

## JUST IDAHO

By Guy Flenner

### Real Aid For Agriculture

There is substantially no conflict between science and religion. One proof of the correctness of the statement is found in the fact that some of the world's leading scientists are firm believers in the doctrine of immortality of the soul and in the existence of a Supreme Being. If they differ from other religionists at all, it is along dogmatic angles.

There is no reason for a conflict between science and agriculture, although there are many well meaning farmers who scout the efforts of scientists to aid in the solution of agricultural problems and who resent what they term the "intrusion" of university extension activities and so on.

The writer was riding through a part of Idaho recently on the train talking to a chemist, also a practical farmer. We had passed huge stacks of straw and great fields of corn, the ear-denuded stalks broken and abandoned in most cases—left to rot. "Some day all this waste will be converted to profitable use," said my farmer-scientist acquaintance. "Experimentation to that end has already rapidly advanced. The national bureau of standards has made some revolutionary discoveries. It has been disclosed that corn stalks can be profitably utilized in the manufacture of paper and that straw can be converted similarly into tar, illuminating gas, acetic acid, wood alcohol, and synthetic lumber.

"With 16,000,000 tons of corn stalks left each year on our farms that can be converted into 8,000,000 tons of paper it should not be difficult for the lay mind to grasp the wonderful possibilities in sight for agriculture through the application of scientific processes to its needs."

Chemistry's aid for the farm is as practical as it will be sure. With corn stalks being turned into paper in eight hours and straw and other elements now mostly wasted utilized for the production of commercial necessities, agriculture is given far greater assurance of effective relief than congress can offer, admitting its earnest desire to help.

The packing business in this country was of no great importance until the waste was utilized, following the demonstrations of science. Today the business is more profitable because of the by-products than because of the beef, pork, or mutton.

Evidently a similar evolution is just around the corner for agriculture, which will make it independent of many agencies now heavily leaned on, notably politics.

### OUR SCHOOLS

Idaho people are proud of their schools and are making them larger and better as fast as conditions will permit. All over the state the people are courageously adding to their taxes by voting bonds for schools.

These loyal supporters of education realize the immense value to the community, the state and the nation, perhaps only in a general way, however. For that possible reason we will give them some strong supporting figures.

Out of 5,000,000 uneducated men or women, 31 achieve distinction in business, science and the arts; of 33,000,000 with common school education, 808; of 2,000,000 going no farther than the high school, 1245, and out of 1,000,000 with college education 5768 achieve such distinction.

The grade schools and the high schools are the feeders of the colleges and lay the foundation for natural achievement.

Idaho produces quantities of solanum tuberosum. It is allied to several powerful narcotic stimulants, such as tobacco, henbane and belladonna, as well as such esculants as the tomato and egg plant.

## Two Ballot Boxes Will Be Used

In accordance with a law passed by the last legislature, the voters at the coming general election will be handed two separate tickets, one containing the names of the candidates to be voted for and the other the eight constitutional amendments which are to be voted upon at the same time.

There will also be two separate ballot boxes used at this time, one for the regular ballots containing the names of the candidates and the other for the constitutional amendments.

Those responsible for the two tickets hope by that means to get a fuller expression from the voters on the amendments than they would were they printed on the regular ballot, as has been done in the past.

Those in a position to know say that all the measures are good ones and should receive a favorable vote.

Members of the Presbyterian Sunday school and their parents will have a Hallowe'en party in the basement of the church, Friday evening, October 26, at 7:30. Those who like may come in costume. Please come to the basement door.

### Galloways Entertain

Last Saturday evening and Sunday Mr. and Mrs. Hiram Galloway entertained a number of friends at their home. Those present Sunday were: Mr. and Mrs. Thorvald Nelson, Mr. and Mrs. Wade Keene and family, of Big Gear Ridge; Mrs. Jim Benjamin and daughter, Miss Helen Emmett, of Little Bear Ridge; Miss Mabel Weaver of Lewiston; Mr. and Mrs. Wm. Watts and family, Misses Rilla and Marjory Davidson of Kendrick; Mr. and Mrs. Walter Benseoter and son, Mr. and Mrs. Harry Benseoter and family and Norla Callison of American Ridge. Everyone had a very pleasant time.

### Optimists

Yes, Smith is an optimist—he went into a lottery where the first prize was a motor car and immediately started building a garage.

"That reminds me of Jones—he hadn't a penny left at the end of the month and so went into a smart restaurant and ordered an oyster supper—he reckoned on paying the bill with the pearls he found in the oysters."

—Pittsburgh Sun-telegraph.

And that is that—simply the potato!

The spud has an interesting history, not so much so as its financial history, but consuming just the same. The name is derived from the Spanish "batatas" and was first applied to the sweet potato in the middle of the seventeenth century. It is a native of the tropical valleys of Mexico, Chili and Peru, and in the latter country still grows wild. It was carried from Peru to Spain in the sixteenth century and brought by Spanish explorers to Florida thence entering Virginia. It acquired no importance either in Europe (excepting in Ireland, where it was nourished as a buffer for famine), or in this country until the eighteenth century—but look at it now, the universal food of rich and poor.

In Idaho the potato has contributed heavily to the wealth and progress of the people, albeit there have been years when the growers could not bank much from its growth. Taken in 10-year periods, however, the potato has paid. We have that from men who have made it their business for many years.

That is true of any crop intelligently grown in Idaho that forms part of humanity's rations. Those who stayed with it year in and year out have made money.

So here's to the humble spud! May it grow larger and more toothsome! By any other name. Latin or otherwise, it is still our friend.

## NEWS FROM THE KENDRICK SCHOOLS

### Daily Doings in the Grades and High School

**Kendrick Holds Potlatch 20-6**  
The "black-jersied" eleven of Kendrick held the fast Potlatch team to a score of 20-6 in the game at Potlatch last Friday.

In the second game of their lives the plucky Kendrick team went up against a team that earlier in the season, held the Moscow H. S. to a tie, and came away with one touchdown to its credit. Potlatch made its three touchdowns during the first and second quarters while the Kendrick boys were still "green about the eyes." When the first stages of fright were worn off, the Kendrick squad began to show its ability and Potlatch failed to make another score.

The score for the K. H. S. team came in the 3rd quarter when Don Brocke intercepted a forward pass and ran thirty yards for a touchdown.

Once again the local team threatened the Potlatch goal posts when Don Brocke got away a second time on an open field but the ball was declared by the referee to be dead.

In spite of the defeat Kendrick people can well be proud of the splendid showing which the team made.

The line-up for the game was as follows: Full back, Eichner; quarter back, D. Brocke; right half back, Chas. Davis; left half back, Ingle; center, Jones; left guard, Long; right guard, Bailey; right tackle, Morey; left tackle, Foster; left end, Craig; right end, W. Brocke; Subs. H. Dammarell, Ware, Plummer, Carl Davis.

Claud Woody, who was injured some time ago in practice, accompanied the team.

### Kendrick Plays Lapwai Today

The Kendrick squad will play the Lapwai eleven here today. The "dope sheet" is pointing to Kendrick as the probable winner.

This contest promises to be an interesting battle since both teams have been getting considerable experience in football strategy from their recent encounters with rival schools.

For an inexperienced team, the Kendrick line is showing up as one of the best squads in the district.

The senior girls chaperoned by Superintendent and Mrs. Beardsley attended the game at Potlatch last Friday.

Because of the game with Potlatch last Friday, the Senior Program was postponed.

Monday, Oct. 21, began the second six week period at the high school. Report cards were given out Friday.

### Wins Proficiency Award

Doris Emery is the first student in the high school commercial department to win the Underwood Proficiency Certificate this year. To be eligible one must write 30 words per minute for fifteen minutes without making more than five errors.

### Honor Students

The names of all students having an average of 90 or above for the first six weeks were placed upon the new honor roll posted in the assembly.

The Freshmen and Juniors tied in the percentage of members eligible for the honor while the Sophomores and Seniors fell far behind.

The following students' names appeared: Seniors, William Ingle; Juniors, Marjorie Davidson, Doris Emery, Helen Emmett; Sophomores, Eldwa Janes and Lillian Long; Freshmen, Edna Bolon, Burneda Cummings, Nona McAllister, John Plummer; Honorable mention, Harley Eichner, Daniel Lyons, Raymond Lyons.

The honorable mention are those carrying five subjects with four of them above ninety.

The primary room was pleasantly surprised Tuesday afternoon after recess, when Mrs.

## Constitutional Amendments

In addition to choosing national, state and county officers at the November 6 election, Idaho voters have the extra job of deciding whether or not they desire to add eight amendments to the state constitution. These proposed changes will bring it up to date so it will fit into the present economic situation.

Fred E. Lukens, secretary of state, has the job of advertising these proposed amendments in a newspaper in each county of the state and, feeling that the legal wording of the documents as they are advertised might not be entirely clear, he has given an interview explaining each.

One of the most important ones pertains to the investment of school endowment funds of the state. Under the present constitution these funds may be loaned only on first mortgages on improved farms in Idaho or invested in state, United States and Idaho school district bonds. The amendment asks for an enlargement of the investing field to include city, county and village bonds of Idaho.

A great many states have four-year terms for their elective officers and one of the proposed amendments asks that the terms of Idaho's state officers be fixed at 4 years instead of two.

Amendment number three provides for paying the salaries of all state elective officers monthly instead of quarterly.

Amendment number 4 asks that all county officers and their deputies be paid monthly instead of quarterly.

Amendment number five proposes to give the legislature power to fix the salary of a prosecuting attorney in a county at an amount which would bear some relationship to the size of the county and the amount of work required. The present constitution fixes the limits between \$500 and \$1500.

Amendment number 6 proposes to give the legislature power to name officers, other than the county treasurer, as tax collectors. It has been found by experience that assessors are often able to collect personal property tax at the time they assess the property which tax would be lost through the property being moved by the time taxpaying time arrives.

Amendment number 7 gives the state right to regulate and limit the use for power purposes of unappropriated water in any natural stream of the state.

Amendment number 8 proposes to settle an economic question by raising the pay of legislators from \$5 per day to \$10 with \$600 as the maximum amount for any one session.

### Sues For Divorce

Othar Thomas has filed a petition for divorce from Stella Thomas, claiming the defendant refused to care for him when he was sick and that she has left him to live at Chippewa Falls, Wis. The couple were married April 24, 1928. Attorney Oppenborn of Kendrick is representing Mr. Thomas.

### He Is Him

"So your name is George Washington," mused the old lady. "Yessum," replied the small colored boy. "I'll just bet you try hard to be like him, don't you?" "Lack who?" "Why, like George Washington, of course." "Ah kaint' help bein' lak Jahge Washington, couse dat's who I is."

Dr. McKeever was transacting business in Lewiston the first of the week.

Dammarell sent Quentin's birthday cake up to be served to the children. It was a pretty white cake all ablaze with seven red candles and was much enjoyed by the pupils. They played games and sang Quentin's favorite songs in honor of his birthday.

## HAPPENINGS IN THE CAMERON SECTION

### Interesting News From This Live Little Village.

Albert Schultz and family were guests at the home of Mr. and Mrs. Herman Wolfe, Sunday.

Do you know your school? Mrs. Carl Hartung has been helping her daughter, Mrs. Wm. Wolfe, the past week.

What things are taught in your school?

Mrs. Frank Wilken and children, were visitors at the home of Chas. Schultz, Sunday.

Is your school keeping step with the modern trend of education?

Twenty-six friends and relatives were dinner guests at the home of Jake Berriman, Sunday.

Is your school in need of anything?

Mr. and Mrs. Reiche were dinner guests at the home of F. W. Newman, Sunday.

Is your teacher qualified to teach your children?

Mrs. Fred Silflow and son, Harold, visited with friends at Nezperce over Saturday and Sunday.

What are you doing to better home, school and community conditions?

Mrs. Emma Bruntsiek spent the latter part of the week in Lewiston, visiting her mother and sisters. Her grandson accompanied her.

Are you interested in the education of your children?

Mr. and Mrs. George Ehlers and Mr. and Mrs. Carl L. Wegner were in Lewiston, Friday.

Is your community dead or dying for lack of better social conditions?

Bill Mielke, Herman Silflow, George Larson and Fred Newman returned Friday evening from a hunting trip into the Selway. Each brought back a fine deer.

Are you fully acquainted with your teacher, school and its work?

Mr. and Mrs. A. O. Wegner and sons, Harry and Robert, spent the week end in Lewiston?

Are you interested in school affairs?

Mrs. Ida Stoneburner, Miss Emma Hartung, Mr. and Mrs. John Schwarz and son, Ernest, were in Lewiston, Saturday.

How are the hygienic conditions of your school?

Mr. and Mrs. George Ehlers and Mr. and Mrs. Herman Ehlers were in Deary Sunday.

Can you help to improve the home conditions of the children of your district?

Mr. and Mrs. Fred Mielke were in Lewiston, Thursday.

Are you interested in social gatherings?

Mr. and Mrs. John Schwarz, Mr. and Mrs. Fred Mielke, Herbert and Marie Schwarz and Edwin Mielke spent Sunday evening with Mrs. Stoneburner and Emma Hartung.

Is there a close co-operation between the home and school?

Carl Koepf and family visited with Henry Brammer's, Sunday.

Mr. and Mrs. Gus Kruger and daughter, Rosalie, spent Sunday at the home of Amos Specker.

Mr. and Mrs. Jack Bechtol of Lewiston called on Mrs. Emma Bruntsiek, Sunday.

Herbert, Ernest and Lawrence Schwarz and G. F. Cridlebaugh spent Sunday afternoon hiking in the hills near Cavendish.

"Grandma" Schultz visited with Mrs. Fred Mielke, Friday.

On Tuesday evening, October 30, the pupils of the Cameron school will present a Hallowe'en program and conduct a pie social for the purpose of raising funds for needed equipment. The ladies are requested to bring pies the gentlemen their pocketbooks. No admission will be charged. Come and enjoy the evening with us. At this time a local chapter of the Parent-Teachers Association will be organized.

Do you want your community to be a progressive one? If so, be present and "do your stuff".

Jack Barnes, Silvie Cook and Tony Eichner spent the week end in the Salmon river country hunting deer. Their time was very limited and they returned empty handed.

## ITEMS OF INTEREST FROM SOUTHWICK

### Written For Gazette by Special Correspondent.

Fred Gebre and wife and Mrs. Attlee Mustoe spent Tuesday at the home of John Stalnaker.

Clarence Hewitt and family spent Sunday in Lewiston attending the Air Derby.

Henry Berriman and wife and Ord Marshall and wife of Walla Walla; Edgar Lincoln and wife, Fred Hassinger and wife of Gifford, Wm. Berriman and wife and Doc Betts and family were the guests of Jake Berriman family Sunday.

Floyd Russell and wife went to Lewiston Sunday, returning home the next day.

Mr. and Mrs. John Hewitt spent Tuesday at the home of their son, Clarence.

Clarence Henderson and wife of Potlatch spent the week end with home folks.

Jim Cook of Leland is moving to the place owned by Mrs. R. M. Wright in the timber.

Homr Betts and wife spent Sunday at the home of his mother.

Howard Southwick has rented the Heath place adjoining him and is now at work plowing it.

Homer Betts was a business visitor in Peek, Monday.

H. Jones of Elk River spent the week end with his parents, leaving for Lewiston, Sunday evening.

Miss Jane Ziemann, who is attending school in Lewiston, spent the week end with her parents.

Mr. and Mrs. Carl Koepf and son and Grandma Brammer, spent Sunday afternoon at the home of Henry Brammer.

Word was received that Mr. Ed Pompe of Albany, Oregon, had passed away at his home the first of this month. Mr. Pompe will be remembered by his many friends here as he used to live here several years ago.

Arthur Locke and wife of Leland spent Sunday at the home of George Jones.

Wm. Henderson and family, Elton McCoy and wife and Clarence Henderson and wife were the dinner guests of Mr. and Mrs. Milton Benjamin, Sunday.

Arnold Cuddy and wife and two sons spent Sunday in Lewiston.

Miss McCollum spent the week end with her parents in Orofino.

Gorden Harris and family attended the sale at the Madden place in Tammany, south of Lewiston.

Mrs. Armitage and children went to Spokane Friday evening, returning home Sunday. They were accompanied home by Mrs. Elbert Armitage, who will visit here for a few days.

### Grades Entertain

Please, readers of the Gazette, do not forget that the fifth, sixth, seventh and eighth grades wish you to keep Wednesday, October 31, open for their entertainments, which will be given at the New Kendrick Theatre at 8 o'clock. Now listen! You shall not be sorry if you come. The city band has even offered to play for us. The program is as follows: Two numbers by the band.

"Our Idaho", song by the chorus.

"Shadows on the Moon", play-lette by fifth and sixth grades.

"Hallowe'en Song", "Whistle Your Cares Away", songs by seventh and eighth grade chorus.

"Turning The Tables", play-lette by five girls.

"Quack, Quack", song by mid-get quartet.

Selection by the band.

"What Happened at Brent's", two act play by seventh and eighth grades.

Selection by the band.

(there zru, h: Hoover was elected president by the members of the fifth and sixth grades last Friday afternoon. Hoover and Curtis received twenty votes. Smith and Robinson, eleven. The purpose of this election was to teach the children how elections are conducted, what is meant by going to the poles, casting a ballot, canvassing votes, etc.

## Boy's Leather Helmets

The Hit of The Season

We have them at \$1.50 and \$1.19

## Pendleton Indian Robes

See our display of these beautiful robes.

## New Stock of College Girl Foundations

for your choosing, consisting of Bandeaux, Girdles, Combinations and Corsets.

## SPECIAL

2 Pounds of Tru-Blue Fancy Cookies

# 58c

These cookies sell regularly at 40c per pound.

## Wright's Smoke Salt

You will soon need Smoke Salt to cure your meats. This is a sugar cure smoke and we think it is one of the best on the market.

The Home of Good Things to Eat and Wear

### THE KENDRICK GAZETTE

"The Pulse of The Pocatoh"

Published every Friday at Kendrick Idaho, by

Ralph B. Knepper

Subscription Price \$1.50

Entered at the Post Office at Kendrick as second class mail matter.

#### Crescent Clippings

Sunday guests at the Kimbley home were: Mrs. Chas. Keeler and children, Mrs. York Martin and baby, and Mr. and Mrs. Lockhart of Linden, Mr. and Mrs. Mike Forest and children, Mrs. Gus Farrington and children, and Mrs. Bill Dorendorf and baby.

Mr. and Mrs. Aaron Wells and children and Mr. Hunt of Moscow were Sunday visitors at Frank Souders home.

Wm. Kauder, A. Dorendorf and Henry Loesser were Southwick visitors, Monday.

Mr. and Mrs. Roy Drury and children and Mrs. D. J. Hammond motored from Spokane, Saturday night to the John Darby home. They returned to Spokane Sunday.

Mr. and Mrs. Roy Southwick and family and Lloyd Slatter visited at the Wm. Kauder home Sunday.

Mr. and Mrs. Oral Craig and family of Leland visited Mr. and Mrs. M. L. Robeson Sunday. Mr. Robeson accompanied them home.

Gus and James Farrington, Albert and Bill Dorendorf; Jim, Mark and Zeb Robeson and Clem Israel left Saturday for a hunting trip to the Selway. They expect to be gone about ten days.

Mrs. Albert Dorendorf and sons left Saturday for a visit with Mrs. Dorendorf's sister, Mrs. Francis Stephens at Orofino.

Eva Slatter visited with Lottie Chaldek over the week end.

Mrs. M. L. Robeson and daughter, Sue, Mrs. Frank Souders and sons visited at the Axel Eckman home, Saturday.

Sunday guests at the A. Dorendorf home were Mr. and Mrs. Axel Swanson and daughters, Gloria and Esther, and Mr. and Mrs. Earl Kulick.

Mrs. James Farrington and son are visiting with Mrs. Farrington's parents, Mr. and Mrs. W. L. Hunt of Linden.

Axel Eckman has been on the sick list for some time.

Jake Michaels spent Saturday night at the Frank Souders home.

Andrew Dorendorf spent Sunday afternoon visiting with Mr. Kauder.

Claud Craig took out a bunch of cattle Monday, that he bot from Axel Eckman.

Mr. and Mrs. Ben Huffman, and family, Mr. and Mrs. Bob Smith and children of Leland and Mr. and Mrs. John Darby and daughters visited at the Dick Winegardner home Sunday afternoon.

Miss Slatter is staying at the Wm. Kauder home now.

Mrs. E. J. Wells visited with Mrs. Wm. Kauder, Monday.

#### Texas Ridge News

Mrs. Head returned home from Princeton, Thursday.

Jim Carter and son, Charley, visited at Quesenberry's, Wednesday evening.

Irman Baker had the misfortune to lose a horse last week.

Mr. and Mrs. Babcock were callers at the Mrs. Al LaBolle home Saturday evening.

A number of young folks from here attended the barbecue and dance at Helmer Saturday night.

Mr. and Mrs. Aubrey LaBolle visited Nester Olson family on Bear Creek, Saturday.

Charley Dahlgren and family, and Orval Miller and family visited at the L. K. Dahlgren home Sunday.

Mrs. Dorthy visited her sister in Bovill Sunday and Monday.

Harry Baker and family were Sunday guests at Quesenberry's.

Lloyd Baker of Greer is here visiting relatives.

Mr. and Mrs. Henry Jones of Princeton visited home folks Sunday.

Mr. and Mrs. Babcock were Sunday dinner guests at the Ray Bogar home in Deary.

Mr. and Mrs. Bengé of Avon were at Drury's Sunday getting apples.

Mrs. Taylor and daughter, Ethel of near Deary, were dinner guests at Mrs. Babcock's, Monday.

Mr. Carlson helped Mr. Miller butcher beef, Monday.

## DEARY GARAGE

## FORDSON PARTS

Special tools to give you the kind of service you have a right to expect in our shop.

#### Linden News

Mr. and Mrs. Wm. Zimmerman spent Sunday with Mr. and Mrs. H. J. Starr.

The Weaver young people, Ben Smith and sister, Miss Eva and Miss Popkey attended the Air Derby at Lewiston, Sunday.

Miss Virginia Allen went to Lewiston, Tuesday for a visit.

Mrs. Millie Abrams of Kendrick spent the week end at her home here.

F. C. Lyons and family attended church in Kendrick, Sunday evening.

Mr. and Mrs. Alfred Hudson have moved to Gus Farrington's farm.

Mrs. Longfellow spent the week end at home, returning to Kendrick, Sunday evening.

She is staying with her grandsons, Dan and Raymond Lyons who are attending school at Kendrick.

Mrs. J. H. Hunt, Mrs. Weyen and Mrs. S. E. Harris have visited the school recently.

Alva Hudson left Wednesday for Montana. He made the trip in his car.

Mr. and Mrs. W. L. Hunt and daughter, Zelma, visited their daughter and sister, Mrs. Jacob Peterson at Elk River, Saturday and Sunday.

Grandma Keeler spent the week end with Mrs. Sadler. Mr. and Mrs. C. E. Harris visited his parents at Troy, Sunday.

Mrs. Jim Farrington spent Saturday and Sunday at the Walter Hunt home.

Mr. and Mrs. Joe Perry and children of Troy spent Sunday with Mr. and Mrs. Wm. Sadler.

#### Agricultural Notes

The poulterer who markets only plump, juicy broilers, and attractive, delicious roasters, commands the trade.

The safest procedure of all is to vaccinate all pigs at weaning time. In the long run that is cheap insurance.

Lambs that receive a good supply of milk and grow rapidly are apt to carry the highly prized "milk or baby fat" when they reach market weight.

Soy bean hay is considered a very good feed for horses; in fact, it is in a class with alfalfa and clover hay. If the beans are fairly well matured, horses which are merely being maintained need little other feed.

The term "permanent pastures" commonly includes all the land that is left in pasture year after year for a long time. If it is plowed up once in four or five years it can scarcely be included with the permanent pasture land.

#### Not to Be Laughed At

"Growing pains" in children are the first warning of rheumatism, according to an expert.

# BIG AUCTION SALE

Of Merchandise, Starting

## Saturday, Nov. 3, at 9 A. M.

Included in this sale is our entire stock of Furniture which must be closed out; some Granite Ware, Aluminum Ware, Tin Ware, Ranges, Heaters, and many other articles.

Other Stock will be Reduced 20 Per Cent.

All Merchandise to be Sold for Cash.

The Kendrick Hardware Company

## Mange Mites Are Great Liability

Ailment Has Been of Increasing Economic Importance in Central West.

(Prepared by the United States Department of Agriculture.)  
The practical side of controlling animal diseases and parasites is shown in a report to the United States Department of Agriculture by Dr. J. O. Wilson, a federal veterinary official stationed in South Dakota. Swine mange has been of increasing economic importance throughout the Cen-

tral West with the result that in some localities as high as 40 per cent of the hogs slaughtered show evidence of the presence of the mange mite.

**Affects Vital Parts.**  
Since this parasite affects the parts of the hog that are of greatest value—the hams, shoulders and bacon—packers have been purchasing mangy hogs at a discount ranging from 50 cents to \$1.50 per hundredweight. For a 250-pound hog the actual discount thus amounts to from \$1.25 to \$3.75, depending on the extent of mange present. "This estimate" Doctor Wilson adds, "does not take into account the saving of feed in the fattening of a mange-free hog in comparison with the added time and feed necessary to fatten a mangy hog."

In the endeavor to disseminate such

information to swine growers in their trade territories, progressive commission firms are using rubber stamps bearing the notice:

**MANGY HOGS SELL AT A DISCOUNT**  
of 50c to \$1.50 per CWT.  
Proper treatment of mange infected hogs insures more  
**RAPID GAINS AND HIGHER PRICES**

Briefly, mange mites are a serious liability to the swine producer, as they cause pork products to be classified into lower grades of less value. The losses occur throughout the year, but are somewhat greater during the winter months when control of the parasites by dipping is more difficult. Officials of the bureau of animal industry point out that mange in hogs is readily preventable and control methods are fully discussed in Farmers' Bulletin 1085 which may be obtained on request. In view of the better prices paid for mange-free hogs, averaging about \$2.50 a head over those that are affected by the parasites, the slight cost in labor and material for dipping the average herd is repaid many times.

### Weeds in Waste Places Should All Be Burned

Weeds along fence rows and old pastures and waste places generally can be best burned during the early fall before seeds have formed. Unless this is done the dry seeds hanging on the dead weeds will be scattered long distances over the snow crust during the winter.

A good plan is to mow the weeds close to the ground while they are still green and rake into piles before the seeds have a chance to scatter. Piles about half the size of a hay cock will dry quickly and burn completely. It helps to rake the loose ends into the coals after the center has burned.

### Before Freshening Cow Needs Liberal Feeding

For a month to six weeks before calving the dairy cow should be given all the feed she will clean up. During this dry period she can store up in her body a large amount of nutrients to be drawn upon later during heavy milk flow. It is a well known fact that the heavy milking fresh cow cannot eat enough to supply all the food needed, but has to draw on her body for making milk. The statement that a pound of feed before freshening is worth two pounds after freshening is probably not far from true.

#### Age of the Rockies

The Rocky mountains are fairly new. Scientists know this because they are so steep. Old mountains are more worn down and have lower forms. The growth of mountains is slow. They are not pushed up suddenly in some grand cataclysm, but rise a few inches in 1,000 years.

## DAIRY FACTS

FIX YOUR IDEAL, SAYS DAIRYMAN

Do you know what you want? Dairyman must first answer that question if they are to succeed in developing a good herd of cows, it seems to C. L. Blackman, extension specialist in animal husbandry at the Ohio State university.

Writing in the monthly letter to Ohio dairymen in the 29 co-operative cow testing associations in the state, Mr. Blackman presents the problem this way:

"Probably the first necessity for any constructive breeder is to establish in his own mind the type of cows he is aiming to produce. The several national dairy breed associations have recognized this fact, and in some cases have spent thousands of dollars to establish this type and to fix it in both models and pictures.

"Every practical dairyman recognizes that the purpose of the dairy cow is to produce large quantities of milk and fat economically, and besides this to produce her likeness almost annually, and to continue to perform both functions until ripe old age.

"Sires, accordingly, must come from cows with these characteristics. Of course, in order to produce really great animals the immediate dams in the herd as well as the sires must be good individuals. And the longer one constructively breeds, the fewer cults should appear, since the immediate sires and dams have a larger influence on the progeny than animals farther back."

### Feeds for Use in Winter Require Attention Now

Hay crops have been making a gallant fight for recovery, but the handicap imposed by unfavorable weather last winter and last spring is too great to be fully overcome. It therefore behooves dairy farmers to arrange for supplies of feed so that they may be on the safe side when winter comes.

Andrew Boss, vice director of the Minnesota experiment station, advises farmers who foresee a hay shortage to begin making contracts now for winter supplies. It is probable that the price will be high, he says, but nothing is likely to be gained by waiting. In fact, the trend may be higher and he who waits may have to pay more.

"Live stock can be wintered on good clean straw and on corn fodder or corn silage, especially if they are supplemented with high protein feeds," says Professor Boss. "Good quality hay is, of course, best for keeping up the production of dairy cows, but plenty of straw and corn fodder is much better than no feed at all.

"Prospects are good for a corn crop. Straw is clean and if it is well cared for will make excellent feed. A little extra attention to curing and preserving the straw and corn fodder crops may be the best way out of the prospective feed shortage. Attention to these details during the summer and early fall may save a lot of worry next winter."

### Scours in Young Calves Caused by Indigestion

Diarrhea or scours in calves is caused by indigestion which may be brought on by overfeeding or by feeding milk irregularly. If the diarrhea is not checked it becomes chronic and is hard to cure. When a severe case of scours comes on, the feed should be reduced at once. Give three ounces of castor oil in a pint of milk to clean out the bowels. Follow this by giving a teaspoonful of a mixture of one part salol and two parts of subnitrate of bismuth three times daily for two or three days.

It will be well if the calf gets some fresh milk twice a day, say a gallon at a time, just as it comes from the cow. Take one-half ounce of formalin and mix it with 16½ ounces of water; mix one teaspoonful of the solution with each pint of milk the calf is fed. If you feed a gallon at a time add eight teaspoonfuls of the formalin solution to the milk. It will be well to continue feeding milk until the bowels are normal again.

Do not overfeed, and the feed the calf gets must be the best quality.

### Invert Utensils

Following sterilization, unless used immediately, utensils should be inverted upon a draining rack to dry. An outdoor rack placed in the sun is desirable. With free circulation of air, the utensils will soon dry, checking the multiplication of the few surviving bacteria and insuring that the benefits of the sterilizing treatment will not be lost through further development of bacteria in the moisture inside the utensils.

### Fall Freshening

Fall freshening cows are not so bad off. They freshen at a time when the farmer is not so busy but that he can give them good attention. As a result of good feeding, they keep up their milk production throughout the winter and when they are beginning to drop a little with the advancing milking period, the fresh grass of spring comes along to bolster them up. Under such favorable conditions, these cows produce more milk from one end of the year to the other.

## POULTRY FACTS

POULTRY BREEDS AND HOW CLASSED

Chickens are divided into classes, breeds and varieties. Birds with the same general characteristics are placed in one class. Classes are then divided into breeds. Each breed of poultry is distinguished from other breeds by differences in type. Breeds are separated into varieties. The different varieties of the same breed are designated by differences in comb or color. All varieties of the same breed should have the same general type characteristics.

There are four general classes of chickens that are common and other classes less common.

The American class consists of birds that are of the general purpose type. They have yellow skin and legs, red ear lobes and legs free from feathers.

The breeds that make up this class are: Plymouth Rock, Wyandotte, Java, Dominique, Rhode Island Red, Rhode Island White, Buckeye, Jersey Black Giants and Chanticleer.

The Mediterranean class are smaller than the American class and are often known as the egg breeders. They are nervous in disposition, very active, compactly built, have white ear lobes and clean legs. The breeds that make up this class, are: Leghorn, Minorca, Spanish, Andalusian and Ancona.

Fowls that make up the Asiatic class are large and clumsy, have red ear lobes and feathers on their legs. They are often referred to as the meat breeds. Brahmans, Cochins and Langshans make up the breeds in this class.

The English class, while not as common as the other three already referred to, probably rank fourth in popularity. These birds are medium in size, have red ear lobes, clean legs that are pink in the buff and white varieties and black in the black varieties. The breeds making up this

class are Orpingtons, Dorkings, Red Caps, Sussex and Cornish.

### Selling Squab Broilers During Winter Months

Quite a number of the broiler plants make a specialty of squab broilers, which sell best during January and February. They are grown in about eight to ten weeks, the hatches coming out in November and December, and are successfully raised without any outdoor exercise.

The greatest demand for squab broilers is in spring, when game birds are scarce, and a small bird is in demand in restaurants. They should weigh from three-fourths to one pound, and must be plump. Many who ship squab broilers make a great mistake in sending bony, poor ones. Good returns cannot be expected from poor, scraggy birds, half dressed.

The broiler for the winter market must be attractive looking to command a ready sale at good prices. Plump chickens, neatly dressed, free from pin feathers, with unsoiled skin and with perfectly clean legs, will find a ready sale, while poor stuff goes begging. A fat broiler is quite a rarity. The best that can be done, generally, is to have them plump, for the natural tendency of the chick is to use all nutriment for growth and development. The main point is to grow them rapidly.

To grow good broilers there should be dry quarters provided, thoroughly cooked food, comfortable heat (not too high nor too low), regularity in feeding, cleanliness and good light. The chicks must be induced to take plenty of exercise.

### Early American Stamps

Adhesive postage stamps were issued by several cities of the United States independently of the government about 1845. Well known examples were those of New York city and St. Louis. Stamps of this kind were authorized by congress March 3, 1847.

### Useful Invention

The hydraulic press is a machine by which a slender column of water may be made to raise the heavy weights. It was invented by Braman, in Englishman, in 1786.

**Serious Injury to Alfalfa Crop**

**Bacterial Wilt and Winter Injury Discussed in New Circular.**

(Prepared by the United States Department of Agriculture.)  
 Bacterial wilt and winter injury have caused, in recent years, serious injury to alfalfa in many alfalfa growing sections of the country. The two injuries are definitely distinct, and either may occur without the other, although winter injury frequently gives rise to conditions which make for the more rapid and destructive development of bacterial wilt.

J. R. Jones and J. L. Weimer of the bureau of plant industry are authors of Circular 39-C, Bacterial Wilt and Winter Injury of Alfalfa, just off the press and available for free distribution by the United States Department of Agriculture, Washington.

Bacterial wilt may cause the plant to wilt during hot weather of spring or summer, and under this condition the plants die immediately, resembling plants whose roots have been severed by gophers. More frequently the plants show a characteristic dwarfed condition with foliage pale green or yellow. After each successive cutting the new stems are shorter and eventually the plant dies. The injury is due to bacteria entering the underground parts of the plant, causing alterations which may be observed readily in the roots.

Winter injury is most evident in the taproot, and is characterized by partial destruction of the root and crown bark and a hollowing and decay of the roots. The destruction of the root bark affords easy access for the wilt bacteria. Winter injury results from the killing of buds and parts of the crown and roots by severe cold.

"The most important method of controlling the wilt disease," say the authors, "is probably the prevention of the conveyance of bacteria by water from old diseased plants to young fields, especially in the spring when many plants have wounds. Care should be taken to avoid carrying the bacteria to new fields in fragments of stems of diseased plants, with uncleaned seed, or with manure. If the disease is present in a field, its distribution by the knives of the mower can probably be avoided to some extent by mowing when the plants are free from surface moisture."

The use of hardy varieties of alfalfa resistant to winter injury does not always prevent damage by bacterial wilt, but the authors believe it may reduce loss from this cause.

**Moldy Silage Caused by the Condition of Corn**

Condition of the corn at ensiling time and not poor packing is the cause of moldy and inferior quality silage, according to recent experiments conducted by the Wisconsin Agricultural Experiment station. To eliminate moldy silage, corn should be ensiled shortly after it is dented.

Corn that is over-ripe, wilted or frozen when put into the silo carries large amounts of air. Several days elapse before the oxygen is exhausted in the silage process and it is during this period that molds make rapid growth.

In testing out their theories, the men working on the problem buried three empty crates in silage at varying depths at the time the silo was filled. In late winter or spring, when the crates were dug out as the silage was fed, no signs of spoilage were found around the crates.

**Millet Hay Too Low in Protein for Cow Feed**

Millet hay is too low in protein content to make good feed for cows unless supplemented with high protein feeds. Hence, millet hay does not give good nourishment to cows when fed alone, and this may cause several kinds of troubles in a herd. Millet hay, when cut at proper stage of maturity, is a fairly good hay if supplemented, but if allowed to ripen seed the threshed straw has little value as feed for cows, though it may be used in a maintenance ration for horses. For good quality of seed it should be allowed to stand until about fully ripe, but the straw does not have any high value for feed.

**Agricultural Squibs**

Next to milk, meat scraps or tankage are the most accessible and efficient source of animal protein.

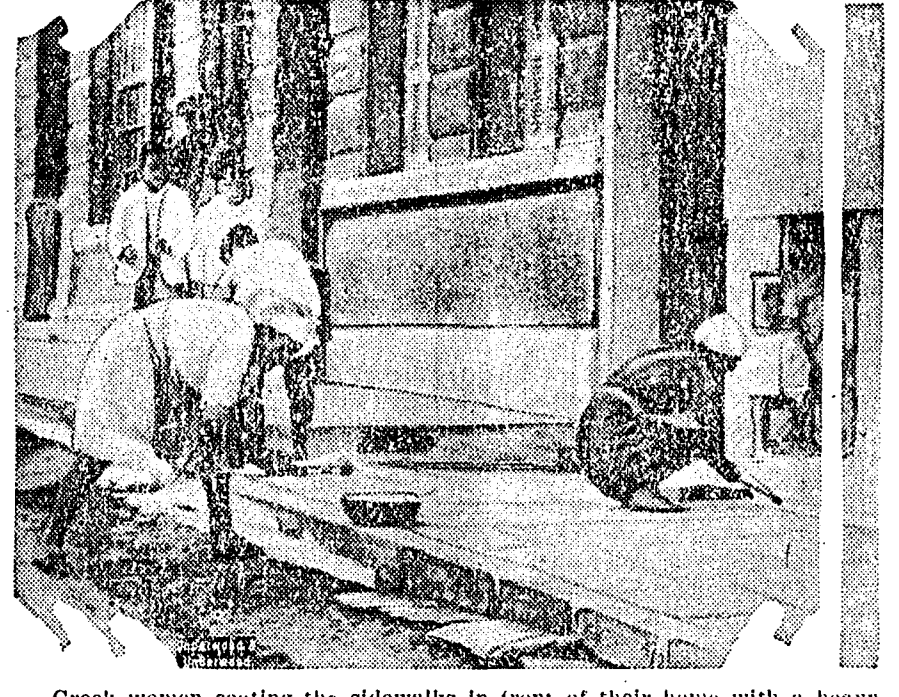

Hog men who do not raise alfalfa for summer, as well as for winter use, are not living up to their opportunities.

In order to insure a good lamb crop the ewes should be turned on fresh pasture a few weeks before breeding, and should be given a little grain.

Sunshine is one of the best disinfectants. Be sure all live stock is getting plenty of this free nature's tonic, especially the young growing animals.

Many people do a lot of figuring to show the increased profit that would come by breeding birds that are heavier producers but they fail to make any additional charge for feed.

**Fighting Dengue Fever in Athens**

Greek women coating the sidewalks in front of their home with a heavy layer of lime as a preventative measure against the deadly disease known as the dengue fever, which has been prevalent in Athens.

**POULTRY PLAN TO FATTEN HOLIDAY TURKEYS**

The marketing season for turkeys is from about the middle of November to the last of December.

Confining turkeys during the fattening season has not proved successful. They will eat heartily for two or three days, but after this they will lose their appetite and begin to lose flesh rapidly. Naturally, they are wild birds and thrive only when they have access to open range. During the summer and fall they find an abundance of feed on the average farm; however, it is advisable to give them a small feed at night for the purpose of bringing them home to roost. Grasshoppers and other insects, weeds and grass seeds, green vegetation, berries and grain picked up in the fields and about go to make up the turkey's daily ration, and when all these are plentiful they are in splendid condition when the fattening season arrives.

A satisfactory plan for fattening is to begin by feeding small rations night and morning, not enough at a time but that the birds will walk away still a little hungry, and gradually increase the quantity, adding some corn, until they are given all they will eat three times a day. Along at the close of the fattening season corn, supplemented with fresh sour milk, may constitute the full ration. New corn may be fed safely provided the turkeys are gradually accustomed to it, otherwise scours may result.

Various kinds of nuts are a natural fattening feed picked up by turkeys on the range. In parts of Texas many growers, properly situated, depend solely on acorns for fattening their turkeys, and when the mast is plentiful the birds are marketed in fairly good condition.

**Use Lights in Poultry House During Winter**

A series of cautions for the user of lights in the poultry house is found in the Ohio state poultry calendar. They are as follows:

Grade and pen pullets according to age, condition, and laying qualities, so that each group may be properly handled.

Excessive fall production makes it hard to keep the flock in heavy production during the winter.

Don't use lights to produce more than a 14-hour day. Excessive use of lights means overproduction, followed by a slump.

To avoid a spring molt, discontinue lights slowly in the spring.

Use lights on breeders only after January 1 to 15, in order to help them back into production.

Don't crowd production over 60 per cent, otherwise the flock will become thin and molt.

Be regular in management and use of lights.

Feed grain liberally when using lights.

Always have feed and water available when lights are on.

Do not turn lights off too early in the spring.

Do not stop feeding early and late in the day when lights are finally eliminated.

**Early Layers Usually Heavy Egg Producers**

Pullets that begin to lay early usually are the heaviest producers in the flock and for this reason it is an excellent practice to mark them so that they can be given due consideration for their performance next year when it comes time to cull the flock. It is pointed out by L. E. Card, of the University of Illinois. Pullets that are extremely late in starting to lay are always certain to be the least desirable birds to use as breeders. In breeding for higher egg production, individuals of this type should be kept out of the breeding pens.

If the early-laying pullets are banded with numbered leg bands, all that is necessary is to make a record of the individual band numbers and the approximate date on which egg laying starts. Another equally satisfactory scheme is to use colored leg bands, in which case a different colored

band should be used to mark the pullets that start laying in the different months.

**Laying Hen Sings**

A laying hen, is usually a singing hen and happiness is encouraged by plenty of good oat or wheat straw on the floor. Practical poultrymen differ as to the respective merits of wheat, rye, and oat straw for litter. Each has been used without any noticeable differences as to wearing and sanitary qualities. Rye straw is somewhat stiff and oat straw breaks rather readily. The best advice is to use what is convenient and keep the house in good sanitary condition.

**Cause of Fowl Typhoid**

Thank your lucky stars if you've never met up with Eberthella sanguinarum. She's the germ that causes fowl typhoid, a most destructive disease. It acts much like fowl cholera, the birds becoming dull, droopy, with pale combs and a greenish or yellowish diarrhoea. Death usually isn't as rapid as with cholera. One mark of typhoid is that the liver enlarges and becomes a brownish or greenish color, while the kidneys look faded, as if cooked.

**Alfalfa Is Favored**

If time is lacking to prepare green feed for chicks, it pays to buy high grade commercial alfalfa leaf meal. A few hundred pounds will furnish green feed for a lot of chicks. Many of the best chick starting mashers contain a little alfalfa meal. These mashers should be used according to the directions of the manufacturers, but chicks on a starting mash containing alfalfa meal often seem to thrive without the other source of green feed. The cost is comparatively small.

**WILL FEED LEGION**

Here's the man who will feed the American Legion at its national convention at San Antonio October 8 to 12. Warrant Officer C. H. Ortman of Fort Sam Houston heads a personnel of 330 cooks and bakers who will prepare the good old army chow and other fixins for Legionnaires and their Auxiliary folks.

**Moving Pullet Flock**

When there are many pullets to be moved it often pays to leave them in the crates over night and move the crates to the laying houses in the morning. Then the poultryman has a better light and can do a better job of culling and treating the birds for lice. As each pullet is taken from the crate, it can be inspected for weight, general health and vigor, and prospective laying ability. All birds that are poor prospects for winter profits can be isolated for future observation.

**Improve Egg Quality**

Much can be done to improve the quality of eggs produced by careful selection of eggs used for hatching purposes. All undersized, misshapen, off-color, and defective shelled eggs should be eliminated from the incubator. By following such a practice for a few years the quality of eggs laid by a flock should be materially improved. Egg dealers are willing now to pay a premium for high quality eggs. It is well to assort them according to size and color.

**Feed to Help Pullets**

If pullets must search for their feed on free range they will probably find

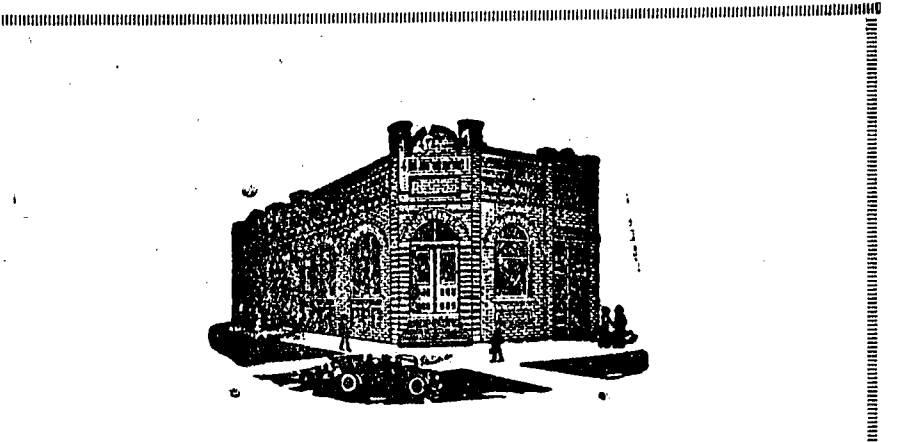

**We Fix Leaky Radiators**

We have installed a complete equipment for soldering leaky radiators and can do a first class job. Don't ruin your motor by running your car with an empty radiator. It's cheaper to have your radiator sold ered.

**Buy Good Tires**

Why are the majority of the motorists in the Potlatch country using Goodyear tires? Because Goodyear tires are good tires and will give you full mileage for your money.

sufficient food for body maintenance, but growth will be slow and egg production will be impossible until late winter or early spring. Liberal feeding of grain and mash containing 20 per cent of high-grade tankage, or in place of tankage all the milk the pullets can drink, will not only reduce the amount of exercise but will hasten growth and stimulate fall egg production.

Plan to give them a clean, permanent location as it is not advisable to move them after egg production begins.

**Farm Notes**

Alfalfa pasture has a tendency to bloat all ruminant animals. Of course, sheep are in this class.

The thin pastures that are well covered with weeds should be moved at least twice during the season.

Legume hay carrying a large proportion of leaves and cured without getting wet, makes a good winter substitute for green feed for poultry.

When lime and phosphorus become low in a soil the clovers are unable to compete with the undesirable grasses and weeds for a place in the flora.

There are many thousands of acres of hilly land in pasture that should have been left in forest. Erosion has started on these and reforestation is the only practical means of stopping it.

Have you provided a place for those early maturing pullets? They will soon be ready for the winter quarters.

**Pruning Small Fruit Is Desirable in Summer**

The question, as far as the desirability of summer pruning is concerned, has only one answer in the berry patch. It is highly desirable.

The old canes, which have borne their crop of fruit, may be removed from the berry patch as soon as possible after harvest. This serves to remove any diseased canes and prevent the further spread of disease. It allows all the energy of the root system to go into the production of new cane growth, upon which the following year's fruit production may be expected.

In the case of black raspberries, the new shoots should be pinched off when they reach a height of about two and a half to three feet. The side shoots may be similarly pinched back, as they reach a length of twelve or fourteen inches.

By following this practice on soil where the canes grow rapidly and vigorously, bushy, productive plants may be expected, and the job will be found well worth while, simply in the greater ease of harvesting the following season.

## Rupture Shield Expert Coming

To MOSCOW, IDAHO, on FRIDAY and SATURDAY November 9th and 10th at the Moscow Hotel from 10 a. m. to 4 p. m. Evenings by Appointment TWO DAYS ONLY  
No Charge for Consultation

The successful expert C. F. Redlich for Scientific Rupture Appliances says:

The "Perfection Retention Shields," hold the rupture perfectly, no matter what position the body assumes or how heavy a weight you lift. They give instant relief, contract the opening in a remarkably short time and strengthen the weak tissues (the real cause of rupture) so that they frequently recover their previous natural retaining power, needing no further outside support. Stomach trouble, backache, and constipation often caused by Rupture promptly disappear.

Truly remarkable results have been obtained with recent and not yet fully developed ruptures and many old ones also. Surgical Corsets and Abdominal Supporters for falling organs, obesity, navel and stomach-ruptures expertly made to measure. Letters from highly satisfied clients available.

Advertised mail order contraptions as well as elastic belts with chafing, filthy legstraps are absolutely worthless. Call on me and I will show you. Results on children are 95 per cent favorable.

Business engagements prevent visiting any other city in this section. C. F. Redlich, Rupture Appliance Expert, Home office, 535 Boston Block, Minneapolis, Minn. Adv.

E. H. Emery, Notary Public.

## Some Difference

If you want to know the difference between an old-fashioned blacksmith and the modern garage man, read Longfellow's poem on the smith and then read the bill the garage man has sent you and think of the service he gave you.—Cincinnati Enquirer

## Quite a Come-Down

A waste basket must exhibit a circular letter that has crossed the county in a plane.—Akron Beacon Journal

## More Questions Answered By Republican County Chairman

Well! What about the McNary-Haugen bill and the equalization fee?  
Answer: In the first place, two of the most eminent lawyers in the United States, our own Senator Borah and Senator Robinson, who is now running for vice president on the democratic ticket, have advised the country and the members of the senate that the equalization fee provided for in the McNary-Haugen bill is unconstitutional upon the grounds that congress alone has authority to levy taxes, and that such authority can not be delegated to a commission which was provided for in the McNary-Haugen bill. Surely the proposition of compelling the farmer to pay a tax upon farm products used for domestic purposes in order to market the surplus production at a lower price in the World market is a tax.

The number of employees of the government in order to enforce such a tax upon the farmer would be enormous, and the overhead cost of collecting the equalization fee would be staggering if it was once put into effect. In a county the size of our own it would require several federal employees to check up and collect such a tax, because it must be remembered that the equalization fee covered not only wheat, but hogs, cattle, sheep, and nearly every product from the farm. The equalization fee was a false hope held out to the farmer. The more surplus of any product raised the greater would be the tax and the greater would be the expense of collecting such a tax. Such a scheme of marketing would encourage the farmer at the beginning to increase the production of farm products most easily raised, thereby increasing the surplus which would have to go upon foreign markets, and which would necessarily result in an evergrowing tax upon the farm products consumed in this country.

Why is it the Republican party has not passed any farm relief measures?

Answer: The Republican party has protected the farmers in Latah County by a high tariff on all beans, peas, hogs, cattle, dairy products, poultry and eggs, besides many other farm products. In 1920 hand picked white Manchurian beans shipped from the Orient could be bought in retail stores at the rate of 8 pounds for a quarter. The American farmer can not compete with cheap oriental labor in the raising of peas, beans and eggs. The American farmer can not compete with New Zealand in dairy products and make a living. Another thing, all farm machinery of every kind, binder twine, shoes and other products bought by the farmer were put upon the free list by the republican party.

The National Grange favored a debenture plan for the relief of the farmer which might have proved workable, but a hy-partisan combination was made in congress which demanded the unconstitutional, unfair and highly hazardous plan of an equalization fee to any other remedy, and no other remedy had any chance before congress during the past eight years.

What is Hoover's plan?

Answer: Hoover's plan for farm relief does not provide for any tax on the farmer. He will ask congress to appropriate sufficient money, three hundred million dollars if necessary, to form an export farm products corporation for the purpose of marketing and financing the exportation of the surplus of American farm products in the foreign markets in excess of the demands of Europe in the fall of the year, and instead of paying high interest rates and carrying charges until the foreign consumer is ready to purchase bread from American wheat, the government of the United States will furnish the necessary capital without expense to the farmer for the purpose of marketing the American surplus in foreign markets in a regular and orderly manner, and thus prevent our present costly system of marketing.

By the way, the democratic candidate for governor of Idaho, who spoke in Moscow on the evening of October 23, 1928, admitted that as a county commissioner of Canyon County, the tax rate for county purposes in the year 1914 under republican administration was 66c on each \$100 worth of taxable property, and in 1915 when the democratic party gained control of Canyon

ISN'T THAT TRUE? EVERYONE KNOWS THAT MONEY WHICH YOU CARRY ABOUT SEEMS TO MELT AWAY.

CUT DOWN EXPENSES AND WATCH YOUR MONEY GROW IN THE BANK.

BEGIN WITH ANY AMOUNT OF MONEY, LARGE OR SMALL, BUT BEGIN WITH

## The FARMERS BANK

"A Strong Bank  
KENDRICK, IDAHO

A. E. Clarke, President.  
W. J. Carroll, Cashier.  
N. S. Vollmer-Hopkins, Vice-President.  
F. K. Dammarell, Assistant Cashier.

County the tax rate on each \$100 of assessed valuation in Canyon County for county purposes was raised to 140c. This raise the speaker justified by reason of the great increase necessary on account of war. The chairman fails to understand the argument, because in Latah County the tax rate for 1914 for county purposes on each \$100 of assessed valuation under republican administration was 68c, and in 1915 the tax rate under republican county administration for county purposes was 76c on each \$100 of assessed valuation. In other words, the difference between republican economy and democratic expenditures in two agricultural counties as far as the raise of taxes were concerned on account of the war amounted to 8c on each \$100 of assessed valuation in Latah County, and in Canyon County the raise amounted to 74c on each \$100 of assessed valuation, or over 900% in favor of a republican administration in Latah County as against a democratic administration in Canyon County. We submit that the democratic candidate has not satisfactorily answered the reason for such an enormous increase in the tax levy in Canyon County.

Latah County Republican Central Committee, by R. C. West, Chairman. —Advertisement.

## Agricultural Notes

The majority of chickens that are marketed are entirely too lean and lanky.

The neighbor with sick hogs is likely to carry infection on his shoes or his clothing to your hog lots if he is permitted to visit them.

Don't crowd the late thin lambs on the market. Send only the fat ones, the others can be made to sell higher by good care and some feed.

Cod liver oil, to prevent leg weakness and promote growth, can be fed to growing chicks in the proportion of one pound to 100 pounds of mash.

According to results obtained at the University of Alberta, Canada, 50 per cent of the lambs weaned by ewes fed timothy hay die within four weeks after birth.

The young cockerets should be separated from the pullets by the time they are big enough to fatten, or at the latest by the time they weigh a couple of pounds.

## Deserve No Praise

It disgusts me to hear after-dinner and radio speakers praising ourselves. Praise our country but, in the name of all that is decent, don't praise ourselves. We have about ruined the appearance of this beautiful continent for we have been the most inartistic people on earth, next to the Thobians.—G. D. Carson, Forest and Stream Magazine

Drs. Salsberg & Simmons  
Eye-Sight Specialists  
512 Main Street  
Lewiston, Idaho  
Dr. Simmons will be in Kendrick every 60 days.

## McDowell's Midget Cafe

Meals Lunches  
Coffee  
Draught Beer  
Any time of the day.

## Coming to Moscow DR. MELLENTHIN & CO.

Specialists in Internal Medicine for the past fifteen years.  
Do Not Operate will be at the Moscow Hotel, Thursday, Nov. 8 Office Hours 10 a. m. to 4 p. m. One Day Only

No Charge for Consultation  
The specialist of Dr. Mellenthin & Co. is a regular graduate in medicine and surgery and is licensed by the state of Idaho.

He visits professionally the more important towns and cities and offers to all who call on this trip free consultation, except the expense of treatment when desired.

According to his method of treatment he does not operate for chronic appendicitis, gall stones, ulcers of stomach, tonsils or adenoids.

He has to his credit wonderful results in diseases of the stomach, liver, bowels, blood, skin, nerves, heart, kidney, bladder, bed wetting, catarrh, weak lungs, leg ulcers, rheumatism, sciatica, and rectal ailments.

If you have been ailing for any length of time and do not get any better, do not fail to call, as improper measures rather than disease are very often the cause of your long standing trouble.

Remember above date, that consultation on this trip will be free and that his treatment is different.

Married women must be accompanied by their husbands. Address: 224 Bradbury Bldg., Los Angeles, California.

## Winding Made Easier

"Big Ben" of London, perhaps the most famous clock in the world, dates from 1358. It has four 23-foot gears and it used to take two or three afternoons a week to wind it. It is now wound by electric motor in 15 minutes.

**LOCAL NEWS**

George Barnum and Harley Perryman are in the Selway country this week hunting deer.

Jess Collins of Lewiston is looking after property interests here this week.

A number of friends of Mr. and Mrs. Petrick gave them a surprise party at their home Thursday of last week. They spent a very pleasant evening.

Attorney Oppenborn closed a deal last week whereby he purchased the Robbins property in the west part of town. Mr. Oppenborn expects to make extensive improvements in the property, which will be the family residence.

Mrs. Julia Flesman was the overnight guest of Mrs. Oney Walker Thursday evening.

Carl Gillespie has returned from Kellogg, where he has been working the past summer.

A large crowd attended the community program held at Leland Friday evening. A good

time was enjoyed by all. About eight hundred dollars was pledged toward the pastor's salary.

**Bell Ringers**

What is said to be the oldest bell ringing society in existence, the Ancient Society of College Youths, was founded in 1637 and has members throughout the world. Twelve members of this society were recently granted permission to ring on the 12 bells of St. Paul's cathedral (London) a peal of "Stedman Cinques"—a method of ringing composed by Fabian Stedman of Cambridge, England about 1640.

**Chinese Superstition**

Chinese boatmen believe implicitly in the power of water demons. Not only must one beware of water demons, but of the spirit of a man who has been drowned by a demon, for it may hover near the place of tragedy and wreak vengeance on those who fail to show respect to the memory of the dead.

**Fisher's Paradise**

There are about 26,000 miles of fishing streams in California.

**Methodist Church Notice**

Preaching at 11 a.m. and 7:30 p.m. Rev. Gallaher, will fill the pulpit for both services. Rev. Taber will preach at Southwick at 11 a.m. You are cordially invited to attend these services.

**Presbyterian Church**

Last Sunday was another good day. The interest is growing both in the Sunday school and morning worship. If you are not attending elsewhere, we cordially invite you to meet with us next Sunday, October 28. We have competent teachers and classes for all ages and a place for you. We shall look for you next Sunday. Sunday school at 10 o'clock and preaching at 11 o'clock. Remember and come.

N. E. Franklin, Pastor.

**Notice**

Please keep in mind that the M. E. Aid will serve you a first class dinner at the Commercial Hotel, on election day, November sixth. 42-1t

**Cameron Lutheran Church**

There will be divine services in Camron at 10:30 a. m., in the English language. Subject: "The Pilgrim's Progress". Sunday school at 9:30. In Juliaetta at 2 p. m., services in the German language will begin. O. G. Ehlen, Pastor.

**LAKES OF THE SOUTHEAST**  
The largest lake in Idaho is Pend O'Reille, situated in Bonner county in the extreme north. Its nearest rival in size is as far away as can be and remain in Idaho, in fact about half of it is in Utah. This extreme southeastern water is

**BEAR LAKE**

It has an area of nearly 125 square miles, being 19 miles long and averaging 6 miles in width; it is in the shape of an oval with ends so flattened as to give it a peculiarly square appearance. It lies at an altitude of 5,943 feet, has an extreme depth of 175 feet and an average of from 40 to 60 feet. Three of its sides are mountainous, the eastern rising in abrupt cliffs. Part of the western shore is swampy, most of the remainder being fine gravel beaches. Viewed from the higher ground the waters are a beautiful blue, one writer saying that "in color it is equalled by few bodies of water in the world."

The original natural features of Bear Lake and Bear river have been changed more by the hands of men than any other waters in Idaho; the description following applies to conditions existing prior to the making of these changes.

Some maps show it as two lakes, but the northern body is really a swamp from which the lake proper was originally separated by a low and gracefully curved bar thru two breaks in which the lake water discharged into the swamp. The outlet of Bear Lake was different from that of any other Idaho lake. Instead of a main stream flowing thru the lake, the water of the latter discharged thru the bar into the swamp which in turn passed thru a marshy outlet into the nearby river.

These waters are among the most interesting features of the state we live in. Bear river has its main sources in the Uinta Mountains of Utah. After passing the lake it pursues an unusually winding course, finally following the Gentile and Cache Valleys down to its mouth at the Great Salt Lake. Measurements at Soda Springs in August of a recent year showed a flow of 1,000 second feet.

The whole region has an interesting geological history. The lake was once part of a tremendously large body of water, and there is evidence that the river formerly flowed in a direction opposite to that it now takes.

Both lake and river have been known to white men for over 115 years, but was first known as "Miller River" in honor of one of its discoverers. The explorer Donald MacKenzie later gave it the name of "Black Bear" on account of the prevalence of that animal in the vicinity. It is again mentioned by the explorer Ashley in 1826. All of these men supposed the river ran directly to the Pacific.

The Indian name for river and lake was "Quee-waw-pah," a name signifying an abundance of a certain plant growing on the shores.

**Big Bear Ridge News**

Ingvald Aas arrived here this week from Dutton, Montana, where he has spent the summer.

Will Elliott spent last week in Spokane at the home of his daughter, Mr. Clyde Ralstin.

Mrs. Frank Whitcomb entertained the Ladies Guild at her home Wednesday afternoon.

Mr. and Mrs. W. E. Hecht were recently visiting Mrs. Hecht's sister at Orofino.

Mrs. Ida Comstock has moved to the home of her son, Wilbur, Babcock near Helmer.

Mrs. Everett Fraser and Mrs. J. Petrick of Kendrick spent

**KENDRICK STORE CO.**

"The Quality Store"

Monday with Mrs. Wade Keene.

Mr. and Mrs. Fred Gladden, and Mr. and Mrs. Ira Altig of Deary attended the Oddfellows convention at Moscow last week.

Mrs. W. E. Hecht and little daughter, Velma, went to Moscow for the baby clinic last week.

Mrs. Ernest Jones was given a pleasant surprise Friday even-

ing when a number of neighbors and friends came in to help her celebrate her birthday. Radio music and visiting gave everyone a most enjoyable time. A nice lunch including a very pretty birthday cake was served by the guests.

The Ladies-Guild will meet at the Community Hall, Wednesday the 31st, for the purpose of quilting. Your attendance would be appreciated. Their annual Fancy Work Sale will be held

sometime this fall. Rev. A. E. Janes of Juliaetta held services at the Steele school house following Union Sunday school Sunday.

**Explaining Freckles**

Freckles are always most distinct in summer, but though the influence of the sun's rays affect their distinctness, it is doubtful whether it can cause them. They are due to increased local deposits of pigment granules in the epidermis.

**I'll Give \$100.00**

Mr. FARMER! Listen!.. Would you accept \$100.00 if I were to give it to you?

With every Cletrac sold I will give a new Bean Cultivator worth \$100.00, and guarantee it to do perfect work—better than you can do with any horse-drawn cultivator. With it you can cultivate 75 acres per day as easy as you go over 5 acres with a team of horses.

If the cultivator does not do the work as well as you want it to do, I will take it back and pay you \$100.00 cash. Then you will have your tractor for \$1850 instead of \$1950.

Remember we are right here to give you the best of service with your Cletrac—and will stay here. Service is at times worth many dollars to you when you need it.

Nearly 100 Cletracs which I have sold in the past four years are all going fine with very little expense.

See me if you want to put in bens with a Cletrac. I have many used tractors of various kinds and prices.
