Another Menace For The Autoist

"Puncture Vine" Found in The Southern Part of State.

Boise—The Idaho motorist is faced with one of the most serious menaces to transportation that the state has ever known. The "puncture vine" has been found in the state and a great many agencies are concentrating their efforts in attempt to stop its spread.

Miss Jessie Ayers, state seed analyst in the Noble Building, Boise, has prepared a statement on this pernicious weed for the state chamber of commerce giving its description habits and other information. She says: "This weed is a native of the Mediterranean countries. It is a prostrate annual forming mat-like masses of stems from several inches to 12 feet in length. These branches bear tiny yellow flowers each needlelike prongs about one quarter of an inch in length. Their effect on automobile tires is disastrous; even worse than tacks. Tacks or nails can be found but the prong of the puncture vine seed breaks off and gradually works into the rubber. One prong has been known to puncture the same tire time and time again.

"It has already been found in Idaho at King Hill, Boise, Horse-shoe Bend and Montour. It has also been reported in other sections of the state. Eradication consists of digging the plants and burning them. Great care should be exercised not to drop seeds for they are readily carried on the coats of sheep and cattle.

"California has been bothered with this pest and one county is spending \$250,000 for its eradication. Do not permit this weed to start in Idaho. If in doubt about the identification send a specimen to the state laboratory in the Noble Building."

FORMER KENDRICK MAN IN AUTO SMASHUP

J. H. Bolon is Victim of Hit And Run Driver.

J. H. Bolon, father of Ira Bolon of this place, and formerly a resident of Kendrick, was seriously injured Wednesday evening about 7:30, west of Clarkston, when the wagon in which he was moving his household good from Peck to Sunnyside, was hit by an automobile running at a rate of from 50 to 60 miles per hour, according to a statement made by Archie Bolon who was with his father at the time the accident occurred.

According to Archie Bolon the car hit the wagon, completely demolishing it and strewn furniture all over the road, throwing his father to the ground and the car passing over Mr. Bolon's chest, inflicting internal injuries besides breaking several ribs. The two men in the auto did not hesitate after hitting the wagon but kept on going.

At the time the Gazette went to press, Mr. Bolon was at the home of his son, Fred, in Lewiston, in a very critical condition.

Every effort is being made by NezPerce and Asotin county officials to locate the driver of the car.

Baby Clinic at Moscow

A baby clinic will be held at Moscow next Tuesday and Wednesday, at Presbyterian Church Annex, under the auspices of the Parent-Teachers Association of Moscow, at which time Drs. McCornack and Barnett, specialists of Spokane will examine children up to six years of age, free of charge. Mrs. Elmer Bechtol, formerly of Kendrick, but now living in Moscow, has charge of appointments. Mrs. Bechtol states that all mothers within the county are welcome to bring their children. Several from here have already made appointments and others wishing to do so should write or phone Mrs. Bechtol at once to insure getting an appointment.

YANKEES WIN 1928 SERIES

The New York Yankees won the 1928 World series by defeating the St. Louis Cardinals 4 straight games as follows: 1st game, 4-2; 2nd, 7-3; 3rd, 9-3; 4th, 7-3. Babe Ruth made three home runs in the final game played Tuesday.

Established River Shore Rights

Drift Wood Catchers Become Owners And Are Protected.

Last week Judge Miles S. Johnson, sitting as a court of equity, was engaged in the trial of George Denham versus John Soumar for injunction and damages.

The action attracted a number of persons to the court room from the Myrtle region, where the parties to the suit reside, as well as from other points along the river. The case was important in that it involved the rights of people along the Clearwater river to capture drift wood.

George Denham alleged that in December, 1927, he captured, marked and tied a large pile of drift wood which had lodged near the bridge at Myrtle; that later the defendant asserted ownership of the drift, took some of it, and caused the balance to escape, and that Soumar had threatened to prevent plaintiff from catching other drift at that point. The place where the drift was caught, it developed, was adjacent to the right-of-way of the Northern Pacific railroad. Soumar asserted ownership of the drift by reason of the fact he had used this particular territory as a booming ground for several years.

Judge Johnson in his decision held that it was a custom from time immemorial that he who caught drift was the owner of it and that the public generally had the right to catch drift at any point in the river bed below high water mark, and that the defendant could not acquire any rights, in the river bed to the exclusion of the public. He further held that the plaintiff, Denham, was the owner of the drift, and awarded him damages in the sum of \$25 and an injunction.—Tribune.

Buys Option on Troy Clay

Owners of the big clay deposit near Troy recently gave an option to a large eastern concern for the purchase of the clay deposit on a basis of \$250,000, the option to expire November 1st, 1928. The Troy clay deposit is said to be the finest white clay this side of England and is used extensively in the manufacture of high grade porcelain, pottery, and as a filler for paper, paint, linoleum, etc. The deposit is said to be large enough to justify extensive development.

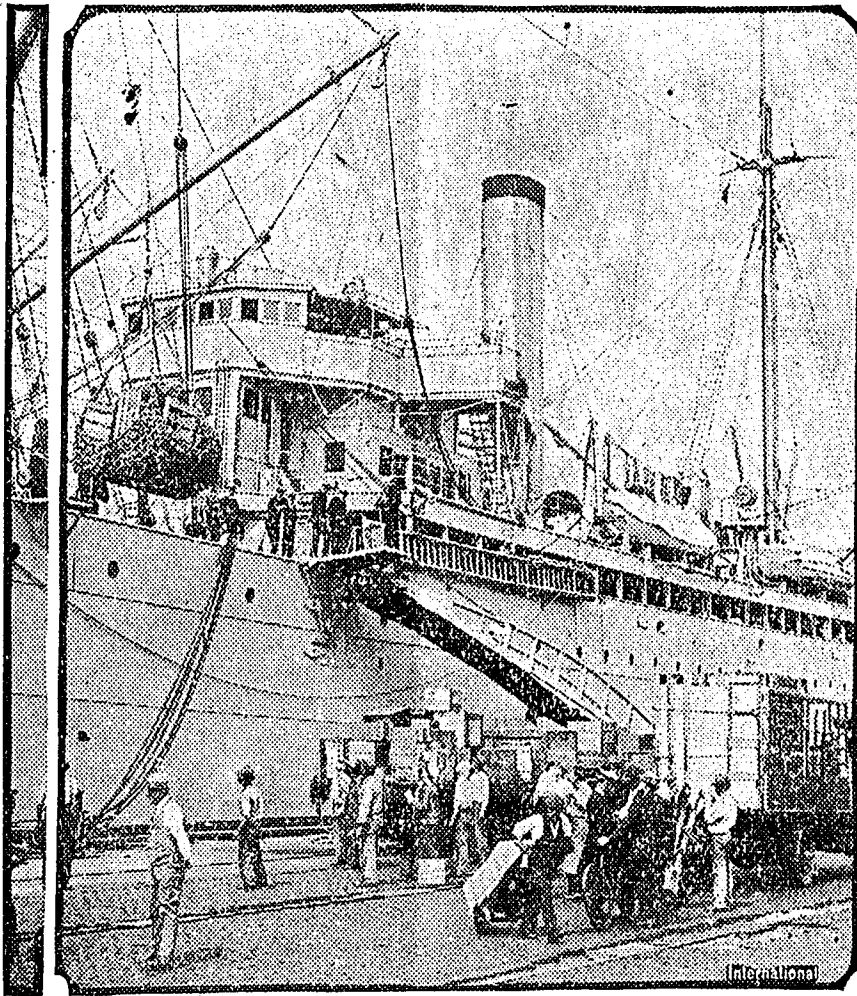

Entertain Okoke Club

Mr. and Mrs. A. K. Carlson very pleasantly entertained the Okoke Club at a two-course bridge supper Saturday last, at seven o'clock. The sixteen guests were seated at four daintily appointed card tables. After supper, bridge and conversation were enjoyed for several hours. Mr. and Mrs. Carroll carried high honors for the evening and were presented with an attractive little clock, as a prize.

Mrs. R. H. Ramey was a passenger to Lewiston Monday, where she visited at the Westcott and Thomas homes, returning to Kendrick Wednesday afternoon.

Mrs. Jennie Plummer returned from Spokane Saturday evening, after visiting a short time with her daughter. Mrs. Grace Plummer, who is working in Spokane, accompanied her home.

Rushing Relief for Porto Rico

Supplies for the relief of the hurricane sufferers of Porto Rico being loaded on the steamship Bridge at New York.

Big Free Show Monday Night

Kendrick Commercial Club Will Sponsor Entertainment.

The wonderful All-Idaho moving picture which has been making such a hit in southern Idaho, up to September 30, has been shown 46 times to audiences aggregating 13,600 people, will be shown in Kendrick, next Monday night, October 15, at the New Kendrick theatre, according to announcement received this week from Ralph E. Thomas, secretary of the Idaho State Chamber of Commerce.

This picture is a beautiful travelogue of the entire State and shows one of the greatest forest fires which has ever occurred in the West, the scenic Saw Toth mountains; the Salmon River, which has been called "The River of No Return;" Idaho's great dams, reservoirs, irrigation works and power plants; lakes, rivers and trout streams; big game; logging, lumbering and mining operations; and hundreds of other beautiful and interesting views of the state.

This film is being brought here by the Kendrick Commercial Club and is one of the finest pictures of its kind which has ever come to Kendrick—everyone should avail themselves of this opportunity to see this great All-Idaho picture.

Night Shift Laid Off

The night shift of the Potlatch Lumber company mill was taken off with the Saturday night cut. The day shift will run thru out the winter it is planned, because of the lumber shortage in the yards. A snow plow to be used in the yards has been ordered and foremen should now be able to keep the tracks open. The lumber business continues good.

Dennler Buys Farm

One of the largest land sales consummated in this section for several years was closed last week when William Hunter, San Jose, Calif., but formerly of Moscow, sold to George Dennler of Fix Ridge, about three miles northwest of Juliaetta, 240 acres of the choicest farm land in this vicinity, for a cash consideration of \$26,400—or \$110 per acre.

The land lies near the other land holdings of Mr. Dennler and the new purchase will give him one of the largest and best farms of this district. Every foot of the new purchase is tillable and is in a high state of cultivation.

Kendrick Ties With Culdesac

Local Boys Show Up Fine in First Game

Kendrick High School had its first experience in football last Friday afternoon when the local team played the Culdesac eleven.

A splendid showing was made by our team in their first encounter with the "pigskin." Culdesac, however was able to make the first touchdown just before the end of the first half. They failed to make the goal kick and the half ended 6-0 in favor of the visiting team.

Kendrick High School sent its team back from the half with such renewed vigor that the score was tied in the third quarter. Neither side was able to score again during the remainder of the game.

Harley Eichner's line-plunging and the tackling of both Eichner and Charles Davis, were the outstanding features of the game.

With this promising start the school should have no difficulty getting enthusiastic crowds out to the remainder of the games to be played on the home field.

Plant More Fish

Alan Clark, of the Coeur d'Alene hatchery, arrived here Tuesday with 20 cans of Eastern Brook trout for Elk river. The fish were of a large size. Mr. Clark stated that they would begin to ship eggs taken from the spawn here Monday to the Coeur d'Alene hatchery. Joseph Clark, superintendent of the hatchery, is on the ground at the trap to take the eggs.—Elk River News.

Ducks Suffer Unknown Disease

R. E. Thomas state game warden, reports that the disease among the ducks on the American Falls reservoir is waning and that comparatively few sick ones are now seen thereabouts. This statement was made by M. Thomas after a recent survey of conditions in the reservoir district. The inspection was made after the state game department had received word that approximately ten per cent of the ducks at the reservoir seemed to be suffering from some strange malady. Specimens of diseased ducks were sent to a bacteriologist at the University of California for examination, but no report therefrom had been received at the time. Mr. Thomas gave out his statement.

DIES FROM INFANTILE PARALYSIS

Edison Dunlap, age 11, son of Mr. and Mrs. C. W. Dunlap of Lewiston, died Tuesday morning at the family home, from infantile paralysis, according to Wednesday's Lewiston Tribune. Mr. Dunlap, father of the boy is an engineer on the Northern Pacific.

Demonstrate New Teaching Methods

State Superintendent Held Meet- ing Here Last Friday.

Demonstration to teachers in rural schools methods of teaching grade pupils the new system of reading work recently adopted by the state, Anne Hospers, rural supervisor, was in charge of an all-day session Friday at the Kendrick schools.

The meeting was held with 12 teachers present. In addition to the classes held by Miss Hospers, several teachers gave demonstrations on how to teach different subjects and readings. Miss Ellen Peterson, county superintendent, addressed the group on a theme showing how the subjects taught in school influenced the conduct of the child.

Open by Exercises

The morning session was opened by exercise, flag salute, a bible reading by Mary Weaver and a story by Grace Dillee. Mrs. Winifred Knepper taught a demonstration class in the school on second grade reading. Other classes were held on spelling and language by Miss Hospers. Following these, several other classes were taught to demonstrate methods on current events, arithmetic, reading and penmanship.

Science Class Serves

During the noon hour, the domestic science class in the Kendrick high school served a lunch to the group, after which discussions were held on the morning's work under the direction of Miss Hospers. The meeting Friday is one of a series given throughout the county by the rural supervisor. Next week similar affairs will be held at Troy Tuesday and Onaway Thursday.

Teachers in attendance were Marion Dixon, Lillian Sonville, Mrs. Norma Taylor, Mary Weaver, Nannie Weaver, Grace Dillee, Winifred Knepper, Ida Morcy, Earlen Stump, Geneva Beverly, Josephine Papkey, Maude Compton.

Install "Hot Pond"

The big mill at Lewiston is constructing a "hot pond" covering seven or eight acres where the water will be heated by steam pipes during the cold weather and the sawlogs kept thawed so they can be readily sawed into lumber. The pond will be separated from the forebay and will be capable of holding several million feet of logs by piling them several deep, in the water.

Free Supper and Program

The Leland church officials will again sponsor a Community Supper and Program, Friday evening, October 19 at the Oddfellow hall.

The prospects are encouraging for a very successful church year, under the able leadership of Rev. J. E. Walbeck, pastor-elect, recently from Myrtle Creek Oregon. Church and Sunday school attendance are both showing a gratifying increase, and warm interest in all departments is being manifested.

During the evening plans and suggestions for the ensuing year's work will be considered. The entire Leland community is cordially invited to take part in this social gathering; the ladies are in charge of the supper, and arrangements are now under way to take care of a large crowd.

Big Opal Found On South Fork

Rare Gem Claimed to Be World's Largest Find.

Following his return from a trip into the wilds of Idaho county, along the south fork of the Clearwater river, Patrick Gibbons, geologist, of Lewiston, gave out the following signed statement telling of the finding of black opals in that region, which has long been noted for its mineral possibilities:

"The black opal that I found in Idaho county is composed of silica with water. The black opal is of a compound that had carbon disseminated through the silica, when the water was of a very high temperature, carrying the water in solution to be deposited in a matrix when the earth was cooling off, and when the crust of the earth was becoming indurated.

"The state of Idaho has always been known as the Gem state. With black opals as a heritage to her other gems, the state can now claim more prominence. Black opals have been found in Australia, also some in the state of Nevada. The black opal that has just been found weighs 6 pounds 4 ounces, making it the largest specimen known to date. The gravity is 2.00. Some of the lighter gems are found in a great many lands Austria furnishing many of these but none of the black variety. The average gravity of opals is from 1.90 to 2.00 and some go as high as 2.30. They are the lightest of all gems.

"Black opals are rare. Historically relative to opals made no reference to the black opals until they began to be commercialized in Australia."

HICKMAN WILL HANG FRIDAY, OCTOBER 19

Appeal Denied by United States Supreme Court Monday.

According to an announcement from San Francisco, the fight to save William Edward Hickman from the gallows for the murder of little Marian Parker of Los Angeles shifted to the east. The California state supreme court denied an application for a writ of error to carry his case to the United States supreme court. Richard Cantillon attorney who represented Hickman in the proceedings before the California tribunal, forwarded documents in the case to Jerome Walsh, of Kansas City, who will make an effort to have the United States supreme court review the case.

According to an announcement made Monday, the United States Supreme court denied his appeal. The supreme court refused to review its five to four decision of the last term, holding that evidence obtained in wire tapping could be used in criminal prosecution.

Hickman is in the death house at San Quentin state prison awaiting execution on October 19.

Bunger-Hayward

Miss Minnie May Bunger and Delbert Hayward went to Clarkston last Saturday, where they were married by Rev. George Calvert of the U. B. church. They were accompanied by his mother and Miss Nadine McCoy.

Mrs. Hayward is the daughter of Mrs. Minnie Bunger of Southwick and is a charming young lady. Delbert is the eldest son of Mr. and Mrs. H. D. Hayward, and is a young man of sterling qualities, he is also a graduate of the Southwick high school of the class of 1927.

They both have a large circle of friends who wish them all the joys of life.

They were charivariated at the home of his parents, Sunday evening by a large crowd.

Mrs. Louise Fry of Janden was a passenger to Colfax Wednesday afternoon on business.

JUST IDAHO

By Guy Flenner

High Tribute to Idaho Climate

This is the story as the writer got it from an Idaho man who had chased the will-o'-the-wisp of climate in the interest of his health. He had been to many places and had consulted numerous specialists. There had been no marked improvement in his condition however.

The last physician he consulted outside the state told him that he was running away from the finest climate on earth—that in his own state of Idaho.

"While it is true," he was told, "that most any change of climate will give a measure of relief temporarily, it is the exception rather than the rule to find permanent relief, to say nothing of a cure, by merely changing location. This is especially true when you seek a finer climate than you have in Idaho, with which I am familiar only through reports, never having lived in your state. Southern California during your winter months would be a pleasant change, but do not expect it to effect a cure.

Making reasonable exceptions, and admitting temporary benefits from a change of altitude at certain times of the year, the fact remains that the vast majority of cases seeking cures by climate change would do better to go to Idaho rather than leave it.

"You can find altitudes in your state from a few hundred feet above sea level as at Lewiston, to thousands of feet in the mountains and intermediate altitudes of almost any degree in your many valleys. Moreover, you are free from fogs and sudden changes, you have rather stable seasonable weather, and you have wonderful sunshine the greater part of the year, where even down here (lower California) there are drastic climatic changes, inimical to health seekers.

"The low percentage of death rate in Idaho is due to your climate. No doubt you would do very well here, and could receive splendid medical counsel and treatment, but not much better than in your own state, where there reside physicians and surgeons of a high type, but if you do not want to be away from your business and your associates my advice is that you can get along just as well in your own state. We appreciate all business coming to us, but I feel I would be untrue to professional ethics if I did not lay the situation before you just as I have."

In these days, when crashing of the gates of gold is expected in all professional as well as commercial lines, what finer tribute could be paid to the climate of this state?

ATTACK ON GAS TAX

The gasoline tax of California is being attacked in the federal courts on the ground that it is a violation of the federal highway act which prohibits tolls on highways receiving federal aid. The contention is that the tax is a toll.

A question of vital concern to all western states, at least is presented in this litigation. If the contention of the protestants should be confirmed in final judicial decree every state would be deprived of the benefits of this tax for the construction and maintenance of federal aid highways, and without which aid extensive highway construction would be greatly delayed if not impossible, in such states as Idaho. It could only be accomplished by some substitute tax that would rest heavily upon motorists, which means practically the entire population.

It is hoped the courts will take the view that while the gas tax bears the semblance of a toll, it is permissible under the national highway act in the interest of road construction and maintenance where such equitable means of financing the work can be found.

ADVERTISING CUTS COSTS

Many people may not believe

it, but the facts are unescapable that advertising has reduced the cost to the purchaser of the advertised articles. It has produced volume. That is the answer.

Perhaps more emphatic than in any other line is the result with autos. In 1914 this country produced around 550,000 automobiles. The production has been increased to around five million a year. The amount of money expended annually in advertising to sell these cars increased from two to twelve million dollars, yet the advertising cost per car has been reduced from \$4.29 to \$2.90. The average wholesale price of the modern car has been reduced almost a hundred dollars compared to that of 1914 and the quality and value have enormously increased.

In the large centers or in the smaller communities intelligent and continuous advertising always has been the prime factor in selling and in producing profits for the advertiser while at the same time lowering costs to the consumer.

Cameron News

Mr. and Mrs. George Ehlers and Mr. and Mrs. Amos Spekker were in Lewiston, Friday.

William Mielke attended the fair at Orofino, Saturday.

Marie Schwarz spent Friday night with Mrs. F. W. Neuman.

Mrs. F. Reiche was a caller at the home of Mrs. Carl Koepf, Wednesday.

Mrs. John Schwarz spent Friday afternoon with her sisters, Mrs. Ida Stoneburner and Miss Emma Hartung.

Mr. and Mrs. Otto Silflow were in Lewiston last Thursday.

Mr. and Mrs. Brammer, Mrs. Emma Brunstiek and Clay Albright were callers at the A. H. Blum home Sunday.

Herman Silflow and mother, Mrs. Fred Silflow, Sr. accompanied by August Brammer were in Lewiston, Monday.

Rev. Shorman of Coeur d'Alene preached here Sunday for the Mission Festival.

Mr. and Mrs. Harry Thompson of Lewiston visited with the Wm. McCoy family, Sunday.

Fred Silflow and family took dinner with Wm. McCoy's Sunday.

Herman Wegner and Mr. and Mrs. James Mellison of Lewiston attended the Mission Festival here Sunday.

Mrs. Fred Mielke and granddaughter, Helen Newman, spent Saturday afternoon with Mrs. Stoneburner and Miss Emma Hartung.

Rev. Ehlen and Rev. Schorman took dinner with A. O. Wegner and family, Saturday evening.

The new Buick
is the new Style

Nowhere such beauty and luxury ---- nowhere such pleasing lines and contours ---- nowhere Bodies that equal these new Masterpiece Bodies by Fisher--The entire country is saying, "That's the Style"

Setting an entirely new, a revolutionary, style--introducing what will unquestionably be the trend of smart body-design during the next several years--the new Bodies of the Silver Anniversary Buick are enjoying universal acclaim as the most original and distinctive, as well as the finest and most beautiful ever created by the world-famous Fisher organization!

Here is not only a new car but a new vogue--a vogue of symmetry, born of graceful con-

tours instead of straight lines--a vogue of distinction, derived from sparkling colors, brilliant chrome-plating and arresting new roof, radiator and fender design--a vogue of tasteful luxury, composed of finest mohair velvet upholstery, artistic hardware and fittings and new appointments of comfort and convenience.

The entire country is hailing the Silver Anniversary Buick. The entire country is saying, "That's the style!"

The Silver Anniversary
BUICK

WHEN BETTER AUTOMOBILES ARE BUILT . . . BUICK WILL BUILD THEM.

RUDDACH MOTOR CO. Moscow, Idaho

**SURVIVOR TELLS OF
SUBMARINE ESCAPES**

**Milwaukee Man was in Four
Disasters.**

Milwaukee.—After having been in four submarine disasters in five years with the navy, C. H. Redding, twenty-eight, Milwaukee, is still very much alive. Throughout his navy service Redding was assigned to submarine duty as an electrician.

Redding was on the S-38 when it went down with an open hatch off Bridgeport, Conn., with 43 men on board, all of whom were rescued after fighting water and gas fumes for 12 hours. The thing that stands out in Redding's mind is the droll attempt of a machinist's mate to sweep back the ocean with a broom.

"The sub went down for a deep dive, but the hatch had been left open," he said. "Water poured in. This machinist mate was sweeping up water with a broom and was unaware of what had happened, as we all were for several minutes. He kept sweeping and sweeping but the water got too much for him. Finally he went into the control room and told the officers

he needed a mop. We soon learned what had happened then."

When the R-6 sank in San Pedro (Calif.) harbor in 1922 after some one inadvertently had opened a torpedo door, Redding was just coming on board for the night.

As he stepped on the sub it began to sink and he stepped off into the ocean and swam to a tender lying alongside. Six men who were asleep were drowned but the others were rescued.

Redding had his head and face burned when a battery blew up on the S-37 in 1923. This accident also happened in San Pedro harbor. Six men were killed by the blast.

He was also on the L-5 which dove with an open hatch off the coast of California during the winter maneuvers in 1920. The crew of 22 men were rescued.

Ancient Canal

From an inscription on the temple at Karnak, Egypt, it would appear that a canal joining the River Nile and the Red sea existed in the time of Seti I (1380 B. C.). The channel of this canal is still traceable in parts of the Wadi Tumilat and its direction was frequently followed by the engineers of the fresh-water canal.

**KENTUCKY'S RIFLES
ARE PUT ON SHOW**

Old Flintlocks Given to University Museum.

Philadelphia.—A gift of 35 "Kentucky" rifles of the Revolutionary period, one of the few collections of its kind in this country, has been received by the University of Pennsylvania museum through the generosity of J. Stoddell Stokes.

The importance of the gift, says Joseph Downs, curator of the decorative arts at the museum, arises from the unique part the "Kentucky" rifle played in the early days of conquering the wilderness and producing a livelihood for the pioneers and also in the winning of the Revolutionary war. The name dates back to a time not long after Daniel Boone had returned from his memorable adventures in the wilderness west of the Cumberland mountains.

Many of these old flintlocks bear the names of their makers inscribed on the barrels—names chiefly of German derivation. They were made in eastern Pennsylvania, most authorities agreeing that Lancaster probably was the center of the industry.

The stocks were made of curly maple, the most decorative obtainable, and this often was inlaid with silver wires and carved with scrolls. They were inevitably overlaid in parts with brass appliques cut in graceful designs with spread eagles or other conventional decoration. By pressing an ingeniously concealed spring in the stock, which releases a hinged cover, the patch box is revealed. This held the grease for the small pieces of linen or buckskin with which the ball was "patched" in loading.

**Old Canvas Believed
Work of the Druids**

London.—What is believed to be a valuable discovery of Druidical remains have been uncovered by workmen at Arnos Grove, Southgate, and an invitation has been sent the archeological society to investigate.

The remains consist of two large dark caves built of huge boulders, many of which weigh over three tons. In front there is what appears to be an altar with sacrificial stones, and on one side there is an immense pillar upon which representations of serpents can be traced.

The remains as they stand are almost completely hidden by mistletoe and ivy, and big mounds of earth which it is now thought may conceal other relics of the Druids age, stand near by. The caves stand within a short distance of the famous Mitchenden Oak—a tree which is mentioned in the Doomsday Book.

The discovery was made upon an estate which once belonged to Lord Iwerforth, but which is now being developed into plots for building purposes.

**Seagull Loses Its
Popularity in Utah**

Salt Lake City, Utah.—The seagull, once esteemed in Utah, is not so popular now.

Some thirty years ago when Mormonism was threatened with a crop devastation due to an invasion of crickets thousands of the graceful birds swept in from the Pacific ocean, devoured the insect pests and averted a possible famine.

To show their appreciation Utahans erected a monument in honor of their winged friends. A great gull, sculptured with spread wings, is perched at the top.

Now, the farmers complain, flocks of the birds make their home near Salt Lake and sally out into the fields to gorge themselves on cherries, other fruits and grain crops. They are so ravenous and bold they can scarcely be shaken out of a fruit tree.

There is growing demand that the law protecting gulls be repealed, and the bitterness of some farmers is such that they advocate tearing down the seagull monument.

**Cat Loses Kittens, Wins
Affections of Puppies**

New Orleans.—A unique rivalry for the affections of five offspring was discovered at the home of Mrs. C. J. Roquin. A black-and-white cat, Minette, lost her three kittens through death about the same time five colliers were born to Bessie, the family dog. Minette immediately set about the task of winning the affections of the young colliers and has succeeded, much to the chagrin of Bessie.

**Dog Halts Traffic as
He Guards Dead Pal**

Beaumont, Texas.—A setter dog which refused to leave a canine pal in death caused motorists to send in a hurry call to the sheriff's office here.

When a deputy reached the scene he found the faithful creature sitting beside the body of his stricken comrade in the center of the highway, defying motorists to run him down as they had his comrade. One automobile had been thrown into the ditch to avoid hitting the dog.

It was not until the dead dog had been moved to the side of the road that the other consented to leave and permit traffic to move normally.

**Original Rexall
One-Cent Sale**
**Thursday, Friday, Saturday,
October 18, 19 and 20**

WHAT IS A REXALL ONE-CENT SALE?

It is a sale where you buy an item at the regular price, then another item of the same kind for one cent. As an illustration: The standard price of Klenco Dental Creme is 50c, you buy one tube at this price and by paying 1 cent more, or 51c, you get two tubes, and save 49c. Every United Drug Co. article in this sale is a high quality guaranteed product, just the same as is sold every day at the regular price. No limit—buy all you want, but on Thursday, Friday and Saturday ONLY!

A PROFIT-SHARING METHOD OF ADVERTISING

This sale has been developed by the United Drug Co. as an advertising plan. Rather than spend large sums of money in other ways to convince you of the merit of these goods, they are spending it on this sale in permitting us to sell you two full size packages of high quality merchandise for the price of one, plus one cent. It costs money to get new customers, but the sacrifice in profit is justified, because we know the goods will please you.

RED CROSS PHARMACY

B. F. Nesbit, Prop.

Coconut Sugar

In the East Indies a sugar known as Jaggery is made from the sap of the coconut palm. The sap is obtained by cutting the flower spathe and the juice yields about 15 per cent of sugar. It is consumed locally and is very impure. Chemically, much of it is identical with cane and beet sugar.

Old Images of Buddha

Ancient brass images of Buddha, believed to be a thousand years old, have been discovered near Chittagong, India. Their design denotes exceptional artistic skill, and they are regarded as a valuable link in the history of Indian art. It is understood that the government intends to offer a reward for the finding of such relics.

Great Breeding Ground

Chesapeake bay is said to produce more oysters than any other body of water in the world; it has an annual output of nearly 8,000,000 bushels.

Silkworms

Through the introduction of colored matter into their food, silk worms now spin threads of various hues.

Irons a tablecloth in 4 Minutes

That took you 40 minutes to do by hand

THAT'S just one example of flat work. And the flat pieces, you know, make up some 90% of the family ironing.

This new invention irons the loads of flat work in one-third the time required by hand—better than the most expert hand laundress could do.

It operates from the wringer shaft of your Thor Washing Machine. It is portable—carried with ease.

It slips into a kitchen drawer or closet when not in use. And it heats as fast as an ordinary electric iron.

Rid yourself today of the drudgery of hand ironing.

It isn't worth the price you're paying. Give us 30 minutes to demonstrate this new invention in your home—the results will amaze you.

HISTORY IS TAUGHT BY MUMMY FAMILY

Scientists Study Remains of Ancient Egyptians.

Detroit.—A family of Egyptian mummies 3,000 years dead are teaching history to a little group of studious Detroiters.

They are telling curious and amazing things about themselves and others of their kind, who walked the earth ten centuries before the beginning of the Christian era, relating strange facts, revealing long sought mysteries, bringing to life again a splendid civilization that vanished generations ago.

Dr. S. Edward Sanderson, Detroit physician, and Benjamin March, curator of Asiatic arts in the Detroit Museum of Art, have joined forces in the study of the mummies. Doctor Sanderson has called upon the X-ray to aid him in his search for further knowledge of these silent spokesmen of the past and March brings a complete and thorough knowledge of the artistic side of ancient Egypt, to aid in the undertaking.

Possibilities Endless.

This is an exceedingly novel and original experiment and both men insist that they have accomplished very little in spite of their intensive studies. Both believe, however, that the possibilities of the venture are endless, and express the hope that something of great value may some day come out of the undertaking.

"If we are to know and understand the men and women of the present, we must know something of those who lived in the past," Doctor Sanderson says. "If we took away all the knowledge we have acquired from our study of dead races and vanished peoples we would be very ignorant indeed."

"Egyptian mummies are especially interesting to study because Egypt was the great melting pot 3,000 years ago. We can prove this racially. The old Egyptian was a masterful man."

"Some of the mummies are so perfectly preserved that it is still possible to detect the presence of food in the stomachs of the children and to tell something of their diet. We find grains, an old form of millet and delicate bits of young mice."

Two passive bottles lie still and quiet upon the dissecting tables in the art museum but even in their silence and immobility they give up many secrets in response to the proddings of skilled scientific fingers, the searching eye of powerful X-ray machines.

Brain Tissues Removed.

March describes the procedure of an Egyptian burial. The embalming of the body so perfectly that today, after

the lapse of centuries, the bones, the muscles and sometimes the skin are to be seen. The vital organs were removed and placed in four canopic jars, each guarded by its particular god and so placed that it would be easy for the whole body to reassemble itself when the time came to enter into a new life.

The X-ray has accomplished one thing of definite value. It has demonstrated the method by which the brain tissues were removed from the head without breaking the skull. Tiny borings through the nostrils are now believed to have freed the brain substances which were placed in their designated canopic jars.

It has long been assumed by many scientists that this was the method, but it needed the X-ray to reveal it in undisputed actuality. The X-ray plates which demonstrate this method will be loaned to the University of Michigan for class room study.

Holland Turning From Wind to Electricity

The Hague.—Electricity is playing a rapidly increasing part in the industrial life of Holland, as it is being found that, in spite of their picturesque character, windmills are falling very much behind in their output capacity. The capital for financing conversions from wind power to electrical power and for creating electrical power for other purposes is not always available and, therefore, an international finance corporation has been founded, with a capital of 10,030,000 florins, at Amsterdam.

The holders of this capital are Phoebl and Gutmann and Teizelra de Mattos of Amsterdam; Chase Securities corporation and Speyer & Company of New York; Dresden bank and Darmstadter and National bank of Berlin, and Hambros bank, London.

Activity will not be restricted to Holland, although the idea and the central organization have originated here, but will be spread wherever there is need of capital for electrical enterprises. It is possible that shares in electrical undertakings will be purchased, but the chief aim is to be able to supply loan capital of either a permanent or temporary character.

Science Warns Industry Of Benzol Poison Peril

Washington.—Benzol poisoning has been found a distinct health hazard in many chemical laboratories as well as in certain manufacturing plants, reports J. J. Bloomfield of the United States public health service. In laboratories in which tests are made in connection with rubber, paint, oil and varnish, benzol is extensively used, not only in the tests but as a solvent for cleaning apparatus, and the hands

and arms of the workers.

The concentration of more than 100 parts of benzol in every million parts of air in the workroom constitutes a health hazard. Substitutes for this substance are recommended to be used as far as possible, particularly for cleaning.

The number of white blood cells is considerably reduced in chronic benzol poisoning, and the nature of the cells also undergoes change. Routine physical examinations of the workers, including examination of the blood, are recommended upon employment and frequently thereafter, as a means of checking this condition in plants where benzol cannot be dispensed with altogether.

Abilities of Triplets Found Fixed by Birth

Washington.—If a triplet child starts out in life bigger and brighter than his fellow triplets he is likely to remain just about the same distance ahead of others through childhood.

This is the case with a set of triplets whose mental and physical development have been recorded at intervals during fifteen years.

The triplets consist of two girls and a boy, according to E. C. Nowe of the

state normal school at Mount Pleasant, Mich., who has reported the case to the Journal of Heredity. The boy was the first to cut his teeth and the first to walk and talk. He had the highest intelligence rating, and until the girls were about thirteen years, the boy was the tallest and heaviest. The boy's intelligence rating has stayed about an even distance ahead of the brighter girl, and her rating has kept ahead of the third triplet, Mr. Nowe states.

Took Name From Patriot

The city of Ypsilanti, Mich., was named in honor of a noble Greek family who distinguished themselves in the Greek revolution of 1821. Alexander and Demetrius Ypsilanti were ardent patriots and Demetrius was a successful leader in the revolt against the Turks. Judge Woodward of Detroit selected the name for the settlement.

Lafayette's Ride

The marquis de Lafayette on August 29, 1778, rode from Providence, R. I., to Boston, Mass., in six and one-half hours to beg D'Estaing to return with the French fleet to Narragansett bay.

A "used car" is unused transportation

A GOOD automobile is built to stand years of use. It will provide many thousands of miles of satisfactory transportation.

But only occasionally are all its years and all its mileage used up by one owner. Many owners turn their cars in after an average use of only two to three years—long before the cars' lives have been exhausted.

This custom brings into the market every year so-called "used" cars which represent outstanding opportunities to buy unused transportation at low cost.

Every year more and more people appreciate this fact. Today millions of families are driving cars of which they are the second or third or even fourth owners; and this year the volume of new car sales and trade-in transactions has created wider choices and greater values in unused transportation than ever before.

3 out of 5 buy used cars

THREE out of five of the cars you see on the road have been purchased as "used" cars. You cannot tell—nor do you ask yourself—whether the driver of any particular car is its first owner, or its second or its third, providing the car looks well and is running satisfactorily.

The cars which General Motors dealers have accepted in trade vary in name, body style and price. Some have seen sturdy service; in others the potential mileage has scarcely been touched. And all offer a wide field of opportunities—

To the family wanting transportation at lowest possible cost.

To the family wishing to own a car of a higher price class.

To the family needing a second or third car to meet the requirements of all its members.

We invite you to examine the unused transportation in the stores of General Motors dealers. For your convenience General Motors extends the GMAC Purchase Plan.

Name _____ Address _____

Chinese Converts Hand Christians a Puzzle

Canton, China.—Chinese converts to Christianity have advanced the claim that admission to the church entitles them to divorce their non-Christian wives and contract a new marriage "based on love as in the west."

The demand is a new phase of the old conflict between the customs of ancient China and the ideas implanted by Christian missionaries. Among non-Christian Chinese the bride and groom have little or nothing to do with the match.

Present-day wedding ceremonies in Canton are of a hybrid nature. Firecrackers are plentifully used and rice-throwing, not a custom indigenous to China, has been introduced by returned students from America. Many brides wear foreign-style lace veils with Chinese knit tams, while bridegrooms combine foreign straw hats and rubber-soled shoes with the con-

ventional Chinese long silk gowns and black satin jackets.

The ancient wine ceremony and the obeisance before the tablets of the bridegroom's ancestors are generally observed even at Christian weddings out of deference to older members of the family. In Nationalist circles the political will of Dr. Sun Yat-sen is read and the couple bow three times before his portrait.

Rocket Cars Coming

New York.—Rocket cars are being built in Germany for demonstration at Daytona Beach, Fla., next winter, and the inventor hopes to get a speed of 400 miles an hour.

Success Spells Failure

More men are failures on account of success than on account of failures, thinks the successful business men in

Mistakes

All worry, of course, is useless, but if there is one kind that is more useless than another it is worry over mistakes that have been made and cannot be corrected. Once you have done something that can't be undone, the only normal thing is to check it off and think of it no more. When you have to answer for the mistake, meet the situation as best you can.—Grove Patterson, in The Mobile Register.

Ducks Nest in Trees

Whistlers, hooded mergansers and wood ducks build their nests in trees, selecting a hollow limb, or a deep hole in the trunk. Often the trees are considerable distance from the water. On several occasions wild geese were known to nest in trees.

SUMMONS

In the District Court, Second Judicial District of the State of Idaho, in and for the County of Latah.

Florence N. Olson, Plaintiff

vs.

Henry Olson, Defendant.

The State of Idaho Sends Greetings To Henry Olson, the above named defendant.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows:

To obtain a decree of divorce from defendant on the ground of desertion.
And you are hereby directed to appear and plead to the said complaint within 20 days of the service of this summons. And you are further notified that unless you so appear and plead to said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 27th day of August, A. D., 1928.

Mr. and Mrs. Gus Farrington and daughter, Evelyn, were Lewiston visitors Wednesday and Thursday of last week.

Mot very family of this neighborhood were represented at the Hudson-Smith sale held at Linden last Thursday.

Announce Color Combination For Auto License Plates

Thirty-nine states will change the color combination for automobile license plates in 1929 and twenty-three different motifs will be used according to the Inland Automobile Association, local American Automobile Association representatives.

There is a decided trend toward the darker colors, the survey reveals and the "brunette" in license plates has gained a small lead over the "blonde," although varied hues will be represented in the color schemes, nine states and the District of Columbia will retain last year's color combinations, reversing them as to background and lettering.

The color scheme which will predominate in 1929, being used by six states and the District of Columbia is yellow letters and numerals on a black background. The second honor will go to orange on black which will be used by five states and four states will use a combination of white on black and the same number have adopted white on green.

The colors for the northwest states as shown by the A. A. A. survey, are California, deep yellow letters on dull black; Idaho, orange on gloss black; Montana, black on white; Oregon white on black; Utah, federal yellow on black; Washington, white on green.

Wedding announcements and invitations printed at the Gazette office. 26-1

Mr. and Mrs. W. J. Carroll and little daughter, Lida Jane, left Thursday afternoon by car for Spokane, to spend the week end at the home of Mrs. Carroll's sister.

Entertains at Bridge

The newly organized Afternoon Bridge Club met at the home of Mrs. Frank Boyd, where a delightful afternoon was spent at bridge, after which light refreshments were served.

Mrs. George Leith, who was presented with a pyrex dish as a prize. Those present were: Mesdames, Leith, Helpman, Carlson, Callison, Perryman, Herres, Ramsey, W. Thomas, Carroll, MacPherson, Thompson and Boyd.

START BIG PEA PLANT

Palouse—Headed by a special chamber of commerce committee Palouse citizens Friday celebrated the opening of the world's largest pea splitting plant, in the city Saturday.

The huge plant officially commenced operations at about 1:30 p. m. when members of commercial organizations, delegates from neighboring towns and cities and railroad and bank officials entered the plant for inspection.

Test runs in the plant began Monday, when the first peas went through the process. However, the plant was not ready to turn out a first class product until Saturday according to C. B. Pyle, president of the company which own the plant.

Moser Praises New Road

That the forest service road west from Lolo Hot Springs to within 1,000 feet of the Lochsa river is one of the finest stretches of scenic highway to be seen anywhere is the opinion of Dr. J. T. Moser, who has just returned from a two week's trip through Montana and Washington visiting relatives.

Dr. Moser made the trip from Missoula over the 52 miles of highway to the end of road operations and, realizing that there are few persons on this side of the mountains who understand the nature of the highway being built, kept particular note of the condition of the roads.

Right of Way Cut On

How much further than the end of operations the right of way for the road has been cut westward through the forest was not learned from the engineer in charge of the work, but as far as the eye could see to the west, the road seemed to be cleared. Only 1,000 feet of level grade separated the workmen from the Lochsa and it is only seven miles from the same point to Jerry Johnson hot springs.

Building operations for the present are concluded with the camps breaking up at the time Dr. Moser visited the spot. Equipment was being prepared for the haul out of the mountains.—Tribune

SCHOOL NOTES

The boys and girls of the first grade are enjoying building pictures from their pads and reading the little stories from their new books.

The second graders are finishing their review reader this week and will be ready for the Pathway Second very soon.

The new library books in the primary room are being used and enjoyed by the pupils.

A health drill is being given this week in the primary room.

The seniors are preparing a program to be given at the end of the first six weeks period. Of what the program will consist is being kept a dark secret.

All parents and friends of the school are invited to attend this program next Friday afternoon, October 19, at One o'clock.

The Domestic Science class served a dainty luncheon to the teachers who attended the demonstration held in Kendrick last Friday.

Next week ends the first six weeks period—in spite of the fact that some of the books have not yet arrived and that others came late, the students and teachers feel that school has gained headway this first period. Parents are urged to aid students as much as possible in getting their home work and a fresh start for the next six weeks.

Southwick News

Raymond Blankenship and wife left Monday for Big Island to be gone a week.

A large number of people from in and around Southwick attended the fair in Orofino Friday and Saturday of last week.

SO'S YOUR OLD MAN

An Englishman just returning to London from a visit over here was much impressed with our slang phrase, "So's Your Old Man." In telling his friend about it he explained, "You know they have a deucedly funny saying ovah then when they question wot you say: Instead of sneering "Fiddlesticks," or "you do not mean it old chappie," they say "Oh hell, fawther is the same way." Clevah isn't it? Haw haw!"

Cooked Food Sale

The Ladies Aid of the Presbyterian Church will hold a cooked food sale, tomorrow, Saturday, October 13, at McDowell's Confectionery. The Aid also wishes to announce that they will serve hot lunches on election day.

The Ladies Aid of the Methodist Church will serve a substantial hot dinner, on election day, November 6th, at the Commercial Hotel. Price for adults 40c; children under 12 years of age. 25c.

Dog Crossing Guard

A dog guards the grade crossing over the cogwheel railroad to the convent of Montserrat, Spain, to which thousands of pilgrims and tourists make excursions. When he hears a train approaching, the dog jumps up and stands on his hind legs, bearing between one of his paws and his breast a red flag which signals road travelers to a stop.

THE STATE WE LIVE IN

By Byron Defenbach

Lower Sawtooth Lakes

The Sawtooth lakes as a whole form Idaho's largest group of still waters, their number being variously estimated at from 200 to 300. They are roughly divided according to their elevation and the manner of their foundation into the "lower" and "upper" groups.

Most of the lower lakes have been made fairly accessible, being most easily arrived at by way of Hailey, thence by a good highway over the Galena Summit into Stanley Basin. The view from the summit probably is not excelled in the world, unless it be a few miles farther down in the Basin where the tourists may watch the morning sun plating with shining gold the teeth of the Great Saw. The first of the lower lakes reached is

Akturas

which lies in a basin about a

KENDRICK STORE CO. "The Quality Store"

mile wide and 3 miles long. Early explorers called this "Snowside Lake" from its perpetual snow banks. Bancroft defines the name as meaning "mountainous heights" and says early prospectors called the section "heavenly heights." The word Alturas was adopted in 1864 as the name of the 7th county organized in Idaho Territory, a county later legislated out of existence.

Pettit Lake

lies about 3 miles north of Alturas. The peaks at its head are 10,000 feet high. On the shores of Pettie Lake is the summer home or lodge of Mr. James McDonald, a wealthy resident of Hailey who has given invaluable help in stocking and otherwise popularizing these waters.

Redfish Lakes

The entire group is often spoken of by this name, but it belongs specifically to a pair of lower lakes. Big Redfish is the largest and most popular of the entire galaxy. Little Redfish lies a mile or two northeast of its larger sister and is clearly visible from the highway.

Stanley Lake

lies about 10 miles northwest of the Big Redfish. It is distinguished chiefly for the reflections cast in its depths by surrounding mountains. A photograph of these mirrored splendors, taken by an artist of Challis, was awarded first prize in the amateur photo class at the St. Louis World's Exposition.

All these lakes flow into the Salmon, forming one of the sources of that great stream, the longest river in the United States lying wholly within one state. The huge saucer forming that part of the Salmon valley through which these lakes have their outlets is known as "Stanley Basin"
