No. 42

JUST IDAHO

By Guy Flenner

Fight 'Em, Farmers

These figures are from the head of a nationally known seed buying and distributing concern. One valley in Idaho ships from 165 to 175 carloads of clover seed a year, representing around five million pounds. The price runs from 15 to 26 cents.

So much foul seed is shipped necessitating expensive cleaning before it can be put on the retail markets, as to cause this difference in price.

At an average price of 18 cents, the gross revenue on clover seed from that valley is \$900,000 for the year. If it was all clean, it would bring not less than 25 cents, or a total of \$1,250,000. Difference, \$350,000. That is substantially what the seed growers of that valley are losing a year through careless methods, according to our authority.

The trouble is, as stated to us, that too many farmers neglect the weeds, the seed of which is shipped with the clover seed; and many of them do not seem to understand why it is they are in the 15-cent class while some of their neighbors are in the 26-cent class.

If the identical conditions prevail in all clover seed districts of the state the annual loss totals a rather staggering figure—a loss that could be largely prevented by fighting the weeds.

Know their Onions

Representatives of the Union Pacific whose duty it is to expand and hold markets for produce raised along their lines, report an increased use for Idaho onions, probably half the states in the Union now being on our onion shipping list. This accounts to a large degree for the surprising growth of this new industry.

The state chamber of commerce has a record of over 1000 sacks of onions to the acre in one district. Publicity to that effect, with photo attached to prove it, had hardly left the press when a farmer came to the office of the writer and proved he had raised 1200 sacks to the acre.

Onions are worth \$2.50 a sack, we are told. A thousand sacks are worth \$2500—that much per acre! This year around \$450,000 will come to that one little district from onions—and the business is growing over the state.

Special knowledge and care are required to successfully grow commercial onions. The figures given reveal that at least some of the growers know theirs.

Articles have been printed showing quite a number of Idahoans who are making good in other fields, but they have all overlooked Albert White, United States marshal for the First district (Juneau) of Alaska. He has been in that position more than 28 months, handling 100 prisoners a day, with only one loss—a desperate character who was recaptured through White's efforts in three months.

Marshal White is an Idaho product. He graduated under William J. Burns, attended government schools of criminology in New York and Chicago and for 10 years served in large cities with the department of justice. The record he is making in Alaska, which has its share of criminal characters and presents many delicate situations, has won for him the high praise of the national department and of all authorities on criminology who are familiar with his work.

Small Reason for Grumbling

We read of 200,000 Chinese being murdered by Moslem fanatics; then of floods and famine. Our hearts go out to those stricken districts, but about all we can do is to help through the Red Cross. Contemplatively another interest we of Idaho have is that we live in a state that is free from devastating storms and in a country that holds zealously to law and order in all that has important bearing upon in-

\$1,500 IN PRIZES FOR ATHLETICS

Fifteen hundred dollars has been appropriated by the State Athletic commission for prizes in the state interscholastic football, basketball and track tournaments this year.

Details of the system under which the prizes will be awarded have just been completed and announced by W. B. Pratt of Boise, secretary and a member of the commission. Two other members are George McKeown of Wallace and A. J. Maynard of Pocatello.

The plan has been presented to the board of control of the Idaho Athletic association, which is the organization having charge of interscholastic athletics in Idaho. The board has approved it and the association will supply the commission with the official results of the various district and state tournaments.

The commission inaugurated its policy of entering interscholastic athletics at the suggestion of Fred E. Lukens, secretary of state, under whose direction the commission works. The first year was the 1927-28 season when \$1400 was spent in prizes and cash donations to the schools of the state. Mr. Lukens believes that this is the very best way to carry out the provisions of the law which gives the commission authority to spend its surplus funds, derived from a tax on boxing and wrestling, in the promotion of clean athletics in the public schools of the state. The plan under which prizes will be distributed in 1928-29 is essentially as follows:

In each of four district football tournaments the commission will award \$75 worth of equipment to the winning team; the equipment to be selected by the school. The team which, in the opinion of the athletic association, is winner of the state championship will receive individual medals for its members and coach.

In each of the seven district basketball tournaments the commission will award \$50 in equipment to the championship team and a similar amount to the team declared to be the winner of the sportsmanship award. For the state tournament in basketball the commission will award a large trophy cup to the championship team and a similar cup to the winner of the sportsmanship award. These cups will be the property of the schools winning them.

The track tournament, coming, as it does, late in the school year, the commission felt that equipment prizes would be of little value for that year and therefore decided to aid this branch of interscholastic sport by an appropriation of \$250 to help finance the meet.

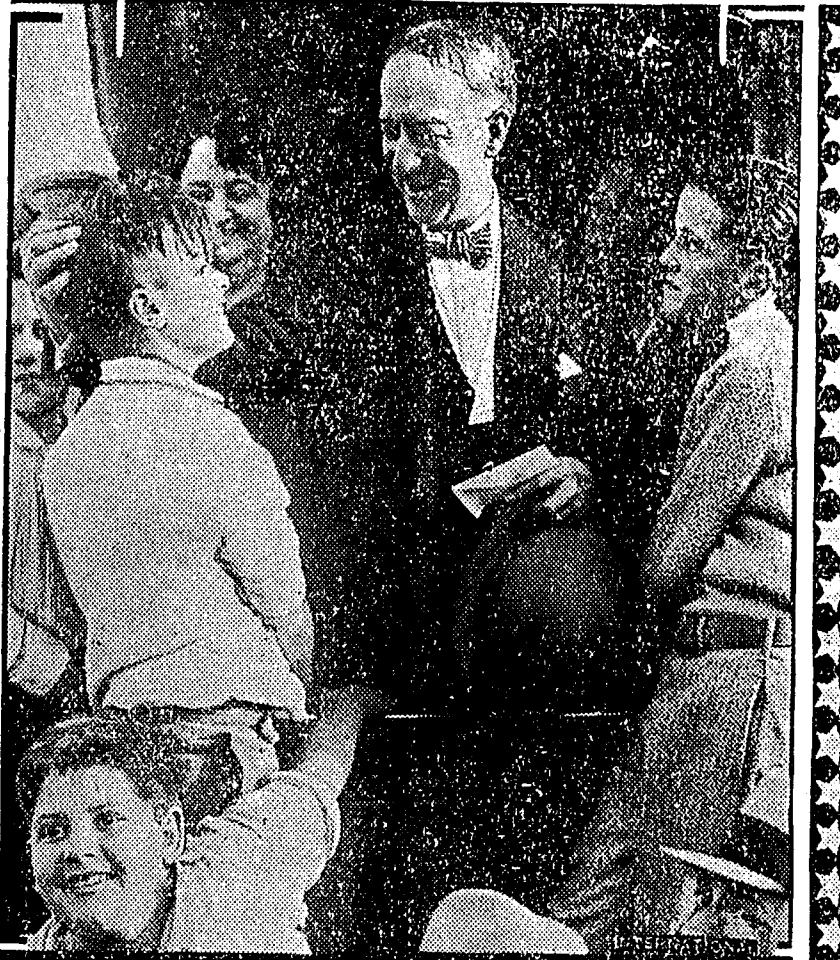

Tom Long and F. J. McNeil left for Wallowa County, Oregon, where they will indulge in a deer hunt. In Oregon hunters are allowed two deer apiece, so these two ninrods will probably return loaded.

dividual safety and national security and progress.

Again we read of wages for laborers in the building trades from 80 cents to \$3 in foreign countries and from \$4 to \$12 in the United States; farm hands around \$2.50 average here and \$1 a day in foreign countries, some as low as 56 cents. And so it goes down the entire list of employment.

An offsetting element is the higher cost of living in our country, but who would change locations and living conditions? Nowhere on the face of the globe are the rank and file of people housed better or do they live nearly so well, with innumerable comforts and conveniences and many luxuries unknown to the same classes abroad. That is emphatically true of our own state. Instead of grumbling, we ought to praise the Lord morning, noon and night, that we are permitted to live in such a nation and such a state.

Al Smith on His Western Tour

Gov. Al Smith, Democratic nominee for the Presidency, was greeted by great crowds everywhere on his campaign tour of the Middle West. The photograph shows how the boys and the governor fraternized wherever his train stopped.

Death of Leland Blacksmith

P. P. Schuh, Leland blacksmith, passed away suddenly last Sunday afternoon while he was walking down the street at Leland. He suffered a stroke of apoplexy and dropped to the street, death ensuing immediately.

Little of Mr. Schuh's past history is known in Leland. He was 71 years of age and located at Leland about three years ago, opening a blacksmith shop, where he did a good business. He lived in Lewiston prior to taking up his residence in Leland but his home was originally in California. He is survived by a sister who lives at Sebastopol, California.

The body was taken to Lewiston Sunday evening by the Brower-Wann Co.

James Henry Garner

James Henry Garner was born April 11, 1860, in Illinois and died October 11, 1928 at Wenatchee, Washington at the age of 68 years and 6 months.

He spent his boyhood days in Illinois, then moved to Missouri, where he was married to Miss Matilda Huffman in the year 1883. To this union six children were born, all of whom survive, excepting one who died in infancy.

In the year of 1888 he moved to Linden, Idaho, being one of the pioneers of that country, there being only three other families there at that time.

He leaves to mourn his loss, his wife, three sons and two daughters, nineteen grandchildren and two great grand children, and a host of friends.

Funeral services were held Monday at the Linden church and burial was made in the Goldhill cemetery.

Funeral arrangements were in charge of the Pickerd undertaking establishment.

Presbyterian Minister Here

At a meeting of the board of trustees of the Presbyterian church, held the first of the week, it was unanimously decided to have Rev. N. E. Franklin take charge of the local Presbyterian church. Rev. Franklin is a man of pleasing personality and is full of energy and enthusiasm for his work. He comes here from Dayton, Wash., where his family will remain until the end of the school year. His family consists of his wife, one son and a daughter.

The hunting party composed of Joe Gardiner, Ed Deobald, Ralph Knepper and Jack Barnes arrived home from the Selway last Friday night with nothing in the way of game except a brown bear.

Southwick News

Steve Douglas and son, George drove to Palouse and back, Sunday.

Roy Southwick and wife were in Lewiston a couple of days the first of the week.

Ray Triplett and family of Elk River were in town Sunday. Mrs. Triplett remained here for a visit.

Floyd Russell, wife and daughter were in Lewiston, Tuesday.

Rev. Ehlen of Cameron and Rev. Fritz of Pullman were dinner guests at the home of Henry Brammer, Tuesday.

Ralph Wright of Lewiston was in town Saturday, and was the overnight guest of Steve Douglas while here. He returned to Lewiston, Sunday.

Mrs. George Jones was in Moscow last Friday, returning the same day by way of Lewiston. She was accompanied home by her son, Albert, who was an overnight guest, Friday, returning to Lewiston the following day.

Murray Benjamin of Palouse spent the week end with relatives.

Several people from the Southwick community attended the Heath & Burns sale, Monday.

Harry Thompson and family were the over night guests of friends in town, Saturday night.

Mrs. Eva Wright spent a few days of last week in town returning to the home of George Christensen, Saturday evening.

Sunday dinner guests at the home of Ben McCoy were Waldo Mudge of Lewiston, Harry Smith and family, Jim Cook and wife and Elma Moton of Leland. Elton McCoy and wife and Lester True.

Mr. Cook attended the school fair at Culesae last Friday. Southwick took second prize in the exhibit.

Mr. and Mrs. Lloyd Eckman drove to Elk River and back Sunday.

Miss Nadine McCoy was in Kendrick Wednesday, having some dental work done.

Cedar Ridge News

Mr. and Mrs. Clem Israel visited at the Pete Stump home Sunday.

Misses Gladys, Alice and Fay Cochran visited at the Ed Kent home over the week end.

Mrs. Lou Alexander and children visited at the Starr home, Sunday afternoon.

Misses Georgine, Anna and Lois Christensen, Mrs. Fred Zimmerman and Mrs. Wm. Zimmerman were afternoon guests of Mrs. R. C. Winegardner, Sunday.

The children of the Cedar Ridge school went for a hike in the woods, Thursday afternoon, for nature study. They are making booklets to put their stories in.

The children are practicing their play and stunts for Halloween program.

NEWS FROM THE KENDRICK SCHOOLS

Daily Doings in the Grades and High School

The assembly now has a flag pole and every Thursday the flag salute is given, followed by the singing of the "Star Spangled Banner" and "America."

This is the week in which the students are getting a chance to show what they have learned during the past five weeks of school. We are glad that the first six-weeks are almost past, and are hoping that everybody passes the examinations.

The program given by the Seniors consists of several short plays given by members of the class. No talent outside of the class is employed.

Mr. Beardsley—"Don, why are you talking 'Public Speaking'?" Don—"So as I can control my voice."

JUNIOR GIRLS ENJOY WATERMELON FEED

On Thursday evening the Junior girls and Muriel Crocker went to Cold Springs on a watermelon feed. Each girl gave a donation of ten cents with which to pay for the melons. Upon reaching the destination, a fire was built around which the melons were eaten. After the fire had died out and nothing was left to eat the party broke up amid much laughter and fun.

The domestic science class has prepared potatoes and bananas in several different ways.

The Manual Training boys have been repairing the Gym for the coming basket ball season.

Miss Ledbetter (in General science)—"What do you call the digestive juice secreted by the salivary glands?"

Would-be-scientist—"Eczema and gastric."

Last week the Sophomore English class organized a "Better Speech Club." A committee of three members will be chosen each week to record all mistakes made in English during the week. At the end of the week the errors will be reported and corrected by the class.

Students having an average of "A" this first six weeks period will have their names written on the new honor roll which has been posted in the assembly.

Other students are fearful of finding their names on a proposed "flunkers" list.

Thursday afternoon the Biology class took a hike in search of insects for their notebooks. A foolish Freshman suggested that they needn't have walked far to find their specimens.

The seventh grade are completing some very interesting product maps of South America. As nearly as possible they have secured the real products and pasted them upon their maps. The results are very satisfactory.

The school now has a new Volley ball and our room are enjoying their time playing volley.

The eighth grade held a meeting of its Current Events Society last Friday. Aside from carrying on its regular discussion of current topics, officers were elected. They are as follows, Mary Johnson, president; Allie Foster, secretary; and Nettie Mae McDowell, critic. This society will meet once a week to discuss current topics.

This week the teacher of this room is checking upon the pupil's knowledge by the regular six week's examinations.

Don't forget that the boys and girls of the four upper grades are planning to entertain every citizen of Kendrick, October 31, at the New Kendrick Theatre. Don't you disappoint them. Juliaetta folks, we think there will be room for you too. The program starts at eight and we promise you about two hours of real entertainment, at the low admission of thirty-five and fifteen cents. Please come!

Members of the fifth and sixth grades are very excited over their coming presidential election, which will be held Friday afternoon.

Registration of every one in the room has just been completed. The sixth grade com-

Big Bear Ridge News

T. H. Rognstad and Clarence Swanbeck of Clarkston spent Friday with friends here.

Mrs. Will Whybark was recently visiting at the Dan Whybark home near Linden.

Miss Hulda Olson of Deary and Grant Clemenhagen, who were married last week, were given a charivari by their neighbors and friends Monday evening. A large number were present and everyone was given a nice treat. Mr. and Mrs. Clemenhagen will make their home at the Storm farm. They have the congratulations and well wishes of a large number of friends.

The Lutheran Ladies Aid were quilting at the home of Mrs. Z. Aas, Thursday afternoon.

Mr. and Mrs. Otis Gentry and daughter, Doris, drove to Lewiston, Saturday, to attend the funeral of Mrs. Gentry's little niece.

Several from here attended the Health sale on Pix ridge, Monday.

Mr. and Mrs. Robert Clemenhagen and daughter, Violet, spent Sunday in Colfax with Miss Audrey Clemenhagen.

Word reached here of the marriage of Miss Ruth Blendon of Farmington, Wash. She is the daughter of W. M. Blendon, an old time resident of the ridge.

Mr. and Mrs. Herbert Slocum and daughter have moved to Deary.

Dr. and Mrs. Meyers of Lewiston spent Sunday with their daughter, Miss Janice, at the A. W. Jones home.

Mrs. John Elliott is enjoying a visit from her mother, Mrs. McBride from Ontario, Oregon. The McBride family were former residents of this ridge.

Miss Esther Kleth of Spokane spent Sunday at home.

Miss Olive Simpson spent the week end at her home at Albion, Wash.

Mr. and Mrs. Pete Halseth and children of Deary were Sunday visitors at the Ed Halseth home.

Miss Virgie McGraw, Dwight and Gerald Ingle, are attending the University of Idaho at Moscow.

Miss Agnes Jones, who teaches at Teakean spent the week end with home folks.

Mr. and Mrs. Otto Gladden of Coeur D'Alene were recently visiting relatives here.

(Too late for last week)
Mr. and Mrs. Wallace Emmett and sons were visiting at Craigmont, Sunday.

Robert Clemenhagen has returned home from Agawam, Montana, where he has been harvesting.

Mrs. Halvor Lien entertained the Lutheran Ladies Aid at her home Wednesday afternoon.

Claude and Faye Jones, Mrs. A. W. Jones and daughter, Miss Opal, spent the week end at the W. Hamilton home near Peek.

Power Off This Week

Owing to the fact that the electric power has been off this week, the news columns of the Gazette are somewhat below par. It requires electric "juice" to run the linotype so that it has been impossible to get more than a minimum amount of local news in the paper this week. The power has to be cut off in order to allow the linemen to make needed repairs on the line between Moscow and Kendrick.

stitution class is carrying on the registration and election, but all "citizens" of this room are eligible to vote. They have studied Our Country's voting system in detail and are doing it all in "big folks" style.

Margaret Daugherty was chosen registrar and has successfully filled her office with a hundred per cent registered. The following members of the sixth grade are chosen to act on the election board, Thomas Blevins, Margaret Daugherty, Bud Carlson, Doris Crocker and Jean Ramey. Russell Humphrey will act as sergeant-at-arms.

The fifth and sixth grades are very busy on their share of the Halloween program which will be given Wednesday, October 31, at 8 p. m. at the theatre.

HOW ACCIDENTS "DON'T HAPPEN"

According to the logical reasoning of J. A. Buford of the Utah State Automobile association, accidents don't happen. Pursuing this line of thought he says:

"What, then, may we ask, causes them? There you are, old dear, you guessed it right off. They are caused; they don't happen. Ask the man who tried to pass on a turn, near the top of a hill. But he can't help you. You see, daisies won't tell. Neither will the fellow who tried to drive between two headlights. He thought it was a couple of motorcycles. Female beauty exacts its terrible toll annually. A stream-line model with a new paint job, comes walking down the avenue. You rave about nature being grand for a moment too long, and your destination is about to come and get you. You're sunk!"

Idaho onion growers are experiencing one of the most profitable years in the history of the state's agricultural development. Although the crop, estimated by government statisticians at 1000 acres, forms but a small part of the state's agricultural products, yet at the prices being paid onion growers will receive more than \$1,000,000 this year. Most of the crop is moving at \$2 to \$2.25 per 100 pounds.

A majority of the fields are under 10 acres but here and there some farmer has "gone in heavy" and planted 20 to 30 acres and the return of better than \$1000 per acre is holding for the large acreages as well as the small ones.

In Idaho the sweet Spanish variety of onion is preferred by growers and production this year has been above average. The 1927 state average was 475 bushels to the acre. This year many of the fields are running better than 1000 bushels to the acre and in isolated instances growers have taken as many as 1750 bushels of onions from one acre of land.

Growing conditions are excellent in Idaho. The long season prevailing in the valleys, coupled with abundant sunshine and plenty of irrigation, water matures the crop perfectly and Idaho onions are known the country over for their fine keeping qualities. One New York dealer came all the way to Idaho this year to buy onions because no other onion producing section of the country, he said, can equal Idaho for quality and production. No disease infestations hinder the development of the Idaho crop and growers have planned a crop rotation which, they believe, will prevent their lands from becoming infested.

The size varies from two and one-half inches to five inches and in the more favorable producing sections a majority of the crop is above 4 inches in size. These onions are sought after by high class restaurants in large eastern cities where they are used for slicing. The southern trade prefers the smaller variety and Idaho onions find good market in the centers of this part of the country.

Linden News

Mr. and Mrs. Harry Thompson of Winchester and Mr. and Mrs. H. J. Starr were dinner guests of Mr. and Mrs. H. S. Weaver, Sunday.

Mr. and Mrs. C. E. Harris visited Mr. Harris' father at Troy, Tuesday, who is quite seriously ill.

Mr. and Mrs. George Garner returned Saturday evening from Wenatchee, where they were called by the death of George's father. They were accompanied home by Mrs. Jim Garner.

Miss Popkey spent the week-end with friends at Moscow.

George Smith returned from Canada, Saturday.

F. C. Lyons and son, Clem, returned Tuesday evening of last week from the Red River Hot springs with an elk and a deer.

Several people from here attended the show at Kendrick, Monday evening.

Mrs. Alford Hudson and children spent Thursday at the Allen

home. Mr. Johnson, Sunday school organizer, gave an interesting talk at the church Sunday morning and again Sunday evening, showing some very interesting pictures.

Mr. and Mrs. Reube Garner, Charlie Garner and J. D. Perry of Elk River, Commie Perry and sisters and Mr. and Mrs. Amos Nigh and son, Roy, of Juliaetta, attended the funeral of the late James Garner, here Monday.

Mr. and Mrs. Arthur Bohn left Tuesday for Oklahoma on a visit. They are making the trip in their new Chevrolet car and will visit many places of interest.

RESTORE HOME OF GEN. SAM HOUSTON

Teachers With State Aid Making It a Shrine.

Huntsville, Texas—The homestead to which Gen. Sam Houston retired when he was deposed as governor of Texas because he refused to swear allegiance to the confederacy, and the house in which he died, lonely and broken-hearted, are being restored to their original rustic beauty.

The work of making the grounds a state park and the old home a shrine for the people of Texas soon will be completed. The legislature appropriated \$15,000 for the purpose.

A quarter of a century after he had won freedom for Texas with his victory at San Jacinto, General Houston lost the governorship of the state which, as a republic, had honored him with its presidency. Somewhat embittered, he sought peace at his home near Huntsville and died two years later.

The home changed ownership many times, but in 1911 became the property of the state teachers' college, which bears the general's name.

In the last few months many changes have been made in the appearance of the place. Trees, which were not there when it was Houston's home, were chopped down, and those which he had planted were pruned and marked. The pond was enlarged to its former size and shrubs were planted on its banks.

The house was restored to its appearance of long ago, except that lumber from a sawmill replaced the rough-hewn plants. The interior, however, was given what architects pronounced an almost perfect restoration.

Now a search is being made for the furniture which Houston used during his last days. One of the first pieces recovered was a chair, found in a Negro's hut.

Prevent Diseases

It is an established fact that most of the tuberculosis in fowls is found in the older birds. When the older birds are eliminated, the principal spreaders of tuberculosis are eliminated. Therefore the sale of birds after they have completed most of their first year laying cycle is not only the method of securing the highest production per hen but also a method of helping to prevent spread of diseases such as tuberculosis and other ailments.

Earth's Elevations

The highest point in the world is in Asia, Mount Everest, being 29,141 feet; the highest point in South America is Mount Aconcagua, 23,080 feet; in North America it is Mount McKinley, 20,300 feet; in Africa, Kilimanjaro (Kibo peak); Europe, Mont. El Bruz, 18,435; while the highest point in Australia, Mount Kosciuszko, has an elevation of 15,981 feet.

Questions Asked Republican County Chairman About Prohibition and Farm Relief.

Say! Is prohibition really an issue?

Answer: No! But the democratic candidate for president has injected the issue into the campaign by declaring for some sort of a state dispensary system for the sale of intoxicating liquors. A false hope is held out to the thirsty that modification of the Volstead Act will be certain by electing Smith president. Any law which will permit the manufacture or sale of intoxicants in any form would unquestionably be void and unconstitutional. The eighteenth amendment can not be amended without the consent of the majority of the members of the legislatures of two-thirds of the states. Figure it out for yourself and you can not find ten states where a legislature could be elected which would repeal or modify the eighteenth amendment.

If what you say is true, then why did Smith come out in favor of liquor?

Answer: Because he is a political opportunist and is trying to get the vote in the big cities. Candidate Smith is not a true democrat, and no democrat is under any obligation to vote for him. The democratic party

adopted a safe and sane platform which was written and approved by duly elected representatives of the party. After the platform was adopted and the nominations made, Candidate Smith openly repudiated the platform on the liquor and immigration questions. By announcing his own platform, which is in defiance of the party platform, Candidate Smith becomes an autocrat, and in his own estimation bigger than his party, or in other words he proves himself a true disciple and follower of Tammany, which is ruled by its head just as it was during the days when Tweed, Crocker and Murphy headed Tammany Hall. The leopard has not changed its spots, nor the Tammany Tiger its stripes.

Will the election of Smith mean relief to the farmer?

Answer: The farmers of his own state have never voted for Smith. He has never carried a single agricultural county in New York in any of his four campaigns for governor. The farmers have been outvoted by the big city vote in New York State. As governor of the State of New York, Smith has never helped nor showed any sympathy for the farmer in his problems. On the contrary, he made every effort to procure cheap food and milk for the cities at the expense of the farmer. As president of the United States, Smith's sympathy will be with the wet vote of the big cities, just as it has been in the past. If the farmers in New York State were not for Smith for governor and not for him for president, and they are not, is there any good reason why the western farmer should vote for him? Answer this question yourself.

Well, how about the canalization foe in the McNary-Haugen bill?

Answer: Next week this question will be answered.

Latah County Republican Central Committee, by R. C. West, Chairman.

One of the most serious factors in our crime situation is that of the relentless, "repeating" criminal.

The newspapers are full of accounts of assaults, robberies and murders by thugs who have long records behind them of other crimes. These men are turned loose time and again to be given "another chance." Usually they use the new "chance" to further their criminal careers.

It is reasonable to believe that a man, convicted once of a crime may, when released or pardoned sincerely reform.

It is entirely unreasonable, however, to believe that a hardened wrong-doer whose whole life has been a testimonial to the strength of his criminal instincts, will be willing to change his ways.

In New York, under the Baumes Laws, which give life imprisonment automatically on the fourth conviction for a felony, crime is decreasing. Other localities where similar law are in effect, find the result the same.

We cannot compromise with crime. It is an unfortunate fact that all reform movements, based on purely moral grounds, have failed, because of the criminal's own immorality.

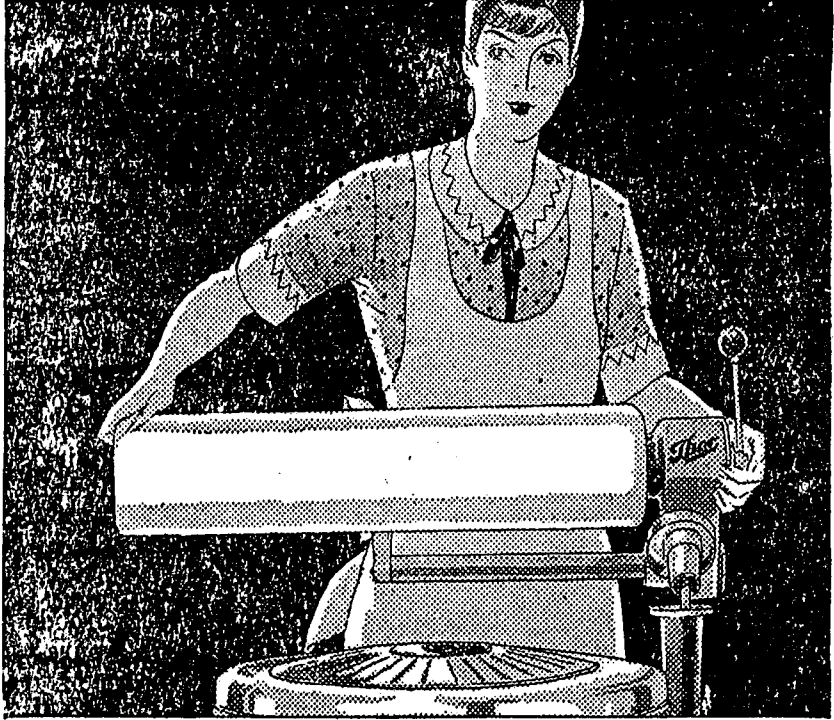

Sensible, undeviating laws, that have no part with misguided sentiment, rigidly enforced, will deter more criminals in a moment than all the anti-pistol laws ever proposed could do in a year.

We have failed in the past because we have pampered the criminal and compromised with crime. There can be no hope of success in the future unless we change our course of action, and put the "repeating" criminal where he can do no harm.

Shakespeare Stuff

"The worst is yet to be," quoted the weiner as it slid into the sausage-machine.

Banish Ironing-Day Drudgery

with this amazing new invention

HERE'S a new, workless method of speed-ironing—and a new-type machine every woman can well afford to own.

No labor...no exertion...no work. You sit in a chair and feed the pieces through. Ironing by this new speed method is done in one-third the time required by hand—and done better.

Thor Rotary Iron heats as fast as an ordinary electric iron. It irons with amazing speed the loads of flat

work that make up some 90% of the family ironing.

It operates from the wringer shaft of your Thor Washing Machine. Light-weight, easy to carry. When ironing is done, it slips into a drawer, corner or closet, out of the way until needed again.

For a few cents a day you can have this permanent relief from ironing-day drudgery. Ask us for a free demonstration of this amazing new invention.

Thor ROTARY IRON

No More Blue Mondays

The new Thor Agitator electric washer takes the drudgery out of washday as does the New Thor Rotary Iron

You May Have a Complete Electric Laundry in Your Home For

Only \$1.00 Down

Balance on Easy Terms

It costs less than 3c per hour to operate a Thor Electric Washer. Can you afford to do your washing by hand at that rate?

KING OF SLAVS IS NO PUPPET MONARCH

Alexander Takes Big Part in Nation's Affairs.

Belgrade.—Probably no other king in the world has such a grip on the affection of his country and his people as young King Alexander of turbulent Jugo-Slavia. He is not a mere symbol. Not only is he in the closest bonds with his people, but he directs the cabinet, controls the army, formulates the foreign policy, and takes an active part in every question affecting the welfare of the nation.

Only thirty-nine years old, Alexander, who was once a page in the czar's court at Petrograd, is the most powerful figure in a country which, since the World war, has increased its population from 3,000,000 to 12,000,000 and its territory from 58,000 square miles to 96,135 square miles.

Alexander is a tremendous worker. He is on the go day and night. "I have never known a man who works so hard," remarked Queen Marie about her royal son-in-law.

Seeks Racial Harmony.
Alexander's greatest ambition is to achieve unity and harmony among the Croats, Slovenes, Serbs, Dalmatians, Moslems, and other diverse nationalities of Jugo-Slavia.

The king is intensely interested in mechanics, science, medicine, archeology, art, military lore, and literature. Like King George of England and King Victor Emmanuel of Italy, he is a great stamp and coin collector, having one of the finest sets in the world.

The king's day begins at seven in the morning, when he goes through the newspapers, reads telegrams and answers correspondence. From ten o'clock onward he receives his ministers, the commandant of the Belgrade garrison, the governor of the capital and army and civilian leaders. At 1:30 the king has luncheon, usually with the queen, his two baby sons, court officials, and sometimes invited guests.

Like most Slavs, Alexander is a hearty and a fast eater. He is fond of Serbian national dishes.

From 2 to 4 in the afternoon he usually takes an automobile trip with the queen into the country, sitting at the wheel himself. Occasionally he varies this by a horseback ride, a long walk, or a game of tennis. From 4 to 7 he grants audiences.

Is Always Cheered.
Between 7 and 8 his majesty usually takes a stroll into town, accompanied only by an aide-de-camp. He is always enthusiastically cheered, but does not relish this public adulation.

At 8 the king dines, usually with friends or official guests. After dinner he chats with his guests, plays bridge, chess, or "listens in" on his wireless.

Like most Slavs, Alexander is very pious and goes to church every Sunday and on all feasts. He is a member of the Greek Orthodox church. But he is broadminded and does not adhere to dogmas or rigid doctrines.

Although Alexander has been on the throne seven years, he has never been formally crowned. He has always insisted that his country could better devote the expense of such a coronation to other more useful ends. Only once has he worn the crown, and that was when he formally assumed the throne in 1921.

Saragossa Sea Place of Beauty, Not a Menace

New York.—The Saragossa sea is pictured as a place of beauty rather than a menace by H. A. Marmer of the United States coast and geodetic survey.

The water is unusually blue, due to lack of minute plant and animal life. It is so transparent that a six-foot white disc can be seen clearly at 200 feet depth.

Belief in the existence of great masses of weed in this sea has no basis in fact, Marmer writes in the United States Naval institute proceedings.

The sea has surface weed patches up to 100 feet in diameter and occasionally as large as an acre in extent, which do not interfere with navigation.

Naughty Alligator

Bassett, Neb.—Noticing a commotion among the chickens and pigs on her farm, Mrs. A. B. McCance investigated and found a small alligator trying to get a chicken dinner. It is thought the alligator escaped from a small circus that visited here a short time ago.

Buffalo Police Bar Old Wedding Custom

Buffalo, N. Y.—The time-honored custom of playfully tossing old shoes at the groom, tying tin cans and other noise-producing articles on the rear of automobiles used by bridal parties, and blowing of horns by cars in a bridal procession, will be cause for arrest hereafter.

The Buffalo health department classifies such acts as those of "morons, diabolical, and threatening the health of the sick and nervous."

Throwing old shoes at the groom is said to be fraught with danger—a blow on the head often resulting in a fatal injury.

Egg That Has Life Very Essential for Success

Whether breeding chickens, ducks, geese or turkeys, the first essential for success is to get an egg that has life. Strong, vigorous parents that are well fed and well cared for produce such eggs. The general principles of breeding apply to all poultry, says a writer in Wallace's Farmer. Well fed, but not overfat, is the ideal condition. Enough feed to keep the flock active during the day; a liberal feed at night. Green feed and animal feed, clean water, no lice or mites; fresh air without draft at night, together with plenty of room, are conditions that favor eggs with life in any locality. There are no rules for growing poultry that must be followed absolutely. There are the general principles of clean food in abundance with work on the part of the fowl to get it; clean houses, clean yards and fresh air, but success comes with about as many different systems as there are breeders. Bone meal, meat scraps and buttermilk furnish bone and muscle building material; corn, wheat and oats add the necessary fat and energy; green feeds give life and health. Upon the character of the seed depends the harvest.

Lighthouse Built Amid Tempests on Coral Reef

Washington.—A successful end to an 18 months' campaign to plant a lighthouse on Tubutataha reef in the Philippine islands, marked by a bitter and ceaseless struggle against the elements, has been reported by the lighthouse service of the Department of Commerce.

A low coral reef set in the midst of a nest of rock shoals, sun-baked and hurricane-swept, has been crowned with a 120-foot tower to carry the light that will warn mariners. Presently the reef will be covered with soil behind the sea wall to make a tiny park under the tower.

Work began on the construction in November, 1926, and was stopped repeatedly by hurricanes which swept the barren, low islet. Many days the sun, beating on the white coral, made labor impossible during normal working hours.

Water had to be distilled out of the sea to supply the gangs struggling with the concrete and steel. Sickness forced retirement of a high percentage of the working force, but the erection of the light has been proven a necessity to safeguard the sea traffic between Manila and Hongkong and Australia, and the Philippine government kept its forces at the task.

Sea Serpent Has Sheep's Head on Body of Eel

Vancouver, B. C.—A nameless marine creature about six feet long, having an eel-like body and a head re-

sembling that of a sheep, was on display at provincial police headquarters here as evidence of the existence of a "sea monster" which many people have reported seeing in Lake Okanagan, in the Interior of British Columbia.

The strange creature was caught by the young son of Harry Alexander, Vancouver magistrate, while trolling on the lake.

Tales of the appearance of a monster in the lake have been coming from there for two years.

Most Moral Town

Linz, Austria.—This little town, capital of Upper Austria, claims to be the most moral and best governed in the world. Because of the lack of litigation, the law courts here have closed their doors, the police having reported no crimes or misdemeanors of any kind among the 50,000 inhabitants.

The skeletons were lying by the side of a small, well-hidden lake and, until he found them, A. B. Frazer, the prospector believed he was the discoverer of the lake.

Frazer said he was positive no one had visited the lake since the men met their death. The muskets were of a type which has not been used in the North for fifty years. No other articles could be found to indicate when the men died or what caused their death.

Silver Coat for Ivory

Ivory is given a silverlike finish that actually is composed of tiny silver grains, by placing it in a dilute silver nitrate solution, and then in a solution of common salt until it turns deep yellow. Next the ivory is dipped in water, and exposed in the sun until it blackens. On rubbing, the black surface changes to a brilliant silver. Popular Science Monthly

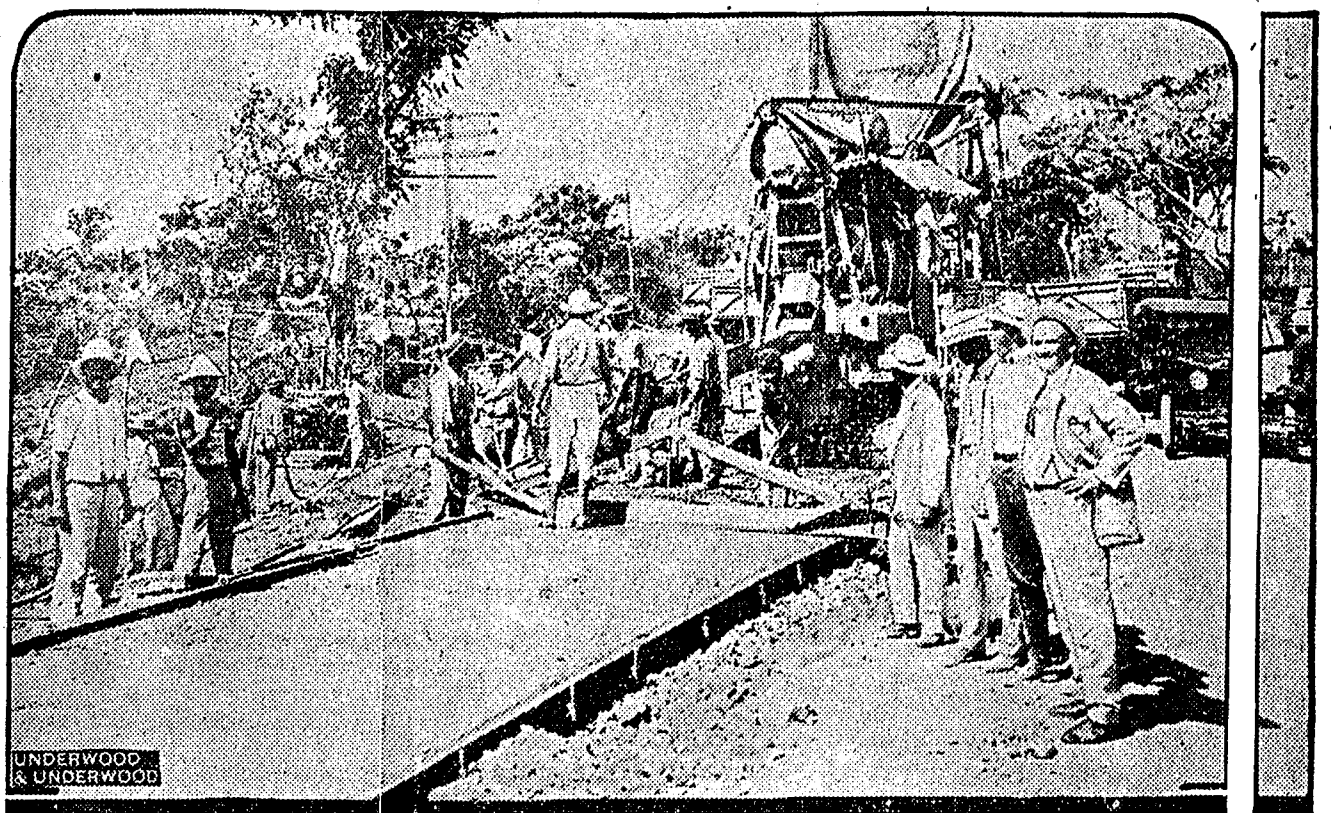

Boy's Common Sense

Where experts failed, the small son of a farmer living near Srananac Lake succeeded. An electric pump attached to a well ceased functioning. An expert from Plattsburg was unable to locate the trouble. Then an expert from the pump factory investigated with similar results. The boy suggested that his father look in the well He did. The well was dry

Cuba Rushes Work on \$75,000,000 Highway

Laborers working on the construction of the Cuban Central highway, which will extend the length of the island from Pinal del Rio through Havana and Matanzas to Santiago de Cuba. There will be no grade crossings and no speed limit. This great highway, which will cost \$75,000,000, will be completed in 1930. The work is being done by American contractors.

West Palm Beach Is Smashed by Hurricane

This picture, sent by telephoto, gives an idea of the way in which the city of West Palm Beach, Fla., was wrecked by the tropical hurricane that swept through the state after devastating Porto Rico and other islands.

Prevent Winter Rodent Losses During the Fall

Farmers in every state face an annual loss running into thousands of dollars each year through the activities of the more common farm rodents—rats and mice. This loss can only be estimated, since it is impossible to get an exact census of the number of each of these small animals existing in each state or to say exactly how much each consumed in a year. The loss is not only in feed consumed, but also in buildings damaged, harness weakened and general depredations of these numerous pests.

Control measures have often been reiterated. Just at present, the one big piece of advice is to get at these pests early in the fall, thus clearing the farm before the cribs are filled with corn and before the ground has become frozen. After the cribs are filled, rats and mice have an ideal hiding place to which they can scur-

ry, once the hunt is on. Boards, boxes and all other places under which the rats and mice may hide will soon be frozen down, making it impossible for the farmer to exterminate all of the pests.

Divine Right

Disraeli, great prime minister of Britain, said: "The divine right of kings may have been a plea for feeble tyrants, but the divine right of government is the keystone of human progress, and without it governments sink into police, and a nation is degraded into a mob"—Exchange.

LEGEND EXPLAINS A PETRIFIED FOREST

Navahos Call Stone Trees Bones of Monsters.

Tucson, Ariz.—The Navaho Indians of the southwest have a strange and fantastic legend to account for the great stone tree trunks whose broken columns strew the desert in the region of the famous petrified forest.

In the early days of the world, the Indians say, the sun did not ride tranquil and undimmed through the sky as he does now. At that time there was a black monster that was continually contesting his supremacy. His name was Yietso, and many were the battles that he and the sun fought. Lived in a Cave.

This Yietso lived in a cave in the big mountains, and from there he would sally forth and contend with the sun. He had long and strongly muscled arms and powerfully clawed hands. And his bones were of stone. When he stood erect he could reach the sun at any place in the sky.

When he was defeated in his fights he would have to rest many days and often even many months before he was able to renew the attack, but he was never vanquished. Also at times during those terrible bouts he would get a finger, hand or limb so broken that he would have to discard it, but he possessed the power to grow a new part in the place of the disabled one. The bones of these disabled, discarded parts, which were of stone, he threw out from the cave over a ridge from time to time as they got in his way, and thus for years and ages the stone-wood accumulated.

At that time a boy by the name of Kee lived in a grass-tied feather home with his mother, Shemah, and his sister, Zonnie. One winter it got very cold. Finally, as they had no fuel, Kee went to the mountains for pitch wood. As the sun set before he reached the forest he slept out where he was. Then on the next day he went into the mountains and found what he supposed was pitch wood, a quantity of which he chopped.

Bones Instead of Wood. When he reached his home it was growing dark the second night. So he slept outdoors in front of his hogan, where Zonnie found him still sleeping when she came home in the morning. She also noticed the wood, just as their grandmother came out of the house. And instead of pitch wood he had brought bones of Yietso; whereupon his grandmother scolded him and told him to throw the bones away.

In time Kee grew to be a great man. Time and again he visited the mountain where he had obtained the bone-wood, and there he prayed to his god and made sacrifice. Then one day he discovered the cave where the monster lived, and at the rising of the sun on the following morning he told him, through prayer, of the beast's abode.

Just as he was telling the sun the news he saw the great black thing leaping above the mountains to the attack. Quickly Kee called the men of his tribe together and they all prayed for the powers of good to aid the sun in this battle against darkness.

Right against the face of the sun leaped the monster. It stretched its fierce arms and clawing hands toward the sun's rim. Then the battle began in earnest. The sun attacked him with his millions and millions of rays, and, aided by the prayers of the then good people of earth, he finally overcame it.

In this battle of all battles the sun's rays pierced Yietso's body, and his blood, on reaching the earth, was congealed in lava flows. Finally he fell back to the earth dead, and the sun mounted triumphantly in the heavens, as he spread his invigorating and cheering light over land and sea. And the Plateau region is still incredibly covered with its bones, called by the Navahos Yietsoitsin, the bones of Yietso.

The Difference

If you talk about live people, that's gossip; if you talk about people long dead, that's culture.—Bridgeport Telegram.

Brass an Alloy

Brass is not found native. It is an alloy of copper, zinc, etc.

Poultry Parasites Destroy Many Birds

High Death Rate Is Caused by Lice and Mites.

Isn't it true quite often many farm dollars grow wings and fly away, without ever having been cashed in by the farmer? Quite a share of these run-away dollars can be chalked to the account of poultry losses.

Specialists of the Wisconsin college of agriculture are convinced that the high death rate and under production which is typical of many flocks in the state is directly caused by lice and mites which pester the birds from the time of hatching to maturity and often cause their deaths at various stages along the way.

A full account of the trouble and how to prevent and cure it is given in a circular "Fight Poultry Lice and Mites." Any Wisconsin resident may secure a copy free by addressing the college at Madison.

In every case, prevention is far better than cure, declare the members of the Wisconsin poultry staff. Although lice are not usually as harmful as mites, many broods of chicks are badly injured by them, and some are killed by the pests. Not infrequently hens desert their nests and their eggs are spoiled simply because of the ravages of lice.

Four different ways of killing the lice are recommended. One is to dust the bird's body with insect powder, or to make it possible for them to take outside dust baths during the summer. Sodium fluoride may be used, with good effect, either as a dust, dip, or a grease, depending upon its preparation. Blue ointment makes an effective grease, they say, and sweet oil is a particularly good remedy for young chicks that are infested.

The "ounce of prevention" law also applies to controlling mites, which are particularly serious pests, having been known to kill young chicks during a single night. Since in day time they hide in the nests and in the cracks and crevices of the roosts and the walls, the best remedy is to paint the roosts and nests with carbolium, or crank case oil.

Many Pastures Improved by Manure Applications

Many pastures have been improved by manure applications, but this method of improvement is not recommended because the manure brings a greater return per ton if it is applied to the cultivated land where it benefits a crop of much higher money value per acre than pasture. However, if enough manure is produced on the farm to cover all the cultivated land once each rotation of three or four years and there still remains a surplus, it is satisfactory to apply it to pasture land.

Another objection to manuring pastures is that because of its relatively high content of nitrogen and low content of phosphorus it produces a growth of the grasses to the exclusion of the clovers, giving a poorly balanced pasture growth. Ordinarily, farm manure carries a plentiful supply of weed seeds which germinate in pastures with annoying regularity.

Lloyd George Is Most Pleasing Red Raspberry

Lloyd George is the most promising new red raspberry, American or European, ever grown on the grounds of the New York experiment station. The plants are hardy, unusually productive, and very healthy. Suckers are produced abundantly and the fruiting row is quickly established. The berries are very large, uniform in size and shape, and do not diminish in size as the season advances. The long, conic berries are medium red in color and firm enough for market to make a most attractive appearance in the basket. The season is three or four days later than that of June and is unusually long. The flavor is sprightly and pleasant and the quality in every respect is excellent. Lloyd George is an English sort, plants of which were introduced by the New York experiment station in 1924. The variety will be offered by the New York Fruit Testing association in the fall of 1929.

Mulch for Raspberries During Growing Season

The most common system of soil management in the raspberry and blackberry patch is to cultivate between the rows and hoe the ground immediately around the plants. The greatest drawback to this practice is that other work is so pressing at times that proper and timely hoeing and cultivation are frequently neglected. In the case of the small or moderate-sized planting, the entire surface of the patch can be covered with straw deep enough to smother out all weeds and grass. This method insures a constant supply of moisture for the plants throughout the growing season and does away with hoeing and cultivation.

Lime for Apples

Lime is one of the best things the apple grower can invest in. After its use sweet clover can be used to reduce the bill for nitrogen. Growers should plan on getting in a car whenever their work will allow them to get it on the ground. It is one of the things which is hardest to get done. Many times the grower will say to himself, "I wish I had a car of limestone here to unload right now while I could handle it."

The DAIRY

CORRECT FEEDING NOW PAYS DOUBLE

"Start now to prepare for next winter's milk checks."

A. J. Cramer, dairy husbandman at the University of Wisconsin, is reminding the members of the state's 167 cow testing associations, that "the feed and care given the dairy herd during the late summer when pastures are short will have a big influence on the production of the cows several months later." This, he feels, "is especially true of the fall freshening cows."

The dry weather during middle summer has resulted in short pastures. As a result many dairy cows are needing additional feed in order to keep up their milk flow and body weight. A drop in milk flow often reduces the income from the herd to such an extent that there is no profit left for the dairyman.

The specialist advises feeding a grain mixture to all high producing cows even on the best of pasture and adds that after pasture gets short all cows should receive grain or silage in addition to the pasture if profitable returns are to be expected. He calls attention to the experience of many of the 4,000 farmers who are keeping close watch of their feeding and profits through cow testing association work.

The cow that is dry and will freshen in the fall is in position to receive the worst set-back from dry pastures, Cramer believes. It is common knowledge to dairymen that if a cow is thin when she freshens her production will suffer during the entire lactation period following. It is just as true but not as generally known that the thin cow will have a lower test than if she were in good flesh while milking. The reduced yield and lower test resulting from a thin condition make it doubly important to keep her in good flesh while dry.

A grain mixture recommended for the milking herd consists of 200 pounds ground barley, corn or hominy, 100 pounds wheat bran, and 100 pounds of linseed meal, cottonseed meal or gluten feed. One pound of this should be fed for each four or five pounds of milk produced. For the dry cow the testing official advises equal parts by weight of ground oats, ground barley, or corn, wheat bran and a high protein feed. From three to eight pounds daily should be fed, depending on condition of the cow.

Lists Seven Problems Imminent in Dairying

Seven important economic problems face the dairy industry today and it is the job of the scientist and teacher to lead in their solution, K. L. Hatch, assistant director of agricultural extension at the University of Wisconsin, told the American Dairy Science association, at its recent meeting in Madison. His list of subjects, toward which more research should be directed, consists of economy of production, herd testing, recognition of quality, establishment of a new set of standards for dairy products, packaging of cheese, and the use of electricity.

"Each of these problems is imminent," he declared, "and should challenge both branches of dairying—production and manufacturing. They are economic problems and can only be solved with facts which are not now obtainable."

In research experiments, more emphasis should be centered on such factors as labor costs, dry cow expenses, depreciated herd costs, bull costs, and capital charges, such as interest, taxes, insurance, and depreciation.

In dairy manufacturing, uneconomical practices still prevail, Hatch said. Small, unsanitary, and wholly inefficient plants are the rule, and little effort is made to give to the consumer the type of product which appeals to his taste.

Dairy Facts

Most cream separators will do a much better job of skimming the milk when it is warm.

The herd bull should be tied up or penned away from the herd until, at least, November 1, as it is very important to avoid having cows freshen during the warm months.

The usual farm-grown ration does not contain enough protein for a good milk-producing ration. For instance, a ration made up of mixed hay, corn silage, cornmeal, oats and bran is lacking in protein, but contains an excess of carbohydrates and fat.

When the milking is done by machine, the rubber tubes and teat cups, after washing, should be placed in a disinfectant solution, allowed to soak until the next milking, and then rinsed out again with clean water before use.

By using pure-bred bulls it is possible to build a herd of scrub cattle into a high quality herd. This has been demonstrated at the South Dakota State college experiment station through approximately 15 years' investigation.

Auction Sale

As my rented farm has been sold I have no use for my personal property, and have decided to sell same at Public Auction, at the Madden Estate Farm located 12 miles Southwest of Sweetwater on surfaced highway. Leave state highway a quarter of a mile South of Sweetwater, turn West and follow the Red Arrows, on

YOU PAY FOR IT ANYWAY

When a man truly needs a thing he pays for it, whether he buys it or not. What he forfeits through getting along without represents values that are the equivalent of money says The Cooperator.

Quite often the saving of a dollar penalizes a man's welfare many, many times more than the mere worth of that dollar.

Take advertising for instance. Men often say, "Advertising costs money!"

The contrary is true: it makes money and it saves money.

When a man goes into business and tells his friends and acquaintances about it, and they in turn tell others, that's advertising—but it is very limited in its scope. Nevertheless—it pays. Advertising through newspapers, billboards, window and store displays, circular and other mediums enables a man to tell of his products to more people in a single day than would be possible otherwise in a whole season.

Advertising reduces the cost of selling. And it increases the total volume of sales. Therefore, it pays for itself. It makes possible a lower price to the consumer. It makes more

SAYS MAN HAS SOUL

Sir William Bragg, who, making his first address as president of the British Association for the Advancement of Science, flatly told a distinguished audience that man has a soul. This was in direct contradiction to the address made last year by the then president, Sir Arthur Keith, who rejected the theory of an afterlife.

Deep Plowing Best by Special Machines

Kind of Outfit to Use Will Depend on Needs of Soil.

Deep plowing can best be done by machines especially designed for that purpose, according to the agricultural engineering department of the New Jersey State College of Agriculture, Rutgers university.

The kind of outfit to use will depend on the needs of the soil. In any case, deep plowing involves a heavy expenditure in labor, and sometimes in equipment, and is only justified when the cost will be amply repaid.

Deep plowing is usually accomplished by means of an ordinary plow, thus bringing the subsoil to the surface. There are occasions when this practice is desirable, but usually it is preferable simply to loosen and stir the subsoil without bringing it to the top.

As the plowing depth is increased gradually at the rate of about one-half inch each year, the problem of turning round and about is solved, and that means a saving in cost

their best work when the plowing depth does not greatly exceed one-half of the width of the plow. For that reason a wide plow should be used for depths beyond eight or nine inches.

Deep tillage may involve merely the stirring of the subsoil or mixing the subsoil and topsoil. The subsoil plow runs in the furrow behind the regular plow and loosens the soil to almost any desired depth. Deep tilling machines are complete plows and may be of either the disk or moldboard type. They usually cut in two stages. I. e., the topsoil is first turned, followed by the subsoil. A depth of 20 inches or even 24 inches may be reached.

The traction necessary for pulling deep tillage machines is ordinarily much greater than for common plows. For this reason tractors are very well suited to this type of work.

Wash and Scald Dairy Utensils After Using

Everything that comes in contact with milk or cream needs washing and scalding after use. Milk contains an abundance of food for bacteria. When remnants of milk are left in the milk utensils they soon sour and produce objectionable odors and flavors. They are breeding places for bacteria and unless removed, quickly and completely, they cause the milk and cream of the next milking to become contaminated and to spoil. No matter how clean and sweet the fresh milk may be, the cream from it cannot reach the creamery in good condition if handled in unwashed and unclean utensils.

After use, the milk pail, strainer, dipper, the separator bowl and all other utensils are best first rinsed with cold water to remove the bulk of milk and cream that adheres to them. Thorough rinsing here makes subsequent washing easy. Then they should be washed with hot water that contains some alkali, such as washing powder. Use brush and plenty of "elbow grease." After washing, they should be rinsed and scalded thoroughly with plenty of boiling water.

Economic Move

The society for the Saving of Time, a newly founded efficiency organization in France, has decided in favor of the shortening of names. It wants to limit family names to five letters and other names to two. In this way, it is declared the business world would save much money in correspondence yearly.

Fair Enough

You can't choose your ancestors, but that's fair enough. They probably wouldn't have chosen you.—El Dorado Tribune.

Deaf Persons as Listeners

The great army of radio "listeners" is being increased by the addition of a great number of deaf persons. The deaf vibrations are conveyed to their ears by the hearing aid.

Questions Asked the Republican County Chairman and The Answers.

Did Hoover have anything to do with fixing the price of wheat during the world war?

Answer.—The late President Wilson under his own signature has said, in a language that can not be mistaken, that Hoover did not fix the price of wheat during the war, and that he gave no advice on the subject.

Did Hoover fix up our food regulations during the war and compel me to eat substitutes instead of bread?

Answer.—Had the war lasted another year the food regulations which were made from time to time would have been absolutely necessary to feed the allied armies and our own boys in the trenches. No one could accurately foretell or guess when the end of the war would come. You ought to be proud of the fact that by your small sacrifice you convinced the allied nations of the sincerity and loyalty of the American people.

The French, Belgian, English and Italian armies were encouraged by your sacrifice, knowing that their food supply would be ample to insure victory in the end. As a matter of fact, Hoover was in Europe during our participation in the war and before, and was distributing American food products to millions of impoverished women and children, and for them, as well as for the armies, he advised conservation of food.

The food regulations were prepared by a non-political commission appointed by President Wilson. The prescribing of the amount of flour and sugar for domestic purposes in the United States was done by the Commission, and not by Hoover. Had you been a profit and could have foretold that the end of the war would come in November, 1918, there would have been no food conservation regulations. Just think, though, what you would have missed. Most of us would never have made any sacrifice for the war and most of us would not have had even a small part in winning the greatest of all wars.

We, who stayed at home, should be proud that we upheld the hands of the food commission. Our sacrifice, small though it was, was made for the sake of humanity, and a most graceful promise to the starving women and children of Europe that a great people, our own, would come to their aid and bring sustenance from our abundance.

Questions have been asked about the prohibition issue, farm relief, tariff, immigration, and on other subjects. Watch and read this column every week before election.

If the reader did not vote in the general election two years ago you MUST register in order to vote. Vote according to your convictions, but VOTE!

Coming to Moscow DR. MELLENTHIN & CO. Specialists

in Internal Medicine for the past fifteen years.

Do Not Operate will be at the Moscow Hotel, Thursday, Nov. 8 Office Hours 10 a. m. to 4 p. m. One Day Only

No Charge for Consultation The specialist of Dr. Mellenthin & Co. is a regular graduate in medicine and surgery and is licensed by the state of Idaho.

He visits professionally the more important towns and cities and offers to all who call on this trip free consultation, except the expense of treatment when desired.

According to his method of treatment he does not operate for chronic appendicitis gall stones, ulcers of stomach, tonsils or adenoids.

He has to his credit wonderful results in diseases of the stomach, liver, bowels, blood, skin, nerves, heart, kidney, bladder, bed wetting, catarrh, weak lungs, leg ulcers, rheumatism, sciatica, and rectal ailments.

If you have been ailing for any length of time and do not get any better, do not fail to call, as improper measures rather than disease are very often the cause of your long standing trouble.

Remember above date, that consultation on this trip will be free and that his treatment is different.

Married women must be accompanied by their husbands. Address: 224 Broadway Bldg., Los Angeles, California. 42-2p

LOCAL NEWS

While making a hurry-up trip to Spokane Thursday night of last week, Dr. McKeever ran a race with a coyote. The speedometer in his car registered well over 50 miles per before he overtook the unfortunate varmint. He sent the pelt away to have it tanned.

Kester Dammarell, who is assisting at the State Bank of Craigmont, spent the week end here with his family.

Mr. Delano went to Spokane over the week end on business.

Mr. and Mrs. Leon Follett of Genesee spent Sunday in Kendrick at the home of their daughter, Mrs. Jack Barnes.

N. E. Walker and A. G. Wilson attended the grand lodge of Oddfellows at Moscow, Tuesday and Wednesday, as delegates from Kendrick lodge.

Mrs. O. E. MacPherson and son, Jerrold, went to Moscow the first of the week where "Jerry" attended the baby clinic.

Mrs. Egnaz Flaig of Orofino and Mrs. Robert Spencer of Moscow are visiting their parents. Mr. and Mrs. George Leith.

Mr. and Mrs. William Watts and two sons went to Deary last Sunday to spend the day at the home of Mr. and Mrs. John Waide.

Former governor C. C. Moore, in company with W. B. Kinne of Orofino, were Kendrick visitors Wednesday. From here they went to Leland where they spoke at a republican rally.

Everett Fraser and his younger brother returned Sunday from a two-week's hunting trip in the Selway country. They each got a fine deer.

The Presbyterian ladies aid will meet at the home of Mrs. Ben Cummings this afternoon at 2:30.

Mr. and Mrs. Dave Genrty drove to Spokane, Sunday, returning Monday.

Mr. and Mrs. Wade Keene and children, Miss Marjorie Davidson and Mrs. Thorvald Nelson were Moscow visitors, Saturday.

Miss Mildred Holt spent the week end in Lewiston with her sister, Miss Dorothy, who is attending the Lewiston State Normal.

A full house greeted the showing of the All-Idaho moving picture here Monday night. Those who attended were well pleased with the production.

Notice to The Public

Spectators are asked to please keep away from high school football practice, but are cordially invited to attend all games.

SLAYER OF BOYS?

Gordon Stewart Northcott, arrested in Canada as the murderer of four boys whose graves and bones were found on the Northcott chicken ranch near Riverside, Calif.

Unfortunate Oversight

A would-be bridegroom of Los Angeles found himself in the predicament of having been married in a fashionable wedding in a church filled with society folk, only to discover after the ceremony that he had forgotten to get the marriage license. The pastor immediately cut the knot he had tied; the prospective bride was hustled home by her father; the bridegroom frantically canceled reservations for train and hotel accommodations and then camped on the license bureau doorstep to complete the formalities at the earliest possible moment.

Open Optical Parlors

The Northern Idaho Optical Co. has opened its parlors at 700 Main St., Lewiston, Idaho, opposite the Breier Building under the supervision of Dr. R. A.

Funk, who received a lifetraining and practice in optics in New York City and Western States.

Having the only surface grinding plant in operation in northern Idaho, they are able to give quick and accurate service at a reasonable price.

They are giving 10 per cent discount on all optical work until November 1st and are making a special item in having their expert straighten your glasses free of charge. 42-4

Methodist Church Notice

The special meetings at the Methodist Church is making progress and will continue to do so for ten nights. Come and hear Rev. Gallaher, the evangelist. You will enjoy his sermons. L. E. Taber, Pastor.

Notice

Please keep in mind that the M. E. Aid will serve you a first class dinner at the Commercial Hotel, on election day, November sixth. 42-1t

Presbyterian Church Notice

We were very much encouraged last Sunday, both the Sunday school and preaching service were very well attended and we are urging a still larger attendance next Sunday. Can we count on you to help swell the number? Sunday school at 10 o'clock, Mr. Emery, superintendent and competent teachers for all the classes. Morning worship at 11 o'clock. We extend a cordial invitation to the public. N. E. Franklin, Minister

Juliaetta News

G. Bowen is home for a short visit.

Miss Harriet Noble, who is attending the university at Moscow, was home over the week end.

A party was given at the Methodist church Friday night. A program furnished by local talent was enjoyed by all, especially the reading given by Mrs. Nutt entitled "My Visit to New York", for which she appeared in old fashioned costume.

Mrs. Nutt, Mrs. Adams and son, Keith, Miss DuBois, Miss Stump and Miss Weitz motored to Lewiston, Saturday.

Mrs. Nutt enjoyed a visit from her sister, Mrs. E. J. Henriks, Mr. E. J. Henriks and Miss Loretta Anderson of Rockland.

Mrs. Ruth Houck was a Lewiston visitor, Friday.

Mrs. S. Grnell went to Moscow, Monday, to attend the annual Grand Lodge of the Rebekah's. Gladys, Alice and Fay Cochran visited the week-end with their aunt, Mrs. Ed Kent near Crescent.

Mrs. Wilkens and daughter, Josephine, motored to Lapawi, Sunday.

Miss Clea Gallaher visited her sister in Clarkston over the week end.

Chas. Gallaher visited his parents last week. He went to Clarkston, Friday.

The Juliaetta Cannery closed its run on tomatoes, Monday. It is now closed for the season.

Texas Ridge News

Mrs. Aubrey LaBolle left Friday for Pierce City to visit over the week end with her sister.

Mrs. Viola Baker entertained company from Elk River, Sunday.

Mrs. Ogden had the misfortune of running a rusty nail in her foot, Sunday.

Alonzo Brown of Lewiston spent the week end on the ridge. He was accompanied to Lewiston by Mr. Jack Bailey and Albert Dahlgren.

Harry Baker and family visited at the C. O. Carlson home Sunday.

The Ellwood school house is receiving a new coat of paint. Mr. Carl Johnson is doing the work.

Mesdames Drury, Dory and Schultz were dinner guests at Mrs. Chas. Avery's in Deary last Wednesday.

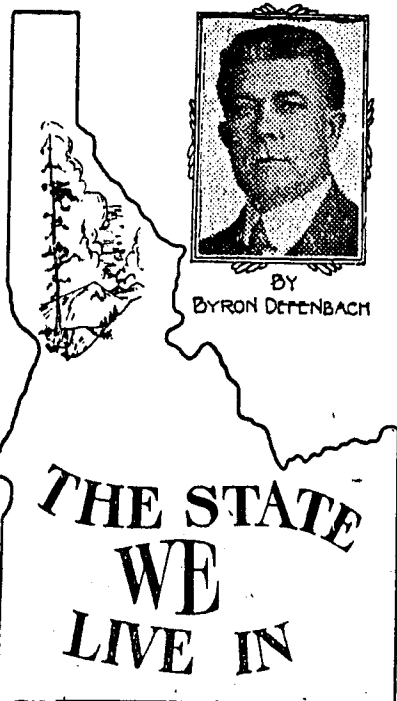

Mr. and Mrs. Ford Drury of Deary were visiting at the Geo. Drury home Sunday.

Mrs. Babcock and Mrs. Adams were callers at Mrs. Ogden's Monday afternoon.

Mr. and Mrs. L. K. Dahlgren were Sunday dinner guests at the T. LaBolle home.

Mr. and Mrs. George Carr of Deary were visiting at the Fred Bailey home Sunday afternoon.

Mrs. Ogden and son made a business trip to Kendrick, Tuesday.

THE STATE WE LIVE IN
Upper Lakes of the Sawtooth
Millions of years ago, glaciers gliding slowly down the deep canyons of the Sawtooth Range picked up great masses of earth and rock, and at their lower and melting ends deposited this material in terminal moranes, forming something like thick dams. Behind these dams the ice turned to water as gradually warming centuries rolled by, resulting in such lower lakes as Alturas, Pettit and Yellow Belly, at elevations around 7,000 feet above the sea.

At still higher altitudes up to perhaps 10,000 feet the irresistible force of these rivers of ice, perhaps encountering softer formations in the rocks, wore or tore great holes in their beds and walls. These holes are known as "cirque" basins. Geology defines a cirque as a deep steep-walled recess in a mountain, supposed to be caused by glacial erosion.

These round or oval basins now contain the upper lakes of the Sawtooth. There are scores of them, ranging in size from 1 to 100 acres. Some of them have been named; Alice, Immogene Edith, Farley, Toxaway, Twin Lakes, Upper Champion, McDonald. Dozens of others are unnamed; still other dozens are unexplored. No two are exactly alike; each seems more beautiful than the other.

Hon. R. E. Thomas, state game warden of Idaho, pays them this eloquent tribute;

"The lake region of the Sawtooth is one of indescribable beauty, with the snow-clad, jagged peaks piercing the sky and living glaciers on their sides pouring innumerable icy torrents into the lakes at their feet. The waters from these high lakes in

BUCKHECT SHOES
All of these shoes sell regularly for much more than our original prices. You can't beat these prices anywhere, not even at the mail order houses.

Buckhect Apache Pac
Men's chocolate oil tan 8-inch blucher, Good-year welt, two full oak soles, leather lined vamp, Munson last and plain toe, for only **\$8.43**

Buckhect "Brute"
Chocolate oil tan 14-inch blucher for men, with Goodyear welt, Munson last, plain toe, single oak sole with tan Huntington long wear top sole and rubber heel, for only **\$8.93**

Buckhect "Brute" No. 286
Men's brown elk bluchers, Goodyear welt, Munson last, plain toe, in chocolate tan for wet weather use. Riveted top sole and rubber heel, only **\$5.83**

KENDRICK STORE CO.
"The Quality Store"

turn cascade down through tortuous canyons supplying the lower and larger lakes, where Nature has created an outdoor land second to none in the world." These waters were partially known to white men at least as

early as the '60's, but it was not until 1878 that the discovery of rich ore deposits near Hailey brought the prospector on his tireless quest into these remote places. For the next ten years these hills were full of men "and mules."

phantom lake, hiding among the ghostly ghastrly peaks, seeing the sun it may be for only an hour each day. Twilight comes on in early afternoon. In the dim light the stag comes down to drink his fill. A trout rises languidly to some hovering fly; the ripples die out. Silence, the silence of the ages, rests among the everlasting hills.

Thus in summer, a short brief summer. If winter comes, spring will be far behind.

Tonight & Saturday
FLORENZ ZIEGFELD'S
STARRING **EDDIE CANTOR** WITH **CLARA BOW**, **BILLIE DOVE**, **LAWRENCE GRAY**
A FRANK TUTTLE Production
PRESENTED BY **ADOLPH ZUKOR** AND **JESSE L. LASKY**
A Paramount Picture

Here is a comedy drama that takes the cake. It is entirely different from anything you ever witnessed. There's more laughs in a minute than there are pills in a drug store. Be sure to see it.

Adults 35c, Children, under 12 years, 10c

The New Kendrick Theatre

Cletrac
I'll Give \$100.00
Mr. FARMER! Listen! Would you accept \$100.00 if I were to give it to you?

With every Cletrac sold I will give a new Bean Cultivator worth \$100.00, and guarantee it to do perfect work—better than you can do with any horse-drawn cultivator. With it you can cultivate 75 acres per day as easy as you go over 5 acres with a team of horses.

If the cultivator does not do the work as well as you want it to do, I will take it back and pay you \$100.00 cash. Then you will have your tractor for \$1850 instead of \$1950.

Remember we are right here to give you the best of service with your Cletrac—and will stay here. Service is at times worth many dollars to you when you need it.

Nearly 100 Cletracs which I have sold in the past four years are all going fine with very little expense.

See me if you want to put in bens with a Cletrac. I have many used tractors of various kinds and prices.

W. F. Behrens
Cletrac Dealer
