No. 30

BAND CONCERT SATURDAY NIGHT 8 P.M.

ITEMS OF INTEREST FROM SOUTHWICK

Written For Gazette by Special Correspondent.

Mr. and Mrs. Whitted and family of Ahsahka spent Sunday at the home of Jap Triplett.

Ray Triplett has moved his family from the Craig ranch to the bungalow across the street from the phone office.

Morrison Cuddy and family of Mohler spent Sunday at the home of his mother, Mrs. Belle Cuddy.

A large crowd attended the Wm. Stump sale Tuesday.

Doc Triplett and wife left last week for Clarkston, where they will make their home.

Wm. Jennings and family and Wm. France left last Thursday for Arizona. They were accompanied by Mrs. Austin McCoy, who will visit for a while at her old home in Texas. The Jennings family expect to make their home in Arizona.

Mrs. Claud King who has been visiting here for the past month, left Monday for Lewiston where she will visit for a few days before returning to her home in Marshfield.

A picture show was given at the gymnasium Saturday evening. Quite a large crowd was present.

The funeral services of Mrs. Blevens, who passed away at her home in Ahsahka, was held Tuesday forenoon at the M. E. church by Rev. Pierson of Peck. Interment was made in the Southwick cemetery.

Hank Bleck was a dinner guest of Mr. and Mrs. Jake Berriman, Sunday.

Mrs. Mae Grant and Nadine McCoy, who visited with relatives and friends in Lewiston for a week, returned home last Friday.

Clarence Henderson and family of Potlatch spent the week end at the home of his parents.

Mr. and Mrs. Milton Benjamin drove to Palouse last Saturday. Milton returned home Sunday but Mrs. Benjamin will remain there for a while with his parents.

Frank Souders and family of Crescent were in town, Tuesday.

Frank Triplett, while riding horse back one day last week, was thrown off the horse and both bones in his right arm were broken just above the wrist.

Jhon McIver went to Lewiston last Saturday, returning home Monday. He reports that his wife is some better.

Johnson-Johns

Miss Ivy Johnson, daughter of Mr. and Mrs. John Johnson of American ridge, was quietly married last Saturday evening at 8 o'clock to Mr. Phillip Johns of Juliaetta. The wedding ceremony was performed at the home of Rev. and Mrs. A. E. James.

The happy young couple will make their home in Juliaetta where they have bought property. The well wishes of their many friends follow them to their new home.

Oxford Road Open

Clearwater Tribune: After being closed for a couple of weeks on account of mud and the difficulty of keeping it in shape under traffic, the road from Pierce to Oxford and thence down the hill to the Orogrande and the North Fork at the Bungalow, was declared open to travel the first of the week by Supervisor Paul A. Wohlen and a few cars went over it Sunday without a great deal of difficulty. The road has been graded up and ditched in many of the worst places and this new soft dirt is what has caused the trouble. Many places are still soft due to many showers, but with care and some extra time cars can get through and it is probable that many will try it in order to reach good fishing waters.

Death of Wm. H. Meyer

Wm. H. Meyer, one of the first residents of Kendrick, passed away here Wednesday night after a six months illness. Death was due to cancer of the liver, and came as a relief to his suffering. His death marks the passing of one more of the sturdy pioneers of this community.

Funeral services will be held at the Frank Ellis home Sunday morning at ten o'clock, conducted by Rev. Finke of Southwick. Arrangements are in charge of the Pickerd undertaking establishment. The burial will be made at the Kendrick cemetery.

Wm. Meyer came to Kendrick in the early days shortly after the town was established. He opened a blacksmith shop which he conducted until about six months ago when failing health made him cease active work. He was a skilled workman, having learned his trade in Germany and did a good business here.

He and his son, Frank, had a homestead in the Three Bear country and enjoyed many outings there together. It might not be out of place at this time to say that Frank has been a dutiful son in every sense of the word. He has given up plans for his future and some of the best years of his life to be a companion to his father and make his declining years pleasant and comfortable.

An obituary will be published in next week's issue of the Gazette.

Crescent Clippings

Warren Trail was quite badly hurt last Friday. While raking hay the horses became frightened and ran away. He was caught in the double-trees and was dragged for some distance. He suffered several cracked ribs and severe bruises. He is much better at this time.

Louise Taylor and Mr. Young of Lewiston visited with Mrs. Taylor's parents, Mr. and Mrs. Harry Wright last week.

Eva Smith of Linden visited at the John Darby home Saturday afternoon and registered several in this neighborhood.

Mr. and Mrs. Frank Souders, Jr., and little son, are visiting at the Frank Souders, Sr. home.

Mrs. Anna Kimbley and children, Mr. and Mrs. Mike Forest and family, Mr. and Mrs. Wm. Dorendorf and baby and Mr. and Mrs. Alfred Swanson picnicked on Three Bear, Sunday.

Mrs. Fred H. Darby of Moscow is visiting a few days with her parents, Mr. and Mrs. C. L. Trail.

Mrs. M. L. Robeson and daughter, Sue, and Chas. Greenwood were Sunday visitors at the Frank Souders home.

Alice Cramer left Sunday for a visit with her sister, Mrs. LeRoy Southwick of Cream ridge.

Mrs. James Farrington and son and Mrs. Albert Dorendorf and sons, visited at the C. L. Trail home Monday evening.

Ersle Hudson is helping John Darby to put up his hay.

Mrs. Albert Dorendorf and son and Sue Robeson visited with Mrs. Wm. Dorendorf, Saturday afternoon.

Mrs. Axel Ekman visited with Mrs. Frank Souders, Saturday.

John Darby and niece, Helen Longeteig were Kendrick visitors, Tuesday.

Mrs. M. L. Robson and daughter, Sue, and Alice Cramer, visited at the Harry Wright home, Friday afternoon.

Mr. and Mrs. Wm. Dorendorf and baby called at the C. L. Trail home, Monday evening.

Tomorrow Last Day to Register

Saturday of this week is the last day for registering before the primary election, which takes place August 7. If you did not vote in this precinct at the last general election, you should register so that you may vote August 7.

Pussyfoot Johnson Takes a Bride

William Johnson, better known as "Pussyfoot," dropped his prohibition work for a few days and married Mrs. Bessie May Stanley at Syracuse, N. Y. They are shown in the photograph.

Attorney Locates Here

C. A. Oppenborn, who has been practicing law in Lewiston with offices in the Carrsow building has decided to locate here and will open his law office the first of next week. He and his family will move here the last of this week. They have rented the Waltz house across from the school house. There are two children in the family, a son and daughter.

Mr. Oppenborn is a lawyer of wide experience in general practice. He should do well here if the people of the Potlatch country will accord him their patronage.

Big Bear Ridge News

Mrs. Hans Sneve has returned home from the Potlatch hospital, and is recovering nicely from her operation. Misses Agnes, Opal and Lizzie Jones, Claude and Faye Jones motored to Spokane, Sunday, to visit their sister and niece, Miss Dorothy at the Edgecliff Sanitarium.

Anton Lien left for Los Angeles Calif. last week.

Miss Esther Kleth spent the week end with friends in Spokane.

Mr. and Mrs. Gabriel Forest Mr. and Mrs. Bernhart Nelson and daughter, Emergene were visiting relatives in Colton, Sunday.

Mrs. Ole Lien was quit ill this week, but is improved at this writing.

Mr. and Mrs. Jonas Johnson of Portland, Oregon, were visiting at the Wade Keene home last week.

Tupper-Taylor

Miss Amy Tupper, daughter of Mr. and Mrs. Byron Tupper, former residents of the Southwick community and now living at Clarkston, was married last Sunday morning to Mr. Loren H. Taylor of Lewiston. The young couple left for Iowa on their honeymoon, after which they will make their home in Lewiston where Mr. Taylor is employed in a garage.

Was Half Shot

When a man named Gunn was arraigned in police court for drunkenness the judge said: "Well, Gunn, I'll discharge you this time, but don't get loaded again."—Topeka Tinklings.

Fred Strobel, candidate on the republican ticket for assessor of Latah county was a Kendrick visitor the first of the week.

One Hundred Husbands Tell

For the past two years Doctor G. V. Hamilton, an eminent scientist, has been making an intensive study of marriage under the auspices of a New York foundation. The purpose of his study is to find some basis upon which practical advice can be offered to young men and young women before marriage and to help husbands and wives suffering from "maladjustment".

One hundred husbands and one hundred wives, all normal men and women, were interviewed in the latest stage of Dr. Hamilton's experiment, nearly four hundred questions being put to each individual and frank answers invited. Doctor Hamilton wrote down the answers, which ran into some 2,000,000 words.

The hundred husbands who tell their troubles are, save ten, college men. Twenty-two are in business; thirty-two are engaged in various professions; eleven are engineers; twenty-six work in literature or the arts; six are in religious work. There are two over fifty years of age, twenty-one between forty and fifty; sixty between thirty and forty. Most of them have been married five to fifteen years. Only twenty are childless; half of them have two children or more.

Generally, there are eleven classes of troubles which caused the unhappiness in the households of these hundred husbands. Temperamental dissatisfaction number forty-nine; physical dissatisfaction number thirty-nine; lack of personal freedom, ten; ill health, ten; jealousy, eight; trouble over children, eight; economic troubles, eight; friction over relatives, seven; religious conflicts, one; "everything wrong," two.

—Genesee News.

His Lucky Hump

An elderly man approached one of the attendants in the traveling menagerie. "Can you tell me what that hump on the camels back is for?" he asked politely. The keeper scratched his ear. "What for?" he murmured. "Yes, what use has it?" "Well, its pretty useful, sir. The old camel wouldn't be much use without it, you know." "But why not?" "Why not?" exclaimed the keeper in surprise. "Well, you don't suppose people would pay a dime to see him if he didn't have a hump, do you?"—Exchange.

The State We Live In

Idaho's center of area is in Custer county, not far from the famous Henry Ford mine, but its people are not very evenly distributed.

Our population in 1920 was 432,000; our greatest growth in any ten-year period was from 1910 to 1920, over 100 percent; the next ten years brought an increase of 33 percent. The present population is estimated at 464,500.

Using the U. S. Census method which is on an aeroplane basis, the present center of population is in Camas county, about six miles from the western line, up the South Fork of the Boise River. It is in the Sawtooth mountains, inaccessible enough to constitute what the lumber jack calls a "balloon chance."

...When Herod took the census of his kingdom, he ordered every man, woman and child to come to the old home town and be counted. Incidentally, each person was taxed. Must have been an enjoyable trip.

If our governor could successfully take a census on this plan, there would come into Boise from the west 185,500 people who had travelled an average of 363 miles each at an expense of \$12.76; from the east would come 241,000 with a one-way average of 261 miles at a cost of 8.88 each.

The general average would be 280 miles at \$9.70. The total distance by the usually travelled routes would be 130,216,600 miles at a total train and stage fare of just over 4 1/2 million dollars.

It is reasonable to suppose, however, that Governor Baldrige would locate his census-taker at that point to which all the people could come at the lowest total cost, and after an amazing lot of careful figuring would decide on the little town of Bliss, in Gooding county, a junction point on the Short Line 98 miles east of Boise.

From the standpoint of convenience and economy Bliss is our center of population. But its advantage over Boise is insignificant. To put the capital at Bliss would reduce the average distance per person less than 3 miles and the average cost only about 8 cents.

Boise may therefore safely claim to be nearer the practical center of its state than is any other capital in the Union.—Byron Defenbach.

Hot!

What is believed to be the hottest weather on record has been experienced here this week. Wednesday was a scorcher and every day this week the thermometer has registered well over 100. In Lewiston the temperature showed 113 degrees at the weather man's office. This is reported to be the record since the weather bureau was established there. Local thermometers varied as much as ten degrees but a conservative estimate is about 106 for Wednesday and practically the same yesterday. At least it has been too hot for comfort all week, but cool nights have made it possible for everyone to recuperate after the hot days.

Send the Double

The hotel was on fire. On a 60-story ledge stood a great movie actress, flames crackling about her. Below, the firemen were holding the net, while the crowd waited in agonized suspense. Finally a strained voice screamed: "Jump, lady—for God's sake!" The great movie actress folded her arms in calm disdain. "I'd do nothing of the sort," she answered. "Tell the director to send my double here this instant."

Ed Deobald says that the gasoline boiled Wednesday in the glass container at the top of the pump.

HAPPENINGS IN THE CAMERON SECTION

Interesting News From This Little Village.

Mr. and Mrs. John Schwarz and son, Herbert, motored to Seattle to attend the funeral of Mr. Schwarz's niece, Miss Hilda Schwarz.

Mrs. J. Schmidt and daughter, Edith, and Donald Hartung arrived from Spokane, Friday to visit with relatives and friends.

Marjorie and Esther Wendt spent Thursday with their grandmother, Mrs. Carl Koeppe.

Mrs. Fred Mielke, Mrs. Stoneburner and Miss Emma Hartung spent Thursday afternoon with Mrs. Herman Wilken, Sr.

Miss Louise Schmidt is staying with Miss Marie Schwarz while her parents are in Seattle.

Mrs. J. Schmidt, Mrs. Stoneburner, Miss Emma Hartung and Donald Hartung were Sunday dinner guests of Mr. and Mrs. Emil Larson of Leland.

Emil Silflow had the misfortune to fall from a horse and break his arm last Friday.

Selma Hartung is staying with her sister, Mrs. W. McCall at Fairview.

Mr. and Mrs. F. Reiche and daughter, Lena, and Mr. and Mrs. Janzen picnicked at Atwater Lake last Friday.

Paul Silflow was pleasantly surprised Friday evening, the occasion being his birthday. Those present were: Mr. and Mrs. A. O. Wegner and children, Mr. and Mrs. Gus Kruger and daughter, Rosalie, Mr. and Mrs. Henry Wendt and daughters, Mr. and Mrs. F. W. Silflow and sons, and Mr. and Mrs. Otto Silflow and son, Roy.

Rev. Ehlen of Lewiston was a Cameron visitor Friday evening.

George Ehlers drove to Lewiston and back, Friday.

Mr. and Mrs. A. Spekker Mr. and Mrs. C. L. Wegner, Mr. and Mrs. Gus Kruger, Mr. and Mrs. H. Wendt, Mr. and Mrs. A. Meyer, Mrs. Carl Koeppe and Miss Hilga Ehlers drove to Bovill Saturday to pick huckleberries, returning Sunday evening with a large quantity.

Mrs. F. Reiche was a Lewiston visitor, Friday.

Bernard Hartung, Misses Edith and Louise Schmidt and Marie Schwarz were callers at the New man home Sunday.

Mr. and Mrs. Fred Silflow, Jr. and sons were Sunday dinner guests of Mr. and Mrs. Emil Larson.

Mr. and Mrs. John Schwarz and son, Herbert, returned home Monday.

Wanted a Look

A commercial traveler was working in a new district, orders were few, and far between. Entering an establishment, he presented his card, only to be told that there was really nothing in his line that was wanted. "Will you permit me to show you a few of our leading articles?" begged the salesman. "No, sir," was the reply, "we really cannot spare you the time at present." "Well, sir," persisted the salesman, dejectedly, "would you mind if I opened my bag here, take a look myself? I haven't seen 'em for nearly three weeks."—Exchange.

A Heartfelt Verdict

Down in Arkansas a man was tried for assault and battery with intent to kill. The state produced as evidence the weapons used, a rail, gun, saw, and rifle. The defendants counsel exhibited as the other mans weapons a scythe blade, pitchfork, pistol, dog, razor, and hoe. After being out several hours, the jury rendered this verdict: "We, the jury, would have given a dollar to see the fight."—Exchange

SOMETHING FOR MOSCOW VOTERS TO THINK ABOUT

Star-Mirror: The Kendrick Gazette of Friday carries a front-page story of the candidacy of G. F. Walker for county commissioner from the third district, to succeed J. L. Woody who defeated Mr. Walker for the office two years ago. What the Kendrick Gazette thinks of Mr. Walker, or Mr. Woody for that matter, is of no interest to The Star-Mirror. The policy of this paper is and will continue to be "let the voters decide." The Gazette boost for Mr. Walker, however, contains something which does interest this paper and should interest all of Moscow.

Says the Gazette:

Mr. Walker has always received a splendid vote from his home community and there is no reason why, at the opening primary, he should not be treated even better than in the past. He is intensely interested in county affairs and never loses sight of the fact that his home is in the third district.

Well and good. Kendrick wants a commissioner who will represent Kendrick. That is perfectly in order. But what about Moscow?

Moscow needs a commissioner who shall think a little of Moscow and Moscow's welfare. Moscow and its immediate tributary pays the largest portion of the taxes in the second county district, and it deserves to have a commissioner who will represent that interest as a member of the board of commissioners, just as Kendrick desires a commissioner who shall have the interests of Kendrick at heart when he represents the third district.

There is doubt in many quarters that the present commissioner from this district has represented Moscow as wholeheartedly as he might. We let that for the voters to decide, having no in-

clination to dictate who shall be elected. But The Star-Mirror would like to make this point, as there will be a primary race and a race between a Democratic and Republican candidate at the November elections: See that the man you nominate on the Republican ticket and the man that you elect in November thinks a little of Moscow and Moscow's welfare as a member of the county board when he takes office.

It may also be called to notice of the people of Moscow that the present commissioners have ignored the most fertile medium of distribution of information in publishing legal notices and information concerning the primary election. They have inserted their notices in papers at Genesee and Kendrick, neither of which serve the county nor reach, together, one-half the number of people that this paper reaches. The commissioners expect that this paper shall of its own volition give the voters this information when the voters expect and have a right to demand that the commissioners shall be zealously anxious to disseminate this information through the best channels to reach their constituency.

SOUR GRAPES

The above editorial from the Star-Mirror, Moscow's little daily, doesn't deserve as much space in these columns as it is being given, but we republish it in the Gazette so that the people of this part of the county may have an opportunity to read it, if they are so inclined. Anyone who can read the English language will plainly see that the paragraph quoted from the Gazette is misconstrued. The line that seems to cause the writer of the Star-Mirror editorial so much agitation, refers to Mr. Walker and says that he "never loses sight of the fact that his home is in the third district." We might change the wording without changing the meaning or intent in the least and say that Mr. Walker "never loses sight of the fact that he lives in the third district". Why should Moscow or any other town in the county get peeved at such a statement?

The Star-Mirror says that Kendrick wants a commissioner to represent Kendrick. How does the Star-Mirror know this? We live here and have never heard anyone in Kendrick make such an assertion.

The Gazette serves both Kendrick and Juliaetta and enjoys a splendid circulation in both communities. Both towns are in the third district and it is safe to say that both towns would like to have a commissioner, whoever he may prove to be, who will have the interests of the third district at heart. This does not mean in any sense of the word that Moscow's interests would need to suffer because of such a condition.

The editorial rambles on and states the Star-Mirror has more than double the combined circulation of the Genesee and Kendrick papers. This statement is like the proverbial report of Mark Twain's death.

It seems that the Star-Mirror resents the fact that the county commissioners and county auditor are willing to take into consideration that there are three papers published in the county outside of Moscow. About three and one half years ago the Gazette was made the official paper of the county for a period of two years. The last 18 months the Genesee News has been the official paper. The taxpayers of the county seem perfectly satisfied with this arrangement. The papers outside of Moscow are in a like state of mind.

Reports received at Spokane from the United States department of agriculture show that the apple crop in Washington, Oregon, and Idaho will amount to 37,596,000 boxes. Washington will have about 29,598,000 boxes; Oregon 4,242,000; and Idaho 3,756,000 boxes.

The potato crop will average about 41,348,000 bushels in the four states. Idaho leading with 21,416,000 bushels; Washington 10,693,000; Oregon 4,091,000 bushels; and Montana 4,148,000 bushels.

Flies Not All Bad

There are more than 30,000 kinds of flies. Their conduct toward man is both good and bad. Some flies destroy injurious plants and some destroy harmful insects. Indians, at one time, lived off the young of a certain fly.

BANKER-FARMER MOVEMENT GROWS

Funds Supplied by Banking Organizations in Many States to Finance Studies and Contests.

The nationwide movement being conducted by county and state bankers' associations and the American Bankers Association in co-operation with the state agricultural colleges and county agents for the purpose of bringing about both local and national solutions for farm economic problems has shown notable results during the past year. A review of these activities in the Bulletin of the Agricultural Commission, American Bankers Association, summarizes some of the chief points as follows:

In Missouri a meeting was held at the College of Agriculture at which the bankers again appropriated \$1,600 for boys' and girls' club work. Saline county bankers have raised \$500 to stimulate beef calf clubs and report definite results obtained in getting farmers to lime their soil and grow alfalfa. County "key bankers" to promote banker support of farm betterment projects are being appointed and another Short Course in Agriculture for bankers is being planned.

In Kansas no less than fifteen counties are reported by the Extension Service as engaged in definite banker-farmer work. County key bankers attended four district conferences during the year.

The Louisiana bankers' agricultural committee met at the College of Agriculture in connection with a bankers' farm course. The bankers are thoroughly aroused to the wisdom of tick eradication and are co-operating to that end. County key bankers are being selected and county meetings with bankers throughout the state will be arranged.

Results Shown

In Kentucky key bankers have been appointed in each county with the result that the bankers of the state are co-operating with the College of Agriculture more specifically than any other group of business men. Some of the fruits of this co-operation is demonstrated by the fact that the number of dairy cattle in the state has increased seven per cent and the production per cow twelve per cent. Three counties in the state have eliminated all scrub bulls.

In North Carolina the outstanding accomplishments have been the honoring of "Class A Farmers," that is, those attaining a degree of proficiency in a well balanced and sound system of farming as indicated by a score card prepared by the College of Agriculture and the Bankers Short Course given there. Future plans provide for the continuation of the county key banker system and the arrangement of county banker-farmer tours.

In Virginia \$15,000 has been raised by subscription for boys' and girls' club work, largely from bankers. A group meeting was held at the College of Agriculture with two hundred bankers in attendance. The Committee on Agriculture of the State Bankers Association voted to continue and check up on the county key banker work.

The reports from New York on the activities for the past year included the distribution of 20,000 short form farm credit statements prepared co-operatively by the agricultural college and bankers. The bankers' agricultural committee also arranged to send suggestions to the banks of the state to aid in financing purchase of dairy cattle to replace those lost by the tuberculin test.

Bankers' Farm Schools

Bankers' Farm Schools or "Short Courses" continued popular during the year. Several colleges held such courses under the auspices of the state bankers' agricultural committees and are repeating them this year.

"Minimum of Talk—Maximum of Demonstration" was the character of program put on by the Kansas Agricultural College for the second Bankers' Farm School in April. Four representatives were invited from each of twenty counties, consisting of the county key banker, the county agent, the secretary of the county bankers

association, and the president of the farm bureau. Proper farm methods were brought out by demonstrations then tours were made to farms whose owners had followed the practices and methods outlined by the college to illustrate the lessons. Emphasis was placed on the important part bankers can play in developing agriculture.

In South Dakota specific plans for the ensuing year are the appointment of county key bankers, co-operation in boys' and girls' club projects and group meetings of county agents and key bankers. In Minnesota the county key bankers system is to be continued with special emphasis on bringing the county agent and key banker into closer co-operation.

At a banker meeting at the North Dakota Agricultural College it was decided that the key banker organization would be completed and in order to acquaint the bankers with agricultural needs county bankers' meetings were planned during the year.

At a conference held at Montana State College it was reported that county key bankers had co-operated in arranging for a livestock special train which ran for seventeen days made twenty-nine stops and came in contact with 22,000 people; that bankers had assisted in six district conferences that led to the formation of a state agricultural program, and that twenty-eight counties reported definite work under the leadership of the county key bankers such as assisting in the purchase of purebred livestock and loans to club members.

Other States in Line

Idaho College of Agriculture was the scene of a special meeting attended by thirty-five bankers and college representatives. The conference voted to join the key banker ranks.

In Oregon the first banker-farmer short course was held in January with a good attendance and marked enthusiasm. A meeting of the state bankers Agricultural Committee held in conjunction with the course voted approval of the banker-farmer contest sponsored by Agricultural Commission, American Bankers Association, and appointed a committee to confer with college authorities on methods to prevent spread of contagion in dairy cattle.

California held twenty-two successful county tours during the year and as a result it is planned to extend the tours to every county in the state and also to arrange a state-wide tour. The county key bankers played a big part in pushing this work. At an Arizona College of Agriculture meeting of bankers county key bankers were appointed and plans made for community conferences of bankers, farmers and others where local agricultural needs will be discussed.

In New Mexico bankers and county agents met at Clovis as a step in the plan to acquaint bankers in different sections of the state with agricultural conditions and to bring about greater co-operation between them and the county agents. At the Colorado College of Agriculture plans were formulated to select county key bankers, to follow up work with key bankers and county agents and for chairman of the state bankers' committee to attend and address group meetings.

In Nebraska four "farm outlook" meetings were held, largely attended by bankers. Sixty-nine county key bankers were appointed during the year and follow-up work between them and county agents is to be pushed.

For Iowa effective co-operation is reported between bankers and the Extension Service of the state college in their farm bureau programs. Every third farmer in the state is a member of the bureau. The key banker system is to be continued and special emphasis is to be placed on team work between county agents and key bankers.

Director D. H. Otis of the Agricultural Commission American Bankers Association attended many of the meetings.

STRAIGHT TALKS WITH AUNT EMMY

On When Women Come Into Money.

As Aunt Emmy sipped her tea she heard the conversation drift to the Slade sisters. The fact that they had inherited a large fortune and would have to administer it themselves created considerable comment.

"My husband says old man Slade made a big mistake not putting it in trust for them," said Mrs. Burt. "He says women never should handle large sums of money because they are financially uneducated—he really means 'dumb.'"

"All women aren't dumb about money matters, are they, Aunt Emmy?" exclaimed Miss Pringle.

"Of course not," Aunt Emmy agreed. "There are all sorts and kinds of women all the way from very prudent to very foolish."

"Well, anyway, an awful lot of women have been victimized in financial things—just look at all the widows that have been robbed," insisted Mrs. Burt.

"There won't be so much of that in the future as in the past," Aunt Emmy said. "Women have been easy to victimize because they knew so lit-

tle about money affairs, but now they are realizing this danger more and more and are taking advantage of the financial advice departments their bankers have set up for them. One thing that has led to women's financial undoing is their natural love of pretty things. This trait often leads them into foolish investments and speculations to get money quickly.

Once a woman sets her heart on a thing she can't wait until it is hers. "But if women didn't buy things, there wouldn't be any business," spoke up Molly. "Women are the natural spenders of the family, Dad says."

"Yes, but they would have more to spend if they'd go a little slower," replied Aunt Emmy. "Every time I see a woman falling for some silly get-rich-quick scheme I think of the nice things she could buy with the money she is going to lose. If they'd go slower—they'd get farther."

"From what I know of the Slade girls," Molly began—but just then the Slade girls themselves came in.

"We're so sorry to be late," they apologized, "but we have been having our first lesson in finance down at the Trust Company. They are going to give us quite a lot of time and explain all the things we ought to know about money to keep us out of financial trouble."

"Well, my dears, you are going to the right school," said Aunt Emmy. "If every woman would do that there'd be less trouble and more pretty things for all of them."

Sweet Clover Is Partial to Lime

Inoculation and Firm Seed Bed Are Important in Securing Stand.

(Prepared by the United States Department of Agriculture.)

Sweet clover will grow almost anywhere, providing there are more than 17 inches of rain and sufficient lime in the soil. However, in spite of the fact that sweet clover is a hardy plant, it is not always easy to get a stand.

In a new publication just issued by the United States Department of Agriculture as Leaflet 25-L, "Sweet Clover," some of the essentials of sweet clover culture and utilization are discussed by Dr. A. J. Pieters, agronomist of the bureau of plant industry. A copy of the leaflet may be secured upon request.

Three Essentials.

Three things are especially important in securing a stand of sweet clover, according to Doctor Pieters. They are lime, inoculation and a firm seed bed. It may not always be necessary to neutralize an acid soil, but sweet clover commonly must have lime if it is to do well. Inoculation of the seed or soil is advisable where the crop is to be grown on land that has grown neither alfalfa nor sweet clover before. A firm seed bed is necessary. Many failures have been shown to be due to lack of rolling or compacting the soil after plowing.

Sweet clover may be utilized as hay, pasture, and for soil improvement purposes. As a hay crop, however, it is not equal to alfalfa or red clover. As a pasture, a good stand of sweet clover in its second season will furnish more grazing than any other plant known. It is also an excellent crop for soil improvement, and fortunately it will serve both as a pasture and a soil improving crop at the same time. In some sections it has been found that the increased yields of sugar beets due to sweet clover were practically the same when the crop was turned under after being pastured as when the entire crop was turned under.

Value as Soil Builder.

The value of sweet clover as a soil improver lies in its ability to take nitrogen from the air through the nodules on the roots, to store this in its thick roots and in the stems and leaves, and to deliver it by rapid decay when it is turned under. Much, if not most of the nitrogen in the top growth of the first season moves into the roots in the fall and is stored there. The new growth in the spring is made from this stored nitrogen, and in April and early May, as the nitrogen in the tops increases, that in the roots decreases. This feature and the fact that it starts growth very early make sweet clover an ideal green manure for corn. It is not necessary to wait for a large spring growth before turning under; usually there will be no more nitrogen May 15 than there was April 15, and the field can be plowed just as soon as plowing can be done after a few inches of growth have been made to insure that the tops will die and not come up in the corn.

A copy of the leaflet may be obtained by writing to the United States Department of Agriculture, Washington, D. C.

Jersey Black Giant Is Preferred for Its Meat

The market for poultry often discriminates against black fowls, which has perhaps caused some breeders to stick to other colors when they in reality prefer blacks. This has been one of the greatest booms to the Jersey Black Giants. They are black, to be sure, but the ideal Giant quill is white where it enters the skin, and once dressed there is none of the disagreeable color remaining that happens when other black breeds or varieties are dressed. Add to this one fact the several others such as growth, heavy weight, vigor and beauty, not forgetting that the Giant is the largest of smooth-legged chickens, and the poultry raiser has a bird hard to beat.

Short Farm Notes

One-fourth of American soil is best suited for growing trees.

Do not let cattle into the wood lot to destroy young seedlings.

Milk, cod liver oil, corn products, and leafy green food make chickens grow.

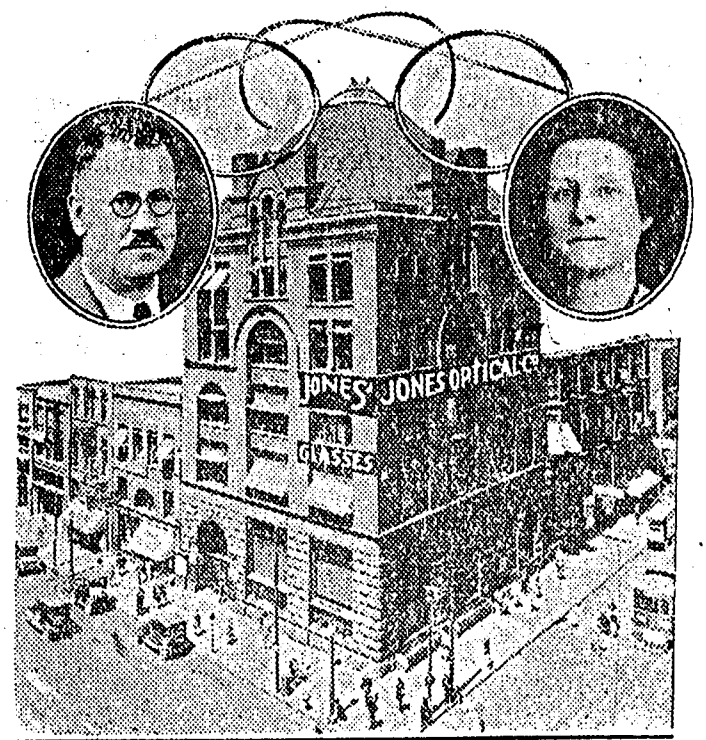

The European corn borer can be controlled, but it will take time, plus concerted and concentrated effort.

Since 1850 the leading states in the production of maple sugar and sirup have been, in order, New York, Vermont and Ohio.

With sweet corn, it has been observed that hills planted with large kernels mature quicker than those that grow from small seed of the same variety.

One way for farmers to avoid the expense of buying fence posts in the future is to plant a small area of land to black locust, European larch, or white cedar. These will furnish posts in 15 to 25 years.

COMING!

Dr. A. E. Jones Specialist

JONES' GLASSES SATISFY; THERE'S A REASON. Dr. Jones has had years of office experience, satisfactorily handling the most difficult cases.

We make trips East and keep up with the times.

For years Dr. A. E. Jones was president and Dr. Mae Booth Jones was dean of the oldest Optical College in the North West.

We specialize on the refraction and treatment of the eye, and have the largest and best equipped offices in the center of Spokane.

When you are in Spokane we ask you to call and see us.

Feeding Milk to Laying Stock Increases Yield

Liberal feeding of milk to laying stock will help to increase the egg yield and improve the quality and size of the eggs. Fertility and hatchability of the eggs will likewise be improved.

Milk feeding helps to keep fowls healthy and to prevent disease. In 1904-05 Dr. Louis Dechmann demonstrated that the mineral content of eggs could be increased, and made more desirable from a medical viewpoint by feeding the desired minerals in finely triturated form, mixed with milk curd, to the laying fowls. W. M. C. Johnson, chemist and metallurgist, has also pointed out that the rare mineral content of eggs may be enhanced by feeding the fowls finely powdered minerals rubbed up in warm fresh milk and in milk curd. Also, he states, as Doctor Dechmann claimed, that "medicated eggs" are possible and that we may expect them soon.

In experimental work in feeding minerals to growing chicks, milk, milk curd, and milk powder have proved the best mediums for feeding the powdered minerals. So milk and milk products not only help keep poultry healthy and productive, but may be the means of introducing medicinal elements into eggs which, in a very agreeable manner of administration, may help to prevent or cure disease and keep human beings in good health.

Sign of Quiet Times

For making practical permanent signs in street pavements, an inventor has patented rubber bricks of several colors.

"Frigate Bird" Swift

There are several species of birds that can travel much faster than an airplane. The fastest is the "frigate bird," which has its home in the tropics. This bird is remarkable for its long wings and is capable of flying 250 miles an hour.

McDowell's Midget Cafe

After nearly five years successful operation of the Commercial Hotel we are serving meal and lunches same as formerly at the old stand.

How to Control Rats Is Problem

Temporary Measures Include Use of Poisons, Traps and Gases.

(Prepared by the United States Department of Agriculture.)

Rats cause losses amounting to not less than \$200,000,000 each year in the United States, according to the biological survey of the United States Department of Agriculture. This enormous damage occurs in homes, stores and factories, and to a large extent on farms.

Temporary Measures.

Temporary measures of rat control include the use of poisons, traps and deadly gases. These devices merely eliminate the animals for a short time and do not in any way prevent others from reinfesting premises. Nevertheless, temporary measures are the first consideration in dealing with the rat problem. Permanent control consists primarily in depriving rats of one or both their necessities of life—food and shelter. Attention to such community rat-breeding places as garbage dumps and city abattoirs will keep down the rat population. Every community interested in preventing disease epidemics that may possibly be spread by rats should make it a point to provide for proper maintenance of dumps and similar places for garbage and refuse disposal. Changes in the construction of buildings can be effected to make them rat proof, and building codes, of cities and towns can require rat-proof construction.

Effective Poisons.

Barium carbonate and red squill are effective poisons for the temporary eradication of rats. Barium carbonate has neither taste nor odor. It is mixed with various foods and, if prepared as recommended, is usually effective. Red squill has an advantage in being relatively harmless to animals other than rats. If taken accidentally by cats or dogs it acts as a powerful emetic and is thus eliminated. A small quantity of red squill will kill a rat, however, and it is therefore an ideal poison for use on farms and in many places in towns or cities where there may be danger of poisoning beneficial animals.

Calcium cyanide fumigant has been widely and effectively used to kill rats that live in burrows in the ground, under concrete, or in other inaccessible places. It comes in powder form and is applied with a duster or blower. When the dust comes in contact with air it forms a poisonous gas. Calcium cyanide is a deadly poison and should be kept out of reach of children, irresponsible persons, and live stock.

Causes of Failures to Secure Alfalfa Stand

Failures to secure stands of alfalfa on reseeding may be due to several causes, farmers interested in new seedings are being advised. Young alfalfa needs a firm, moist seed bed that has been as carefully prepared as for sugar beets, according to Alvin Kezer, agronomist of the Colorado experiment station. For that reason the crop often is started more readily on land that has been previously in a cultivated crop that has left the soil in a good physical condition. Some failures to secure stands of alfalfa may be due to the lack of organic matter in the soil which is sometimes evident on heavy soils that "run together."

Alfalfa makes the best growth when planted fairly early in the season and not over one inch deep on heavy soils. The seed must come in contact with

moisture before it will germinate, which sometimes makes it necessary to furrow and irrigate the newly seeded ground. A nurse crop is particularly valuable where the soil tends either to crust or blow. Professor Kezer points out. From one-half to two-thirds of a stand of the nurse crop is sufficient. Barley has proved the best nurse crop all over Colorado, particularly the variety known as Colless. Kanota, a short-stemmed oat, has proved very satisfactory in the Arkansas valley. After the ground has been planted the alfalfa, rather than the nurse crop, should be favored in the matter of irrigation. The small grain will usually take care of itself as long as the young alfalfa is in good condition. The alfalfa should be irrigated as soon after the nurse crop is harvested as possible.

Not Solely Jewish Feast

The feast of the Lord's Supper was not confined to the Apostles and to Jewish Christians. It was also celebrated in the churches of the Gentiles, as, for example, that at Corinth.

FARRELL WINS TITLE

Johnny Farrell of Mamaroneck, N. Y., is the new national open golf champion.

Agricultural Notes

Something is wrong if young chicks are not active.

Gardening keeps down the cost of living on the farm. It's no longer just a job.

Liquid skim milk is recommended for young chicks in place of water during the first week.

Carbolium, cresote, or crude carbolic acid make the best spray mate-

rial to use in poultry houses to keep down red mites.

It is better to feed silage to dairy cows once a day over a longer period than to feed it twice a day for a shorter time if no other succulent feed can be had.

To disinfect a brooder house, scrub the floor and side walls with a strong solution of hot lye (one pound of lye to 40 gallons of water), using a stiff broom. When the floor and walls are dry, drench them with a strong disinfectant—3 per cent creolin or lysol. Treat the fixtures in the same manner.

Has Alarming Touch

So sensitive is a burglar alarm developed in Germany that merely touching an article guarded by it, causes it to sound.

When Acorns Grow

Natural reproduction of white oak in the Southern states may be either by seed or by sprout, says the American Tree association. Under usual forest conditions acorns are produced when the trees are about seventy or seventy-five years old. Good seed crops occur about once in every four to seven years.

LOCAL NEWS

Mr. and Mrs. Ira Foster, Mr. and Mrs. Grant Bateman spent the week end at Elk River visiting at the home of Mr. and Mrs. Guy Foster. Mr. Foster says the mills are running two shifts, both in the mill and planer.

W. A. Perryman and son, Harley, were Spokane visitors the first of the week.

Mr. and Mrs. George Belshaw of Spokane visited at the home of Mr. and Mrs. H. P. Hull, Wednesday. Mrs. Belshaw is Mr. Hull's grand-daughter.

Mrs. O. E. MacPherson and two sons went to Orofino the first of the week to visit at the home of Mr. and Mrs. Stewart Compton.

E. E. McDowell expects to spend the rest of the summer in the Elk City country to see if the higher altitude will benefit his health. He is troubled with hay fever.

Mrs. Stewart Compton and children of Orofino are visiting at the home of her sister, Mrs. O. E. MacPherson.

Mrs. Ralph Knepper, Hester and John, Mrs. L. J. Herres and Eleanor are spending the week at Black Pine camp on Craig Mountain.

N. E. Ware, O. E. MacPherson and Dr. McKeever enjoyed a fishing trip in the Elk River country over the week end. They each learned some new stories, had lots of cold, sparkling mountain water to drink and caught a few fish.

Mrs. Bricker of Plummer is visiting friends and relatives in Kendrick this week.

Ethel and Berneda Cummings returned home yesterday from Lenore where they visited at the home of Nannie and Mary Weaver, two popular Kendrick teachers.

Don't get excited these hot days. Just keep cool and you won't notice the heat so much.

Mr. and Mrs. Gust Lucken spent the week end at the Hooker home on Bear ridge.

Mrs. Everett Fraser is spending the week in Lewiston with her little son, Arthur, who is recovering from his recent operation.

Miss Dorthea Dahl, candidate for treasurer on the republican ticket, Latah county, visited Kendrick the first of the week.

Mr. and Mrs. Walter Thomas were Lewiston visitors the first of the week.

G. F. Walker has been visiting various parts of the county in the interests of his candidacy for commissioner of the third district.

Miss Hazel Stanton was a Lewiston visitor the first of the week.

Nevlin Whybark of Linden was transacting business in Lewiston yesterday.

Miss Willmetta Matney of Cottonwood spent the week at the home of Mr. and Mrs. M. O. Raby.

Mrs. O. Huff of Spokane is visiting at the home of Mr. and Mrs. A. W. Ahl.

Martin Thomas and H. B. Thompson went to Big Island this week on business.

Mr. and Mrs. W. J. Departee moved to their new location last week on the Winchester grade where they will conduct a gas station and refreshment stand.

Miss Cordelia Emmett and Mrs. Floyd South left Saturday for Waitsburg, Wash., for a visit with Miss Emmett's sister, Mrs. E. R. Porter.

Mr. and Mrs. Oscar Torgerson, Mr. and Mrs. Stewart Wilson left yesterday for Montana points. They also expect to visit in Canada before returning home. They are making the trip by auto.

Linden News

Mr. and Mrs. Forest Smith of Moscow spent Sunday at the C. H. Fry home.

ROSY OUTLOOK FOR WHITMAN-LATAH FAIR

The directors and superintendents of the Whitman-Latah County Fair Association met as guests of the Palouse Chamber of Commerce Wednesday. Following the luncheon final arrangements were made pertinent to the fair which is to be held August 29 to Sept. 1, at Garfield.

The board reports every thing in readiness for the best fair ever with a larger and more adequate premium list than ever before. The catalogues are now available and may be secured from Clarke Johnson, Secretary-Treasurer of the fair association at Garfield.

Plans for an exhibitors and farmers banquet to be held Friday evening, August 31, are being formed by toastmaster H. E. Goldsworthy of Rosalia.

W. R. Heglar of St. John, Carl Grief of Uniontown, and Geo. Arland of Garfield, that the amusement committee is having a difficult time securing a place on the program for all of the attractions in addition to the twenty-two cars of fun-making contrivances of the Brown-Levitt-Huggins carnival troupe that will be on the grounds. L. C. Chesnut, assistant secretary-treasurer of the Whitman county farm bureau was elected to fill the vacancy left by J. Carl Laney and to direct publicity.

The chambers of commerce of the several towns are selecting the days for their one-hundred percent turnout. Wednesday has been designated as Moscow-Latah day. Geo. Lamphere of Moscow stated that the Latah people would be there with one or two bands.

Entry in the livestock division has exceeded those of last year at this time and give every indication of exceeding last years exhibition in number and quality of stock.

One of the chief features of the exposition is the large number of community exhibits entered for the prizes offered for the most representative and artistically arranged community booth. The following towns have signified their intentions of entering the competition: Tekoa, LaCrosse, Pullman, Colfax, and Garfield. Others are expected to make their entries soon.

Attractive prizes are being awarded in the agricultural divisions and two cash prizes for twenty varieties of grain in bushel showings. The miscellaneous seed and market garden vegetable class number in excess of forty classes. The sheaf exhibits will have to be secured early in order that the grain will show to the best advantage without shattering.

Willies Excuse

Julius Rosenwald, the Chicago merchant, on his sixty-fifth birthday, modestly imputed his extraordinary success to luck. "But," he went on, "even luck won't help the pessimist. The pessimist, looking for the dark side and never hoping, gets

nowhere, for the man who can't hope can't get work. He's like little Willie. "Do you go to school, Willie?" a lady asked. "Naw," said Willie, "Wot's the use o' me goin' to school? I can't read, I can't write, and I can't draw, so I don't go."—Exchange.

A Bit of History

It was twenty years ago the ninth of this month that Troy voted to never again permit a licensed saloon to operate within the village limits. Thus long before the eighteenth amendment or the Volstead law Troy voluntarily took a powerful dose of local option and survived, though at the time there were predictions that in going dry the town had sounded its doom.

With the disappearance of the brass rail and the brown bottle there went also the chief attraction for certain of the towns citizenry, who sought moisture afield, and whose absence was by no means catastrophic, as subsequent events proved. There are some who will recall the old wide-open days of this town. But not one of us who went through them is pining for their return. Not that it was worse here than in any other typical frontier town, for it was not—they were all wild and woolly and we early birds imagined we were getting a lot of fun out of it one way or another.—Troy News.

M. E. Church Notice

Preaching at Southwick Sunday, July 29th at 11 a. m. Kendrick at 8 p. m. You are welcome.

L. E. Taber, Pastor.

Ostrich Was "Off Side"

An amusing story comes from Montagu, South Africa, where, in a school-boys' cricket match, the batsman hit the only ball possessed by the village cricket team among a few ostriches standing close to the field. One of the birds whipped up the ball and swallowed it. The ostrich was caught, and by pummeling and massaging its neck for some time the ball was recovered.

Automobile Note

It doesn't help much to tell the nurse you had the right of way.—Toledo Blade

Primitive Lighthouse

The light in the Pharos of Alexandria was obtained by burning pitch-wood. The upper story of the lighthouse had large openings toward the sea, through which the light shone. Ptolemy Soter began the construction of the Pharos in the Third century B. C. and it was not completed until about 282 B. C. The architect was Sostratus of Cnidus. Each of its four sides is said to have measured at the base about 600 feet.

Pelican's Love-Making

The courtship of the pelican is a very quaint performance. The male bird first attracts the attention of the female by prodding with his beak the earth in the vicinity of the chosen one. The two then hold each other gently by their beaks in a manner which seems to correspond pretty closely to hand-squeezing! The scene closes with the two birds heaving down and rubbing the tops of their heads together!
