

THE STATE WE LIVE IN

By Byron Defenbach

Red Heroines of Idaho History

"With gentle voice and smiles she lead the human troupe."

(Victor Hugo.)

Of course. It is a paradox of the mind; we forever believe things that we know to be untrue. We should do so. Who wants to imagine a heroine as other than gentle, and smiling, and above all, beautiful?

So in the city parks of Lewiston and of Portland there stand marble figures of the foremost female character in Idaho history, the beautiful Shoshone girl, **Sacagawea**.

We are not quite sure of the meaning of her name; was she the "bird woman", or the "boat launcher"? Born not far from the site of Salmon City, probably in the year before Washington became president, she was captured at the age of 14 by a hostile tribe and taken over into Dakota.

Here the Frenchman Charbonneau either bought her, or won her in some gambling contest. When she was 19, Lewis and Clark picked her up with her husband. In the long trip to the Pacific and back, she contributed more to the success of the expedition than did her husband, Pete.

In February, 1806, a little Charbonneau arrived; she carried him all the weary miles to Astoria, thence back to St. Louis, thence to her future home among the Sioux. In death they were not divided. She died in 1884 at the age of 98. She and her papoose are lying side by side under the soil of Wyoming.

Pierre Dorion's Woman

The entry of this nameless and tragic figure into the pages of Idaho's history occurs five years later than that of Sacagawea. Her "husband" was the half-breed son of a French-Canadian member of the Lewis and Clark party.

With her man and two little children she accompanied the Hunt expedition from St. Louis to the Pacific, sharing the unbelievable suffering of the awful trip down the Snake. On December 30, 1811, she gave birth to another child who died a week later.

The next year the family came back to Idaho, locating on the Boise River. Here every man of the party save one was killed by Indians, and that one, LeClerc, was mortally wounded.

Taking two horses, she tied the wounded man across one, loaded the other with supplies, she and the children walking, thus stealthily making her way to the West and safety. The man died the third night out.

Arriving at the foot of the Blue Mountains in late fall, snow made further progress impossible. She built a brush wickiup, killed the horses and froze their flesh. To this she added from time to time, squirrels, mice, roots, dried berries. In late winter supplies ran low. Breaking camp, the three made their toilsome way to friendly Indians near Pendleton, at which point there passes into oblivion one of the bravest, most loyal, most resolute characters on the pages of American history.

Jane

When in the summer of 1860 Captain Pierce with four companions approached the country of the Nez Perce, he found them determinedly opposed to the entry of white men. In order to elude the enemy, night traveling was necessary, and a native guide was indispensable.

At the month of the Alpowa, just below Lewiston, the party succeeded in interesting and securing the services of "a gentle Nezperce maiden" known as "Jane", who knew the mountains as a preacher knows his Bible.

Without her help the discovery of gold at Pierce might have been delayed many years. That dramatic after-supper moment when Bassetto, pipe in mouth, first saw grains of gold in the sands of Canal Gulch, marks the beginning of settlement and civil-

Southwick News

Clarence Henderson and family of Potlatch, are visiting with relatives this week.

Mr. and Mrs. Wm. Berriman, Mrs. Yaegar and Grandma Black spent Monday at the Homer Betts home.

Mrs. Harold Whiting spent Tuesday the guest of Mrs. Jack Travis.

Wm. Henderson and wife, Milton Benjamin and wife, Clarence Henderson, wife and daughter spent Monday at the home of Elton McCoy.

Maxine Phillips was the overnight guest of Rowena Russell Monday night.

Pete Stump and family, Attlee Mustoe and wife, John Lettenmaier and family and Harold Whiting and family spent Friday evening at the home of Given Mustoe.

Mr. and Mrs. Wm. McClelland, Lillian McClelland and Mrs. Bert McIntire were the afternoon guests of Mrs. Yaegar, Tuesday.

Clarence Henderson and wife were the overnight guests at the home of Harold Whiting, Monday night.

Attlee Mustoe and wife and Given Mustoe and family were the Sunday guests of Mr. and Mrs. Homer Betts.

A party was given at the gym building Friday night by the pupils of Mr. Cook's room. A good time was reported.

Mrs. Otto Schoeffler and Mrs. Edna May are visiting with their sisters in and around Southwick this week.

Floyd Russell and family, J. R. King and family and Tom King and family spent Sunday at the home of Ray Southwick on Cream Ridge.

Nels Longeteig and wife and Mrs. Weipert of Clarkston spent Tuesday at the home of Ben McCoy. Mrs. Weipert just recently returned from Calif., where she spent most of the winter with her daughter.

Miss Lena Reiche spent last week visiting at the home of her sister, Mrs. Alex Lawrence.

Mrs. George Jones returned home Saturday evening after spending several weeks with her daughter at Elk River.

Delbert Hayward and wife were the supper guests of Nadine McCoy Sunday evening.

Given Mustoe and family spent last Tuesday evening at the home of Wm. McClelland.

Leo and Irvin Lohman and Roy Gertje were overnight guests at the home of Henry Brammer Monday night.

Mrs. Hiatt who was ill and unable to teach school last week left for her home in Orofino, Saturday, for a weeks stay before resuming her school work.

Jake Neuman was busy helping Mr. Brammer saw wood last Friday.

Mrs. Ziemann left last Saturday for Lewiston for a visit with her daughter who is attending school there.

Jim Cook and wife of Crescent spent Friday with her sister at Southwick.

Miss Pearl Powell spent the week end with her sister, Mrs. Frisbee near Teakean.

Gladys Candler, Margaret and Clarence Hund spent the week end at their homes at Teakean.

Lloyd Bekman has moved his family to Fix ridge.

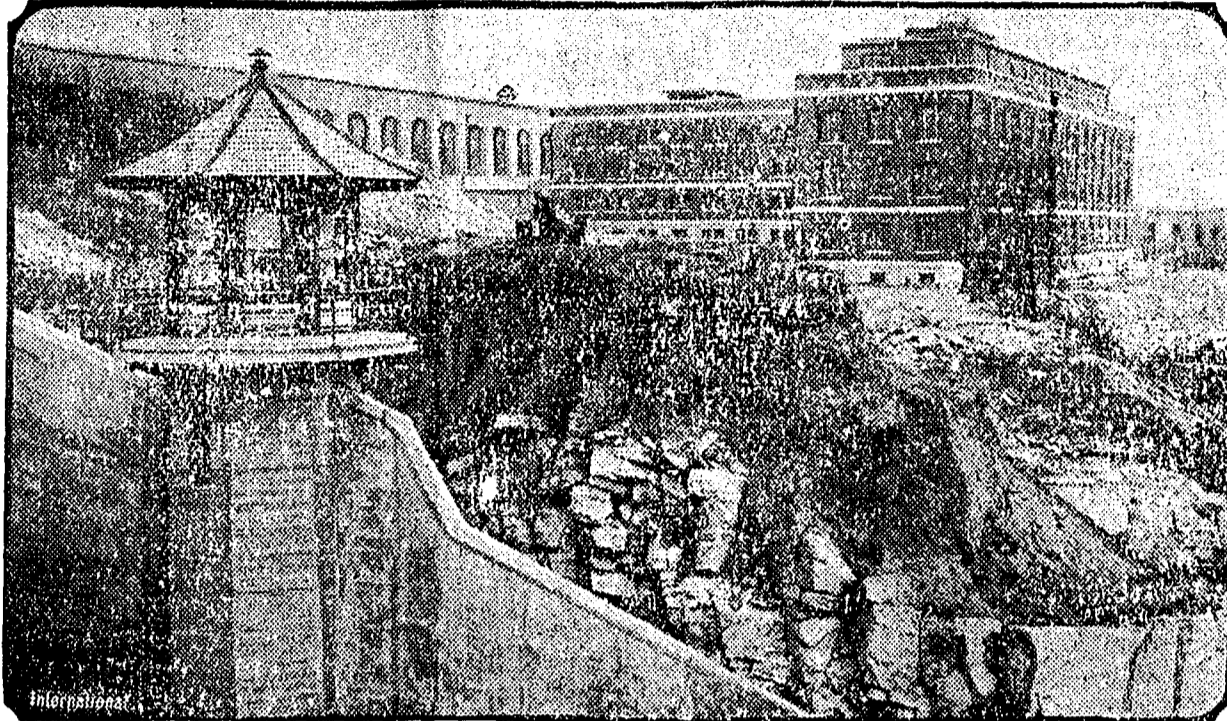

Appoint Baseball Committee

The chairman of the commercial club has appointed a committee of seven members who will meet in the near future for the purpose of selecting a baseball manager. They will also offer suggestions as to the best method of handling the team for the season, to be presented at the next meeting of the club. Following are the names of the committee: Frank Boyd, R. H. Ramey, Jack Barnes, H. Schupfer, Ira Bolon, E. H. Emery and Marvin Long.

ization in the state we live in. At that moment Jane disappears hopelessly and forever from the pages of recorded history.

For such a brief time does her figure arise above the horizon of our past. She was a ship that passed in the night.

New Home for the Prisoners of Sing Sing

General view of the new Sing Sing prison at Ossining, N. Y., which has been built on the hill above the old prison which was erected a century ago.

Orofino Has Second Factory

According to a news item in Sunday's Spokesman-Review, in which it states, Orofino has the second match block factory in the entire United States, the first and only other one being in Spokane. The item in part follows: "Virtually every wooden match made in the United States has its inception in the white pine forests of the Pacific northwest and undergoes its second transitory step in Spokane, officials of the Ohio, Diamond and Federal Match companies point out. With the exception of a small match block factory at Orofino, Idaho, match blocks to supply all match factories in the United States are made in Spokane. The Spokane factory utilizes 200,000 feet of white pine every day for this purpose."—Clearwater Tribune.

Spokane Lurie Fisklets

Spokane, Wash., Feb. 19, 1929. The weather moderated a little in Spokane last Saturday and we began to look over our fishing tackle and golf sticks.

Miss Olive Morey, thinking that spring had come put her car back into service and the mercury immediately proceeded to drop down below zero.

We had the pleasure of listening to Roy Chapman Andrews, the director of explorations in the Gobi desert of Mongolia. He pointed out the difficulties that they met in the way of roads which were almost as bad as those of the Potlatch country in the spring. He also spoke about digging up some old fossils which of course is irrelevant.

Spokane is all wrought up about a franchise applied for by the Great Northern to run freight cars over a down town Spokane street to the proposed location of the Montgomery-Ward retail store. Spokane's business district resembles a railroad yard at the present time so we can't see why so much fuss is caused by a little trackage.

We can find no scandal about any of the former Kendrick residents who are now in Spokane but will keep you informed of any that we hear of.

Spokane feels much encouraged to be recognized by the Kendrick Gazette. Thank you.

Your correspondent,
Lutie Fisk.

Keeping Time

"Dear Mrs. Pucket," a school teacher wrote to the mother of a pupil. "William was absent this morning. Will you please tell me what kept him out of school?" "Dear Ma'am," was the reply: "Willie is keeping time for his father. Last night he came home with an exampl about how long would it take a man walking three miles an hour to walk 2 1/2 times around a field four miles square. And as Willie ain't no man we had to send his pap. They left early this morning but I don't know when they will get back. Please make the next problem about something else, as my husband hasn't the time for such things."

Julietta News

Mrs. Mary Jones and daughter-in-law, Mrs. Harold Jones, went to Lewiston, Saturday to visit relatives for a few days.

Miss Pauline Weitz left for her home, Saturday. Her sister, Miss Kathryn, accompanied her as far as Lewiston.

Mrs. Kate Crutchfield and Miss Arta Groseclose were Moscow visitors, Saturday.

Louis Hunchberger and family left Tuesday for Kansas and Missouri to visit relatives. They expect to be gone six weeks.

Mrs. Leland Houck entertained a number of her friends at bridge, Friday afternoon. A five o'clock luncheon was served by the hostess. Those present were: Mesdames Jones, Nutt, Alexander, Rider, Biddison, H. Jones, Cochran, Adams and Houck.

About thirty of our residents went out to Robert Hall's on Fix Ridge last Saturday night. A number of the ridge people were there also. The evening was spent playing pinoche and dancing, and they reported an excellent time.

Rev. J. Needham was an overnight guest at the J. C. Groseclose home Sunday.

The 7th and 8th grades of our school enjoyed a party Friday night in the basement of the M. E. church. They were chaperoned by Mrs. Mary Adams and Rev. Forbis.

Mrs. May McCall entertained a number of young people at her home, Tuesday evening. The time, was spent playing pinoche. Everyone reported a splendid time.

Mrs. Amanda Alexander entertained at a six o'clock dinner Wednesday in honor of Mrs. Armstrong of Spokane and Mrs. H. Jones of Denver, Col. Covers were laid for 12. A pleasant evening playing bridge followed. High honors went to E. Adams and Mrs. Harold Jones. Those present were: Mr. and Mrs. E. V. Adams, Mesdames. Mary Jones, Harold Jones, Armstrong, Biddison, and Alexander, the Misses DuBois and Stump, Mr. J. C. Hamil, Masters Ward Alexander and Keith Adams.

Deary Locals

The Bovill Road District has been bucking the snow from Bovill to Deary with three big Holt-Best catapillar tractors hitched to a 20 foot "V" snow plow. The state snow plow has been opening the road from Moscow to Deary. Cars are now running from Moscow to Bovill.

The Potlatch Lumber Co. has one steam shovel grading logging roads for its railroads. Another shovel will be started in about two weeks. They also bought three Ford business coupes for use in the roads department.

The Dusky Pedant

Lawyer: "Can you tell me if the defendant was expensively garbed?" Rastus (a witness): "Deed she was, sah. Ah knows expensive garbage when I sees it."

Big Crowd at Clam Bake

A crowd numbering over one hundred attended the clam bake given by the commercial club last Friday evening at the Fraternal Temple. The affair was in honor of the local band, E. H. Danmarl cooked the clams, as no one else was willing to take the responsibility. His efforts were highly appreciated and the results were all that could be desired. Mrs. Julia Broeke had charge of the banquet and was assisted by Miss Ledbetter and her domestic science girls with the serving.

After the dinner hour the regular business meeting of the club was held. The members of the club and their wives, as well as the band members and their wives were present at the meeting. A report of the membership committee showed that they had been actively working and would soon have a paid-up membership of fifty or more. Other committee reports were heard and routine business transacted.

After the business meeting, which was held in the dining room, a program was given in the lodge hall. The first number was a piano solo by Mrs. Jack Barnes who responded to an encore. This was followed by a vocal solo by Mrs. Harold Thomas, who played her own accompaniment, with a flute obligato by Mr. Thomas. They also responded to an encore as did the various other numbers on the program. A mixed quartet composed of Mesdames. Thomas and Gardner and Messrs. Walker and Ramey furnished two very fine numbers. Then followed a duet by Mrs. MacPherson and Neva Ware. Attorney Oppenborn gave an original reading in the Scotch dialect. Rev. Franklin played several harmonica selections. A "shadow tragedy" furnished thrills, shudders and plenty of laughs. It was staged by Messrs. Ramey, Barnes, Schupfer and Blum. A concert by the band was then given and enjoyed immensely. Following this a social hour was spent and a number of tables arranged for cards.

Wanted Better One

A few years ago, back when cotton was hitting the high spots, the colored folks were in clover, a colored brother walked into an automobile salesroom in a near-by town, said: "Boss, you-all de feller what sell Mistah Washington Smith that er super-six automobile?" "Yes," said the salesman, "I believe we did." "Well," said the colored man, "Ah wants a superseven."

Condolences

After an offensive, defensive campaign of considerable duration, a man finally succumbed and got his wife an expensive fur coat. As she was showing her husband the purchase, trying to make agreeable conversation, she remarked: "One really can't help but feel sorry for the poor thing that was skinned for this." "I appreciate your sympathy," growled the husband.—Ex.

JUST IDAHO

By Guy Flenner

Fish, Game and Shooting

Idaho ought to be most attractive for those who enjoy fishing and hunting. Lakes and streams, also fields, should be intelligently and enduringly stocked. That is one of the functions and one of the announced purposes of the game department, but various fish and game leagues are shooting up the department because it has not done more, having, as claimed, a surplus of more than \$90,000 on hand, while the game leaguers say they are installing and maintaining rearing ponds, importing game birds and doing other things the department should do with its surplus, whereas the department always counters with the "lack of funds" statement. Furthermore, here is a volley from the sportsmen because the department is said to want a raise in the price of licenses to \$2.50.

That is about the size of the rumpus as we analyze it, without knowing who or what is wrong if anything or anybody.

If there is such a large surplus available, and it can be practically expended to make Idaho a better fish and game state it ought to be disbursed for that purpose, although the claim is made that it is a necessary hang-over.

What the average, once-in-a-while sportsman-citizen cannot understand, however, is the warm indorsement given the state game department at banquets of the leaguers and then their hot castigation in the press. Maybe there are two factions—soup and slam.

Notwithstanding everything else, the public will hardly approve any increase in the cost of fish and game licenses, when the apparent tendency is downward as to other forms of taxation and, too, so long as their is any serious contention over the availability of the surplus.

Our Peace Warrior

Idaho's peace warrior, Senator Borah, did heroic work for the Kellogg outlaw-war agreement and was quite as active and effective for the bill to provide 15 more cruisers, all of which moved an eastern editor to inquire what sort of meat Idaho men devoured.

The Kellogg agreement will have a salutary effect. We wonder if that eastern writer recalls something written on a sheet of paper that swept the Great Lakes of warships and that has kept the peace between this nation and Canada for over a hundred years?

So far as the cruiser program is concerned, that is part of the punch behind the Kellogg pact for any that may feel like starting a row, which is always possible. We trace history in vain for Utopia. Even family fights are common, amid sacred precinct on God's footstool—home. In olden days they led to clan fights and those to fights between nations. We hope it will not happen, but history has had a habit of repeating itself, and these cruisers arranged for in part by an Idaho man are expected to shorten the repetition if not restrain it.

Borah is no less against war than against warriors.

The Silent Clam is Appliance

The old theory "as silent as a clam" was exploded last Friday by a bucket of little neck clams that were shipped here from Seattle to be served as a part of the menu for the commercial club dinner. After the clams had been given a refreshing bath in crystal clear Potlatch spring water and tucked away in nice, clean candy buckets, they felt so refreshed that they chirped like a flock of sparrows. It required another bath in scalding hot water to extinguish their enthusiasm.

Mrs. Egnaz Flaig and little daughter are visiting at the home of her parents, Mr. and Mrs. Geo. Leith.

Volume I Published in the Interest of the Kendrick High School

Lapwai at Kendrick Tonight

Both teams of Lapwai High will play in Kendrick, tonight, Friday, February 22. The Kendrick boys were defeated at Lapwai, but the girls were victorious. We are anxious to show them what we can do on our own floor.

Seventh and Eighth Grades

There is a correction to be made in last week's news notes. Miss Weaver and Miss Ledbetter gave the prizes for the Doll Dress Contest instead of just Miss Weaver.

The seventh and eighth grades had their party Wednesday evening at the school house. A very enjoyable time was spent in playing games. Several guests were present as follows: Misses N. Weaver, Ledbetter and Dille, also Mr. Beardsley.

Both the seventh and eighth grades have a new set of readers furnished by the district.

Stanton's Entertain

Edna and Hazel Stanton entertained a number of their friends at a party, Saturday evening. The evening was spent in playing cards and dancing after which dainty refreshments were served.

The guests were: Minnie Craig, Eleanor Herres, Mae Freytag, Marjorie Davidson, Margaret McDowell, Claude Woody, Carl Davis, Willard Cox, Arthur Foster, Harley Eichner, Chief Cox and Charles Davis.

Kendrick Loses to Clarkston

The Kendrick girls played a losing game with the fast Clarkston team last Saturday night at Clarkston, the final score being 20-1. Owing to the fact that Clarkston possesses a floor almost twice as large as Kendrick, the girls seemed completely lost and were unable to keep down the score. We are soon to play them in our own Gym and are hoping we can give them keener competition.

Doris Emery is taking Helen Emmett's place as Editor of the "Juggler" until Helen returns to school.

Supper at School House

Last Thursday evening a number of the high school girls had a supper in the domestic science room, consisting of: Swiss steak, fried potatoes, escalloped corn, bread and butter, cheese, jello, cookies and coffee. Those who attended were: Helen Emmett, Doris Emery, Mae Freytag, Neva Ware, Marjory Davidson, Muriel Crocker, Bessie Blevins, Georgine Christensen, Edna Stanton, Edna Lohman, Lillian Long and Mrs. Christensen, who chaperoned the group. Since everyone enjoyed the entire evening they hope to have many more.

Fifth and Sixth Grades

A Valentine party was very much enjoyed by the pupils of Miss Nannie Weaver's room last Thursday afternoon. After playing many lively games, refreshments of sandwiches, pickles, jello and cookies were served. Just before going home the Valentine box was opened and the numerous valentines distributed. While coasting last Sunday afternoon Margaret Daugherty fell from her sled and broke her arm. Her feelings were also terribly hurt when she had to be absent from school, spoiling the perfect attendance record she had made so far this term.

Girls' Basket Ball Schedule

The basket ball girls have the following schedule:
 Feb. 27, Deary here.
 March 1, Asotin here.
 March 6, Clarkston here.
 March 16, Asotin there.
 We are expecting the games to be very interesting and urge you to attend all the home games.

Third and Fourth Grades

Everet Riley, who has been absent for about two weeks on account of illness, returned this week.

Mother: "Why are you crying son?"

Carl D.: "Teacher bawled me out for not knowing where the pyrenness were."

Mother: "Quite right too—next time take care to know where your things are."

Carnival March 1st

Don't forget the carnival to be held at the school house March 1st. There will be everything to eat and lots of fun for all.

Kendrick Victorious

Kendrick boys won a decided victory over Juliaetta last Friday night. It was a fast moving game ending with a score of 24 to 14. The lineup was as follows:

Kendrick	Juliaetta
H. Dammarell (8)	F McCall (8)
Craig (sub)	F Caldwell
Woody	F Denner (sub)
	F Johns (sub)
Bailey (8)	C Parish (6)
Foster (6)	G McVicker
McDowell (2)	G Combs
	G Giese (sub)

Freshman Party

Edna Bolon entertained the members of the Freshman Class at her home last Wednesday evening from 8 to 10 o'clock. The evening was spent in pulling taffy, playing cards and various other games. The party was thoroughly enjoyed by all.

Chuckler

Mr. Jarvis in history: "Who was Matternick?"
 Walton Morey: "It's a—Oh, he's the Prussian Empire."

Bessie B.: "Gee your hair looks funny, Lillian."
 Lillian: "Had it up in curling papers."

Bessie B.: "Well."
 Lillian: "Must have used a comic supplement."

A certain student had arrived late at class and after class he apologized: "Sorry, sir, but my watch was fifteen minutes behind time. It's bothered me a good deal lately, but after this, I'll put no more faith in it."

Mr. Beardsley: "William! It's not faith you need in it, but works."

Mr. Jarvis in history: "Bill, haven't you started that 1500 word theme yet?"

Bill H.: "No."
 Mr. J.: "What are you, one of those minute men?"

Linden News

Mrs. George Garner and children and Eva Smith spent Wednesday at the Allen home.

The Mesdames F. C. Lyons, A. Alexander, C. E. Harris and Miss Eva Smith visited school Thursday afternoon and enjoyed the Valentine box with the pupils.

Literary was postponed Saturday evening on account of smallpox scare.

Aunt Carrie and Arley Allen visited Mrs. Harry Langdon and new daughter in Kendrick last Tuesday.

Raymond Torgerson of Park visited at the Ed Kent home several days last week.

Mrs. C. H. Fry spent Thursday with Mrs. Whisler.

Miss Popkey spent Sunday evening at the George Garner home.

Mr. and Mrs. W. Weyen spent Sunday with Mr. and Mrs. Ed Kent.

Mrs. Carr and son, Tony, were shopping in Southwick, Wednesday.

Mr. and Mrs. Pat Updyke of Park visited at the F. C. Lyons home Friday.

Axel Bohn spent the day with Mr. Mattson, Wednesday.

Wouldn't Be Fooled

The new assistant at the seed shop was not having an easy time. Someone had ordered a packet of potato seeds, he had spent 2 hours looking for one, but without success. At last he asked the boss about it. "How can you be so ridiculous?" said the man, "Potatoes don't have seeds. Your leg was being pulled." The assistant returned to the counter, feeling a little discomfited. 10 minutes later a customer entered the shop, asked for some bird seed. To his surprise, the assistant leant over, waggled a finger at him. "Go on", he said. "I can't be tricked twice. Birds are hatched out of eggs!"—Ex.

Lighting Aviation Fields

Illuminating engineers are working with the problem of lighting the aviation fields and chemists are endeavoring to find something in the way of a new glass which will help to solve the problem. Flood lighting as now generally made use of is not satisfactory as it distorts the view from the air and often blinds the aviators when coming to the ground.

Old Castles in Africa

There are some 36 medieval castles along the coast of West Africa, that of St. George at the town of Elmina being considered the oldest and greatest. The Portuguese are said to have begun it ten years before the discovery of America, the stone for the foundations being brought from Portugal. Its double fosse was hewn out of solid rock.

Qualities of the Gentleman

The taste of beauty and the rebirth of what is decent, just and amiable, perfects the character of the gentleman and the philosopher. And the study of such a taste or rebirth will, as we suppose, be ever the great employment of him who covets as well to be wise and good, as agreeable and polite.—Shelley.

Medical Discoveries

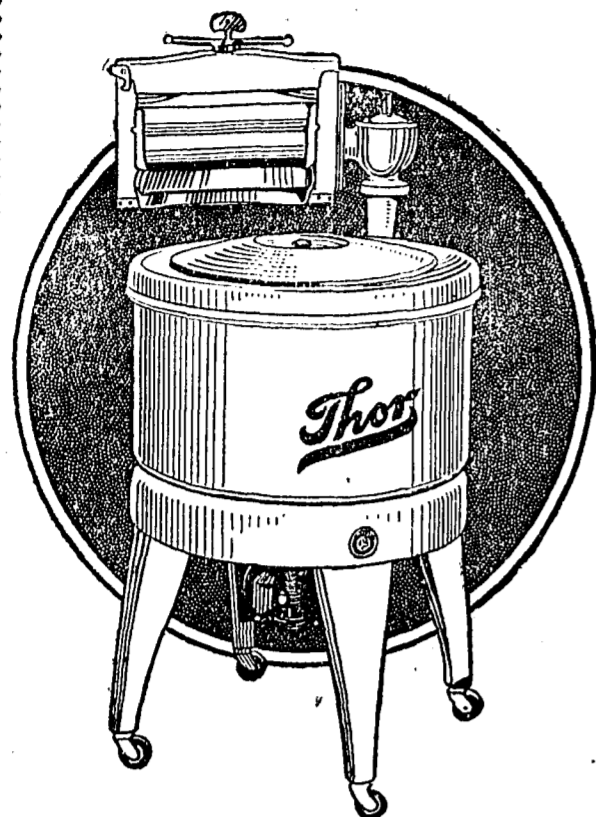

Children who lived before 1788 did not have to take castor oil. It was a fact that the medicinal value of the oil was first officially recognized by medical men. Other important facts in medicine came even later. Morphine was discovered in 1804, quinine in 1818, bromine in 1824 and hydrogen peroxide in 1818.—American Druggist

Ship of Famous Pirate

"Adventure" was the name of the ship commanded by Captain Kidd. This famous pirate sailed from Plymouth, England, in April, 1696, in the galley Adventure, carrying 30 guns and a crew of 80. He put in first at New York and later went to Madagascar. He was eventually put to death for his piratical exploits.

Indian Children Found Healthier Than Whites

These Indian children were photographed at Miami, Fla., as they were waiting to be examined by Dr. D. G. Dupuis in a baby health contest. For the first time Seminole Indians came from the interior of the Florida Everglades to submit their papooses and children to the rigid inspection of a white "medicine man." The doctor found the Seminole children to be about 30 per cent healthier than white children.

POULTRY

EARLIEST HATCHED CHICKS ARE BEST

Experiment Shows the April Pullets Produce Good Eggs.

Reports from poultrymen in Colorado show that the tendency to earlier

hatching is gaining a foothold among successful breeders. Early-hatched chicks make better winter layers, they have found, and the rapid development in the early-hatched chick results in more economical production of broilers.

The cold weather of this season of the year seems to give much greater development in a short period of time, while those that are hatched late and grow during the warm weather are slower in their development. Cold weather seems to retard the sexual development, thus holding back egg production until warmer weather, according to observations of Charles N. Keen of the poultry department at the Colorado Agricultural college.

If pullets are raised from late

hatched eggs and pushed for production, they attain a sexual maturity before the body maturity is attained. Then the first eggs produced will be small and continue so until body maturity is completed.

In the case of light breeds, such as Leghorns and Anconas, these small birds which have been forced break down under heavy production and go into a winter neck molt and often a full molt. With the larger breeds there may be less of this trouble with the late-hatched birds, but they are harder to force into laying. It takes approximately five months to mature a Leghorn or Ancona pullet and approximately seven months to mature Rhode Island Reds, Rocks, Wyandottes and other birds of the larger breeds. They should be laying not later than November 1 and not earlier than September 1 for best results.

hatched and other birds of the larger breeds. They should be laying not later than November 1 and not earlier than September 1 for best results.

Mash Essential Part of Ration for Layers

The mash is an essential part of the hen's diet, for she cannot make eggs economically from grains alone. In the mash should be included some of the common by-products such as wheat bran, middlings and gluten feed. These feeds are palatable and furnish relatively cheap vegetable protein.

The hen must be supplied with enough animal protein either included in the mash or fed in addition to it. Some of the more common home supplies of animal protein may consist of skim milk, buttermilk or some form of waste meat and, in the summer, insects that the hen can find on the range.

Repeated tests at the Wisconsin and other experiment stations have shown that hens cannot find the necessary amount of animal protein on the range to make profitable egg production possible. Even in the summer unless the hens have all the milk they can drink it will pay to have some additional animal protein in the mash. In the winter the hen will not drink enough milk to supply her needs and some addition should be made.

Ventilation of Poultry House Is Big Problem

The ventilation of the poultry house is a much discussed problem and many times local conditions are responsible for troubles. Sometimes the location of the house is such as to interfere with the usual results. However, if the walls of the house become damp last year it is an indication of too little fresh air. There are two methods of ventilation which are quite common. One is the use of muslin frames which may be closed at night and opened during the day. In houses

14 to 16 feet deep one should have one square foot of cloth frames for every foot the house is long. Deeper houses require more while narrow houses require less. Even with muslin frames one must not be persuaded to close them too tightly as this may result in too little ventilation at night. Their use requires discretion as does any other plan for ventilation.

Feed Heavily

January and February are the months when all flocks should be fed heavily, says T. S. Townsley, extension poultry specialist of the Missouri College of Agriculture. By January 1 most of the pullets ought to be mature and ready to lay, while the majority of hens should be through the molt. Consequently with proper feed, egg production ought to pick up rapidly during January and February and reach its maximum during March or April.

Give Hens Chance

Poor housing of farm hens during the winter plays a big part in keeping the production of the average Illinois hen down to about 50 eggs a year. It takes contented hens to keep the winter egg basket full and poultrymen who do not insure the contentment of their fowls are apt to get high egg production only during the natural laying season in the spring. It will be profitable for chicken raisers to spend money in repairing the old hen houses.

Oh, Well, All Right

Paris.—Feminists are arguing vigorously for the right of women to be guillotined. Three women are in jail under sentence of death. Last public opinion became averse to their execution, feminists have asserted that while the death penalty should be abolished, nevertheless while in force it ought to apply equally to men and women.

Produce Quality Eggs Always Best Practice

Recently experiment stations have learned that poultry mash containing 30 per cent cottonseed meal, 4 per cent bone meal and 1 per cent salt would produce results quite satisfactory from the standpoint of egg production. The Texas experiment station, however, tested the keeping qualities of eggs produced by hens fed cottonseed meal and found, much to their surprise, that the eggs failed to hold up in storage.

For immediate consumption the eggs produced by hens fed cottonseed meal are normal in appearance, taste, etc., but they do not possess keeping qualities. Whether other vegetable proteins, such as soy bean meal, will produce eggs with poor keeping qualities remains to be seen, but the findings of the Texas station show that poultrymen must go slow in deviating from practices which are known to produce results. Certainly poultrymen cannot afford to follow practices which might make the preservation of eggs by cold storage more hazardous.

Around the Farm

Many farmers are now buying a small oat huller for their own use, and it should be a good investment.

Get rid of your cull birds as soon as possible so as to give the room to the pullets you want to lay eggs.

One of the worst setbacks that a pasture can receive is through pasturing stock on it too early in the spring.

First Mounted Infantry

Infantry mounted for transportation but retaining the characteristics of infantry, dismounting in action and fighting as trained, was introduced during the Boer war 1899-1901.

POULTRY

BROOD CHICKS BY ELECTRICITY

Easier to Run Than Those Heated by Coal or Oil.

"Electric brooders are excellent for brooding chicks when the weather is mild. In New York state they may usually be used satisfactorily after April 15, or at any time in a room that does not depend entirely on the brooder for its heat," says Prof. L. E. Weaver of the poultry department at Cornell university, Ithaca, N. Y.

In answer to the question—can chicks be satisfactorily and economically brooded with electricity?—Professor Weaver says, "The answer is yes, but with reservations."

"Electric brooders are far more simple to run than are coal or oil brooders. When once regulated there is almost no more work or worry with them. But they must be in a room that is at least moderately warm, for the electric brooder confines the heat almost entirely to the space under it. It does not warm the room as is the case with coal or oil brooders. The chicks will not do well if the room is cold, and the cost of heating just the brooder alone gets too high even with a low rate for the current under such conditions.

"In purchasing an electric brooder one should be sure that it is provided with a positive heat regulator, that it is well insulated to prevent unnecessary loss of heat, and that provision is made for ample ventilation.

"Electric brooders are of two types, those with a curtain and those without. The curtain type requires less current but is apt to be poorly ventilated or not ventilated at all. The curtainless type with a good ventilating arrangement is probably the most desirable," says Professor Weaver.

When to Market Ducks to Make Most Money

Green ducks at eight weeks of age should weigh 9 pounds to the pair, and at ten weeks ought to reach 10 to 11 pounds. They command best prices about the first of May, and from then on until July the price gradually drops. From July 1 to September prices remain unchanged, but by September to November they are up again.

The general laying season starts about February and continues until the last of August. The first eggs of the season are rarely fertile. Fertility and vitality are the keystones of success in duck culture.

One way to make money out of ducks is to be ready with a good supply at the opening of the season, writes Michael K. Boyer in the Farm and Ranch. Another important item is the value of the manure, that of duck ranking second to hog for growing vegetables.

The trade for ducks is largely found in the restaurants and mountain and shore resorts, where they are served in quarters—the carcass being cut into four pieces. Consequently, a duck weighing 4 or 5 pounds, served in that way, will command just as much money as one weighing 2 pounds more.

In all large cities, where there is a large Jewish population, live ducks are in demand. In Chinese sections there is also a heavy call for this favorite fowl.

Poultry Facts

Lameness is one of the first symptoms of tuberculosis in poultry.

Plan on sufficient brooding space and equipment, all you have room for. Figure how many chicks you can brood and then write several hatcheries and decide where you want to order, and then order early.

There are six steps in raising healthy chicks from hatching to maturity. They are clean chicks, clean houses, clean litter, clean feed, clean management and clean ground or close confinement.

It is necessary to have the brooder large enough—and it is better to have it too large than to take chances on overcrowding.

Milk has been found to be the best single source of animal protein for laying hens. It being easily digested and rich in protein and minerals.

If you are sending away for baby chicks have the brooder all ready for them, warm and comfortable, and clean. They get chilled if they have to wait while you "make up the bed."

Duck eggs are successfully hatched in incubators, but geese eggs are not. Geese will lay about three dozen eggs per year.

The highest egg production has been secured by using milk with some form of meat, such as fresh meat, kaffee, or meat scraps.

Some farmers feel that the birds will gather sufficient insects while on the range to make up for the lack of protein in the ration, but tests do not bear out this belief.

DAIRY

WARM DRINKING WATER FOR COW

Specialist Favors Tank Heater and Windbreak.

Milk cows should drink about four gallons of water for each gallon of milk produced, but they will not drink sufficient water if it is cold, or if they are compelled to go into the cold wind to get the water, advises John O. Tolliver, deputy state dairy commissioner, at the Colorado Agricultural college.

A tank heater to warm drinking water, and a windbreak to protect the tank and vicinity so the cow will not be exposed to the cold winds of winter while drinking, are recommended.

Tolliver states that a cow naturally drinks as little cold water as possible, and will not produce nearly as much milk as she would if the water were warm, about 15 to 20 degrees above freezing point. Cows will stand with their backs lumped and shiver after drinking ice water. Their hair is rough and stands on end, due to the contraction of the skin.

To produce milk economically the cow's ration should consist largely of the more bulky, cheaper foods, the deputy commissioner states. These foods require considerable moisture in the process of digestion, and therefore large quantities of water are essential.

A tank heater can be purchased for \$15 or \$16, and will soon be paid for by increased milk production. Heaters that will burn either wood, coal or coke may be obtained.

Difference in Quality of Mixed Dairy Feeds

(By A. R. MERRILL, Dairy Specialist, Connecticut Experiment Station.)

Whether the dairyman shall mix his own feeds or buy ready mixed rations is still an important question. Before it is definitely decided the dairyman should ask himself these questions:

1. Are the feeds he can buy as good as are contained in the ready-mixed rations?
2. Is it possible to secure a continuous supply of a large variety of ingredients?
3. Can the ingredients be mixed as thoroughly as they are in the commercial mixtures?

Undoubtedly he may be able to mix a ton at less money than he will have to pay for a similar commercial mixture, but when all things are considered there may not be the advantage that formerly existed. The last few years have witnessed a wonderful change in the quality of mixed feeds offered for sale. This improvement of quality has removed one of the reasons for home mixing. It also means that better feeds are being used in our commercial rations.

Low-quality feeds are still on the market and many of these find their way, as separate ingredients, to retail dealers. When a dairyman buys feeds for home mixing, he should be sure of quality or his supposed savings on the ton price may prove a loss at the pail.

Proper Winter Feed for a Fall Calving Heifer

What feed should be given dairy heifers in order to winter them satisfactorily for fall calving?

a. When legume hay and corn silage are available—lay and silage at will and two pounds daily of corn, cane, or kafir grain.

b. When legume hay but no silage is available—legume hay at will and two pounds of grain per day.

c. When corn silage but no legume hay is available—silage at will, some dry roughage as hay or fodder, and two or three pounds of a grain mixture consisting of one part of some high protein feed as cottonseed meal, linseed meal or gluten feed, and one part of corn, oats, or bran.

d. When neither corn silage or legume hay are available—buy legume hay. Feed one-half legume hay, one-half nonlegume roughage, and two pounds daily of a mixture of two parts corn and one part high-protein feed.

Unclean Utensils Traced to Filthy Dish Cloths

The dish cloth may be justly charged with being responsible for a lot of the unclean utensils now being used to handle milk and cream. Dish cloths fail to reach the cracks and crevices where dirt and bacteria are prone to lodge; they fail to cut grease and dirt, and it is almost impossible to keep them in a sweet, sanitary condition. If you are a dish-cloth user, throw it away and wash your dairy utensils the modern way, with a good stiff brush.

Soy Beans Favored

The comparatively high prices which are being asked for cottonseed meal and linseed oilmeal and the large average of soy beans are leading dairymen to consider the use of soy beans as a protein supplement to the dairy ration during the winter. Experiments conducted at the Purdue experiment station in which ground soy beans were compared with linseed oilmeal showed that the ground beans produced from 2 to 4 per cent more milk than an equal weight of oilmeal

AUCTION SALE

I, Paul A. Lind, will sell at Public Auction, at my ranch one mile south of Teakean, Idaho, the following described property, at 10 o'clock

Thursday, Feb. 28

Livestock

- 8-YEAR-OLD COW, FRESH IN JULY
- 2-YEAR-OLD HEIFER, FRESH IN MARCH

Implements

- FIVE TONS OF HAY
- LAWN MOWER GARDEN CART
- TWO COMPLETE GARDEN CULTIVATORS
- 4-SECTION DRAG HARROW AND HITCHES (For 2, 3 or 4 sections)
- TWO 14-INCH PLOWS
- ABOUT 12 TONS MIXED HAY
- CEDAR for 3 or 4 THOUSAND POSTS
- GALVANIZED GAS TANK
- WOOD BARRELS
- POULTRY NETTING AND CHICKEN COOPS
- ONE PAIR 16-FOOT EXTENSION LADDERS
- THREE SACKS CEMENT
- TWO RADIO TOWERS, WIRE, ETC.

Household Goods

- ONE SIX HOLE RANGE
- ONE FOUR-HOLE COOK STOVE
- ONE COLES' AIR TIGHT HEATER
- ONE BEE HEATER
- ONE SMALL BED ROOM HEATER
- ONE SMALL BOX STOVE
- ONE WASHING MACHINE
- TWO TUBS, RACK AND RINGER
- ONE COPPER BOILER
- ONE LIBRARY TABLE
- TWO BED STEADS AND SPRINGS
- ONE SEWING MACHINE
- ONE EXTENSION DINING TABLE
- SIX CHAIRS THREE ROCKERS
- TWO CHILDRENS' ROCKERS
- ONE LARGE WALNUT DRESSER
- ONE FOLDING STEEL COUCH
- TELEPHONE EXTENSION CALL BELL
- CHILDRENS' BLACKBOARD
- CLOCK, KITCHEN UTENSILS, AND OTHER ARTICLES TOO NUMEROUS TO MENTION.

Terms: Sums of \$10.00 and under, cash; sums over that amount bankable notes bearing 10 per cent and due Oct. 1, 1929.

The DAIRY

COW NEEDS CARE IN WINTER TIME

Much of Feed Given Animal Goes for Warmth.

Extra feed cannot be substituted for shelter for the comfortable cow is the profitable cow. When the animals are exposed to wintry winds and rains, much of the feed goes to keep the bodies warm instead of to produce milk.

"Therefore, some effort should be made to keep the dairy cows comfortable during periods of disagreeable weather," says John A. Arey, dairy extension specialist at the North Carolina State college. "Their stalls should be well lighted and properly ventilated but free from air currents. Ventilation is important but should be so arranged as to prevent the air currents from striking the cow's body. This is accomplished by making the sides of the barn or cow shed tight and admitting fresh air through properly arranged windows."

Mr. Arey states that the practice of requiring the cow to wade through mud and ice some distance to get drinking water is too common and too

expensive in the dairy industry. Such needless exposure chills the animal and prevents her from drinking the amount of water that she normally would consume.

Normal milk, says Mr. Arey, contains 87 per cent water and a cow producing around 30 pounds of milk daily will need from 85 to 90 pounds of water each day. She will not drink this much on a cold day unless the supply is convenient and not too cold. The dairy cow of high producing breeds is a creature of habit. Unusual treatment makes her nervous. If she is accustomed to a regular routine of feeding and care, a change from this system will make her nervous and distrustful. She should never be run with horses or dogs nor treated roughly while being put in a barn. No other farm animal, says Mr. Arey, will give greater returns for good care than the cow and the herdsman who keeps his animals comfortable in winter will be amply repaid.

Calf Scours Prevented by Giving Proper Feed

Ordinary scours in young calves are caused by indigestion resulting from overfeeding, or feeding milk that is too cold, or feeding it in dirty pails.

When scours come on while the calf is nursing, the cow it goes too much milk, or the milk of the dam is too rich, which may be the case with Jerseys. When scours occur while the calf is fed milk it is usually due to feeding too much milk or feeding it in dirty pails.

The best way to handle a case of

ordinary scours is to reduce the amount of milk to about one-half the amount the calf should have, until the bowels become normal. An ounce or two of castor oil will help to clear the bowels.

If the calf is hand-fed it should have six to eight pounds of milk at a feeding, which must always be fed in clean pails. It is very essential in feeding young calves to weigh the milk at each feeding to avoid over-feeding.

When a calf gets clean, wholesome milk and is not overfed you will have very little trouble with ordinary scours.

Marketing Eggs Direct Is Profitable Plan

Many poultrymen who are wanting a better market for their poultry products would find better profits in a direct to the consumer trade, according to W. A. Sumner, University of Wisconsin, who points out that a classified ad in city papers often will bring more customers than a farmer can supply.

He points out the necessity of the farmer poultry producer being in position to take care of orders in prompt and efficient manner and to be able to supply a good reliable product, which in the case of eggs would mean, fresh, large-sized and clean eggs.

This direct to the consumer business depends upon repeat orders and poultrymen must keep up the quality of their shipments so that customers will not look elsewhere for eggs or poultry. A satisfied customer is the best advertisement that the producer

can have. It pays to have neat cartons and crates for marketing eggs and sometimes a producer can develop a trademark name that will help bring more orders and customers.

Health Insurance

A low chick mortality of 9.3 per cent was reported by Pennsylvania poultrymen who raised their chicks in complete confinement last year. These reports were obtained for a total of 12,300 chicks brooded under the "closed door" plan outlined by the poultry extension department of the Pennsylvania State college. A low chick mortality and freedom from intestinal parasites are two advantages of the plan outlined by the specialists.

Chinese Rank Third

The breed which probably ranks third in number in the United States as a whole is the Chinese. There are two varieties of this breed: White Chinese and Brown Chinese. This breed is rather small, the genders weighing ten to twelve pounds. Their popularity is largely due to the fact that they are the most prolific breed of geese. Under good management they may be expected to produce 60 to 100 eggs in a laying season. Like other geese, their main feed is grass.

Joys of Self-Sacrifice

"Husbands should share the housework with their wives," says a woman's paper. We despise those selfish husbands who want to do it all themselves.—Boston Transcript

Mrs. Gus Farrington and children called at the Robeson home Sunday afternoon.

GEESE AND DUCKS ARE PREFERRED

Fowls Require Little Feed and Not Much Care.

We almost swear by our geese and we can make each old goose bring in \$100 a season. It's not easy to make sows return a greater profit when present feed costs are so high. Our old pairs and we never attempt to raise from young geese, are good for four dozen eggs in a season and will raise 30 goslings each to maturity, writes J. L. Phillips, Whitman county, Washington, in Capper's Farmer. Each goose lays three times and we let her sit on her last laying of eggs. There is little cost to raising geese on a general farm and that is the

**The New Model Cletrac
Now Ready For Delivery**

It Is New From End to End

During the past three years we have sold nearly 100 Cletracs. One sells another. Cletrac has many new features, just as autos have. First, the wonderful, powerful, smooth-running six-cylinder motors; three speeds forward, electric lights, self-starter. New tracks on all models which will never give any more trouble.

Cletrac has more power for its size than any other tractor built and more traction. Above all, when you put in the gas the Cletrac is ready to go. One shot oiling system oils all wheels and lower track wheels while tractor is going. No dirty job of digging out mud nor spending an hour filling grease cups. No oil holes on the machine. Motor has force feed oil to all rocker arms and moving parts.

Colonel Byrd is using a fleet of Cletracs on his South pole trip.

Cletrac has gone over the top. Just recently Russia has bought half a million dollar order of Cletracs. Factory is taxed to the limit on orders.

We will demonstrate for you on your ranch and will show you that the Cletrac cannot lie, but some agents can and do.

Cletrac shafting is all built of Krupp steel which cannot be broken by motor power. Our trouble is ended.

We have opened Cletrac headquarters in Kendrick for Nez Perce, Latah and Clearwater counties. We keep all parts on hand and overhaul all makes of tractors and cars from the bottom up. Guarantee first class workmanship. Rebores all motors.

We trade in any make of tractor or auto on new Cletracs. We have our service man who takes care of all tractors in field when needed. We are here to stay and so is Cletrac. We build 4-row bean cultivators for Cletracs, here in Kendrick. We sell all tractor machinery and carry a full line of Oliver and Case implements and repairs. See our display and before you buy a tractor let us show you the new Cletrac, fully guaranteed by factory for a long time to come. Your troubles will be ended when you drive one of these new machines.

WE HAVE ON HAND

- One used Cletrac "30", used one year \$2,000.00
- One used Twin City 12-20 \$550.00
- One used 10-20 International \$500.00
- One Three-bottom John Deere Tractor Plow \$100.00
- One Two-bottom International Tractor Plow \$75.00
- New Cletrac "W" 12-20 \$1265.00
- New Cletrac "K" 20 \$1950.00
- New Cletrac "A" 30 \$2760.00
- New Cletrac "40" \$4100.00

NEW FOUR-ROW BEAN CULTIVATOR GIVEN FREE WITH EVERY CLETRAC UNTIL APRIL 1st, 1929

Kendrick Machinery Company

Behrens & Biddison
KENDRICK, IDAHO.

place for profits on almost any sort of live stock. Our goslings grow up on grass until after harvest. Then they fatten themselves on waste grain in the wheat and oats fields and on corn and beans scattered where the hogs harvest those crops. They get practically nothing that would not otherwise go to waste. We sell the best goslings as breeders for \$5 each and the common ones at market price for Thanksgiving and Christmas. They weigh 15 to 20 pounds each. By dressing them we see better than at each out of the feathers to pay for the work.

Our ducks are almost as profitable as the geese and if it were not for the fact that the eggs do not hatch in an ordinary incubator, I doubt if we would have a hen on the place.

They lay splendidly and we hatch from April until August. The young are full feathered at eight weeks for

the broiler chicken market and we have no trouble selling them. We like them mighty well fried, too, and use a lot of them at home. The old ducks weigh 6 to 9 pounds and the young ones at eight weeks old as high as 4 pounds. We never could get that weight with chickens.

I don't think the average family appreciates the ease with which the water fowls are raised. Ducklings or goslings increase in weight about three times as rapidly as chickens. It makes the work of brooding much shorter and gets some size or them so they will be out of danger from rats or from being tramped on long before chickens have reached that stage.

In observance of Washington's birthday, both local banks will be closed for the day.

Wilfred Corkill of Leland was transacting business in Troy Wednesday of this week.

Dr. and Mrs. Morehead were Lewiston visitors Tuesday of this week.

Joe Collins, deputy state game warden, was in Kendrick last Saturday afternoon to look after the feeding of game birds. This is his third trip here. Feed has been distributed along Potlatch creek from Kendrick to the Latah county line below Juliaetta, on three different occasions. The birds along this strip of country are faring very well and are cleaning up all the feed that is being put out.

Kester Dammarell writes that he and his family have moved from Craigmont to Reubens, where he will have charge of the bank as cashier. This bank serves the Gifford, Melrose, Summit and Reubens sections.

Henry Eichner of American ridge left Wednesday for Long Beach, California.

E. A. Deobald spent several days in Lewiston this week.

Mr. and Mrs. H. P. Hull went to Spokane, Wednesday, on the afternoon train, to visit relatives.

The Methodist ladies aid will give a pie social in the basement of the church tonight at 8 p. m. Everybody is cordially invited to attend.

G. F. Walker was transacting business in Oakesdale, Tuesday of this week.

Mail carriers on routes one and two out of Kendrick were unable to cover their routes Wednesday because of the deep snow drifts that were caused by the high wind Tuesday night. Don Miller made most of his route but Everett Fraser got only as far as the Wade Keene place, when he had to turn back.

O. C. Aiken went to Moscow on business the first of the week.

M. O. Raby and Paul Schulze went to Lewiston on business the first of the week.

Born to Mr. and Mrs. Henry Garontt, Saturday, February 16, a son.

Margaret Daugherty had rather a serious accident last Sunday afternoon while coasting. She fractured both bones in her right forearm. Dr. Morehead reduced the fractures and she is getting along nicely.

Mr. and Mrs. E. H. Emery visited friends in Lewiston the first of the week.

Texas Ridge News

A large number attended the social and program given by the Civic Club at the Elwood school house two weeks ago.

Mr. and Mrs. George Drury are visiting in Moscow at the home of Rodney Drury. The latter has been seriously ill for the past week.

Mr. and Mrs. Fenreite entertained a large number of neighbors for Sunday dinner Feb. 10.

At the home of August Leisching on February 14, the Civic Club was royally entertained. A large number were present, all reporting a pleasant time. The next meeting will be held at the home of Mrs. Chas. Anderson.

Dr. Myers of Troy was called to the H. Steiger home where several members of the family are ill. Mr. Steiger has a severe attack of quinsy. They are improved at the present writing.

Young folks from Deary and the ridge attended a party at the home of Mr. and Mrs. A. E. Darr, last Thursday evening.

Thos. LaBolle visited relatives in Clarkston last week.

Its a Cheese

Two brothers were being entertained by a wealthy friend. As ill luck would have it, the talk drifted away from the ordinary topics. "Do you like Omar Khayyam?" thoughtlessly asked the host, trying to make conversation. The elder brother plunged heroically into the breach. "Pretty well," he said, "but I prefer Chianti." Nothing more was said on the subject until the brothers were on their way

home. "Bill," said the younger brother, breaking a painful silence, "why can't you leave things that you don't understand to me? Omar Khayyam ain't a wine, you chump, it's a cheese." —Ex.

Born, Not Made

If he has to develop his personality, the chances are he never will have a personality that is noticeable.—Fort Wayne News-Sentinel.

A Scandinavian Night Mare

The following contribution was handed in by an irate subscriber and was inspired by an article in last week's Gazette signed "Lutie Fisk":

My Dear Lutie Fisk: Ay ban take des har opurtunity to kunfirm upon yu the honor of representing the Kendrick Gazette in the willage of Spokane und all de skab roek bound country surrounded by Spokane. Ay tank maybe yu skall be smilin' alover ven ay told yu yu wus selected from out off skeveral thousand applikants und yu wus shosen yust beause yu wus one gude friction riter.

Yu said in yur letter yu would tak ofer the Kendrick Gazette yust because Bill Rogers tookened ofer the mule skimmers party. We skall haf tu took des har mater up wit Mr. Oppenborn tu see if yu can took des paper ofer. Yu no Mr. Oppenborn is our esteemed legalite und wot he don no bout law is not in des har law books yet tu.

Yah und aye wus mooch bliged tu yu for tolding me bout wot Mr. Rogers did. Ay wus under de infulence that if de demokrats had one gude track coach mabe de eude turn out beter race on 1932, dey wus purty gude on de start last year but aye tank they run out off vind.

Aye tank yu sed sumtings bout giving Yack Barnes ledder medal or certifikate for fishin' sum skatters out from de Potlatch, aye skall tank de game warden ban goin' tu git him for fishin' thru de ice.

Yu say yur wus a prescriber by law tu the Kendrick Gazette. Aye thot yu wus sumting but aye thot yu wus one off des foreadors as yu wus so gude in trowing the bull.

Aye wus also mooch bliged tu here yu bot ay new automowbile but aye tank yu got stinged wen yu bot it, cause it don haf all off de new dodads. Maybe de new moulds haf not got tu Spokane yet so aye will told yu wat de new wuns haf des year. Aye saw one de oder day wot had hot en cold running window shades oilless barings on de choker wire, babbittless barings en de crank case off de enyine, ay wanity case en de back seet wich had in it one pack off snuce, ay ring off balogna und ay pack of eigerets, des har car had non-radio interferin sparkless-plugs und ay inwisible wind shield, und ay nefer wurk duble duty wind shield swiper and cigar liter combunashun.

Aye tank mabe aye skall tell yu bout de clam bake we had by de cummershul club las week. Yu no dey wus ay turrible clam-ity har wen Roy Ramey tried tu swallow one off de clams wit de shell on. Mr. Ramey he faw down and go boom, but we told him he shuld haf greased des har clam chell wit butter first tu.

We operationed on Herman Schupfer fer clamitice, but de biggest clam-ity wus wen we found bout ay hundred und fifty empty clam chells by Mr. Wade Keene's plate. He wun first place for de biggest clam eater, but Marvin Long said ef he hadn't had such off ay hard time keepin the clams on his knife he wuld haf wun first place.

Yu said yu had sumtings to sell, but why did yu send us so mooch for ay sampel if yu are sellin it. Ay don't tank Mr. Bill Cox skall need any more as yu sent him wun bunch already.

Yah, aye tank Oscar made ay bad mistak bout de weder. Aye don't know wat he predicked but ef he is like awl de rest of de weder profiteers aye no he wus wroong. De ain't wun person in de United States or Troy wat can perscribe de weder for des har

country. Who wuld haf thot de wuld be pickin' ripe snow balls off from water mellow wines at des time off year und we don't haf to waist any cold storage tu keep des til spring.

De roads which are still runnin' at large round har are still got the gates closed to navigation but aye tank de steem boats skall ben playing laep-frog wit eath oder on des har Potlatch before so very long tu.

Wen yu cum down on yur wisit des summer we want dat yu shuld bring along your swinskafleka, she has got many old college chums wat went to different schools togedder wit her, und we skall have her to see our new department house wat is almost depleted. In des har department house, besides white animal sinks and revolving bath tubs in de kitchen, de haf ay cookin stove wat ain't got no ash pan nur stove pipe, und it yust starts to cookin wen yu snap de switch un on comes the yuse.

Well, Mr. Lutie, if yu don't git des har leter without ay reasonable length off time, wuld yu please let me no rite away so aye can make ay complaint tu de cemetary wur de dead letters go. An if aye don't hear from yu aye tank it wuld be too soon.

Very .Regretfully Yurs, Olaf.

Cameron News
