No. 2

## JUST IDAHO

By Guy Flenner

### Service Means Business And

Giving service produces business and futures. That is true of the small business as well as of the largest corporations. The heads of the latter recognize the principle to the mutual benefit of their organizations and their patrons. The thought was succinctly stated by Fred H. Reid, head of the Mountain States Telephone & Telegraph company, in announcing a voluntary reduction in long distance rates: "Earnings sufficient to provide the best possible service will either be spent for the enlargement and improvement of the service or the rates charged for the service must be reduced." The improved service provided over long distance, whereby patrons get their parties in the zone without leaving the phone, the same as though it were a local connection, has increased the long distance business of the telephone companies all over the country and made this rate reduction possible.

President Carl R. Gray of the Union Pacific system and all leading railroad executives have long subscribed to the same principle. The heads of the gigantic power interests likewise adhere to that policy, which has been reflected in our own state by voluntary reduction in rates concerning the best paying services. It is, indeed, a universal system of modern business, down to the retail merchant.

Attention is not called here to the subject merely to praise business executives, who do not seek or need laudation, but to use it as a text for individual conduct. What a fine example has been set for all of us. Even in the humble walks of life we can add to our continuity of employment, which means stability of our lines of business, by giving service to our employers.

The clock-watchers have, diminished in number but there are still those with us who give as little as possible and demand the maximum.

That was once the policy of what we termed "the soulless corporation." What a change has occurred! In proportion, as a change along that line takes place in the attitude of little business and of individual endeavor, so will there be more cordial relationship between employer and employee and so will both reap greater rewards.

Another thought is a duty one also owes to one's self along the line of service—the service of study and application by students, the service of young folks in their home. If it shall not be extended, their future will be handicapped through disinclination or lack of ability to grasp opportunities.

### The Till Tells

Idaho agriculture shrank last year in volume and, of course, in gross receipts. Standing alone that statement might be taken as evidence of retrogression, but when we look on the other side of the account we observe a very substantial increase in banking strength and in bank savings and a material increase in the number of Idaho people who are engaged in the commendable practice of reasonable thrift. Agriculture forming such a large part of Idaho's business, it is not inconsistent to assume that it provides its full share of that number. The till always tells the story most impressively.

Johnny was in the habit of swearing mildly when anything happened that did not please him. One day the minister heard him and he said: "Johnny, don't you know that it is wrong to swear? Why, every time I hear you swear a cold chill runs down my back."

"Gee," said Johnny, "if you had been at my house the other day when my dad caught his nose in the clothes wringer, you'd have roze to death."—Ex.

## Elect Fraternal Temple Directors

At a meeting of the stockholders of the Fraternal Temple Co., held last Tuesday afternoon the following directors were elected: Ed Deobald, G. F. Walker, J. L. Woody, Dr. McKeever and Edgar Long. The affairs of the company were found to be in first class condition. N. Broeke, who has served for many years as custodian of the building, tendered his resignation to take effect February 1. Mr. Broeke has served faithfully and well and has kept the building in first class condition. His resignation was accepted with reluctance. It will be hard to find anyone who will take the same interest in the work that Mr. Broeke has for these many years.

## Death of Alice Marian Schultz

A sad death occurred in the family of Mr. and Mrs. Paul Schulze last Friday when their little daughter, Alice Marian, passed away at a Spokane hospital. Death was due to pneumonia. She was thirteen months old, her birthday being Nov. 26, 1927.

Funeral services were held at 11 o'clock Sunday morning at the Methodist church in Kendrick, the service being conducted by Rev. N. E. Franklin. Interment was made in the Kendrick cemetery.

## W. O. W. Installs Officers

White Pine Camp No. 204 W. O. W. held their regular meeting on January second and the new officers were installed in office by installing officers, Thos. McDowell and Joe Davis. Lunch was served at the close of the meeting. The following are the new officers: Past Consul Commander, August Hartung; Consul Commander, Frank Boyd; Adviser Lieutenant, O. M. Raby; Banker, Ira Bolon; Clerk, Edgar Long; Escort, Hugh Parks; Watchman, M. A. Onstott; Sentry, Jesse Heffel; Managers, N. E. Ware, Oscar Slind and J. W. Emmett.

## Southwick News

Mrs. Belle Cuddy who has been visiting with relatives thru the holidays, returned to Lewiston, Monday.

Given Mustoe and wife were business visitors in Kendrick, Monday.

Harry Welker of Lewiston spent Sunday at the home of Roy Robertson.

School started again Monday with a full attendance in the lower rooms and a very few absent in the high school.

Homer Betts and wife spent Sunday at the home of Harold Whitinger.

Chris Tschantz is helping Pete Stump in the timber cutting wood.

Mrs. George Jones returned to Moscow last Friday. From there she expects to go to Elk River for a short visit with her daughter, Mrs. Mahaffy.

Mrs. Nels Longeteig, George Longeteig and daughter, Helen, were the Sunday guests of Mr. and Mrs. Wm. Berriman.

Mrs. Attlee Mustoe spent Tuesday with her sister, Mrs. Virgil Harris.

Jake Berriman went to Lewiston and back, Monday.

Clyde Hewitt spent the week end in Bed Rock visiting at the homes of Roy and Raymond Blankenship.

Miss Pearl Cowger spent the week end at the home of Mr. and Mrs. Doc Betts.

Wm. Henderson, wife and daughter, Nellie and Milton Benjamin, were the Sunday guests at the home of Elton McCoy.

Harold Whitinger and wife spent Monday at the home of Pete Stump helping with the butchering.

Mrs. Grant Bateman and child spent Monday at the home of Mrs. Armitage.

Mr. Longeteig and Gordon Harris were busy putting up ice Tuesday.

Mr. and Mrs. Armitage spent Sunday at the home of George Hayward.

## Cameron News

John A. Schultz was a business visitor in Lewiston, Friday, until Sunday.

Visitors of Grandpa Schultz, Tuesday were Ferdinand and Herman Silfow, Rev. B. J. Carey of Genesee, Idaho, and Charley Schultz.

Mr. and Mrs. Reiche spent Sunday evening with Mr. and Mrs. A. O. Wegner.

Mr. and Mrs. Carl L. Wegner, Mr. and Mrs. Carl Lohman; Mr. and Mrs. Amos Spekker and Mr. and Mrs. Carl Koepf and family spent Sunday with Mr. and Mrs. August Meyer.

Erna Wegner was an overnight guest of Mildred and Selma Wegner, Friday.

Mr. and Mrs. Jake Berriman, Mr. and Mrs. Reiche and Mr. and Mrs. Wm. Wolf helped Carl Hartung celebrate his birthday Sunday.

Mr. and Mrs. Carl L. Wegner, Mr. and Mrs. A. O. Wegner and Mrs. Amos Spekker were guests of Mr. and Mrs. Aug. F. Wegner Friday night.

Mr. and Mrs. Fred Silfow spent Sunday with Mr. and Mrs. Herman Meyer.

Mr. and Mrs. Carl Hartung and family, Mr. and Mrs. Walter McCall called on Mr. and Mrs. Jake Berriman, Monday.

Mr. and Mrs. John Schwarz and Mr. and Mrs. Fred Mielke spent Sunday afternoon with Mrs. Stoneburner and Miss Emma Hartung.

Mr. and Mrs. Charley Schultz and family returned home from Spokane Sunday afternoon after visiting with friends and relatives.

Frank Wilkens did the chores for the Charley Schultz family while they were in Spokane.

Mr. and Mrs. Fred Mielke and Herbert, Edwin and Bill Mielke, Mrs. Stoneburner, Miss Emma Hartung, Herbert, Ernest Lawrence and Marie Schwarz, and G. F. Cridlebaugh spent Sunday evening with Mr. and Mrs. Fred Newman.

Margaret Schultz has been absent from school the past week on account of illness.

G. F. Cridlebaugh and Herbert Mielke spent Sunday afternoon with Herbert Schwarz.

The girls still lead in the attendance contest at school. The percentages for the first half of the term are: Girls 98.05 per cent Boys 92.82 per cent.

Mrs. Brunstier spent last week with her sister, Mrs. R. Rodgers.

## Leland News

Rev. and Mrs. Walbeck and family, Mr. and Mrs. Jimmie Helton were guests Sunday at the Oney Walker home.

Mr. and Mrs. Ed Fleshman went to Lewiston, Friday.

Mr. and Mrs. J. M. Woodward and family were dinner guests Sunday at the Robert Smith home.

Mr. and Mrs. Jesse Hoffman and family left for Boise Friday.

Mrs. Denzil Kuykendal, who has been ill, is slowly improving.

The Missionary Society met at the home of Mrs. DeWinter last Thursday for their monthly business and devotional meeting. About twenty members were present and also several visitors. A lovely dinner was served by the hostess, Mrs. DeWinter, assisted by Mrs. Julia Fleshman and Mrs. James Helton.

Mr. and Mrs. Ralph Oylear and family of Lewiston were Leland visitors last week.

About one hundred persons were present at the New Year's dinner given at the hall on New Year's day. After dinner a program furnished by the men was enjoyed by all.

J. M. Woodward was called to Waverly, Wash., Tuesday by the death of his father, who passed away Monday, January 7th. Mr. A. H. Smith, accompanied him to attend the funeral which will be held at Latah, Wednesday morning.

Rev. B. J. Carey of Genesee stopped over in Kendrick, Monday, on his way to the Cavenish country, where he visited friends.

## Apportion County Bond Money

At a meeting of the Nez Perce county commissioners, held recently, funds from an issue of \$100,000 county road and bridge bonds, were distributed among the various highway districts of the county, with the exception of the Lewiston highway district which waived its claim. The Potlatch highway district, comprising Cameron and Leland received \$8,607. The funds were apportioned according to the assessed valuation of the districts.

## Crescent Clippings

Sunday guests at the Axel Eekman home, in honor of Bert Lesa's and Wm. Zimmerman's birthdays, were: Mr. and Mrs. Claude Craig, Mr. and Mrs. Bill Dorendorf and daughter, Mrs. Anna Kimbley and children, Frank Sladoski, Ernest Loeser, and the guests of honor, Wm. Zimmerman and Bert Lesa.

Those neither tarry nor absent for the month ending January 4th were: Avia Craig, Stephen Lockhart and Bertha and Mary Loeser. The flu caused many to be absent this month. Up to this month the Crescent school has had perfect attendance.

Alice Cramer, Sue Robeson, and Mrs. Henry Brown visited the school Friday afternoon.

Mrs. Walter Hunt returned home Thursday, after visiting for several days with her daughter, Mrs. Bell Farrington. Ida Carey returned home, Sunday.

Sunday visitors at the M. L. Robeson home were: Mrs. Abe Dorendorf and sons; Josephine Brown and Eva Slatter.

Gus Farrington went to Lewiston, Saturday to visit his family there. Mrs. Farrington has had a gathering in her head which gave her another set back. Mr. Farrington brot Helen and Lloyd back with him Sunday.

Alice Cramer returned to her school at Rose Lake, Saturday.

Mr. and Mrs. Bill Dorendorf and baby visited with Mrs. Kimbley, Monday. Margaret, Kimbley accompanied them home and spent the night there.

The flu has just about left this neighborhood, at least, John Darby is the only one down in this immediate neighborhood at this time, to the best of our knowledge.

Ernest Loeser let Monday for the sheep camp.

The Ed Darby family spent Sunday evening at the John Darby home, listening to the radio.

## Big Bear Ridge News

Miss Opal Jones will give the 8th grade examinations at the Taney school house, Friday.

The pupils of Fern Hill, Steele, Taney and Rimrock sold \$11.30 worth of Christmas seals. Edwin Halseh sold \$1.75 worth and has the record of selling the most seals on this ridge.

Evan Lien returned Thursday from Clarkston where he spent several weeks at the Einar Brust home.

Mr. and Mrs. Harvey Farfield were visiting relatives in Lewiston, Saturday.

Mr. and Mrs. Wade Keene and children and Mrs. L. Keene were Sunday visitors at the Ira Havens home on American ridge.

Mr. and Mrs. Joe Clemenhagen and daughter, Fern, spent Sunday with Mrs. Clemenhagen's parents, Mr. and Mrs. S. Peterson near Deary.

A large number of neighbors were putting up ice from the Wade Keene pond, Wednesday. Miss Agnes Jones spent the week end with home folks.

The Lutheran Ladies Aid held their annual business meeting at the home of Mrs. A. Kleth, Tuesday afternoon. Officers for the ensuing year were elected as follows: Mrs. Halvor Lien, president; Mrs. Olie Lien, vice president; Mrs. Thorvald Nelson, secretary; Mrs. O. H. Forest, treasurer.

Attorney C. A. Oppenborn went to Lewiston yesterday where he had a case in court.

## Funeral of Homer Davis

Funeral services were held last Saturday at 2 o'clock at the I. O. O. F. hall in Culdesac for Homer Davis, second son of Mr. and Mrs. Ben Davis, former residents of Southwick but now living on a farm near Culdesac. Homer, age 19, died Friday after a week's illness due to pneumonia. Burial was made in the Culdesac cemetery.

Ministers in charge of the service were Rev. Bledshaw and Rev. Cross of Culdesac, and Miss Joy Bell, who delivered the sermon.

Homer Davis was born in Duncan county, Mo., Nov. 7, 1910. When he was three years old the family moved to Genesee, Idaho. Here he attended school for several years. Later the family moved to Southwick, Idaho, where Homer was very active in school, Sunday school, church and Epworth league. In the fall of 1927, he moved with his parents to Culdesac.

Homer was a boy of promising possibilities, and possessed a jovial disposition and even temperament. Besides his parents, he is survived by two sisters and six brothers.

## Bank Declared Dividend

A. W. Behrens, cashier of the Bank of Juliaetta, was a Kendrick visitor Wednesday. Mr. Behrens stated that at a meeting of the directors of the Bank of Juliaetta, held Tuesday of this week, an annual cash dividend of 12 1/2 per cent was paid to the stockholders. Ten per cent of last years profits were also added to the reserve account.

Officers were elected as follows: H. Melgard, president; Walter Clark, vice president; A. W. Behrens, cashier; Mary G. Behrens, assistant cashier; Albert Cox, teller.

## O. E. S. Installs Officers

Canyon Chapter, O. E. S., held its annual banquet at the Commercial hotel last Tuesday evening. A long table extending the full length of the dining room was tastefully decorated and arranged to accommodate the large crowd present. After the banquet the members went to the lodge hall where installation of officers was held as follows:

Worthy Matron, Anne Deobald; Worthy Patron, John L. Woody Assoc. Patron, Martha Woody Secretary, Ruby M. McKeever Treasurer, Fannie B. Greener Conductress, Lola MacPherson Assoc. Conductress, Bina Ruhl Chaplain, Dora M. Hully Marshal, Grace Adams Organist, Grace Thomas Adah, Freddie Schulze Ruth, Nellie Biddison Esther, Nannie Weaver Martha, Mary E. Nutt Electa, Annie Oppenborn Warder, Ruth Houck Sentinel, Paul Schultz

## Theatre Will Close

The New Kendrick Theatre will close for the winter months, the show tomorrow night being the last until probably some time in March or the first of April, depending on the road conditions. This action was necessary on the part of the management because of lack of patronage.

## Kendrick Hotel Improved

Spokesman-Review: Thru a contract made by John G. Heiber of Spokane with the Washington Water Power company, Kendrick, Idaho, is to have a modern apartment house. A building in Kendrick formerly used for hotel purposes is being wired for 110-point electric ranges, hot water heaters and provision for later installing electric refrigeration. Suites for five families are being provided.

This is one of the first installations of the kind to be made by the Washington Water Power company in a town of the size of Kendrick. A demand for better housing facilities is being felt in the smaller communities, it was reported.

## THE STATE WE LIVE IN

By Byron Defenbach

### Lower Snake River Canyon

Every year hundreds of Idaho people, seeking scenic thrills, visit the Yellowstone, the Yosemite, the Grand Canyon of the Colorado, or perhaps Niagara. To many of these it has never occurred that one of the greatest cataracts in the United States is near Twin Falls, Idaho; it is higher than Niagara and larger than Yosemite Falls. Still greater numbers are unaware that the box canyon of the Lower Snake is one of the greatest gorges in the world. It lies at the base of our Seven Devils and extends for some 20 miles between Huntington and Lewiston. The Yellowstone Canyon is 2000 feet deep, the Colorado nowhere exceeds 6,000. The Snake has cut its narrow bed down over 7,000 feet on the Idaho side, and while it lacks the high coloring of the others, it has a sublime and solemn grandeur all its own.

One of the finer descriptions is that written by Dr. F. B. Laney of our university, who says in part: "The dark color of the lava out of which this canyon has been carved, the black beetling cliffs with narrow side-gorges debouching into the main canyon, recall Dante's Inferno. Even a person unversed in geology must be impressed by the tremendous results which running water can accomplish when given sufficient time. This region would make magnificent state or national park, and the Seven Devils might well become a world-famous summer resort."

In selecting one of the several ways of reaching this section in summer, the visitor should first determine whether he prefers to look down at his scenery, or up. If the latter, there is railroad service from Huntington to Homestead, a station at the upper end of the canyon but below the famous oxbow bend. Or he may take the regular boat running up the Snake from Lewiston to the foot of the great gorge.

But perhaps the most satisfactory method is by auto, leaving the North and South highway at Council in Adams county, thence over 40 miles of fairly good road to Cuprum, principle town of the Seven Devils district. Thence by a road not so good, but still passable, 12 miles to the deserted town of Helena, once a village of 1,500 people.

A short walk from the road leads to the verge of the precipice, from which the tourist may look down into a chasm 500 feet deeper and 10 miles narrower from brim to brim than the grand, Grand Canyon of the Colorado. He will view scenery in many ways unequalled elsewhere on earth, and will agree with Dr. Laney and Prof. Livingston that "We should make this section still more accessible and better known to the public so that it may take the high place it deserves among the scenic wonders of the western states."

This canyon was first seen by white men 117 years ago. It was then practically forgotten for 50 years when prospectors began to wash for gold in the sands of the river's bar and of tributary creeks.

## Skating Rink For Children

Joe Gardner flooded the tennis court this week and made a dandy skating rink for the children. Jack Barnes installed two electric lights over the court and with the street light at the other end, it makes it possible for the rink to be used at night. The young folks have been getting a lot of enjoyment with their skates.

J. M. Woodward of Leland left Tuesday afternoon for Latah where he was called on account of the death of his father, who passed away Monday evening after a brief illness. He was nearly eighty years of age. Death was due to apoplexy.

### Plants Improve Main Highways

### Twenty-Five States Have No Laws Governing Trees.

(Prepared by the United States Department of Agriculture.)  
The act, passed at the last session of congress, which permits the federal government to pay half the cost of wayside planting along federal-aid highways, will give considerable impetus to the movement long fostered by women's clubs and other social organizations, and its effect will quickly be evident in an improvement of the appearance of the main interstate roads, according to the bureau of public roads of the United States Department of Agriculture.

**States Have No Laws.**  
Latest available figures show that 25 states have no laws governing tree and shrub planting along highways. A few of the remaining 23 have good laws, but the majority have indifferent ones.

The Massachusetts department of public works, and the highway and forestry departments of other states, have already demonstrated how much can be done at small cost to beautify the roadsides by judicious planting of native trees, shrubs, and perennial flowers.

The Massachusetts department is empowered by law to make roadside improvements, the work including such planting, replacements, and care as may be necessary. When a road is laid out as a state highway, it is generally made sufficiently wide to provide an area on each side of the traveled portion for roadside improvement. No trees, shrub, or plant within such a highway can be cut, removed, or new ones added without a permit from the highway department.

**Work in Massachusetts.**  
The work of roadside improvement in Massachusetts is done by the maintenance division. The cost is included as a part of the regular maintenance expenditure of the state. The state has a nursery at Palmer, where trees and shrubs are propagated and where the highway landscape supervisor trains men in the care of trees and roadside beautification.

Public acquisition in all states of suitable tracts of land along the highways for state parks, for purposes of recreation and conservation of timber and animal life, and the acquisition of small road-bordering strips and plots for development of parkways and parklets, says the bureau, would enhance considerably the appearance of the roadsides.

### Old Testament Writings

According to tradition, the canon of the Old Testament was closed by Ezra and the books probably compiled about 100 B C

### Julietta Confectionery

Frank H. Rider, Prop.

**Oh, Much!**  
A man who is just over the line of middle age was sitting in the lobby of a hotel admiring the scenery when two bits of the landscape moved in his direction and stopped right in front of him. "Good evening," said the girl, "you look lonesome." "I am," replied the man. "Well, forget it," spoke up the young lady. "Come along and we'll show you a good time." "I can't do it," he sighed. "It's too late." "Aw," replied the girl, "it's only 9 o'clock." "But I don't mean that," retorted the man. "I meant 20 years too late."—Ex.

**Artificial Lights**  
Some poultrymen claim that after the birds become used to getting off the perches when the electric lights are turned on, only about twenty minutes of light per night is necessary, particularly if the night lunch method is used, in which the lights are turned on for an hour after the birds have had some sleep. It will be noticed that a majority of the birds will return to the roosts in about twenty minutes. They apparently pick up enough feed during this time and are ready to go back to their perches.

**Tiger a Better Housemate**  
Keep a tiger in the house and you may succeed in living with it, but try keeping hatred in the heart and no power on earth can prevent catastrophe.—American Magazine.

**In the Whirl**  
A French woman recently looped the loop 212 times in just over an hour. It is wonderful what some women can do to move in high circles.—London Humorist.

**Girls' Basket Ball Team**  
Monday the high school girls earnestly started the basket ball season. The girls are working hard in preparation for their first game which will be scheduled soon. They will continue to practice during the noon hour until after the school play is given.

**Seventh and Eighth Grades**  
The 7th and 8th grades are reviewing for the state history and hygiene examinations to be given Friday.  
The attendance in the Junior High has been much improved since vacation.

"You call yourself an electrician and you don't even carry a pair of pliers."  
"Well, if I was a farmer would you expect me to carry a cow?"

**Question Box**  
1. Can a river lose its head?  
2. Are fish crazy where they go in seine?  
3. Can an old hen sing her lay?  
4. Can you mend a break of day?  
5. What kind of a vegetable is a policeman's beat?  
6. If you ate a square meal would the corners hurt?

**"Chuckler"**  
**Nominations for the Hall of Fame**  
1. William Ingle for being the speediest thing on foot.  
2. Carl Davis for his ability to ask useless questions.  
3. Emma Glenn for being such a delightful blond.  
4. Don Brocke for being the quietest boy in school.  
5. Alice Ingle for never chewing gum.  
6. Chuck Davis for being the most attentive boy in school.  
7. Ernest Schwartz for getting more dates than any boy in school.  
8. Herman Hartung for being a professional heart-breaker.  
9. Ivan Craig for staying in school in spite of his uselessness.  
10. George Bailey for his ability to ask other people's opinions on geometry.  
11. Bobby Fry for his ability to stumble over other people's feet.  
12. Elbert Long for being the most dignified young man in the senior class.  
13. Howard Dammarell for being the most bashful boy in school.  
14. Mr. Beardsley for being the nicest ladies' man in school.  
Miss Dille has moved from Mrs. Long's to the Kendrick hotel.

**Semester Ends**  
The first semester ends Friday, January 18th. Final examinations will be given on Thursday and Friday.  
At least one and perhaps two new courses will be offered the high school the second semester beginning on Monday, January 21st.

**"Juggler"**  
At the time the Juggler staff was organized and the paper was named there was much discussion as to the worthiness of such a title. It might be interesting in view of this fact, to note that Notre Dame, one of the most outstanding colleges in the United States also calls its student publication, "The Juggler."  
**Honor System, Dismissed at Yale**  
Yale has abandoned the honor system in examinations. This fall in all classes except those of academic freshmen and the Sheffield school, examinations will be carefully supervised. There will be no more examinations given in which there is not at least one instructor present in the capacity of proctor.  
**Miss Dille Ill**  
Miss Dille was absent from school last Friday on account of illness. Hester Knepper substituted for her.

### NOTICE OF GUARDIAN'S SALE OF REAL AND PERSONAL PROPERTY.

In The Probate Court of Latah County, State of Idaho.  
In the Matter of the Persons and Estates of Elbert Monroe Long and Lillian Joday Long, Minors.

NOTICE IS HEREBY GIVEN, That, pursuant to an order of the above court made and entered on the 8th day of January, 1929, in the above entitled proceedings, the undersigned guardian of the persons and estates of Elbert Monroe Long and Lillian Joday Long, Minors, will sell at private sale to the highest bidder for cash, subject to confirmation by said court, on and after the 26th day of January 1929, the right, title, interest and estate the said minors have in the hereinafter described real and personal property by virtue of being heirs at law of one J. Long, deceased, and the right, title and interest said minors have acquired by operation of law or otherwise in said property in addition to that acquired from said deceased as his heirs at law. The following is a description of the property to be sold under said order, to-wit:

(Description of real and personal property)

An undivided one-twenty-fifth interest in Lots 2, 3, and 7, Block 4, Original Plat of Kendrick; Lots 1, 2, and 4, Block 113. Entire Block 115; Lots 1 and 2, Block 116, Oak's Addition to Kendrick, all in the Village of Kendrick, Latah County, State of Idaho;

The SW $\frac{1}{4}$  of NW $\frac{1}{4}$  of section twenty-four (24), Township 38, North of Range 3 West; the S $\frac{1}{2}$  of NW $\frac{1}{4}$  of Section 19, Township 38 North of Range 2 West, lying and being West of the Big Bear Ridge road; the SW $\frac{1}{4}$  of NE $\frac{1}{4}$  and all that portion of Lot 2 and the SE $\frac{1}{4}$  of NW $\frac{1}{4}$  lying South and East of the Big Bear Creek and Ridge road as changed and established by the Board of County Commissioners on petition of G. W. Wright et al, all in Section 19, Township 38 North of Range 2 West, save and excepting that portion belonging to the Estate of Nicholas Gehlen, also saving and excepting that portion deeded to William Connick described as follows:

Commencing where the Potlatch Wagon road crosses the line between the land formerly owned by E. A. Fry and C. C. Candler in said Section 19, and running along said line fourteen and one half rods, thence six rods Southwest, thence fourteen and one half rods Southeast to the said Potlatch River Wagon road, thence East along said Potlatch River Wagon road to place of beginning; the SE $\frac{1}{4}$  of NE $\frac{1}{4}$  of Section 24, Township 38 North of Range 3 West, saving and excepting that part bounded on the Northeast and South by the Big Bear Creek and on the West by the Northern Pacific Railroad; that portion of the S $\frac{1}{2}$  of the NW $\frac{1}{4}$  of Section 19, Township 38 North of Range 2 West, lying and being West of the Big Bear Ridge road, containing 62 acres, more or less, saving and excepting a spring of water situated on said land in Section 19, together with the deed of Right of Way to T. J. Moser as recorded in Book of Deeds 62 at page 367, dated March 4, 1910, all of said lands hereinbefore described lying and being in Latah County, State of Idaho; A piece of land within the following boundaries, Commencing at the Northwest corner of the North Forty acres belonging to Francis LaBole, thence eighty rods South along LaBole line, thence with the North line of LaBole's West Forty acres running West forty rods to Mrs. Records Southeast Corner (this now owned by Geo. Knepper), thence with Mrs. Records or Geo. Knepper's East line North fifty rods to the Potlatch River, thence up the Potlatch River following its meander lines forty-five rods to Dave Waltz line sixteen rods East to beginning at LaBole's Corner (description taken from deed recorded April 14, 1905, Book 75 Deeds, page 286), saving and excepting road to William Freytag as follows: Commencing 194 feet Southwest of the South approach of the Wandcher Gulch Wagon bridge and on the East side of the public road and running in a northerly direction 550 feet to Frank LaBole's line, and excepting a piece of land heretofore deeded by said copartnership of N. B. Long & Sons to one F. B. Easterbrook, described as follows: Commencing at Northwest Corner of the North Forty acres belonging to Francis LaBole, thence eighty rods South along LaBole's line, thence with the North line of LaBole's West Forty acres to East side of the Wandcher Gulch Wagon road, thence following the East side of said Wagon road to the Potlatch River, thence up along the Potlatch River, following its meander lines to the Dave Waltz line, thence along the Dave Waltz line sixteen rods to the Francis LaBole's Corner, being the place of beginning, all being in the SW $\frac{1}{4}$  of NE $\frac{1}{4}$  of Section 19, Township 38 North of Range 2 West of Boise Meridian, in Nez Perce County, State of Idaho;

An undivided one-twenty-fifth interest in the general assets and business of N. B. Long & Sons, a copartnership, doing business at the Village of Kendrick in Latah County, State of Idaho, consisting of its general stock of merchandise, book accounts, live stock, and general equipment; All bids or offers must be in writing, and may be left at the office of the attorney for said guardian, or may be delivered to said guardian personally, at Kendrick, Idaho, or may be filed with the Probate Judge of said county, at any time after the first publication of this notice. The said property will be sold as a whole

and bids must be made and will be received accordingly.

Dated, January 4, 1929.  
E. T. LONG,

Guardian of the Persons and Estates of Elbert Monroe Long and Lillian Joday Long, Minors,  
C. A. Oppenborn, Attorney for Guardian, Business Address: Kendrick, Idaho. 2-3

## Budgetary Curb Aids Efficiency

Any Business Can Be Brought Out of Difficulties.

(Prepared by the United States Department of Agriculture.)

Co-operatives should have efficient management, says A. V. Swarthout, of the United States Department of Agriculture. This is essential to all business, but is probably even more than usually desirable in farmers' marketing organizations because of the peculiar psychology involved and the large number of individuals directly interested.

**No Comparison Made.**  
Mr. Swarthout points out that low costs of operation, high sales prices, and similar tests of satisfactory operations which are often applied in business are valuable only when they can be compared with some standard or with the same items in other similar organizations. Co-operatives meet difficulties in trying to apply such tests. Little information is available regarding costs in comparable organizations. Privately owned organizations rarely give out their figures for the use of co-operatives, and even if they did the figures would not often be comparable, since co-operatives commonly provide services not offered by nonco-operative business.

Scientific analysis of the business operations is a great aid in checking up operating efficiency. This has frequently been described as "budgetary control." Mr. Swarthout says that one banker who has had a great deal of experience with it, probably more than any other in this country, recently made the statement that he had yet to see any business—and he believed there was none—which could not be brought out of its difficulties and into a better position through the use of budgetary control.

**Five Essential Points.**  
In brief, the following five points summarize what can be accomplished through this method, he said:

- "1. Budgeting substitutes definite facts and figures for guesswork and intelligent planning for blindfold fumbling.
- "2. It employs co-operation; and it does more—it enforces co-operation; indeed, creates it.
- "3. It serves to materialize contemplated actions in such a way that the results of those actions become known before the actions themselves are set in motion.
- "4. It helps to restrain unwise expansion.
- "5. It provides a unified plan of operation—a financial working plan that, as every executive knows, is of the utmost value, and importance to any enterprise."

### Medium Producing Cows Like Alfalfa and Corn

Since there is seldom a deficiency in carbohydrates and fat when the dairy cow has all the roughage that she can eat, a roughly balanced ration may be obtained by balancing the protein of the grain mixture to go with the roughage and disregarding the carbohydrates and fat. For low to medium-producing cows good alfalfa hay and corn meal make up a reasonably good ration. To go with alfalfa hay, some grain mixtures are as follows: Mixture 1—200 pounds corn, 100 pounds oats, 100 pounds wheat bran, and 100 pounds linseed oil meal. Mixture 2—100 pounds barley, 100 pounds oats, 100 pounds wheat bran, and 300 pounds corn oil meal. Mixture 3—200 pounds corn-and-cob meal, 200 pounds oats, 100 pounds wheat bran, and 100 pounds cottonseed meal.

If prairie hay is used as roughage the ration may be as follows: Mixture 1—100 pounds corn, 100 pounds oats, 100 pounds wheat bran, and 200 pounds linseed oil meal. Mixture 2—100 pounds barley, 100 pounds alfalfa meal, 100 pounds corn oil meal, and 200 pounds linseed oil meal.

### Great Losses Incurred by Outbreak of Roup

Announcement of the results of recent study of the University of Arkansas college of agriculture pathologist of losses incurred by an outbreak of roup among a flock of poultry showed a reduction of profit during the year of the outbreak over the preceding one of \$2,425.68. The depreciation per bird was \$1.47. It is estimated that 90 per cent of the expected profit was lost due to loss of birds and egg production, according to Dr. J. H. Bux, state veterinarian, University of Arkansas college of agriculture.

The prompt removal of sick birds from the flock and individual treatment of the head lesions, the slaughtering of all recovering birds that might have been chronic carriers, frequent cleaning and disinfection of the house, and provision of ample air without draft prevented the losses assuming the proportions that were observed in several other flocks similarly affected.

## Litter Bedding Affects Manure

Dry Sawdust and Fine Shavings Are Clean and Satisfactory.

Straw is the bedding material almost universally used on the farm. It will absorb from two to three times its weight of liquid. If the supply is scanty, it will pay to cut the straw used as litter, for finely cut it will absorb about three times as much liquid as uncut.

Dry sawdust and fine shavings can be recommended as clean and satisfactory bedding materials. Their absorptive capacity according to fineness and dryness is from two to four times that of ordinary straw.

**Not Injurious to Land.**  
There is a more or less general impression among farmers that manure from stables and cow barns in which sawdust has been used as a litter is injurious to the land. While we would not say that this suspicion may not have some foundation, we have never been able to discover a single instance of such injury and inquiry has been made both in Canada and the United States in this matter, says the Farm and Home. Such injury could only occur on very light soils following very heavy applications. Most satisfactory evidence has been obtained from many farms upon which sawdust has been used as a bedding material for a number of years and upon which the soil is light and sandy. Naturally it is on heavy soils that this class of manure proves most effective.

One word of caution is necessary. Horse manure from stables using sawdust heats very rapidly, especially if left in the pile, and the excessive fermentation that may take place will seriously injure the manure. Such manure should be mixed with that from the cow barn, which can readily be managed when manure carriers are installed and a manure spreader used. Mixed manure (horse and cow) may be handled in the same manner as that made with straw. The saturation of the sawdust with the liquid excreta promotes the ready decomposition of the litter under favorable conditions of temperature, and the best place for this to take place, in order that the full manurial effect may be obtained, is the soil. If the manure cannot be spread at once, the heap should be kept moist and compact, as in the case of manure made with straw.

**Hardwood Sawdust Best.**  
The sawdust of hardwoods decompose more rapidly and further is richer in potash and phosphoric acid than that of pines and conifers generally, but no harm due to resistance to decay need be feared from the use of the latter, provided that it is not employed in larger quantity than is sufficient to absorb and retain the liquid excreta.

### Tests Show How Rains Rob Farms of Rich Soil

Tens of millions of dollars are being literally washed away in the rivers and streams of America through failure of farmers and other land owners to properly protect their lands from erosion, reports the Farm Journal. The rich surface soil, created by the accumulation of vegetable matter for many centuries, is laid bare by plowing and deforestation, and within a few years is swept away by rains, leaving only the semi-sterile earth beneath.

"A six-year-old experiment at the Missouri College of Agriculture shows that on a slope of 3.6 feet to 100 feet, soil left without any crops washes so rapidly that only 20 years are required to wear away the seven inches of surface soil," says the magazine. "With a rotation of corn, wheat and clover on the same land, 487 years would be required to move the surface seven inches, while on land left in sod continuously the time required to wash away the same seven inches would be 3,547 years."

Systematic terracing of such sloping ground, used in conjunction with regular cover crops, would make the life of the rich top soil almost interminable, it is pointed out.

### Agricultural Notes

Poor land is scarce where cows are abundant.

A rich farm turned off a yield; but grievous weeds use up the plant food.

Besides canning, many vegetables may be stored in cellars for winter use.

The names of the legumes are as strong towers; the wise farmer useth them and is safe.

Feed your pullets good grain mash and some cod liver oil if you want them to lay well all winter.

Concrete floors are sanitary and inexpensive. They are fairly satisfactory when kept well bedded.

Peat moss, commonly known as moss-litter (sphagnum) makes admirable bedding; it is soft and absorbent.

Farmers collect a lot of grief by planning their activities on the basis of what prices are when they start—not what prices are likely to be when they are ready to go to market.

### Life of Weed Seeds

"How long do weed seeds live?" is frequently asked by the farmer when he sees a fine growth of weeds in the spring on land that was left clean the year before. Such a sight is discouraging to him, and often is quite unexplainable.

The life of a seed in the soil depends upon many things: the amount of moisture in the soil, the temperature, the depth to which the seed is buried, and the nature of the soil itself. There are other quite important factors.

### Agricultural Hints

For the land's sake lime your soil!

The inoculation of the seed should be done shortly before seeding.

Potatoes require cool climate. Washington and Maine excel in this crop.

Use the big-team hitch if you want to get results and save the horses and driver.

Sweet clover has no equal as a combined soil-building, weed-fighting pasture and hay crop.

The farms of the thrifty have many conveniences; but the gardens of the idle are rather weedy.

It's a wise farmer who encourages his boy to take up club work—and he'll be wiser still afterwards.

Limestone should be applied at least six months and preferably a year before sweet clover, red clover or alfalfa is to be sown, they say.

## STOCK TICKER GIVES NATION QUOTATIONS

### Marvel of Accuracy Broadcasts Market News.

New York.—The turmoil which the visitor to the floor of the New York stock exchange sees on a busy day is not apparent in the operating rooms of the Western Union from where more than 5,000 stock exchange tickers in 239 cities, in 37 states and territories in this country and Canada are furnished with stock exchange quotations. A studied orderliness stands out from the noise and clatter of myriad telegraph apparatus.

To one who has stood over a stock ticker and watched it reel quotations hour after hour without the slightest falter or hesitation the question, "How does it do it?" presents itself. One is forced to marvel at the manner in which stock quotations appear in a steady procession as well as the almost uncanny accuracy of the quotations recorded.

The continuous performance of the stock ticker is due in great part to the employment of the old adage, "An ounce of prevention is worth a pound of cure." The ticker service is so regulated, so carefully guarded that a break in the mechanical operation of a ticker is rare. The circuits which carry the quotations are inspected, tested and watched over with persevering care by the maintenance department of the telegraph company. The accuracy of the ticker is due to the training of the operators who manipulate the sending apparatus. All quotations are sent out over a typewriter-like keyboard by operators who have been schooled in this work. How accurate they are may be judged from the fact that in a recent twenty-eight day period, one operator depressed the keys of the sending instrument more than one and one-quarter million times without making a single misprint.

#### Handling Quotations.

Stock quotations go to the operating rooms of the Western Union over the exchange's own tickers, which also supply the offices of exchange members in downtown New York city, direct from the floor of the "big board." They are relayed by the telegraph company from two points. An office at 40 Broad street in the heart of the city's financial district, and only a stone's throw from the exchange, transmits quotations to New York city, New England and to practically all points east of Ohio and north of Virginia. From 24 Walker street quotations are sent to tickers in the South and West.

As the stock exchange ticker records the quotations at the telegraph company's office, the tape passes before a girl seated at a keyboard which resembles a typewriter keyboard. This operator merely types out the quotations as they are read from the exchange ticker tape. When a key is depressed it creates electrical impulses which in turn work the intricate mechanism of the ticker, resulting in the printing on the ticker tape of the letter or number controlled by its particular key. Only a few seconds elapse between the depressing of the keys in New York city and the imprinting on the ticker tape in distant cities.

To insure accuracy of all quotations, a ticker alongside of the sending operator records what has been sent and another employee compares this with what has been received over the stock exchange ticker.

#### Rigorous Censorship.

An interesting feature of the ticker service is the fact that the stock exchange through a special committee exercises a rigorous censorship over ticker locations. Only those persons or firms which have been passed upon by this committee may rent a ticker carrying New York stock exchange quotations. This is done to keep quotations from bucket shops and from unscrupulous stock dealers and others who might use the quotations for illegal or unethical purposes.

While by far the greatest number of stock tickers are in the offices of brokers, with bankers taking second place, a goodly number of these instruments are in hotels and restaurants and in some cases in private homes.

Not only has there been a tremendous advance in the number of stock tickers in use, but today hundreds of brokerage houses have their own private leased telegraph wires for orders and executions.

Stock brokers are authority for the statement that their business could never be carried on over such a wide area and with such tremendous speed and accuracy were it not for the organization of the telegraph company. "We would be lost if it weren't for the tickers," one broker said recently. "This marvelous instrument is the eyes through which thousands of persons in all parts of the country view the stock market. What the ticker says is weighed in the balance by investors and speculators far and wide. Through the ticker service the man in San Francisco has just as much chance to keep authentically informed of the market as the man in Philadelphia or Boston or Brooklyn. Quotations reach the coast at practically the same time they reach uptown New York, and it is just as easy for a client to wire a trading order from Los Angeles as it is for a client to phone his order from Central Park West."

#### Religion Gets Billion

New York.—Something like a billion a year is given by Americans to religion. Total contributions last year for philanthropic purposes were \$2,219,700,000. Religion got 48 per cent.

## BILLY GOAT CONSTANT PAL OF TRICK HORSE

### Follows His Equine Idol Wherever He Goes.

Charleston, S. C.—For several years Moonbeam, a trick horse, and Bill, a bearded black goat of no particular ancestry, have been inseparable companions. The story of their friendship is the story of Bill's admiration for Moonbeam.

Once Moonbeam did Bill a service, and now Bill will sleep nowhere but in Moonbeam's stall. When Moonbeam takes their master, Dr. W. H. Price, for a ride, Bill goes along, and does whatever Moonbeam does. This is sometimes hard, for Moonbeam is an accomplished hurdler, which little Bill decidedly is not, and many times the goat has come to grief in his attempts to copy the actions of his equine idol.

It is a long story, and begins with Moonbeam. Several years ago, when his age was three, Moonbeam belonged to a farmer, and was known as "a mean critter, right enough." He had never been ridden nor driven, and the only way to enter his pasture with safety was first to drive him into his stall with rocks.

#### Bought by Doctor.

One day Doctor Price, who was then county inspector of meats, went to the country for a vacation and saw the horse. When he was told of the animal's vicious disposition he took a heavy club, entered the pasture, and when Moonbeam rushed forward to attack him struck him on the nose. The horse was so surprised that that afternoon he let himself be saddled and ridden, and Doctor Price bought him and made of him a well behaved animal, with numerous tricks in his bag, including kneeling at command and rolling over.

And now enters Bill on the end of a string held in the hand of a small boy with a tear-stained face. His father had told him he could not keep Bill, but must take him to the city slaughter house to be killed. Fortunately for Bill, the superintendent of the slaughter house was a kind-hearted man. He bought Bill and promised not to kill him.

For some time Bill dwelt unmolested in the slaughter house stable where Moonbeam had a stall all his own. One day in November, 1927, Bill broke a leg, and next morning was found lying in the corner of Moonbeam's exclusive stall, with Moonbeam guarding him from intruders. Even Doctor Price could not enter the stall until he had pacified the horse.

#### Lives With Horse.

In a few weeks Bill was well again, and every one supposed he would go out on his own. But no—he stayed with Moonbeam.

Bill had refused food before. Now he ate heartily, but only in the presence of the horse. How much he admired his equine benefactor was soon shown when Moonbeam was taken out to try some hurdles. The goat trotted alongside.

They came to the first hurdle and the horse went over, easily. Bill stopped short, eyed the fence, and then, with a mighty standing leap came within inches of the top, but crashed back to the ground. Native cunning prompted him to run around the hurdle and catch up with Moonbeam, but he had learned the trick and cleared the next hurdle by inches.

Then Moonbeam did his stunt of kneeling, and Bill promptly knelt beside him. Moonbeam rolled over, and Bill instantly did the same, and got his horns stuck so fast in the sand he had to be helped to his feet.

Nowadays the two share a stall on their master's estate on Jolly Island, a fashionable suburb of Charleston. The island is full of goats running at large, but Bill never even bats an eye at them. His one and only interest is Moonbeam. So content is he that when it becomes necessary to take the horse out alone Bill has to be tied in his stall, where he whimpers until Moonbeam is brought back again.

## Page and Half Written by Dickens Bring \$9,000

Philadelphia.—A page and a half of the original manuscript of Charles Dickens' famous "Pickwick Papers" brought \$9,000 at an executor's sale of books and historical documents of the collection of George W. Childs, publisher, who died in 1894.

On the faded yellow paper, still well preserved, is the conclusion of the sixteenth chapter of the story. The paper is signed "Charles Dickens" and "Boz," one of his noms de plume, and dated 1838. It was purchased by Charles Sessler, a collector.

## Artificial Legs in Shop Windows Menace Morals

London.—Artificial legs for the display of silk stockings in shop windows are a menace to public morals, in the opinion of Rev. P. Y. Knight, vicar of the village of Ryehope, near Sunderland. When the vicar gazed upon a display in the shop of the local draper, he paid the draper the price of the legs, on condition that they be taken from the window and burned.

## Public as Judge of Art Displays Expert Taste

Washington.—The public is about as good a judge of paintings as artists and professional art critics, directors of the noted Corcoran Art gallery of

Washington have found out.

The Corcoran gallery, at its biennial exhibitions of contemporary American oil paintings, conducted a public referendum among the visitors to the exhibition on their choice as the best painting. A painting by Carl Melchers of New York, called "A Native of Virginia," was selected. It shows an old country woman leaning on a grubbing hoe.

Melchers, in previous exhibitions, has won second, third and fourth respectively, in choices made by a jury of leading artists and critics of the country.

C. Powell Minnigerode, director of the gallery, said the picture unquestionably was one of the most noted in the exhibition. A \$200 prize went to the artist.

## CUPID'S ACTIVITY CRAMPED BY COLD

Fewer Single Girls Found in Warmer Cities.

Madison, Wis.—Cold weather cramps the activity of Cupid. More girls between fifteen and twenty-four years of age living in warm climates get married than girls of the same class in colder temperature cities, a survey submitted in the school of commerce at the University of Wisconsin reveals.

A correlation between temperatures and wedding bells is found. The warmer the climate the better chance a girl has to get married. In twelve southern cities of 100,000 or more population, having annual mean temperatures ranging from 59 to 69

degrees, 27 per cent of the native white women are single, the study finds.

In twelve northern cities of the same class, on the other hand, 33 per cent of the women are single, the annual mean temperature in these cities ranging from 45 to 48 degrees.

Smaller cities with populations between 25,000 and 100,000, however, do not show such a high correlation between temperatures and marriages. In fifteen warm cities of this class, with annual temperatures running from 60 to 70 degrees, the percentage of single women is 26. In fifteen colder cities of this class, with annual mean temperature from 38 to 48 degrees, 30 per cent of the women are single.

The statistics for the survey are based on the 1920 census report. For the temperatures the United States weather bureau, the World almanac, and Climatology of the United States were used.

The percentages necessarily had to be corrected when the percentage of men exceeded the percentage of women or vice versa, the survey states.

Of the 144 cities included in the survey, Superior, Wis., had the lowest annual mean temperature, 38 degrees. In that city 37.3 per cent of the native white females are single. The highest mean annual temperature was that of Tampa, Fla., 72 degrees. In that city, 20.4 per cent of the native white women are single. This shows a difference of 16.9 per cent between the coldest and warmest city.

## Implement Repairing Done During Winter

## Fine Time to Put Machinery and Tools in Shape.

Use your winter leisure time to put your field machinery in fine order.

Any workman will do better work if he has better tools. This is true of the farmer just as it is of everybody else. Field work can be done better with good, sharp, well-adjusted tools than with some that are allowed to get out of kilter, become dull, etc.

It pays, and pays well, to keep implements and tools in the very best of condition. To allow them to get into poor condition is inviting rapid and serious depreciation.

During the winter, when there is no great amount of work, is a fine time to put the machinery in good shape for the following year. Begin with your plows. See that the shares are sharp, have good points, and that the hole bottoms are well covered with grease or some protection against rust. Plow adjustments can be made so far as possible, but for actual work it is pretty hard to do this without getting into the field.

Likewise with the cultivator; their points should be sharpened and their surfaces polished and coated with some nonrustable material that can be easily removed. Look to the boxing on the wheels. Sometimes they wear badly.

Go through the whole list of machines—corn planters, drills, mowers, rakes, binder, manure spreader, etc. Examine them from end to end. See that all necessary parts are in good shape or, if badly worn, get new ones ordered immediately. Don't forget when the new ones come that they should be immediately adjusted to the machine.

## Good Business Judgment to Purchase Phosphate

It shows good business judgment to buy phosphate and apply it to grain fields, state A. R. Whitson and Griffith Richards of the Wisconsin College of Agriculture in a special circular entitled "Use Phosphate—It Will Pay."

They point out that: Legume crops will produce heavier yields if supplied with plenty of phosphate.

Phosphate will hasten the maturity of small grains and corn from one to two weeks.

Phosphate is constantly leaving the farm in crops, bones of animals, and milk sold.

Phosphate will be lost no matter how carefully the manure is handled. On the average Wisconsin farm for every dollar spent for phosphate a return of from \$2 to \$4 may reasonably be expected.

How may phosphate best be applied and in what amounts?

The greatest money return will be obtained by broadcasting for the small grain crop with which alfalfa and clover are sown.

## Around the Farm

Repair your chimney and prevent fires.

Sharp plowshares mean better plowing and less power to do it.

Soy beans should be sown for hay as soon as possible after corn planting.

Cod liver oil fed to hens that are housed closely during winter helps keep up egg production.

Conserving the fertility value of the manure produced is an important part of every dairy farm program.

Culling the poultry flock is important but it is not a substitute for feeding and good management.

Limestone works slowly in correcting soil acidity, especially if it is not thoroughly mixed with the soil by disking, harrowing, or cultivating.

# Progress Makes a Big Mark in the Palouse Country!

**THE CATERPILLAR TRACTOR CO.** takes another forward step by a division of territories into smaller, more closely knit dealer units in order that quicker, more personal and direct service may be rendered. The Palouse Country benefits directly by the organizing of the . . . .

## The Palouse Tractor & Equipment Company

This new company . . . exclusive dealers for "Caterpillar" Tractors, Holt Combined Harvesters and Russell Graders in Whitman, Latah and Clearwater Counties . . . . has been formed by H. W. Fairweather and L. J. Acuff, formerly part owners of the Hofus-Ferris Equipment Co., Spokane.

The sales and service staffs of the new company are composed of men thoroughly familiar with the farming, logging and highway maintenance problems of the Palouse Country. Besides the lines above named, the new company will carry a complete line of power operated equipment, tractor tools and accessories.

You are cordially invited to visit

## The Palouse Tractor & Equipment Company

H. W. Fairweather, Pres.-Treas. L. J. Acuff, V.-Pres.-Sec.  
623 Grand St. . . PULLMAN, WASH.

**ORDER TO SHOW CAUSE**

In the Probate Court in and for the County of Latah, State of Idaho.

In the Matter of the Estate of Nancy J. Lewis, Incompetent.

Order to Show Cause Why Order of Sale of Real Estate should not be made.

L. G. Peterson, Guardian of the Estate of Nancy J. Lewis, Incompetent, having filed his petition herein praying for an order of sale of all of the real estate of said incompetent, for the purposes therein set forth.

It is Therefore Ordered by the Judge of said Court, that all persons interested in the estate of the said incompetent, and the next of kin of the ward, be and appear before the said Probate Court, on Monday, the 28th day of January, 1929, at 10 o'clock in the forenoon of said day, at the Court Room of said Probate Court, in the Court House in said Latah County to show cause why an order should not be granted to the said Guardian to sell so much of the real estate of the said Nancy J. Lewis, Incompetent, as shall be necessary.

ADRIAN NELSON, Probate Judge.  
Dated this 28th day of December, A. D. 1928. 1-4

**Notice of Annual Meeting**

Notice is hereby given that the regular annual meeting of the stockholders of the Farmers Bank, of Kendrick, Idaho, will be held at the office of the corporation in Kendrick, Idaho, at 3 o'clock p. m., Tuesday, January 22, 1929, for the purpose of electing a Board of Directors to serve for the ensuing year and the transaction of any other business that may regularly come before the meeting.

Dated December 18th, 1928. 51-4 W. J. Carroll, Cashier.

**NOTICE TO CREDITORS**

In the Probate Court of Latah County, State of Idaho.

In the matter of the Estate of John Enoch Riley, deceased.

Notice is hereby given that the undersigned, administratrix, of the Estate of John Enoch Riley, deceased, to the creditors and all persons having claims against the deceased to exhibit them, with the necessary vouchers, within six months after the first publication of this notice, to said administratrix, at the office of C. A. Oppenborn, in the Town of Kendrick, Latah County, State of Idaho, the same being the place for the transaction of the business of said estate.

Dated this 5th day of January, 1929.

Amelia Riley, Administratrix of the Estate of John Enoch Riley, deceased.

C. A. Oppenborn, Attorney for Administratrix; Residence, Kendrick, Idaho.

First publication, January 11, 1929. 2-5

**Call for Bids**

Sealed bids will be received up to and including January 15, 1929, at the office of the Clerk of Joint School District No. 24, Kendrick, Idaho, for the furnishing of 65 cords of seasoned green cut yellow pine or fir wood, to be cut 42 inches in length, to be delivered and piled in the wood pit of the Kendrick school building on or before August 1, 1929. For the purpose of the bid a cord will measure 42 inches, 4x8 feet. Successful bidder to furnish bond for the fulfillment of contract.

E. H. Emery, Clerk Joint School District No. 24. 52-3

**Aviators Don't Mind**

"To get a good view of an airplane right overhead, you have to turn up your nose at it," says Sam Silks, the town wag, "but the pilot don't mind such conduct in folks that's plainly beneath him."—Farm and Fireside.

**ONE OF THE OLDEST POTLATCH PIONEERS**

Came To Idaho Territory in The Year 1880.

The following sketch of the life of W. T. Wright, who is one of the pioneer residents of the Potlatch, gives some interesting information that will be particularly interesting to some of the older residents of this community:

One of the oldest, as well as one of the most beloved of the pioneers of the Big Potlatch Ridge section, is W. T. Wright, now of Kendrick.

Mr. Wright was born at La Porte, Indiana, on the 16th of September, 1837. He is, therefore, now in his 92nd year. Aside from the fact that his eyesight and hearing are failing within the last few years, Mr. Wright is quite hale and hearty—especially since he is now a member of the class of non-agenarians.

In 1864, at the age of 22, Mr. Wright moved to California, where he divided his time between the carpenter trade and the nursery business.

Sixteen years later—in 1880—Mr. Wright came to what was then called Idaho territory, taking a homestead on Big Potlatch Ridge between where the towns of Leland and Kendrick are now located. Mr. Wright's wife was the third white woman to locate on the Big Potlatch Ridge—the other two being Mrs. Lucy Hoffman and a Mrs. Seward.

At the time the Wrights settled on the Potlatch there were no roads—not even up the river to Lewiston.

W. T. Wright, Frank Eberle and Mrs. Seward formed themselves into a good roads committee, and went to Lewiston in the interest of road-building from Lewiston to the Potlatch country.

**Secure Paper's Help**

It seems that, at that time, A. F. Parker was publishing a weekly newspaper in Lewiston, which bore the name of "The Nezperce News." The committee decided that their best course of procedure was to call upon the editor.

Parker at once took their cause to heart and promised the three members of the "good roads committee" that he would help them. Parker became so interested in the roads project that he made a solemn promise that not a paper would go out from his office that did not contain a boost for the road to the Big Potlatch country. He kept his promise to the letter.

Like all editors, Parker wished to increase the circulation of his paper. The three road men were asked to subscribe—and they did—for one copy, or rather one yearly subscription—each paying one-third of the subscription price. When the paper arrived they would "pass the paper" as others "passed the bread." Money was scarce in those days on the Big Potlatch.

**Editor Parker Works**

Two years later the same Aaron F. Parker made a visit to the Big Potlatch Ridge settlement, and called on his friend W. T. Wright, who was threshing his grain. The crew was short-handed. So Parker hauled off his coat and "made a hand" till the job was finished. This act so pleased the members of the threshing crew that every one of them added his name to the editor's subscription list.

The Big Potlatch river used to carry much more water than it now provides—the snow being much deeper in the mountains and the channel had not then been cleared of logs and other debris. So the river could not

be "forded" during certain seasons of the year. The settlers on the Big Potlatch Ridge were thus seriously handicapped in transporting supplies and produce to and from their homes.

Finally, Judge William Wing devised a plan to supply this lack, by tying a rope on one side of the Big Potlatch river, and then securing the other end in like manner on the opposite side of the tortuous stream, and suspending a huge "basket" in which not only groceries and other merchandise were sent across the river, but many tons of grain were sent over the air-line "suspended bridge." That was the first "ferry" across the Big Potlatch river.

**Built First Bridge**

This served its purpose for several years thereafter, but in 1885, W. T. Wright took the contract of building the first bridge across the Big Potlatch river, which was where the village of Juliaetta now is located. As "head carpenter," Mr. Wright was to be paid \$4 a day, while his two "helpers," Marion Shepler and John Wells, were to have \$2.50 a day each. But the money-having run short, Mr. Wright, in order to get the job completed, donated much labor—his per diem pay, he said, perhaps figuring out not more than half what he was to have received. All the material had to be hauled from the timber for the bridge structure.

(John Wells, who helped Mr. Wright build this bridge, fell dead on New Year's day, while listening to the radio at his farm four miles from Orofino).

The first school taught on Big Potlatch Ridge was conducted in the Charles Hoffman preemption residence, with Miss Belle Welker as teacher. Later Miss Welker became the wife of Sam Oylear, well known to Lewiston residents.

**Use Frostbitten Wheat**

Mr. Wright stated that when he first settled on the Potlatch flour sold at 50 cents per sack or \$2 per barrel. It was made from frostbitten wheat, however, but the settlers were glad to eat the bread made from it. Nearly all the wheat was damaged by frost in those early days—the climate having been much more severe then than now. Bacon was so high that the most well to do settlers of the Potlatch could not reach it.

Except Indian ponies, horses were exceedingly scarce and high—but across the Clearwater river there was an abundance of wild cattle—owned mostly by Bill Caldwell and William Kettbach, of Lewiston. Good milk cows were then worth about \$17 per head. A fairly good suit of clothes was worth about \$12, while a pair of boots brought from \$7 to \$8 per pair.

**Recalls Father White**

"Old Father White" was the first circuit-rider-preacher on the Big Potlatch, but other itinerant preachers had preceded "Father White" in holding divine services, now and then. Father White was a Methodist, and he was a devoted man, holding the confidence and respect of all those who knew and heard him.

For many years W. T. Wright served as justice of the peace on the Potlatch—his custom having been to have litigants settle all their difficulties out of court if that were possible.

**Notice of Annual Meeting**

Notice is hereby given that the regular annual meeting of the stockholders of the Juliaetta Cherry Growers Association, of Juliaetta, Idaho, will be held at the City Hall in Juliaetta, Idaho, at 10 o'clock a. m., Monday, January 21, 1929, for the purpose of electing a Board of Directors to serve for the ensuing year and the transaction of any other business that may regularly come before the meeting.

Dated January 10, 1929. A. W. Behrens, Assistant Secretary. 2-2

**Volcanic Locations**

Volcanoes generally are to be found along coasts and on islands, many of them forming islands themselves, such as Stromboli, off the coast of Italy. No active volcanoes are found in the interior of continents, those in California and Alaska, although somewhat removed from the coast, being considered as part of the coastal chain of mountains.

**No Fun Then**

Anybody who thinks bridge is a pleasant pastime never has pulled a boner while playing with a woman who considers it a life and death matter.—Cincinnati Enquirer.

**What Built the City of Kendrick?**

The Same as What Built the City of New York --- More Business is the Answer!

THAT IS WHY WE ARE STARTING IN BUSINESS IN KENDRICK!

A new business for the Farmer where he can get just what he wants.

THE KENDRICK MACHINERY COMPANY.

**Why?**

Because we will stock every implement the farmer needs and repairs therefor. I personally have lived on a farm all my life and therefore know fairly well a good machine from a poor one. It is our intention to stay with you in this business for years to come. I personally have had a great deal of experience in the past few years with every make of farm implement—with every make of tractor—used and worked them personally which alone gives me valuable experience starting in this business.

As I have always said, Tractor Farming has come to stay, and the farmer needs to change over to the tractor machinery. Ask me any question about farm machinery, especially tractors and tractor machinery, and I will tell you just as is. There is no implement line on earth that has the best implements all the way thru. They all have some poor pieces of machinery which are not worth taking home. We are not going to stock such machines.

It is true here are several very good makes of wheel tractors sold there. Put them where they belong (on the level), but listen, Mr. Farmer, take your hat off to the Cletrac Crawler in Idaho in the hills, a tractor which will go where you want it to go. A wheel tractor will go where IT wants to go. That's the difference. I have sold over a hundred of these husky hill climbers and not one dissatisfied owner. Out of one hundred Cletracs sold in the last three years only six have had to be re-bored. Many have over 400 working days to their credit, in other words, over 100,000 miles of thirty miles per hour, engine speed. How many autos will make 100,000 miles without repairs?

The Cletrac with its sensitive steering device is the only tractor known which will handle a cultivator for beans successfully. Our Model W will not cultivate—only the 20 and 30. We build cultivators right here in our shop. With every Cletrac sold for cash, without trade ins, we give a new cultivator FREE, all for the price of the tractor, until May the 1st, 1929.

Here we are about ready to overhaul any make of tractor, auto machinery of all kinds. Our shop will be the most complete to be found anywhere. We have installed over \$2,000 worth of the very latest machinery. We can rebuild tractors and autos from the bottom up. In fact we will fix anything from a tin can to a church organ. And above all, remember we guarantee a first class job or come and get your money back.

We will have on the floor, a complete line of machinery, new and used tractors of all makes with an O. K. guarantee behind all our used tractors. New Oliver plows, harrows, discs, drills—everything the farmer needs. Gas and oils, repairs and parts. We have steam to cut grease off your autos and engines.

Come in and see us when in town. We have a smile for all. Let us tell you about our new Cletrac 30—three speeds forward, electric ignition, lights, starter and a 40 rear end—a real job.

We will have all repairs for Cletracs and will rebore tractors and auto engines, put in the best light weight pistons with four rings, guarantee a perfect job or give you a new engine. We came here to do business and the only way to get business is to do a job same as we would demand for ourselves.

We have one Cletrac 30; 10-20 International; 12-20 Twin City—Good buys.

**Kendrick Machinery Co.**

**Farm Notes**

Trees make a poor roost for hens.  
Proper shelter for farm animals calls for more stings and sheds.

The good things said about alfalfa may be applied almost as well to the clovers.

The long winter nights are never too long for the man who wants to improve himself by study.

The common red clover makes more growth in its two crops the second season than the mammoth.

Under the present system of grain distribution there is little to prevent feed grain being used as seed.

On heavy soils it is usually easier to get a seedbed in the spring when the plowing is done in the fall, because of the action of the winter weather on the soil.
