Causes and Control of White Scours in Calves

White scours is sometimes a source of severe loss in very young calves. While usually considered as an acute contagious disease of calves, it frequently occurs as a chronic condition which may be fatal to the calf but which retards its growth and development markedly.

Veterinarians at Cornell university regard an acid condition of the droppings of the calf as an important symptom of this disease. The acidity results from bacteria which are usually introduced through the milk fed to the calf. The acid prevents the digestion of the casein of the milk, thus producing the whitish appearance of the droppings, which is characteristic of the disease. The navel of the newborn calf is also a frequent source of infection.

At Cornell the preventative measures taken for this disease include bathing the navel with an antiseptic and applying a drying powder to close up the opening as soon as possible. The amount and temperature of the milk fed the calf is carefully regulated and great care used to feed under the most sanitary conditions.

Control methods employ the use of barley water, made by adding boiling hot water to finely ground barley and allowing it to stand until nearly cool. In severe cases the milk is replaced altogether by barley water for a temporary period. Usually, however, equal parts of barley water may be used with whole milk. The principal use of the barley water is to soothe the inflamed membranes of the intestines.

The acidity is corrected by using a solution of one ounce of bicarbonate of soda and two drams of aromatics in a pint of water. This is given once daily and has proved very effective. It can be given to the calf by means of a funnel and rubber tube.

Individual Feed Record Will Determine Profit

Feeding, more than anything else, determines the profit a cow makes. The average cow is fed carelessly. Too often the farmer feeds the same amount to each animal. A cow cannot produce the greatest amount of milk it is possible for her to produce and do it profitably unless the amount of grain fed her is enough to first meet her bodily needs with enough extra to make the highest yield of milk she is capable of giving.

Increased profits of from 25 to 100 per cent can be secured by any farmer who will adopt the simple method of feeding each of his cows according to her individual production. This means weighing each cow's daily milk production two successive days each month, and then feeding each individual cow a pound of good grain feed each day for every two and one-half to three pounds of milk she produces, if she is of the Jersey or Guernsey breed, and a pound of grain for every three and one-half to four pounds if she is of the Holstein breed.

Feeding Good Cows Grain as Pasture Is Insufficient

"Grass alone is not enough," declares A. J. Cramer, supervisor of Wisconsin Herd Improvement associations, speaking in terms of summer milk production in Wisconsin.

While a firm believer in the fact that it pays to feed grain to good cows, whatever the pasture conditions are, Cramer insists that this season, with pastures being unusually short, many Wisconsin dairy cows will not receive sufficient nutrients to maintain milk production and body flesh, unless their pasturage is supplemented with grain.

A ration containing about 50 to 75 per cent corn, oats, barley, or hominy will help to maintain the physical condition of our cows, he says. Grass alone will furnish milk, but how long will this heavy milk flow last, without some grain feed to help keep it up, and to hold some of that body weight on our cows? he asks.

To the doubtful one, he suggests trying grain feeding on one or two cows to learn if it pays.

Same Old Human Nature

Times haven't changed much. Several thousand years ago an old gentleman named Aristotle said: "That which is common to the greatest number has the least attention bestowed upon it. Every one thinks chiefly of his own interest, hardly ever of the public interest." — Atchison Globe

DAIRY

BUTTER QUALITY CAN BE IMPROVED

The delivery of good cream was never as important as it is today. Eastern markets have often discriminated in price as much as ten cents per pound between butter classing as firsts and that classing as seconds. A slight difference in the score of butter has often made a difference of three cents per pound in the price.

It is impossible to make good butter from poor cream. More attention must be given to the production of good cream on the farm.

Cooling of cream promptly has much to do with the quality. Warm cream should never be mixed with cold cream. It should be cooled before being mixed with other skimmings, otherwise bad flavors and poor quality will result. The best way to cool cream is to place it in cold water. Cream quickly cooled and held in cold water will keep in good condition. Cream should be immediately put in a small can when separated and kept in cold water. Stirring occasionally allows the animal heat to escape and improves the quality. Cream should be delivered to the creamery frequently in hot weather. If held more than three days it is apt to get moldy. Ship every other day if possible.

Every farm does not have a supply of cold water, but most farms do. A tank so situated that all water pumped for stock purposes runs through the cream tank will serve to keep cream cool. Many manufactured tanks are now on the market which can be purchased; likewise a common barrel may be made to serve the purpose very satisfactorily.

Build a cooling tank on your farm and you will produce less second-grade cream and thus raise the quality of butter. — Colorado State Dairy Commission.

Healthy Dairy Herds Are Always Most Profitable

In a preliminary survey of pure-bred herds in three localities, but one herd has been found free from the disease. This owner has been very particular about purchasing breeding stock. Bulls are bought only subject to abortion test as well as the tuberculin test. The value of clean herds is becoming thoroughly appreciated each year, and breeders of pure-bred cattle who believe their herds free from infection should attempt to confirm this suspicion by blood testing.

The advantages of clean herds are well known. First of all and most important, health herds are more profitable. Abortion disease control is thus a business proposition for every herd owner. Breeders who protect their customers against this infection by selling clean animals are building on a sound basis. On the other hand, prospective purchasers cannot afford to invest in pure-bred animals that harbor abortion infection.

Home-Raised Calves Are Best for Replacements

There are two principal reasons why most dairymen prefer to raise the cattle that are needed for their herd replacements. One is a question of economy and the other is that of disease control and elimination. Both are important considerations for practical dairymen.

Often when people depend upon purchasing the mature cows needed in their herds they find that they are forced to take cows that are not entirely desirable. Sometimes the cows are hard to milk, sometimes buyers find a bad quarter after the cow comes fresh and sometimes the cows are not as heavy milkers as expected.

Disease control is one of the hazards of dairying. This applies to contagious abortion as well as to tuberculosis. Present tests indicate that tuberculosis is more easily eradicated than abortion. When cattle are imported they should be purchased under a sixty-day retest for tuberculosis.

Dairy Notes

- Be careful not to overfeed.
- Provide plenty of pure, fresh water.
- Keep cows comfortable and contented.
- Feed cows sparingly the first few days after calving.
- Cows should receive grain in proportion to production.
- If you have ten or more dairy cows or are feeding beef cattle you need a silo. Silos pay for themselves quickly.
- Be prepared to treat an attack of milk fever by having a clean sterilized pump to inflate udder with air.

Protect cows from heat and flies by giving them shade and keeping them in darkened stables during the heat of the day.

Successful operation of a milking machine depends largely on the operator. Occasionally there is dissatisfaction with a machine, due to difficulty encountered in meeting bacteria requirements in milk.

WOULD ELIMINATE PERIL IN EXPLORING

Norway to Rule Out Element of Chance.

Osla.—Inexperience and the element of chance in Arctic exploration have been ruled out by the Norwegian government. Adventurous tales will give way to the more practical reports of scientists.

The government has announced measures for the regulation of exploring expeditions that employ Norwegian vessels or engage Norwegian subjects in Norwegian ports.

Norway has made steady progress in the drafting of regulations for the development and exploration of the countless islands constituting Spitzbergen, her polar possession.

Enacted Game Laws. Following the usual custom in the advent of sovereignty to uninhabited or but sparsely settled Arctic lands, Norway's first act was the promulgation of game laws to restrict the annual ravages of the winter fur trappers.

Save Rescue Cost. It is believed that the system of inspecting expeditions before they enter the Arctic wastes will save the immense cost of rescue and relief which has been necessary to aid inexperienced explorers.

Canvas Painted as Joke Praised as Work of Art

Malmö, Sweden.—A still life picture painted as a joke by a Malmö music publisher, B. Anderson, who executed the crude "piece of art" with his thumbs, inspired the praise of connoisseurs at a recent amateur exhibition here.

Files Reckless Driving Charge Against Flyer. Bridgeport, Conn.—Charges of "reckless driving" have been filed with the state aviation commission against Harry Wilson, pilot of the Milford Airways by Henry White, chief pilot of the Sikorsky Aeroplane company.

Ancient Mede Invasion of Morocco Indicated

Fez, Morocco.—Archaeological discoveries said to indicate an ancient invasion of north Africa by the Medes have been made by Captain Odipot of the French army.

They were made near a road twenty-five miles from Fez, in several caverns, each about 300 feet long. The finds include examples of cuneiform writing, two stone hatchets and what appeared to be vestiges of tombs.

75,000,000 INDIANS WERE HERE IN 1200

Population Was Cut by White Men's Disease.

Cambridge, Mass.—The peak of America's native population before the white man's coming was reached about 1200 A. D., when there may have been as many as 50,000,000 or even 75,000,000 Indians in the New world.

Doctor Spinden of Harvard university, reported in the Geographical Review.

There were few serious disease forms in America when the Indians lived here undisturbed, Doctor Spinden explains this as partly due to the thin scattering stream of immigration from Siberia into Alaska.

Army Is Poorly Clad, General Reports to U. S. Washington.—Enlisted men in the army are compelled to purchase uniforms with their own funds in order to look "presentable" when they appear in public.

Old Soldier Leaves All, \$1,200, to Cause of Erin Los Angeles.—Just before he died, a year ago, John Donnelly, an inmate of the Soldiers' home at Sawtelle, Calif., told his friends that some day he was going to "do a lot for the cause of Ireland."

Railroad "Minds Baby" Weiden, Bavaria.—A baby carriage with a crying infant occupant was found on the station platform here.

In Leisure Hours He Can Use a Gun Washington.—The Gilbert and Sullivan policeman whose life was not an easy one enjoyed a soft snap as compared with another uniformed personage—the United States army band trap drummer.

Mothers are charged with and must be expert in the use of the snare drum, triangle, triangle beater muller and strainer, drum slung, drum stand, cow bawl, cow bell, sleigh bell, wood block, castanet, cuckoo, Chinese cymbals, imitation railroad, adjustable rattle, slaps-ticks, tambourine, Chinese tom-tom, canary whistle, locomotive whistle, steamboat whistle and steam exhaust whistle.

ORDINANCE No. 207

An Ordinance regulating the supply and sale of milk within the Village of Kendrick, Idaho. Be it ordained by the Chairman and Board of Trustees of the Village of Kendrick, Idaho.

Section 1. Unwholesome Milk—Offered For Sale. No person, firm or corporation shall have for sale, sell, deliver, offer for sale, or bring within the limits of the Village of Kendrick for human consumption any unwholesome, watered or adulterated milk.

Section 2. Adulterated Milk. No milk or cream which has been watered, adulterated, reduced or changed in any respect by addition of water or other foreign substances, including coloring matter or preservatives, shall be brought into, held, kept, sold or offered for sale at any place in the Village of Kendrick.

(a) Whole milk containing more than 89 per centum of water or fluids, or containing less than 11 per centum of solids.

(b) Whole milk containing more than 10,000 bacteria per cubic centimeter.

(c) Whole milk containing less than 3 per centum of fats.

(d) Milk drawn from animals fed on any substance in a state of putrefaction, or any other unwholesome food.

(f) Milk drawn from animals kept under crowded or unhealthy conditions.

(g) Whole milk from which any part of the cream has been removed, except in so far as the sale of skimmed milk is permitted under the provisions of this article.

Section 3. Skimmed Milk. No person, firm or corporation dealing in milk or cream, and no employee, servant or agent of such person, firm or corporation shall sell or have in his, their or its possession with intent to sell or offer for sale in the Village of Kendrick milk from which the cream has been removed.

Section 4. Same. Except as otherwise stated herein, the provisions of this article shall apply to, and be binding upon hotels, cafes, restaurants, boarding houses, creameries and other public places where milk or cream is furnished or sold to guests as a beverage.

Section 5. Seizure. Any milk or cream found to be adulterated, or any skimmed milk which is held or offered for sale without the marks and notices herein prescribed, shall be subject to seizure, and may be destroyed by the health officer.

Section 6. Cream. No adulterated cream shall be brought into, held, kept, sold or offered for sale in the Village of Kendrick.

Section 7. Tests. The health officer shall be permitted to take at any time and have examined or tested samples of dairy products from any person, firm or corporation vending such products in the Village of Kendrick, and a record of the same shall be

kept in the city health department. The examinations or tests shall be made by a reliable chemist, registered under the laws of the State of Idaho. A sample of milk shall also be taken from the same receptacle at the same time that the health officer takes a sample to be tested by order of the health department of the Village of Kendrick to be turned over to the person, firm or corporation, from whom or which taken, under a seal to be provided by said department.

Section 8. Cows To Be Tested. Every person, firm or corporation shall have examined by a state or federal veterinarian at least once a year for tuberculosis all cows from which milk or other dairy products made from such milk are sold or offered for sale by him, them or it in the Village of Kendrick.

Section 9. Bottles Required. Every person, firm or corporation engaged in or carrying on the business of vending milk or cream shall deliver all milk or cream to family trade or individual customers in the Village of Kendrick in the regulation glass bottles or glass jars with stoppers or covers in order to make the receptacles air-tight.

Section 10. Milk Temperature. No milk or cream shall be sold the temperature of which is higher than 55 degrees Fahrenheit, or which contains an excess of 100,000 bacteria per cubic centimeter or which shows dark grey sediment at the bottom of any glass bottle, glass jar or other receptacle in which it is contained.

Section 11. Transfer of Milk. No person shall transfer any milk or cream intended for sale in the Village of Kendrick from one can, glass bottle, glass jar or other receptacle to another on any street, alley or thoroughfare, or upon any delivery wagon or other vehicle or in any exposed place except a creamery or in the inclosed premises of a customer.

Section 12. Milk Houses. Dairies with more than two cows shall have their own milk house and no milk house, building or other place in which milk or cream is prepared or bottled shall be located less than 50 feet from the nearest water-closet, privy vault, cesspool, horse or cow stable, or any chicken yard or coop; and the milk house, building or other place where milk or cream intended for the delivery to customers in the Village of Kendrick is kept, handled or prepared for delivery shall be a room which is not used for any other purpose, and shall be provided with a concrete floor.

Section 13. Care of Cans, Bottles, Etc. Every person, firm or corporation engaged in or carrying on the business of vending milk or cream in the Village of Kendrick shall cause all pouring cans, dippers or other vessels used in the handling and vending of milk or cream to be sterilized daily; and shall sterilize with

boiling water or live steam each time they are used, as soon as they are empty, all cans, bottles, jars and other receptacles used in and about the handling and sale of milk or cream and shall keep all refrigerators or compartments in stores or other places where milk or cream is kept, stored or handled, in scrupulously neat and clean condition and free from the presence or vicinity of any article or thing likely to contaminate or injuriously affect the quality or sweetness of the milk or cream.

Section 14. Board of Health. The board of health of the Village of Kendrick is hereby empowered to make all necessary orders, rules and regulations, not in conflict with the provisions of this article, and the operation and keeping of dairies, and the buildings, outhouses and other premises used for the housing and keeping of cows from which milk is drawn for sale in the Village of Kendrick, and all necessary orders, rules and regulations for the keeping and the cooling of such milk, and for the keeping of such buildings, outhouses and other premises in a clean, healthful and sanitary condition; and every person, firm or corporation selling or offering for sale within the Village of Kendrick any milk or cream shall be subject to such orders, rules and regulations, and the health officer and his deputies shall at all times be permitted to inspect such premises. Whenever any dairy, stable or other buildings or premises are kept in violation of such orders, rules and regulations, or whenever there is a failure to observe such orders, rules or regulations in the operation of dairies and the sale of dairy products, the health officer shall enforce such orders, rules and regulations, and he is hereby empowered to seize and condemn such products.

Section 15. Milk Vendors' Licenses. Every person, firm or corporation producing or vending milk or cream to family trade, individual customers or hotels, cafes, restaurants, boarding houses, creameries or other public places of like character where milk or cream is sold or served as a beverage in the Village of Kendrick, shall pay an annual license of \$1. PROVIDED, HOWEVER, That the hotels, cafes, restaurants, boarding houses or other public places of like character where milk or cream is sold or served shall or serve only milk coming into their possession from a licensed producer of such milk or cream, then such hotel, restaurant, cafe, boarding house or other public place of like character shall not be required to have a license, it being hereby expressly declared as the intention of the council of the Village of Kendrick to provide for only one license for the vending, selling or serving of milk or cream from the time it leaves the producer until it reaches the actual consumer.

Section 16. Posting License. Every person, firm or corporation, producing or vending milk or cream in the Village of Kendrick to whom a license may be issued, shall post and keep the license in a conspicuous place in the milk house or place for which it is granted, and every person authorized to vend or peddle milk or cream or either of them from a wagon or other vehicle, shall cause the name of the dairy as it appears on the license to be plainly painted in letters of at least 4 inches in height in a conspicuous place on both sides of the wagon or other vehicle.

Section 17. Penalty. Any person directly or indirectly violating any of the provisions of this article shall be deemed guilty of a misdemeanor. Every day that such person shall continue to violate any of the provisions of this article shall constitute a separate and distinct offense.

Section 18. Stables. Every owner, lessee, tenant and occupant of any stable, stall, pen, building or place in which any horse, cattle, or any other animal shall be kept, or any place in which manure or any liquid discharge of such animal shall accumulate, shall cause such manure or liquid discharge to be placed and kept in a suitable box, device or receptacle completely inclosed and covered from flies, mosquitoes or other insects, and such box, device or receptacle shall be kept in a suitable place on the aforesaid premises and the contents thereof removed therefrom to some proper place at such intervals as shall be necessary and proper under the circumstances in each particular case.

Section 19. Penalty. Any person who shall fail to comply with the provisions of the preceding section and who shall neglect or refuse to remove such manure, liquid discharge or offal for a period of one day after being notified to do so by the chief of police shall be deemed guilty of a misdemeanor.

Section 20. This ordinance shall be in full force and effect from and after its passage, approval and publication.

Approved: N. E. Walker, Chairman of Village Board. Attest: R. B. Knepper, Clerk. 52-1

issue license to a dairy or revokes license already issued the party or parties operating said dairy may appeal to the commissioner of public safety and health, and if said commissioner sustains the health officer, said party or parties may then appeal to the city council whose action shall be final.

Section 16. Posting License. Every person, firm or corporation, producing or vending milk or cream in the Village of Kendrick to whom a license may be issued, shall post and keep the license in a conspicuous place in the milk house or place for which it is granted, and every person authorized to vend or peddle milk or cream or either of them from a wagon or other vehicle, shall cause the name of the dairy as it appears on the license to be plainly painted in letters of at least 4 inches in height in a conspicuous place on both sides of the wagon or other vehicle.

Section 17. Penalty. Any person directly or indirectly violating any of the provisions of this article shall be deemed guilty of a misdemeanor. Every day that such person shall continue to violate any of the provisions of this article shall constitute a separate and distinct offense.

Section 18. Stables. Every owner, lessee, tenant and occupant of any stable, stall, pen, building or place in which any horse, cattle, or any other animal shall be kept, or any place in which manure or any liquid discharge of such animal shall accumulate, shall cause such manure or liquid discharge to be placed and kept in a suitable box, device or receptacle completely inclosed and covered from flies, mosquitoes or other insects, and such box, device or receptacle shall be kept in a suitable place on the aforesaid premises and the contents thereof removed therefrom to some proper place at such intervals as shall be necessary and proper under the circumstances in each particular case.

Section 19. Penalty. Any person who shall fail to comply with the provisions of the preceding section and who shall neglect or refuse to remove such manure, liquid discharge or offal for a period of one day after being notified to do so by the chief of police shall be deemed guilty of a misdemeanor.

Section 20. This ordinance shall be in full force and effect from and after its passage, approval and publication.

Approved: N. E. Walker, Chairman of Village Board. Attest: R. B. Knepper, Clerk. 52-1

Moon Is Often Late in Trips Through Skies London.—Astronomers need the help of horologists to check the gains and losses in time made by the moon.

The moon was 30 seconds slow on astronomical time 1:1630, Sir Frank said, but made up the half minute by 1720. In 1775 it was nearly 30 seconds ahead, and then started to lose again, and was back to the time of the rotating earth by 1863.

From 1876 to 1897 the moon lost 15 seconds, but regained 11 seconds between 1897 and 1918.

"We should like half a dozen clocks in the best observatories," Sir Frank said, "which could be trusted to keep time to one second a year."

Illiterates Inefficient That there is a direct connection between illiteracy and the inefficiency of laborers has been revealed by recent research. Illiterates often are incapable of being taught to operate labor-saving machinery it was found.

 In the matter of the Estate of Clara F. Dygert, Deceased.
 Notice is hereby given by the undersigned, the administrator of the estate of Clara F. Dygert, deceased, to the creditors of and all persons having claims against the said decedent or her estate to exhibit them with the necessary vouchers within six months after the first publication of this Notice, to-wit: the 7th day of December, 1928, at the office of the administrator at the Bank of Juliaetta, at Juliaetta, Idaho, which place is hereby designated as the place of doing business of said estate within the State of Idaho.
 Dated and signed on this 6th day of December, 1928.
 A. W. BEHRENS,
 Administrator of the Estate of Clara F. Dygert, Deceased. 49-5

Call for Bids
 Sealed bids will be received up to and including January 15, 1929, at the office of the Clerk of Joint School District No. 24, Kendrick, Idaho, for the furnishing of 65 cords of seasoned green cut yellow pine or fir wood, to be cut 42 inches in length, to be delivered and piled in the wood pit of the Kendrick school building on or before August 1, 1929. For the purpose of the bid a cord will measure 42 inches, 4x8 feet. Successful bidder to furnish bond for the fulfillment of contract.
 E. H. Emery,
 Clerk Joint School District No. 24. 52-3

LAWYERS FATTEN ON UNIQUE WILLS
Eccentric Clauses Hard on Beneficiaries.
 London.—People who make curious provisions in their wills give a lot of trouble to their beneficiaries, but also give a lot of money to lawyers, according to legal circles here.
 The discussion on eccentric wills arose over a clause in a will creating a trust which was to continue until 20 years after the death of the last survivor of the lineal descendants of Queen Victoria living at the time of the testator's death. The will recently was the subject of litigation in the high court here.
 Among other recent peculiar wills was that of the Yorkshire gardener who bequeathed one shilling and a cracker bowl to his wife.
 Another man left his wife five shillings, approximately \$1.25, to buy a rope with which to hang herself. He left his son £5 (about \$20) "with which to go to the devil."
 The type of will which has for its object the discomfiture of the testator's relations is often proved in England, but in other countries such legacies are illegal.
 A testator in Toronto a few years ago put a number of Methodist ministers into an extraordinary dilemma. Staunch prohibitionists, they were rather embarrassed by a large brewery concern which was left them. The same man also left to three important opponents of racing in Canada shares in the Ontario Jockey club, the legatees being requested to draw the dividends and exercise the other privileges of membership.
 There is a record of a testator writing his will on a door, another on a petticoat.
 A British sailor treated his wife somewhat shabbily when he requested his executors to pay her one shilling to buy hazel nuts, "as she has always preferred cracking nuts to mending my socks."
 Perhaps the worst of this kind of provision was that of a London publican who, in revenge, stipulated that his wife, to get the property, must walk barefooted to the market on each anniversary of his death and read a confession that if her tongue had been shorter her husband's life would have been longer. This she refused to do and received only an alternative bequest of \$100.

Poultry Items
 Sweet or sour milk seems to give equally good results in chick feeding.
 Colds and roup are preventable diseases. If we remove the causes the diseases will not occur.
 Watch for the pullets that lay early, and mark them. They make the high producers—the ones to get next spring's hatching eggs from.

Rheumatism Forecasts
Storms, Doctors Admit
 Chicago.—Three physicians of Rochester, Minn., lend credence to the age-old belief that rheumatism is a barometer capable of forecasting weather several hours in advance.
 Drs. E. B. Rentschler, Frances Vanzant and L. G. Rowntree told the Central Society for Clinical Research that they had observed a correlation between pain in rheumatism and the presence of a storm in 90 per cent of their cases over a period of years. They also said they found that sunshine affects rheumatic pains and that a surprising accuracy of weather prediction was recorded.
 Dr. C. A. Mills, of Cincinnati, reported that patients suffering from adrenal malfunctioning also were affected by weather.

He May Be Right
 New York.—The peculiar behavior of nebulae, whirling about in space 85,000,000 light years away from the earth, and seeming to move farther away at the rate of 250,000 miles a second, is beginning to convince some astronomers that Einstein was right, that space is curved, and that the universe is "closed."

A Christmas Eve Accident
 By Helen Gaisford

Happy thinking sleigh bells seemed to Marilynne to keep repeating Paul's words—"I love you, love you, love you. We'll be married right away. Jingle, jingle, jingle! Married right away."
 The moonlight cast their moving shadow on the snowy road. The bells continued their lively refrain. Paul heard it, too—"We'll be married right away."

"Marilynne," he said, "this is the most wonderful Christmas eve in my life. I didn't dream I could ever be so happy."
 "Just we two forever. I think I must have loved you always."
 "Let us be married tonight, dear. There is still time."
 "Oh, no, Paul, dear. We should announce it first. Let's wait until right after the holidays."
 "Why?"
 "Just so that people won't say we were in too big a hurry."
 "What do we care what people say? If you had a family it would be different, but we are all alone—"
 She smiled at him. "Perhaps if we had to share each other we wouldn't be so happy. We can be so content with just ourselves."
 "Dearest—"

"Yes?"
 "You do love me?"
 They were entering the outskirts of town, within a mile of Marilynne's home. At the sharp bend in the road, one runner caught on a fallen branch and the sleigh toppled to its side.
 Paul was up almost before he had stopped tumbling, and was at Marilynne's side, but she lay very still. He spread one of the laprobes on the snow, using the other for a pillow, and lifted her onto it. Then he covered her carefully, loosed the kicking horse from the upset sleigh, and rode into town at a gallop.
 "I'll get old Doc Weatherby," he thought. "She can't be seriously hurt; she mustn't be." He urged the horse faster. "Ah, here we are."
 But Doctor Weatherby was out, and not expected for two hours. "Doctor Thompson lived about two miles farther on," Mrs. Weatherby told him. "Is it anything serious?"
 "I don't know. An accident." Paul went back to his horse. "I can't leave Marilynne for so long," he thought, before he had gone far. He looked about for a possible messenger, but there was no one in sight. Before the next house he stopped, intending to ask there for some one to deliver his message. But as he stepped on the porch he noticed a sign: "Dr. J. B. Brown." He rang the bell. A man with graying hair answered it.
 "Doctor Brown?"
 "Yes."
 "Can you come with me right away?"
 "Well, I don't know. I'm very busy. Christmas eve, you know. What is it?"

"On the creek road at the bend by the willows. She may be dying. I'll go ahead, and you follow just as quickly as you can—" He was gone.
 "But—" said Doctor Brown. He looked after the rapidly disappearing horse and rider. "Well, if I must—"
 Marilynne stirred and opened her eyes. "Paul," she said. Then she noticed the blankets and tried to remember. She heard racing hoofbeats and raised her head. In a moment Paul was beside her.
 "Are you all right? Marilynne, dear you're not hurt?"
 "I'm all right," she answered shakily. "I must have fainted. We turned over, didn't we?"
 "My dear, if anything awful had happened—"
 "Tell me you love me."
 "A thousand times, I love you. I love you more than life itself; more than anything in the world."
 "Not more than I love you."
 The moon came out from behind a cloud, and the snow gleamed in its light. A sound of distant chimes broke through the still air. Down the road a man on horseback rapidly approached unnoticed.
 "Paul," said Marilynne, "I think that after all, we'll be married right away."
 The rider left his horse and ran up to them. "You're the young man who came for me, aren't you?" asked Doctor Brown.
 "Yes," replied Paul, "but I don't suppose you will be needed now."
 Marilynne reached out her hand. "Why, good evening, Doctor Brown. What on earth did Paul want with you?"
 Paul answered her. "I was afraid you might be hurt, and thought I had better call a doctor."
 Doctor Brown laughed. So did Marilynne. "Doctor Brown," she explained, "is a minister."
 Paul gasped. Then he held out his hand to Doctor Brown. "In that case," he said, "you are needed, after all! Let's right this sleigh, and all drive back to town together."

Mrs. Stoneburner and Miss Emma Hartung were dinner guests of Mr. and Mrs. John Schwarz.

Famous Irish Regiment.

Perhaps the oldest Irish regiment to have a continuous history is the Eighteenth Regiment of Foot, raised as Lord Forbes' regiment, and brought to England by James II in 1688, when the monarch began to collect Irish troops about him. Upon its colors it bears the harp of Ireland with the motto: "Virtutis Nauriensis Praemium," or "The Reward for Valor at Namur." This honor was won in 1695 at Namur, when that regiment won also the title of "The Royal Irish Regiment."

Mrs. James Farrington and son, Everett, visited at the Geo. Lockhart home, Monday.

Jim and Mark Robeson returned from Oral Craig's the middle of the week.

E. T. STRONG
President and General Manager
BUICK MOTOR CO.

DETROIT, ... Praising Detroit newspapers and officials of the city for the safety campaign which recently has been waged against speeders and reckless drivers here, E. T. Strong, president of the Buick Motor Co., has expressed the hope that a similar program might be carried out in every city, town and hamlet in the nation.

Messages are being sent to the more than 4,000 Buick dealers throughout the country, each of whom will be urged to get behind such a movement in his district.

"The fact that some communities have accomplished so much in the humanitarian work of avoiding traffic casualties is conclusive proof that the campaign can be carried to a successful conclusion everywhere," Strong declared, "and the Buick Motor Co. pledges the fullest co-operation of its giant resources in working to this end."

"The automobile no longer is a luxury—it is a necessity, and much of its immense value to the world is being periled by those who use the streets as speedways and those who drive without care in the crowded traffic of the present era."

That the problem is a big one, Strong is certain, but he is equally certain that with the proper co-operation of all concerned the streets and highways can be made safe and the value of the automobile for business and pleasure consequently increased.

Best Wishes for the
New Year
1929

Friends in business are as precious as friends in social life. With the dawn of a bright New Year we feel a deep gratitude to our friends for their loyalty. May we continue to serve you in a sincere spirit of co-operation and mutual helpfulness.

KENDRICK STORE CO.
