KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, JUNE 22, 1928

No. 25

UNIONTOWN WINS FROM KENDRICK

Takes Game by Close Margin of 9 to 8 Score.

Last Sunday Kendrick lost a close game at Uniontown with a 9-to-8 score. It was a hard fought battle and several times looked like Kendrick's game. The score was close enough to make it interesting to the small crowd of spectators present.

Following is a resume of the game:

Kendrick	Ab	R	H	SO	E
Boyd, lf.	5	3	1	0	0
Hudson, rf.	3	0	0	2	0
Blum, cf.	5	0	2	0	0
T. Eichner, 2b.	5	0	1	1	0
McCall, lb.	5	0	1	1	0
White, c.	5	1	1	1	1
Kulick, ss.	5	1	2	0	1
J. Fleshman, 3b.	4	2	2	0	1
G. Fleshman, p.	4	1	1	1	1
*Lawrence rf.	2	0	0	0	0
Totals	43	8	11	5	5

*Lawrence for Hudson in 7th.

Results Last Sunday
Uniontown 9, Kendrick 8.
Genesee 16, Clarkston 1.
Pomeroy 9, Juliaetta 1, game forfeited, not played.
Lewiston 8, Grangeville 1.
Orofino 5, Winchester 3.
Lapwai-Nezperce, no game on account of wet grounds.

Wednesday of this week Winchester and Nezperce play off a postponed game resulting in a score of 10 to 3 in favor of Nezperce.

Valley League

Won	Lost	PC	
Pomeroy	7	2	.778
Uniontown	7	3	.700
Kendrick	5	3	.625
Genesee	4	5	.444
Clarkston	3	7	.300
Juliaetta	2	8	.200

The game between Clarkston and Kendrick which was protested a week ago, was ordered to be played over. Clarkston refused to play and the league officials credited Kendrick with having won the game.

Central League

Won	Lost	PC	
Lewiston	6	2	.750
Nezperce	5	2	.714
Winchester	5	3	.625
Orofino	5	3	.625
Grangeville	3	7	.300
Lapwai	0	6	.000

Games Sunday, June 24
Genesee at Kendrick; Juliaetta at Uniontown; open dates for Pomeroy and Clarkston.
Lapwai at Orofino; Winchester at Lewiston; open dates for Nezperce and Grangeville.

A number from here attended the celebration at Helmer, Wednesday.

COMMUNITY NEWS FROM JULIAETTA

Items of Interest From Our Neighboring Town.

This is the time of year when the unusual happens or else I would not venture to tell this remarkable happening. Some parties who had been out pleasure seeking Sunday, were in Mr. Noble's store Monday exchanging remarks about their trips. The main topic was the cold weather Sunday, and Mr. Noble said it was so cold where they were that the water, which dripped from a leak in his radiator froze and formed quite a heap of ice, and strange, but had we not accidentally seen Mrs. Noble wink we would have believed it. Mrs. M. Nutt and Miss Crystal Ottosen made a business trip to Elk River Sunday. Mrs. S. Gruell, Mrs. W. Baune and Cecil Gruell were indeed glad to have received an invitation to join them.

Dr. Smith is home from Lewiston where he has been confined to a hospital on account of illness.

Mr. and Mrs. Cardinal and children and Mrs. Huntsberger were Kendrick visitors, Saturday.

Mrs. M. Nutt, Miss Ottosen and Mrs. Eben Adams went to Lewiston, Thursday. Mrs. Nutt is taking steam baths which are benefiting her a great deal.

Albrights lost a cow Tuesday which was killed by a train.

A number of boys went to Mr. Albright's Wednesday to pick cherries. Mr. Albright is one of the fortunate ones who has cherries to pick.

The failure in the cherry crop not only works a hardship on the growers but also on the pickers. Good cherry pickers make splendid wages.

A party including Mr. and Mrs. Amos Nigh and family, Mr. and Mrs. Herb Millard and family, Mr. and Mrs. Willard Kite and daughter, Mr. and Mrs. John Kite and family, Mr. and Mrs. Floyd Millard and daughter, Mr. and Mrs. Ernest Welch and family, Mr. and Mrs. Marion Rathburn, Mr. and Mrs. Ernest Sams and family Mr. and Mrs. Roberts and family, Mr. and Mrs. James Whalen and daughter, Mrs. Tony Agrell, Mr. and Mrs. Elmer Stewart and family, Mr. and Mrs. Fred Nye and family, Mr. and Mrs. Geo. Schull, Mr. and Mrs. Sam Nye and two sons, Mr. Richmond and Louis Richmond, Miss Mary Bulen, Mr. and Mrs. Everette Custer and Leona Gruell were picnicking at Sweetwater Sunday. If this party ate anything like our own little picnic party ate, we're wondering how they got all the eats to their destination. Here's hoping they didn't lose their ice cream like we did, but we will never tell how we lost it.

Juliaetta has had some unusually fine strawberries on the market this week. The flavor was fine and the berries unusually large.

Mr. and Mrs. Wm. Fields and Mrs. Maude Carlson passed thru Juliaetta yesterday enroute for Boise.

A DAY IN THE WOODS

I have always felt very sorry for two classes of people. One class is the person that is a dweller in cities of paved streets and syk-scrapers, who is never privileged to spend a day with nature—just as God made it. The other class with whom I sympathize is the one who does not appreciate nature just as God made it.

I was privileged to spend Sunday at Camp Riverside at Elk River. There were a number of people who were doing the same thing, and I could not help but wonder what was in the mind of each one.

Nature has on one of her most beautiful dresses just at this particular season. The hillsides are green and would undoubtedly furnish splendid feed for the sheep which are being taken into the mountains, so I suppose the sheep-herder regarded the hills as feed for his flocks. The mind of a lumberman, if such a one were among the pleasure-seekers, would view those tall, stately

Just One of Wales' Usual Tumbles

H. R. H. the prince of Wales, though he is a good rider, continues to take tumbles from his mounts in races. The photograph shows one of his latest falls, from his favorite horse, "Miss Muffit."

BIG BALL GAME HERE SUNDAY AFTERNOON

Kendrick Still Has Chance For First or Second Place.

Kendrick will meet the last Genesee team on the local diamond Sunday afternoon at 2:30 in what is expected to be a decisive game. Kendrick still has a chance for first or second place in the Valley league. This is the way it stands. Should Kendrick defeat Genesee Sunday the standing will be as follows:
Pomeroy 7 won and 2 lost.
Uniontown 7 won and 3 lost.
Kendrick 6 won and 3 lost.

This will force Pomeroy to play the deferred game with Kendrick, and in the event that Kendrick defeats Pomeroy in this game, Uniontown, Pomeroy and Kendrick will be tied for first place with each team having won seven games and lost three.

However, should Kendrick lose to Genesee Sunday, Pomeroy will hold first place and Uniontown second place in the Valley league.

Come out Sunday and root for the boys and help them to take this game.

Davis-Jessup

Annie Lois Davis and Charles Wesley Jessup, both of Juliaetta, were quietly married at Lewiston the first of the week, by Rev. Charles McHarness, pastor of the Baptist church. The couple left by car for Portland where they will spend their honeymoon. They will make their home in Juliaetta.

W. O. W. Picnic at Asotin

The annual Woodmen picnic will be held at Asotin park on Sunday afternoon, July 1. The local lodge has been extended an invitation to attend.

Opens Pressing Establishment

Mr. Austin of Pendleton, Oregon, arrived the first of the week and is installing a pressing and cleaning establishment in the room next to the Kendrick State Bank. He expects to be ready for business right away.

trees from a money standpoint. He would be estimating the number of feet of lumber which he could procure to feed the mills. The botanist, if there was one, would eagerly study the beautiful flowers blooming by the road side. But to my mind the pleasure-seekers who saw God in those beautiful flowers and tall stately trees, received the more lasting pleasure from the trip.

The psalmist David must have been looking at just such a scene when he wrote, "I will lift up mine eyes unto the hills from whence cometh my help." The day was cloudy and threatened rain, which kept our party just a little uneasy, as the roads would have hardly been safe for motorists if it had rained, but still we thoroughly enjoyed the day and at least one member of the party that felt that a day in the heart of the great forest had made one a better person.

DISTRICT CONVENTION HIGHLY SUCCESSFUL

Held at Leland on Thursday of Last Week.

The twenty-fourth annual convention of Oddfellows and Rebekahs for district No. 18, was held at Leland on Thursday, June 14. It was a highly successful meeting and was largely attended. The following district officers were elected: Oddfellows, R. B. Parks of Leland, chairman; L. W. Corkill, Leland, secretary; Morris Metcalf, Potlatch, treasurer. For the Rebekahs: Minnie McDowell, Kendrick, chairman; Leona Parks, Leland, secretary-treasurer.

There was no morning session and the guests assembled enjoyed a fine lunch, prepared by the Leland lodge, during the noon hour, after which business sessions were held by both branches of the lodge. Reports showed that the various lodges of the district were in a prosperous condition.

Kendrick lodge No. 37 extended an invitation to hold the district convention at Kendrick next year, which was accepted.

After the afternoon session a splendid banquet was served in the lower hall by the Ladies Aid of the Leland church. This feature was enjoyed to the fullest extent.

At eight o'clock a joint meeting was held and the following program rendered:

Prayer, Rev. Jones, Moscow; Piano solo, Louise Johnson, Leland; Song, Kendrick Male Quartet; Address, C. A. Hagen, G. M., Moscow; Vocal solo, Mrs. Emery, Kendrick; Reading, Mrs. Cook, Kendrick; Address, Rev. Jones, Moscow; Vocal solo, Marie DeWinter, Leland; Address, Mrs. W. F. Morgareidge, Moscow; Musical number, Misses Goudzward; Song, Kendrick Male Quartet; Address, C. A. Oppenborn, Lewiston; Musical number, Dr. and Joe Parr, Troy.

Carlson-Slind

Coming as a surprise to their many friends here, was the marriage of Miss Ida Carlson of La-Crosse, Wash. to Milo Slind of Big Bear ridge, which took place in the banquet room of the Moscow hotel last Sunday evening. The marriage ceremony was performed by Rev. Roger P. Oliver of the First Lutheran church of Moscow.

The bride wore a gown of georgette in the pastel shades and carried a shower bouquet of roses and sweet peas. She was attended by the groom's sister, Miss Helen Slind, and by her niece, Miss Edna Carlson. Mr. Slind was attended by his brother, Oscar, and by Edwin Ostroot.

Following the ceremony, a four course dinner was served in the banquet hall of the hotel, after which a social time and music were enjoyed. Miss Jessica Luvaas and Mr. Leonard Helland were guests.

Mrs. Slind is a graduate of Spokane College Academy, and completed a two-year course at the University of Idaho. She taught one year near Troy and two years at Deary.

Mr. Slind is a progressive young farmer of Big Bear ridge. He has lived here the greater part of his life where he has a host of friends who join the Gazette in wishing them a happy married life.

After a trip to coast points the young couple will make their home on Big Bear ridge.

Republicans File For Office

Republicans who have filed for the primaries, up to the present time, are: Charlie Summerfield for sheriff; J. A. Harshman, in Corrine Griffith's new play, "The Devine Lady," which is to be filmed at Avalon, Calif. Roger had a small part in the recent release, "Harold Teen," and also in one of Colleen Moore's late pictures, but this is his first contract picture.

Roger is well known in this community, having lived here with his parents several years ago during which time his father ran a drug store and his mother operated the Kendrick hotel.

HAPPENINGS IN THE CAMERON SECTION

Interesting News From This Live Little Village.

Mr. and Mrs. Zimmerman and son of Linden, were visitors at the F. Reiche home Sunday.

Mr. and Mrs. Aug. Hartung and Mrs. Carl Hartung drove to Spokane, Monday, returning, Tuesday.

Aug. O. Wegner drove to Lewiston, Sunday, to visit Mrs. Wegner. Mrs. Wegner is getting along much better.

The Ladies Aid met at the parsonage, Sunday.

Carl L. Wegner and daughter, Mildred, and Matilda Groh, spent Sunday afternoon at the Amos Spekler home.

Mr. and Mrs. Gus Kruger and daughter, Rosalie, were in Lewiston, Thursday.

Carl L. Wegner and family and Matilda Groh were in Bovill, Thursday evening. Mr. Wegner returned Friday, while Mrs. Wegner remained to visit for several days with her sister, Mrs. John Groh.

Miss Lena Reiche stayed with Hilga Ehlers, Thursday night.

Mr. and Mrs. Henry Wendt were in Lewiston, Wednesday.

Mrs. Frank Wilken and daughter, Josephine, called on Mrs. George Wilken, Wednesday afternoon.

Herman Hartung returned home Friday from Auburn, Wash., where he has been attending high school the past two years.

Rev. and Mrs. Rein, Rev. Fritz and Lydia Groschnpf were in Lewiston, Friday.

Geo. Ehlers motored to Spokane, Thursday.

Mrs. Stoneburner and Miss Emma Hartung spent Saturday afternoon with their sister, Mrs. John Schwarz.

Miss Marie Schwarz spent Sunday with Selma Hartung.

Mrs. Walt McCall and son spent Thursday and Sunday afternoon with her mother, Mrs. Carl Hartung.

Mrs. Stoneburner, Herbert, Ernest and Marie Schwarz returned home from Spokane, Wednesday.

A number of relatives helped Rosalie Kruger celebrate her 5th birthday, Friday, June 15.

Mrs. Chas. Schultz is in Deary visiting with her mother, Mrs. Emma Gladden.

Mr. and Mrs. Carl Hartung and sons, Herman and Carl, were Sunday dinner guests of Rev. Finke of Southwick.

Mrs. Fred Schoeffler and children were visitors at the Bill McCoy home Monday afternoon.

Mr. and Mrs. Aug. F. Wegner and family were in Lewiston, Saturday.

Frank Moore Files

Frank L. Moore, prominent attorney of North Idaho, filed for the nomination of prosecuting attorney at the democratic primaries of Latah county. To date he is the only democrat who has filed for office. He has served three terms as prosecuting attorney in past years and will prove a formidable opponent for any candidate who opposes him.

Run Third Wire to Juliaetta

The Washington Water Power Company is preparing to string in another primary wire from the Kendrick substation to Juliaetta. The town of Juliaetta has always been connected up single phase 2300 volt from Kendrick. When the new additional wire is installed Juliaetta will then be connected up three phase 2300 volts. This will help to improve the service at Juliaetta and balance up the load in the entire Kendrick district.

New cross arms, pins and insulators will be installed in addition to the new wire. This work, it is estimated will cost in the neighborhood of \$1800 and is the first step by the Washington Water Power Company in their building program for 1928 in the Kendrick district.

N. B. Long & Sons

"The Home of Good Things to Eat and Wear"

It Puts an End to Oiling Worries

This "cut-away" view was prepared just to show you how efficiently the John Deere oils itself. That self-oiling feature is one of the big reasons for the steady power and long life of the

John Deere Type E Engine

The simple splash oiling system insures the thorough lubrication of every working part. Clean oil is kept circulating—every important working part is bathed by a spray of oil while the engine is in operation. Oiling is stopped automatically when the engine is stopped—no oil is wasted. Messy, easily forgotten sight-feed oil cups are done away with and friction,

one of the greatest of power thieves, is reduced to a minimum by this positive automatic oiling system.

Come in and have us show you how efficiently the John Deere oils itself. Examine the simplicity of design and the sturdiness of its parts—the John Deere engine will do its work steadily and efficiently and will stand up under severe conditions on your farm.

Be sure to see this all-enclosed self-oiling power plant next time you are in town.

THE KENDRICK GAZETTE

"The Pulse of The Potlatch"

Published every Friday at Kendrick Idaho, by Ralph B. Knepper

Subscription Price \$1.50

Entered at the Post Office at Kendrick as second class mail matter.

Senator Wm. E. Borah: The man in the automobile may be opposed to the 18th amendment, but he will immediately discharge a drinking chauffeur. The train may be crowded with delegates to the anti-prohibition convention, but they would mob the engineer who took a drink while drawing his precious freight. The industrial magnate may talk critically of sumptuary laws, but he will apply them like a despot to the man who watches over the driving power of his vast establishment. When the exigency of modern life demands a clear brain and instant decision in order to save thousands of lives and millions of property, we are all dry.

The Altoona Tribune feels that there are three classes of people who are a real advantage to this world. There are the prompt-paying subscribers. There are those persons who send in items or write-ups of local affairs. Then there are the business men who bring in the copies for their ads before press time.

George Remus, former "boot-leg king", who was found not guilty of the murder of his wife, on the ground of insanity, a few months ago, was released from the asylum this week. Yesterday's press dispatches carried the news of a lynching in Texas. Neither of these cases are things we like to think about.

Who Pays?

Much money is being spent for advertising. It is interesting to inquire who pays for it. The customer does not pay for advertising, because advertised goods are cheaper than unadvertised goods of equal quality. The merchant does not pay for advertising, because he makes a bigger profit than the dealer who never advertises. It must be the non-advertiser who, in the end, stands the cost of advertising. He pays for it in the form of lost customers and lost sales. The store which sells 1,000 dresses a month can afford to sell for lower prices than the store which sells only 50 dresses a month. Advertising attracts large numbers of customers and enables the store to turn its stock much faster. Trade with the store which advertises.

"An Honored Grave."

"Here, my son," said a father to his boy, when he had graduated, "is the boat to sail upon the stormy ocean of life. I have painted it with the bright colors of truth; made it out of the timber of good principles; calked it with virtue; stored it with integrity; and hand you the oar of self reliance. Strike for the port of honor and a life of usefulness. Should the storm of adversity threaten to wreck you, sink your boat rather than take passage on the craft of dishonor; for an honored grave is more to be desired than a successful life of dishonor."

A System

"you say you've worn this hat three years" said the hatter. "Wonderful! It looks like new." "Yes, three years I've worn it," said the customer. "Once I had it reblocked, twice I got it cleaned, and once I changed it in a restaurant for a new one—Ex.

An Opening

A college graduate, who has confident ideas concerning his ability, went into a brokers office. While waiting for the manager, he questioned the office boy: "Do you suppose there is any opening here for a college graduate?" "Well, I can't say right away," replied the lad, "but if the boss don't raise my salary to five bucks a week by tomorrow night, there'll be."

Social on Bear Ridge

The Lutheran Ladies Aid of Big Bear ridge will give an ice cream social at the Tancy school house, Saturday evening, June 23. Sandwiches, salad, cake and coffee will also be served. A cordial invitation is extended to all.

Linden News

Miss Verlia Abrams has gone to Spokane to spend the summer. Mr. and Mrs. James Garner returned to Juliaetta, Wednesday, after visiting at the home of their son, George.

Mr. Whybark's niece is helping care for the Whybark children who have the measles, there being six sick at one time. All are getting along nicely.

Mrs. Hudson and son spent Tuesday evening at the Smith home.

Mrs. York Martin and daughter returned to their home in Oregon, Sunday.

Mrs. Gerchie and daughter of Lewiston, arrived Thursday to visit her niece, Mrs. C. H. Harris and family.

Mr. and Mrs. W. M. Sadler are enjoying a visit from their daughter of Coeur d'Alene.

Miss Eva Smith and brother, George, attended the funeral of their aunt at Juliaetta, Wednesday.

Mr. and Mrs. Lockhart and son Bob, arrived from Wash. to visit her son, George.

Aunt Carrie and Arley Allen called at the Elmer Hudson home Saturday.

Mr. and Mrs. Pete Stump entertained at Sunday dinner. Mrs. Stump's sister and family of Pullman, Mr. and Mrs. Hans Longeteig of Mohler, Idaho, Mr. and Mrs. Noble of Juliaetta, Mr. and Mrs. Will Stump and family and Grandma Stump of Southwick.

Mr. and Mrs. Edgar Bohn and daughter, Miss Fay Pippenger, and Everett Garner, spent Sunday at the George Lockhart home.

All the measles patients are getting along fine at this time.

Crescent Clippings

Sunday visitors at the C. L. Trail home were Mrs. Mike Forest and children, Mr. and Mrs. Axel Swanson and family.

Mr. and Mrs. William Riley and daughter of Texas ridge, Mr. and Mrs. Wm. Dorendorf and baby, and Anna Kimbley and children were Sunday guests at the A. Dorendorf home.

Alfred Swanson was a business visitor in Moscow, Monday. Maude Hunt is visiting with her sister, Mrs. James Farrington this week.

Mrs. P. G. Rew and children visited at the John Darby and Gus Farrington homes, Wednesday.

Mr. and Mrs. P. Larson left for their home in Leon, Kansas, Thursday, after visiting Mrs. Larson's brother, Frank Souders, for a short time.

Mrs. Fred Zimmerman and children visited at the Gus and Jim Farrington homes, Wednesday.

Fixing The Blame

There was a fearful crash as the train struck the car. A few seconds later Mr. and Mrs. Pickens crawled out of the wreckage. Mrs. Pickens opened her mouth to say something, but her husband stopped her.

"Never mind talking!" he snapped. "I got my end of the car across. You were driving the back seat and if you let it get hit, it's no fault of mine!"—American Legion.

Not Boxes He Kept

A Chicago citizen who wanted some theatre tickets telephoned the box office and asked: "Can I get a box for two tonight?" A puzzled voice answered from the other end of the line, "We don't have boxes for two." "Isn't this the theatre?" he asked crossly. "Why no," said the puzzled man at the other end, "you are talking to an undertaker."

Card of Thanks

We wish to express our heartfelt thanks for the kindness and sympathy, and for the beautiful floral offerings, during the illness and death of our beloved mother and grandmother.

Mr. and Mrs. Elmer Stuart and family,

Mr. and Mrs. Amos Nigh and family.

Varied Uses for Cactus

The cactus is grown to be used as wood, for hedges and decorative purposes, in the manufacture of medicine, and as a vegetable and a fruit. Near San Fernando, Calif., there is a farm where cacti are raised for their apples alone. These are used for jellies, preserves and for making candies. They have a meat which is sweet and pulpy in nature and about 80 per cent water.

STRAIGHT TALKS WITH AUNT EMMY ON BUILDING AN INCOME

As Aunt Emmy came out of the savings bank she met young George Oliver.

"Well, well," he said, "it's funny to see you coming out of a savings bank, Aunt Emmy. I thought only poor folks like me had money in savings banks—people like you just clip coupons!"

"Have you a savings bank account?" countered Aunt Emmy.

"Well, er—I suppose I haven't," he admitted. "You see, it's hard to save money when you're first married. Somehow there never seems to be enough money to go 'round—let alone to put in a savings bank."

"You never will have if you don't get started," interrupted Aunt Emmy. "You should make your weekly savings deposit, no matter how small, the first claim on your salary after paying your bills. I make my weekly deposit in this bank faithfully—I put away a certain sum regularly."

"You can!" Nat commented.

"It is more a habit than you would suppose," Aunt Emmy continued. "Any one can do it who is willing to let other things wait. I began putting a little money in a savings bank years ago when it was no joke to save a few pennies. I remember what a wonderful thrill I got the first time I saw my interest entered in my bank book. There was money that my money had earned all by itself. After that it was a sort of game with me to put a certain sum in the bank, even if I had to do without things I would have enjoyed having. Now I realize what it means to keep your money busy earning all the time so I continue to put a little in the savings bank regularly and, after it accumulates, I draw some out and invest in safe securities that pay a higher rate of interest than savings. All the time, you see, the money is working for me."

"Of course, when the sum is small, it earns little, but if you start young, as you and Molly are, it is almost like magic the way it mounts up after a few years—then when your savings get grown up into a real investment they earn a real income."

"I never thought of it in that light," said George.

"Try it—and see for yourself how it works," urged Aunt Emmy. "Have you ever thought how nice it would be to have a few dollars ready for use in case of an emergency? Accidents and illnesses do happen. Or suppose you had an opportunity to buy something you knew you could sell at a profit and you had to let the oppor-

tunity slip for the lack of a few hundred dollars. You and Molly would never miss five dollars a week—and if you keep at it, it will work wonders!" "You're right, it would!" exclaimed George. "I'll talk to Molly tonight, Aunt Emmy, and see if we can't revise our expenditures."

"There would be a whole lot less family trouble and worry over money matters if every young couple did the same thing early in life," Aunt Emmy said. "Start young, is the magic slogan."

BANKERS PROMOTE FARM CONTESTS

Standard methods of farm administration have been made the basis of a contest by bankers of Pickens County, Alabama, as a method of bringing a farm and home program to their patrons, says the bulletin of the Agricultural Commission, American Bankers Association. A safe and profitable farm community is the goal in this work.

The farm and home program has been outlined as follows:

Standard Farm Scorecard	
Total Net Income:	
Per plow	15 points
Per worker	15 " 30 points
Total Diversified Income:	
Cotton	4 points
Corn	2 " "
Poultry	2 " "
Hogs	2 " "
Cows	2 " "
Garden produce ..	2 " "
Dairy products ..	2 " "
Fruit and melons ..	2 " "
Miscellaneous ..	2 " "
Soil Building:	
Legume crops ..	8 points
Rotation of crops ..	8 " "
Fertilizer	4 " "
Farm Supplies:	
Food for stock ..	5 points
Food for workers ..	5 " "
Business Ability:	
Farm management ..	4 points
Records	3 " "
Investments	3 " "
Home Efficiency:	
Conveniences	5 points
Appearance	5 " "
Grand Total	100 points

A booklet explains the contest to the bank patron and urges him to enter by securing a record book from his bank. The winner for the entire county receives a grand prize of \$100. The county is divided into districts with 75 and 85 prizes for each district.

Experiments Show Much Loss in Manure Storage

It costs a farmer 53 cents on every ton of manure he lets accumulate in the barnyard, according to the Ohio agricultural experiment station at Wooster.

Crop yields tell the story of the results of manure storage more clearly than a chemical test. In an experiment at the Ohio station manure has for 21 years been applied to the clover sod in a three-year rotation of corn, wheat and clover.

On one series of plots the manure has been hauled directly from the stall to the field early in winter. For another series of plots an equal weight of manure has been left in a pile in the barnyard for three months before it was spread on the field.

Stable manure produced 23 bushels of corn an acre, 10.5 bushels of wheat and 1,363 pounds of hay; manure from the barnyard produced an average of 19.5 bushels of corn, 9 bushels of wheat and 840 pounds of hay. Measured by the average value of crop increase, one ton of yard manure is worth \$2.92 and one ton of stall manure \$3.45.

BANKERS PROVIDE STUDENT LOANS

American Bankers Association Completes Plan to Award 167 College Economic Scholarships Throughout Nation.

AWARDS TO START THIS FALL

Students in Agricultural Economics to Be Helped in Farm Entries—Will Also Facilitate Entry into Business Life.

One hundred and sixty-seven collegiate loan scholarships will be provided by the American Bankers Association, 88 of which are now being proffered to 71 selected colleges and universities in 24 states, it has been announced by John H. Puelicher, Chairman of the Board of Trustees of the Association's Foundation for Education in Economics. The foundation fund of \$500,000 was started in 1925 to commemorate the Association's fiftieth anniversary and its aim is to stimulate and aid worthy men or women students to pursue courses in banking and economics in collegiate institutions throughout the country.

The scholarship awards will be available for the scholastic year beginning this fall and will provide recipients with unit loans of \$250, to be repaid on easy terms following their entry into earning business life. In several farm states, it is provided, scholarships shall be specifically awarded in agricultural economics.

A special feature of the plan in addition to its educational advantages is that scholars, upon discharge of all their financial obligations connected with their loans, will be given certificates of honorary membership in the foundation signed by the members of the board of trustees, which will be available as evidence of financial reliability for their use in starting their business careers.

Colleges Awarded Scholarships Profferers of one or more scholarships have been made to the following institutions:

Alabama, University of Alabama, Birmingham-Southern College; Arizona, University of Arizona; Arkansas, University of Arkansas; California, University of California, Stanford University; Connecticut, Wesleyan University; Yale University; Delaware, University of Delaware; District of Columbia, George Washington University, Georgetown University; Florida, University of Florida, University of Miami; Hawaiian Islands, University of Hawaii; Idaho, University of Idaho; Illinois, University of Illinois, University of Chicago, Knox College, Northwestern University; Kansas, University of Kansas, Kansas State Agricultural College, Washburn College; Louisiana, Louisiana State University, Tulane University; Maryland, Johns Hopkins University, University of Maryland; Michigan, University of Michigan, Michigan Agricultural College; Minnesota, Carlton College, University of Minnesota, Hamline University; Mississippi, University of Mississippi; Montana, State University of Montana; Nebraska, University of Nebraska, Doane College; Nevada, State University of Nevada; New Jersey, Princeton University, Rutgers University; New Mexico, New Mexico College of Agriculture and Mechanical Arts; North Carolina, University of North Carolina, North Carolina State College of Agriculture and Engineering; Ohio, University of Oregon, Oregon State Agricultural College; Pennsylvania, University of Pennsylvania, Dickinson College, Lafayette College, Gettysburg College, Franklin and Marshall College, Allegheny College, University of Pittsburgh, Lehigh University, Swarthmore College, Pennsylvania State College; Rhode Island, Brown University; South Dakota, University of South Dakota; Tennessee, University of Tennessee; Texas, University of Texas, Vanderbilt University; Utah, University of Utah; Vermont, University of Vermont; Virginia, University of Virginia, Washington and Lee University, University of Richmond, William and Mary College; Washington, University of Washington, State College of Washington; West Virginia, West Virginia University; Wisconsin, University of Wisconsin, Lawrence College, Beloit College.

Plan of Operation

The general plan allots scholarships to higher institutions of learning in states where the banks have completed the subscription quotas assigned them in the foundation fund. Institutions are selected on the basis of type of school, educational standards, geographical distribution and desire to co-operate in the plan. A scholarship committee is to be created in each selected institution, to consist of members of the faculty and a prominent banker. All scholarship applications must be made formally through the college committees and not direct to the foundation. Three home-town references are required of each applicant, at least one of whom must be a banker. Only students of junior or higher grade in banking and economic courses are eligible and those who have also attended American Institute of Banking courses will be given preference.

Easy Terms

Scholarship payments will be given only to those whose means of education are dependent in whole or part upon their own efforts and will continue only during satisfactory scholastic standing or conduct. The loans are at five per cent beginning the first day of the second January after the date the scholar leaves school, with no interest on repayment made prior to that time. Loans may be paid off in monthly installments of \$10 or more. After three installments have been promptly met payments may be placed on a quarterly basis until the loan is wiped out which must occur within three years. In cases of delinquencies, consideration will be given to special circumstances, such as ill health or unavoidable unemployment.

Coöperation on Better Markets

Big Gains Made in Number of Farmers' Elevators and the Like.

(Prepared by the United States Department of Agriculture.)

The "ballyhoo" days of agricultural co-operation have passed. No longer is the "sign 'em up" campaign the chief aim of farmer business organization. Agricultural co-operation today, says Chris L. Christensen of the United States Department of Agriculture, is emphasizing better marketing services and increased business efficiency.

Three distinct phases of agricultural co-operation since 1905 are cited by Mr. Christensen, who is in charge of the division of co-operative marketing in the bureau of agricultural economics. In the fifteen years from 1905

to 1920, he says, large gains were made in the number of farmers' elevators, live-stock shipping associations, fluid-milk organizations and the like. These were typically local in nature and relatively small in annual turnover. They were designed to perform the first stages of the marketing process.

Striking Feature.

From 1918 to 1925 the formation of large-scale marketing organizations was a striking feature of co-operative development. Some of these attempted the performance of more advanced stages of the marketing process, even going into terminal market operations. Others attempted regional pools, large in volume and in the area covered. Still others sought to improve marketing services and promote payment of differentials for quality, standardization of reliable products and study of and response to consumer preferences. A feature of this growth was the prevalence of "ironclad" and long-term contracts providing heavy penalties for selling outside the pool. Some of these organizations have failed, others have modified their practices.

Members Selected.

"Members of the present-day organizations," Mr. Christensen says, "are being selected rather than merely signed up wholesale. Membership contracts are being modified to meet the financial and other economic conditions of the grower. Notions of arbitrary price fixing by co-operative organizations have been abandoned in favor of efficient business practices."

Have Up-to-Date Kitchen

Home economics authorities agree that the kitchen is the room women use most. They recommend beauty in the kitchen and approve of the most modern labor-lightening, time-saving equipment for this busiest room in the house.

But Results Are the Same

The legal term used in England for cornering the market is "engrossing the market."

McDowell's Midget Cafe

After nearly five years successful operation of the Commercial Hotel we are serving meal and lunches same as formerly at the old stand.

All these closed cars have FISHER BODIES

THE mechanical performance of General Motors cars is tested and proved on General Motors' 1,245 acre Proving Ground. Before any new model is put in production, it must pass more than 135 different tests for power, speed, durability and general performance.

As to the appearance and comfort of General Motors cars, we invite you to be the judge. Every closed body is built by Fisher—the largest builder of automobile bodies in the world. The experience and the vast production of the Fisher Company mean more beauty, more comfort, and more luxury than you will find anywhere else at corresponding prices.

We invite you to check, on the coupon below, the cars that appeal to you most. Complete literature will be sent to you, without any obligation.

CHEVROLET—7 models, \$495 to \$715. Bigger and better than ever before. 4-wheel brakes. More powerful engine. Luxurious Fisher Bodies. New hood. New Duo colors. Also truck chassis; 1/2-ton, \$395; 1-ton, \$495.

PONTIAC—7 models, \$745 to \$875. Lowest-priced quality "six." New models improved from radiator to tail-light. 4-wheel brakes. Bodies by Fisher. New GMR cylinder head. Increased power. Duo color finish.

OLDSMOBILE—7 models, \$925 to \$1085. Fine quality car at moderate price. Redesigned and improved by General Motors. Longer, roomier, more powerful. Fisher Bodies. 4-wheel brakes.

OAKLAND—7 models, \$1045 to \$1375. The All-American "six." Smooth, powerful engine. Longer, lower and more beautiful bodies by Fisher. 4-wheel brakes. Every convenience. New Duo colors.

BUICK—16 models, \$1195 to \$1995. Largest value in Buick's history. Beautiful low bodies by Fisher. Getaway like an arrow. Vibrationless beyond belief. 6-cylinder "valve-in-head" engine. Duo color finish.

LASALLE—16 models, \$2350 to \$2975. Beautiful car of Continental lines. Companion car to Cadillac. V-type, 90 degree 8-cylinder engine. Marvelous bodies by Fisher. Striking Duo combinations.

CADILLAC—26 models, \$3295 to \$5500. Standard of the world. Famous 90-degree V-type 8-cylinder engine. Stupendous bodies by Fisher and Fleetwood. 500 color combinations to choose from.

DAIRY FACTS

BACTERIA CAUSE ABNORMAL MILK

Many farmers at this time of year are annoyed by abnormal milk. The most common cause of such milk is highly flavored feeds, such as wild onion or garlic. Even the change to new grass pastures will produce a pronounced "grassy flavor" in the milk. The milk consumer will notice these feed flavors at once—especially that caused by the cow's eating wild onions.

The dairy department of the New Jersey State College of Agriculture recommends that where these difficulties occur the cows be kept off early pasture, or if that is impracticable, that they be taken into the barn for a period of two to four hours before milking. The wild onions in the pasture will disappear as soon as the grass has had a chance to crowd them out.

The second group of bad milk flavors is that caused by bacteria. Here also is found the causes of bitter milk and rosy milk. These bacteria usually fall from the cow's body into the milk at milking time. They are very resistant and may withstand careless sterilization. Often they infect the seams and crevices of utensils and cooking vats.

The rosy milk organisms are found in marsh land or muddy pools in the pasture. As the cows wade through these places in early spring the bacteria cling to their coats and in that way are carried into the barns. Thorough washing of all utensils with alkali, followed by thorough sterilization with live steam is important. The stables should be disinfected with strong chemical solutions.

Some farmers may be confused in determining whether feeds or bacteria are causing their milk troubles. The following will help in making the distinction: Feed flavors are most pronounced in the freshly drawn milk and tend to disappear with age; bacterial flavors do not appear in fresh milk, but become noticeable with age. Samples of milk which has been placed in sterilized bottles and watched 24 to 36 hours will aid one in determining the cause of abnormal milk.

Ten Separator Ifs

1. If the valve on the supply tank is not open wide the separator will be underfed, and a small amount of high-testing cream will result.
2. If the milk is cold the cream will be too thick to flow readily, and a small amount of rich cream is obtained.
3. If the separator is dirty and the cream outlet partly clogged, a small amount of cream results.
4. If the crank is not turned steadily or at the rated speed, a larger amount of thin cream results and cream is lost in the separation.
5. If flush water or skim milk is allowed to run into the cream, the test will be lowered.
6. If the separator is not clean, the cream will be of low grade and quality.
7. If your cream test varies from day to day, it is partly due to the natural variation of the fat content of the milk.
8. If the separator is set for rich cream, the above conditions will cause a greater variation in the test than if set for thin cream.
9. If the creamery tests vary, check up on the separator and method of operation before blaming the tester.
10. If the cream is to be sold to a creamery, set the separator to give cream testing 30 to 40 per cent of fat.

Silage and Alfalfa in Ration of Dairy Cow

In a series of cow testers' conferences held recently a great deal of time was spent on feeding problems. Emphasis was given to feeding home-grown feeds in so far as possible.

In all cases, the cheapest rations recommended by testers were those containing alfalfa hay and silage. Also, in all cases where alfalfa hay, soy beans, or clover were used, a large part of the grain ration was made up of home-grown feeds. Testers were agreed that if any mineral was to be fed it should be a simple mixture. If cows are fed a balanced gain ration and have alfalfa or clover hay, mineral requirements are very slight.

Plan of Skilled Man

The skilled dairymen always has an eye on what this year's feeding and management will do to next year's production. He strives to have his cows produce uniform, high-level production year after year.

If one takes more out of a cow this year than he puts into her and does not give her opportunity to rest, she will cut her production short next year, and if such management continues she will continue to decline in production.

Just What Refrigerator Shall I Buy?

A Few Points to Consider When Purchasing An Electric Refrigerator

By Louise Lehto, Home Economist, Electric Refrigeration Bureau

An electric refrigerator is a life-time investment. Consequently when you purchase one you must consider not only the present but the reasonably far-distant future as well.

In order to guarantee yourself years of satisfaction it is first of all necessary to be sure that you buy an electric refrigerator which is made by a reputable company which you can depend upon to remain in business. Next, be sure that the company maintains an adequate service station, so that if the time should come when something interferes with the operation of your refrigerator, you can get it attended to promptly and efficiently.

Choosing the Right Sized Cabinet.

Having selected the company, one of whose refrigerators you wish to purchase, and having based your selection upon its reliability and servicing facilities, the next thing to consider is the size of refrigerator best suited to your requirements.

Do not make the fatal mistake of buying a cabinet too small for your needs. It costs comparatively little more to run a large refrigerator, and to purchase a cabinet of insufficient capacity is to rob yourself at once of many of electric refrigeration's advantages.

Buy a refrigerator large enough to permit you to store in it generous quantities of food, for it will keep your food in such perfect condition that you can plan to market only once or twice a week. (Just think what you can do with the time you will save by eliminating those daily trips to the shops!) Buy a refrigerator large enough to permit you to cook at one time quantities sufficient to last for several days—the idea being to turn Monday's cold boiled potatoes into Tuesday's potatoes au gratin and Wednesday's hashed brown. This cooking ahead saves time, fuel and thought, and the cooked foods can be entrusted to the electric refrigerator with perfect confidence that they will still be wholesome and delicious when you get around to using them.

The Insulation Is Very Important.

In selecting your refrigerator, be sure to inquire about the materials which are used to line the walls of the cabinet. Upon these hidden materials, depend the refrigerator's ability to keep the heat out of the cabinet and the cold in. The materials with good insulating properties which are most commonly used in the better refrigerators are mineral wool, cork board, granulated or ground cork, vegetable fibre, sea grass, Balsawood and Belsam wool. A refrigerator lined with such material will keep electricity bills at a minimum, and, in case operation should ever be interrupted, will maintain a cold cabinet for a remarkably long time. Examine too, the construction of the doors, and make sure that the locks work easily, hold securely and require no banging in order to be closed completely.

A Word of Warning.

Checking up on these points before you buy your refrigerator will save you annoyance later on!

Oats Are Extensively Used in Chick Feeding

Rolled oats or oatmeal are extensively used in chick feeding, and they are excellent for this purpose. When used as a complete ration they are apt to cause gas. They should be used mixed with other feeds. Steel-cut oats are preferred by some poultrymen as they are smaller and somewhat easier for chicks to pick up. During recent years milk in its various forms has become an established part of practically all chick rations. Nutrients in milk are easily digested by chicks; they furnish protein and minerals needed to balance the ration and the milk sugar forms lactic acid that is helpful in keeping down the growth of harmful bacteria.

Agricultural Squibs

Keep the poultry house clean and the birds are likely to keep healthy.

For the first week, baby chicks should have liquid skim milk instead of water.

Begin collecting stakes for the garden. There will never be enough of them when you want them.

Look over the hoes occasionally and grease the blades if they are growing rusty. A rusty hoe is a poor tool.

Keep to the old standbys which have proved their worth on your own place. About one "novelty" a year is all the home garden can afford.

Chicks hatched in late May and June do not start to lay until the season of high-priced eggs in the fall is past.

Attention--- Mr. Farmer!

J. M. CARDINAL

General Blacksmithing

Located in Wm. Myers Shop at Kendrick, Idaho.

I specialize on horse shoeing of all kinds, oxy-acetylene welding of all kinds, plow work and sprung beams. I set them to exact measurements as when they came from the factory, and guarantee to have them tempered to stand more than any new beam that is manufactured. If you have any plow work to be done bring it to me and I will guarantee to save you big money. My work will give you the same service as any new one. I repair broken shears or welded shears. I do all kinds of wagon repairing and cutting down to suit. Make wide tired wagons out of narrow tired ones. I can make racks and bodys for wagons and hacks of all kinds, also racks and bodys for trucks. I make water troughs of all sizes for stock.

I expect to have my shop equipped with new tools by the 25th of June, so that I may give you the best of service, and I will appreciate all the work that I can get to do for you. I am sure that my work will benefit you and that my prices will be found satisfactory, they will be the same as all local shops in the state of Idaho.

I extend a hearty welcome to you all.

A Visit To Your Bank

ENSURES A CAREFREE VACATION

Vacation Time is Play Time, and No Time for Worry. For instance, worry about your travel money and its safety.

Stepping into this bank before you leave, will ensure a CAREFREE VACATION, for we will change your cash into Travelers Cheques. These checks are spendable everywhere and just as welcome as currency.

Should you have the misfortune of losing them or having them stolen, your vacation will not be spoiled, because your money will be refunded.

This Bank sells this protection of your travel funds at a very small cost. We gladly extend every possible courtesy.

Fall Army Worm Is of Interest

Often Dispersed and Breeds Through Greater Part of United States.

(Prepared by the United States Department of Agriculture.)
One of the few insects that frequently disperse and breed through the greater part of the United States, only to perish at the end of the summer season, the fall army worm, is of great interest to students of economic entomology and of pure biology. When the fall army worm is spreading from field to field and from state to state, the insect is of great interest and a matter of dread to farmers. Philip Lugbill of the bureau of entomology, in Technical Bulletin No. 34-T, "The Fall Army Worm," just published by the United States Department of Agriculture, gives a history of recent depredations by the insect, estimates the damage done, explores the life history of the insect and suggests repression by mechanical, chemical, and natural means.

Cannot Endure Cold Weather.
The fall army worm cannot live through cold weather. In the United States it winters only in southern Texas and southern Florida. However, on numerous occasions it has spread over many of the southern states and at one time or another has invaded all the Atlantic coast states south of New Hampshire, all the Ohio valley, the Mississippi valley north to the neighborhood of Minneapolis, and has extended its range westward approximately to the Rocky mountains. It feeds on a large number of valuable plants, does serious damage to crops, and migrates northward in waves in seasons when the outbreak is serious. The larval forms do the damage to crops. The advance is made by the winged adult.

Preventing Injury.
The best method of preventing injury in northern states is to prevent multiplication of the early stages of the insect in the southern fields. When fields are infested farmers may help their own crops by control measures, and at the same time prevent the northward spread of the pest. When the worms have stripped one field they may march to another. Thousands may be killed by plowing a deep furrow across their path and dragging a log through the furrow. Similarly a roller may be used on lawns or on a hard road. Several sprays, dusts, and poisons have proved effective. Birds are active enemies of the fall army worm, and several insects, also, prey on it. Skunks, frogs, and toads eat many.

Technical Bulletin No. 34-T gives in full experimental studies on the life history and the bionomics of the insect. It will be of interest principally to entomologists and biologists. It may be obtained while the limited supply lasts, upon application to the United States Department of Agriculture.

Pine trees can be moved in the winter time when the ground is frozen so that a pile of frozen earth may be moved with the tree.

Leafy spurge is a comparatively new weed. It is gaining a foothold in several spots, however, and attention should be given immediately to eradicating it.

In pruning young orchards, it is seldom necessary to use a disinfectant to sterilize the small wounds made by the removal of branches. It is also true that there is much less disease in the young orchard than in the old.

Special effort is being made this week to secure funds for removing the landslide at the church. Mrs. Herres and Mrs. Taber were appointed to raise the needed amount by subscription.
L. E. Taber, Pastor.

Heavenly Chinese

The "Celestial empire," the popular name for the Chinese empire, originated from the name "Tien-Chao" or "Heavenly Dynasty," which was a Chinese conception of their fatherland.

DAIRY

DAIRY INCOME IS MOST CONSTANT

Gross cash income to farmers from the sale of dairy products has been more stable during the past eight years than the gross cash income from any other department of agriculture, according to figures which have been analyzed by V. R. Wertz of the Ohio agricultural experiment station, working with the rural economics department of the Ohio State university.

Wertz has studied the gross cash income of agriculture as an index of farm prosperity which is more reliable than unit price indicates, because it shows the volume of business done. His statistics are based upon an index of 100, which is the average gross cash income from the principal sources, in 1924, 1925 and 1926.

On this basis the dairying income started in 1920 at 147 and dropped with all other sources of income, in 1921 to 97, which was a shorter drop than was shown by any other group of commodities, and was seven points above the total gross cash income.

In 1922 there was a further drop to 91, which was three points above the figure for the total. It was above the index for every other department except the sale of meat animals. Dairying income soared in 1923 to 116, the highest figure reached by any important department of farm industry since 1920, and 21 points above the total income index. It dropped in 1924 to 103, but was still above all other figures. In 1925 the index was 97, three points below the figure for the total, and in 1926 dairying income belied its past performance by registering 99, the lowest of all the indices.

In 1926 all important departments of farming other than dairying showed peaks as compared with 1925. But in 1927, according to preliminary estimates, there was a sharp drop which was not shared by the dairying branch. While the index for the total income in 1927 was down to 91 points, dairying remained at 99, the point reached in 1926.

The average index for the eight-year period for dairying income was 108 points, while the total gross income average has been 102 points.

Income from the sale of dairy products makes up approximately 23 percent of the total cash income of Ohio agriculture.

Bad Flavors and Odors in Milk Due to Weeds

Bad flavors and odor in milk and cream are common in spring due to wild onions and other weeds in pastures. Taking the cows off pasture at least three hours before milking is advised as a preventive measure. Even if the pasture contains no wild onions, sudden change to grass in the spring is apt to develop bad odors in milk. Some additional feed should be given when the pasture season opens. The grass is short and it does not at first provide sufficient nourishment to maintain the milk flow. A small amount of grain and hay will pay well until grass has made a good growth.—John Tolliver, Deputy State Dairy Commissioner, Colorado Agricultural College.

Keep Calves in Dry Lot Until They Are Marketed

Calves which have been full fed on grain during the winter, with the intention of marketing them, ought not to be turned on pasture before they are shipped. These calves should be fat enough so that they can be finished in the feedlot and marketed by the first of June. If they are turned on grass for a few weeks they will not make as good gains as in the feedlot. Changing from dry-lot feeding to pasture causes the calves to scour somewhat and consequently their gains will not be as good as they will be if kept in the dry lot until ready to ship to market.

Get Rid of Cows Giving Very Slimy or Ropy Milk

Milk drawn from cows affected with a bacterial udder trouble, known as garget, is sometimes called ropy. In reality, it is merely very slimy. It is almost impossible to strain slimy milk through cheesecloth. A cow may contract it from an udder bruise, by lying on a cold floor, or from faulty feeding. Some cows have the trouble frequently. In such a case it is best to get rid of them. Others have it only occasionally and are cured by cutting down the feed and giving them a dose of epsom salts and a teaspoonful of saltpeter in the feed each day for two or three days.

Insufficient Pay

When some people get their check from the creamery they are apt to look on both sides of it, for they wonder if it is sufficient to pay for the feed that the cows have eaten. The resulting effect of this idea usually takes effect in either one of two forms: they either change the market place for their cream or they try to economize on the feed that is consumed by the cows. Some cows that are star boarders should be put into the fattening pen.

Drought Is Not Always Harmful

Insufficient Moisture for One Crop May Be Ample for Another.

(Prepared by the United States Department of Agriculture.)

The term "drought," as applied to a lack of moisture in the soil for proper plant growth, embraces many conditions which differ with each type of agriculture. What may constitute insufficient moisture for one sort of crop, or one part of the country, may be ample for another crop grown in different soil or in a different climate, says the weather bureau of the United States Department of Agriculture.

In the East, where precipitation is usually well distributed, a period of 30 days without beneficial precipitation constitutes a drought, which would be especially bad if the subsoil were not well supplied with moisture at the beginning of the drought period. Over the Pacific coast states possible drought is chiefly in the colder half of the year.

Hurts Nonirrigated Crops.

A generally dry winter season may be disastrous to nonirrigated crops. In the central valleys and Great plains, drought during the early spring months will greatly diminish the wheat yield, and drought in midsummer brings disaster to the corn crop. A short period of drought in the eastern part of the country during the early spring months will frequently greatly curtail the hay crop, but may not seriously injure wheat; in fact, it may prevent excessive straw growth. A period of drought may be beneficial to corn in its early growth, forcing the roots to greater depths. Drought of short duration may be quite disastrous to corn when it follows a wet period immediately preceding the formation of the ear, when abundant moisture is required. If previous wet weather has caused the root system to develop near the surface, the supply of moisture available in the subsoil may not be reached in time to prevent loss.

May Benefit Cotton.

Moderate drought is not always associated with scanty production. It may prove beneficial to cotton by hindering the activity of insect pests that do not multiply in dry weather. If the cotton plant remains somewhat dormant during drought and resumes growth promptly when moisture is supplied, the crop may develop after the period of worst insect infestation is over.

Early droughts are particularly detrimental to most truck and small-fruit crops, as growth and development of these are usually rapid and any material interruption is decidedly harmful.

Test your separator once in awhile by taking a sample of the skim in to the cream buyer, or by sending some to your state agricultural college.

The best time to separate is just after milking when the temperature is right. If the milk does get cold it will pay to set the vessel in warm water and get it up to 90 degrees at least, before running it through the separator.

On one experiment with Holstein heifers, heavily-fed animals came into their first heat nearly four months earlier than light-fed ones, and with Jerseys heavy feeding hastened their sexual maturity about two and one-half months.

POULTRY FACTS

MEAT SCRAPS OR MILK IN RATION

Home-grown feeds should be used as much as possible in the ration of the farm flock, but grain feeds should be balanced with milk or meat scraps or both, says George Ghostley, poultry specialist of the agricultural extension service of the University of Minnesota. Ground feed called mash, as well as grain, is necessary. The following will give good results, he says:

Grain—Cracked yellow corn, two parts; wheat, one part, and heavy oats a half part.

Mash—One hundred parts each of bran, middlings, ground yellow corn, ground oats, and meat scrap, three parts each of salt and charcoal.

Milk is an extremely valuable food for poultry—more valuable even than for hogs. Feed skim milk or buttermilk if possible. Reduce the meat scrap one-half if there is milk before the birds all the time. If they have milk only to drink the meat scrap can be scrapped entirely, particularly if 5 per cent more bonemeal is added to the mash.

One pint of cod liver oil to each hundred pounds of mash, mixed first with charcoal and then with the other ingredients, makes a valuable addition to the ration. The mash should be before the hens in hoppers or feeders all the time. More grain than mash should be fed during the cold weather with the reverse the case in summer. Feed lightly of grain in the morning.

Warm water, oyster shell, grit and green or succulent feed such as alfalfa or clover leaves, mangels, carrots, cabbage, cull potatoes, rutabagas or sprouted oats should be furnished. Changes should be made gradually.

White Hollands From Original Wild Turkey

White Hollands are thought to have originated from sports of the original wild turkeys, and perpetuated by selection and breeding. In fact, some information leads to the belief that the White Hollands were perfected in Europe, where range was restricted and nomadic habits most desirable, and then later returned to America by some of the early Dutch settlers. This may be largely based on the docile, domestic temperament, characteristic of White Hollands, which would indicate the restricted areas of Europe of that day, rather than America. Too, White Hollands are said to have been fairly well-known in England early in the Nineteenth century, and it may be due to their foreign invasion so to speak, that they were later to become well known in the land of their nativity, than were some of the other standard varieties which were perfected in America.

Keep Poults Hungry for First 48 Hours Anyhow

Turkey poults should not be fed anything the first 48 hours after hatching. If they have free range, they will pick up some seeds and insects, which will vary the amount and kind of feed that may be needed after 48 hours. It is best always to keep them just hungry enough so they will be hunting feed and getting the exercise that is required for best growth and livability. Hard-boiled eggs chopped fine and mixed with corn-bread crumbs have been found generally satisfactory the first week, after which whole wheat and hulled oats are good. Keep them out of wet grass until they are well along. Three liters of eggs per year are generally about all that will be satisfactory to hatch, because late-hatched poults are likely to be less thrifty.

Kill Harmful Mites

Mites do not live on the chickens by day, but come out and suck their fill of blood when the birds are roosting. First the poultry house must be cleaned thoroughly. Trash, nesting material, etc., should be taken out and burned. Then go over the whole house thoroughly with crude petroleum or carbolineum, using either a spray pump or brush to supply the material. Petroleum is cheaper but the carbolineum gets into the cracks better and lasts longer.

Geese for Breeding

It is inadvisable to dispose of an older goose and keep young geese for breeding purposes, provided the older bird is in good health. Young geese will often lay during their first year, but the eggs are usually infertile and the number produced is seldom as high as would be produced by an older female. Females of the Canadian breeds do not lay, as a rule, until they are three years old, but females of any of the breeds may be kept for breeding.

Eggs for Chicks

Eggs that are tested out of incubators up to the 14th day make good feed for young chicks if properly prepared. They should be boiled for at least 30 minutes so as to kill all germs that may be in them. Then pulverize them in a jar or some container, using a square stick that will thoroughly mix the contents and pulverize the shell as well as the interior portions. The only danger in feeding eggs lies in not cooking them long enough or over-feeding.

LOCAL NEWS

Mr. and Mrs. Phillip Asplund and family of near Deary, spent Sunday at the home of Mrs. Asplund's parents, Mr. and Mrs. E. H. Dammarell.

Mr. and Mrs. E. H. Emery spent Sunday in Asotin with relatives.

Miss Barbara Fisher of Bovill arrived Wednesday to visit at the home of her cousin, Mrs. Tony Eichner.

The Presbyterian Ladies Aid will meet at the home of Mrs. H. P. Hull this afternoon. This is strictly a business meeting for members only.

Mrs. Geo. L. Carlson, who spent the past week at the home of her father, C. G. Compton, left Monday afternoon for her home at Long Beach, Calif.

Mr. and Mrs. Ralph Knepper and family returned Tuesday evening from Seattle where they visited at the home of Mrs. Knepper's sister, Mrs. J. E. Nessly, over the week end.

Mr. and Mrs. Jack Barnes and son spent the week end in Spokane with friends.

Stewart Compton and Mr. Rider of Orofino spent Sunday evening at the home of Mr. and Mrs. N. E. Ware.

Carl Sparber of Potlatch visited friends here last Wednesday afternoon.

Walter Thomas drove to Pierce City Saturday evening to visit at the home of Mr. and Mrs. Ross Kennedy. Mrs. Thomas and son, who spent the past week visiting at the Kennedy home, returned with Mr. Thomas Sunday evening.

Mrs. R. H. Ramey was a Spokane visitor yesterday on the morning train.

Mrs. J. G. Gardner and daughter, Helen, returned Friday from Nezperce where they spent several days visiting at the home of Mrs. Gardner's sister, Mrs. Jack Curry.

Herman Wegner and Mr. and Mrs. Spekker of Lewiston, and Mr. and Mrs. Wm. Rogers and Mr. and Mrs. Robert Spencer of Moscow were Sunday guests at the home of Mr. and Mrs. Geo. Leith in Kendrick.

A. Wilmot and son, Billy, spent a few hours in town last Monday afternoon enroute to Kellogg, where they expect to spend a couple of months at the home of Mr. and Mrs. A. V. Dunkle. Mr. Wilmot and son are now located at Tempe, Arizona, and like it there very much. Billy has a job printing shop there and is doing fine. In speaking of the Tempe section, Mr. Wilmot stated that it was in the irrigated district and that they get from seven to nine crops of alfalfa a year and that there is an abundance of fruit raised there.

Mr. and Mrs. Thorvald Nelson, Miss Flora Nelson and Mrs. Gust Luken were Lewiston visitors Tuesday.

Mr. and Mrs. Wm. Bleck, Mr. and Mrs. Ralph Gehre of Southwick left Monday for Spokane where they will be joined by Mrs. Bleck's mother, Mrs. J. A. Fancher and will spend two weeks in Canada.

Mr. and Mrs. Walter Thomas and little son left Wednesday for Spokane where they will spend several days. Mr. Thomas will attend the Elk's convention.

J. G. Gardner returned last Monday from the Mayo clinic where he underwent a major operation. He is getting along exceptionally well and has every expectation of making a complete recovery. Mr. Gardner stated that the Mayo clinic is a marvelous organization and that he received wonderful care there. The day he arrived at the clinic over 700 people had registered there.

Mrs. Jessie Callison returned Wednesday from a visit with relatives at Coeur d'Alene and Spokane, covering a period of two months.

Jack Pickard and two sons of Troy was transacting business in Kendrick Wednesday of this week.

Ernest Roberts, Harry Ameling, Ben Callison and son, Norla, returned Tuesday night from a fishing trip on Hazard Creek, in the Little Salmon river country. They caught some fish but report the water too high for good fishing.

Lester J. Nelson, son of James

S. Nelson of Big Bear ridge, last week was granted a bachelor of science degree in agriculture, at the University of Idaho, Moscow. He has returned to Bear ridge where he will be associated with his father in farm work.

A trouble shooter for the Washington Water Power Co. was in Kendrick yesterday locating "leaks" on the power lines here and in Juliaetta. This is being done for the benefit of those who have radios as the loose connections and other interference on the line all help to make the night hideous for radio listeners.

Ira Bolon, Herman Schupfer and Glen Fleschman were in Lewiston Wednesday evening to attend the meeting of directors of the Central and Valley leagues.

John Enoch Riley

John Enoch Riley, son of Mrs. Barney Riley, died at the family home last Tuesday, from intestinal flu. He was 29 years old. Funeral services were held yesterday and interment made in the Kendrick cemetery.

Opens Blacksmith Shop

J. M. Cardinal, who has operated a blacksmith shop at, Cottonwood for a number of years, has moved to Kendrick and taken over the Wm. Meyer shop. He expects to add considerable new equipment and will be prepared to handle anything in the blacksmithing line. He opened the shop for business this week.

Carlson-Malmsten Wedding

Star-Mirror: Saturday evening at 7:30 o'clock at the home of the bride's parents, Mr. and Mrs. C. E. Carlson, their daughter, Amy T. Carlson was married to Oscar E. Malmsten. The ceremony took place under a large cedar arch banked with flowers. The Rev. Roger P. Oliver, pastor of the First Lutheran church,

officiated, reading the ring ceremony. Just prior to the wedding Miss Florence Oberg sang "O Promise Me," and following the ceremony she sang "Until," Miss Ellen Peterson accompanied at the piano and A. K. Carlson on the violin. As the bridal party took their places under the arch Miss Ellen Peterson played the wedding march.

Mr. and Mrs. Francis Vaupel of Tekoa, Wash., were best man and matron of honor.

The bride wore a gown of green silk georgette with a picture hat of lavender and white and carried a shower bouquet of pink rose buds and lavender sweet peas. The matron of honor wore a beige silk georgette gown and carried a shower bouquet.

Following the ceremony a buffet lunch was served. Misses Rose Rawson and Ina Peterson assisted in serving.

After a trip through the Grand Canyon and a visit with the bridegroom's parents in California the young couple will make their home in Moscow, where Mr. Malmsten is employed in the office of the O.-W. R. & N. railroad.

Mrs. Malmsten is well known in Kendrick and Juliaetta communities having lived at Juliaetta for a number of years. She is a sister of A. K. Carlson of Kendrick.

Play Two Tournaments

At a meeting of the officers of the Central and Valley leagues, held at Lewiston Wednesday night, it was decided to hold two baseball tournaments, one at Pomeroy and the other at Winchester. Eight leading teams of the two leagues will participate.

The championship tournament will be held at Pomeroy, at which event the two leading teams of each league will play off to decide the leading team of the league. The one at Winchester will be the secondary tournament

NEW HOSIERY

A Big Shipment Here From the Factory

The famous Rollins Runstop for women are wonderful hose. We have them in the latest shades. If you want real hosiery satisfaction let us sell you Rollins for all the family.

Order Suits Now

Young men, do not wait until the Fourth of July to get your suits but come in now and we will make you look like a million dollars. More new tailored suits are in now.

Coming! Tuesday, June 26

La Vette's Radio Entertainers

APPEARING IN PERSON

Singers, Dancers, Musicians and Comedians

ALL RADIO STARS

This company carries an exceptional augmented orchestra playing Hawaiian and popular numbers from Hula Hula Fox Trots to extreme jazz. Playing 25 instruments including Piano, Drums, Violins, Slide Trumpets, Harps, Steel Guitars, Ukuleles, Banjos, Musical Saws, Saxophones, etc. A company of Irea musicians.

Admission - 25c - 50c

New Kendrick Theatre

comprised of teams in third and fourth places.

Through agreement of Orofino and Winchester teams not to ask for a play-off of ties that might exist with Lewiston or Nezperce at the end of the season, the latter teams automatically won places in the major tourney, and Orofino and Winchester will play in the Winchester meet.

In the Valley league, however, there is the possibility of a three-way tie between Pomeroy, Uniontown-Colton and Kendrick, and the two teams which win out probably will not be determined until the Sunday before the tourney. Kendrick must defeat Genesee Sunday, and Pomeroy sometime next week to get into the tournament. A defeat in either of these games will put the Beanpickers in the Winchester meet.

Big Musical Show Tuesday Nite

Next Tuesday night, June 26, the LaVette Radio Entertainers will appear at the New Kendrick theatre. This company carries an exceptionally good orchestra, the members playing some twenty-five different instruments including piano, violins, slide trumpets, harps, guitars, ukuleles, banjos, saxophones, musical saws, etc., besides splendid singers, dancers and comedians. Remember these are all radio stars appearing in person. Come early if you want a seat. 25-1

Old Clothes Wanted

There is a campaign on to collect old clothing for Near East orphans and adult refugees. The 800 Sunday schools of the Inland Empire are being asked to contribute clothing for this relief drive. Anyone having serviceable clothing to spare will help the good cause along by leaving packages with E. H. Dammarell, superintendent of the Methodist Sunday school. The bundles must reach Spokane by June 30, so don't delay.

Car Demolished

Wm. Zum Hofe of Potlatch ridge had a bad auto wreck last Sunday near Moscow. While turning a corner at the cemetery

his car came in contact with one driven in from a side road by a man named Smith. Mr. Zum Hofe's car was completely demolished, but none of the members of his family were injured except for a few minor scratches and bruises. Mrs. Smith was injured so that she had to be taken to a Moscow hospital.

Mr. Zum Hofe's car was fully covered by insurance. He went on to Moscow and purchased a new Nash sedan.

Ancient Wheels

Wheels of a chariot found in a tomb in ancient Kish show that wheels of 3200 B. C. were wooden disks bound with rims and studded with copper nails on the rolling surface.
