

ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

Jake Berriman and family spent the week end in Moscow at the home of her sister, Mrs. Byron Tupper and family.

Russel Rodgers and family were the Sunday guests at the home of Doc Betts.

A surprise party was given at the home of Clarence Hewitt, Saturday evening, the occasion being Clarence's birthday. Those present were Russel Rodgers and family, Doc Betts and family, Harland Hewitt and family, Hank Bleck, Carl and George Pinke and Virgil Phillips.

Mrs. Bleck of Lewiston and Mrs. Fancher of Spokane, spent last week at the home of Wm. Bleck. They left Monday for their homes.

Given Mustoe and family were Saturday night guests of Ray Southwick and wife on Cream ridge.

Virgil Harris and wife spent Saturday and Sunday at the home of her parents, Mr. and Mrs. Harve Southwick of Cream ridge.

Mrs. Frank Thornton and daughters returned from Clarkston, Sunday, where she has been visiting her parents.

Homer Betts and wife and Mrs. H. Whiting spent Sunday at the home of Attlee Mustoe.

A birthday party was given at the home of Doc. Betts by the high school, the occasion being Russell Bett's birthday. A good time was reported.

Mrs. Clarence Hewitt and Mrs. John Phillips returned last week from Clarkston, where they visited with their parents, Mr. and Mrs. T. Phillips.

Wm. Henderson and family, Vester and Harold Whiting went to Clarkston, Sunday to visit their parents who are quite ill. Harold remained with them for a few days.

Mrs. Nadine McCoy was the overnight guest of Francis Farris, Monday night.

Ross Hoffman and Mrs. Myrtle Schoeffler and children were over night guests of Mr. and Mrs. Harold Whiting, Friday night. They returned to Kooskia Saturday where Mrs. Schoeffler will make her home.

Roy Southwick and wife returned home Saturday from Lewiston, where they spent a few days.

Mrs. Nels Longteig is quite ill at her home south of town.

Mrs. Cowger and son Abner of Cedar Creek spent Sunday evening at the home of Mrs. Jennings.

Ray King is absent from school this week, having a severe attack of tonsillitis.

Mrs. Homer Hayward entertained the teachers of the school at her home Tuesday evening.

Mr. and Mrs. Hoppe and Austin McCoy and wife spent Sunday at the home of Ben Prensall.

Elton McCoy and wife spent Saturday night and Sunday at the home of Floyd Russell.

Harry Welker has moved from the H. A. Russell place to his ranch in the canyon, and Bill Clay and wife have moved to Cavendish.

Virgie Wright, who fell and hurt himself last Thursday, was taken to Lewiston Sunday evening for treatment.

Baseball Prospects Bright

Keen interest is being displayed in the prospects for a pennant-winning ball team here this season. The executive committee in charge of affairs, is taking active part in promoting the finances for the season. If present plans work out Kendrick will have a fast team to compete in the league circuit.

O. E. S. Dance Tuesday

The local chapter of the Eastern Star will give a dance at the Fraternal Temple next Tuesday evening. Everybody is cordially invited to attend. Good music and a fine time promised. Lunch will be served in the hall.

Baseball Dance Tonight

A big crowd is expected at the baseball benefit dance to be held at the Fraternal Temple tonight. A six piece orchestra will furnish music for the occasion and at midnight lunch will be served in the hall.

All funds derived from the dance will be turned into the treasury of the local ball team.

The dance will be under the direction of the executive committee of the ball team.

COMMUNITY NEWS FROM JULIAETTA

Items of Interest From Our Neighboring Town.

F. W. Dustin of Clarkston, Wash., was here Saturday to confer with Juliaetta citizens with a view to dispose of the Juliaetta cannery.

Two propositions were considered. The first was to sell the cannery to the Juliaetta Cherry Growers' association, and in case that deal should fail of consummation, it was suggested that a corporation be formed and stock sold to those interested in the fruit growing and canning industries as should be deemed necessary to finance the proposition.

The meeting was held in the afternoon in the Bank of Juliaetta, and the two propositions were discussed quite freely, yet with no decision reached. Another meeting will be held next week to consider the matter further.

While there is no doubt that a portion of the soft fruit in the Juliaetta district suffered some damage as a result of the silver thaw in January, when the boughs and twigs of the fruit trees were encased in sheets of ice for a period of 48 hours, thus shutting off air circulation from the fruit buds—yet it now seems certain that a fairly good yield of peaches, apricots and cherries will be grown this season unless damage by a late frost or freeze should occur.

Owing to the soft condition of the roads, on Saturday a far greater number of wagons, hacks and "buggies" were observed on the streets of Juliaetta than automobiles. This condition is exceedingly rare.

It is understood that but little damage has resulted to grain from the cold weather, as the blanket of snow with which the fields were covered protected the fall-sown grain from injury.

Bank Assets 110 Million

Boise—Combined assets of national and state banks in Idaho the beginning of 1928 amounted to more than 110 million dollars, it is shown in a report just issued by E. W. Porter, state commissioner of finance.

Ninety-one state banks showed a combined resource of \$47,265,000 while the 52 national institutions had assets totaling \$63,153,000. Total loans and discounts of the 143 institutions amounted to \$48,541,000 of which \$19, 672,000 was made by state banks.

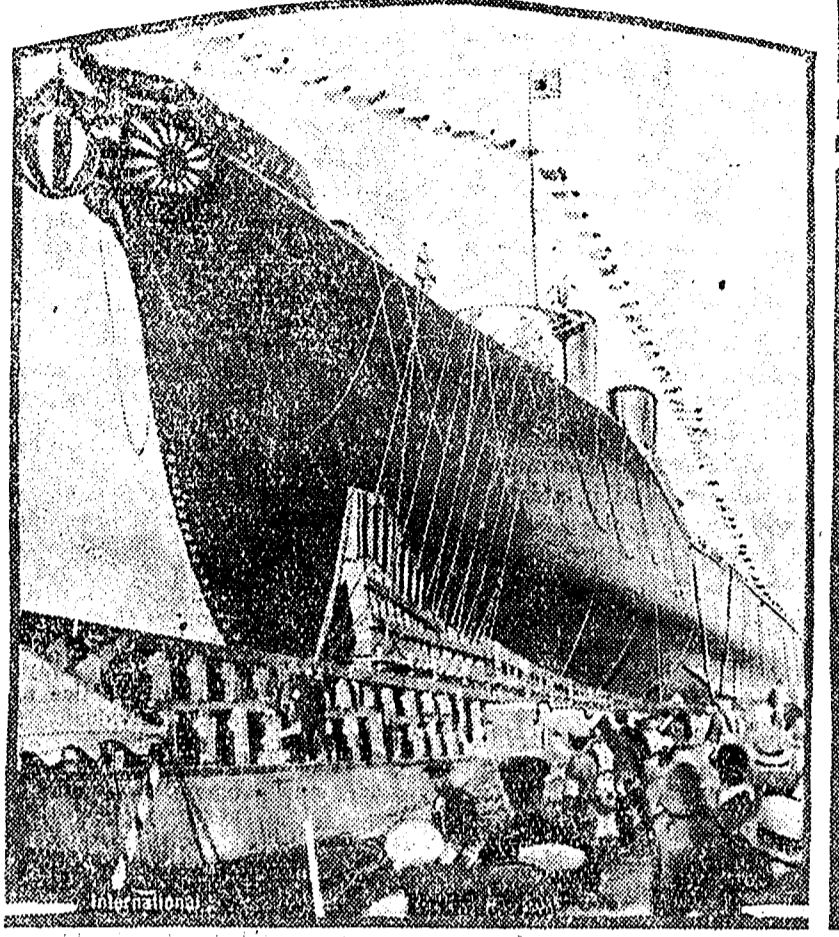

Total deposits in the 143 banks amounted to \$96,295,000 of which \$40,900,00 was with the state banks. Time deposits account for \$31,790,000 of the total and demand deposits \$58,411,000.

Paid in capital stock of the 143 banks amounted to \$6,612,000, state banks accounting for \$2,977,000 and national banks having the balance of \$3,635,000.

Former Leland Matron Passes

Word was received here this week of the death of Mrs. Ida Lindeman, who passed away at Los Moline, California, last Saturday, following an operation. Mrs. Lindeman was a former resident of Leland and was well known in that community. She is survived by her sister, Mrs. Herman Koopp, Red Bluffs, Cal., four brothers, Henry, August and Herman Woller of Minnesota, and William Woller of Los Angeles, Cal.

Japanese Launch Giant Destroyer

Launching of the new Imperial Japanese navy destroyer No. 41 at the navy yard at Yokosuka. She is of 1,700 tons displacement, equipped with six 12-inch guns and has a speed of 34 knots.

Letter From Bill Wilmot

Bill Wilmot, a former Kendrick boy, writes a good letter from Arizona and gives his idea of that country. Bill has every indication of being a financier like his dad. For a number of years he has earned his own spending money and looked after his own financial affairs to suit himself:

February 18, 1928

Enclosed please find a check for \$1.50 for which please send the Gazette for one year to Box 103, Tempe, Arizona. We moved over here from California about a month ago. It is much nicer over here than it is in California. It doesn't rain near so much. The sun shines at least part of every day out of the 365. We have found it so, so far. One day it rained all day until about six o'clock and then the sun came up and shined for about 15 minutes and went down. We are all feeling fine and having a good time. It is the liveliest country I ever saw because it is cut up in 5 and 10 acre farms and there are lots of people here. This particular place is in what is called the Salt River valley being irrigated by the Roosevelt dam. The same river is dammed up three times. The water that goes out of Roosevelt dam through the electric system goes on to a dam called the Horse Mesa dam below it and the water from the Horse Mesa dam goes to a dam called the Mormon Flats dam. They raise practically everything in this valley but once you get out of this valley there is nothing but desert land. We are only 10 miles from Phoenix. It is not a very big city having only about 39,000 people. I must close now as it is getting late.

Yours Respectfully,
Bill Wilmot.

Masons Held Stag Party

The local Masonic lodge held a stag party at the Fraternal Temple last evening with a large crowd present. A musical program was very much enjoyed after which several hours were spent with cards. A splendid lunch was prepared by Mr. and Mrs. N. Broeke.

Entertained Okoke Club

The Okoke bridge club was delightfully entertained at the home of Dr. and Mrs. Oliver Morehead last Saturday evening. A delicious cafeteria supper was served after which bridge was enjoyed for several hours. Those present were Messrs. and Mesdames, Walter Thomas, McKeever, Knepper, Mrs. Ruth Kennedy, Messrs. Carroll, Carlson and Ramey.

Mrs. Frank Ellis reports the first incubator hatch of the season, Thursday of this week.

Plan Baseball League

The executive committee of the Kendrick baseball club went to Lewiston last Saturday to meet with representatives of the Central Idaho and Valley leagues. The local committee is composed of Herman Schupfer, Ira Bolon and Jack Barnes. The following account, taken from the Lewiston Tribune, gives the details of the meeting:

Teams representing the Central Idaho and Valley leagues will function as one organization or two divisions, with an executive-secretary and one director from each as the only officials, it was decided at a meeting of the league teams Saturday.

The body will choose a high commissioner of baseball this year, who will settle all contested eligibility of players and umpires, interpreting playing rules under dispute and generally govern all contested matters that may arise, up until the time of the Fourth of July tournament.

Of the twelve teams in the two leagues seven had representatives present and three were represented by proxy. Possibility that Cottonwood may not put a team in the field and the fact that neither Lewiston or Lapwai had representatives present, leaves the teams which play in the Central Idaho league a matter of speculation.

Winchester Athletic club has notified the secretary that it will accept a franchise in the Central Idaho league if it is offered and it is believed that the Cottonwood franchise may be turned over to the prairie town. Nothing has been heard from Lapwai officially, but other league teams and officials expect to try and keep this popular team in the game this year.

Pomeroy and Uniontown-Colton teams of the Valley circuit asked Juliaetta and Kendrick to form one club so that Colfax or some other strong team could be invited into this circuit, but these clubs were not disposed to give up their rights and Valley circuit probably will be composed of the same six teams which played last year.

A second meeting of the directors of the league teams will be held Friday, March 2, at the Bollinger hotel, at which time the commissioner will be chosen, the teams assigned to the leagues and schedule drafted.

Les Robinson was re-elected as executive-secretary of the leagues.

Mrs. Chas. Schultz and her mother-in-law, Mrs. A. Schultz, returned Wednesday from a visit with friends and relatives at Palouse and Deary. Mrs. Albert Schultz spent a week at Palouse and Mrs. Charles Schultz visited her sister, Mrs. Ira Altig, and her mother, Mrs. Emma Gladden, at Deary.

Clyde Daugherty Buys Residence

Clyde Daugherty closed a deal this week for the purchase of the D. R. White residence at the east end of school house hill. The property has been occupied by the Joe Gardner family, who have now rented the McKeever residence north of the school house.

The deal was made through G. F. Walker, local real estate dealer.

LOCAL NEWS FROM THE LELAND COMMUNITY

Items of Interest From The Busy Potlatch Center.

March 2 at the I. O. O. F. Hall the local Women's Missionary Society will present the three act comedy, "Mrs. Briggs of the Poultry Yard." The cast is ably represented by the following: Mrs. Briggs Gladys Calvert, Ralph Briggs Kenneth Hund, Jimmie Briggs Mr. Harmon, Elvira Briggs, Maxine Flesham, Melissa Briggs, Elvia Flesham, Silas Green Milton Woodward, Mr. Lee Virgil Flesham, Virginia Lee, Georgia Flesham, Daisy Thornon, Lucinda Tuttle, Mrs. O'Conner Maragret Gibbs, Mandy Bates Mrs. Woodward, Director Mabel Helton

An admission of 20c and 30c will be charged.

The Missionary Society will meet or business and devotion Thursday, March 1, at the home of Mrs. Emiel Larson. Mesdames Hartinger and Johnson will assist the hostess. Visitors are cordially invited.

A surprise party was given on Mr. and Mrs. DeWinter Wednesday. A big feed and a good time were enjoyed by all present.

Mr. and Mrs. J. M. Woodward and Mr. and Mrs. A. M. Calvert were entertained at the home of Rev. and Mrs. Gibbs, Sunday.

The High School Glee Club enjoyed a very pleasant evening at the home of Mr. and Mrs. Russell Smith, Tuesday evening. Special numbers were given by Miss Tuttle, Mrs. Helton, Wayne Candler and a song in German by Henry Reil. Refreshments of sandwiches, salad, cocoa and cakes were served.

Visitors at the school this week were Representative and Mrs. Hoffman, Mrs. Robert Smith and Mrs. Thornton. Mr. Calvert cordially invites patrons to visit the school.

This week the class in table manners were given a demonstration of the various pieces of silverware, their place and use at a formal dinner.

Mr. and Mrs. Denzel Kuykendahl were given a surprise party Friday evening. An excellent time was enjoyed by a large number of friends.

Cavendish Woman Shot

Mrs. Viah Dancy of Cavendish, Idaho, grade school teacher at Camp 8, two and one-half miles from Bovill, shot herself through the shoulder with a .22 caliber pistol on her way to school Wednesday morning.

The shooting was said to be accidental and her condition is not regarded as serious. Given first aid treatment immediately after the shooting, she was rushed to the Potlatch hospital on a gasoline speeder, leaving at 9:30 o'clock.

The bullet entered the left shoulder just above the heart. How the accident occurred could not be learned; Mrs. Dancy having only a short distance to go from her home to the school, which is consolidated with Bovill schools as district 97.

This is Mrs. Dancy's first year as teacher there. Her husband is not with her.—Star-Mirror.

Think It Over

Don't get discouraged if the other fellow drives a lot bigger, better car than you do. You don't know how tired, discouraged he may get before the last payment is made.—Ex.

NEWS NOTES FROM THE KENDRICK SCHOOLS

What The Students Are Doing This Week.

The Seniors are preparing a debate: "Resolved that life in America as it was a century ago was more favorable to happiness, healthfulness and holiness than it is today." Margaret McDowell, Harold Parks and Lizzie Jones are on the affirmative; Gerald Ingle and Hester Knepper are on the negative.

The Seniors and their guests were entertained at a supper last Friday night by Hester Knepper. Owing to the illness of her brother, it was given in the high school building. It was the third of a series given by the different members of the Senior Class. Decorations were red and white and the supper consisted of meat loaf, potatoes, gravy, beets, jello and wafers. Those present were the seniors and Doris Emery, Mae Freytag, Robert Dammarell, Herbert Rogers, Carl Davis and William Ingle. The two teachers present were Miss Ledbetter and Miss Mary Weaver.

The fifth and sixth grades' basket ball team defeated the Juliaetta grade team here in a very interesting game last Saturday. The score was 16 to 7. The Kendrick boys were defeated by one point at Juliaetta a week ago but with a week's practice the Kendrick boys showed a marked improvement over last week's playing. Bob Dammarell refereed the game.

The fifth and sixth grades have been drawing maps in their geography work this week. The fifth grade has just completed the study of Africa and in their review work made a physical map of that country. The sixth grade has made a series of maps in their study of Idaho. Each made a physical, a political, and a product map of Idaho.

Those in the first grade receiving 100 in spelling during the past week are: Harry McNeal, Jimmy Kuykendahl, Dick Bishop, Helen Gardner, Quentine Dammarell, Lorraine Taber, Dick Carlson, Georgia Garovite, Ethel Frazer, Myrtle Humphrey, Quentine Perryman. Those in the second grade are: Irene Thornton, Lary Langdon and Bill Schulze.

The primary room has had stories and games about George Washington this week. For hand-work the pupils have cut and colored small hatchets and used them to write spelling on. The second grade wrote and illustrated a story of George Washington's life.

The second grade had a spelling contest this week. All of the words learned so far this semester were used and the following five did not miss a single word: Dwight Langdon, Phyllis Thomas, Floyd Candler, Irene Thornton, and Bill Schulze.

In the first grade spelling match only three pupils missed any of the review words.

Shows Increased Revenue

Showing a substantial increase in revenue as well as a marked growth in plant, customers, electric appliances sales and generation of electricity, the 38th annual report of the Washington Water Power company made public last week reveals that 1927 was the most active and successful year in the history of this electric service company.

Outstanding items in the annual report include: gross revenue for the year, \$6,475,455, an increase over 1926 of \$424,769; assets \$54,345,935, an increase of \$5,798,007; spent during the year for plant and equipment, \$6,261,418; number of accounts, 52,093; electric ranges in service, 9223; appliance sales, \$374,484; outstanding stock, \$29,639,300; bonds and debentures, \$11,740,000; notes, \$25,000; net earnings for stock, \$2,430,367; surplus \$329,156; retirement expense, \$1,039,764; taxes including federal, \$778,071. Kilowatt hours of electricity generated totalled 633,019,740, an increase of 61,185,746 over 1926.

Why They Don't Marry

Statistics show that the two classes of the community which least often marry are milkmen and fashionable photographers—milkmen because they see women too early in the morning, and fashionable photographers because their days are spent in an atmosphere of feminine loveliness so monotonous that they become surfeited and morose.—From "Meet Mr. Mullner," by P. G. Wodehouse.

Hawk Beats Lineman

While working in a tower on power lines near Saugus, Calif., an electric company lineman saw a bird's nest and he shoved it over with his hand. A hawk flew out and attacked the man so viciously that he fell from the tower. He was taken to the hospital with a broken leg, two fractured ribs and some bruises.

What Does Slosler Slosk?

There are 16,837 ways of making a living enumerated in a dictionary of occupational terms issued by the British government. Among the odd occupations followed in London are: Sloskers, wuzzers, woflers, penchers, yonkers, swagers, tubbies, towerers and toe flatteners.

The general belief is that it is hard to be poor, but in our experience as a country newspaper publisher we have failed to find anything difficult about it.

If anyone gets peeved about what the papers say about him, he ought to be grateful for what they fail to print.

"The only time some married women miss their husbands," says an exchange, "is when they are out of town. At home their aim is perfect."

The opinion has been freely expressed that now is the time for a young man to stay with the farm. It is reasonable to suppose that farming has passed the low ebb period and is now on the up-grade. In America one extreme usually follows another. We may expect flourishing conditions on the farm before long.

Thanks For The Buggie Ride

A kind old fellow told the editor the other day that he really had a good paper. Kind old fellow—perhaps we should not call him old—the News certainly appreciate these kind words because a newspaper seldom gets commendation from anyone.

The News chumps along, but unfortunately without the aid of an "unlimited bank account." It aims to please, unlike an orator or an actor, can get no response from its audience. Even the radio announcer gets telephone calls and telegraphic messages of encouragement. A paper can only wonder if they like it—and keep wondering. It is better the way it is.

Shoot the paper out into space with the hope that someone, somewhere, will give an approving nod. That's the editor's job.—Elk River News.

Dr. Arthur William White, of Yale, delights in telling of his experience with an inventor of the unlimited genius type who came to the professor with a model of a perpetual-motion machine. "H'm; looks plausible," observed Dr. White, "but it won't work. What are you going to do about gravity?" "Gravity!" said the visitor scornfully. "Tell wit' gravity; we'll use plenty of grease."—Tacoma New Herald.

Covers Everything

It's all in that one word: Through.—Abraham Lincoln

SPECIAL DINNER SATURDAY, at the Commercial Hotel, Kendrick, for 35c. 8-1

NOTICE

TO ANY AND ALL PERSONS, INDIVIDUALS, FIRMS, CORPORATIONS, OR ASSOCIATIONS, OWNING OR BEING INTERESTED IN ANY OF THE LANDS AND TAXABLE PROPERTY WITHIN THE KENDRICK HIGHWAY DISTRICT OF LATAH COUNTY, STATE OF IDAHO:

You, and each of you, are hereby notified that on Saturday, the 10th day of March, 1928, at the hour of one o'clock p. m., at the City Hall of Kendrick, Latah County, State of Idaho, the Board of Highway Commissioners of the Kendrick Highway District will meet to hear any and all objections to the issuance of the bonds provided for in the Resolution as hereinafter set forth, and will hear any and all objections to the levy and assessment of taxes to pay the principal of and interest on said bonds and will hear any and all objections to the assessments of said tax against the property of any and all persons, individuals, firms, corporations or associations objecting to the same.

And you, and each of you, are further notified that you may file written objections in the office of the clerk of said Board, to the issuance of said bonds, at any time prior to said 10th day of March, 1928, and that all such objections will then and there be heard, and that the said Board will then and there hear testimony in support of and opposition to all such objections, and that at said hearing, said Highway Board will confirm or set aside the proposed bond issue and tax levy therefore, in whole or in part, or will make such changes in the proposed plan of highway construction, improvement and repair, by enlarging the same or by eliminating parts of such proposed work therefrom, and such changes in the amount of such proposed bond issue, by increasing or diminishing the amount of bonds so to be issued, as may be determined by said Board, at said hearing, and that at said hearing,

the said Board will approve and confirm or disapprove of the proposed tax upon the taxable property within such district, for the payment of the cost and expense of such proposed work, and will approve or revise or set aside the tax levied, or to be levied, upon any particular tracts or parcels of land within such Highway District as it shall deem proper and for the best interest of said Highway District, a copy of which said Resolution is as follows:

RESOLUTION No. 1

A Resolution for the calling and holding of a special election in Kendrick Highway District in Latah County, State of Idaho, to submit to the qualified electors of such district the question of authorizing the issuance of negotiable coupon bonds of said district, in the total sum of ninety-five thousand dollars (\$95,000), for the purpose of the construction, improvement and repair of certain highways within said district, for the purchase of material and machinery therefore and for the necessary expenses of the district in connection therewith, describing the said bonds and fixing the rate of interest thereon, assessing a tax for the payment of principal and interest thereon as it falls due, establishing voting precincts and appointing judges for the said election, providing for notice of such election and directing the publication of notice of such election, designating the highways to be improved and constructed, and the manner and form of said improvement and construction, and providing for a meeting of the commissioners of said highway district to hear and determine why the tax for the payment of said bonds should not be assessed against all of the taxable property within said highway district, and providing for notice to any and all persons, individuals, firms, corporations or associations owning or being interested in any of the lands and taxable property within the said Kendrick highway district of Latah County, State of Idaho, notifying said persons to appear before said Board of Highway Commissioners to show cause, if any there be, why said bonds should not be issued or why the general tax for the payment of principal and interest of said bonds should not be assessed against all of the taxable property within said Kendrick Highway District, and setting a date for said hearing, and providing for the publication of said notice.

WHEREAS, more than two-thirds of the residents and tax payers within the Kendrick Highway District of Latah County, State of Idaho, have petitioned this Board for the calling and holding of a special election for the purpose of voting the maximum bonds to provide funds to improve certain highways within the said highway district, and

WHEREAS, the Highway Commissioners of said district deem it necessary and of advantage to said district to issue said bonds, and

WHEREAS, there are no funds available for said purpose and none can be provided except by the issuance of the bonds of said district, and it is necessary that the cost of such improvements and the purchase price of machinery and material and the expenses of the district in connection therewith, be paid by the issuance of negotiable coupon bonds of said district as herein provided, and in the amounts herein stated, and the sum of Ninety-Five Thousand Dollars (\$95,000) is requisite for the purposes aforesaid, and

WHEREAS, the existing bonded indebtedness of said highway district will have been retired upon the first day of July, 1928, and

WHEREAS, the taxable property of said district as shown by the assessment list for the year 1927, was of the value of \$990,333.00.

NOW, THEREFORE, BE IT RESOLVED and ordered by the Board of Commissioners of Kendrick Highway District, of Latah County, State of Idaho:

1. That a special election be held in said Kendrick Highway District on the date to be hereafter named, at which election there shall be submitted to the qualified electors of the said highway district, the question of authorizing the Board of Highway Commissioners of said district to issue the negotiable coupon bonds of said Kendrick Highway District of Latah County, State of Idaho, in the total principal sum of Ninety-five Thousand Dollars (\$95,000.00) as herein provided.

2. That the object of the issuance of said bonds is to pay the cost of construction, improvement and repair of the highways within said district, described as follows, to-wit:

To construct and improve the highway for a distance of 5.25 miles from Highway Near Swanson Place Rimrock School house, established a five per cent grade, with roadway eighteen (18) feet wide, including a ditch two (2) feet in width, upper side only, leaving a sixteen (16) foot driveway, estimated cost \$68,034.03.

Improving the Brady Gulch road, by establishing culverts bridges and surfacing said road for a distance of two miles and three-fourths (2 3/4) miles, with crushed rock, four inches deep and twelve (12) feet wide, from Kendrick City limits to Deabald and Callison road, estimated cost \$17,446.06.

Improving the Juliaetta grade in the same manner as the Brady Gulch road, for a distance of one and one-half (1 1/2) miles, from Good roads estimated cost \$4000.00.

For the necessary supplies and equipment to carry on proposed work estimated cost \$5519.91.

3. That said bonds shall be issued in denominations of not more than One Thousand Dollars (\$1000.00) and not less than One Hundred Dollars (\$100.00) par value each, and shall be made payable within twenty (20) years from the date of issuance, and redeemable at the option of said Highway District, after the expiration of ten (10) years from

the date of issuance, and that said bonds shall be redeemable in the order in which they are numbered, and that each bond shall have semi-annual interest coupons attached covering the interest on the said bonds, at a rate of not exceeding six per cent (6%) per annum, from the date of issuance until paid, that said coupons shall be payable January first and July first annually. That said bonds shall be known as KENDRICK HIGHWAY DISTRICT BONDS. That each bond shall be signed as provided by law. That each of said interest coupons attached to said bonds shall be executed according to law, and that each coupon shall bear a number corresponding with the number of the bond to which it is attached. That such bonds shall be in all respects executed and shall contain such recitals as may be necessary to make said bonds valid obligations, of the said Highway District, and that each bond shall recite that it is issued by virtue of and in conformity and compliance with the provisions of the Constitution and all laws of the State of Idaho, authorizing such issuance. That said bonds shall be made payable in lawful money of the United States of America, and that, if it is deemed by the Board of Commissioners of said Highway District, to be of advantage and benefit to the Highway District, the bonds will be redeemable serially according to their numbers.

4. That all taxable property within the limits of said Kendrick Highway District as they exist, are, and shall continue to be pledged for the payment of the principal and interest of said bonds and the proper officers of said district must continue to assess and collect on all taxable property within the limits of said district, the necessary taxes to pay the said bonds and interest as the same become due. That the Board of Commissioners of said Highway District shall hereafter annually levy a tax, in addition to all other taxes provided by law, upon all of the taxable property within the said Highway District, sufficient to pay the interest upon all of the said bonds so issued, as it falls due. There shall be levied in addition a sufficient sum to retire Four Thousand Five Hundred Dollars (\$4,500.00) annually of the principal sum of said bonds for the first ten years, and a sufficient sum to retire Five Thousand Dollars (\$5,000.00) annually of the principal sum of said bonds thereafter, until all of said bonds have been retired. All such taxes must be levied, assessed and collected as are other taxes, according to law, until the bonds so issued and the interest thereon are fully paid. That all such taxes so levied and collected for the payment of the principal and interest of said bonds shall be the Treasurer, kept in a separate fund, designated "KENDRICK HIGHWAY DISTRICT BOND INTEREST AND SINKING FUND" and the said fund shall be irrevocably pledged to and used solely for the payment of interest and principal of said bonds. That the Treasurer be, and he hereby is, authorized and directed to pay the first installment of interest maturing on said bonds out of any funds in his hands, not otherwise appropriated.

5. That for the purpose of said election, the whole of said Highway District shall constitute one precinct and the polling places for said precinct is hereby designated to be at the City Hall building in the Village of Kendrick, State of Idaho, within the limits of said district.

6. That the said election shall be conducted as nearly as practicable in accordance with the general laws of the State of Idaho. That the polls shall be open at the hour of eight o'clock in the forenoon upon said election day, and shall remain continuously open until seven o'clock in the afternoon of said day.

That the following be, and they are hereby, appointed judges of said election, to-wit:

GEORGE DAVIDSON

ED LIEN

ED LONG

7. That the voting at such election shall be by ballot and the ballots to be used shall be in substantially the following form, to-wit:

SPECIAL BOND ELECTION HELD IN KENDRICK HIGHWAY DISTRICT 2nd DAY OF APRIL 1928

Mark this ballot in the circle opposite your choice, thus (x)

IN FAVOR OF ISSUING BONDS TO THE AMOUNT OF NINETY-FIVE THOUSAND DOLLARS (\$95,000.00) for the purpose stated in Bond Resolution No. 1 of Kendrick Highway District, passed February 21, 1928, AGAINST ISSUING BONDS TO THE AMOUNT OF NINETY-FIVE THOUSAND DOLLARS (\$95,000.00) for the purpose stated in Bond Resolution No. 1 of Kendrick Highway District, passed February 21, 1928.

8. That notice of said election be given by publication in the Kendrick Gazette, a newspaper of general circulation at Kendrick in said Highway District, and hereby designated in the newspaper most likely to give notice of such election, for ten (10) days prior to the date of said election, and that such notice be in substantially the following form:

NOTICE OF SPECIAL ELECTION

NOTICE IS HEREBY GIVEN THAT: Pursuant to Bond Resolution No. 1 of the Board of Commissioners of KENDRICK HIGHWAY DISTRICT passed and approved on the 21 day of February, 1928, a Special Election will be held in said district on the 2nd day of April 1928, for the purpose of submitting to the qualified electors of said District, who are residents therein, the question and proposal of authorizing the Board of Commissioners of said Highway District to issue negotiable coupon bonds of said District in the principal sum of \$95,-

000.00; that such bonds shall bear interest at a rate not to exceed six per cent (6%) per annum, payable semiannually, until such bonds, principal and interest are completely paid and redeemed; that the proceeds of the sale of the bonds shall be devoted to constructing, improving and repairing highways within the District, to the purchased of materials and machinery therefor, and to the payment of the necessary expenses of the District in connection therewith; that there shall be one precinct and one polling place in the District as follows, to-wit:

The entire Highway District shall constitute one voting precinct, reference being made to the order creating the said District for the boundaries thereof, and the polling place for said precinct is hereby designated to be at the City Hall in the Village of Kendrick in the County of Latah, State of Idaho.

That the polls will be open for such election at the hour of eight o'clock in the forenoon of said day and shall remain continuously open from that time until seven o'clock in the afternoon. Such election shall be conducted as nearly as practicable in accordance with the general election laws of the State of Idaho. Said election shall be by ballots and the ballots shall be substantially the following form, to-wit:

SPECIAL BOND ELECTION HELD IN KENDRICK HIGHWAY DISTRICT 2nd DAY OF APRIL 1928

Mark your ballot in the circle opposite your choice thus (x)

IN FAVOR OF ISSUING BONDS TO THE AMOUNT OF NINETY-FIVE THOUSAND DOLLARS (\$95,000.00) for the purpose stated in Bond Resolution No. 1 of Kendrick Highway District, passed February 21, 1928, AGAINST ISSUING BONDS TO THE AMOUNT OF NINETY-FIVE THOUSAND DOLLARS (\$95,000.00) for the purpose stated in Bond Resolution No. 1 of Kendrick Highway District, passed February 21, 1928.

Given under the direction of the Board of Commissioners of Kendrick Highway District this 21 day of February, 1928.

G. F. WALKER

Secretary

9. That the Secretary be and he is hereby directed to cause the said notice to be published in the Kendrick Gazette and to cause notice of the election to be given in the manner and form and for the time required by law, and that the Secretary be, and he is hereby, authorized and directed to procure and distribute to the election officers, all the ballots and necessary election supplies. That the Secretary be and he is hereby further instructed and directed to cause copies of the notice of the election, and of this resolution, to be conspicuously posted in said precinct prior to the date of such election.

10. That the Secretary be and he is hereby authorized to cause to be published in the Kendrick Gazette, a newspaper of general circulation in said Highway District, and hereby designated as the newspaper most likely to give notice to the tax payers thereof, a copy of this resolution, together with a notice in substantially the following form:

NOTICE

TO ANY AND ALL PERSONS, INDIVIDUALS, FIRMS, CORPORATIONS, OR ASSOCIATIONS, OWNING OR BEING INTERESTED IN ANY OF THE LANDS AND TAXABLE PROPERTY WITHIN THE KENDRICK HIGHWAY DISTRICT OF LATAH COUNTY, STATE OF IDAHO:

You, and each of you are hereby notified that on Saturday, the 10th day of March, 1928, at the hour of one o'clock p. m., at the City Hall of Kendrick, Latah County, State of Idaho, the Board of Highway Commissioners of the Kendrick Highway District will meet to hear any and all objections to the issuance of the bonds provided for in this resolution, and will hear and all objections to the levy and assessment of taxes to pay the principal and interest on said bonds and will hear any and all objections to the assessment of said tax against the property of any and all persons, individuals, firms, corporations or associations objecting to the same.

And you, and each of you, are further notified that you may file written objections in the office of the clerk of said Board, to the issuance of said bonds, at any time prior to said 10th day of March, 1928, and that all such objections will then and there be heard, and that the said Board will then and there hear testimony in support of and opposition to all objections, and that at said hearing, said Highway Board will confirm or set aside the proposed bond issue and tax levy therefor, in whole or in part, or will make such changes in the proposed plan of highway construction, improvement and repair, by enlarging the same or by eliminating parts of such proposed work therefrom, and such changes in the amount of such proposed bond issue, by increasing, or diminishing the amount of bonds so to be issued, as may be determined by said Board, at said hearing, and that at said hearing, the Board will approve and confirm or disapprove of the proposed tax upon the taxable property within such district, for the payment of the cost and expense of such proposed work, and will approve or revise or set aside the tax levied, or to be levied, upon any particular tracts or parcels of land within such Highway District, as it shall deem proper and for the best interests of said Highway District.

Passed and approved the 21 day of February, 1928.

WILLIAM COX

President

Attest:

G. F. WALKER

Secretary.

TO WED YOUNG RYAN

Miss Margaret D. Kahn, second daughter of Mr. and Mrs. Otto H. Kahn, of New York, who will wed John Barry Ryan, Jr., son of Mr. and Mrs. John Barry Ryan, and grandson of Thomas Fortune Ryan, financier and one of America's richest men. The marriage will unite two of the wealthiest and best-known families in the United States. She is an Episcopalian and he is a Catholic.

Preventable Separator

Losses Total Large Sum

What is the annual loss to dairymen from faulty separation of cream from the milk? Unless the dairyman is one who feels that a certain amount of whole milk should be fed to the hogs or chickens, how much butterfat can be considered wasted because it is fed along with the skim milk to these farm animals?

During a single month Iowa cow testers reported that the preventable losses through poor separation in 79 associations totaled \$493,30. The fact that this loss is preventable is reason enough for being interested in the matter, disregarding the fact that the loss amounts to approximately \$6,000 annually to members of the Iowa cow testing associations.

Temporary mishaps in separator operation may cause a slight preventable loss, but, on the whole, the fault usually rests with the separator. A clean separator that is set level, is properly oiled and run at the correct and uniform speed will get the butterfat from the milk as it should and will not contribute to this annual waste.

Winter Protection for Dairy Cows Important

When the cold rains, sleet and snows of winter bother the dairyman, barn roofs prove to be cheaper shelters for dairy cows than the backs of animals. Some classes of stock can be wintered very satisfactorily out of doors in stormy weather, but exposure to such weather will immediately cause the dairy cow to decrease her milk flow. In addition to a decreased milk flow the cow will be required to consume more feed in order to maintain her body heat, both resulting in increased feed consumption in proportion to the amount of milk received.

Dairy Notes

Cow-testing associations have proved beyond a question that with the silo, cheaper milk can be produced.

The feeding of well-cured hay will do more to keep up the health of the dairy herd than any other single factor.

Acids of silage serve as a tonic and aid digestion and assimilation. Silage in the ration, therefore, not only is a food, but a tonic and a stimulating influence for production and growth.

No risk should be taken with a dairy-bred bull in any way that would give him a chance to get his killing instinct started.

Temperature of barns will remain more uniform, stock will be healthier, and the frost nuisance will be practically eliminated by good ventilation.

Big Machinery Saves Much Manual Labor

Comparison Is Made From Records in Nebraska.

One of the best reasons why big teams and big machinery are popular is given in the annual report of the farm records that were kept last year under the direction of the Nebraska Agricultural college. Two farms in Dodge county are compared to show that one man made \$5.32 profit per acre from his corn while another man, even though he got a higher yield, made only \$2.21 per acre.

The first man used four-horse teams and two row implements, while the second planted and cultivated his corn with two-horse teams and one row machinery. The first man had 100 acres in corn, the second only 40. The first got 50 bushels per acre yield while the second got 60 bushels, but the first spent only six hours of his own labor and 25 hours of horse labor per acre while the second man spent 12 hours of man labor and 38 hours of horse labor, per acre.

In making this comparison, the agricultural college men, Mason Yerkes, and A. W. Medlar, who had charge of the farm records work, made it clear that the comparison of how two farmers raise corn may not be a complete comparison of their entire farms' profits, but that so far as the corn crop was concerned the man with the bigger teams is actually making about five times as much net profit in the year. He had 100 acres averaging \$5.32 profit per acre, or \$532. The other man worked on 40 acres and made but \$2.21 per acre, a total of \$88.40.

Small Flock of Sheep Found to Be Profitable

The live stock requirements of no corn belt farm are complete without at least a small flock of sheep, preferably breeding ewes. There is no other animal a farmer can own that will make use of as much feed that would otherwise go to waste, and no hired man who will mow weeds as cheerfully or as thoroughly as will the sheep. A great many farmers complain that their fences are not arranged for handling sheep, but in the main this excuse is largely imaginary. Of course in order to handle a large flock it is necessary to have good sized pastures, but for the average farmer who operates from 20 to 100 acres, the keeping of from 10 to 15 ewes requires nothing more than the ordinary barn lots, door-yard and orchard fences. Barring a mighty keen appetite for rose bushes and other shrubbery about the yard, sheep make by far the most profitable and consistent lawn mower imaginable for yards either large or small. Shrubby of course may be protected by wire netting drawn about it, or by movable frames which may be shifted into position when it is desired to "mow" the lawn. The flock may be moved about the place from day to day as desired, and all lots may be cleaned up of noxious weeds that other stock will not eat. When the potato vines begin to die down the flock may be turned into the patch to clean up the careless weed and fox-tail which nearly always spring up after cultivation ceases, thus doing away with the necessity of having to mow and rake the patch before digging the spuds.

Bees Need Protection From Cold in Winter

Bees require protection from cold in winter the same as most animals, according to Iowa State college.

For helping bees get through the winter, the minimum requirements of food for a good colony is 60 pounds, and it is better to have more. Only stores of the best quality should be used. As to the bees, the ideal condition would be to have all of them emerge just prior to the last killing frost, so that their full strength will be available for winter heat production and leave sufficient energy to give the colony a good start in the spring. It is best to introduce the queen in late summer.

Two general types of winter protection are used; the indoor or cellar and the outdoor or case. If conditions are satisfactory, cellar wintering of bees is a sound practice. Where bees are to be wintered outside, a windbreak of some kind is very important. For real outdoor protection the case method is essential.

Blighted Trees Should Be Treated in Winter

Blight is a bacterial disease caused by a bacterium growing in the inner bark. It girdles the twigs, so that the top has to die and the leaves appear as though scorched with fire. The only remedy is to keep the tree as thrifty as possible but not growing too fast. It is customary to sow oats or barley between the trees in June so as to assist in ripening the apple wood in the fall. This checks the growth of the blight. Some varieties of apples blight more than others.

In the winter time all blighted wood should be cut off and burned and then the trees looked over for cankers. These are places along the trunk and larger limbs where the disease is working. From these places the germs come out next spring to spread to other trees. These may be cut out and sterilized with corrosive sublimate or formaldehyde.

Heavy Oat Yield Costs Few Cents

At Least Five Additional Bushels to Acre May Be Had by Testing Seed.

Two and a half cents' worth of formaldehyde may add at least five additional bushels to the acre oat yields on many farms.

This is the average cost of treating for smut enough seed oats to sow an acre. This disease causes a large annual damage to the crops, taking a toll on some farms of as much as 10 out of every 100 bushels of grain, according to R. E. Vaughan, plant disease specialist at the Wisconsin College of Agriculture.

Treat Barley for Smut. Barley may also be treated with formaldehyde for smut. A pint or pound of the formaldehyde, obtainable at most drug stores, is added to 35 gallons of water. This solution may be sprinkled on the seed or the seed may be soaked in it for five minutes. Both methods give satisfactory results, Vaughan reports.

When preparing the seed for treatment, it should be thoroughly fanned in order to remove the light-blighted kernels, smut spores and dirt. After treating, the grain should be covered for two hours and then dried by spreading in on a clean strip of canvas. While the seed is damp, Vaughan cautions that care should be taken that it does not freeze nor heat, as either one of these conditions injure its germination power.

Seed Ready to Sow. The seed is ready to sow in 12 to 24 hours after treatment. If freshly treated seed is sown, Vaughan says the seeder should be opened so that three-fourths bushel more oats and one-half bushel more barley are sown to an acre than usual, this due to the fact that the seed has swollen during the treating process.

Feed Fowls Yellow Corn for Production of Eggs

Yellow corn is proving superior to white corn in rations for egg production. It is also much better for growing chicks. The beneficial effects of yellow corn are thought to be due to the fact that it is richer than white corn in vitamin A, a substance essential for normal growth of chickens.

When the hen's ration is deficient in vitamin A she is likely to develop eye trouble similar to roup, and lay fewer eggs which would hatch poorly if incubated.

If white corn is fed, the vitamin A deficiency may be corrected in a ration for hens by feeding green feed at the rate of one cubic inch per hen per day. Baby chicks cannot eat

enough green feed to completely correct the vitamin A deficiency if white corn is fed. The deficiency can be supplied to chicks by adding cod-liver oil to the mash at the rate of 2 per cent by weight.

Narrow Type of Shed Is Useful for Implements

At this time of year every farm machine or piece of equipment not needed should be under shelter with a card showing what adjustments and repairs are needed. Even a well-roofed straw shed is better than none, but often a shed does not give full protection.

Consider annual cost over a period of years rather than first cost, and use the materials at hand which will give the longest life and least upkeep at the lowest first cost. Reinforced concrete, concrete blocks, hollow clay tile, galvanized iron, lumber, and so on, should all be considered.

The long narrow type of shed is most usable and convenient about moving machines in and out. Square sheds waste space, especially if a driveway must be kept open. Round sheds are even less desirable. Long narrow sheds can be started small and added to as needed.

Shaw's "Double" Is Soap-Box Orator

London. — George Bernard Shaw has a double who is a soap-box orator.

For some months before Shaw moved from Adelphi terrace to Whitehall court the tall, gray-bearded man who so greatly resembles the famous novelist was frequently seen in the vicinity of Shaw's flat on the Thames embankment. Now he has appeared near Whitehall court, often mounting his street-corner rostrum to address men and women who think they are listening to Bernard Shaw himself. Lloyd George has several doubles in London, as have even the prince of Wales and Queen Mary.

POULTRY FACTS

GROUND WHEAT IS GOOD FOR LAYERS

Poultrymen with home-grown wheat can often use ground wheat in the laying mash with good results. It saves buying broiler bran and middlings. The best results come from substituting 150 pounds of ground wheat and 50 pounds of bran for the 100 pounds of bran, plus 100 pounds of middlings. A good home-grown laying mash can be made of 100 pounds of ground corn, 100 pounds of ground oats, 150 pounds of ground wheat, 50 pounds of bran, and 100 pounds of meat scrap.

When plenty of skim milk or buttermilk is available, the amount of meat scrap in the mash can be reduced one-half. In that way the farmer raising wheat, corn, oats and milk, can make up 500 pounds of laying mash by purchasing 50 pounds of meat scrap and 50 pounds of bran.

The home-grown mash is greatly improved by adding minerals in the form of 2 per cent ground limestone, 2 per cent bone meal, and 1 per cent fine table salt. The use of minerals tends to improve the strength and quality of the egg shells, thus avoiding the egg-eating habit in the flock, as well as the production of soft-shelled eggs. Some poultrymen believe that more minerals and less meat scrap will be the tendency in making egg mashes within a few years. Their cost per pound is so small, considering their value, that they should not be omitted from the home-made mashes.

Blindness in Ducks Is

Blamed on Impure Water

When ducks have access to a lake, pond or river there are no cases of sore festering eyes which later may develop into blindness. The birds dip their heads deep into the water and the eyes are cleansed of any dirt or sticky feed that has adhered to them.

Ducks without a natural supply of water should be given their drinking water in deep dishes or crocks so that they can rinse out their eyes whenever they drink. This also tends to rinse the nostrils and prevents the clogging with feed which is serious if the bird catches cold about the same time.

Ducklings sometimes have colds which cause a sticky discharge from the eyes. The mucus can be absorbed with small wads of tissue paper and the eyes washed with witch hazel or boric acid solution. Deep drinking dishes will help the bird to take care of its eyes and nostrils and probably prevent the necessity of treatment.

Soft-Shelled Eggs Are

Caused by Wrong Feed

Probably one of the most annoying things in the poultry business is the frequent laying of soft-shelled eggs by a group of hens, or even only one hen. It is a sign that something is unprofitably and radically wrong with the hens—something that should be righted immediately. And as for the eggs themselves, they are perfectly useless and merely represent a loss in good food.

In nine cases out of ten, a hen lays soft-shelled eggs because there is a lack of lime in her diet. This mineral is really pure egg-shell material. Therefore, its absence from the diet results in either thin-shelled eggs or eggs with no shell at all. Of course, calcium carbonate is generally present in the food and water given to the hen, but there is seldom enough to satisfy her needs.

Poultry Notes

The feeding of milk will help in the size and quality of egg.

Eggs should never be washed—washing spoils their keeping qualities.

Poultry meat has never been so low in price as to be unprofitable. Cull your flocks closely and cash in. Quit feeding the non-producers.

Poultry keepers who have used the all-mash method of feeding chicks and growing pullets may continue the method for laying pullets.

One of the advantages of the shed roof type of poultry house is that it is easier to keep warm. Any room with a high ceiling is likely to be drafty.

Tankage or sour milk must be fed if eggs are to be produced in satisfactory quantities. Too many hens are not laying simply because the farmer will not help them lay.

Electric lights may be used to advantage. A warm moist mash fed in the evening, especially in cold weather, may prove beneficial.

If chickens begin eating their eggs it is usually because they need starch. Purchase bulk laundry starch and put it in a dish in the coop.

Some hens do not eat enough oyster shell. The 2 per cent limestone helps to prevent soft-shelled eggs and the leg weakness which sometimes bothers hens in the spring.

REPAIRS

WE make a sincere effort always to have on hand an adequate stock of GENUINE IHC Repairs for McCormick-Deering Farm Operating Equipment. We are in position to meet every reasonable repair demand on short notice. Nevertheless, there are definite advantages to you in ordering your parts and repairing your machines during the slack season rather than when you are in desperate need of the machines.

We suggest that you look over your equipment and order your GENUINE IHC Repairs now.

Fault Not His

"We don't understand some of the things you said in that speech of yours," remarked a constituent to the member of the legislature. "Then," replied the member gently, "you should not find fault with me. What you do not thoroughly understand you cannot intelligently disapprove of!"

DAIRY

AVERAGE COW IS "STAR BOARDER"

The average cow of the 300,000 in the United States' cow-testing associations is a "star boarder," and not just a "boarder cow," according to Dr. C. W. Larson, chief of the bureau of dairy industry, United States Department of Agriculture. She returns an income over the cost of her feed of approximately twice that returned by the average cow of the country, explained Doctor Larson when outlining a program for increasing production of milk at reduced costs.

"Although the annual consumption of milk per person grew from 43 gallons in 1920 to 55.3 gallons in 1926, Americans still are almost 50 per cent below the minimum consumption declared desirable by those who know. The average cow-testing association animal produces 7,500 pounds of milk per year, as against 4,500 pounds given by the country's average cow.

"High producing cows are economical in the use of feed. A tabulation of more than 100,000 individual cow records shows that cows producing 9,000 pounds of milk per year did not eat twice as much as cows that produced 4,500 pounds. They ate approximately 40 per cent more feed in dollar's worth of feed per cow to produce twice as much milk and butterfat. Cows in the 9,000 pound production class ate only about 40 per cent more digestible nutrients than cows that produced half as much."

Successful dairymen everywhere resort to correctly compounded feeding mixtures to obtain the high milk yields Doctor Larson described. For cows on pasture a much-used ration is ground oats and barley or hominy, 200 pounds each, and wheat bran and linseed meal, 100 pounds each, 1 pound fed for each 4 or 5 pounds of milk. Another popular ration is ground oats, 400 pounds, barley or hominy, 300 pounds and wheat bran and linseed meal, 200 pounds each, fed in the same way.

Feed, Breed and Weed Cows, Says an Expert

The time-worn slogan for the dairy farmer, "Feed, breed and weed," deserves to be called to mind at the beginning of a new year, for upon these three principles depends the degree of success to be attained with dairy cows, says J. P. LaMaster, chief of dairying, Clemson college.

At present a good spread between feed prices and the price of dairy products makes it pay to feed liberally, using as much home-grown and locally produced feeds as possible.

Only registered bulls from high-producing ancestry should be used in any herd. Do not waste time and money raising the daughters of scrub and grade bulls even though these daughters are out of good cows. Remember that each calf gets half of its inheritance from each parent.

While breeding and feeding deter-

mine the profit or loss of the individual, the herd's ledger balance must depend on elimination of those cows so poorly endowed with dairy blood that good care and feeding cannot make them profitable.

Stanchions for Calves

Very Handy in Feeding

Feeding young dairy calves without stanchions is almost as unsatisfactory as trying to milk cows without having proper stables. Stanchions for the calves may be made very much like the ordinary rigid stanchions for cows, except smaller. A feed trough should be placed in front, with divisions to keep the feed for each calf separate. When feeding time comes, the calves are put in the stanchions and a pail of milk is set in the trough for each calf. After the calves have finished drinking the milk, the proper amount of grain is put in the trough and the calves are allowed to remain until they have eaten their portion. This will usually prevent the calves from acquiring the habit of sucking each other.

Calf stanchions are usually made from 36 to 42 inches high and 28 inches from center to center. A space of 4 1/4 inches is approximately correct for the neck.

Calves in Winter

Calves which are dropped during the winter and early spring should have warmer quarters than the ordinary shed will provide. It will pay to partially close up one end of the shed, leaving spaces in the partition for the calves to enter. These quarters for the calves should be kept well bedded. The calves will begin to eat grain after they are a few weeks old, and it is usually profitable to provide a creep where grain may be supplied.

Removing Warts

Warts on cows' teats can be greatly benefited by smearing them with olive oil several times a day. This treatment will likely remove most of them. It will also relieve the pain so that milking can be done more satisfactorily. Those warts that are not removed by this treatment can be cut off with a pair of sharp scissors and the sore touched with a stick of caustic potash. Removing warts by cutting them off should only be done when the cow is dry.

Gold Nuggets in Turkey Start Search for Lode

Red Lodge, Mont.—Discovery of gold nuggets in a turkey prepared for Christmas dinner by Mrs. A. Pollard has started prospectors on a search for the mother lode.

Eight nuggets, weighing 30 grams and valued at about \$3, were found in the turkey. The fowl was raised on the Paul W. Cartright ranch, two miles from Red Lodge. Red Lodge is in the district where placer miners obtained millions of dollars' worth of dust in pioneer western days.

SHOWS MONKEYS CAN LEARN TO JUDGE TIME

Scientist Tells of Interesting Experiment.

Columbus, Ohio.—Two little monkeys, whose names for publication are abbreviated to A and P, have assisted a psychologist to demonstrate that monkeys can judge time. They have also shown that if they are typical examples of their kind the feminine monkey has a little better sense of time than the masculine.

The two monkeys learned not to reach for a piece of banana displayed in a tin can when a sound hammer measured off a second and a half interval just before the can was shown. And they learned to take the banana out of the can when four and a half seconds were sounded off just before the food appeared.

Dr. Herbert Woodrow of the University of Oklahoma, who reported this experiment before the American Psychological association, said that after 2,600 trials the female monkey, A, responded correctly in 92.5 per cent of instances, and after 3,600 trials monkey P, the male, made a record of 90 per cent. The experiment was conducted for a short time each day for more than a month.

Scolded Into Knowledge.

The monkeys were discouraged from making the wrong response chiefly by scolding and being told "No." Doctor Woodrow said. After about five days monkey A began to bat with her paw on the screen which covered the can while the time interval was sounded. This batting, Doctor Woodrow stated, was quite irregular, but it developed into a habit, so that she batted once or twice during the shorter interval and much oftener during the longer interval. As a result of being scolded when she reached for the food at the wrong time this monkey developed a vacillating type of behavior, reaching out and fidgeting the rim of the can even when she finally decided cor-

rectly not to try to take the banana. Monkey P, toward the last days of the experiment, began to pull at the brown felt on which the food can rested, and after that pulling at the felt became his regular procedure. If the correct response was to take the food he would pull at the felt and then quickly seize the banana and eat it. If the signal was not to take it he would pull at the felt and then rest his paws on the bars of the cage.

New Test for Spellers.

The old-fashioned spelling bee at which supremacy in spelling was fought over and proved by reciting out triple-jointed words can now be replaced by a much simpler ordeal. A new scientific test to measure spelling ability devised by Dr. J. E. W. Wallin of Miami university was described before the association.

A child who possesses marked spelling ability ought to be able to spell phonetic words of increasing difficulty without much instruction after he has mastered the simple mechanics of spelling, Doctor Wallin said, but he might not be able to spell unfamiliar words that are spelled quite differently from the way they sound. Reasoning along this line, he selected a list of 450 words that are spelled just as they sound and had them tried out on more than 5,000 school children from the second to eighth grades.

A child who can spell correctly all the words in the test that children of his grade usually get is an average speller. If he can spell more difficult words he is a superior speller, and his degree of superiority can be gauged by the extent to which he applies his simple knowledge of spelling to working out the phonetic spelling of longer and unfamiliar words.

General intelligence tests are useful in predicting a child's capacity for general education, Doctor Wallin said, but special tests are needed to diagnose a child's possibilities in each type of learning, and such tests should be given early in the child's school career.

Veteran Gets Pension

•Fifty Years After War
St. Peter, Minn.—More than half a century after leaving the Union army a Civil war veteran, confined to the State hospital here, has been identified and granted the federal pension accorded those honorably discharged.

He is Charles W. Beals, eighty-three, who has been under a mental cloud virtually since finishing Civil war duties with Company I, Fifth New York Field artillery. He has been at the hospital 24 years.

Beals formerly resided at Redwood Falls, Minn., where he lived alone as a hermit, frequently donning his uniform and telling of war service, but unable to tell what his command had been. Eventually Julius Schmah, state treasurer, took an interest in the case and began to delve into the rosters of union regiments.

Identified as an honorably discharged veteran, Beals has received a check for \$3,672 for back pension and will get \$72 per month. His condition makes it necessary that he remain here, but relatives plan to keep the money in trust for his benefit.

Wolves Eat Girls

Vienna.—Neue Freie Presse publishes an unconfirmed report that 11 peasant girls of the Czechoslovakian town of Maramoros Sziget were devoured by wolves when returning from a neighboring village through the forest.

Linden News

LOCAL NEWS

Mr. and Mrs. Arthur Mounce shipped their farm equipment to the Peace River country in Canada the first of the week. They will make their home there.

Miss Amy Carlson of Moscow has been visiting her brother, A. K. the past week.

Mr. and Mrs. Louis Westcott of Lewiston spent Sunday here with friends.

W. B. Deobald returned Monday evening from Spokane where he attended the auto show.

Miss Peterson, superintendent of schools of Latah county made her annual visit of the Kendrick schools Monday of this week.

Hugh Stanton, accompanied by his brother, Sam, went to Spokane the first of the week to consult a specialist. Hugh has not been at all well for some time.

Edgar Dammarell has moved to the Methodist parsonage, taking possession the first of the week.

Frank Boyd has purchased a new Chevrolet sedan and expects to take delivery of same in a few days.

Mr. and Mrs. Thorvald Nelson were Moscow visitors the last of the week.

Rev. Charles Miller of Moscow, district superintendent of the Methodist church, attended the quarterly conference of the local church last Sunday.

Mr. and Mrs. E. H. Emery were Lewiston visitors Wednesday of this week.

Mrs. Egnaz Flaig and baby of Orofino arrived this week to visit relatives.

Rev. Gamble of Juliaetta was transacting business in Kendrick last Wednesday morning.

Stewart Compton of Orofino visited his parents here for a short time Wednesday morning returning home on the afternoon train.

Don't fail to take in the baseball benefit dance at the Tempit tonight. You are assured of a good time.

Mrs. Joday Long, Elbert and Lillian drove to Pullman last Sunday to attend the wedding of Miss May Seals to Mr. George Gannon, cashier of the Pullman State Bank. Immediately after the ceremony the bride and groom left for a honeymoon trip covering a period of a month.

Mrs. Ruth Kennedy and two children, who have visited for several weeks at the home of Mr. and Mrs. Walter Thomas, went to Seattle, Monday of this week.

Mrs. Grant Evans and children returned to their home at Auburn, Wash., yesterday morning, after visiting Mrs. Evans' parents, Mr. and Mrs. Julius Petrick.

Wm. Morgan of Lewiston was looking after business interests here Wednesday of this week.

Eleanor Herres entertained a number of friends at a leap year party last evening at her home. A jolly evening was spent by the young people. Games served to pass the time very pleasantly, after which dainty refreshments were served.

Mrs. Laura Hamley, a former resident of Kendrick, now living in Spokane, arrived yesterday to look after property interests here.

Mr. and Mrs. Pete Stump of Crescent returned yesterday from Pullman where they were called last week by the critical illness of Mrs. Stump's father, Felix Nichols. Mr. Nichols passed away last Tuesday at the age of 83 years. He was a veteran of the Civil War. For a number of years he was an extensive land owner near Moscow but sold out his interests there and invested in Montana lands.

Giant Wanted

An Eastern movie magnate visited his studio, where one of the companies was making a picture dealing with France during the last days of the Revolution. He spied the actor impersonating General Bonaparte—for the sequence being filmed had to do with the suppression of the mobs in Paris by the future Emperor. "Who's the guy?" asked the film magnate, pointing to the ac-

tor. "Why, that's Napoleon!" explained the director. "Why did you get such a little man to play such an important part?" lamented the magnate.—Exchange.

Band Shows Progress

Bandmaster Thomas reports splendid progress in the band rehearsals held lately. There is a splendid attendance and everyone is keenly interested. By the time warm weather comes the band will be in shape to furnish concerts. Their first appearance will probably be some time the first of June.

I. O. O. F. Held Big Meeting

The local Oddfellow lodge held a big meeting last Saturday evening with an unusually large crowd present. The degree team of the Lewiston lodge put on the degree work on two candidates from Leland lodge. After the lodge work a fine lunch was served. There were visitors from Lewiston, Leland and Juliaetta.

The New Kendrick Theatre

Famous Relic of Past

The Circus of Romulus of Maxentius, built in 311 A. D., is the most perfect circus surviving. It is 1,580 feet long and 260 feet wide. The outer wall remains almost complete, and the central spina, 892 feet long, can be traced throughout. At the west end, between two towers, are the chief entrance and 12 pens (carceres) for competing chariots; the east end is semicircular.
