

THE STATE WE LIVE IN

By Byron Defenbach

Lakes of Northern Idaho

Twenty-five miles northeast of Spokane, in Washington near the Idaho line, stands Mt. Carlton, more commonly known as "Old Baldy," 6,100 feet high. Pieces of two inch pipe are mounted at various vantage points on the summit, each pipe labelled with the name of the object to which it points. Among these objects are 21 distinct streams and lakes. Looking down through the pipe labelled

Lake Pend O'Reille

The tourist gets a view of Idaho's largest body of water. It is a local story that an Irish guide always rendered this difficult. French name "Pond de O'Riley," or "O'Riley's Pond." The accepted pronunciation is "Pon D'Oray," meaning "ear pendant."

The lake has an area of 125 square miles, being two-thirds the size of Lake Flathead in Montana, and one-fifteenth that of Great Salt Lake, and ranking 20th among the strictly inland lakes of the United States. Its greatest length is about 45 miles, with an irregular shore line totaling some five times that distance. Depths reaching 2600 feet have been measured, with unsurveyed portions doubtless much deeper.

Its largest island was anciently an Indian burying ground, as its name of "Mamaloose" is said to signify. Many years ago another of its islands was occupied for a time entirely by vicious and notorious dives.

Lake Pend O'Reille lies at an elevation of 2100 feet; the mountainous country surrounding it was formerly covered by dense forests of valuable timber. The county in which it is located, Bonner, has ten sawmills, the largest of which is at Sandpoint, at the foot of the lake. The principal tributary is Clarks Fork river, and the lake's outlet is through the Pend O'Reille to the Columbia.

Lake Coeur D'Alene

This lake ranks second among Idaho's waters, and is clearly visible thru another of the pipes on Mt. Carlton. Locally pronounced "Cor D'Alene," liberal translation "Pointed heart." General features and surroundings resembling those of Pend O'Reille, and about one-third its size.

Principal feeders are the Coeur D'Alene and St. Joe rivers. The south fork of the first-named comes down thru the famous Coeur D'Alene mining section and the towns of Wallace and Kellogg, its waters being badly contaminated by lead and other mine waste. Steamer excursions up the "Shadowy St. Joe" have wide fame.

The outlet of Coeur D'Alene lake is at the city of the same name, into the Spokane River. This stream generates great power at Post Falls in Idaho, and is again utilized at Spokane, Washington, 35 miles from the foot of the lake.

Both of these lakes support a considerable steamer traffic. Their shores are dotted with summer homes, and the motor launch is much in evidence.

Bleck to Have Sale

Wm. Bleck will sell his farm equipment at public auction next Monday at his place near Cameron. Mr. Bleck expects to leave this fall for Canada where he will engage in wheat raising on a large scale.

A "Dramatic Critic"

A little girl had been allowed by her mother to visit the minister's family and stay for dinner. After the preacher had finished asking the blessing, the child said:

"That isn't the way my papa asks a blessing."

"And how does your papa ask a blessing?" inquired the minister.

"Why, he just says, 'Good God, what a meal!'"

Juliaetta News

Quite an enjoyable time was had at the home of Miles Pierce, Sunday, the occasion being a family reunion. This is an annual affair and is looked forward to with much interest by those who attend it. Last year the reunion was held at the Moscow park, but as most of the guests were from out of town, it was decided to hold the reunion at Juliaetta, so that the out-of-town guests could enjoy a feast of our famous watermelons. Those in attendance were Mr. and Mrs. James Sutherland and son, and Mr. and Mrs. Wm. Sutherland of Spokane; Mr. and Mrs. Irving Jensen of Princeton, Mr. and Mrs. Marion Hanks and children of American ridge; H. L. Peterson and family of Potlatch; Mr. Cheveron and Mr. Neilson of Potlatch; Mr. and Mrs. Walter Keeney and Mr. and Mrs. Elbert Branson of Troy; Earl Pierce of Lapwai and Grandma Pierce. A number of the guests who were invited could not get here for various reasons. One feature of the reunion is a family orchestra from Orofino, who were unable to attend this year.

The friends of Mrs. Claude Clark gave her a shower Wednesday afternoon at the home of Mrs. Arnold Behrens.

The Baptist Missionary Circle met Thursday of last week at the church. On account of everyone being so busy there was not a very large crowd, but the program was very interesting. Mrs. Philip Johns sang a solo that was appreciated very much.

Grandma Pierce is staying at the home of her son, Miles Pierce. She intends to remain in our city some time.

Mrs. M. Nutt, Miss Weitz, Miss Gertrude Gruell, Mrs. S. Gruell and Cecil Gruell motored to Elk River, Saturday.

The children of the seventh and eighth grades are very busy planning a party for Friday night at the school house.

Mrs. Marion Hanks took her baby boy to Spokane, this week to consult a baby specialist. The little one is not getting along as well as it should.

The cannery opened for a small run on tomatoes last week, and is going to have a short run again this week.

Everett Bowen, son of Mr. and Mrs. G. Bowen received quite a painful injury recently. He was extracting shells from a rifle and shot himself thru the toe.

Mr. and Mrs. Walter Cochran are leaving for Okanogan this week.

George Spray, who is at Spokane in a hospital, is reported as growing weaker.

Mrs. Walter Clark visited her daughter, Minnie, who is attending school in town, Tuesday evening.

If you have a friend to visit you, or if you have gone visiting yourself, or in face any happening of interest, please jot it down on a piece of paper and drop it in P. O. Box 305. We haven't a home paper of our own but we can help our neighbor paper, and besides your out-of-town friends like to hear about what you are doing.

Cecil Gruell went to Lewiston Monday where he will work in the mill.

Mr. and Mrs. Claude Clark returned from Spokane, Sunday. Their friends gave them a charivari Sunday night. Judging from the sound of pans and other tinware, there must have been quite a crowd.

Keith Miller is staying with his grandparents, Mr. and Mrs. T. O. Grene and attending school here.

Rev. Taber Will Remain

By request of the local congregation, Rev. L. E. Taber will be retained here for the ensuing church year. This action was taken by the Methodist conference held at Lewiston last week. This will be Mr. Taber's third year in Kendrick. He has done good work here and is a very popular minister. He will preach part time at Southwick until a supply pastor is secured for that church.

Older Generation Learns About Bacteria in Foods

Temperature in Ice Box Should Not Vary.

By Louise Leslie, Home Economist, Electric Refrigeration Bureau

Mrs. Herrick looks just exactly the way a grandmother is supposed to look—plump, rosy cheeked, white haired and spectacled. She even has a passion for darn ing socks. But it's no use letting your imagination run riot, for just as you start painting lovely mental images of her baking cookies, while adoring grandchildren look on, she will probably say, "When my mother was my age, she was a grandmother five times—and here not one of my children is even married. They all say they are much too happy at home to have any desire to leave it!"

Kate Comes Home.

And if she is in a talkative mood, which she nearly always is, she will go on to tell you about these children of hers. "My goodness," she will start, "aren't they all ambitious! Even the girls are full of talk about careers. My second oldest girl, Kate, has just graduated from medical school. I believe Kate is the smartest of the lot. She always was sort of a leader. For instance, it was Kate who talked us into getting an electric refrigerator."

"You see, Kate took a lot of work in college which had to do with food, and she learned that foods have to be kept at a temperature below 50 degrees in order to stay in good condition. So home she came and put a thermometer in our ice box, and I

tell you Kate got all wrought up when she discovered that even when the box was chock full of ice it wouldn't get any colder than 52, and when the ice melted down a piece, the box would start getting warmer still. Kate started right in predicting an early and horrible death for all of us.

Must We All Get Sick?

"Of course, Pa and I claimed we'd always had that box and that we'd all lived to grow up, and then Kate flew off the handle for fair and said that if we had it was through no fault of the ice box, and how did we know how many little illnesses we'd all had—stomach upsets and such—we might have been spared if our food had always been kept properly."

"Well, I tell you that sort of got Pa and me, and we started thinking maybe there was something to it—because lots of times one or the other of us would get to feeling poorly for no reason I could think of. We'd always just figured that a certain amount of sickness was coming everybody's way and that you might as well resign yourself to your share and suffer as gracefully as possible.

They Wouldn't Change Now.

"Pa and I are pretty well set in our ways, but when Kate finally got us down to the place where they had a lot of electric refrigerators on display, and I found out how much easier these new boxes are to keep clean, and that I needn't ever again bother about using things up in a hurry to keep them from spoiling, I got just as enthusiastic as Kate. And the ice cubes won over Pa first shot out of the gun. He always did hate chopping ice. So we got the new refrigerator and now everyone is happy. And I must admit it is a wonderful addition to the kitchen.

"In fact, just between you and me, I don't know how on earth I ever got along without it!" R12

Death of Dorothy Jones

A sad death occurred in the family of Mr. and Mrs. A. W. Jones of Bear ridge when their daughter, Dorothy, passed away at Spokane, Monday. Death was due to tuberculosis, which she contracted a year ago. She taught school at Lenore early last winter but had to give up her work there before the end of the first term because of failing health.

Miss Dorothy was a graduate of the Kendrick high school, after which she finished her teaching course in the Lewiston normal. She was a successful teacher and it seemed that she had a bright future before her, but death came soon after she had fitted herself for her life work.

She is survived by her parents, Mr. and Mrs. A. W. Jones, five sisters and five brothers, besides other relatives residing on Bear ridge. She was a young lady of the highest character and leaves many friends who are deeply saddened by her untimely death.

Funeral services were held at the Lutheran church on Bear ridge yesterday afternoon, Rev. L. E. Taber, Methodist minister, officiating. The church choir from Kendrick sang for the service. Interment was made in the Wild Rose cemetery on Bear ridge, which is near the family home.

The deepest sympathy is felt for the bereaved family in the loss of their loved one.

Kendrick Hardware Closing Out

Announcement is carried in a full page advertisement of this issue that the Kendrick Hardware Co. will close out its business here, having purchased the Anderson Hardware of Lewiston. Prices have been cut in order to reduce the stock here to save moving to Lewiston. Mr. Thomas expects to greatly reduce his stock before moving to his new business location. The big sale starts next Monday morning.

Big Sale at Kendrick Store

The Kendrick Store Co. is putting on its annual fall sale, starting Thursday of this week. It is a store-wide sale and had a good opening day yesterday. All merchandise is displayed in bins for the convenience of the shopping public. John Roos of Lewiston is assisting with the sale.

High School Classes Organize

At meetings held by the respective classes on Monday, the following class officers were elected:

Seniors: President, Mabel Taber; vice president, Minnie Craig; secretary, Herman Hartung; treasurer, Harley Eichner; reporter, William Ingle.

Juniors: President, Mae Freytag; vice president, Carl Davis; secretary and treasurer, Marjory Davidson; reporter, Robert Dammarell.

Sophomores: President, Eldura Jones; vice president, Bessie Blevis; secretary and treasurer, Georgine Christensen; reporter, Edna Stanton.

Freshmen: President, Ethel Cummings; vice president, John Wilson; secretary Edna Bolon; treasurer, William Holt.

Faculty Notes

The full staff of high school teachers were present at the opening of school, Monday, Sept. 10. They are: Mr. Beardsley, Mr. and Mrs. William Jarvis, and Miss Edna Ledbetter.

Student Body Organization

The officers of the Student Athletic Association were elected last January and will serve until the beginning of next semester. They are: President, Robert Dammarell; vice president, Minnie Craig; secretary, Helen Emmett; treasurer, Carl Davis; Athletic manager, Arthur Foster.

Football

Students and teachers are combining their efforts toward the promotion of high school football by attempting to devise some plan whereby financial backing, sufficient for the needs of a team may be secured.

The students, willing and eager to do all that they can are now looking forward to presenting a play as one means of raising funds, and prospective players have offered to make substantial donations toward the necessary suits.

The business men of the town have not been lacking in enthusiasm and have promised their financial aid in getting the game started.

With twenty-five boys out at the first athletic meeting, Coach Jarvis thinks that the prospects for developing a team are rosy.

High School Enrollment

At the meeting of the school year there were fifty-one students enrolled in high school and more are expected to enter at the beginning of next week from other school districts.

Several students from Cedar Creek are enrolled in the Freshman class and two from Juliaetta are enrolled in the senior class.

In The Grades

There are fourteen beginners in the primary room this year. They are starting on the new Curtis-Smith Picture Story Reading Lessons.

The second grade is reading a Pathway First reader for review. Both grades are having hand training work with scissors, crayons and paste.

The primary children were weighed and measured Wednesday. Several are badly underweight. Cards were sent to the parents in each case, with suggestions for overcoming any defects in the children.

Order New Machinery

At the regular monthly meeting of the Kendrick highway commissioners, held last Saturday, it was decided to order a new tractor and grader for use on the roads within the district. The Yuba tractor, purchaser two years ago for the sum of \$250 from the Clearwater highway district, was traded in on the new tractor for the sum of \$750. The old grader will be used for rough work and the new machine for smoothing and ditching the roads. The machinery is expected to be shipped here some time the last of this month.

Teacher (in grammar class)—"Willie, please tell me what it is when I say, 'I love, you love, he loves—'"

Willie—"That's one of them triangles where somebody gets shot."—Ex.

JUST IDAHO

By Guy Flenner

The "Chain Gang"

Sheriffs and other law enforcement officers, in convention assembled at Idaho's capital city, solemnly resolved in favor of reviving the "chain gang" system of working prisoners. We assume that the specific reference to "chain" would carry a literal application if the plan were made effective in Idaho. We would, therefore, see our prisoners manacled in squads performing public work that undoubtedly they should do, but without such harsh measures as the hard-boiled officers have suggested.

The "chain gang," or anything approximating it, is a reminder of barbaric penology and has its proper alignment with the ducking stool, with penalties for witcheaft and harsh treatment for any who might let God's sunlight into the house on the Sabbath day.

It has been fairly well demonstrated that there are at least two elements that have failed to prevent crime. One is a superabundance of laws; the other, inhuman treatment of those found guilty.

The man deprived of his liberty is apt to harbor severe thoughts as to his relationship to society when freedom comes, but an amelioration of sentiment usually comes with liberation. If, however, he has been subjected to harsh and unnecessary punishment, he becomes so embittered as to render him an implacable foe of agencies of law and order and of the public they represent.

The desire to produce good citizens rather than more hardened criminals in the ranks of those incarcerated is the basis of all prison reform and has the approval of all leading first-hand students of the subject. The "chain gang" is not in their list of correctives.

Dairy Products From Waste

Exhibits carried on the dairy special that toured southern Idaho for 13 days revealed that the Idaho cow was a factor in the utilization of waste products and the conversion thereof into dairy products. Cannery wastes, bean and pea by-products, beet pulp and molasses, cull potatoes are among the things heretofore more or less wasted that is being made into money via the cow. The growing interest in dairying was denoted by the fact that more than 22,000 dairymen heard the messages on modern methods of production.

How Much is a Billion

Idaho's assessed valuation is close to five hundred million, which makes the real valuation more than a billion dollars. Most of us find it difficult to visualize a billion, but we all know what it means when set down opposite our state's name in the national list of public assets—Idaho, with half a million population and a billion of property! Comparatively no state makes a better showing. It will not be long until Idaho people will be talking about the subject in terms of billions. We are growing rapidly in wealth. We should not permit ourselves or our state to be stunted otherwise.

Harvest Dance Next Friday

A harvest dance will be given at the Fraternal temple next Friday night, under the direction of the baseball management. A good six-piece orchestra will furnish music for the occasion and lunch will be served at midnight. Everybody is cordially invited to attend.

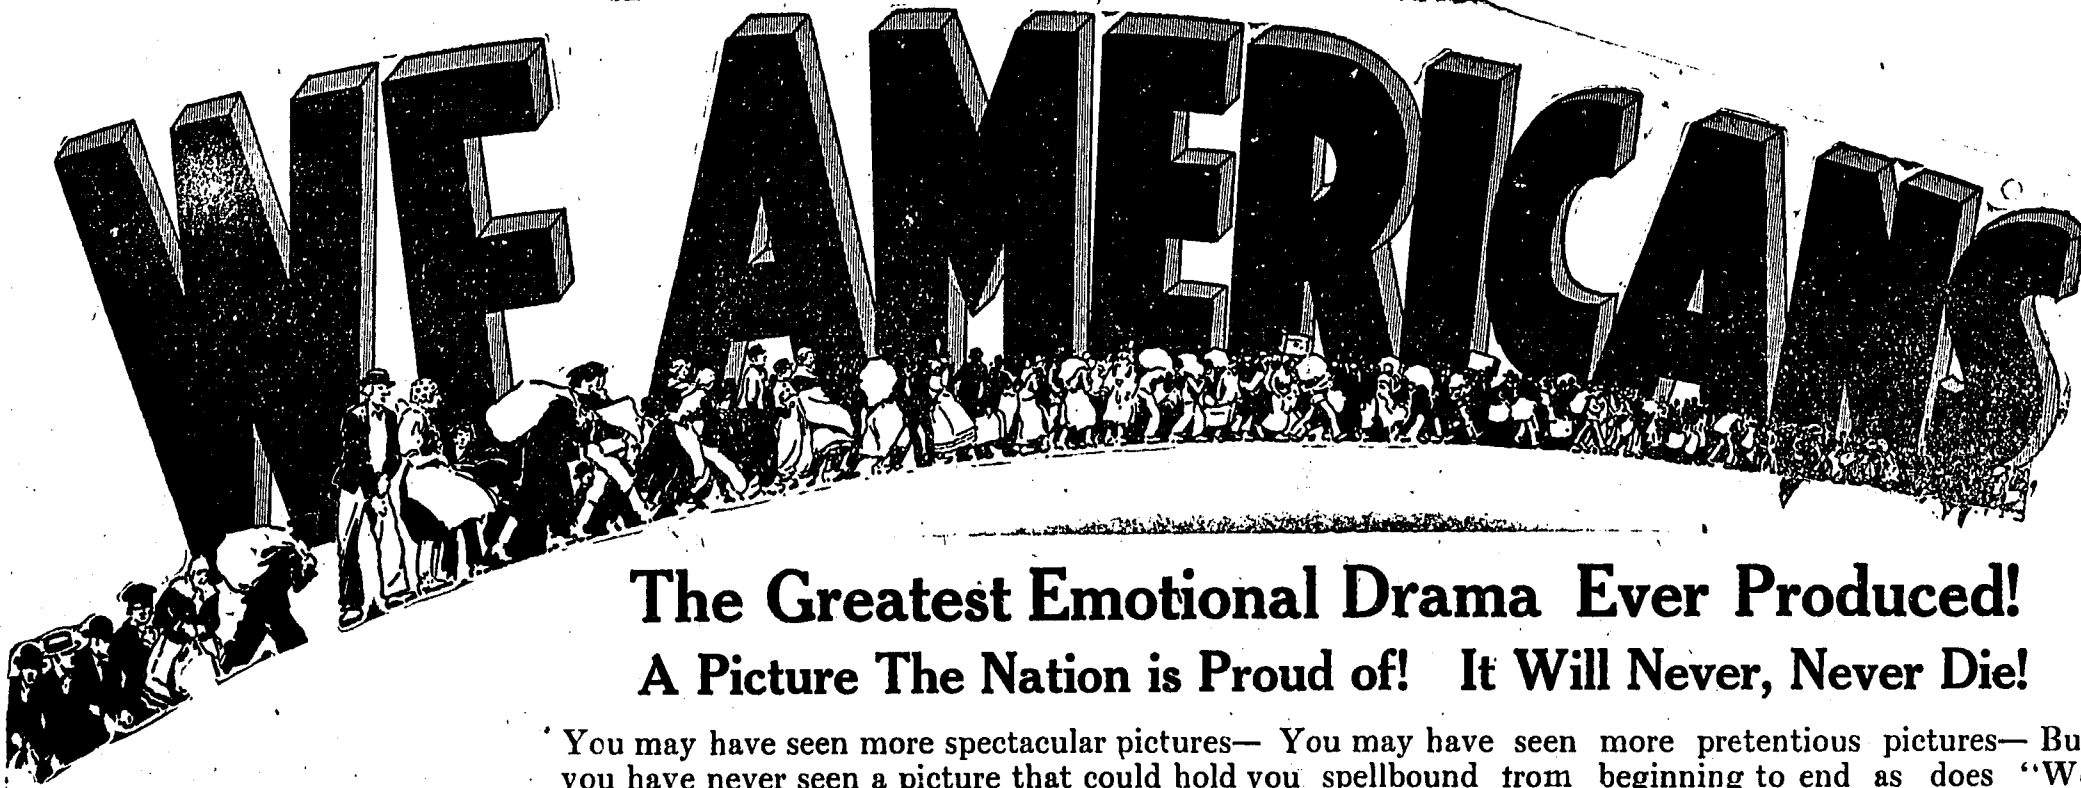

Will Hold Public Sale

Leonard Davis will hold a public sale at his place near Lealand tomorrow. Mr. Davis has sold his farm to Claud Craig and expects to locate some place in Oregon on a stock ranch. His wife and children will remain in Kendrick during the school year.

Mr. and Mrs. Wayne Herres of Lewiston visited relatives here this week.

Coming Thursday, Friday and Saturday Nights For 3 Days!

September 20th, 21st and 22nd

The Greatest Emotional Drama Ever Produced!
A Picture The Nation is Proud of! It Will Never, Never Die!

You may have seen more spectacular pictures— You may have seen more pretentious pictures— But you have never seen a picture that could hold you spellbound from beginning to end as does "We Americans." Only the greatest of pictures could so take you out of yourself and by the unfathomed depth of its emotional intensity, call forth the deepest feeling of which you are capable. New York paid \$2 a seat to see this picture. It is absolutely the greatest American production since the "Birth of a Nation." So broad in its human sympathy and understanding that it will appeal to every race—every creed—every nation—every inhabitant of the Civilized World. **The One Picture You POSITIVELY MUST See!**

Folks! This is NOT just advertising! It is truly a wonderful picture and you should see it!

Doors Open at 7:30 Each Night Admission: Adults 50c; Children 25c

The NEW KENDRICK THEATRE

POULTRY

EGG PRODUCTION SHOWS INCREASE

(Prepared by the United States Department of Agriculture.)
 Radical changes in poultry management practices the last few years are having a marked effect in lengthening the production season, according to Rob R. Slocum of the bureau of agricultural economics, United States Department of Agriculture, addressing the American Institute of Refrigeration at Washington.

Increasing egg production at an earlier date in the winter than usual and the production of out-of-season broilers have caused apprehension in the cold storage industry over the possibility of a decrease in the amount of cold storage space required for poultry and eggs, but Mr. Slocum assured the Institute that the volume of these products produced and stored during the normal season will continue to be as great as at present, or even increase with the normal increase in population.

"It is probable," he said, "that both increased production of eggs during the fall and early winter and increased production of broilers out of the normal season will continue to expand. On the other hand it must be remembered that the great bulk of the annual egg and poultry crop of the United States is the product of general farms of the Middle West and only a relatively small part the product of specialized poultry farms. While specialized farms are increasing in number and importance there is no reason to anticipate that the farm flocks will not continue for years to come to produce the greater part of our poultry and egg supplies. Moreover, the eggs from these flocks will be produced largely in the spring months and the poultry raised will be hatched during the normal spring months and marketed during the fall and early winter. This being true, it follows that a large surplus of eggs will be available in the spring and a correspondingly large surplus of poultry in the fall and early winter which must continue to be stored for use at later periods."

Summer Poultry Feeding Plan of Ohio Specialist

Summer feeding schedule for laying hens calls for reduction in the amount of grain and increase in the amount of mash, say poultry specialists.

"Gradually reduce the amount of grain feed and increase the mash consumption in order to maintain summer production," says one of the specialists, P. B. Zumbro of Ohio. "It is wise to feed all the grain in the evening in order to make the birds hungry for mash during the day."

"Another good plan is to keep the birds confined in the house until afternoon, if the house can be properly ventilated. This will stimulate mash consumption and at the same time allow ample opportunity for green feed."

"Another way is to put mash hoppers where you find the birds during the day—under a tree, in a shed, or wherever they congregate."

"Now is the time to start wet mash. Mix enough milk with the ordinary mash to make it crumbly wet, and feed such quantities as the hens will consume in a half hour."

Poultry Notes

Cleanliness is one of the chief factors in success with poultry.

Keep the coops for the small chicks at a distance from the hen house.

Now that the warm days have come the young chicks will appreciate plenty of shade and fresh water.

The nesting boxes should be in the darkest part of the hen house, and should all face away from the door.

On alfalfa or clover is the best place to raise chicks. Too valuable for that? Shucks, no. An acre, divided in two fields, so the fowls can be rotated, will take care of 500 chicks.

Skim milk and yellow corn meal are good feeds for young chicks if there is plenty of tender green feed within reach.

Inbreeding seems to be more harmful with turkeys than any other species of fowls. A gobble can ordinarily take care of 15 or 18 hens.

If your hens have nests where the sun shines on them try to get the eggs as soon as they are laid, for one hour's sunshine directly on eggs will reduce the quality. Gather them carefully.

Sprinkle a little carbolic acid in the hens' dust bath occasionally. After each rain stir the dust and make it fine again.

Potassium permanganate makes a good addition to the drinking water. Enough should be used to make the water a claret color.

It is not too late to plant Essex rape for fall feed. Let the rape grow from five to six inches high before turning the poultry in the patch or they will kill it out.

A Good Talk

There are always two to a talk, giving and taking, comparing experience and according conclusions. Talk is fluid, tentative, continually "in further search of progress;" while written words remain fixed. Good talk most commonly arises among friends. Talk is, indeed, both the scene and instrument of friendship—Robert Louis Stevenson.

Orchid Matures Slowly

Nearly five years are required for an orchid plant to mature under glass from a seed and only about one seed in a million produces blossoms.

Difficult Line to Draw

The hardest thing of all, often, is to tell where the commendable optimism leaves off and the unmitigated idocy begins.—Ohio State Journal.

Forms of Salutation

That Seem Peculiar

If some one should approach you and say, "How do you perspire?" or ask you if you have eaten your rice, don't be offended. These are the words by which the Egyptians and Chinese say "How do you do?" when they meet an acquaintance.

All races have their own peculiar forms of salutation. On islands near the Philippines natives grasp the foot of the person they wish to greet and gently rub their faces with it. South Sea Islanders rub noses and exchange gifts, while the Moors kiss each other's shoulders.

"How is your strength?" was the greeting in ancient Rome, where every man was a warrior. The Greeks, with other things than war on their minds, said, "What business are you engaged

in?"

The Frenchman's "I am charmed and enchanted to meet monsieur" is difficult to improve upon. "How do you find yourself?" is the German's greeting, and when a guest rises from table they express the hope that he has had a hearty meal and that he will find himself the better for the cheer of the repast.

Explaining the Wind

The blowing of the wind is owing to the presence of more air at one place than at others. This causes a push from the places of more air toward those of less, and the greater this difference in quantity of air the greater the push, and the faster the winds. Now, it is difference in temperature that causes the difference in the accumulation of air; in March the difference in temperature between the

southern and northern portions of the United States is greater than at any other time of the year, hence the difference in atmospheric pressure between these regions is then greatest and the resulting winds strongest. These winds are not mainly north and south, as the pressure is, but from west to east. This is owing to the effect of the rotation of the earth, in a way fully understood, but not capable of brief explanation.

Artificial Lace

There is no weaving employed in the production of artificial lace. The manufacturing is done by a machine, which consists in its essential parts of a receptacle containing a cuproammoniacal solution of cellulose, a metallic cylinder upon which is engraved the negative of the design and a coagulation vat. A rotary motion is given the cylinder, over which flows the solution, which, entering the interstices of the engraved pattern, fixes itself immediately in the coagulative liquid, out of which emerges the texture ready to be dyed and dressed. Artificial lace is both beautiful and unalterable. It will wear well and is less combustible than ordinary lace and is waterproof.

Square of Sod Pleases

Chicks and Broody Hens

A square of sod, dirt up, in the brooder will give chicks a good time picking at the bits of soil and gravel adhering to the roots, and scratching like old hens to get it. A square of sod makes also the best base for a nest for broody hens. Take a box not less than 12 by 16 inches. Fit some newspapers in the bottom, and on top of that place a piece of sod dirt up, and mold the nest to fit the body of the hen and prevent the eggs rolling into corners. If the box is set on a cement floor, put slats under to allow the free passage of air. Three days before setting the hens, treat them with sodium fluoride for lice.

Agricultural Squibs

A muddy barnyard is a fine breeding place for flies. Good drainage is the solution.

Cutworms can be controlled with poisoned bran mash, scattered in the late afternoon or early evening at the rate of 15 pounds to the acre.

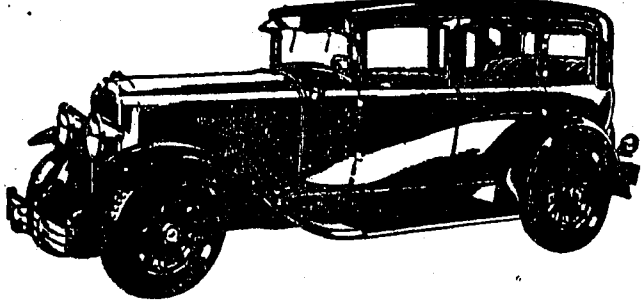

On rainy days repair that piece of machinery you need later on. It will save time when the machine is in the field. A stitch in time may save the wheat.

Cutworms cut off many plants in the spring garden. They may be poisoned with bait placed near the plants.

Came of Good Family

The father of Mary Todd Lincoln was a bank president, state senator, owner of a mill and part owner of a woolen factory.

The new Buick is the New Style

Graceful contours instead of straight lines—the gleam and sparkle of brilliant colors and chrome plating instead of drab effects... the most beautiful bodies ever built... Buick's masterpiece bodies by Fisher

At a time when motor car beauty was practically standardized—when imitation was the vogue—when there was a glaring lack of originality in body design—Buick has swept far beyond the commonplace and achieved a style which the entire country is acclaiming as the most distinctive and beautiful ever shown!

Fisher, the world's foremost builder of automobile bodies, has cooperated with Buick, the world's foremost builder of fine cars, to create a new mode—a new fashion—and so luminous is the result and so eagerly is the public welcoming it that Buick's great factories have reached new production levels in an effort to keep pace with an ever increasing demand!

Inside and out, the new Buick bodies by Fisher are the most beautiful ever built. Together with the wonderful new standards of performance introduced by the Silver Anniversary Buick, they are winning the greatest demand and the greatest preference ever enjoyed by any fine car!

The new Buick is the new style! And by that is meant, not merely a new type of beauty—not merely a thrilling turning point in body design—but a great countrywide vogue!

Mackinaws, stag shirts, blazers, flannel shirts and overcoats now on display for your choosing. An early selection is advisable.

N. B. Long & Sons

"The Home of Good Things to Eat and Wear"

500 Degrees or 45

CONTRASTS in the accomplishments of Electric Service are as striking as the wood stove and washboard compared to the modern electric kitchen and laundry.

Electricity gives the housewife as great a heat as 500 degrees in her oven or as low a temperature as 40 or 45 degrees in her electric refrigerator.

The engineer and scientist has given electricity the task of providing heat and the task of preserving foods in the home at the same time—often within a few feet. Yet this service all comes over the same three wires to the house.

To be thoroughly "modern" in this age the home must take full advantage of Electric Service.

Crescent Clippings

Mrs. Elizabeth Keeler left Saturday to visit with her daughter, Mrs. Edna Miller, of Scotts Bluff, Nebraska.

Mr. and Mrs. Wm. Kauder and Mrs. Elmer Hudson and children visited at the Henry Loeser home Sunday, to help celebrate Mr. Loeser's birthday.

School started Monday morning with an enrollment of fifteen. Eva Slatter is our teacher again this year.

Mr. and Mrs. Wm. Dorendorf and baby and Mrs. Anna Kimbley and children, visited Sunday at the Harve Woodruff home at Arrow.

Sunday guests at the M. L. Robeson home were Mr. and Mrs. Oral Craig and children of Leland and Mrs. Art Anderson and children of Agatha. Avia Craig and Leroy Anderson stayed to attend school here this year. Mrs. Robeson accompanied her daughter, Mrs. Anderson, home for a visit.

Mrs. Gus Farrington and daughter, Evelyn, and Harry Dorendorf visited with Mrs. Bill Dorendorf, Monday.

Mrs. Jim Farrington and son and Mrs. Abe Dorendorf and sons, visited at the John Darby home Monday afternoon.

(Too late for last week)

Mr. and Mrs. A. Dorendorf and grandsons, Floyd and Ted, Mr. and Mrs. Alfred Swanson, and Mr. and Mrs. Wm. Dorendorf and baby visited at the Wm. Riley home, Sunday, to get acquainted with the new boy.

Gus Farrington did the threshing for this neighborhood the first part of the week.

Alice Cramer left Saturday for Rose Lake where she will teach again this winter.

Southwick News

Henry Brammer and family, Grandma Brammer and son Aug. spent Sunday in Gifford.

Attlee Mustoe and wife and Virgil Harris and wife spent Sunday at Jim Johnsons near Lenore.

John Draper of Juliaetta was a visitor at the home of Harold Whiting, Tuesday.

The Jake Berriman family and the John and Newt Heath families of Texas ridge, spent Sunday at the home of Mr. and Mrs. Russell Rodgers.

Claud and Clay King of Marshfield, Oregon, came in Monday night and are visiting at the home of their parents and other relatives. They drove thru in their car.

Grant Bateman and family drove to Lewiston and back, Monday.

Elton McCoy and wife were the overnight guests of Jim Cook and wife of Bed Rock.

Arnold Cuddy and family and Mrs. Belle Cuddy drove to Lewiston last Saturday. Mrs. Belle Cuddy will remain there thru the winter.

John Stalnaker and family, Given Mustoe and family and Mrs. Dave Schoeffler and children were the guests of Harold Whiting and family, Sunday.

Mr. and Mrs. Alfred Adams and two children spent Saturday at the Homer Betts home. Mr. Adams is to teach at the Cream Ridge school this term.

The Brammer children are assisting Henry Wendt in caring for his beans this week.

School started Monday with a large attendance. Mr. Allen, Miss Thornton and Miss McCollum have charge of the high school. Mr. Cook, the fifth, sixth seventh and eighth grades and Miss Powell the primary. A large number of pupils from outside districts are attending the high school.

Mrs. Howard Southwick is quite ill at her home in town. Dr. Morehead of Kendrick is attending her.

Miss Nadine McCoy was a dinner guest of Mr. and Mrs. Foster McFadden of Cream Ridge Sunday.

Clarence Henderson and family of Potlatch spent the week end at the home of his parents.

Mrs. George Jones is spending this week at the home of her daughter in Moscow.

Linden News

Mrs. Emma Longfellow returned home Tuesday evening after

spending the summer with her daughter at Nampa, Idaho.

Mrs. Millie Abrams moved her family to Kendrick Wednesday where the children will attend school.

Mr. and Mrs. W. Weyen attended the Spokane fair and visited relatives last week.

Grandma Keeler, who has been staying at the Smith home during the summer, returned home Saturday.

Rev. Presnell and family were dinner guests of Mr. and Mrs. Addie Alexander, Sunday.

Mr. and Mrs. Gus Farrington and family and Mrs. Bess Keeler spent Sunday at the C. H. Fry home.

Dan and Raymond Lyons, Bill and Bob Fry entered high school at Kendrick Monday morning.

School opened here Monday with Miss Josephine Popkey of Loman, Idaho, as teacher.

Threshing was finished Saturday with the Gus Farrington and George Garner machines.

Mrs. Longfellow called on Miss Eva Smith, Monday afternoon.

POULTRY

GRAIN AND MASH BEST FOR CHICKS

The Cornell poultry department advocates a combination of scratch grain and mash for feeding young chickens.

During the first four to six weeks, any time between eight and ten o'clock each morning, chicks should be fed enough dry mash to last them until late in the afternoon. Grain should be put before them in the middle of the afternoon, depending on the amount of mash they eat. Both grain and mash should be fed in shallow boxes or troughs.

The grain mixture for this period consists of 40 pounds of cracked wheat and 60 pounds of fine cracked corn. The mash mixture consists of 30 pounds yellow cornmeal, 20 of wheat bran, 15 of flour wheat middlings, 10 of fine ground heavy oats or oat flour, 10 of fine ground meat scrap, 5 of bone meal, 10 of dry milk products, and one-half pound of salt.

For the first four to six weeks, the mash is usually left before the chicks until the grain is fed and the grain is left before them until the mash is fed the following day.

Liquid skim milk is recommended in place of water during the first week. Fine oyster shell may be fed if desired in separate dishes or on the floor. Grit or charcoal are not necessary but may be fed the same as oyster shell.

If liquid skim milk or buttermilk is available as a drink, the dry milk products recommended in the mash mixture should be omitted. If re-ground heavy oats cannot be obtained for the mash, the cornmeal may be increased from 30 pounds to 40 pounds.

For chicks from six to twelve weeks old a grain mixture consisting of 60 pounds cracked corn and 40 pounds whole wheat is recommended. From twelve weeks to maturity 200 pounds cracked corn, 200 pounds whole wheat and 100 pounds heavy oats are recommended. The same mash mixture as the one on which the chicks are started should be used throughout.

During the first six weeks the chicks should be fed more mash than grain. The second six weeks they should have about equal amounts of mash and grain, and after that more grain than mash.

Spray Solution Kills Mites in Hot Weather

Poultry mites make their first bid for fresh chicken meat in early summer. Sometimes they take the eggs also, or it seems that way because nobody else gets any eggs when they are present in large numbers.

Mites hide in the cracks and crevices of roosts and walls, but do not stay long on the bodies of the fowls. That is different than with lice, which stay on the bodies.

To keep down mites it is best to spray the house before they appear, very thoroughly. Don't wait until the chickens are restless and feverish at night with the attacks of these parasites. Don't presume that your house is clean because it used to be.

Spray well with one gallon of kerosene, one gallon of crude oil or worn-out crank-case oil, four ounces of crude carbolic acid and a half pint of any cresol solution, sheep dip or creolin. Repeat the dose in a few days, and put it on with force enough to reach the hidden places. This solution is a good disinfectant.

Animal Divisions

Antelopes, zebras, elephants, giraffes, lions, apes, and ostriches belong to Africa; America has its pumas, jaguars, peccaries, ant-eaters, armadillos; Australia has none of these but only its primitive monotremes and marsupials.

Times Change

It used to be said that one had to work to earn one's daily bread. Nowadays people say bonbons and cake instead of bread.—Atchison Globe.

LEWISTON, IDAHO

LOCAL NEWS

Mrs. Paul Schulze met with a painful accident Wednesday. While stooping over to pick something up from the floor, she dislocated her hip. She was taken to Lewiston where the hip was put back in place. She returned home yesterday.

Mrs. Percy Ware and little daughter were Lewiston visitors the first of the week.

John Heiber and son of Spokane were Kendrick visitors Wednesday of this week.

Mr. Wilcox of Lewiston is visiting his sister, Mrs. J. B. Helpman, this week.

Mr. and Mrs. Ralph Knepper and family were guests at the home of Mr. and Mrs. E. W. Lutz at Lewiston last Saturday evening.

Mrs. Lloyd Stanton and children left for their home in Astoria, Oregon, last Friday afternoon after spending the summer at the home of Mrs. Stanton's mother, Mrs. Thos. McDowell.

Frank Nesbit, master of the local Masonic lodge, left last Sunday for Boise where he will represent the Kendrick lodge at the annual meeting of grand lodge. Mrs. Nesbit accompanied him on the trip.

Byard Davidson of Colton, Wash., was transacting business in Kendrick last Saturday.

Mr. and Mrs. G. F. Walker left the first of the week in their car for Portland for a visit of several days.

Frank Nutt, who is working on the Troy News staff, was a Kendrick visitor last Tuesday afternoon.

Alberta Walker, Dorothy Holt and Hester Knepper went to Lewiston the first of the week to register at the normal.

Mrs. Morehead went to Moscow, Wednesday afternoon, to attend a meeting of the Anti-Tuberculosis Association.

Dave Gentry bought a new Studebaker sedan this week.

Wm. May and son, Harley, left the first of the week to look for employment. They may go back to Arkansas for the winter.

Mrs. John Brown arrived the first of the week from Berne, Wash., for a visit with friends.

Mr. and Mrs. Wm. Watts and two sons were Lewiston visitors last Sunday afternoon.

Mr. and Mrs. Homer Parks and Harold Parks returned Sunday from a trip to Spokane where they attended the fair.

Mr. and Mrs. Stewart Compton and children of Orofino visited relatives here the first of the week.

Mr. and Mrs. A. R. Shumaker, Mr. and Mrs. G. G. Oldfield and son, Max, of Pullman, were guests at the Knepper home last Sunday.

Walter Sparber and Maning Onstott left for Montana the first of the week to look for employment in the harvest fields.

For Sale: 9x12 all wool Wilton rug; small all-over design in green; used very little. Sell at bargain price. Phone 234. 37-tf.

Water Pipe Shipment Here

The new water pipe, which will be used from the reservoir to Main street, replacing the three inch main now in use, was received here the first of the week and unloaded Wednesday. The pipe is six inches in diameter and when installed will furnish much more adequate fire protection. It is believed that the fire insurance rates will be lowered enough to pay for the pipe within the period of a few years, as the present rate is high because of the fact that the three inch pipe will not afford sufficient pressure for efficient use of the fire hose.

Nearly His Ancestor

They entered the paneled hall. The rich manufacturer pointed to its magnificent appointments. "See," he said, "I chose every piece myself." The visitor was duly impressed. Suddenly he caught sight of a magnificent picture, stated perceptibly, "Ah," remarked the other, pointing to the distinguished cavalier that stared haughtily down at them from his gilded frame, "that is one of my ancestors." He was very nearly one of mine," returned

the visitor. "I bid up to 500 pounds for him myself."—Ex.

Street Graveling Going Forward

Genesee News: Several streets of Genesee are being improved by the placing of gravel on them, which will add very materially to the appearance of the town and be of vast benefit to the streets.

Gravel has been placed on the west and north sides of the city park, the south side having been graveled some time ago. Gravel is also being placed upon the street running north past the News office, this being the second coat—and it will be a very useful one too. The latter named street was formerly a quagmire in wet weather and this improvement will be very much appreciated by everyone. The property holders along this street have assumed most of the cost of graveling.

Big Bear Ridge News

Miss Janice Meyers of Lewiston began teaching her second term of school at Rimrock Monday.

Faye, Bernard and Miss Opal Jones and Mrs. Wade Keene spent the week end with Miss Dorothy Jones in Spokane.

Mr. and Mrs. Heselgrave arrived here from Missoula, Montana to visit their daughter, Mrs. Bernhart Nelson.

Anton Moen returned to his home near Sandpoint last week having spent several weeks at the Hooker home.

Misses Alma and Martha Aas have entered the Deary high school.

Mrs. Lief Field and children of Colton are visiting her sister, Mrs. Gabriel Forest.

The entire community was deeply grieved Tuesday to hear of the death of Miss Dorothy Jones. Miss Dorothy was universally liked by everyone for her kind and pleasing manner, and will be greatly missed in our midst. The bereaved family have the heartfelt sympathy of a large host of friends who also mourn her departure.

Cameron News

Mr. and Mrs. A. F. Wegner were in Lewiston, Thursday on business.

George Ehlers, Mrs. Amos Spekker and Mrs. O. W. Henry were in Lewiston on business, Monday.

A number of Cameron folks attended the Mission Festival at Gifford, Sunday.

Mrs. Ida Stoneburner and Miss Emma Hartung called on Mrs. Fred Newman, Tuesday.

Mr. and Mrs. Gus Kruger and daughter, Rosalie, were guests of the O. W. Henry family Sunday evening.

Fred Mielke and family Mrs. F. W. Newman and daughter, Mrs. Ida Stoneburner and Miss Emma Hartung took dinner at the John Schwarz home Sunday.

The Chas. McCoy family and Fred Schoeffler family spent Sunday with Mr. and Mrs. Wm. McCoy.

Mrs. F. W. Newman called on Mrs. Wm. McCoy, Friday.

Mrs. Walter McCall and children visited with her mother, Mrs. Carl Hartung, Sunday.

Mr. and Mrs. Wm. Johnson of Peck visited at the home of Herman Wilkens, Sunday.

Mr. and Mrs. Aug. Hartung moved to Kendrick, Saturday, where they will spend the winter. Herman Hartung will stay with them while attending school there.

This week closes the second week of school. The enrollment this year being 31. Nine girls and 22 boys.

G. F. Criddlebaugh spent Saturday and Sunday at his home in Lewiston.

Methodist Church

Service will be held at the Kendrick Methodist church both morning and evening at the regular hour next Sunday. Sunday school in the morning as usual. L. E. Taber Pastor.

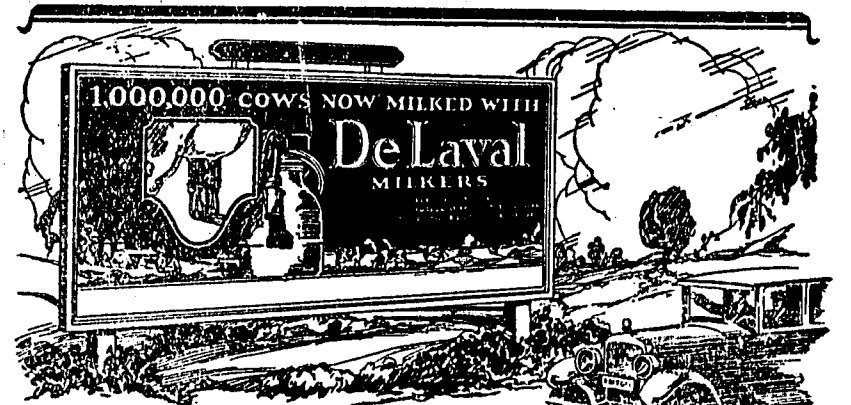

The pretty girl was waiting for a car when the masher came along. He smiled and removed his hat and said: "It is a cold day, isn't it?" The girl smiled and nodded. Encouraged, he continued. "My name is Speck-noodle." "Oh, I am so sorry!" she said sympathetically, and he drifted away in the crowd. Ex.

Wanted to Know

Miss Gibson was very rich and Hanna was very poor. She liked him, but that was all. He was aware of the fact. One evening he grew somewhat tender, at last he said: "You are very rich, aren't you Helen?" "Yes, Tom," replied the girl frankly, "I am worth about two million dollars." "Will you marry me, Helen?" "Oh, no, Tom, I couldn't." "I knew you wouldn't." "Then why did you ask me?" "Oh, I just wanted to see how a man feels when he loses two million."—Ex.

The "Rah-Rahs"

There are more than 200,000 useless words in the English language, which probably accounts for a lot of the college yells.—Philadelphia Inquirer.

The Answer to the Milking Problem

THE De Laval Milker is called the answer to the milking problem by thousands of dairymen everywhere. Under greatly varying conditions the De Laval Milker has proved beyond doubt that it is indeed the ideal solution to the problem of milking cows in the best manner, in the least time, with less help and in a strictly sanitary fashion.

If the saving of time and labor is your problem, the De Laval Milker will in many cases cut milking time in half and reduce the help required from one-half to one-third.

If you demand the best milking the De Laval milks in a manner which no human hands can compete with. Its day-after-day regularity, its uniform action and the total absence of the human elements of temper, fatigue and impatience assure your cows of the best opportunity to produce to their utmost.

The problem of the production of cleaner milk is solved by the exclusive sanitary features of the De Laval which make possible the consistent production of low bacteria count milk. And it's easy to wash and keep clean.

These are but a few of the angles of the milking problem that the De Laval Milker solves so thoroughly. May we go over your problem with you?

Successful Only in West
The English walnut originated in southwestern Asia and has been under important cultivation in the United States since 1830. It is successful only in the far western states, mainly in California, Oregon and southwestern Washington. The principal center is around Los Angeles in southern California. Planting is constantly being increased in central California, northwestern Oregon and contiguous territory north of Portland. It should be grown under 2,000 feet of altitude. The climate requirements are moderate but uniform temperatures, considerable moisture, and freedom from radical drops in temperature.

Youthful Diagnostician
Helen Jeanne, the two-year-old daughter of a physician, deemed herself an efficient authority on medicine. One afternoon she sat in her rocking chair, crooning to her curly, blond-headed baby doll. Finally a disgusted look clouded her face. She exclaimed, "My baby doesn't give me any patience 'a tall," and rocked more furiously than ever. After a minute or two, Helen Jeanne placed her soft, baby hand on her doll's forehead and, after a moment of reflection, shouted: "Muvver! Baby has ossful temp'ture."

Yum, Yum!
Angry Customer (tossing a package on the counter)—Makes washing a pleasure, does it? Does the washing while you wait, does it? It's the little flakes of soap that—
Grocer—Madam, one moment please. This is not soap.
Angry Customer—Not soap? Not soap?
"No. Your daughter asked for a half-pound of grated cheese and a half-pound of soap flakes. This is the cheese."
"My stars! And last night I made a pudding."—Progressive Grocer.

Sounded the Same
"I've broken my favorite jazz record right in two," said the flapper mournfully. "Guess I can fix it, though." Then she carefully glued the two parts together, putting the glue on the back side, the side that she didn't care for. Then she played it—and found she had glued a back side and a front side together. "What shall I do?" she exclaimed.
"Never mind," said the cynical parent, "it sounds just about the same as if you had glued it right."—Springfield Union.

SKIM MILK FOR HENS IS FAVORED

Skim milk is great pig feed, but the man who feeds the milk to his hens and takes his profit in the form of increased egg yields is the one who makes the most money from his milk, according to Iowa State college poultrymen.
Seven years of continuous experimentation at the college has proved that milk, when fed to poultry, will return from three to six times as much profit as when fed to pigs. It has also been found that, when eggs are selling for not less than 30 cents a dozen, skim milk is worth around \$2 a hundredweight as feed for good pullets. There is practically no difference between the value of skim milk and buttermilk for poultry, repeated tests have revealed.

When hens fed tankage or meat meals as their main source of protein were compared with those that also had milk, it was found that the milk-fed birds outlayed the tankage-fed birds by 25 to 40 per cent during cold weather. Milk should always be fed sour because birds will consume more of it in this condition, it has a slightly laxative effect and the lactic acid combats many disease germs.

From October 1 to May 1 it is profitable to give the hens nothing but milk to drink and from May 1 to October 1 they may be allowed to choose between milk and water. When birds are given all of the milk they will drink, the amount of tankage or other packing house by-products may be reduced one-half, for milk furnishes one-half the protein necessary for laying hens. The Iowa poultry specialists advise the keeping of only as many birds as can be supplied with milk.

Laying Hens Need Moist Mash in Warm Weather

Summer feeding of farm poultry can be carried on economically and to good advantage, says Cora Cooke, extension poultry specialist at the university of Minnesota. The amount of feed required on the average farm is less than in winter, a higher production can be counted upon, and prices of eggs are usually ascending after the low period caused by the spring surplus. The specialist points out that the cost of the ration can be reduced by cutting down the meat scrap one-half and omitting it altogether if plenty of milk is available, and also by reducing the amount of corn and, in the case of dual purpose flocks, omitting it entirely. "The principal thing to look out for is that plenty of mash is used," he says. "As warm weather comes on a moist mash once a day will do wonders in keeping up egg production. Hens that molt early should be disposed of before poultry prices drop in the early fall." Reports of storage conditions presage a favorable season, says Miss Cooke. A recent report said that 13 per cent fewer eggs and 39 per cent less dressed poultry are in storage than a year ago.

Marking Broody Hens to Cull From Laying Flock

There is a wide variation in the amount of broodiness in hens in the same flock. Some lay a comparatively few eggs between spells of broodiness. Others go broody rarely if at all. An excellent practice is to mark through some method or other the number of times the hens become broody during the season.

A simple and yet effective method is to use celluloid rings to slip on their legs. A bunch of rings of one color can be used, thus leaving other colors for other marks if desired. Each time a hen is placed in the broody coop or set, if the chicks are hatched and raised with hens, a ring can be placed on her leg. Any hen that accumulates more than two before midsummer could be culled from the flock. Frequently a hen will go broody every two or three weeks, even when she is placed in the broody coop at the first sign of broodiness. Such should be sold or eaten at the third attack.

Proteins in Whey

Whey contains milk sugar, fat, minerals, and proteins of very high quality. It is therefore an excellent feed for poultry. However, it contains only about 6.6 per cent of dry matter, therefore it is difficult for a hen, with her limited capacity, to consume enough to supply her wants. Keep the usual feeds before the hen, so that she will be sure to get enough to eat. Since the whey contains so much water, it would be well to take away other sources of water.

Poultry Prospects

Says the Massachusetts Agricultural college: "The outlook for egg, broiler and poultry prices is slightly better than in 1927. Feed costs on the other hand are expected to continue high, at least during the first half of the year." We've covered nine sheets of paper trying to figure out whether that's intended as encouraging or discouraging, says the Farm Life. Our own opinion is that poultry looks better this year than last, and we're going right ahead for a better flock.

AUCTION SALE

I will sell at public auction on the Columbus Clark farm, 3 miles west of Juliaetta and 14 miles east of Genesee, the following articles to-wit. Sale will start at 10 o'clock A. M. on

Manure Spreader Useful Implement on Any Farm

The farmer who tries to run a farm economically without the use of a manure spreader is making a mistake. This is one implement that every farmer ought to possess, even though his farm may be only a small one.

Manure that is allowed to pile up under the eaves of the barn, with the most valuable fertilizing elements leaching away, is worth only a fraction of that that is hauled out promptly and distributed evenly over the land. If any leaching is done, let it be done in the field.
With spreading of manure by the use of forks it is impossible to get uniform distribution. The manure spreader tears up the manure and spreads it in an even, uniform strip down the field. The maximum value of the manure is thus derived.
The labor-saving feature of the manure spreader is another tremendous advantage. With it the actual labor of handling the manure is reduced by at least 50 per cent and besides, time is saved.

In Mexico

Husbands in Mexico do not carry latch keys.
When they have been out late to the lodge they ring an electric bell or pound on a heavy wooden gate.
This wakes up the wife or servants and all the neighbors, but no one kicks very hard, for it is an ancient custom. Mexican wives do not wait up for their husbands to come home, armed with rolling pins.
The husband can't sneak upstairs

with his shoes in his hand. He makes enough noise when he arrives to wake up people for many blocks and then wife gets up and attends to his case. —Brooklyn Standard-Union.

Electricity in Coat

Bobby, age five, had been left in the care of his aunt while his mother was doing some shopping.

"Why," said Bobbie, "does mother want a coat with electricity in it?"
"A coat with electricity in it," said the aunt, "surely you must be mistaken."

"No, I am not," said Bobbie. "She said that she was going to buy a coat and have it charged."

How Many Cabbage Plants Are Required Per Acre?

The question is often asked how many cabbage plants are required to set an acre where they are placed three feet each way.

It is very simple to figure this for any planting distance. The distance between the rows is multiplied by the distance between the plants. In the case of cabbage where it is set 3 by 3 feet, we would multiply 3, the number of feet between the rows by 3, the number of feet between the plants in the row, giving us 9 square feet.

The figure is divided into 43,560 square feet (the number of square feet in an acre). Cabbage set 3 feet by 3 would give us 4,800 plants per acre, assuming that the acre is full to the margin. The square acre contains little less than 200 feet on all sides.

'WE AMERICANS'

See large announcement on Page Two for explanation of this.

Poultry Facts

Ask your county agent about the confinement method of growing chicks.

Feeding and housing of hens are the most important factors affecting the hatchability of eggs.

As a whole grain in the scratch feed, wheat is a very useful feed. It can be ground and used in the mash with good results.

From a standpoint of feeding value and selling price, the advantage enjoyed by the well equipped hay grower is of utmost importance.

Some of the miniature tomatoes will prove popular with the children as well as being fine for preserves. Red plum, red cherry, red currant and their yellow varieties are, all good.

Saving Birds' Eyes

In Spain the authorities had to take steps to stop the practice of putting out the eyes of birds. The verduron, a kind of finch, is so timid it will not sing in the presence of strangers. When blinded it is not so temperamental.

Notice is hereby given by the un-
dersigned, executor of the estate of
Susanna Giese, deceased, to the
creditors of, and all persons having
claims against the said deceased, to
exhibit them with the necessary
vouchers within six months after
August 24, 1928, the first publication
of this notice, to the said executor at
Bank of Juliaetta, Juliaetta, Idaho,
the same being the place for the
transaction of the business of said
estate, in Latah County, State of
Idaho.

Herman E. Giese, Executor.
Dated at Juliaetta, Idaho, August
18, 1928. 34-5

NOTICE TO CREDITORS

Estate of Mrs. H. M. Smith, De-
ceased.
Notice is hereby given by the un-
dersigned, executrix of the estate of
Mrs. H. M. Smith, deceased, to the
creditors of, and all persons having
claims against the said deceased, to
exhibit them with the necessary
vouchers within six months after
August 24, 1928, the first publication
of this notice, to the said executrix at
her residence in Juliaetta, Idaho,
the same being the place for the
transaction of the business of said
estate, in Latah County, State of
Idaho.

Nora Stuart, Executrix.
Dated at Juliaetta, Idaho, August
20, 1928. 34-5

SUMMONS

In the District Court, Second Ju-
dicial District of the State of
Idaho, in and for the
County of Latah.

Florence N. Olson, Plaintiff
vs.
Henry Olson, Defendant.
The State of Idaho Sends
Greetings To Henry Olson, the
above named defendant.

You are hereby notified that a
complaint has been filed against
you in the District Court of the
Second Judicial District of the
State of Idaho, in and for the
County of Latah, by the above
named plaintiff, of the nature in
general terms as follows:

To obtain a decree of divorce
from defendant on the ground
of desertion.

And you are hereby directed
to appear and plead to the said
complaint within 20 days of the
service of this summons. And
you are further notified that un-
less you so appear and plead to
said complaint within the time
herein specified, the plaintiff will
take judgment against you as
prayed in said complaint.

Witness my hand and the seal
of the District Court of the Sec-
ond Judicial District of the State
of Idaho, in and for Latah Coun-
ty, this 27th day of August, A.
D., 1928.

Harry A. Thatcher, Clerk.
By Adrian Nelson, Deputy.
(Seal)
Frank L. Moore, Residence Mos-
cow, Idaho, Attorney for Plain-
tiff. 36-6

Desire Never Fulfilled

Our desires always disappoint us;
for though we meet with something
that gives us satisfaction, yet it never
thoroughly answers our expectation.—
Rochefoucauld.

Notice is hereby given that Harold McManus, will at the next regular meeting of the Board of Pardons of the State of Idaho, make application for a pardon from that certain judgment of conviction of Burglary, made and entered in Latah County, Idaho, on or about May 31, 1921. (Signed) Harold McManus. 34-4p

Wedding announcements and invitations printed at the Gazette office. 26-1

Call It "Peeps"

Peeps' diary, an account written in shorthand, or "tachygraphy," of the events in the years 1000 to 1009, remained in manuscript until it was deciphered between the years 1819 and 1822, and a part of it was published by Lord Braybrooke in 1825. The Encyclopedia Britannica says the name was pronounced in the Seventeenth century—and has always been pronounced by the family—"Peeps."

Elementary Rule

The rule of thumb has reference to the method of procedure derived entirely from practice or experience without any basis in scientific knowledge.

If you want to buy or sell anything try a local ad in the Gazette, that will do it.

A Word to Our Patrons and Friends!

We take this means of advising our patrons and the buying public that, owing to the many changes in credit terms extended by the manufacturers and jobbers, we are forced to shorten the term of credit extended our friends. We have adopted a 30-day credit policy and in the future all credits will be limited to this term

This change, as you will agree is for the betterment of all as we will be in position to serve you better and at prices that will save you money. Assuring you of the appreciation of your patronage, we are,
Very truly,
E. H. Dammarell.
