VOLUME XXXIX

KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, APRIL 26, 1929.

No. 17

## THE STATE WE LIVE IN

By Byron Defenbach

### The Oldest Public Building

Exploitation precedes development. Primitive Idaho's most obvious wealth was fur; that exhausted, we turned in 1860, at Pierce, to placer gold. This layer itself had several strata. Early miners took only the coarse grains; much of the ground was subsequently re-washed from one to five times.

The tale of the Pierce camp is more or less the story of them all. Thousands of people of every class and vocation came, many of them apparently taking up the particular occupation for which they were least fitted. Lawyers built sluice boxes. Greek scholars washed dishes. Gamblers preached funeral sermons. Cowan, badly lame from birth, walked back and forth between Pierce and Lewiston, carrying the mail. Joaquin Miller's claim can still be located up Rhodes' Creek; he is charged with having preferred Indian poker to mining. Bret Harte got as far as Lewiston; Levi Ankey, U. S. senator-to-be, freighted into Pierce.

They were a restless and dissatisfied people. Many left good claims at Pierce to go to the newer discovery, Elk City. Florence came next, the camp unique for its small size, incredible richness, short life. In the Boise Basin, George Grimes found wealth and lost his life almost in the same hour. Alder Gulch then in Idaho, now Montana, came along about the same time.

East of the mountains the great Civil War was raging; gold from the sands of Idaho helped to win it. Increased population called for government; Pierce became, and remained for 25 years, the county seat of our first county, Shoshone. Idaho Territory was organized in 1863 its capital at Lewiston.

The cream taken off, there came the inevitable reaction; men went as rapidly as they had come. By 1870 Idaho's total population had dwindled to just one person under 15,000. But our lines had been fixed, our government established.

The old Shoshone county jail still stands in good condition at Pierce; it is Idaho's oldest public building. The Gaffney Hotel and its proprietor, a native son of Pierce City, both grew older. But the line is not broken. John Gaffney built a new hotel along side the old one, his son is a county official at Orofino. Pierce differed from most other camps in that gold was not its sole source of wealth; it is the center of the greatest virgin body of white pine timber in the world, and of the wealthiest school district per capita in the United States.

A great sawmill has been built at Lewiston, with a railroad into Pierce. Huge logging trains roar down the valley of the Clearwater, paralleling the rough road once traversed by a club-footed mail carrier.

Why was it, that among ten thousand able-bodied men a badly crippled one should choose the task of walking, over and over again, that weary, lonely, 70 miles?

For the same reason that there was once an armless wonder who played an elegant game of billiards.

### Organize 4-H Club

Last Saturday County Agent Taylor and District Extension Agent Stevens organized a 4-H club on Bear ridge. Those who have already joined the club are: Vivian McGraw, Imogene Nelson, Alma Jones, Maxine Keene, Gail Ingle, Ronald Jones, Ronald Ingle, Homer Emmett, Roy Emmett, Tommy Keene and Ray Jones. Miss Opal Jones and Miss Alta Moore will be leaders for the girls and Lester Nelson was chosen leader for the boys. The girl will take up sewing and the boys will take up bean and pig club work.

### To Improve Juliaetta Roads

The commissioners of Juliaetta good road district are advertising for bids in this issue of the Gazette, for 4,000 yards of crushed rock to be hauled on six miles of road in the Juliaetta section.

The surfacing includes three projects. The main one is the Fix rigde grade, which will be surfaced from Juliaetta to the top, a distance of four miles. This will leave but a comparatively short section of dirt road between Juliaetta and Genesee, which, it is understood, will be surfaced in the near future.

A mile of road between Juliaetta and the Nezperce county line, extending toward Lewiston, will also be re-surfaced with a top coat. The mile of road from Juliaetta toward Kendrick will also be given a top coat of fine rock.

The commissioners of the good road district are R. H. Hall, S. S. Taber and James Whalen. Clerk of the board is Arnold Behrens.

### Add Prize to Contest

This week Frank Crocker donated a prize to the Magpie egg contest. It is a beautiful hand-made hunting knife and is now one of the best prizes in the window. There are now seven prizes to be won by the boys and any one of them is worth having.

The boys are scouring the Potlatch hills and ruining the chances for a good hatching season for wicked magpies. There are seven contestants entered and it is understood that one of the Heimgartner boys is coming in tomorrow with the intention of heading the list with his basket of eggs.

Following is the standing of the contestants:

James Bolon	500 points
Thomas Blevins	475 points
Oscar Onstott	350 points
Jim Schultz	245 points
Archie Sloan	115 points
Fred Reid	110 points
Ray Lyons	70 points

### Kendrick to Troy Sunday

The second game of the White Pine-Latah league schedule will be played at Troy next Sunday. A big delegation of rooters are planning to go from here to see Kendrick take the Trojans into camp.

Troy is advertising on its hills "Troy can't lose." Well, neither can Kendrick. Looks like a tie game.

### The Smallpox Situation

There is no change in the smallpox situation over last week. No new cases have developed within the past ten days or more. Prospects look very favorable at this time that the epidemic has reached its end here.

### Band Concert Tomorrow Night

A band concert will be held in the town park Saturday evening, April 27, starting at 7:45. Everybody is cordially invited to attend. The concert will last approximately one hour.

### He Always Knows

It is always the person who cannot write a 4-line local, spell every word correctly who makes fun of the errors in the newspapers. It is usually the fellow who couldn't run a store two weeks without going into bankruptcy who feels competent to give the merchant pointers on how to conduct his business, and it is the folks who could not make a public address even if their lives depended on it, who find fault with the ministers' sermons. The reason is not hard to find: No man knows how much brains it takes to do these things until he tries it himself.—Exchange.

Mr. and Mrs. Jack Bechtol of Lewiston spent Sunday here at the home of Mr. Bechtol's mother.

### LOCAL NEWS FROM THE LELAND COMMUNITY

#### Items of Interest From The Busy Potlatch Center.

The Misses May and Mary Byrnes were visitors at the Stewart Heffel home, Sunday.

J. E. Fleshman and family were Lewiston visitors, Sunday.

Miss Ruby Heffel visited at the Clifford Davidson home Saturday afternoon.

Mr. and Mrs. Albert Schultz of Cameron visited at the Leonard Wolf home, Sunday.

Mr. and Mrs. Hugh Parks were Sunday guests at the R. B. Parks home.

G. W. Fleshman family were dinner guests Sunday at the B. P. Fleshman home.

Robert Smith and family were guests of Ed Johnson's, Sunday.

Mrs. Jennie Hund and Francis called on Mrs. Yenni Sunday afternoon.

Wade Candler moved his family to Orofino the latter part of the week.

Mrs. D. Porter and Anna visited at the David Daniel's home last week.

George Hicks and wife were Southwick visitors Sunday.

The A. R. Locke family are around again after being released from quarantine.

Mrs. Carol Burkhart was a week-end visitor in Moscow.

Mr. Harmon spent the week-end with his folks at Rosalia, Wash., driving his car home.

Mr. and Mrs. Erel Woody spent Sunday at the John Glenn home.

Mrs. Eliza Thornton and grandchildren spent Sunday at the Charles Hoffman home.

Mr. and Mrs. Philip Johns spent Saturday night and Sunday at the Clifford Davidson home.

Mrs. Wilson returned to her home in Kendrick, Sunday, after spending a week with her daughter, Mrs. L. Wolf.

C. P. Powell was the successful candidate for school trustee.

Mr. and Mrs. T. H. Daugherty spent Saturday night and Sunday at the Lyle Harrison home.

G. W. Fleshman and family were visitors on the Clearwater Saturday.

Mrs. Kermod, Wilfred and Wilbur Corkill visited relatives near Troy, Sunday.

Sam Gibson is moving his family to the Kuykendahl house.

Several of the ladies of the Missionary Society motored to Lapwai, Tuesday to attend a joint meeting of the society.

#### Texas Ridge News

Mr. and Mrs. Orval Miller, Chas. Dahlgren and family were Sunday guests at the Dahlgren home.

Mrs. Fanny Randall and son, Wayne, of Clarkston, visited on the ridge Friday at the Martin Frantzie home.

Prof. J. P. Barackman closed a very successful term of school Friday, a goodly number gathered in and listened to the interesting "bird program" that had been prepared after which a bounteous basket dinner was served. Prof. Barackman returned to his home in Moscow.

The Ladies Guild met at the home of Mrs. Dahlgren, Wednesday afternoon. A large number were present and a wool quilt was tied that the ladies have been making. After the business was taken care of the social hour was spent in the usual manner, followed by a dainty luncheon served by the hostess.

Mr. and Mrs. Henry Steiger were Sunday dinner guests at the E. G. Ogden home.

George Carr, wife and baby, were Sunday visitors at the Fred Bailey home.

Mr. Quesenberry has returned home after being in the Troy hospital for more than a week with a serious case of blood poison in his arm.

Mrs. James Miller spent Saturday evening in Deary visiting with her sister and other relatives.

Arnold Behrens, and little son, of Juliaetta, were Kendrick visitors Wednesday morning.

### COMMUNITY NEWS FROM JULIAETTA

#### Items of Interest From Our Neighboring Town.

Miss Kathryn Weitz left Friday noon for Spokane, returning Sunday evening.

Mesdames Nutt, Adams, Alexander and Misses DuBois and Stump motored to Lewiston, Saturday.

Buster Houck is very ill with Scarlet Fever. This is the only case in town.

Mrs. Jessie Dawson of Spokane visited friends here over the week end.

A large number of the members of the Aid Society of this place attended the group meeting of the M. E. Church South Missionary Society of Lapwai, Tuesday.

Miss Kathryn Weitz was a dinner guest of Mrs. E. V. Adams Wednesday night.

Rev. and Mrs. Forbes and Mrs. Kate Crutchfield attended the missionary society at Arrow Thursday.

Don and Cecil Gruell spent Sunday with their parents.

Mrs. Walter Cochran entertained the bridge club Monday. After several hours of bridge the hostess served a delicious lunch. The following guests were present: Mesdames Adams, Jones, Nutt, Clark, H. Jones, Alexander, Biddson and Cochran.

#### Cameron News

Mrs. Silflow and Mrs. Teats were callers at the Henry Wendt home Friday.

Mr. and Mrs. Gus Kruger, Mr. and Mrs. Henry Wendt, Mr. F. Silflow, Sr. and Mrs. Teats were in Lewiston, Saturday. From there, Mr. Silflow and Mrs. Teats went to Uniontown, where they spent most of the day. All returned home in the evening.

W. H. Weyen and family, Wm. McCoy and family and Dave Schoeffler and family were dinner guests at the Chas. McCoy home, Sunday.

The little friends of Selma and Edward Wegner helped them celebrate their birthday anniversaries last Sunday. Mrs. Wegner served a dainty lunch and the day was spent in playing games.

Rev. Wm. Schwarz of Lewiston, occupied the pulpit of Emmanuel church last Sunday.

Mr. and Mrs. George Ehlers of Lewiston were visiting on the ridge, Monday.

Mrs. A. O. Wegner spent Monday afternoon with Mrs. O. W. Henry.

Mrs. Reiche is staying with her daughter, Mrs. Alex. Lawrence of Southwick, the past week.

Mrs. Carl L. Wegner and Mrs. Amos Spekker were at the Geo. Wilkens home, Monday afternoon helping Mrs. Wilkens quilt.

Mr. and Mrs. Henry Brammer were dinner guests of Mr. and Mrs. Carl Koepf, Sunday.

Mrs. A. F. Wegner was called to Tammany Monday by the illness of her father.

Mrs. Hein of Juliaetta is assisting Grandma Schultz with her work.

The results of the annual school election held last Saturday were: Mr. Wm. McCoy was elected as trustee for a term of three years, and a nine months term was favored.

Mildred Wegner was an overnight guest at the A. H. Blum home, Wednesday.

#### Leisure Wanted

Two colored men in a Jim Crow car were heard commenting over the days news. "I see for a five-day week," said one. "How 'bout you, Sam?" "Man," said the other enthusiastically, "I see for a five-day week-end."—Ex.

#### Smallpox Ban Lifted Tomorrow

Dr. Stevenson, county health officer, stated yesterday that the ban placed on public gatherings some time ago on account of the smallpox epidemic, will be lifted Saturday morning.

### Injured by Exploding Babbitt

Walker Helton, formerly of the Leland community, met with a painful accident recently, while working in the machine shed for the Pierce highway district. He and his helper were doing some repair work, babbitting a grader wheel boxing when the babbitt exploded and threw hot metal into the faces and eyes of the two men. The pain was so intense that Mr. Helton fainted. The two men were rushed to the Orofino hospital where their burns were cared for. Mr. Helton had to spend nearly a week in the hospital while his helper was able to leave the same evening he was injured. Fortunately neither one of them lost his eyesight.

#### Let Weeds Mature

County Agent Taylor was in Kendrick last Saturday on his way to Bear ridge where he went to organize a 4H club. He stated that farmers who are planning to use chemical sprays for eradicating noxious weeds, should allow the weeds to mature before spraying. The proper time is just before the bloom starts to form. He also said that if the ground is plowed or cultivated the spray is not effective.

He advises the use of sodium chlorate or calcium chlorate, the latter being preferable because it eliminates the danger of fire. Any further information concerning this question may be secured by writing Mr. Taylor at Moscow.

#### The Municipal Election

Tuesday, the day for the municipal election, was very quiet and apparently there was little interest in the outcome. Nevertheless a substantial vote was cast. There were 101 registered and of this number 77 voted.

There were three candidates to fill two places on the Board for a term of four years. E. T. Long received 58 votes, W. J. Carroll 56 and E. A. Deobald 38. The two former will serve as trustees. After their installation the personnel of the board will be N. E. Walker, Herman Schupfer, M. O. Raby, E. T. Long and W. J. Carroll.

The destiny of the town will be, to a more or less degree, in their hands. They should receive the loyal co-operation of its citizens.

#### Will Meet Veterans Here

In a letter to Dr. McKeever this week, C. H. Hudelson, regional manager of the veterans' bureau for Idaho, stated that Arthur T. Curley, chief co-operator of his office, would be in Kendrick on or about May 6, in the interest of ex-service men of the World War. He will render every possible service to claimants for adjusted compensation.

#### Mrs. Charles Cummings Passes

Mrs. Charles Cummings, a resident of American ridge for nearly 40 years, passed away very suddenly at her home last Tuesday night at 10:30. Death was due to heart failure.

Funeral services will be held this afternoon at 1 o'clock at the Bethel church, providing a brother and sister arrive from California.

#### Cox-McDougal

The marriage of Miss Margaret Cox, daughter of Mr. and Mrs. William Cox of American ridge, and Mr. Stanley W. McDougal of Kellogg, took place at the home of the groom's parents at Colfax last Saturday. The ceremony was performed by Rev. Sprague of Colfax.

The bride is a popular young lady in the Kendrick community and in Moscow. She and her husband are both graduates of the University of Idaho. The bride is a member of the Gamma Phi Beta sorority and the groom a Beta Pi fraternity man.

After a brief honeymoon the young couple will make their home in Kellogg.

### POTLATCH WINS THE OPENING LEAGUE GAME

#### Both Teams Play Fast Ball Last Sunday.

The opening game of the White Pine-Latah league, played here last Sunday with Potlatch, was won by the visitors 7 to 4. It was a fast, clean exhibition, full of thrills and spectacular plays. Kendrick showed superior field work but the pitching of Benson for Potlatch was a little too much for the local batsmen. He kept the hits scattered and pulled out of several tight places.

Bill McCall and Phil Types ruined two perfectly good base-balls by slamming them into the rocks in right field for two bases. They were beautiful hits.

The Potlatch team are good sports and real ball players. The game was entirely free from ill feelings of any kind. Fred Bolon of Lewiston did a first class job of umpiring and his decisions were satisfactory to both teams.

Following are the high spots of the game in detail:

Potlatch	Ab	R	H	SO	E
Johnson, rf.	5	1	2	1	0
Elsir, cf.	5	2	2	1	0
Andrews, lb.	5	1	2	1	0
Benson, p.	4	1	1	0	0
O. O'Rielly, 2b	4	0	1	0	0
Egan, ss.	4	0	1	0	0
Taylor, 3b.	4	1	1	2	0
B. O'Reilly, c.	4	0	1	0	0
Taley, lf.	3	1	2	1	0
*Phelps, lf.	1	0	0	1	0
Totals	39	7	12	9	1

\*Phelps for Taley in 9th.

Kendrick	Ab	R	H	SO	E
Boyd, lf.	5	0	1	0	0
F. Glenn, ss.	5	0	0	1	0
T. Eichner, 2b.	5	2	2	2	0
Stevens, 3b.	4	1	1	0	1
McCall, lb.	4	1	2	1	0
Blum, cf.	4	0	0	1	0
Types, rf.	4	0	1	1	1
Sullivan, c.	4	0	1	1	1
McPherson, p.	2	0	0	1	1
*Lough, p.	2	0	0	1	0
Totals	39	4	8	9	4

\*Lough for McPherson in 7th.  
Umpire: Fred Bolon.

#### Score by Innings

Potlatch 0 2 0 3 0 1 0 1—7  
Kendrick 0 0 0 1 1 0 0 2 0—4

#### Summary of Pitchers

Benson for Potlatch allowed 8 hits, struckout 9, hit 2, walked 1.  
McPherson for Kendrick allowed 9 hits, struckout 6, walked 3.  
Lough for Kendrick allowed 3 hits, struckout 3.

#### Results Last Sunday

Potlatch 7, Kendrick 4.  
Bovill 9, Troy 4.  
Elk River-Genesee game called on account of rain.

#### Players Record for Season

Players	Ab	H	R	SO	E	Ba.

	Won	Lost	P.C.
Bovill	1	0	1.000
Potlatch	1	0	1.000
Kendrick	0	0	.000
Troy	0	0	.000
Genesee	0	0	.000
Elk River	0	0	.000

#### School Election

A large vote was cast here last Saturday at the annual school election. The total vote was 94. There were two candidates for the office of trustee for a term of three years. The election returns showed 76 votes for Wm. A. Watts and 18 for Mrs. Frank Ellis.

**THE JUGGLER**

**Honor Roll**

Only three students received grades high enough to win a place on the Honor Roll for the second six weeks period of the second semester. They are: Doris Emery, junior; Edna Bolon and Nona McAllister, freshmen. Several students hope to be on the list for the remaining period.

**Early Morning Hike**

Tuesday morning at four o'clock the members of the P. J. Club hiked out to cook breakfast. They enjoyed coffee, bacon, eggs, bread, cookies, and candy prepared over a bonfire. Those who went on the hike were: Edna Lohman, Helen Emmett, Neva Ware, Mae Freytag, Doris Emery, Eleanor Herres, and Marjory Davidson.

**Students Studying Effects of Heredity**

The biology class is much interested in the study of heredity and the science of eugenics. Mr. Beardsley has required a theme of from five hundred to eight hundred words on "Why I Think Heredity is More Important Than Environment." Many students are of the opinion that the reverse is true, however.

**Emma Glenn Chosen Valedictorian of Class of '29**

Emma Glenn, a student taking her last year of high school in Kendrick was chosen valedictorian of class of '29. Emma came from Juliaetta with such high grades that she took first place in the senior class. Minnie Craig is salutatorian.

**Students Win Gold and Bronze Pins**

Doris Emery and Lillian Long have been awarded the gold medal given by the Underwood Typewriter Co. for making 60 words a minute for fifteen minutes.

Georgine Christensen and Edna Stanton have been awarded the bronze medal for 40 words per minute. Lillian Long, Georgine Christensen, and Edna Stanton are all from the first year typing class.

**Basket Ball Girls Attend Prom. at Deary.**

Last Saturday night most of the basket ball girls with their escorts went to Deary to the Junior Prom. They all reported having had a very enjoyable time.

**Commercial Students Attend Sub-District Contest**

Thursday afternoon five students from the commercial department went to Moscow to take part in the sub-district commercial contest. Those representing Kendrick were: Doris Emery, second-year typing; Lillian Long Eleanor Herres and Marjory Davidson, first-year typing.

At the first of the year, the sub-district meet was expected to be an elimination contest but the State Constitution had ruled otherwise. The schools in this district are now attending the contest in order to give their students more experience in contest work before they are sent to the district contest on May 3 at Spokane.

**Seniors Take Annual Sneak Day on Tuesday**

The following account of their trip on the annual sneak was written by Minnie Craig, a senior:

Tuesday morning about three o'clock several different auto horns were heard around town. Out came the seniors ready for a day of enjoyment. After meeting at Mr. Beardsley's and getting the lunch in the car, we were ready to start. At four-thirty we were leaving the village of Kendrick for Lake Waha. Good luck was with us until we got on the wrong road and went about thirty miles out of our way. Turning around to retrace our way we soon found ourselves on the right road. By the time we had reached Lake Waha, breakfast was being thot of. Finding no suitable place at the lake we decided to go to Winchester. Reaching Winchester we stopped at the park by the lake. Here breakfast was prepared, a fire being built, so we could cook the pancakes, ham and eggs, also to make coffee.

**Big Crowd Enjoys Concert**

The open-air concert, given by the local band last Sunday afternoon, was greatly enjoyed by the large crowd present. This was the first concert given and is one of a series that will be held during the summer months. The members of this splendid organization are to be congratulated for the fine showing at this concert. Another concert will be held in the park tomorrow evening to which the public is cordially invited.

**Seattle May Build Its Own Trolley Cars**

Seattle, Wash.—Seattle city fathers, already in the street car business, may turn street car builders and furnish 200 needed trolley cars for their municipal enterprise, should the city utilities heads accept a "build your own" plan recently submitted to them.

According to plans and estimates each car could be constructed at a saving of \$2,000 over a cash bid tendered by a St. Louis car building firm. A saving of \$5,500 per car would be made if the rolling stock was purchased on time.

All this tasted very good to the hungry group of seniors, Mr. Beardsley and his wife. We remained there until about three o'clock in the afternoon, ate dinner, and then started for Lewiston.

Lewiston was reached about five, when we decided to meet again after seeing a show. Some went from here to Asotin, Clarkston, or elsewhere. After attending a movie we returned home, a tired and sleepy crowd. By twelve o'clock Tuesday night all were home and most likely in bed. A good time was enjoyed by all who were on the sneak. The cars had travelled over two hundred miles while on the sneak.

**First And Second Grades**

The primary children are enjoying "The Raggedy Man" by James Whitcomb Riley, this week. They listened to the reading of the poem from a phonograph record and then read it from an illustrated volume of Riley's. They also found much pleasure in the "Warbler's Serenade" in connection with their bird study last week and this.

Th second graders are very much interested in the "Thought Test" readers, they are using.

Two more small window flower boxes have been added to the primary room. Verbenos and asters have been planted in them.

The children of the first and second grades are learning a new "May Day" song and game which they very much enjoy.

**Chuckler**

George: "Did the honor system work well in your school?"  
Emma: "Yes, until some sneak went and squealed on us."

Carl D. (to his father): "Father, I've a notion to settle down and go in for raising chickens."  
Father: "Better try owls. Their hours would suit you better."

Mr. Jarvis: "What do they call the instrument the French use for beheading people?"  
Raymond Lyons: "The Gillette, I think."

Harley E.: "No girl ever made a fool out of me."  
Bessie B.: "Who was it, then?"

Lillian: "Why do you kiss me when you are supposed to be a gentleman?"

Claude: "It's the doctor's orders. He said I must avoid all excitement, and it excited me to sit beside the most beautiful creature I have ever seen and not kiss her."

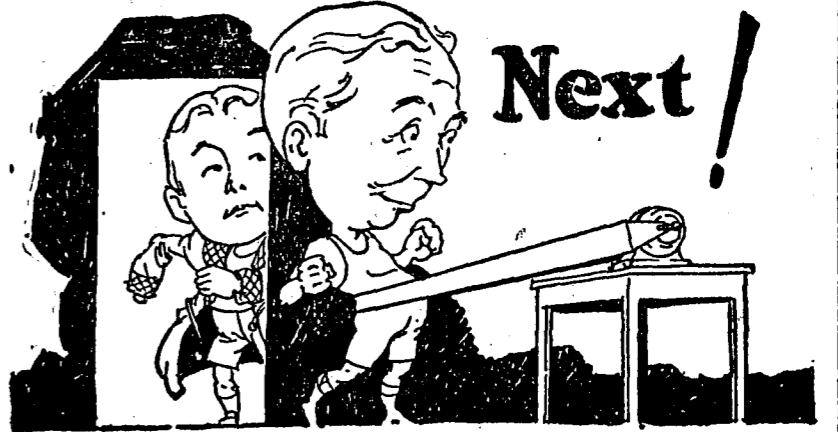

Lillian: "Well, of course if it's the doctor's orders I suppose it's all right."

For Chamois Gloves

Or Enduring It

If a few drops of olive oil are added to the water when washing chamois leather gloves they will not become stiff. The oil preserves the leather. For all too many of us, middle age means that period of life when we spend a good share of our time anticipating some new ache or pain.—Fort Wayne News Sentinel

**BRITISH TO TRY FOR AIR RECORDS**

Expect to Cop With New Mystery Plane.

London.—Two world's air records—the nonstop in a straight line and the endurance—are to be attacked by Britain's new mystery plane.

Built specially for these attempts, the plane, a giant Fairey Napier long-range monoplane, was recently completed at Cranwell airbase, Lincolnshire.

Definite details of the intended flights have not yet been revealed, but it is suggested that the plane may try to fly around England for three days and nights to beat the endurance record. It may then, perhaps, fly to South Africa by stages, but return to England nonstop, a distance of, roughly, 6,000 miles, which would beat the nonstop flight in a straight-line record.

While the plane was being built all data as to its construction was shrouded in a veil of secrecy, but since its completion the veil has been lifted slightly to reveal a large number of innovations and novelties, specifically included for the attempts on the records.

For instance, there is a hooter, which will sound in the pilot's ear should he get off his course when attempting the endurance record. It operates automatically, but how it does so is still a secret.

From wing tip to wing tip the machine measures nearly 100 feet. The fuel is carried in this giant wing. For the duration attempt there will be more than 1,000 gallons of gasoline stowed away. The total weight of the machine and fuel is ten tons, and to carry it the wheels and tires have had to be strengthened. The tires are pumped up by an electric pump and the wheels are fitted on to ball bearings in order to facilitate the takeoff.

To insure no failure of the gasoline supply, a wind-driven pump can be pushed through the side of the fuselage if the engine pump fails. If that fails, a hand pump can be used. The filtering arrangements for the oil are duplicated. This is in order that one filter can be cleaned when the other is in use. Arrangements have been made, also, for oil to be jettisoned while the monoplane is still in the air.

The pilot's seat is fitted with pneumatic upholstery, and there is a pneumatic bed. There are also facilities for hot and cold drinks and food.

The engine is an ordinary type Napier Lyon, developing 450 horse power, but secret alterations have been made with the carburetor system greatly to reduce the gasoline consumption. In a bench test the engine ran perfectly for more than 70 hours.

**Test Use of Crude**

**Oil in Plane Motor**

Berlin.—Tests that are claimed to have been entirely satisfactory have just been made in flights with an airplane fitted with a new "Junker's" 600-horse power engine that operates on crude oil.

This is the first time an airplane has been flown in Germany with a crude oil motor; and due to the fact that crude oil is not readily ignited this makes for safety from fire in a crash. On account of this safety factor, coupled with the low cost of crude oil, it is claimed the invention of a crude oil motor will do much to popularize flying.

The motor, which is the result of many years' research, was lengthily tested in a motor car before being installed in an airplane. The makers have so far refused to reveal details of the test or specifications of the motor other than to say it generated 600 horse power.

**Uncle Sam's Private Fox Farm Yields 586 Pelts**

Dutch Harbor, Alaska.—Uncle Sam has a fox ranch all his own. A total of 552 blue fox skins and 34 white ones were taken from animals trapped on the Pribilof islands during the season of 1928-29, as compared with 361 the previous period.

These island foxes live on the carcasses of fur seals killed for their pelts during late summer. The early winter frosts preserve the meat until the following June. Then for three months foxes subsist on sea food combed from the beaches.

**Florence Is Man but Navy Thinks Him Girl**

Lynn, Mass.—Florence Wright, seventeen, about as perfect a physical specimen as the navy recruiting station here ever saw, despite his name, was turned down for enlistment in the United States navy because a Matine town clerk has recorded him a girl.

Wright recently moved here from North Vassalboro, Maine, his birthplace, and after passing all requirements was told he must present his birth certificate. The birth certificate arrived and stated that Florence Wright, female, had been born there March 6, 1912.

Florence hates his name now, and was about ready to clean up the recruiting station until he was told he probably would be allowed to enlist if he can clear up his birth record.

**UNITED STATES NOW OWNS 9,000 ISLANDS**

All Are Outside the Boundaries of States.

Washington.—Acceptance by congress of the Samoan Islands as part of the United States territory definitely adds six more bits of land to the thousands of islands the nation now owns.

"The United States has acquired some 9,000 islands outside the boundaries of the 48 states," says a bulletin from the Washington, (D. C.) headquarters of the National Geographic society.

"This host of territorial islands is scattered from the South Pacific north across the Arctic circle. They sprinkle the seas of both hemispheres for a distance of 15,000 miles from St. John, in the Virgin Islands, to Balabac Island, on the outskirts of the Philippines.

A "Milky Way" of Islands.

"While 9,000 islands are few, perhaps, beside the island collections of Great Britain, Holland and France, yet American territorial islands decorate the oceans like star galaxies ornament the heavens.

"The Philippines are the 'Milky Way' of the United States' island constellations. They alone comprise approximately eight thousand islands. Everyone knows about Luzon, the monster Philippine island, as large as Ohio in area. Almost nothing is known of the seven thousand islets in the Archipelago having an area of one-tenth of a square mile or more.

"Then there is the scarf of Aleutians swung across the blue sea void toward Asia. The United States coast and geodetic survey does not know for sure how many Aleutians there are, but it is endeavoring to find out by airplane surveys. Then, down in the panhandle of Alaska lie many more islands behind whose protecting flanks, steamers thread their way up the inland passage. Other islands fret the Alaskan coast, including a famous little sandbar of an island behind which Wilkins and Eielson took off to fly across the top of the world.

"How large is Hawaii? That all depends upon how the territory is measured. By square miles of land the Hawaiian islands have an area equal to Connecticut and Rhode Island. By their spread over the Pacific ocean the islands occupy a region as long from east to west as the United States is wide. Wake Island, of the territory of Hawaii, an uninhabited atoll 18 feet above sea level, lies nearly 3,000 miles away from the Island of Hawaii.

"To American citizens who wish to be marooned on an uninhabited island with ten selected books, the United States offers endless opportunities. In the West Indies there are some very nice islands on which nature, barring occasional lops, maintains the quietness of a good library. Wake Island, previously mentioned, assures almost perfect privacy. The nearest bit of land is 300 miles away.

Choosing a Sequestered Spot.

"Tose Island, in the Samoan group, has unusual advantages for the seeker of literary leisure. It is 80 miles east of its nearest neighbor; climate, equable; real estate, one island half a square mile in area comfortably situated within a coral breakwater; inhabitants, none; fishing, excellent, although many species are poisonous. New packets of ten selected books could be obtained by the small boat which comes to Rose Island annually to deposit emergency stores of food and water for the use of sailors who might be shipwrecked.

"The Samoan islands loom large in the history of the United States' foreign policy. The joint agreement of Great Britain, the United States and Germany to establish a protectorate over the islands, represented, it was said, the first departure from our nation's historic attitude toward all-

ances. The joint protectorate did not work out well, so, by treaties in 1900 and 1904, the United States took control over the eastern half of the islands containing Pago Pago harbor, the finest in all the South seas. Congress, after all these years, has passed a resolution accepting the twenty-year-old gift of the islands from the Samoan chiefs.

"In the lists of American territorial possessions one group of islands seldom appears. The status of 70 guano islands scattered all over the Pacific is indefinite. Even the position and existence of some of them is indefinite. By a law passed in 1856 the United States extended temporary protection to American citizens exploiting guano deposits on bird islands. While the United States is not obliged to maintain sovereignty over guano islands, neither has she surrendered all rights. Over some islets and banks such as Navassa Island, between Jamaica and Haiti, Quita Sueno bank, Roncador cay, Serrana bank, and Swan Islands, all in the western Caribbean, and Gente Hermosa or Swains Island near Samoa, the American flag flies without question."

**Wisconsin Yields Gum Like Irish Peat Wax**

Washington.—Wax similar to that extractable from Irish peat has been produced in peat bogs of Wisconsin as result of experiments conducted by the bureau of mines.

In the course of studies of the origin and composition of Wisconsin peat now being made at the Pittsburgh experiment station of the bureau of mines, the amount and character of wax extractable from peat by means of hot alcohol was investigated. The peat contains approximately 0.85 per cent of a white wax melting at 103 degrees Fahrenheit in the crude state, and at 175 degrees Fahrenheit when purified by recrystallization from petroleum ether.

This wax apparently is very similar to wax extractable from Irish peat. It is quite different chemically from the wax recoverable from low-temperature tar, because this consists mainly of hydrocarbons.

A Gazette "for sale" ad will get results. Try one.

**Snake Skin Mode Blamed On Eve By Psychologists**

OLIVE HILL WEARING SNAKE SKIN BATHING ENSEMBLE

FLOPDOWN CHAIR UPHOLSTERED IN ALPINA KARUNG SKIN

RUTH BURR DRAPE IN A 20 FOOT SNAKE SKIN WORTH \$600

Many psychologists and scientific interpreters of human emotions are admittedly bewildered by the popularity of the snake skin as a material for general use by the weaker sex.

For centuries now it has been believed that a woman is instinctively repelled by the sight of a snake, yet here we find her enthusiastic over the new snake skin hand bags, parasols, vanity cases, etc.

This year will see a large importation of hand bags from Paris, made from the skin of the Alpina Karung, the East Indian Python, one of the ugliest of reptiles. Even the repulsive Boa Constrictor, fashion experts report, is being used for snake skin pocketbooks.

A New York Professor of Psychology, although he refused to be quoted officially, offers some explanation of women's willingness to carry a bit of snake skin under her arm.

"It is undoubtedly true that women seem to have an abhorrence for the snake, but whether this feeling is instinctive or whether it is built up from tradition, I do not know," said the Professor.

"Almost every little girl hears the story of Adam and Eve and the snake. Naturally she never forgets that it was the 'snake' who tempted her early relative, Eve."

"On top of this, the fact that many snakes are really dangerous, appeals to the fear emotion in women. So naturally, the girl builds up a snake complex."

I personally think that when a woman sees the skin of a snake made into a pocketbook, she likes the idea, and is willing to carry the pocketbook for two reasons:

"First, here is her ancient enemy overcome and made to serve her. Second, I think it has been more or less proven that many things which repel us still have some weird kind of an attraction."

You know how you often seek the company of some person you dislike, for the mere pleasure of matching your wits against him. This is the same idea that often brings a murderer back to the scene of his crime. He is in deadly fear of all things and places that have any association with the crime he has committed—yet this strange fascination draws him back."

American shops catering to women are to-day showing hand bags, shoes, parasols, gloves and many other things, made from the Alpina Karung, which is the Indian term for Python. The popularity among American women would seem to support the Professor's theory.

**Your Dollars Will Be Smaller!**

This is the size of the new money you will carry after July. Denominations and fac-simile as follows.

\$1.00 Washington	\$100.00 Franklin
\$2.00 Jefferson	\$500.00 McKinley
\$5.00 Lincoln	\$1000.00 Cleveland
\$10.00 Hamilton	\$5000.00 Madison
\$20.00 Jackson	\$10000.00 Chase
\$50.00 Grant	

The first change in our currency in 66 years, but it will earn you just as much if deposited with THE FARMERS BANK.

# Spring Showing of General Motors Cars.

This week, throughout America, the public is view-

ing the newest models of General Motors products.

Check and mail the coupon below. It will bring

this Spring Showing into your own home. / / /

**CHEVROLET**—Last year the public bought more than 1,000,000 Chevrolets. This enabled Chevrolet and General Motors to effect one of the most remarkable feats in industrial history: almost overnight, Chevrolet was changed from a 4-cylinder car to a Six in the price range of the four. The new Chevrolet Six is new in every respect: smoother, more powerful, and luxurious bodies by Fisher. 7 models—\$525 to \$725

**OAKLAND**—General Motors' policy of continuous improvement is nowhere more noticeable than in the new models of the Oakland All-American Six. The distinctive style and advanced engineering principles which Oakland represents have made it a center of unusual public interest at automobile shows. All-American in name, the new Oakland is All-American in its qualities of speed, snap, power and stamina. Fisher makes the bodies. 8 models—\$1145 to \$1375

**BUICK**—This famous member of the General Motors family, year after year, has given increasing value. Over 2,000,000 Buicks have been built and sold and of this total 1,500,000 are still serving their owners. The new Silver Anniversary Buick, with masterpiece Bodies by Fisher, comes in three wheel-base lengths. All are powered by the Buick Valve-in-Head engine, which is vibrationless beyond belief. 19 models—\$1195 to \$2145

**PONTIAC**—Since General Motors introduced the Pontiac Six three years ago, its sales have practically doubled each year. Now General Motors offers, in the new Pontiac, a "Big Six," at the same base price. It has big-car power, big-car performance and big-car luxury in the Bodies by Fisher. It is appealing particularly to families which are "stepping up" in car ownership. 7 models—\$745 to \$895

**VIKING**—There was demand for an 8-cylinder car of General Motors quality in the medium price field. General Motors chose Oldsmobile to design and build the new car, and three years were spent in its development and test. The result was revealed last month in the Viking, the latest member of the General Motors family. Viking has the world-famous 90-degree V-type engine and Fisher's newest creations in bodies. 3 models—\$1595

**LASALLE**—When General Motors introduced LaSalle, two years ago, it set a style which was widely copied both in America and Europe. The new models are as distinguished as the first. Built by Cadillac, LaSalle enjoys the same mechanical excellence: 90-degree V-type engine of 8 cylinders; transmission that permits gear shifting without noise or clashing at any speed. The bodies, by Fisher and Fleetwood, offer a choice of colors to express individuality. 14 models—\$2295 to \$4900

**OLDSMOBILE**—General Motors took this long-established car and remade it to provide a fine car at low price. Last year the value of Oldsmobile was so marked that the public bought over 50 per cent more than the year before. The new Oldsmobile models, with Bodies by Fisher, offer still further improvements—and the prices have been reduced! Oldsmobile also has new Special and De Luxe models, with extra features, at slightly higher prices. 7 models—\$875 to \$1035

ALL PRICES F. O. B. FACTORIES  
Time payments on the low-cost GMAC Plan

### COUPON

GENERAL MOTORS (Dept. A), Detroit, Michigan

Please send me, without obligation, your illustrated Spring Showing on the new models of the products I have checked, together with your new booklet of interest to car buyers—"The Open Mind."

**CADILLAC**—What more can be said of Cadillac? For twenty-five years the world's standard of comparison in the fine car field. The choice of kings, presidents and leaders of business and society in every country. To the unparalleled performance of Cadillac's 90-degree V-type 8-cylinder engine has been added the silent transmission and many new advances in design. Your choice of colors in bodies by Fisher and Fleetwood. 25 models—\$3295 to \$7000

## OHIO HAS FIRST FLYING SHERIFF

Gives Him Edge Over Other Law Officers.

Sandusky, Ohio.—When it comes to tracking down criminals and others who run afoul of the law, Sheriff Jack Parker of Erie county has the edge over his contemporaries.

In the first place, he can cover more ground. And in double quick time. For he is known as the "Flying Sheriff." He took office January 1 and has been awaiting his chance to demonstrate how the law can be enforced in ultramodern style.

Before his election as sheriff, Parker was engaged in a general commercial flying business with a brother, Luther Parker. He has turned the management of the venture over to his brother, but still pursues flying as a hobby.

Parker has made one promise which he hopes to fulfill soon. The first prisoner sentenced to the state penitentiary who wants to fly to his new "home," the sheriff said, will get the chance.

Residents of Keller's island, eight miles from the mainland in Lake Erie, find Parker's plane to be invaluable in an emergency.

With navigation closed because of wintry blasts on the lake, no mail was delivered to the island for 11 days last month. When this delay was called to the attention of the "Flying Sheriff," he told his island deputies:

"If you want me for anything, telephone and I'll fly over."

Recently Frank Riedy and John Campbell, residents of the island, came to Sandusky with the mail men. When they started to return it was impossible to cross the lake.

Riedy appealed to Parker. "Fly us over to the island," he asked.

Half an hour later the two men were home.

So pleased were the islanders with the possibility of aerial connection with the mainland that they have established a landing field.

## TROOPER TO SEEK SOLOMON'S MINES

Claims He Holds Key to Dazzling Wealth.

Bradford, England.—Trooper Arthur Sharp, formerly of the Natal mounted police, but now living in Bradford, is convinced that he holds the key to the site of King Solomon's fabulously wealthy diamond mines.

The story goes back to Sharp's turn of duty at Port Shepstone, when he was sent by sea to Durban in command of a party of natives in charge of a dangerous prisoner, who eventually was placed in an asylum at Pietermaritzburg.

"During the voyage," Sharp related, "the prisoner threw one of the native guards overboard. I jumped in after him and rescued him. Months afterwards I was visited by an old Zulu, the father of the man I had rescued. As an expression of gratitude, he said he would reveal to me the whereabouts of a rich diamond field that had never hitherto been discovered by white men."

"I noted the location of the field, rather to please the old man than for any conviction he was really revealing to me the location of a secret diamond mine."

Finally, out of curiosity, Sharp attempted to find the mine, but failed. He returned and berated the aged Zulu, who promised personally to guide him to the field.

After a two-days' march, he said, they came to a place where the characteristic "blue clay" of diamond strata was visible for a large distance.

Sharp said he hurried back to Port Shepstone to prepare equipment for mining, when he was stricken with fever. When he recovered he learned the old Zulu had died. Meanwhile doctors said Sharp was too weak to attempt another trip and they invalidated him home.

"As soon as I can get some funds together I am going back to Shepstone and see if I can't retrace the path taken by my Zulu guide," he said.

## Man, 83, at Last Finds Time to Work in Studio

Leslie, Mich.—For 72 years the desire to become an artist was constantly shoved into the background by Jay Beldirg DeLamater by the sheer necessity of eking out a livelihood.

Today, at the age of eighty-three, with that necessity at last lifted, DeLamater is astonishing critics who have viewed his works at a little studio in Leslie as the aged man of artistic tastes bends joyfully over his easel, determined that he shall yet realize the one great ambition of a lifetime by reproducing things of beauty.

Before the Civil war opened DeLamater used to win prizes of the boys of his own age at the farm near Norwalk, Ohio, where he did pencil drawings in the woods and along the roadside. But his father was a stern man, impatient with aesthetic tastes, and turned the boy's efforts to work in the field.

Then the father was killed just as the Civil war opened. Jay's brothers went to war and he was left to support his mother and keep up the farm. In time he was married, and has had to think of supporting five children. The nearest he ever came to realizing his ambition during this long period was when he purchased a photographic studio in Leslie, but this has been a long way from the dream of his youth.

Now DeLamater's wife is dead; his five children are grown, and he has enough, together with a small income from photography, to continue his efforts with pencil, paint and brush.

DeLamater hopes within the next few years to win recognition of higher critics for his art.

## Italian Village Holds Record for Fecundity

Rome.—The fecundity championship of Italy, probably the world, goes to the little village of Vavalese in the Piemonte valley, which just broke into print with figures that make any young married man of modest income think more than twice before going there.

There is one family there with 24

children, a dozen boasting about 20, more than 40 with 15, while the few remaining in the village average ten or twelve.

## Drinks Goat Milk, Weighs 400 Pounds

New York.—"Pasquale Valentino, you are charged with keeping goats in the city limits, a violation of the sanitary code."

Pasquale rose slowly from his seat in court. He weighed 400 pounds:

The magistrate queried: "How in the world did you get so fat?"

Pasquale replied placidly: "I drink goat milk."

The court mused, then spoke: "Well, the ruling will do the goats no good, but it certainly will do you good. These goats must be killed."

An interpreter explained that Pasquale had already obeyed the health inspector and had driven the goats to the slaughter house.

## Rich Chemicals Lost When Volcanoes Erupt

Washington.—Not all active volcanoes erupt, as did Mount Etna recently, like a hot-oven pot. Many explode, shooting dust and ashes miles into the air. The non-explosive character of Etna is ascribed by volcanologists to the fact that its lava is a relatively thin liquid which allows steam and gas bubbles to escape readily. In explosive volcanoes the lava is thick. It holds back steam and gas stubbornly, causing immense pressure beneath and eventually a violent eruption.

Because practically every active volcano in the world is located not far from large bodies of water, the theory is advanced by Dr. William Bowie of the United States coast and geodetic survey, and others, that the kneading action of the periodic tides twists the earth, forcing up the lava and

causing volcanic activity.

Concerning the source of heat that forms molten rock, or magma, one theory is that internal pressure causes it. A second, writes Edwin W. Teal of the Popular Science Monthly, is that the heat is produced by chemical action. Another is that friction of shifting layers of rock generates it. Maj. C. E. Dutton, a geologist of the United States geological survey, has advanced the idea that the real secret is radium! Radioactivity in the rocks, he says, is sufficient to melt them in certain places, forming large subterranean pools of lava.

Untold fortunes in gases and chemicals, valuable to industry, are wasted in the atmosphere every time a volcano lets go. "The Valley of Ten Thousand Smokes," in Alaska, a volcanic field formed by the eruption of Mount Katmai in 1912, has been called a gigantic chemical factory.

## Bake Shop's New Owner Killed by Bread-Mixer

Jersey City, N. J.—Less than a week after Antone Toprocki, thirty-four, bought a bakery shop he let his arm get caught in a bread-mixing machine and was found dead when Fred Butin, an employee, reported for work.

With what police say must have been almost superhuman strength, Toprocki freed his crushed arm from the machine by breaking an iron casting. He crawled upstairs to within a few feet of a telephone, where he was found dead. Toprocki had intended to remove his belongings and his wife from Yonkers, N. Y., to their new home here.

## Loaded With Narcotics

Calcutta.—Narcotics valued at \$35,000 were taken from a ship raided by police here recently. The vessel was from China and was found to contain firearms, besides the cargo of narcotics.

## Golf Ball Explodes

Chicago.—Harold Carver, aged ten, threw a golf ball into a fireplace "to see what would happen." It exploded and his face was badly burned.

## REFUSING "LIGHT" INSULT IN GERMANY

Denial of Match May Bring Heavy Fine.

Dresden, Germany.—A Dresden appeal court has upheld a man who complained against another for refusing to give him a light on the street. The specific charge was insult and offense.

Like most laws, this law against insult and offense has a common-sense background, although it may be abused by frivolous, or childish, or spiteful application. The law is designed primarily to curb those persons who are grossly offensive and rude to their neighbors and so are likely to create breaches of the peace. A comparable law was that on the statute books of some of the states of the United States long before prohibition, which forbade drinking alcoholic liquor on trains. Experience had proved that many times train drinkers became drunk and abusive and a menace to their fellow passengers.

### Often Wrongly Applied.

The great trouble with such laws as that upheld in Dresden is that they are often wrongly applied. Any man asked for a light late at night by a burly stranger in a deserted street might well think that the old scheme of asking for a light preparatory to pulling a robbery of the wayfarer was about to be tried. Certainly, the average person in the United States looks askance at light askers in deserted streets, and more so at strangers who ask the time. Still, a law against insult and offense might be a boon for lightweights in subway crushes or would-be ticket buyers at some New York theaters.

Fines up to \$100 and even imprisonment are the penalties which threaten the Germans who refuse a light to a stranger in the street anxious to ignite his cigarette, cigar or pipe.

This is the great surprise for the German world of smokers provided as the verdict in the case before the Dresden court of appeal.

### Insult Upheld.

Herr Krause, hurrying home one night last year through the streets of Dresden, had somewhat brusquely refused the request of a fellow pedestrian that he should stop and allow him to light his cigarette on the glowing end of Herr Krause's cigar.

The petitioner took Herr Krause's refusal so much to heart that he pursued him and had him arrested by a policeman, who took Herr Krause's address.

The owner of the unlighted cigarette then proceeded to sue Herr Krause before the civic court for insult and offense, which under German law is punishable with heavy fines and even imprisonment. Herr Krause was found guilty of having insulted the would-be-smoker and was sentenced to pay a small fine.

He appealed against this verdict, however, and the Dresden court of appeal absolved him from the fine, but declared at the same time that "the refusal to oblige a person with a light can constitute an insult."

## Farm Population Is Lowest in 20 Years

Washington.—The Department of Agriculture announced that the farm population was now the smallest in 20 years, with 27,511,000 on the farms on January 1, compared with a peak of 32,000,000 in 1903.

The bureau's estimate also shows a decrease in farm population during the last year despite improved agricultural conditions and a slight slackening in industrial employment, the January 1, 1929, figure comparing with a farm population of 27,639,000 persons on January 1, 1928.

The decrease in farm population in the last year would have been much greater were it not offset by an excess or births over deaths, the figures revealing that in the movement of population from and to farms, 1,960,000 persons left farms during the year and 1,362,000 persons moved from cities to farms.

The movement away from farms slowed up somewhat during the year compared with immediately preceding years, but the movement from cities to farms also was smaller. Thus it is shown that 1,900,000 persons left farms during the last year, compared with 1,978,000 in 1927, and with 2,155,000 in 1926. The movement from cities to farms was 1,320,000 persons last year, 1,374,000 in 1927 and 1,135,000 in 1926.

The large farm birth rate of twenty-three births per 1,000 persons and small death rate of eight deaths per 1,000 persons has been a big factor offsetting the farm-to-city movement, so that the net loss of farm population last year was 188,000 persons, compared with 193,000 in 1927 and with 640,000 in 1926.

## Deportation to "Utopia" Request to Be Granted

South Bend, Ind.—William K. Starr, twenty-two, will be deported to Russia, which he described as a working-man's Utopia during an attack on the economic system of the United States in city court here.

Arrested on a vagrancy charge, Starr was given permission to say a few words.

"I want to return to Russia, the workingman's Utopia, where I can live and let live. I want to be deported."

"Don't worry. I'll see that your wish is gratified," City Judge Chester L. Deacon replied.

\$1.00 cash each paid for a number of old Deering binder grain wheels including bearing and axels.

Real Buys in Used

Cletrac 12-20 \$500 Fordson and plow \$350 Twin City 15-27 \$500

Several pieces of used machinery cheap.

Remember, we know our business in repairing tractors and autos. We say our used tractors are O. K. that means O. K. See our floor full of new machinery. New Cletracs with 4-row bean cultivators. Kendrick Machinery Company W. F. Behrens, Manager. Kendrick, Idaho

Cheese as Staple

Cheese is regarded as the staple food in many countries because of its high nutritive value. It is especially rich in vitamin A. In Switzerland it is consumed almost universally because of its protein content, which exceeds the protein of average meat and is twice that of eggs. Its calory value is greater than that of any other food, except perhaps nuts, butter, oil and very few meats.

Wedding announcements and invitations printed at the Gazette office. 26-1

HARRY A. THATCHER, Clerk of the Board of County Commissioners, Latah County, Idaho. 16-6

Call For Bids For Crushing And Hauling Rock

Sealed bids and proposals will be received by the undersigned good road district at the office of the clerk of the Board of Commissioners at the Bank of Juliaetta, Juliaetta, Idaho, at any time prior to the hour of nine o'clock, A. M. on the eighteenth day of May, 1929, for crushing, hauling and delivering approximately four thousand yards of rock. Approximately three thousand yards thereof not to exceed one and one-half inches in diameter and approximately one thousand yards thereof not to exceed three-fourths inch in diameter. All of said rock to be hauled and delivered at such points on the highways hereinafter mentioned as shall be designated by any duly and regularly authorized officer, agent, or employee of the undersigned good road district. Said highways being more particularly described as follows, to-wit:

Commencing at the western boundary line of Juliaetta, Latah County, State of Idaho, extending thence in a westerly direction along the main highway for a distance of approximately four miles.

Also, commencing at the southern boundary line of said town of Juliaetta, extending thence, in a southerly direction on the main highway to Lewiston for a distance of approximately one mile.

Also, commencing at the north end of main street in the town of Juliaetta as now existing, thence northeasterly on the Kendrick highway for a distance of one mile.

The undersigned good road district undertakes and agrees to furnish a crusher site as heretofore designated.

All bids shall be in writing, and must be accompanied by a certified check or cashiers check in a sum equal to five per cent of said bid, payable to the order of the undersigned highway district to be held by it as a guaranty of good faith pending the completion of any contract based upon the acceptance of said bid.

Any contract made pursuant to this notice shall be accompanied by a bond as required by law, and the successful bidder shall be required to carry Industrial Accident Insurance as provided by statute.

The Board of Commissioners hereby reserve the right to reject any and all bids received pursuant to this notice, or to accept any bid or proposal which it may deem for the best interest of the district.

Inquiry concerning further particulars may be made at the office of the Clerk of the Board of Commissioners above mentioned. Dated this twenty-third day of April, 1929. GOOD ROAD DISTRICT NO. 2, OF LATAH COUNTY, IDAHO. By R. H. Hall, S. S. Taber, J. Whalen. Correct-Attest: A. W. Behrens, Clerk, (Seal) 17-3

SHERIFFS SALE

Notice of Sheriff's Sale of Real Estate Under Execution. C. I. T. Corporation, a corporation, Plaintiff vs. Carl Sparber and Frederick Sparber, Defendants.

BY VIRTUE OF AN EXECUTION, issued out of the District Court, Second Judicial District, in and for the County of Latah, wherein C. I. T. Corporation, a corporation, were Plaintiffs and Carl Sparber and Frederick Sparber were Defendants, upon a judgement rendered the 19th day of March, 1929, for the sum of Two Hundred Forty-one and 41-100 Dollars in U. S. gold coin besides interest and costs, I have this day levied upon all right, title, claim and interest of said defendants, Carl Sparber and Frederick Sparber of, in and to, the following described real estate, to-wit:

That part of the Southwest quarter (SW 1/4) of the Southeast quarter (SE 1/4) of Section Twenty-three (23), Township Thirty-eight (38) North, Range Three (3) W. B. M., lying West of Brady Gulch Road, situate in Latah County, State of Idaho.

Public Notice is hereby given that I will on Monday, the 6th day of May A. D. 1929, at 10 o'clock A. M., of that day in front of the Court-house door, in Moscow, Latah County, Idaho, sell at public auction, for the United States gold coin, all the right, title, claim and interest of said defendants, Carl Sparber and Frederick Sparber, of, in and to the above described property or so much thereof as may be necessary to raise sufficient amount to satisfy said judgment, with interest and costs, etc., to the highest and best bidders.

Dated this 8th day of April, 1929. CHARLIE SUMMERFIELD, Sheriff of Latah County, Idaho. By Geo. K. Moody, Deputy. 15-4

Girl Earns \$600 to Pay for Course in Flying

Fremont, Neb. — Nineteen-year-old Josephine M. Schaefer took an airplane ride during a Fourth of July celebration at Humphrey two years ago. That settled the career question for her. She would be a pilot. Her father, Joseph Schaefer of Norfolk, didn't take so kindly to the idea. Josephine determined upon earning her own money to pay the tuition at a flying school. But jobs for young women were scarce.

The girl came to Fremont, tried several jobs and finally found she could make and save more money as a waitress. She worked twelve hours a day, every day until she had saved \$600. With it she paid for a 50-hour course.

Josephine now is finding out that an ambitious aviation enthusiast spends many hours on the ground toying with valves and pistons before she goes aloft.

Her father relented and bought the girl flying togs.

1,100-Year-Old Saxon Cross Found in Abbey

Sempringham, England.—Part of a Saxon cross, said to be about one thousand years old, has been discovered half-hidden in the graveyard adjoining the ancient Abbey church.

The district is rich in antiquarian remains, many relics having from time to time been unearthed during excavations for land drainage where the village—demolished centuries ago—originally stood.

Sempringham is famous as being the place where St. Gilbert founded the only religious order of English origin, the Gilbertines. He died here in 1189 at the age of one hundred six.

Rigorous Censorship

An interesting feature of the ticker service is the fact that the stock exchange through a special committee exercises a rigorous censorship over ticker locations. Only those persons or firms which have been passed upon by this committee may rent a ticker carrying New York stock exchange quotations. This is done to keep quotations from huckster shops and from unscrupulous stock dealers and others who might use the quotations for illegal or unethical purposes.

Spanish Monarch Plays Lead in Moving Picture

Toledo, Spain.—King Alfonso of Spain was leading man in a moving picture of the recent royal hunting party on the estate of the duke of Santona.

He permitted a film to be made of himself and his companions, not only while they were engaged in bringing down game, but also during intimate moments of family life in the castle. The camera operator obtained several views of the king playing on the ground with the duke's children.

Cheerfulness

What, indeed, does not that word "cheerfulness" imply? It means a contented spirit; it means a pure heart; it means a kind, loving disposition; it means humility and charity; it means a generous appreciation of others, and a modest opinion of self.—Buckeary.

Man's Responsibility

"Is this a good world?" asks the preacher. Well, Shakespeare found it a naughty world with good deeds slung in it, and perhaps the description still holds.—Boston Transcript.

Just a Matter of Habit

People are wondering today, says Hartford Courant, how they ever got along without the radio, as they have wondered how they ever managed to get along without the automobile.

STOCK TICKER GIVES NATION QUOTATIONS

Marvel of Accuracy Broadcasts Market News.

New York.—The turmoil which the visitor to the floor of the New York stock exchange sees on a busy day is not apparent in the operating rooms of the Western Union from where more than 5,000 stock exchange tickers in 239 cities, in 37 states and territories in this country and Canada are furnished with stock exchange quotations. A studied orderliness stands out from the noise and clatter of myriad telegraph apparatus.

To one who has stood over a stock ticker and watched it unreeled quotations hour after hour without the slightest falter or hesitation the question, "How does it do it?" presents itself. One is forced to marvel at the manner in which stock quotations appear in a steady procession as well as the almost uncanny accuracy of the quotations recorded.

The continuous performance of the stock ticker is due in great part to the employment of the old adage, "An ounce of prevention is worth a pound of cure." The ticker service is so regulated, so carefully guarded that a break in the mechanical operation of a ticker is rare. The circuits which carry the quotations are inspected, tested and watched over with persevering care by the maintenance department of the telegraph company. The accuracy of the ticker is due to the training of the operators who manipulate the sending apparatus. All quotations are sent out over a typewriter-like keyboard by operators who have been schooled in this work. How accurate they are may be judged from the fact that in a recent twenty-eight day period, one operator depressed the keys of the sending instrument more than one and one-quarter million times without making a single misprint.

Handling Quotations.

Stock quotations go to the operating rooms of the Western Union over the exchange's own tickers, which also supply the offices of exchange members in downtown New York city, direct from the floor of the "big board." They are relayed by the telegraph company from two points. An office at 40 Broad street in the heart of the city's financial district, and only a stone's throw from the exchange, transmits quotations to New York city, New England and to practically all points east of Ohio and north of Virginia. From 24 Walker street quotations are sent to tickers in the South and West.

As the stock exchange ticker records the quotations at the telegraph company's office, the tape passes before a girl seated at a keyboard which resembles a typewriter keyboard. This operator merely types out the quotations as they are read from the exchange ticker tape. When a key is depressed it creates electrical impulses which in turn work the intricate mechanism of the ticker, resulting in the printing on the ticker tape of the letter or number controlled by its particular key. Only a few seconds elapse between the depressing of the keys in New York city and the imprinting on the ticker tape in distant cities.

To insure accuracy of all quotations, a ticker alongside of the sending operator records what has been sent and another employee compares this with what has been received over the stock exchange ticker.

Rigorous Censorship

An interesting feature of the ticker service is the fact that the stock exchange through a special committee exercises a rigorous censorship over ticker locations. Only those persons or firms which have been passed upon by this committee may rent a ticker carrying New York stock exchange quotations. This is done to keep quotations from huckster shops and from unscrupulous stock dealers and others who might use the quotations for illegal or unethical purposes.

While by far the greatest number of stock tickers are in the offices of brokers, with bankers taking second place, a goodly number of these instruments are in hotels and restaurants and in some cases in private homes.

Not only has there been a tremendous advance in the number of stock tickers in use, but today hundreds of brokerage houses have their own private leased telegraph wires for orders and executions.

Stock brokers are authority for the statement that their business could never be carried on over such a wide area and with such tremendous speed and accuracy were it not for the organization of the telegraph company. "We would be lost if it weren't for the tickers," one broker said recently.

"This marvelous instrument is the eyes through which thousands of persons in all parts of the country view the stock market. What the ticker says is weighed in the balance by investors and speculators far and wide. Through the ticker service the man in San Francisco has just as much chance to keep authentically informed of the market as the man in Philadelphia or Boston or Brooklyn. Quotations reach the coast at practically the same time they reach uptown New York, and it is just as easy for a client to wire a trading order from Los Angeles as it is for a client to phone his order from Central Park West."

Religion Gets Billion

New York. Something like a billion a year is given by Americans to religion. Total contributions last year for philanthropic purposes were \$2,219,700,000. 13-12-29 201 48 per cent.

A Gazette "for sale" ad will get results. Try one.

**LOCAL NEWS**

Paul Manly returned Wednesday morning from White Salmon, Wash., where he was called by the death of his father, who died very suddenly from heart trouble, at the age of 72 years.

Mr. and Mrs. Geo. Garner and family, Mrs. McPhee and son, Cleve, spent Sunday with Mr. and Mrs. Edgar Bohn.

Jesse Rigney and Miss Hazel Voll, university students, were guests of Miss Josephine Popkey over the week-end.

**SHEEP HIS DISH, BUT 'GAWGE' EATS CHICKEN**

Once He Craved Mountain Flesh, but No More.

Montreal, Que.—George Washington Jeffries, railway porter, spends his time going West from Montreal to Vancouver and then back East again. George has lost count of the number of times he has passed through the Rocky mountains.

George is nothing if not an epicure. There are few men who have a better appreciation of well-fried southern chicken. There is only one dish he has ever heard of—he has yet to taste it—which offers any comparison. That is broiled mountain sheep.

Whenever George passed through the Rockies, the home of mountain sheep, the desire to try conclusions with some broiled wild mutton swells up his throat.

Until recently his hopes of sinking his teeth into a bit of mountain sheep seemed as remote as the stars. George was no hunter, he could not chase mountain sheep around the hillsides. Then, one evening as the train pulled out of Jasper Park, Alb., a male passenger, well tanned, asked George to bring a large metal case he had with him into the dining car steward and request that it be kept well leed until the train reached Montreal.

George knew that the passenger was an eastern hunter just in off the trail—hunters often go on the train at Jasper—and that there was some wild mutton in the metal case. There could be nothing else that would be prized so much as to be put in a metal case and kept leed all the way East.

When he had made up all the berths, when the shoes were polished, when snores sounded through the sleeper, George prepared to make his way forward to the diner. He would only lift up the lid of the case and have a look inside. Perhaps a steak, just large enough to taste well, would not be missed if cut off neatly. George ran his finger over the blade of his long knife.

He uptoeed through the diner where the staff was asleep, opened and closed the door of the pantry behind him. It was dark. He could not find the light, but he discovered the catch to the ice chest and felt inside for the lid of the meat case.

He got out his knife and lit a match so that he could see how things lay. Something glistened there in the case. He looked closer. Two brown eyes stared knowingly out at him. They never blinked and were as large as saucers. There was nothing in the case but eyes.

First He Yelled. George Washington Jeffries did several things pretty well together. First he yelled. Then he dropped the lid of the case and the flickering match that was burning his fingers. In the darkness he yelled once more. As he found the door of the pantry he yelled again. He was yelling better, with more volume and greater coherence.

**Money Saving Values**

**Grocery Department**

Genuine codfish, boneless smoked herring, spiced herring, salt herring.

**Kendrick Store Company**

The sleeping car was awake and stirring as something rushed blindly through the dim aisle to the rear of the car. George Washington Jeffries thought the dining car top long but regretted that his own sleeper seemed such a short car length away. The next day he heard the passenger who had got on at Jasper explaining to a fellow traveler that, after several hunts in the Rockies, he believed the eyes of mountain sheep to be telescopic. He was taking a pair of eyes East with him from an animal he had killed. They were up ahead in the diner, packed in moist earth and moss as they had come off the trail, and surrounded by ice to preserve them on the eastward trip. A friend of his, a doctor, was interested in testing the theory.

**Electric Light Chains**

In order to find the drop chain on electric bulbs and the buttons on the switch in the dark, paint the end of the chain and the buttons with a luminous paint.

**Height of Something**

A Scotchman recently sued a baseball company because he was hurt while watching a ball game. He fell out of a tree.—Judge.

**Fine For Hogs**

The social investigator was go-

**WANTED**

Cattle, Hogs and Sheep, Hides and Wool, Poultry, Call

B. N. EMMETT & CO.

ing thru the home of a poor resident. "Do you think its healthy to have those hogs in your house?" he asked the owner. "Well-I-I, I've had hogs in this yere house for fo'ty-odd years, and I ain't had one die on me yet."

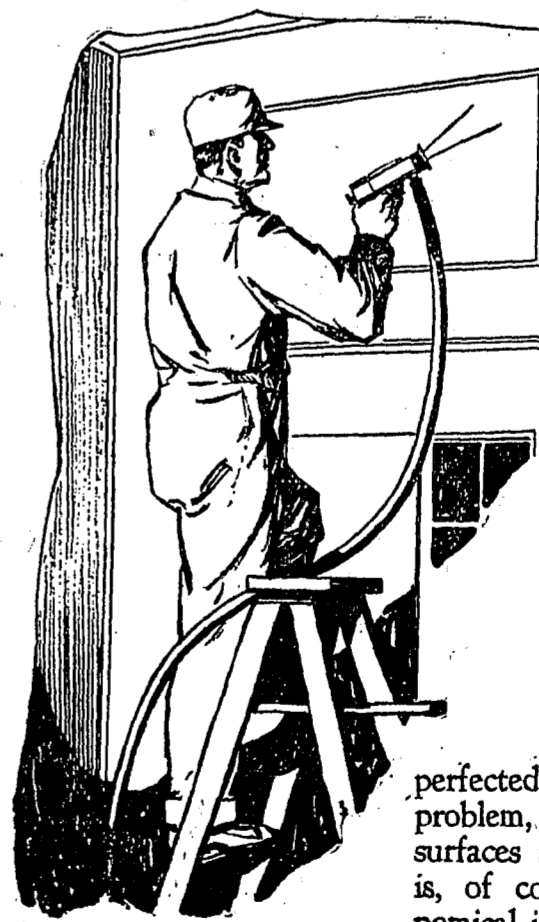

**Thats An Adv.**

When Davy Putman was a very little boy he once asked his celebrated father what an advertisement was. His aunt, who early made a habit of recording every interesting occurrence in the young explorers life, recently revealed the reply. It was: "An advertisement is the picture

of a pretty girl eating, wearing, holding or driving something that somebody wants to sell."

**A Good One**

A lady visted the store with a mail order catalogue in which she had marked the advertisement of a pair of shoes. She requested the store keeper to please order the shoes for her. In reply he said: "We don't do business with that firm, so possibly you had better order the shoes yourself." He was somewhat surprised when she remarked: "I am short of money right now, that you could order the shoes, add the sum to my account."—Exchange.

To Spray is the Modern Way for Many Large Surfaces

It should not be thought for a moment that the new method of spraying paint is not established. Mechanical devices have been perfected, which solve the problem, and where generous surfaces are to be covered it is, of course, the most economical idea of all.

Farm buildings, industrial plants, stores, etc., can thus be repainted with almost incredible speed.

Allow us to submit estimates and tell you some of the details of this interesting development in the painting business.
