

CIRCULATING PROTESTS AGAINST ROAD PROGRAM

Petitions Being Circulated in Kendrick Highway District.

Petitions are being circulated in Kendrick highway district this week by John Woody and Martin Thomas, protesting against the allocation of funds of the proposed bond issue as stated in the resolution passed by the highway district commissioners and published in this issue of the Gazette.

The petition, or protest, asks that the funds be distributed as follows: Bear ridge, \$40,000; Brady gulch grade, \$20,000; American ridge-Juliaetta grade, \$15,000; Cedar creek road, \$10,000; Little Bear ridge, \$5,000; Texas ridge, \$5,000. The protest is apparently a compromise measure and looks comparatively harmless on the face of it, but an opinion rendered Wednesday by a prominent attorney, is to the effect that if this protest is liberally signed and presented to the highway commissioners at the protest meeting to be held March 10, the proposed bond election will be automatically killed. It is reasonable to suppose that those who are responsible for this protest are aware of the fact, otherwise why were these petitions not circulated and presented to the commissioners before the proceedings were so far along that they could not be changed?

There is little question that if a straight-forward remonstrance against the proposed bond election were circulated over the district, it wouldn't "get to first base". The sentiment in the district is heavily in favor of bonding in order to get the important main trunk line roads on a decent grade and out of the mud.

Mr. Woody was actively engaged in circulating the protest on American ridge. He secured a large majority of the residents of that section. So far as we have been able to ascertain, not a single Kendrick business man had signed the protest up to the time the Gazette goes to press.

It gives rise to speculation just what the sentiment of the people of American ridge will be when they find that the protest which they signed carries a "wallop" that will put the bond election completely out of business. It doesn't seem reasonable that all of the people of American ridge are in favor of turning down a proposition that would provide them with a surfaced grade up Brady gulch and also one to Juliaetta. The resolution, comprised in the original proceedings of the highway commissioners as advertised in the Gazette, carries with it this assurance because of the funds allocated for this purpose.

The resolution passed by the commissioners at a recent meeting and published in the proceedings in last week's Gazette and also in this issue, calls for voting bonds for \$95,000 at an election to be held April 2. The proposed allocation of funds is as follows: \$68,034.03 for a 5 1/2 mile grade on Bear ridge and \$17,446.06 for the Brady gulch grade on American ridge. The reason for placing the stated amounts on these two projects is because they are the estimates furnished by engineer Van Arsdol. The commissioners believe they can make a big saving on the construction of the Bear ridge grade and this would be reallocated on the improvement of the Cedar creek road. The resolution also provides for the expenditure of \$4,000 on the 1 1/2 miles at the upper end of the American ridge-Juliaetta grade and for \$5519.91 for necessary supplies and equipment.

While the above proposed allocation of funds no doubt has its faults, the fact still remains that it is along the line that has been advocated here for several years, to build the most important grades first and then take care of those that receive less travel as fast as funds are available. Anyone who is familiar

Elect Baseball Manager

At a meeting of the executive committee and baseball players, held last Tuesday evening, Ira Bolon was elected manager for this season. Mr. Bolon served as manager last season in a very satisfactory manner. He will have charge of the team and the executive committee the finances.

The ball fans here are enthusiastic about the prospects for the present season. Already a goodly list of players have signed up with Kendrick. Glenn Flesher, the best pitcher in either the Valley or Central league last season, has signed up to play here. He will make a stalwart foundation upon which to build a fast team.

with the topography of the country embraced within the boundaries of the Kendrick highway district, realizes that the road problem is an extremely difficult one and not easy of solution. It would be simply impossible to line up a road program that would be satisfactory to all parts of the district, unless there were half a million dollars or more available to transform the 100 miles of road embodied within its boundaries, into surfaced highways so that every resident of the district might be served equally. This desirable condition not being obtainable, those who are in favor of good roads feel that the proposed bond issue and allocation of funds will offer a reasonable solution and provide good roads over the more heavily traveled portions of the district.

The following is a copy of the protest that is being circulated:

"PROTEST"

"We the undersigned persons, individuals, firms, corporations and associations owning and interested in lands and taxable property within the Kendrick Highway District of Latah County, State of Idaho, do hereby protest in writing the distribution of the proceeds of the sale of the proposed highway district bonds to be authorized by a special election to be held in said district on the 2nd day of April, 1928, and we do hereby protest against the expenditure of \$68,034.03 on the 5.25 miles of highway from Swanon place to Rimrock school house and we the undersigned respectfully submit the following to be a fair and equitable distribution of the proceeds of such bond issue, if the same is authorized by vote of the tax payes, to-wit:

"There should be spent on Brady Gulch Road out of the proceeds of such funds the sum of Twenty Thousand Dollars (\$20,000.00).

"There should be spent from the proceeds of such bond issue, if sold, Fifteen Thousand Dollars (\$15,000.00) on what is known as the American Ridge Juliaetta Road.

"There should be spent from the proceeds of the sale of such bond issue the sum of Five Thousand Dollars (\$5,000.00) upon the road from Kendrick to what is known as Little Bear Ridge.

"There should be spent out of the proceeds of such bond issue the sum of Ten Thousand Dollars (\$10,000.00) on what is known as the Cedar Creek Road.

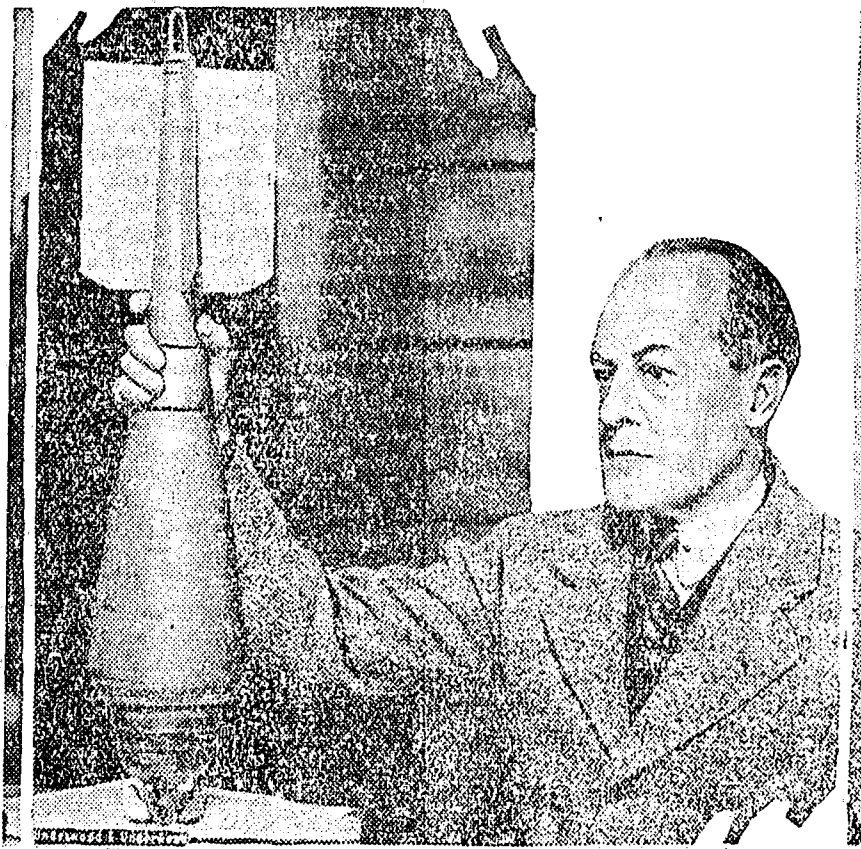

"There should be expended from the proceeds of such loan the sum of Five Thousand Dollars (\$5,000.00) upon the grade to what is known as Texas Ridge.

"And the balance, or Forty Thousand Dollars (\$40,000.00), of the proceeds of such bond issue, and no more, should be expended upon the grade or road leading to what is known as Big Bear Ridge.

"By the distribution of the funds as above set forth each community will, as nearly as practicable, receive benefits from such bond issue commensurate with the amount of taxes which will be paid by the various communities within said highway district.

"We agree to support an election which will authorize the vote of Ninety Five Thousand Dollars (\$95,000.00) of bonds if the money is distributed in accordance with this protest."

Small Bombs Sink 5,000-Ton Ship

Gen. F. B. Foulis, assistant chief of the air corps, holding a twenty-five pound fragmentation bomb of the type used in sinking a 5,000-ton freighter off Panama during maneuvers. The sinking of the ship by the small bombs came as a surprise to air corps officers and may mean important changes in air combat.

Masons Had Good Program

At the stag party, held by the local Masonic lodge Thursday of last week, a very enjoyable program was rendered. Musical numbers were given as follows: vocal solo by Mr. Ramey; mouth organ selections by Rev. Taber; violin solos by Amiel Peters with Mr. Walter Thomas accompanist. Several highly amusing vaudeville numbers were then given by Messrs. Oldfield and Shumaker of Pullman. Their act was called "Black Magic" and presented a varied program that was enjoyed immensely. These two vaudeville artists have exceptional talent and are very much at home on the stage.

Will Discontinue Dairy

Walter Housley stated this week that after today he would discontinue the dairy business in Kendrick. That owing to the fact that there are so many people selling milk in town it has cut down his volume of business until it ceases to show a profit.

Mr. Housley has rented the Jack Bailey place on Texas ridge and will engage in farming on shares with Mr. Bailey. He expects to take his dairy herd to the ranch.

It is to be regretted that Mr. Housley has been forced to quit here as he ran an exceptionally good small town dairy. There will be many families greatly inconvenienced by Mr. Housley leaving.

Idaho Automobile Taxes Low

Genesee News: Idaho has the lowest tax on automobiles of any western state except Arizona, it was shown in tabulations completed by the state department of public works. Idaho's average license plate tax is \$14.63, while the average gasoline tax of \$15.79 on the four-cent levy brings the total to \$30.42.

Idaho is one of the thirteen states of the Union without a property tax on automobiles.

In Florida the average paid by the automobile owner is \$60.10, while the Californian pays a total of \$32.75 on plate, property tax and gas taxes. Oregon's total average tax is \$40.03, while Utah's average is \$31.59.

New York, without property or gasoline taxes, has the lowest cost—\$15.86—of any state in the Union.

Behrens Rents Garage Building

Wm. Behrens, local Cletrac dealer, has rented the building formerly occupied by Main Street Garage and will use the building for housing his tractors and implements. He received one of the new Baldwin combines this week and will have an announcement in next week's Gazette concerning the date of a demonstration to be held in the near future.

Noxious Weeds Menace Potlatch

Wade Keene stated this week that unless some definite action is taken in the near future against the Canadian thistle and wild morning glory, these weeds will present a real menace to the landowners of this section. He says that both on American ridge and Bear ridge these noxious weeds are getting started and that there is no organized effort to eradicate them.

Mr. Keene says that his father, on a recent trip east, saw farm after farm in Indiana that had been abandoned because the Canadian thistle had taken the land.

Last summer he experimented with a method of killing wild morning glory and got very good results, but it requires constant attention to prevent the small patches from spreading to such an extent that it would entail too much expense to clean the land.

There is a noxious weed law in this country, but apparently it is not being enforced.

Installed New Phone System

Troy News: On Saturday, February 18, at 7:30 p. m., the local telephone company installed its equipment from the magneto system heretofore operated, to the more modern central battery system. The change was effected within five minutes. The old directories were in use until 7:25, and five minutes later patrons of the company were calling numbers from the new directories and receiving service over the new system.

The equipment which has been installed by the Troy Telephone company is of the latest type, and Troy has the distinction of being the first town of its size in Idaho to discard the old magneto and install the central battery system. This speaks well for the enterprise of the company and attests their desire to serve their patrons with utmost efficiency. The new switchboard is twice the capacity needed at present time and thus provides for future increase of business.

O. E. S. Held Enjoyable Dance

The local chapter of the Eastern Star held a delightful dance at the Fraternal Temple last Tuesday evening with a very large crowd present. It was a leap year dance and it is reported that a number of the popular men present were pretty well fagged out before the evening was over, particularly Leland Honck, who left the hall until he could catch his breath. At midnight a splendid lunch was served by the ladies.

Wade Keene went to Moscow, yesterday morning to visit with his parents, Mr. and Mrs. Lafayette Keene.

Juliaetta Baseball Benefit Dance

The management of the Juliaetta baseball team will give a benefit dance at the Fraternal Temple in Kendrick next Friday evening, March 9. Owing to the fact that arrangements could not be made to secure the hall at Juliaetta for that date, it was decided to hold the dance here. Juliaetta folks patronized the Kendrick baseball dance last Friday in a very liberal manner. Kendrick should return the courtesy.

LOCAL NEWS FROM THE LELAND COMMUNITY

Items of Interest From The Busy Potlatch Center.

The piano pupils of Mrs. Geo. H. Gibbs gave a recital the evening of the twenty-fourth. The program was as follows:

Piano duet: "The Cedar Brook Waltz", Nellie Woodward and Clifford Woodward.

Piano solo: "Mountain Valley Waltz", Dwight Hoffman.

Piano solo: "The Jolly Farmer", Eileen Smith.

Reading: "The Second Hand Girl", Clema Calvert.

Piano solo, Waltz, by Clifford Woodward.

Vocal duet: "Sunbonnet Sally and Overall Jim", Eileen Smith and Clifford Woodward.

Piano solo: "Brighten the Home", Allen Hoffman.

Piano solo: "Evening Shadows", Nellie Woodward.

Vocal solo: "Douglas Tender and True", Jennie Flesher.

Reading: "Not Quite Six", Milo Calvert.

Reading: "Three Little Kittens", Betty Hoffman.

Organ solo: "Old Kentucky Home", Lizzie Hoffman.

Pantomime: "Coming Through The Rye", Eileen Smith, Clema Calvert.

Piano solo: "Echoes From the Old Homestead", Georgina Smith.

Piano duet: "The Church in the Wildwood", Georgine Smith and Eileen Smith.

Following the program diplomas were presented to the pupils who had completed various stages of the work. Refreshments of cocoa and wafers were served to the pupils and patrons.

The Glee Club met with Mr. and Mrs. Calvert. A pleasing special was a vocal duet with Ukelele accompaniment, given by Misses Nellie and Wilhelmine Goudzward. Sherbert and cake were served as refreshments.

Everyone is invited to the play "Mrs. Briggs of the Poultry Yard", this Friday evening. Many a hearty laugh is promised.

Miss Georgine Smith was taken to a Lewiston hospital, Tuesday. An attack of appendicitis is feared.

Resemblance

A teacher was giving his class a lecture on charity. "If I saw a boy beating a donkey," he said to one lad of the class to give his talk a point of actual, practical demonstration. "If I saw a boy beating a donkey, I stopped him from doing so, what virtue would I be showing?" "Well," replied the lad with a touch of uncertainty, "I suppose—brotherly love." — Wichita Eagle.

Baseball Dance Big Success

The baseball benefit dance at the Temple last Friday night was a great success from every standpoint. The management deserves great credit for the splendid manner in which the dance was conducted. Perfect order was maintained and in consequence everyone reported a fine time. Nearly \$80 was turned into the treasury of the ball team from receipts of the dance.

Main Street Garage Moved

Paul Schulze, proprietor of the Main Street Garage, has moved his headquarters to the building west of the Kendrick Hardware Co. He is now established in his new location.

ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

J. R. King, wife and son, drove to Lewiston Monday, returning home the following day.

Harold Whiting, who has been in Clarkston for some time, returned home Monday. He reports his mother as being a very little better when he left.

Floyd Russell and wife went to Lewiston last Friday, returning Tuesday.

Chester Melver and mother drove to Lewiston, Sunday. Mr. Melver returned home Monday evening, but Mrs. Melver will remain there for some time.

A son was born to Mr. and Mrs. Joe Kazda, Saturday, February 25.

Miss Elma Moton, who visited with her aunt and family for a couple of weeks left last Friday for Leland.

The basket social given at the school house last Friday evening by the D. S. girls brought them the sum of \$22.50, which will be used by them to buy cooking utensils, etc. They also received a donation of \$3.00 the same evening.

Ted Whitted of Ahsahka was in town Sunday.

Harve Triplett was a Lewiston visitor Monday.

Minnie Bunker, Francis Farris and Delbert Hayward were the dinner guests of Nadine McCoy Sunday, and Clara Luce was also a guest of Eva McCoy.

Mr. and Mrs. Nels Longeteig were Kendrick visitors, Monday.

Henry Brammer has been ill the past week with boils on his face, which have been quite painful.

Mr. Van Voorst who has been visiting friends here the past two weeks left Saturday evening for his home in Touchet. Mr. Hoppe accompanied him as far as Pomeroy where he visited his mother over Sunday. Mr. Hoppe returned home Monday evening.

Mrs. A. W. McCoy spent Thursday of last week with friends in town.

Mr. and Mrs. H. D. Hayward and sons and Minnie Bunker attended the auto show in Lewiston last Saturday, while there they purchased a new Victory-6 Dodge 1928 model.

A. W. McCoy was an over night guest at the home of his niece and family of Leland, Saturday night.

Mrs. Hayward and son, Doyle, and Geo. Douglas were the dinner guests of Mr. and Mrs. Wm. Lawrence, Sunday.

Mr. and Mrs. John Stalnaker and daughter, Clara, spent Sunday at the home of Gordon Harris.

Roy Southwick went to Lewiston, Monday.

Mrs. Belle Cuddy left last week for Clarkston to remain for a couple of months.

Mrs. John Holmes, who has been here for some time, with her mother, who is ill, left last week for her home in Camas, taking her mother with her.

Miss Binford is the guest of Mrs. Milton Benjamin this week.

Weed Control Meeting Saturday

Notice was received here yesterday that County Agent Taylor and other extension workers would be at Community Hall on Bear ridge Saturday afternoon at 2 o'clock to discuss the matter of weed control in this district and to formulate plans for an active campaign against the Canadian thistle and wild morning glory. It is hoped that a large crowd will be present to consider this important matter.

None In It

He had ordered some chicken soup, having tasted it, said to the waiter: "What is this you have brot me?" "Deed, sah, dat's chicken soup," was the reply. "Well, there is no chicken in it." "No, sah; dere ain't no dog in dog biscuits, either."

POULTRY

**YELLOW CORN IS
BEST FOR HENS**

Yellow corn should constitute at least 60 per cent of the total rations for laying hens. This is especially important during the winter months when the supply of green food is limited. The chief virtue yellow corn possesses which is not present in white corn is vitamin A which must be provided to maintain the health of the flock. Where rations are devoid of this vitamin the hens will develop a disease very similar to roup. In fact it is called nutritional roup. The eyes water, swell shut, and white pustules form in the throat. Naturally the egg production is very poor. One can tell by observing the color of the egg yolk whether the danger line is near. If the egg yolks are extremely pale, it is a practical index that the ration is low in vitamin A and that vitamin A must be provided, otherwise danger is ahead. This is due to the fact that feeds rich in the yellow coloring matter found in eggs are usually rich in vitamin A. If yellow corn constitutes half of the ration, there is no cause for alarm.

In case it is impossible to feed yellow corn, then it is absolutely necessary to feed some green leafy material, such as clover or alfalfa leaves. Pea green alfalfa leaf meal may be used to the extent of 10 to 15 per cent of the poultry mash, or clover or alfalfa hay should be kept in suitable racks before the hens all the time. Some people build a V-shaped rack of slats which will hold a bale of hay. The rack should be high enough off the floor so that the hens may pick easily off the lower corner. Later the bale may be rolled over, and after the leaves are consumed, the stems may be used as litter. It should be remembered that if yellow corn is used, it is not so necessary to feed the hay. Succulent material, such as root crops, is not a substitute for the green leafy material.

**Materials Necessary
for Producing Eggs**

Every egg must have a shell. Bones and shells are largely made up of calcium. Without the necessary calcium, laying hens will lack the materials necessary for producing eggs. Even though enough other feed may be supplied to furnish the necessary materials for a large number of eggs a hen cannot lay more eggs than she has shell material for.

Considerable experimental data has been compiled which shows definitely that a plentiful supply of minerals has a marked effect on the number of eggs laid. In addition to a plentiful supply of oyster shell or other high calcium mineral, hens need free access to a supply of sharp sand to aid them in digesting their feed. These items represent a small cost to the producer but make a large difference in the net returns.

Growing poultry also requires a liberal supply of minerals. In addition to calcium, many producers are mixing from four to five pounds of bone meal with every 100 pounds of mash. Bone meal furnishes phosphates in addition to calcium and therefore aids in bone growth.

**Plan to Keep Rats Out
of the Poultry House**

To keep rats out of a poultry house, build a concrete wall four inches thick on the outside or the inside of the old foundation. This wall should extend two feet below the ground level and at least one foot above it.

A four-inch concrete floor is then placed directly on the compacted earth. If the natural drainage is poor, a ciner or gravel fill six inches thick is first placed on the earth; however, in most cases this fill is not needed.

The door is equipped with a spring hinge or some other device which will close it automatically. If the door is of wood, a good plan is to place a piece of sheet metal or of one-fourth inch, 12-gauge wire screen, one foot high on its base in order to prevent the rats from gnawing through it.

Sprouting Oats

One of the easiest ways to sprout oats is to place the oats in a bag and soak it in a pail of water overnight. Use warm water in winter. Soak two quarts for each 100 hens. After soaking overnight, hang the bag behind the kitchen stove. Dip the bag in warm water once daily, shaking the oats each time, and hang up again. The oats is ready for use on the fifth day. If one uses five bags for sprout ing oats, he can have a constant supply by starting a new bag each day.

Eggs in Winter

Many poultrymen are finding that they need warmer houses for winter egg production and are lining their houses with commercial wall board at the time of the fall renovation. This lining gives the house a smooth appearance on the inside and removes a lot of the cracks and crevices around the uprights. This reduces the time required to brush out the dust and enables the poultryman to make a better fight against mites, lice and disease.

A grouchy patron in a restaurant complained to the waitress: "This corn isn't fit for a jackass to eat." "Well, sir," she replied smiling sweetly, "I'll get you some that is."—Ex.

A colored woman, according to the Emporia Gazette, called a lawyer, told him she wanted him to start "hokus pokus" proceedings to get her out of jail where she was confined for writing "unanimous" letters.

Big State Project

Bids for the construction of one of the longest state highway projects ever let in Idaho will be opened in Boise, March 3, by Joe D. Wood, commissioner of public works.

The contract calls for oiling 51 miles of the Old Oregon Trail in Elmore and Gooding counties between the towns of Mountain Home and Bliss. A portion of this section, between Glens Ferry and King Hill, has just been rebuilt by the state highway department.

A preliminary estimate of the cost of oiling this road is \$100,000. Work will start May 1, according to present plans, and the project will be completed by October 1.

Linden News

Mr. and Mrs. Louis Alexander and children spent Sunday at the A. Alexander home.

Mr. and Mrs. Clem Israel were Sunday guests at the F. C. Lyons home.

Arley Allen returned from Lewiston Friday evening, where he purchased a span of work horses.

Sunday visitors at the Smith home were Grandma Keeler, Mr. and Mrs. Arthur Bohn, Chas. Enger and Frank Meyer.

Miss Fay Pippenger of Cavendish spent the week end with her aunt, Mrs. Edgar Bohn.

Mr. and Mrs. Geo. Garner and Mrs. E. L. Mitchell called on Mr. and Mrs. H. J. Starr, Sunday afternoon.

Mrs. Addie Alexander and Aunt Carrie Allen spent Monday at the Smith home.

Joe Perry of Juliaetta spent a few days the first of the week with Cleve McPhee.

Mrs. E. L. Mitchell left Tuesday for Ririe, Idaho, after visiting with her sister, Miss Eva Smith, for the past three weeks.

Mr. and Mrs. W. Weyen spent Thursday evening at the Chas. Keeler home.

Mrs. Geo. Garner spent Monday with Millie Abrams.

Agricultural Squibs

Clean the grain before you use it for seed.

The cardinal principle in the dairyman's creed is cleanliness.

The farm workshop should be the popular place to work these days.

Winter egg production is often cut short by a limited supply of water.

To insure a good flow of milk, a cow should be in good condition at freshening.

Tremendous losses are incurred by planting poor seed. Test before seeding is the best rule to follow.

Winter onions come up just after the snow disappears and perhaps are the first vegetable that will come from the garden.

Milk which is not immediately removed from the barn is very apt to absorb the characteristic odor, no matter how sanitary the barn may be.

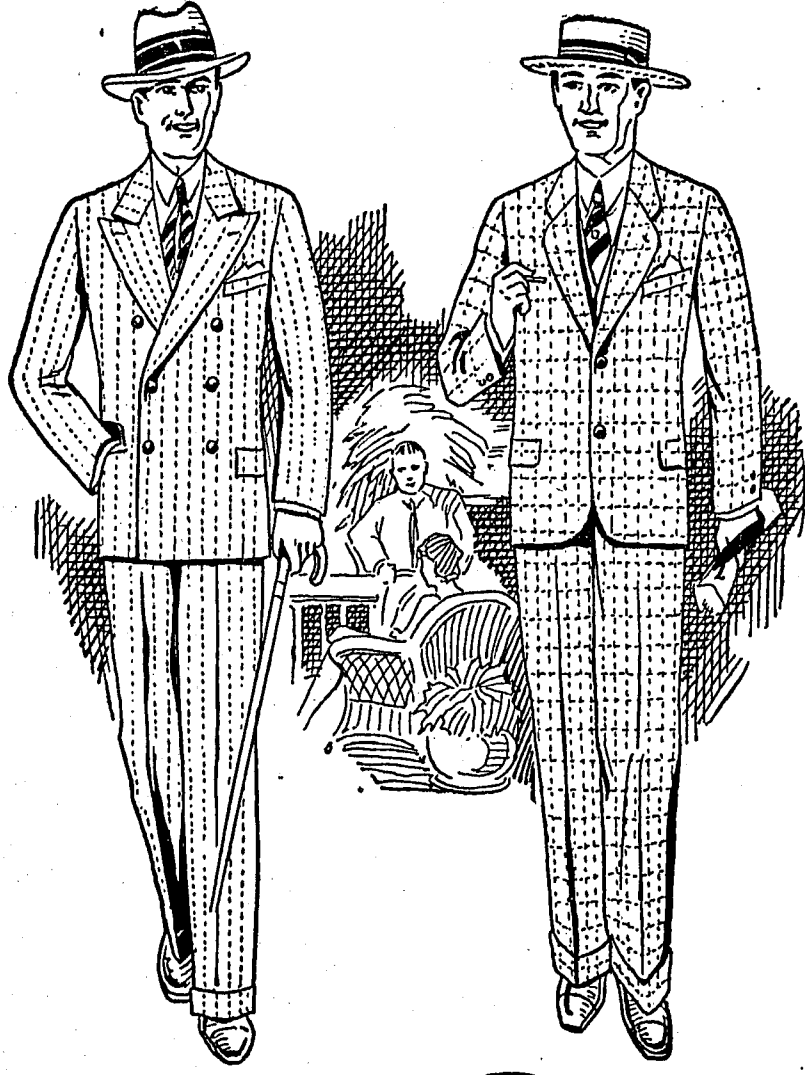

Potatoes which are stored in bins should be watched for rot. It pays to examine the stored tubers from time to time and remove all rotten potatoes.

A farm implement in the shelter is worth two in the storms.

Concrete gate posts, covered with stucco, make attractive entrances to farms.

Cement-asbestos shingles may be placed directly over an old wooden shingle roof.

Poultry usually do not need such things as yeast, mineral or tonics if they receive adequate rations.

Cameron News

The home of Mrs. Carl Koepf was the scene of a busy "quilt-in Bee" Tuesday the 21st.

Those present were: Grandma Myer, Mesdames Herman Myer, Blum, Carl Wegner, Aug. Wegner, Rein, Henry Brammer, Aug. Brammer, Fred Silflow, Jr., Henry Wendt, Gus Kruger, Fred Silflow, Reiche, Stoneburner and Miss Emma Hartung. Two very beautiful quilts were quilted and the guests left after being served with a chicken dinner.

Fred Mielke and family, Fred Newman and family, Mrs. Stoneburner and Miss Emma Hartung gathered at the home of John Schwarz for Sunday dinner. The occasion being the birthday of Mr. Schwarz.

Mr. and Mrs. Carl Hartung and children motored to Lewiston Sunday to spend the day with Mrs. Hartung's sister, Mrs. Wm. Schroeder.

Mr. and Mrs. Gus Kruger and Mr. and Mrs. A. O. Wegner drove to Lewiston Tuesday on business.

About thirty-five friends and neighbors gathered at the home of Mrs. Jake Berriman, Wednesday the 22, to celebrate her birthday.

Charley McCoy spent Saturday and Sunday in Lewiston visiting his wife who recently underwent an operation and who is staying with her mother, Mrs. Geo. Buntstein.

Miss Nellie Buckles, spent Thursday morning visiting the school. She returned to Lewiston Friday evening with Mr. Cridlebaugh.

**NEWS NOTES FROM THE
KENDRICK SCHOOLS**

**What The Students Are Doing
This Week.**

Harry McNeal, Jimmy Kuykendahl, Dick Bishop, Helen Gardner, Quentin Dammarell, Dick Carlson, Ethel Frazer, Myrtle Humphrey and Quentin

Perryman all made 100 every day last week in spelling. In the second grade Floyd Candler, Jewel Cummings, Irene Thornton, and Dwight and Larry Langdon all made 100 every day last week.

The primary room is studying about blue birds and spring flowers and making a pretty borders of them for the room.

Miss Edith Dammarell, primary teacher in Kamiah, visited the primary room Wednesday morning. The children were very much pleased to have her tell them about her pupils, especially of the twelve little Indians in her room.

The first section of the second semester ended last Friday. The six weeks exams were taken last Thursday and Friday morning. Friday afternoon the high school enjoyed a program by the Sophomores. Reverend Taber delivered a rather humorous talk which was immensely enjoyed by the pupils.

The program consisted of a patriotic speech by Robert Dammarell; a solo by Marjory Davidson; a solo by Neva Ware; a piano solo by Doris Emery, a reading by Howard Dammarell, and a song by Robert Dammarell, Neva Ware, Arthur Foster and Helen Emmett.

Fur Not Highly Prized

The fur-bearing animal, the fisher, is found in forested and uncivilized parts of Canada, and the northern United States, where it formerly ranged southward to Tennessee. Its fur in winter is good and is much caught in Europe. These animals are caught without difficulty in large traps baited with meat. The biological survey says that very few people raise the fisher. The demand for the fur is rather steady, but not great.

Beet Sugar

In the year 1747 a German scientist discovered the sugar properties of the beet, but it was not until about 1810 that the production of sugar from the beet was seriously considered in a commercial way. In 1880 the beet sugar industry was introduced into the United States.

**Begin Preparations
for Spring Planting**

**If Plans Are Well Laid Better
Crop Will Result.**

"Now is the right time to begin preparations for the spring rush of planting," says E. C. Blair, extension agronomist at the North Carolina State college. "If plans are well laid now and put into action without delay, a better crop will result. There are many important factors that contribute to a good yield, such as soil fertility, proper fertilization, good seed, good cultivation, and good seasons; but other things being anywhere nearly equal, the crop that is planted on time will always outyield one planted too late.

"Fall and winter plowing is the first step to take. All fields not growing cover crops should be well broken as soon as soil conditions will permit. Winter freezes will pulverize these fields much better and cheaper than can be done with harrows in the spring.

"The farmer who is following a definite crop rotation already knows how many acres of each crop he will have in the spring, and on what fields each crop is to be planted. This practice should be followed by all farmers to enable them to plan intelligently."

**Find Phosphate Trebles
Crop Yield in Missouri**

How six bushels of wheat were added to the acre yields each time that 200 pounds of acid phosphate were applied to the field is strikingly illustrated in the report of M. B. Ditty, county agent, to the Missouri College of Agriculture.

Previous to 1924, the six and one-half acre field of S. W. Vivion, Lafayette county (Mo.) farmer near Mayview, returned only six bushels of wheat to the acre. That fall, he applied 200 pounds of 16 per cent acid phosphate per acre when the wheat was sown. In 1925 he harvested 12 bushels from this "six-bushel" field.

A second planting of wheat, on the same field, in the fall with an additional 200 pounds of 16 per cent acid phosphate, increased the yield to 18 bushels. A mixture of alsike, red and sweet clover, sown on the 1926 wheat, returned 15 tons of cured hay this season from the six and one-half acres.

At present car lot prices, the 400 pounds of 16 per cent acid phosphate cost \$5.29 for each acre, but returned six more bushels of wheat the first year and 12 more bushels the second year, a total of 18 bushels to the acre. If the wheat is valued at \$1 a bushel, the returns for this labor approximate \$12 more to the acre. As the clover crop was also doubled, the net returns for labor are even greater.

**Three Points Spelling
Success or a Failure**

Farmers who intend to plant apple orchards should remember that if an orchard has a good site, if the soil is good, and if good varieties are planted, there is a good chance for success, but if these three points are unfavorable, even the most-industrious and best-informed fruit grower may not be able to make money, according to the New York State College of Agriculture.

Varieties must, of course, be adapted to the site and soil, but also to the present market demands. The future market preferences must also be anticipated. The trees, themselves, should be heavy producers, for large yields are produced at less cost for each bushel or each barrel.

Quality of the fruit is another point that must be considered, for the fruit must be in demand on the market and must sell for a good price. As time goes on, quality is going to be more and more important, largely due to present-day transportation and storage facilities.

Perishable McIntosh may now be kept in cold storage until April if carefully handled. Thus they compete directly with better keeping but lower-quality varieties which formerly enjoyed a ready sale when earlier sorts were gone.

According to a recent survey in New England, 50 per cent of the apples for household use are used raw, and this tendency will undoubtedly increase.

Refused to Pay Rent
In United States politics the "Anti-Rent" party refers to a party in the state of New York which had its origin in dissatisfaction among the tenants under the patron system in the eastern part of the state. The tenants refused to pay rent in 1839, resisted force, and a few years later carried their opposition into politics. The matter was settled by a compromise in 1850.

Happy Hymns
Hymns are meant to be offerings of objective praise, not expressions of personal self-abasement. The true hymn-singer is very like the lark. He cannot help singing, he is so glad. Children are our excellent exemplars in this. They are always ready to give thanks, melodiously. Our hymn-books should provide an outlet for this urge, not divert it into channels less spontaneous.—London Daily Telegraph.

Treat Potatoes Before Planting

Solution of Corrosive Sublimate or Formaldehyde Is Effective.

Experiments have shown that potatoes can be treated for disease control in the winter while they are dormant with no delay in germination in the spring, according to C. L. Graves, plant pathologist at the Kansas Agri-

cultural college. Graves, therefore, recommends that seed potatoes be treated as soon as practical.

There have been developed in the past few years two standard treatments for the control of seed borne diseases of the potato. Both are equally efficient in disease control. They are the corrosive sublimate treatment, and the hot formaldehyde treatment.

Corrosive Sublimate Treatment.

Prepare a solution for the corrosive sublimate treatment by mixing thoroughly 30 ounces of corrosive sublimate in 30 gallons of water. Corrosive sublimate is deadly poison and must be kept away from children and

animals. It will not injure the hands. The sublimate solution will corrode metals. Therefore, barrels, wooden tubs, or concrete vats should contain the treatment. Potatoes should not be cut before they are treated. Best results are obtained when they are left in the solution for one and one-half hours, according to the plant pathologist.

The solution should not be used for more than three batches of potatoes, unless the solution is strengthened each time. Corrosive sublimate should be added at the rate of one-half to five-eighths of an ounce to each 30 gallons of water after each treatment.

Hot Formaldehyde Treatment.

For the hot formaldehyde treatment mix two pints of full-strength formaldehyde in 30 gallons of water. Unlike the corrosive sublimate treatment, this solution does not weaken with use, and no addition of formaldehyde need be added after treatment to maintain the original strength. Formaldehyde is also a deadly poison. The solution quickly dries from the surface of the tubers and the treated seed is not poisonous.

The hot formaldehyde treatment requires from three to four minutes in a heated solution 124 to 128 degrees F. Care should be taken that the tubers do not come in contact with the sides and bottom of the treating vat, says Professor Graves.

Careful Cutting Helps Woodlot

New York Farmer Cut \$100 Worth of Fuel From Each Acre, Aiding Stand.

In a woodlot on the farm of Henry Kellogg of Barnes Corners in Lewis county, \$100 worth of fuel wood was recently removed from each acre and the woodlot was left in better condition than before cutting, according to J. A. Cope, forester at Cornell university, who had charge of selecting and cutting the trees.

Woodlot Improvement.

This was part of a woodlot improvement campaign conducted by the Lewis county farm bureau in which Mr. Kellogg agreed to use his woodlands to show what could be done. An area was laid out in a 20-acre woodlot, and the trees marked to be cut were only those that were defective, crooked or were what are commonly called "weed" species.

At a woods meeting, attended by farmers of the community, the marked trees which had been carefully cut and ranked were measured. It was found that 80 15-inch cords of wood had been cut from each acre. This fuel wood had a roadside value of \$200. Mr. Kellogg kept a record of time required to cut, haul and rank this wood, and found the 80 cords could be delivered to the roadside for

\$100, including sawing it into 15-inch lengths, thereby netting him a clear stumpage value of \$100 an acre.

Saved Crop Trees.

The group next visited the lot where the cutting was done to see that the main crop trees of thrifty ash, basswood and hard maple had not been touched. The cutting had improved the condition of the stand so that the crowns of the remaining trees will be able to expand and thus diameter-growth will be greatly increased. Mr. Kellogg's experience indicated that, as far as Lewis county woodlots go, "you can eat your cake and have it, too," Mr. Cope says.

A grooved surface on a concrete approach to a raised driveway will assure a firm foothold.

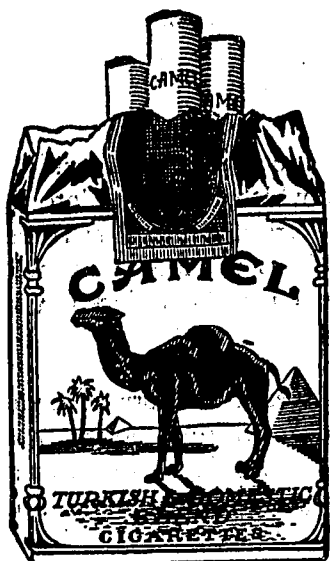

Probably the most important of all the more recent tendencies in fruit growing is the use of sweet clover in the apple orchard.

"Price chasing" of farmers in order to catch the high price crops or live stock has on many occasions resulted in disappointment.

It costs more for each bushel or for each unit to market a large crop of an agricultural product than it costs to market a small crop.

Farmers who take an annual inventory should not forget to include the dog. He may be an asset or a liability for he has to be fed and an annual tax has to be paid for him.

If you smoke for pleasure

People might smoke some cigarettes for a lot of queer reasons, but they certainly smoke Camels for pleasure. And they smoke more Camels by billions.

Not Difficult to Raise

Orphan Pigs at Dakota

Raising of the orphan pigs that are often present in large litters is not difficult if care is taken to attend to details, W. R. Hauser, live stock specialist of the South Dakota State college extension service, says. Time spent in raising the orphans will be well paid for in the return from extra pigs matured.

Mr. Hauser has observed that pigs two days old are much easier to handle than the younger ones. A ration of one quart whole cow's milk daily, hand fed at first, with cracked corn, tankage, salt, shorts and green alfalfa hay in self-feeders as soon as the pigs will eat, makes a very good ration.

"Best results can be secured by feeding five to six times daily for the first few weeks, then gradually cutting down to three times daily," Mr. Hauser says. "As soon as the pigs begin to eat grain fairly well, the whole milk can be gradually replaced by skim milk.

"Sunlight in the pens, sufficient exercise and abundance of fresh, clean water, and strict attention to keeping feeding utensils clean and the quarters clean, dry, well bedded and generally sanitary, are important factors in achieving success."

Agricultural Notes

The garden seed catalogue is both cause and remedy for spring fever.

The best seeds that can be bought are cheaper at any price than poor ones.

It is a waste of both labor and property to leave the farm in disorder.

Fall-freshened cows should yield annually from 10 to 15 per cent more milk than those calving in the spring.

For those who can get it handily, dried beet pulp is a good dairy feed, on the order of silage and roots—something to make up for the winter lack of pasture. It's healthful and cows relish it. Soak it before feeding.

"Cows that produce twice as much as the average cows of the United States require only 40 per cent more feed." That statement, made by the United States Department of Agriculture, and based on records of 100,000 cows, is worth thinking about.

Would you buy butter at 40 cents a pound and feed to your hogs? Crazy question! But what's the difference between doing that and using a poor separator that leaves a good deal of your butterfat in the skim milk—the butterfat that you might sell?

Stinking Smut Is Most Widely Spread Disease

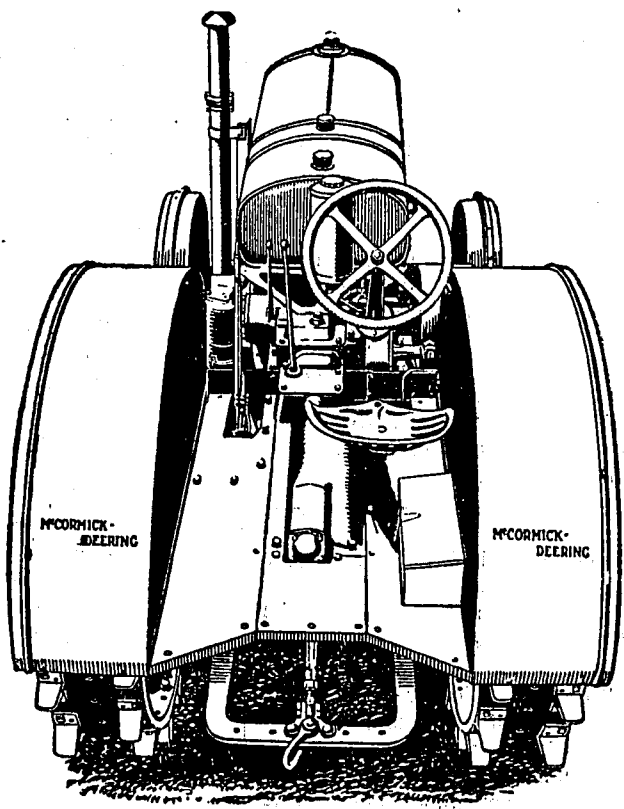

Stinking smut is the most widely spread disease of wheat and next to black stem rust is the most destructive. It has been estimated to cause an annual loss in the United States of 25,000,000 bushels. Stinking smut grows within the wheat plant and eventually forms smut balls in the place of the kernels. It causes a general shrinkage in the outline of the head but does not otherwise greatly change the outward appearance of the head and can be detected in the field only by close examination or by scenting its odor which is similar to that of decaying fish. When the smutted wheat is threshed many of the smut balls are broken and some of the smut dust or spores is lodged on the surfaces of sound grains. If the smutted grain is sown, the smut spores germinate with the seed wheat and again develop within the plant. In this way the disease is carried from one crop to the next.

State Game Laws Govern Hunting in the Forests

Can anyone hunt and kill game in the national forests? This question is frequently asked Department of Agriculture officials. Hunting and fishing in all national forests, says the forest service, are governed by the game laws of the state in which the national forest is located. Most forest officers are deputy state game wardens and it is their duty to enforce the state game laws at all times. In some of the national forests, however, national game refuges have been set aside for the preservation of wild life. In these refuges hunting and fishing are not allowed, except under special circumstances and with the approval of the authorities in charge.

LOOK AHEAD!

Buy a McCormick Deering Tractor NOW for Many Years of Successful Power Farming!

Bird's-eye view of the 3-plow tractor

POWER FARMING with the McCormick-Deering Tractor is more pleasant. The chore requirements of a tractor are less than those of horses and more agreeable. A tractor needs attention, but only a fractional part of that required by horses for the same work.

A tractor operator controls more power, enabling him to do more work in a given length of time than can be done with horses. Field days can be made longer when emergencies arise—the trac-

tor does not tire and chore time is eliminated.

Triple-Power Tractor

The McCormick-Deering Tractor combines all farm power units in one, whether it is drawbar, belt, or power take-off work; thus one power unit does all the work. Come in Now and investigate McCormick-Deering power farming. You can reduce your overhead and increase profits by becoming a McCormick-Deering Tractor farmer now.

WHEN PROMOTERS USE "CHARITY" TO DECOY TRUSTFUL CONTRIBUTORS

Investigations of Various Schemes for Defrauding Public Out of Money Disclosed by Bankers Association—Many Kinds of Fake Industrial Promotions Used as Bait.

By W. R. MOREHOUSE

Public Relations Commission, American Bankers Association

MILLIONS of dollars raised under the disguise of charity go to line the pockets of promoters. Ticket sales on raffles are commonly used, and while the loss to any one person who buys a ticket is small the aggregate loss for the United States runs into millions of dollars. Usually the promoters of these schemes first make a contract with some charitable institution to conduct a campaign for funds on behalf of the institution. They are to run the campaign in the name of the institution and share the proceeds. The whole scheme is often one of deception. To those who have been led to believe that their contributions go practically 100 per cent to charity, the following case we investigated should prove illuminating.

W. R. MOREHOUSE

A number of promoters recently contracted with a charitable institution to put on a campaign to raise funds by the raffle of a new automobile. So far as the public could tell from the banners used in displaying the automobile, the full amount of the sale price of the tickets went to the institution. There was nothing to convey any other impression. Apparently it was open and above board and was being conducted by men who were contributing their time gratuitously.

For several days a new automobile, mounted on a truck, was driven up and down the streets, with banners telling about the drive for funds for the charitable institution. One day the truck would go by displaying one of the popular makes of automobiles. A few days later it would parade by displaying some other popular make. Periodically the truck would pull into the curb where it would park for several hours while the promoters pleaded with passers-by to take tickets on the raffle and thereby help a deserving charitable institution to meet its bills.

Thousands "Touched"

Thousands of people, touched by the appeal for help, bought tickets, the total sale running into the thousands of dollars. Contrary to the belief of the ticket buyers their contributions did not go 100 per cent to charity. Instead the charitable institution received but 26 cents on the dollar, the promoters getting 52 cents on the dollar as their net profit, or twice the amount received by charity, while the remainder of 22 cents on each dollar represented the amount charged against gross sales by the promoters as expenses.

In other words, every person who bought a 50 cent ticket for the sake of charity, contributed but 13 cents to charity and 37 cents to those promoting the scheme. Whether you give to charity or make an investment it will pay you to get the facts!

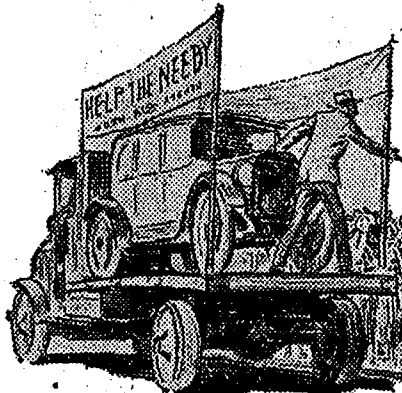

Unfortunately there is a general impression abroad that wildcat promotions are confined to oil, mining and new inventions. The truth is, many stock selling promotions are operated under the name of other industries.

False Claims

A certain group of promoters investigated offered for sale stock in a proposed woolen mill. In order to sell the stock they resorted to the use of misrepresentation and false claims. After renting space on the ground floor of an office building fronting on a busy street they began their campaign. Orally and by printed advertisements extravagant claims were made for the proposed corporation which were grossly false.

It was claimed that the promotion had the support of the Chamber of Commerce, but it did not have any such an endorsement. It was claimed that the corporation had a signed contract for the sale of millions of dollars' worth of its products—orders enough to keep the mills running day and night for many years and accordingly insure its success, but all that it had was a valueless fake agreement.

It was claimed by two of the principal promoters that they had had many years of experience in the manufacture of woolens,—in fact had organized and financed a woolen mill which is the largest in the United States. The facts were these two pro-

The "Charity" Drive

motors had not been connected with any mills for over twenty years and they had attempted at different times to promote mills, all of which had failed. One of the promoters represented that formerly he was president and general manager of one of the largest woolen mills in Canada. The fact was the mill referred to had gone into bankruptcy and he had been caretaker of the plant.

This story of misrepresentation can be duplicated in practically the whole industrial field, and because our industries are being exploited every investor to defraud, it behooves every investor to investigate carefully. He should consult his banker before drawing his savings out and losing them on some wildcat investment.

WASHKOWSKY'S OLD SHOE

We call the attention of the American Bankers Association to the case of Mr. Washkowsky of Brooklyn. Mr. Washkowsky is hard working and thrifty, but like so many of us his education is defective; who is to blame for that we don't know. Mr. Washkowsky has been saving a part of his weekly wages for a long time, but hadn't told Mrs. Washkowsky where he was depositing his nest egg. That was a mistake, probably, but an inquiry into it belongs to another branch of education with which it is probable the bankers association cannot be held to have any concern.

But with Mr. Washkowsky's depository it has. He chose for that purpose an old shoe. He kept the shoe and its mate in his closet, and up to the other day had tucked away in one of them savings amounting to \$350. On that same other day Mrs. Washkowsky, rummaging Mr. Washkowsky's closet like a good housewife, seeking what she could throw away or transfer to another place where Mr. Washkowsky couldn't find it, as is the habit of good housewives, found this same pair of old shoes. We suppose she said to herself, Mr. Washkowsky not being present to have it said to him, "Isn't that just like a man!" and acting thereupon just like a woman she sent the shoes to the cobbler to be repaired. It was either that or the ash barrel for them, and being frugal and Mr. Washkowsky paying the cobbler bills anyway, she sent them to the cobbler.

A distraught man was Mr. Washkowsky when he next went to make a deposit in his old shoe. "What new

place," he asked in that martyr tone affected by husbands on similar occasions, "have you found for my old shoes?" Mrs. Washkowsky told him, expecting to be praised for her thoughtfulness. Women—but that's another branch of education.

Mr. Washkowsky went to the cobbler and found his shoes, but not the money, which we cannot but feel is not remarkable. We hope he will find it, but he hasn't yet, which again should cause no astonishment. But what we would like to hear from the American Bankers Association is what steps it is taking to discourage people of magpie habits from keeping their money in stoves, shoes, mantle clocks, behind wall pictures, under floor boards and similar places. We have made no exact calculation, but from casual evidence we are inclined to believe there are enough funds hidden away in such places in this enlightened and progressive country to pay off the national debt. Not that we advise paying it off, because that would leave congress nothing to fuss with Mr. Mellon about; but if deposited in banks our banker might have some to lend when we need it, which he now never has; he says money is very scarce. We hold it is not; it is merely in Mr. Washkowsky's shoe.

Seeing that we have been pursuing education, or something called that, for several centuries, we cannot but feel this is a bad showing and that the bankers association is somehow responsible. It hasn't sufficiently impressed on the people that it has banks and what they are for. Mr. Washkowsky hasn't heard. And there are a lot of him in this country.—Kansas City Star.

Why
be satisfied with less
than Buick
when Buick is priced so low

You can buy a Buick for as little as \$1195, f. o. b. factory—with your choice of a Sedan, Coupe or Sport Roadster.

POWER Dignifies Industry

"Many factors have contributed to the pre-eminent position of America's workers, but underlying everything else has been the fact that the American wage earner has had more horsepower at his elbow than the worker of any other industrial nation."

LEWIS E. PIERSON
President, United States Chamber of Commerce

BECAUSE of the engineering skill and organizing ability which have gone into the expansion of the electrical industry of America, there is available to our industries today more electrical energy than is produced in all the rest of the world combined.

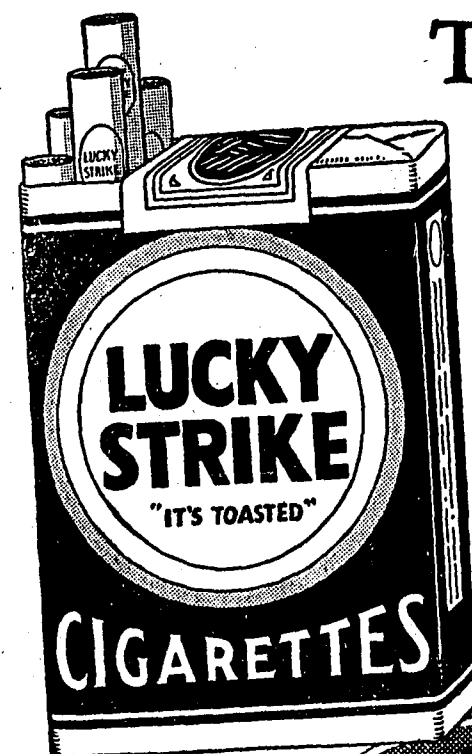

This company serves a territory of about 300,000 population. When the Chelan power station is completed, we will have a generating output of one horsepower for each of those residents.

Turkish Coffee

In order to make coffee as served in Turkey only the darker grades of coffee, such as pure mocha, should be used. The coffee is made much stronger than in the United States, about one large cupful of coffee to three cupfuls of water being the formula. The coffee is placed directly in the water and the whole brought to a boil. It is then sweetened to the consistency of sirup, but no cream is put in it.

Spirit Writing

A tradesman took ill and suddenly died. His bookkeeper found on the next day a letter the tradesman had written but not sealed. The bookkeeper sealed and sent the letter, having added the following: "After writing the above, I suddenly passed away."—Stockholm Kasper.

Named for Inventor

Hero's fountain is a pneumatic apparatus, named for its inventor, Hero of Alexandria, in which a vertical jet of water is produced by the pressure of condensed air.

The DAIRY
PURE-BRED BULLS
VARY VERY MUCH

Figures recently compiled from records of the cow-testing associations of New Jersey and from the United States bureau of dairy industry, where a study is made of association records from all parts of the United States, indicate that a wide variation exists in the transmitting ability of pure-bred dairy bulls for milk production and butterfat test, announces the college of agriculture at New Brunswick.

Records show that of pure-bred dairy bulls, one-third increase herd production, one-third barely maintain it, and the other third lower it. In other words, the college explains, only one pure-bred sire out of three is really desirable. This is not presented as an argument against the use of pure-bred sires, but as an argument in favor of more careful selection of dairy sires and the retention of those sires until their daughters come into production.

"Unfortunately," says the college, "nearly all bulls are butchered after reaching the age of three or four years. Dairymen are beginning to see that this is a mistake. In order to prevent inbreeding, a plan is now being put into operation by a number of dairymen, whereby bulls are swapped after they are three years old. Two or three years later the animals are swapped back if the original owners want them. A bull having five daughters that excel their dams in production is known as a 'proved sire.'"

The college asserts that it is now reasonably certain that if proved sires are used for five or six generations, a dairyman can develop a herd of cows, everyone of which will be a heavy milker. All their daughters will be high producers and all their sons will transmit great production.

Fodder Corn Makes Good Feed for a Dairy Cow

Fodder corn makes very good feed for dairy cows when a silo is not available. It is a better milk-producing feed than timothy hay. The amount of waste that may occur in feeding fodder corn will depend to a considerable extent on how it has been grown and cured. If it is grown quite thickly so that the stalks are fine, most of it will be consumed and especially during the forepart of the season when it contains considerable juice.

Where the stalks are coarse, there may be as much as even 20 or 30 per cent waste in stalks that are left uneaten. When run through a cutter, it is practically all consumed.

With a silo there is practically no waste if the silo has been properly filled, except what is taken off the top when the silo is first opened. The waste in silage based on the entire amount put into the silo need not exceed 5 per cent. Where the waste in fodder corn can be reduced to 10 per cent, it is very low.

Udder Diseases Caused by Germs Entering Teat

The last milk obtained from the udder at each milking is always the richest. Hence it is sound husbandry to collect it. Aside from its economic value, it is of hygienic importance.

Most udder diseases are caused by germs entering through the teat canal and the milk clstern. If milk is left in these passages or a drop of milk is permitted to remain on the tip of the teat the avenue for infection is left wide open. This is because milk is an excellent medium for germs to multiply in. They do so by the million, following the fluid to the interior of the udder, where they produce mischief. It is essential, therefore, to remove the last drop of milk obtainable.

Washing the teats after each milking is advisable to safeguard the highly developed udders of the better cows. It should be remembered that the better the udder, the more liable it is to infection, hence the precaution recommended.

Dairy Facts

Liberal feeding is one of the prime factors in profitable dairying.

Frozen silage should not be fed to dairy cattle, but left until it thaws out.

Calves are particular and do not eat feed or hay that has been nosed over.

One of the greatest sources of sour milk and low-grade dairy products is the unsterilized utensil.

Cut down on your choring time by using a feed and litter carrier. Clean milk results from a clean barn; make it easy to keep your barn clean.

Milk which is not immediately removed from the barn is very apt to absorb the characteristic odors, no matter how sanitary the barn may be.

The butter should be reasonably well drained in the churn before salting. Then take one-half ounce of salt for each pound of butter, and sprinkle the salt over the butter.

Wayside Markets Become a National Institution

Millions of motorists have been reading signs like this: Beets, peas, squash, apples and honey, fresh eggs, 35 cents, and seeing these signs have bought. Small farmers everywhere have put up these little roadside markets where each year increasing thousands have purchased fresh produce. These wayside markets are becoming a national institution, bringing back the direct touch of farmer and consumer, says the Illinois Farmer. Probably some middlemen and retail groceries are displeased, but the consumer likes it. For nine months in the year the consumer must meet the demands of the merchants in the large cities, and therefore will have scant sympathy with him in this problem. This is growing into an immense business and the consumer is rejoicing in his ability to get really fresh vegetables and eggs without having to pay any number of persons for carrying them from the farm to his door.

Plant Forage Designed for the Silo Nearby

In planting forage designed for the silo, a few details should be kept in mind. First, it should be grown as close to the silo or point of feeding as possible, because silage is bulky and should not be hauled any farther than necessary. A crop that is grown on rich soil under favorable conditions is generally of better quality than one grown on poor soil. Quick growth has less woody fiber and is more digestible and palatable; therefore, the land should have enough fertilizer to make a rapid growth.

Now Using Muddy Water Method for Inoculating

A good many are now using the muddy water method for inoculating; that is, mix your dirt with water until it is smooth and about the consistency of thick cream, and apply it to the seed, stirring well. Probably, a little more dirt might accompany the seed when the seed had been previously treated with a thin glue water. Though inoculating methods are usually successful with sweet clover, they frequently fail with alfalfa, so far as a perfect stand is concerned.

Notice For Publication of Time Appointed For Proving Will, Etc.

In the Probate Court of the County of Latah, State of Idaho. In the matter of the Estate of Susanna Giese, deceased.

Pursuant to an order of said Probate Court, made on the 16th day of February 1928, notice is hereby given that Monday the 12th day of March 1928, at 10 o'clock A. M. of said day at the court room of said Court, at the Court House in the County of Latah, has been appointed as the time and place for proving the Will of said Susanna Giese, deceased, and for hearing the application of Herman E. Giese, for the issuance of him of Letters Testamentary, when and where any person interested may appear and contest the same.

Dated this 16th day of February, 1928.

Adrina Nelson,
Probate Judge.

NOTICE TO ANY AND ALL PERSONS, INDIVIDUALS, FIRMS, CORPORATIONS OR ASSOCIATIONS, OWNING OR BEING INTERESTED IN ANY OF THE LANDS AND TAXABLE PROPERTY WITHIN THE KENDRICK HIGHWAY DISTRICT OF LATAH COUNTY, STATE OF IDAHO:

You, and each of you, are hereby notified that on Saturday, the 10th day of March, 1928, at the hour of one o'clock p. m., at the City Hall of Kendrick, Latah County, State of Idaho, the Board of Highway Commissioners of the Kendrick Highway District will meet to hear any and all objections to the issuance of the bonds provided for in the Resolution as hereinafter set forth, and will hear any and all objections to the levy and assessment of taxes to pay the principal of and interest on said bonds and will hear any and all objections to the assessments of said tax against the property of any and all persons, individuals, firms, corporations or associations objecting to the same.

And you, and each of you, are further notified that you may file written objections in the office of the clerk of said Board, to the issuance of said bonds, at any time prior to said 10th day of March, 1928, and that all such objections will then and there be heard, and that the said Board will then and there hear testimony in support of and opposition to all such objections, and that at said hearing, said Highway Board will confirm or set aside the proposed bond issue and tax levy therefore, in whole or in part, or will make such changes in the proposed plan of highway construction, improvement and repair, by enlarging the same or by eliminating parts of such proposed work therefrom, and such changes in the amount of such proposed bond issue, by increasing or diminishing the amount of bonds so to be issued, as may be determined by said Board, at said hearing, and that at said hearing,

the said Board will approve and confirm or disapprove of the proposed tax upon the taxable property within such district, for the payment of the cost and expense of such proposed work, and will approve or revise or set aside the tax levied, or to be levied, upon any particular tracts or parcels of land within such Highway District as it shall deem proper and for the best interest of said Highway District, a copy of which said Resolution is as follows:

RESOLUTION No. 1

A Resolution for the calling and holding of a special election in Kendrick Highway District in Latah County, State of Idaho, to submit to the qualified electors of such district the question of authorizing the issuance of negotiable coupon bonds of said district, in the total sum of ninety-five thousand dollars (\$95,000), for the purpose of the construction, improvement and repair of certain highways within said district, for the purchase of material and machinery therefor and for the necessary expenses of the district in connection therewith, describing the said bonds and fixing the rate of interest thereon, assessing a tax for the payment of principal and interest thereon as it falls due, establishing voting precincts and appointing judges for the said election, providing for notice of such election and directing the publication of notice of such election, designating the highways to be improved and constructed, and the manner and form of said improvement and construction, and providing for a meeting of the commissioners of said highway district to hear and determine why the tax for the payment of said bonds should not be assessed against all of the taxable property within said highway district, and providing for notice to any and all persons, individuals, firms, corporations or associations owning or being interested in any of the lands and taxable property within the said Kendrick highway district of Latah County, State of Idaho, notifying said persons to appear before said Board of Highway Commissioners to show cause, if any there be, why said bonds should not be issued or why the general tax for the payment of principal and interest of said bonds should not be assessed against all of the taxable property within said Kendrick Highway District, and setting a date for said hearing, and providing for the publication of said notice.

WHEREAS, more than two-thirds of the residents and tax payers within the Kendrick Highway District of Latah County, State of Idaho, have petitioned this Board for the calling and holding of a special election for the purpose of voting the maximum bonds to provide funds to improve certain highways within the said highway district, and

WHEREAS, the Highway Commissioners of said district deem it necessary and of advantage to said district to issue said bonds, and

WHEREAS, there are no funds available for said purpose and none can be provided except by the issuance of the bonds of said district, and it is necessary that the cost of such improvements and the purchase price of machinery and material and the expenses of the district in connection therewith, be paid by the issuance of negotiable coupon bonds of said district as herein provided, and in the amounts herein stated, and the sum of Ninety-Five Thousand Dollars (\$95,000) is requisite for the purposes aforesaid, and

WHEREAS, the existing bonded indebtedness of said highway district will have been retired upon the first day of July, 1928, and

WHEREAS, the taxable property of said district as shown by the assessment list for the year 1927, was of the value of \$990,333.00.

NOW THEREFORE, BE IT RESOLVED and ordered by the Board of Commissioners of Kendrick Highway District, of Latah County, State of Idaho:

1. That a special election be held in said Kendrick Highway District on the date to be hereafter named, at which election there shall be submitted to the qualified electors of the said highway district, the question of authorizing the Board of Highway Commissioners of said district to issue the negotiable coupon bonds of said Kendrick Highway District of Latah County, State of Idaho, in the total principal sum of Ninety-five Thousand Dollars (\$95,000.00) as herein provided.

2. That the object of the issuance of said bonds is to pay the cost of construction, improvement and repair of the highways within said district, described as follows, to-wit: To construct and improve the highway for a distance of 5.25 miles from Highway Near Swanson Place Rimrock School house, established a five per cent grade, with roadway eighteen (18) feet wide, including a ditch two (2) feet in width, upper side only, leaving a sixteen (16) foot driveway, estimated cost \$68,034.03.

Improving the Brady Gulch road, by establishing culverts bridges and surfacing said road for a distance of two miles and three-fourths (2 3/4) miles, with crushed rock, four inches deep and twelve (12) feet wide, from Kendrick City limits to Deabald and Callison road, estimated cost \$17,446.06.

Improving the Julianna grade in the same manner as the Brady Gulch road, for a distance of one and one-half (1 1/2) miles, from Good roads estimated cost \$4000.00.

For the necessary supplies and equipment to carry on proposed work estimated cost \$5519.91.

3. That said bonds shall be issued in denominations of not more than One Thousand Dollars (\$1000.00) and not less than One Hundred Dollars (\$100.00) par value each, and shall be made payable within twenty (20) years from the date of issuance, and redeemable at the option of said Highway District, after the expiration of ten (10) years from

the date of issuance, and that said bonds shall be redeemable in the order in which they are numbered, and that each bond shall have semi-annual interest coupons attached covering the interest on the said bonds, at a rate of not exceeding six per cent (6%) per annum, from the date of issuance until paid, that said coupons shall be payable January first and July first annually. That said bonds shall be known as KENDRICK HIGHWAY DISTRICT BONDS. That each bond shall be signed as provided by law. That each of said interest coupons attached to said bonds shall be executed according to law, and that each coupon shall bear a number corresponding with the number of the bond to which it is attached. That such bonds shall be in all respects executed and shall contain such recitals as may be necessary to make said bonds valid obligations of the said Highway District, and that each bond shall recite that it is issued by virtue of and in conformity and compliance with the provisions of the Constitution and all laws of the State of Idaho, authorizing such issuance. That said bonds shall be made payable in lawful money of the United States of America, and that, if it is deemed by the Board of Commissioners of said Highway District, to be of advantage and benefit to the Highway District, the bonds will be redeemable serially according to their numbers.

4. That all taxable property within the limits of said Kendrick Highway District as they exist, are, and shall continue to be pledged for the payment of the principal and interest of said bonds and the proper officers of said district must continue to assess and collect on all taxable property within the limits of said district, the necessary taxes to pay the said bonds and interest as the same become due. That the Board of Commissioners of said Highway District shall hereafter annually levy a tax, in addition to all other taxes provided by law, upon all of the taxable property within the said Highway District, sufficient to pay the interest upon all of the said bonds so issued, as it falls due. There shall be levied in addition a sufficient sum to retire Four Thousand Five Hundred Dollars (\$4,500.00) annually of the principal sum of said bonds for the first ten years, and a sufficient sum to retire Five Thousand Dollars (\$5,000.00) annually of the principal sum of said bonds thereafter, until all of said bonds have been retired. All such taxes must be levied, assessed and collected as are other taxes, according to law, until the bonds so issued and the interest thereon are fully paid. That all such taxes so levied and collected for the payment of the principal and interest of said bonds shall be the Treasurer, kept in a separate fund, designated "KENDRICK HIGHWAY DISTRICT BOND INTEREST AND SINKING FUND" and the said fund shall be irrevocably pledged to and used solely for the payment of interest and principal of said bonds. That the Treasurer be, and he hereby is, authorized and directed to pay the first installment of interest maturing on said bonds out of any funds in his hands, not otherwise appropriated.

5. That for the purpose of said election, the whole of said Highway District shall constitute one precinct and the polling places for said precinct is hereby designated to be at the City Hall building in the Village of Kendrick, State of Idaho, within the limits of said district.

6. That the said election shall be conducted as nearly as practicable in accordance with the general laws of the State of Idaho. That the polls shall be open at the hour of eight o'clock in the forenoon upon said election day, and shall remain continuously open until seven o'clock in the afternoon of said day.

That the following be, and they are hereby, appointed judges of said election, to-wit:

GEORGE DAVIDSON
ED LIEN
ED LONG

SPECIAL BOND ELECTION HELD IN KENDRICK HIGHWAY DISTRICT 2nd DAY OF APRIL 1928

Mark your ballot in the circle opposite your choice, thus (x)

IN FAVOR OF ISSUING BONDS TO THE AMOUNT OF NINETY-FIVE THOUSAND DOLLARS (\$95,000.00) for the purpose stated in Bond Resolution No. 1 of Kendrick Highway District, passed February 21, 1928, AGAINST ISSUING BONDS TO THE AMOUNT OF NINETY-FIVE THOUSAND DOLLARS (\$95,000.00) for the purpose stated in Bond Resolution No. 1 of Kendrick Highway District, passed February 21, 1928.

8. That notice of said election be given by publication in the Kendrick Gazette, a newspaper of general circulation at Kendrick in said Highway District, and hereby designated as the newspaper most likely to give notice of such election, for ten (10) days prior to the date of said election, and that such notice be in substantially the following form:

NOTICE OF SPECIAL ELECTION

NOTICE IS HEREBY GIVEN THAT: Pursuant to Bond Resolution No. 1 of the Board of Commissioners of KENDRICK HIGHWAY DISTRICT passed and approved on the 21 day of February, 1928, a Special Election will be held in said district on the 2nd day of April 1928, for the purpose of submitting to the qualified electors of said District, who are residents therein, the question and proposal of authorizing the Board of Commissioners of said Highway District to issue negotiable coupon bonds of said District in the principal sum of \$95,000.00; that such bonds shall bear interest at a rate not to exceed six per cent (6%) per annum, payable semiannually, until such bonds, principal and interest are completely paid and redeemed; that the proceeds of the sale of the bonds shall be devoted to constructing, improving and repairing highways within the District, to the purchased of materials and machinery therefor, and to the payment of the necessary expenses of the District in connection therewith; that there shall be one precinct and one polling place in the District as follows, to-wit:

The entire Highway District shall constitute one voting precinct, reference being made to the order creating the said District for the boundaries thereof, and the polling place for said precinct is hereby designated to be at the City Hall in the Village of Kendrick in the County of Latah, State of Idaho.

That the polls will be open for such election at the hour of eight o'clock in the forenoon of said day and shall remain continuously open from that time until seven o'clock in the afternoon. Such election shall be conducted as nearly as practicable in accordance with the general election laws of the State of Idaho. Said election shall be by ballots and the ballots shall be substantially the following form, to-wit:

000.00; that such bonds shall bear interest at a rate not to exceed six per cent (6%) per annum, payable semiannually, until such bonds, principal and interest are completely paid and redeemed; that the proceeds of the sale of the bonds shall be devoted to constructing, improving and repairing highways within the District, to the purchased of materials and machinery therefor, and to the payment of the necessary expenses of the District in connection therewith; that there shall be one precinct and one polling place in the District as follows, to-wit:

The entire Highway District shall constitute one voting precinct, reference being made to the order creating the said District for the boundaries thereof, and the polling place for said precinct is hereby designated to be at the City Hall in the Village of Kendrick in the County of Latah, State of Idaho.

That the polls will be open for such election at the hour of eight o'clock in the forenoon of said day and shall remain continuously open from that time until seven o'clock in the afternoon. Such election shall be conducted as nearly as practicable in accordance with the general election laws of the State of Idaho. Said election shall be by ballots and the ballots shall be substantially the following form, to-wit:

Mrs. Hugh Thompson spent last week in Pullman visiting friends.

Lloyd Waltz drove to Lewiston last Sunday with a party of friends.

Mr. and Mrs. Frank Rowe of Spokane arrived Wednesday to visit at the home of Mrs. Rowe's father, George Wright.

Letter From California

This is a beautiful morning, in fact we have had but one cloudy day since we arrived here.

A gentleman said to me the other day that they had but two crops a year here—green lemons and tourists and the motto here was to pick them quick.

I was reminded yesterday what advertising does, especially for churches. A week ago we attended one of the prominent churches here and there were no more than forty persons present. I felt as tho the preachers ought to start advertising by getting a band to parade and get a church full of people if nothing else. Yesterday, in company with Mr. and Mrs. Emmett, Mr. and Mrs. Geo. Carlson, we attended the Angeles Temple. We arrived there at 9:45 and although the doors would not be opened until 10:30, there were several hundred lined up ready to enter as soon as the doors might open. This was the first time I ever saw doors closed to keep people out of church. Before the doors were opened there were thousands in line and a great majority of these people were strangers, having come because of the advertising the Tabernacle has had.

It seems to me that the churches would take notice and not only publish that at such a church a certain minister would preach, but advertise something that would excite their curiosity. If they would do this, many preachers would not have to talk to empty seats.

The Temple and adjoining buildings are beautiful. The tabernacle is nearly round in shape, very much like the Mormon temple at Salt Lake, seating nearly six thousand. There are

two galleries extending from one end of the platform to the other. The tier of seats in the upper gallery reaches nearly to the dome. Back of the rostrum is another gallery for the choir of 100 or more. The back of the platform was beautifully decorated with flowers, flags, pictures, etc.

The services were unique. Mrs. McPherson is an accomplished actress, a forceful speaker, and from beginning to end carried the vast assemblage with her. What she said impressed one as coming from one who believed what she said. After the sermon she gave a short exhortation for those who believed, to come and stand by her on the platform, which was soon filled and several lines formed in front. Then with prayers the old time religion songs were sung by all. The orchestra was fine, the choir perfect and after the benediction one felt as tho it was good to have been there.

We did not go over the buildings as they were only open to people during week days, but we had our picnic dinner in the beautiful park adjoining. Here we met a couple of old time Kendrick boys—Walter and Roy Addison.

We paid a visit to the beautiful home of a former resident of Kendrick, Mrs. Jesse Reeves. Mrs. Reeves is a sister of C. G. Compton and aunt of Mrs. Carlson. We had a wonderful visit renewing old times and scenes.

Every day there is something of interest to see here. Today is the automobile parade and opening of the show. Also the judging a selection of several beautiful women. Tomorrow there will be something else to keep the throng of tourists interested.

One of the pleasant hours we have had was during a call on Mr. and Mrs. Marion Blackburn at their handsome home. We had the pleasure of viewing their wonderful flower garden. Mr. Blackburn used to live in the Cavendish community. He is the son of C. C. Blackburn and a brother of Mrs. M. O. Raby.

I hope the readers of the Gaz-

ette have enjoyed perusing this letter as much as I have enjoyed writing it. With kindest regards to all.—H. P. Hull.

Lime and Potash Are Big Clover Essentials

Waste of Time to Plant Crop in Poor Soil.

It is a waste of time and seed to plant clover in soil that needs lime and potash. Such is the conclusion to be drawn from the results of tests conducted at the New Jersey agricultural experiment station during the past year.

Clover failed to grow when planted in trial plots where chemical tests showed the need of lime. Timothy and clover together yielded about 1,730 pounds to the acre on soil that was limed but not fertilized with potash. Addition of potash to other limed plots brought a yield of 3,105 pounds of hay to the acre. In the second cutting, on the limed plot without potash, 300 pounds of hay to the acre was obtained and on the limed and potash treated plot 1,000 pounds.

The soil chemists at the experiment station explain that lime is needed to counteract soil acids, as clover can neither germinate well nor grow in an acid soil. Clover absorbs large quantities of potash and if large crops are removed the soil is soon exhausted of the available potash. Experiments have shown that 25 to 50 pounds of muriate of potash to the acre usually meets the requirements of clover. Sometimes 100 pounds may be needed.

Where the soil has been properly inoculated with nitrogen-fixing bacteria it is not necessary to use nitrogen fertilizers on clover. The plant has the ability to obtain its nitrogen from the air through the aid of these bacteria.

Sharp Disk Harrow Will Give Good Satisfaction

Don't start the spring work with a dull disk harrow. It is just as inefficient as a dull razor, only you can't feel it quite so keenly. If the disks have nicks in the edges, or if one side is rusted from standing on the ground, it will greatly lessen the quality of its work.

If it has been kept in fairly good condition, you can probably sharpen the disk satisfactorily with a hand-

grinding outfit, but if it is very dull you had better take it to a shop with a power grinder and have the job well done. Sharpness is particularly important if you are to use the disk over a stalk field so that it has to cut through a large amount of stalks and trash.

Other things to examine are the bearings. The chances are that the old grease is hardened and dried, and the only way you can get the bearings thoroughly lubricated is to take the disks off and scrape out all the old grease and dirt. It is very desirable to equip such a machine as the disk with grease cups which are adapted to the use of a grease gun, so that the lubricant may be forced into every part of the bearings several times during the season. A small amount of grease in the right place saves an immense amount of wasted labor.
