

Harry Ross and family have moved from the ranch on Fix ridge to Kendrick to spend the winter.

CARD OF THANKS

We wish to express our sincere thanks and appreciation for the kindness and sympathy shown during our recent bereavement.

L. A. Grinolds and family, Mrs. Hugh Helpman, Lucille Grinolds, Geo. Sanders and family.

The New Ford

Henry Ford today announced the specifications of the new Ford car which succeeds his famous Model T. A bare listing of those specifications presents a picture of an automobile that in performance and appearance and mechanical features has heretofore been associated with a considerably higher price class.

Unusual speed and acceleration are among the outstanding features of the new car. It is announced as being able to make 55 to 60 miles an hour, with ease. In recent tests it has made even more without difficulty. What is more important, it is stated that when traveling at such speeds, it holds the road easily, and with comfort to driver and passengers. It is also stated with equal positiveness, however, that it performs in an equally spectacular manner on bad roads. In its design, Mr. Ford has held to his original idea of a car which can meet all conditions and types of roads.

Appreciating the constantly increasing importance of acceleration, the Ford Motor Company has given a great deal of study to this feature of the new car. In high gear tests with two passengers in a Tudor Sedan it has shown an acceleration of from 5 to 25 miles an hour in 8 1/2 seconds.

The new Ford car also introduces a new type of four-wheel brakes. An exclusive Ford development, they are of the mechanical, shoe-expanding type, and are self-centering. The brake pedal and hand brake each operate all four brakes. It is stated that this is the most reliable and simplest type of four-wheel brake, and also the easiest to adjust, all adjustments being made from the outside without removing any parts.

An engine that is practically vibrationless develops 40 horsepower at 2,200 revolutions per minute. This low revolution speed in ratio to the high horsepower is illustrative of the unusual efficiency of the engine. Also, it means longer life, the lower engine speed insuring less wear on engine parts. The low revolution speed is also a substantial factor in lessening vibration. The bore is 3 3/4 inches, stroke 4 1/4 inches. The unusually large crankshaft, which is both statically and dynamically balanced, weight 28 pounds. This balancing, combined with the lightness of aluminum alloy pistons, further combine to reduce vibration and increase riding and driving comfort and safety.

In addition to freedom from vibration, it is announced that the car is unusually quiet, a great deal of attention having been paid to this feature by the Ford engineers. In the engine, the timing gears are made of bakelized fabric, which is much quieter than metal. The cams on the camshaft have been so designed as to prevent valve clicking.

The coach work of the car is as distinctive as its performance. There is a noticeable European touch in line and contour. It is not only designed for exterior beauty, but has as well the interior roominess, convenience and luxurious appointments to be found in much higher priced automobiles. On an instrument board of satin finished nickel are mounted the speedometer, gasoline gauge, ammeter and ignition lock, with a dash-light in the center. The new military-type sun visor, with crown roof and round corners, are features of the closed models. Unusually narrow pillars and very wide doors and windows give maximum vision. Nickled radiator shell and headlamps further accentuate the exterior attractiveness, while choices of four colors in pyroxylin finish are offered.

Simplicity in design has also been carried to the ignition. There is only coil, in a water-proof case. There are no vibrators to adjust, and no exposed cables to work loose or short circuit from water. The distributor is located in a readily accessible position on top of the engine.

Centrifugal water pump, large radiator and airplane propeller-type fan provide a cooling system which makes the car very difficult to overheat, except from abuse, such as running without enough oil or dry radiator.

From 20 to 30 miles to a gallon of gasoline, depending upon driving speed, is the gasoline consumption announced. Feed to carburetor is by gravity.

The oiling system, also a distinctive Ford design, is a combination of pump, splash and gravity feed. The new transmission is of the selective sliding gear type, with standard shift, three speeds forward and one reverse. The main shaft runs on ball bearings, the counter shaft on roller bearings and the reverse idler on bronze bearings, a power-saving design unusual on light cars. Shifting of gears is noiselessly and easily accomplished, at the pressure of a finger.

Multiple dry-disc clutch, rear axle of three-quarter floating type housed in electrically welded steel, and spiral bevel gear drive are interesting features. The axle shafts carry none of the weight of the car, the wheels running on roller bearings on the housing. The newly developed spring of the transverse semi-elliptic type and hydraulic shock-absorbers prevent excessive up-and-down movement and remove side sway.

Irreversible steering gear, which prevents shocks from being transmitted back to the driver, makes handling exceptionally easy. Maximum steering safety is further provided by a gear housing of welded steel forgings, and a steel tube steering column welded into the housing, making a sturdy and exceptionally safe one-piece unit.

Ford-designed steel spoke wheels, completely welded into a one-piece assembly, are provided.

There are six models of the new car. They are the phaeton, roadster, sport coupe, coupe, Tudor sedan and Fordor sedan.

Ford dealers are preparing for a public reception Friday, when models of the new line will be shown in photographs and in charts.

Linden News

Mr. Long of Lewiston spent several days last week visiting his daughter, Mrs. Clem Israel and family.

Mrs. Sterling returned Sunday evening after spending her Thanksgiving vacation in Spokane and Wenatchee. She was accompanied by her daughter, Doris.

Mr. and Mrs. Hudson and son have moved to the McAllister residence for the winter.

Mr. and Mrs. Paul Riley and family of Palouse visited relatives here Thursday and Friday.

Mrs. Geo. Garner and daughter, Thelma, spent Sunday with Mrs. Edgar Bohn.

In honor of Mr. and Mrs. Paul Risleys visit, the relatives had a very enjoyable Thanksgiving dinner at the home of Mr. and Mrs. Addie Alexander. Those present were Mr. and Mrs. Paul Risley and family, Mr. and Mrs. Clem Israel and family, Mr. Long, Mr. and Mrs. Louis Alexander and family, Miss Eva Smith, Mary, Virginia and Pat Sterling.

Clarence Fry and Frank Meyers attended the funeral of Mrs. Grinolds in Kendrick, Tuesday.

Miss Viola Sadler returned to her home Sunday after spending

two weeks with her sister at Troy.

Daily Gains for Cal.

When properly fed, calves will make gains of one and a half or two pounds per day for the first four months. The purpose of feeding the dairy calf is to insure steady growth without fattening. The food should be nutritious, but not in concentrated form. Clover hay, corn stover, and silage without much corn in it, and a small amount of straw should constitute the roughage. Bran, barley and oats are excellent for the small allowance of grain it is to receive.
