CLARKSTON TAKES KENDRICK GAME

Won Last Sunday Here by Score of 7 to 5.

Kendrick had a severe setback in the Valley league race last Sunday afternoon when the fast Clarkston team won an exciting game by a score of 7 to 5. The game from start to finish kept the large crowd of spectators on the edge of their seats until the last man was out in the final frame.

With the score tied in the eighth inning Clarkston secured a walk, two timely hits and scored two runs by the help of two bad errors on the part of the locals. In the last of the ninth, with two men down Glen Flesherman got a hit, followed by another by Boyd who went to second with Flesherman on third. Lawrence came to bat and a hit meant a tied score but he flew out to left field and the game ended.

The game was a pitcher's battle between Weeks and Flesherman with honors about equally divided.

The spectacular fielding of Bishop and Grim for Clarkston played a large part in Kendrick's defeat. With the bases loaded Grim caught a ball driven by Charlie White to the farthest corner of left field and ordinarily good for a home run, but it was taken in by a beautiful catch. Bishop in center made two marvelous catches by running back on two long driven fly balls by McCall and Blum, either one of which might have developed into a home run had not Bishop pulled two remarkable plays. Boyd for Kendrick garnered three walks in succession which is a little out of the ordinary.

Following is a resume of the game:

| Clarkston | Ab | R | H | SO | E |
|--------------------|----|---|---|----|---|
| Bloodworth, 3b... | 5 | 1 | 1 | 1 | 2 |
| Lindstrom, rf..... | 5 | 2 | 1 | 1 | 0 |

Kendrick at Uniontown, Clark-

Play at Uniontown Sunday

The Kendrick ball team will go to Uniontown next Sunday to play the consolidation a return game. This will be rather a decisive game as Kendrick will have to win in order to remain in the race for first or second place in the Valley league.

LOCAL NEWS FROM THE LELAND COMMUNITY

Items of Interest From The Busy Potlatch Center.

Mr. and Mrs. Lloyd Kuykendall of Kellogg are visiting with Denzil Kuykendall this week.

Miss Helen Jennings and Nadine McCoy of Southwick are visiting Miss McCoy's aunt, Mrs. H. C. Smith, this week.

Master Aubrey Oylear of Lewiston is visiting friends and relatives in Leland this week.

Mrs. David Daniels of Winchester is visiting the Porter family.

Mr. A. W. McCoy was a business visitor in town this week.

Charles Johnson had the misfortune to lose a valuable cow, Sunday. It became bloated on alfalfa.

Mrs. Cortez Powell of Clarkston is visiting her son, and daughter, Clifford Powell, and Mrs. Ben Hoffm; and granddaughter, Mrs. Howard Smith.

Several have commenced cutting hay the first of the week. The crop is reported rather below the average yield but the quality is excellent.

Fishermen returning report indifferent luck and worse owing to high water.

Mr. and Mrs. James Cook spent Sunday at Southwick with Mrs. Cook's sister, Mrs. McCoy.

The Goudzward family are home for the summer, having spent the school year in Moscow.

Albert Schultz was seen in town one day this week. His friends are glad to see him around again.

Some of those visiting the county seat this week are Mesdames A. H. Smith, L. L. Davis, Ruby McGhee, Mrs. Harry Smith and the Postmaster.

Among those attending the Sunday School program with the Leland Sunday School, were Mrs. Larkin and Mrs. Nutt of Juliaetta; Roe Parks and family of Peck and John Kavenaugh of Troy. Rev. McKee occupied the pulpit in the morning services and after a basket lunch on the lawn gave an address on Sunday school work. A very enjoyable and profitable time was had.

The Glee Club met at the home of Mrs. R. M. Smith, Tuesday evening. The attendance was very good. After song practice refreshments consisting of "hot dogs" and coffee were served.

File For Commissioner

There promises to be an interesting contest for commissioner of the third district in Latah county at the primary in August. Last Tuesday three filings were made for this office with a possibility of a fourth. G. F. Walker, who served two years as commissioner of the third district made his filing last Tuesday as did B. Brigham of Lenville. E. J. Gemmill, now serving as assessor, also filed. John Woody, now serving the third district as commissioner, has not announced his plans but it is reported from Moscow that he will likely file.

ston at Genesee, Pomeroy at Juliaetta.

Bad Earthquake in Udine, Italy

Scene in the province of Udine, Italy, following the earthquake in which a number of persons were killed and many hurt. Fascist troops are shown on the scene searching the debris for possible victims buried under the wreckage.

Band Made First Appearance

The first appearance of the Kendrick band in concert last Saturday evening, drew a large crowd from the surrounding territory, there being visitors from Lewiston, Moscow, Clarkston, Potlatch and other points. The concert by the band, assisted by the men's chorus, was highly appreciated and many complimentary expressions were heard concerning the splendid music furnished.

The band numbered twenty-five pieces and under the direction of Walter Thomas, provided some very fine musical numbers. The band is well balanced and harmonizes beautifully. The men's chorus has appeared on other occasions and is a valuable asset to the concerts. It is also under the direction of Mr. Thomas.

The next concert will be held in the park Saturday evening, June 30.

Waldron-Eichner

Miss Neva Waldron, daughter of Mr. and Mrs. Ray Waldron of Bovill, and Mr. Willard Eichner, son of Mr. and Mrs. Claus Eichner of Kendrick, surprised their many friends by announcing their marriage the first of the week. The wedding ceremony was performed by E. A. Rein at Cameron.

Mrs. Eichner is a charming young lady and is very popular in social circles in her home community. Mr. Eichner, better known here as "Tony", is an electrician for the local office of the Washington Water Power Co. He is also one of the star players on Kendrick's ball team and is highly thought of here.

Mr. and Mrs. Eichner will make their home in a new bungalow in the east end of town on school house hill. The Gazette joins their many friends in extending to them all good wishes.

Ain't It The Truth

Getting out the paper is no picnic. If we print jokes people say we are silly; if we don't they say we are too serious. If we clip things from other papers we are too lazy to write them ourselves, if we don't we are stuck on our own stuff. If we stick close to the job all day, we ought to be out hunting news. If we go out and try to hustle, we ought to be on the job in the office. If we don't print contributions, we don't appreciate true genius; and if we do print them, the paper is filled with junk. If we make a change in the other fellow's write-up, we are too critical. If we don't we are asleep. Now like as not some guy will say we swiped this from some other paper—we did.

Clarence and Harley Perryman left yesterday morning for Peck where they will operate a Bingo stand at the Pioneer Picnic today.

Mr. and Mrs. Donald Miller and son, Dale, drove to Moscow and return last Sunday.

Opal Irene Reece

Opal Irene Reece, daughter of Mr. and Mrs. W. A. Reece of Cavendish passed away at a Lewiston hospital Friday, June 8, from complications following blood poisoning, caused from a slight injury to her ankle. In spite of every attention, nothing could be done to save her life.

Opal Irene Reece was born August 30, 1915. She died June 8, 1928, age 12 years, 10 months and 8 days. She leaves to mourn her loss her parents, one sister and one brother, a brother having preceded her in death.

Opal was an unusually bright, happy girl and will be greatly missed by her little friends in school and Sunday school circles in the Cavendish community.

Funeral services were held in the Cavendish school house, June 10, at one o'clock p. m., conducted by Rev. Calvert, assisted by Fred Sapp. The song service was conducted by members of the Cavendish and Teakcan Sunday schools. By request a special musical number was sung by Opal's Sunday school classmates. The body was laid to rest in the Clearwater cemetery near Teakcan by the side of her little brother's grave.

There was a very large attendance at the funeral and the casket was banked with the many beautiful floral offerings of the sympathetic friends of the family.

Mrs. Elizabeth Compton

Funeral services for Mrs. Elizabeth Compton were held at the Kendrick Methodist church last Saturday afternoon, Rev. L. E. Taber officiating. The church auditorium was filled to its capacity by the large crowd of sorrowing friends. After the church service the body was taken to Lewiston for burial.

Active pallbearers were Hugh Stanton, G. F. Walker, Arthur May, Frank Ellis, A. K. Carlson and E. H. Emery. Honorary pallbearers were Mesdames. Ed Long, John Kite, Ira Bolon, Walter Thomas, E. T. Long, Hugh Stanton.

Mrs. Compton had lived in the Kendrick community for over twenty years. She was active in community affairs and was held in the highest esteem by a host of friends. She was born in Wales, November 27, 1852. She is survived by her husband, C. G. Compton; two daughters, Mrs. George Carlson and Maude Compton; two sons, Stewart and Chauncey; her father, four sisters and one brother.

Haul Lumber From Park

A battery of Ford trucks with combination trailers are hauling lumber from the Chambers & Duman mill near Park to Elk River. The trucks have pneumatic tires and carry only about one-fourth the load the big Republic trucks did last year. They will not injure the roads to any great extent as of last year. The lumber is hauled to the Potlatch mill here, where it is graded and dried.—Elk River News.

Immediate Results

"Well," asked a friend, "did you give your wife that little lecture on economy that you were talking about?" "Yes, indeed, I did," quickly replied the man. "Any results, yet?" questioned the friend. "Yes...I've got to give up smoking expensive cigars."—Ex.

ITEMS OF INTEREST FROM SOUTHWICK

Written For Gazette by Special Correspondent.

Roy Southwick and wife, Gordon Harris and family, Atlee Mustoe and wife, Given Mustoe and family, Harold Whiting and family, Grandma Harris and Mr. Mustoe spent Sunday at the home of Russell Rodgers.

Howard Southwick and family spent Sunday at the home of her sister, Mrs. Danforth.

Wm. Whiting and family were the guests of Mr. and Mrs. Vester Whiting Sunday.

Al Thornton of Gibbs, Idaho, was an overnight guest at the home of his sister, Mrs. Roy Southwick.

Mrs. Nels McCall of Caldwell spent the week end at the home of her niece, Mrs. Harold Whiting.

Atlee Mustoe and wife, Given Mustoe and family and Gordon Harris and wife left Monday for a fishing trip, expecting to be gone several days.

Accurate Cultivation Means Bigger Profits

"Hit-and-miss" cultivation is little better than no cultivation at all. Be ready to get all the weeds this year with a

John Deere KC Cultivator

The KC works all the soil and cuts out the weeds. Its beams are always parallel, even when dodging on crooked rows—its sweeps or shovels always point straight ahead and cut out full width and are held level—cut at same depth under all conditions. The ground is left level and weed-free.

You make every adjustment from the seat as you drive along—raise or lower both rigs at once with the master lever; space them with the spread lever; tilt them with the tilting lever. Quick dodge through pedal control—your boy can do thorough work with the KC.

Drop in and see the KC next time you are in town.

Anton Nelson returned home from Moscow last week.

Fanning Mill to Clean Seed Most Satisfactory

A few hours spent indoors cleaning seed with a fanning mill may save many days in the hot sun next summer and will pay handsome dividends in the form of bigger and better crops.

A farm fanning mill operated at the correct speed and equipped with the proper sieves and screens is capable of doing an excellent job of cleaning clover, alfalfa and other seeds. Since experiments have shown that the main object of cultivation after the preparation of the seed bed is the eradication of weeds, and since most weeds are introduced by means of impure seed, the use of cleaned seed will save a great deal of future work. The value of a good fanning mill in cleaning farm seeds has been demonstrated by hundreds of farmers.

Agricultural Hints

Soy-bean hay as a roughage is equally as valuable in the ration as is the seed.

The main thing in inoculating soy beans is to make them real dirty with the right kind of dirt.

Swiss chard belongs to the beet family and is grown the same way—in rows thinned 6 to 12 inches apart.

Treating fence posts with creosote makes many kinds of wood posts last 20 or more years. The treatment costs but little.

Let the hoe be your garden putter, brassie and nibble, for half an hour a day, and you will surprise yourself with a weedless garden.

POULTRY

BATTLE WORMS AND DISEASES

"Wage War on Worms and Disease" is the slogan adopted by the poultry specialists of the New Jersey State Agricultural college, who suggest seven "words to the wise" in a campaign against disease in New Jersey.

"Hatch or Buy Chicks Early" is the first. Figures from the farm egg-laying contest for five years show that chicks hatched before May 15 produced 75 eggs the first six months from November to May, and those hatched after May 15 produced 68 eggs for the same period.

"Keep Brooder House Clean." The steps suggested for cleaning a brooder house thoroughly are: first, scrape the floor, thus removing all accumulated droppings and litter; second, sweep the ceiling, wall, and floor; third, scrub the floor, side walls, and window sills with hot lye solution; fourth, clean all brooding equipment; and fifth, after the house is dry spray with an approved disinfectant.

"Provide Clean Range or Close Confinement." By clean range is meant ground on which no chickens have been raised for at least a year and where no poultry manure has been scattered for at least two years.

If room is so limited that clean range cannot be provided, close confinement is recommended.

"Keep Old and Young Stock Separate." Do not let the youngsters come in contact with the laying stock which may be carrying the germs of coccidiosis and roundworm while being apparently healthy.

"Build Screen Manure Pit." This will partially eliminate the common fly which is a fruitful source of worm infestation.

"Supply Wire Dropping Boards." As dropping boards furnish a good source of infection, these should be screened to prevent the birds from walking on the droppings. A half-inch mesh wire stretched tightly beneath the roost poles is recommended.

"Clean Dropping Boards Daily." From May to October, droppings should be cleaned from the boards and placed in the screen manure pit.

Gapeworm Pest Spread to Chicks by Turkeys

United States Department of Agriculture, in discussing gapeworms, points out that the two most important items in the control of this pest are, first, to keep the little chicks away from turkeys, and, second, to brood chicks only on clean ground. Turkeys may carry gapeworms at any age, the grown birds showing no evidence of their presence. The department reports that in most of the outbreaks investigated turkeys have been present on the infested farm.

Ground on which chicks have been raised before and on which mature poultry has raised is almost certain to be infested with eggs of the roundworm and tapeworm, as well as the gapeworm. Hence the young chicks should by all means be put on clean ground each year. Plowing the lots is quite effective in breaking up parasite trouble.

Poultry Hints

Do not turn lights off too early in the spring.

Too much bulk cannot be handled by young chicks.

Early roosting keeps the chicks from crowding into the corners.

Fowls can be culled at night by use of flashlight with a blue-tinted bulb.

Do not stop feeding early and late in the day when lights are finally left out.

Giving the chicks some form of milk at the start stimulates their appetites and promotes growth.

A suitable mash, fed throughout the summer, balances the grain ration and keeps the chicks growing without any setbacks.

Any shelter that protects fowls from storms and severe weather is an incentive to egg production.

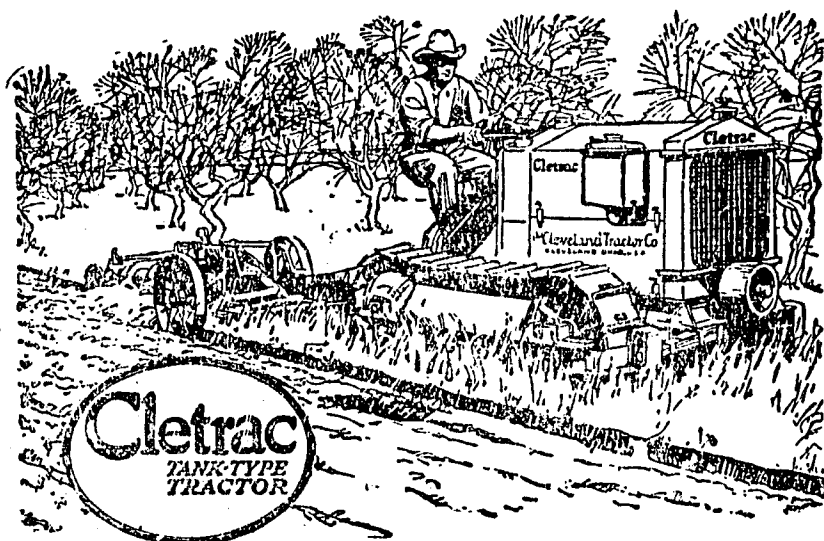

Sometimes (but not always) goslings will live and make some growth if compelled to rely on their own resources to get nourishment.

The extra expense for a double floor in the brooder house is a good investment. A warm and dry floor can be made by including a sub and top floor with a layer of tar paper between them.

Plymouth Rock hens with extremely small combs are apt to produce small eggs, it is claimed by breeders.

Removing the cockerels at broiler age gives the pullets more room to grow and develop. Birds of both sexes will grow better when separated.

During the muddy days of spring it will be well to keep the layers shut in the house during the forenoon to avoid tracking the nests with muddy feet and thus soil the eggs which discount them for market purposes.

Gleaner and Gleaner Baldwin Combines

Folks! Look This Machine Over Thn Ask Me all The Questions you Wish.

MACHINE IS ON DISPLAY AT KENDRICK

Did you ever stop to think about your bean threshing, how much expense you have before you get them in the sack the old way? Now then let me tell you the way to put Beans into a sack for less money than it formerly cost to put beans into piles. Simply cut and rake the beans into a wind row, let them dry, then driv along each row with the Little Baldwin; it picks up the row, threshes it, and sacks the beans—once over all over. We absolutely guarantee this machine to do perfect work in any grain. Many times people have asked me this question: "How can this auger conveyor carry long straw and long mustard into the cylinder?" Here is a letter from a man who knows. Read this and then decide for yourself.

Kimball, Neb., 11-2-26.

The Baldwin Harvester Company, Kansas City, Mo. Gentlemen:

I employed your men that were doing work with The Baldwin. They harvested about 275 acres for me and I will say it is the best Combine Harvester and thresher I ever saw. I had wheat that made 35 bushels per acre that had mustard in it so thick I thought it would be impossible to cut it at all and they harvested it and did not have a stop after Mr. Geo. Baldwin regulated the machine to suit those conditions and it did not take him but a very few minutes to do it.

They cut wheat that made 60 bushes per acre for me. It was down and tangled so bad that two of the larger combines of another make tried to cut this said grain and failed to do it. Their platform canvas would not put the grain to the cylinder, but the little auger in the platform of The Baldwin seemed to be suited to those conditions and did not make a stop.

The Baldwin is the most economical machine I have ever seen. They oiled it in the morning and did not oil any more until noon and it did perfect work, cleaning the grain.

Any one that is thinking of buying a Harvester-Thresher it will pay them to look The Baldwin over before buying, is my opinion.

Yours truly,
J. C. Moss, Kimball, Nebr.

We could give you hundreds of letters just like this. Why does the Baldwin have a rasp type cylinder? Why then does the Harris Combines, the oldest and one of the best combines built, come out with this same type cylinder? It must be better or they would stay with the old type cylinder teeth.

Look into facts before you buy. The Harris has the most separating capacity of all machines and the Baldwin has still more in proportion to width of cut. Why? Because the cylinder is mounted on the cutting bar and starts separating right there. And that is not all, the rasp cylinder does not chew the straw up like a tooth cylinder. Straw passes out whole and the result is the separating is so much easier and cleaner.

This machine is as much advanced in the combine line as the 1930 automobile will be at this time.

I will give you the best of service, see that your troubles are few. This combine is going over the top the same as the Cletrac tractor has done throughout the world on farms. Watch the new Cletracs when they come. Here is what we see next, A Cletrac crawler far advanced. Three speeds, electric starter, lights and everything up to date, same as automobiles. Power farming is here and will always be here.

Gleaner Combines mounted on Fordsons.

Baldwin Combines pull type, any size 9 to 12 foot.

Oliver Plows, Superior Drills, Oliver Discs.

W. F. BEHRENS

JULIAETTA, IDAHO

Extreme in Ingenuity

A Pittsburgh newspaper man who already has a contraption in his bed room for opening the door and extinguishing the lights without the necessity of his rising from bed just added another invention. While in bed he tennag to his radio, he holds in one hand a weight, to which is attached a cord connected with the control. When he falls asleep, the weight drops from his hand and shuts off the radio.

Now Otherwise Employed

A church in London still possesses an income originally given to it for the purpose of buying faggots with which to burn heretics.

Box Trees

The Cyclopedia of Horticulture states that there are 30 species of the genus Buxus (box tree). The species of box most widely planted is Buxus sempervirens, the common box tree. This, in turn, has 13 different varieties. The dwarf variety of Buxus sempervirens (Suffruticosa) is most widely used where small growth is desired.

Three Widely Read Books

It has been estimated that there are only two books in the world that have exceeded the circulation of "Pilgrim's Progress"; these are the Bible and the Koran.

Soldier of Fortune

Michael Andreas Barclay de Tolly was a Russian field marshal, who lived from 1761 to 1818. He was a descendant of a Scottish family which had settled in Russia in the Seventeenth century. He served against Napoleon in the campaign in Germany. Later he was commander-in-chief of the Russian army and for his service was made a prince.

It's All of That

Speaking of Irish bulls, here's a clipping from a Galway newspaper: "To rob a man of his purse and then maltreat him for not having it would pass muster among pitiless, brutal crimes, but to kill and slay a man to the point of death and then murder him for not dying quick enough is one point better in the catalogue of human infamy."—Exchange.

PURE-BRED DAIRY SIRE ARE BEST

(Prepared by the United States Department of Agriculture.)

Only 25 per cent of the bulls at the head of dairy herds in the United States are pure bred, yet thousands of pure-bred dairy bull calves are slaughtered for veal every year because there is no demand for them as breeders. Undoubtedly some of these calves are inferior and ought to be slaughtered, says W. E. Wintermeyer, dairy husbandman of the United States Department of Agriculture, but most of them are far superior to the grade and scrub sires that are now being used in many dairy herds.

Many dairymen with small and medium-size herds, which often contain poor cows, say they cannot afford to own a pure-bred dairy bull because of the high original cost. In reality, says Mr. Wintermeyer, these men can least afford to own an inferior bull.

In a new publication just issued by the bureau of dairy industry, as Leaflet No. 16-L, "Pure-Bred Dairy Sires," Mr. Wintermeyer quotes figures obtained from the records of dairy-herd-improvement associations in all parts of the United States that show how rapidly a good dairy sire can increase the production of a herd of average cows. Cows in these herds having an average yearly production of 4,085 pounds of milk and 179 pounds of butterfat a year and mated to pure-bred sires, produced daughters that averaged 7,607 pounds of milk and 300 pounds of butterfat, a gain in one generation of 2,912 pounds of milk and 121 pounds of butterfat per cow.

This increase in butterfat production, at 50 cents a pound, is worth about \$60. Allowing about 25 per cent for the extra feed required for the higher production, the value of the net gain per daughter due to the pure-bred sire would be about \$45. A pure-bred bull would need to sire only a few such daughters to pay for himself, and the yearly income would be increased by an amount equal to \$45 multiplied by the number of his producing daughters.

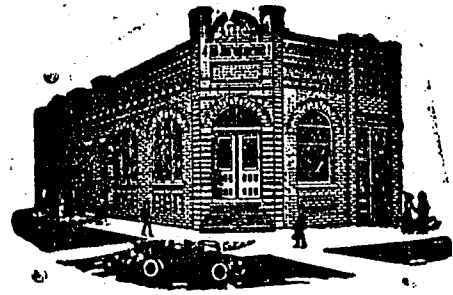

A copy of the leaflet may be obtained by writing to the United States Department of Agriculture, Washington, D. C.

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.

FLORA D. VANFLEET, Plaintiff,
vs.
EUGENE F. VANFLEET, Defendant.

THE STATE OF IDAHO sends greetings to the above named defendants.

You are hereby notified that a complaint has been filed against you in the district court of the second judicial district of the State of Idaho in and for the County of Latah by the above named plaintiff, and you are hereby directed to appear and plead to the said complaint within 20 days of the service of this summons; and you are further notified that unless you so appear and plead to said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint. The nature of the above entitled action in general terms is to procure a divorce on the part of the plaintiff on the grounds of Desertion as will be more fully shown in said verified complaint.

Witness my hand and the seal of said district court, this 15th day of May, 1928.
HARRY A. THATCHER, Clerk.
By Adrian Nelson, Deputy Clerk.
(Seal of Court Affixed)
A. H. OverSmith, Attorney for plaintiff, Residence and P. O. address, Moscow, Idaho 20-5

NOTICE

Notice is hereby given that Harold McManus, will at the next regular meeting of the Board of Pardons of the State of Idaho, make application for a pardon from that certain judgment of conviction of Burglary, made and entered in Latah County, Idaho on or about May 31, 1921.
(Signed) Harold McManus. 20-4

Notice to Creditors

Estate of Annie Kinzer, Deceased.
Notice is hereby given by the undersigned, administrator of the estate of Annie Kinzer, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers within six months after June 1st, 1928, the first publication of this notice, to the said administrator at The Bank of Juliaetta, Juliaetta, Idaho, the same being the place for the transaction of the business of said estate, in Latah County, State of Idaho.
C. B. KINZER
Administrator.
Dated at Juliaetta, Idaho, May 29th, 1928. 23-5

Notice of Sale of Real Estate

In The Probate Court of Latah County, State of Idaho.

In the matter of the Estate of Columbus N. Clark, Deceased.
Notice is hereby given, that pursuant to an Order of the Probate Court of Latah County, State of Idaho, the undersigned Administrator of the Estate of Columbus N. Clark, deceased, will on Saturday, the 30th day of June, 1928, at Ten o'clock A. M., at the front door of the Bank of Juliaetta, Latah County, State of Idaho, sell at public auction to the highest and best bidder upon the terms hereinafter set forth, the following described real estate situated in Latah County, State of Idaho, to-wit:

Northwest Quarter (NW¼) of the Northeast Quarter (NE¼) of Section Twenty-two (22) in Township Thirty-eight (38) North, Range Four (4), W. B. M. Terms of sale will be 10 percent cash on the date of sale and the balance to be paid by the purchaser upon the confirmation of such sale by the above entitled court.

WITNESS, my hand on this 6th day of June, 1928.
A. W. BEERENS,
Administrator of the Estate of Columbus N. Clark, Deceased. 23-4

Sizzling Ardor

Alaska's Long Coast Line

The coast line of Alaska is longer than the Atlantic and Pacific coast lines of the United States put together. In nautical miles they measure: Alaska, 4,123; Atlantic coast line, 1,773; Pacific, 1,571.

DAIRY

DAIRY INCOME IS MOST CONSTANT

Gross cash income to farmers from the sale of dairy products has been more stable during the past eight years than the gross cash income from any other department of agriculture, according to figures which have been analyzed by V. R. Wertz of the Ohio agricultural experiment station, working with the rural economics department of the Ohio State university.

Wertz has studied the gross cash income of agriculture as an index of farm prosperity which is more reliable than unit price indicates, because it shows the volume of business done. His statistics are based upon an index of 100, which is the average gross cash income from the principal sources, in 1924, 1925 and 1926.

On this basis the dairying income started in 1920 at 147 and dropped with all other sources of income, in 1921 to 97, which was a shorter drop than was shown by any other group of commodities, and was seven points above the total gross cash income.

In 1922 there was a further drop to 91, which was three points above the figure for the total. It was above the index for every other department except the sale of meat animals. Dairying income soared in 1923 to 116, the highest figure reached by any important department of farm industry since 1920, and 21 points above the total income index. It dropped in 1924 to 103, but was still above all other figures. In 1925 the index was 97, three points below the figure for the total, and in 1926 dairying income belied its past performance by registering 99, the lowest of all the indices.

In 1926 all important departments of farming other than dairying showed peaks as compared with 1925. But in 1927, according to preliminary estimates, there was a sharp drop which was not shared by the dairying branch. While the index for the total income in 1927 was down to 91 points, dairying remained at 99, the point reached in 1926.

The average index for the eight-year period for dairying income was 108 points, while the total gross income average has been 102 points.

Income from the sale of dairy products makes up approximately 23 percent of the total cash income of Ohio agriculture.

Bad Flavors and Odors in Milk Due to Weeds

Bad flavors and odor in milk and cream are common in spring due to wild onions and other weeds in pastures. Taking the cows off pasture at least three hours before milking is advised as a preventive measure. Even if the pasture contains no wild onions, sudden change to grass in the spring is apt to develop bad odors in milk. Some additional feed should be given when the pasture season opens. The grass is short and it does not at first provide sufficient nourishment to maintain the milk flow. A small amount of grain and hay will pay well until grass has made a good growth.—John Tollver, Deputy State Dairy Commissioner, Colorado Agricultural College.

Keep Calves in Dry Lot Until They Are Marketed

Calves which have been full fed on grain during the winter, with the intention of marketing them, ought not to be turned on pasture before they are shipped. These calves should be fat enough so that they can be finished in the feedlot and marketed by the first of June. If they are turned on grass for a few weeks they will not make as good gains as in the feedlot. Changing from dry-lot feeding to pasture causes the calves to scour somewhat and consequently their gains will not be as good as they will be if kept in the dry lot until ready to ship to market.

Get Rid of Cows Giving Very Slimy or Ropy Milk

Milk drawn from cows affected with a bacterial udder trouble, known as garget, is sometimes called ropy. In reality, it is merely very slimy. It is almost impossible to strain slimy milk through cheesecloth. A cow may contract it from an udder bruise, by lying on a cold floor, or from faulty feeding. Some cows have the trouble frequently. In such a case it is best to get rid of them. Others have it only occasionally and are cured by cutting down the feed and giving them a dose of epsom salts and a teaspoonful of saltpeter in the feed each day for two or three days.

Insufficient Pay

When some people get their check from the creamery they are apt to look on both sides of it, for they wonder if it is sufficient to pay for the feed that the cows have eaten. The resulting effect of this idea usually takes effect in either one of two forms: they either change the market place for their cream or they try to economize on the feed that is consumed by the cows. Some cows that are star boarders should be put into the fattening pen.

Giving Eggs Air

Cooling the eggs gives them an airing and replaces the stale air in the egg chambers. It also slows down the hatch. The early hatches need no cooling except the amount received while they are turned. If the eggs are cooled too much twice a day it is evident that it will take some time to bring them back to 103 degrees. It often means that three or four hours out of each twenty-four the eggs will be developing at a temperature below 103 degrees.

Nature's Wise Ruling

Nature is just toward men. It recompenses them for their sufferings; it makes them laborious, because to the greatest tolls it attaches the greatest rewards.—Montesquieu.

FRANK CROCKER

LOCAL NEWS

Byard Davidson of Colton, Wash., was a Kendrick visitor the first of the week.

Mr. and Mrs. Lester Crocker and little daughter arrived the first of the week to spend two weeks with home folks.

Mr. and Mrs. Wm. Freytag, May and Ted, and Neva Ware returned, Tuesday from an auto trip to Seattle.

Mr. and Mrs. Walter Thomas and son, drove to Fenn last Sunday to spend the day with friends.

Mrs. George Carlson arrived last Friday from Long Beach, Cal., to attend the funeral of her mother, Mrs. C. G. Compton.

Mr. and Mrs. N. E. Ware, Mr. and Mrs. Jake Berriman and Mrs. Annie Oylear went to the mountains the first of the week for a few days camping trip.

Mr. and Mrs. John F. Waide and two sons of Deary spent last Sunday in Kendrick with relatives.

Mr. and Mrs. George Anderson and two daughters, Mr. and Mrs. Hanson of Pottlatch attended the band concert in Kendrick last Saturday evening.

S. D. White of Lewiston was transacting business in Kendrick the first of the week.

Mr. and Mrs. A. R. Shumaker of Pullman, Mr. and Mrs. Frank Candee of Moscow visited friends in Kendrick last Sunday.

Mrs. Opal Patty of Spokane visited her mother, Mrs. N. C. Thomas, the first of the week.

Mr. and Mrs. Wm. Deobald and family were Lewiston visitors last Tuesday afternoon.

Mr. and Mrs. P. Larson of Leon, Kansas, arrived last week to visit at the Frank Souders home. Mr. Souders had not seen his sister, Mrs. Larson for nearly 45 years.

Mr. and Mrs. Neal Nelson of Clarkston attended the band concert here last Saturday night.

Mrs. Walter Thomas and little son left yesterday morning for Pierce City to visit at the home of Mrs. Kennedy.

G. F. Walker was transacting business in Moscow the first of the week.

Band Master Thomas desires a full attendance at the Monday night rehearsal of the band. It is hoped that every member will be present.

Weasels Kill Chinese Pheasants

The production of the Lapwai state game farm has been set at 5,000 Chinese pheasants for release over the state this fall, according to Charles W. Myers, superintendent, says the Tribune. Mr. Myers reports 4,000 young birds now on the farm and 3,000 eggs for setting. This will make a total of 7,000, if all eggs are hatched and all birds are reared to the age for releasing. Mr. Myers has cut his estimate because of the depredations of weasels, which have not been entirely eliminated.

The weasels made their first appearance several weeks ago and while a large number have been killed, others seem to be arriving almost daily so that the losses from this source have been unusually heavy. Farmers of the Lapwai region report weasels in large numbers, a condition never before known in the Lapwai valley.

The fight on weasels is difficult because of the presence of a network of squirrel holes in the area used for the brooding pens. Much of the ground has been plowed but the weasels use the old holes and make their own exits within the enclosures of the brooding pens. Their appearance is heralded by the alarm of the brood hens but losses always result and the continual depredations have greatly reduced the number of young Chinese pheasants hatched at the farm.

Cavendish To Celebrate

Mitch Blackburn was in town Wednesday of this week and stated that Cavendish would put on a big celebration July 4th, in view of the fact that Southwick had decided not to sponsor a celebration.

Cavendish has had considerable experience along this line and has staged a number of very successful celebrations in the past. Advertising will be out in a few days giving an outline of

the day's events.

Salvation—Piped

A colored preacher had just concluded a sermon on "Salvation Am Free," announced that a collection would be taken for a benefit of the parson and his family. A member in the audience objected to the paradoxical nature of the proceedings and received this bit of negro logic in response: "S'pose yo' was thirsty an' come to a river. Yo' could kneel right down an' drink your fill, couldn't yo'? An it wouldn't cost yo' nothin.' Dat water would be free. But s'pose in' yo' was to hab dat water piped to yo' house, yo'd have to pay, wouldn't yo'? De salvation am free, but it's de habin' it piped to yo' dat yo' got to pay fo'."—Ex.

Crescent Clippings

Alice Craimer and Sue Roberson called on Adaline Dorendorf, Thursday afternoon.

Alice Hunt is visiting at the James Farrington home this week.

Mrs. Wm. Kauder, Alice Craimer and Sue Roberson visited at the Frank Souders home Monday afternoon.

Mr. and Mrs. A. Dorendorf and daughter, Adaline, Mr. and Mrs. Wm. Dorendorf and daughter, Nellie, Mrs. Anna Kimbley and children and Alfred Swanson were Sunday visitors of the Wm. Riley family at Kendrick.

Mrs. Gus Farrington and children visited with Mrs. C. L. Trail Sunday afternoon.

Marvin Souders had the misfortune to break one of the bones in his left forearm, Sunday. He was taken directly to Dr. Morehead in Kendrick to have it set.

Geo. Longteig and daughter, Helen of Boise, Iver Longteig and daughter, Norma, of Craigmont and Nels Longteig of Southwick made a short visit at the John Darby home, Sunday afternoon.

Linden News

T. P. Fisher and Mr. Allen of Moscow arrived Tuesday to spend some time camping out on Mr. Fisher's farm, hoping that the camping life will be beneficial to Mr. Fisher's health.

Miss Lucille Darby recently received her diploma for passing the eighth grade in the May examinations.

Mrs. C. H. Fry called on Mrs. McPhee and Mrs. Starr, Tuesday afternoon.

Arley and Aunt Carrie Allen and Miss Eva Smith were shopping in Lewiston, Wednesday.

Mrs. Kent is enjoying a visit with her sister Miss Pearl Morgan.

Mr. and Mrs. Earl Dunham and sons of Clarkston spent Sunday at the L. Alexander home.

A number of people from here attended the Band Concert and picture show in Kendrick, Saturday evening.

Mr. and Mrs. Harry Langdon and sons spent Sunday at the Allen home.

This is quite a measley neighborhood at present as some of the Whybark, Sadler, Israel, Darby, Garner, Lyons and Fry families have them.

Mrs. McPhee and son, Cleve, George and Eva Smith were callers at the Elmer Steart home in Juliacta Sunday afternoon.

Mr. and Mrs. Joe Perry of Troy spent Sunday at the Sadler home.

Mr. and Mrs. Addie Alexander returned Monday evening from Winchester where they spent the week end with Mr. and Mrs. Clyde Alexander.

Card of Thanks

We wish to extend our heartfelt thanks to our neighbors and friends for their help and kindness through the sickness and death of our daughter, Opal Ilene, and for the many beautiful flowers, song service and the service of the minister.

Mr. and Mrs. Wm. Reece and family.

Card of Thanks

We wish to thank our friends for their kindness and assistance during the illness and after the death of our wife and mother; also for the beautiful floral offerings.

C. G. Compton and family, Mr. and Mrs. Stewart Compton and family, Mr. and Mrs. George Carlson.

Fertilizers Saving Labor and Freight

Idea of Concentrated Form Developed by Chemists.

(Prepared by the United States Department of Agriculture.)

Potato growers are finding in the use of concentrated fertilizers an opportunity to save time, money, and labor, says B. E. Brown, soil chemist of the bureau of chemistry and soils, United States Department of Agriculture. By using this new form of fertilizer, one pound of which carries as much actual plant food as is carried by two pounds of the ordinary kind, they save in freight, in handling, in hauling, and in storage.

The idea of manufacturing fertilizers in the concentrated form was developed by the soil chemists of the United States Department of Agriculture. According to Mr. Brown, cooperative experiments with the Maine agricultural experiment station indicated that the concentrated mixtures on the whole were equal to the commercial kinds. In some cases they gave even greater yields. Yields of Irish cobbler produced by concentrated fertilizers were as high as 300 bushels to the acre.

There are features connected with the use of concentrated fertilizers, however, that will have to be carefully considered and which will require more study before the free use of such fertilizers can be definitely recommended, under all soil conditions, says Mr. Brown. This is particularly true of light soils.

Cleaning Seed Grain by Use of Fanning Mill

Wise farmers are making provision for cleaning seed grain. With small grains especially, it pays to plant the plump, sound, solid grains because they are most likely to have strong germination and to have a germ that will give the plant a good start should the weather conditions be difficult.

A fanning mill should be part of the equipment of every progressive farmer. They are not expensive, but the work they do is tremendously valuable. Practically any farmer can make one pay many times over with a single season's work.

Fanning mills not only separate the weed seeds and foreign material from seed grains, but they grade the grains, too, so that the lighter, chaffier stuff, which is likely to be of low vitality, is kept out of the seed. Experiments show that plump seeds produce bigger yields and even an increase of only a bushel or two per acre on this account will be sufficient to make the grain-cleaning process profitable. In the Northwest grain dockage has come to be a very serious problem. The dockage costs of weed seeds and other foreign materials sometimes amount to 15 per cent or 20 per cent or 25 per cent. It not only is practically valueless, but it impairs the value of marketed grain so that the money received for it is much less than what it should be.

A few hours spent in cleaning seed grain will return great profits.

Machine Shed Pays Big Interest to Any Farmer

A \$400 implement shed pays interest at the rate of 22 per cent a year when housing \$1,000 worth of machinery. The average yearly depreciation on \$1,000 worth of machinery, when well housed, is \$90; but it increases to \$130 a year when the machinery is poorly housed. The \$90 difference in depreciation is 22 per cent of \$400—the cost of a satisfactory tool shed, one that is weather-tight and lasting. This estimate does not include a work shop, which is often advisable.

Well housed farm machinery depreciates at a rate of from 3 to 12 per cent a year, depending upon the kind of machine, the rate being highest with corn binders, threshing machines, and other complicated machinery. It is safe to say that poor housing reduces the life of a machine by half.—Wisconsin Circular No. 110.

Agricultural Notes

Supply pure fresh water and salt in both summer and winter.

The most natural comparison of sweet clover is with red clover.

Red clover is a general purpose legume, especially valuable for hay.

Carrots are easily raised if the soil is good, and by sowing early and growing quickly will usually do well.

The United States is the most important poultry producing country in the world, raising more than one-third of the world's supply.

Regardless of the kind of fuel that is used, the brooder stove should be tested at least 48 hours before the chicks are placed in the brooder house.

A mixture of oats and rape for early spring hog pasture is excellent. If not pastured too closely, this mixture will furnish pasture until mid-summer.

Lambs will do a good job of picking corn; in fact, pick it cleaner than is usually done by the picker. Then, too, they will eat the husks and leaves of the corn, and nearly all of the weeds that have gone to seed.

Sunshine Specials

Here are the Sunshine specials, sending gleaming value rays for miles around and warming the hearts of thrifty folks.

- Jap crepe, all colors, per yard 22c
- Fancy silk ties 30c to 50c
- Ready made sheets for \$1.50
- Ladies' fancy belts 30c to 50c
- Stamped pillow cases \$1.00
- Silk gowns, Slips and Bloomers.
- Gaze Marvel with silk stripe in many colors, priced per yard 50c
- Rayola, a silk and cotton fabric, per yard 98c
- Ladies' silk hose in many colors, a pair 48c

For the Men and Boys

- Evr-Kool straw hats for men 95c
- Men's bibb overalls, a good buy at \$1.29
- Men's athletic unionsuits 60c
- See our specials in men's work pants.

Bathing Suits for the Whole Family

- Glass rolling pin with Fishers cane-maple syrup 69c
- One gallon of sweet pickles \$1.65
- Sandwich spread 20c
- Pint of mayonnaise, a special at 35c
- One-half pint mayonnaise, a special at 20c
- Big bag of gingersnaps for 35c

How Many Cabbage Plants Are Required Per Acre?

The question is often asked how many cabbage plants are required to set an acre where they are placed three feet each way. It is very simple to figure this for any planting distance. The distance between the rows is multiplied by the distance between the plants. In the case of cabbage where it is set 3 by 3 feet, we would multiply 3, the number of feet between the rows by 3, the number of feet between the plants in the row, giving us 9 square feet. The figure is divided into 43,560 square feet (the number of square feet in an acre). Cabbage set 3 feet by 3 would give us 4,800 plants per acre, assuming that the acre is full to the margin. The square acre contains little less, than 200 feet on all sides.

Square of Sod Pleases

Chicks and Broody Hens
A square of sod, dirt up, in the brooder will give chicks a good time picking at the bits of soil and gravel adhering to the roots, and scratching like old hens to get it. A square of sod makes also the best base for a nest for broody hens. Take a box not less than 12 by 10 inches. Fit some newspapers in the bottom, and on top of that place a piece of sod dirt up, and mold the nest to fit the body of the hen and prevent the eggs rolling into corners. If the box is set on a cement floor, put slats under to allow the free passage of air. Three days before setting the hens, treat them with sodium fluoride for lice.

Agricultural Squibs

A muddy barnyard is a fine breeding place for flies. Good drainage is the solution.

Cutworms can be controlled with poisoned bran mash, scattered in the late afternoon or early evening at the rate of 15 pounds to the acre.

On rainy days repair that piece of machinery you need later on. It will save time when the machine is in the field. A stitch in time may save the wheat.

Women "Jurymen"

Jury service for women dates back to Babylon times, 2300 B. C. Centuries ago English law provided for woman juries in specific cases.

English Highways

In English history, the highway was designated as the main public road which was the subject of special royal enactments controlling the policing of it. It was, therefore, popularly referred to as the "King's" or "Queen's" highway.

Monster Pudding

One hundred years ago one of the world's largest plum puddings, the Wellington pudding, was made in London. It weighed 450 pounds and took four days and four nights to cook. The ingredients included three gallons of brandy and wine.

New Prices on Flour

Pay Cash and Save

- "400" per barrel \$7.80
- Princess per barrel \$7.60
- Asotin per barrel \$7.40

HEADQUARTERS FOR

Mill Feed, Hay and Grain

This is headquarters for anything in the feed line. We buy and sell hay and grain and always have a stock of mill feed for your needs. We are glad to serve you.

POULTRY FEED

The poultryman will find that he can do well here as we keep a full line of chicken feed and at prices you can afford to pay. If you need Egg Mash, O. K. Scratch Feed, Bran and other poultry feed, get our prices before you buy.

Highest Market Prices

Paid for your hay and grain. A good place to sell as we are glad to look after your interests.
