OFFICIAL PAPER OF LATAH COUNTY

VOLUME XXXIX

KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, MAY 17, 1929

No. 20

THE STATE WE LIVE IN

By Byron Defenbach

High Lights of Our Present

Among the forty-eight states of the union, Idaho is 12th in size, forty-third in population, forty-first in wealth, and thirtieth in per capita wealth.

In round numbers Idaho contains 83,000 square miles, or fifty-three million acres. Of this, only four million acres or seven per cent are under cultivation. 26 per cent of the total area pays taxes, 5 belongs to the state, 36 is in nineteen forest reserves, and 32 belongs to the federal government.

The population of the territory in 1870 was 15,000, in 1900, 160,000, in 1910, 325,000, in 1920, 432,000 and at this time is estimated at 465,000.

The total wealth of Idaho is estimated at a billion and a quarter or about \$2,763 per capita. The assessed valuation is one hundred eighty-three millions. The census bureau estimates the average rate of assessment to be fifty per cent of actual value. The state has one of the most liberal exemption laws of any in the union. The total of delinquent taxes is about seven million dollars.

About one person in three is of school age and practically the same proportion of our population voted in the last general election.

In the state as a whole there are between five and six persons to each section of land. In the populated areas there are about thirty-three persons to a square mile.

The center of area is in Custer county, the center of population in Camas county, but the point most accessible to all of the state is at the town of Bliss in Gooding county.

The agricultural industry, including live stock, owns about one-half of the taxable property of the state, but does not pay in excess of about forty per cent of the total taxes.

Only 26 per cent of our people live in incorporated towns. 60 percent own their own homes. Nine per cent are foreign born and one and one-half per cent cannot read or write. Only one person in each five hundred of our population is of the colored race.

There are 100,000 automobiles in Idaho with an average value of under \$500.00 each. It is estimated that there are 99,462 installments past due. It would appear that about four per cent of our wealth is invested in automobiles. Comparing the state we live in with Minnesota, which is about the same area, the latter has five times our population and about six times our wealth. The cost of state government of Minnesota is seven times and its state debt nearly sixteen times that of Idaho.

One of the best known national authorities says that in low cost of government and small public indebtedness, Idaho occupies an enviable position. Its population is rapidly increasing and while predominately rural in character, has a low percentage of foreign born and illiterates, and a high ratio of home owners.

Scenery and climate are not the only things to be proud of in the state we live in.

Deputy Sheriff Married

Miss Bertha Clyde and Deputy Sheriff George K. Moody of Moscow were married Wednesday of last week. The wedding took place at the home of Frank Brashears, United States marshal at Boise. After a short honeymoon trip they returned to Moscow where they will make their home.

Band Concert Saturday Night

Another one of the series of open-air band concerts will be held in the city park tomorrow evening, starting at 7:45. Everybody is cordially invited to attend.

LOCAL NEWS FROM THE LELAND COMMUNITY

Items of Interest From The Busy Potlatch Center.

Mrs. Robert Draper, Mrs. Chas. Hoffman, Mrs. Joy Flesherman and Mrs. Jesse Thornton visited the school Friday afternoon.

Ben Hoffman and family were Lewiston visitors, Saturday.

Mr. and Mrs. James Helton motored to Lewiston, Saturday, where Mrs. Helton clerked for the day at Beach's.

Mr. and Mrs. T. H. Daugherty were overnight guests Tuesday night at the Virgil Flesherman home.

Mrs. Burns and Mrs. Burkhardt called on Mrs. A. G. Peters last Wednesday.

Mr. and Mrs. T. H. Daugherty, Mr. and Mrs. Lyle Harrison and family, V. Flesherman and family and Jake Daugherty were Sunday dinner guests at the A. G. Peters home.

Ben Shay is visiting relatives here on the ridge.

Mr. and Mrs. R. M. Smith spent the week end in Lewiston.

Mr. Goudzward accompanied by Marie DeWinter and Lovick Walbeck, spent the week end in Moscow with Mr. Goudzward's family.

Jesse Hoffman and family attended the Cherry Festival at Lewiston, Saturday.

Jesse Thornton and family spent Sunday at the Oral Craig home.

B. F. Flesherman was taken to a Lewiston hospital last week and an operation was performed thru his nose for some head trouble. He is very much improved at this writing.

Len Yenni and George Flesherman motored to Lewiston, Sunday to see B. F. Flesherman.

Clyde Gephart and Marie DeWinter attended the play given last Thursday night at Southwick.

Clyde McGhee and family were visitors at the A. H. Smith home Sunday.

Mrs. Wm. Clem and son are visiting her sister-in-law in Clarkston.

Mr. and Mrs. C. Andres and Kenneth Hund visited relatives here Sunday.

Mr. and Mrs. Leonard Wolf and son, Mrs. Davidson and daughter, and Miss Alma Molten were Lewiston visitors, Tuesday.

Miss Pearl Powell spent Friday night visiting her sister, Mrs. Ben Hoffman.

Ed Flesherman and wife spent several days last week in Lewiston.

Wins State Essay Contest

Miss Gladys Cain, daughter of Mr. and Mrs. Robert Cain of American ridge, a student in the Troy high school, won first place for Idaho in the sixth national meat story contest, in which high school girls from every state took part. The announcement was made from Chicago by a committee of prominent home economics women who served as judges.

Miss Cain's story was on the subject of "Beef in Its Relation to Other Meats." Other subjects ranged from meat production to cooking methods.

The meat story contest is conducted annually as an educational feature by the national livestock and meat board in cooperation with high school economics instructors. The national championship was awarded to Miss Ruth Cullen of LeGrande, Oregon.

Dance Tonight

A baseball benefit dance will be held at the Fraternal Temple tonight. Music by the Kendrick orchestra. Lunch at midnight. Everybody cordially invited to attend.

Ben Shay arrived Monday from Reedsport, Oregon, where he spent the winter. He was in a serious auto accident last fall and has spent most of the past nine months in a hospital.

King of Swat and His Bride

Babe Ruth, the famous baseball player, and his bride, who was Claire Hodgson. She gave her age as twenty-eight and said she was the daughter of James M. Hodgson of Jefferson Hill, Ga.

W. W. P. Co. Selling Stock

Resuming its customer-ownership campaign for the sale of its preferred stock to customers and others residing in the territory, the Washington Water Power company is now offering a limited number of shares of its new \$6 cumulative preferred stock, according to the announcement of M. W. Birkett, vice-president and general manager.

"This new cumulative preferred stock we are now offering to the public throughout our territory, is being sold at \$102 per share plus accrued dividends and dividends are payable at the rate of \$6 per share per annum," states Mr. Birkett. "We hope to distribute shares of this stock generally throughout the territory so that dividends of the company will be returned to the territory through our customers and others."

Shares of the stock are being sold at the local offices and by employes of the company. On the cash plan, from one to 50 shares may be purchased by one person, or one may subscribe for from one to 25 shares on the partial payment plan. Money paid in on installments earns interest at the rate of five per cent per annum. Subscribers who may wish to cancel their subscriptions for preferred stock will receive a refund of their payments plus five per cent interest.

Full details concerning the stock and the plan of sale may be obtained from any employe of the company or at the local office.

Car Over Grade

Doc Triplett and his grandson of Southwick had a narrow escape yesterday afternoon while coming down Wandcher grade in Mr. Triplett's Dodge touring car. They pulled to the side of the grade to let a car pass and the front wheels went over the edge, causing the car to roll over the grade. The car is said to have turned over twice before it landed in the creek bottom.

Mr. Triplett received a bad cut on the forehead and his grandson a bruised leg, but otherwise they were apparently not injured.

The car was badly wrecked as it rolled over a steep, rocky embankment.

Commercial Club Next Tuesday

The regular meeting of the commercial club will be held next Tuesday evening at the usual hour. A good attendance is desired.

Charlie Elliott transacted business in Troy last Friday.

Troy Plays Here Sunday

Troy will be here Sunday afternoon seeking revenge for the loss of the one-sided game that Kendrick took from them several weeks ago. It is reported that the visitors will have a fancy chucker who can hurl a mean ball. By winning from Bovill last Sunday the Bricklayers have demonstrated the fact that they will be in the running.

The game will start promptly at 2:30. Everybody is urged to come out and support the home team. It is worth the price of admission to see Riggs, Kendrick's pitcher, do his stuff. Don't miss this game.

Celebration Committees

Committees to have charge of the various departments of the big celebration to be held here July 4th, have been appointed. Final organization will be made at the commercial club meeting next Tuesday evening. The names of the committeemen follow:

Finance: Tom Long, Dr. McKeever, John Dammarell.

Entertainment: Mrs. L. J. Herres, Mrs. N. E. Walker, Mrs. O. J. Morehead.

Sports: Jack Barnes, R. H. Ramey, Gus Blum.

Grounds and Concessions: E. A. Deobald, Ed Long, Wm. A. Watts.

Decorations and Public Safety: H. B. Thompson, Herman Schupfer, N. E. Walker.

Publicity: W. J. Carroll, Otto Schupfer, G. F. Walker.

Parade: G. P. Barnum, Marvin Long, E. H. Emery, C. F. Delano, Paul Schultz.

Bring on Your Eggs

Available parking space for magpie eggs in the display window is getting crowded, but bring on your eggs; they will be checked in just the same. H. B. Thompson has been chosen as chief of the magpie contest in the absence of Joe Gardner. He is keeping an exact record of all eggs brot in and will post the standing of the various contestants, in the display window. The contest will end June 10, so hurry!

Following is a list of the eight highest with the number of points each has secured:

Clarence Heimgartner	3805
Thomas Blevins	2550
George Merrill Davidson	1550
James Bolon	1160
Oscar Onstott	1005
Garth Hill	925
Vern Spekker	810
Robert Weyen	560

J. O. Catlett visited friends in Kendrick the first of the week.

Southwick News

Carl Koepp and family and Grandma Brammer were dinner guests of Henry Brammer and family, Sunday.

Wm. Henderson and wife went to Potlatch, Saturday, where they will visit this week.

Ralph Wright and wife and Clarence Whiting of Lewiston called at the home of Ben McCoy Sunday afternoon.

Ernest Brammer is helping Henry Wendt with his work this week.

Doc Betts and family went to Lewiston and back last Friday.

Mr. and Mrs. Schadt of Nezperce spent Sunday at the home of their daughter, Mrs. Albert Mabry.

Harold Whiting and family spent Sunday evening at Given Mustoes.

Nels Longeteig left Sunday for Moscow to serve on the jury.

Mother's Day services were held at the M. E. church, after which a basket dinner was held at the Ladies Aid hall.

Pete Stump and family spent Sunday at the home of John Phillips.

Edgar Lincoln and family and Fred Hassinger and family of Gifford and Doc Betts and family spent Sunday at the home of Wm. Berriman.

Miss Pearl Powell was an overnight guest at the home of Mrs. Harold Whiting, last Tuesday night.

A number of people from Southwick and vicinity attended the baseball game Sunday between Southwick and Leland, the score was 12 to 25 in favor of Southwick.

Pete Stump and family, Harold Whiting and family and Lester True, spent Friday at Pete's timber ranch near Crescent.

The U. B. Sunday school attended services at the Cream Ridge school house Sunday morning.

Ben McCoy and wife spent Friday with their daughter in Leland.

Miss Jane Ziemann of Lewiston spent the week end with home folks in town.

Mrs. Eva Wright went to Crescent Tuesday to help Mrs. George Christensen in caring for the measles patients, there being four of the children sick with the disease.

Nellie Henderson and sister, Mrs. Elton McCoy spent Sunday at the Homer Hayward home.

Nadine and Eva McCoy and Wimer and Ralph Hanks of Leno, were dinner guests at the home of Mr. and Mrs. Harry Smith of Leland, Sunday.

Sherman Winters and two sons, Albert and Harry went to Camas last Friday. Mrs. Winters, who has been there all winter returned home with them Monday. Albert remained there as he has employment for a while.

Mrs. Geo. Jones and son, Richard, went to Lewiston, Saturday, returning home Tuesday.

Mrs. Tschantz returned home last Saturday after spending a week with her mother in Pomeroy.

Obituary

Robert F. Davis, prominent farmer and sawmill man of the Teakcan and Cavendish section, was killed Monday, May 6, when he was crushed by a falling log.

Robert F. Davis, son of Mr. and Mrs. Flanders Davis, was born in Nebraska, November 13, 1885. When a boy he came to Cavendish with his parents, where he grew to manhood. May 8, 1911 he married Cora Burnetta Herring. To this union five sons and three daughters were born. The greater part of his life was spent on the farm. He was industrious, honest and successful.

Those who survive him are his widow, eight children, three sisters and one brother, besides other relatives and friends.

Funeral services were held at Cavendish hall, conducted by Rev. S. M. Mathes of Southwick. Interment was made in the Southwick cemetery.

POTLATCH WINS TEN INNING GAME

Game Was Full of Thrills Last Sunday.

The game played at Potlatch last Sunday will probably feature the season as the outstanding contest of the White Pine-Latah league schedule. At the end of the ninth inning the score book showed 2 to 2, but in the last of the tenth Potlatch succeeded in driving in the winning run. It was a pretty game from start to finish and kept the crowd tense thru the full 10 innings.

Riggs for Kendrick pitched a wonderful game with 14 strikeouts to his credit. He had fine support and only lacked a lucky "break" to win.

In the third inning with Eichner on first, McCall drove a beautiful three-base hit to the center field corner, scoring Eichner. He later scored with a sacrifice by Stevens. Kendrick repeatedly reached third base during the game but lacked the final punch to score.

The Potlatch people are royal hosts to a visiting ball team and their team is comprised of a fine aggregation of good sports.

Following are the high spots of the game in detail:

Kendrick	Ab	R	H	SO	E
Boyd, lf	5	0	1	3	0

Protect Flocks From Parasites

Worms Causing Greatly Increased Losses to the Poultry Industry.

The recent studies of parasitologists of the United States Department of Agriculture are of scientific interest and of practical value to poultry owners. Referring to a 10 per cent decline in the chickens of the 1928 hatch compared with that of the previous year, Dr. Eloise B. Cram, of the bureau of animal industry, raises these questions: Why this decrease in 1928? Was it due to casualties caused by accidents and disease, or the closing out of flocks, or the cutting down of their size by poultry raisers, and, if the latter, why this closing out or cutting down? Were diseases, and especially parasitic diseases, an important item?

Serious Inroads of Parasites.
In answer to these questions, Doctor Cram cites evidence showing that parasites have been making more serious inroads on the poultry industry of the country than is commonly realized, though losses are sometimes difficult to explain until scientific observations are made. "In general," says Doctor Cram, "the worm parasites of poultry seem to be causing greatly increased losses to the industry."

"A poultryman in Washington, D. C., for instance, lost 75 per cent of several hundred chicks from gapes. Investigation showed that this loss resulted from the use of one of the poultryman's fields, for about 24 hours, as a resting place for a flock of turkeys being driven overland. The chickens became infested by gapeworms left by the turkey flock. In addition to producing the noticeable symptoms of gaping, by obstructing the windpipe, gapeworms also weaken their victims by sucking blood."

"Tapeworms have been named as the cause of death of 50 per cent of the chickens in some Maryland flocks. There have been correspondingly heavy losses of domestic geese in Oregon from a closely related parasite. In addition to causing death, tapeworms bring about emaciation, reduced egg production, and more or less complete paralysis."

Worms Kill Turkeys.
"Slender, threadlike worms in the crops of turkeys were found to have caused the death of three-fourths of the birds in a flock of 200, and the survivors were scarcely worth marketing. The gizzard worm, one of a general class of roundworms, is also serious because it attacks the walls of the gizzard and interferes with the food grinding function."

"Control measures to check inroads of parasites on poultry flocks," says Doctor Cram, "consist largely in sanitary equipment and management of flocks in such a way that the life cycle of parasites is broken so that infection cannot get back to the fowls. Prompt disposal of droppings from poultry houses, plowing up or scraping off the top soil of chicken yards, the use of a rotatory system of yards, the judicious use of disinfectants, and providing sanitary feed and water containers, are among some of the practical means of prevention."

"Even though poultry raising has been highly successful, it is unwise to relax precautions against parasitic foes of poultry. By increased attention and knowledge, the ravages of parasite enemies may be checked and poultry given a better chance."

Buckwheat Is Too Dense for Use as Nurse Crop

Buckwheat grows too densely and is too heavily leaved to be a satisfactory nurse crop. Sweet clover sown with it would be choked back badly and probably would not make a good stand. The sweet clover would do much better if sown with a nurse crop of barley or early oats. A bushel and a half to the acre of either makes a satisfactory nurse crop and will give a good yield. Sow 12 to 15 pounds of biennial white sweet clover per acre for a good stand.

Farm Notes

Copper carbonate controls snout.
For temporary pasture during the last half of the season, sudan grass is splendid.

Many successful farmers are specializing in two or three lines to offset the effect of changing price cycles.

By modern methods of sewage treatment, the liquid may be made to contain fewer bacteria than many of our private sources of drinking water.

After a calf is seven weeks old the milk can be entirely eliminated from the ration. Thereafter a vigorous calf will consume 13 pounds of grain daily until weaned at the age of four months.

THE JUGGLER

Baccalaureate Sunday

Sunday morning at 11 a. m. in the Presbyterian church Reverend Franklin will deliver the baccalaureate sermon. The six seniors leaving Kendrick High this next week will be glad to be through, but they will leave a vacancy in the row of seats next the windows that the Juniors will try to fill next year.

B. B. Girls Give Dinner

Last Wednesday night the basket ball girls entertained those who had helped in giving their program with a three course dinner. Those present besides basket ball girls were as follows: Mrs. Carroll and daughter, Lida Jane, Mrs. Jack Barnes, and Mr. and Mrs. Beardsley. The room was decorated in orange and black, the colors of the school.

Freshie Feast

A number of the Freshman girls, with Mrs. Jarvis, their advisor, enjoyed a dinner in the domestic science room Friday night. They cooked their own meal and made candy afterwards. The girls who attended were: Edna Bolon, Ethel and Burneda Cummings, Thelma Mill, Bonnie Candler and Nono McAllister.

School Out Next Thursday

School will be officially out Thursday of next week. Exams in Senior subjects will not be given until the first two days of next week.

Helen Emmett Leaves School

Last week Helen Emmett, a member of the Junior class, surprised many of her friends by getting married. When she left the place of editor-in-chief of this paper was vacated and Doris Emery is now substituting for the position. Although we miss Helen, we wish her the greatest possible amount of happiness for her future.

Junior-Senior Banquet

Monday evening the Junior class entertained the members of the Senior class, at a delicious four course dinner, which was given in the high school building. The first course consisted of fruit cocktail; the second, meat loaf, baked potatoes, creamed asparagus and bread and butter; the third, a perfection salad, served on a lettuce leaf with mayonnaise; and the last course, ice cream, cake and coffee. Everyone present enjoyed themselves very much.

The decorations were carried out in the senior class colors, blue and gold.

Our Ex-Faculty in 29-30

Miss Ledbetter has accepted a position as teacher in the Weston high school at Weston, Oregon.

Miss Mary Weaver will teach the seventh grade in Pomeroy, Wash.

Miss Nannie Weaver will teach in the Twin Falls city schools the coming term.

Miss Dille will return to college this fall.

The girls have enjoyed their work in the Kendrick schools very much and wish to thank the parents who have helped to make their work more pleasant here.

Misses Mary and Nannie Weaver were guests at the R. F. Parson and C. E. Roberts homes at Cloverland, Wash., last Saturday and Sunday.

Miss Dille and Miss Ledbetter attended the Cherry Festival in Lewiston, Saturday.

Retold Story by Cleota Bolon, 4th Grade

The Mouse and the Frog
Once a frog went for a walk. As he went he met a mouse. The frog said, "Let us spend the day together." The mouse said, "Let us tie our legs together that we may not lose each other." So they did.

t.&sb hew: 1w Sk st...oa a(g They went to a field of oats and ate and ate. At last they came to a pond—the mouse said: "You know I do not like water." The frog said: "A little water will do you good," and jumped in.

Just then a hawk saw the mouse and came flying down to get him. He picked it up and got the frog too. They both lost

Asparagus Bed Worthy of Good Attention

The asparagus bed will make good returns for any reasonable amount of time which one spends on it. Too often it is allowed to grow as best it can in some remote corner of the garden. The application of fertilizer, in the form of barnyard manure and some cultivation will increase the fruitfulness of the plants and make the shoots more tender and more palatable.

A good dressing of barnyard manure should be worked into the soil around the asparagus crowns as soon as the soil is in working condition in the spring. Keep the weeds down during the growing season by hoeing or cultivating. At the end of the cutting season allow the plants to grow up and form seed.

Usually, vineyards are pruned in the late winter, so that the vines may be tied and in place by the time the spring work starts.

A \$500 machine shed will often protect more than \$5,000 worth of machinery. You pay for the machine shed whether you have it or not.

Every farm and home garden should have a strawberry patch to provide delicious fruit for the table, both fresh and for preserving for winter use.

Sometimes the early planted vegetables will be caught by a frost, but not often. If the land was fall plowed, one will be able to get on it two weeks earlier than would otherwise be the case.

POULTRY

GROWING CHICKS REQUIRE PROTEIN

Larger Amounts Given First and Gradually Decreased.

"Increase in muscle and nerve tissue and the total weight of growing chicks, is largely due to the protein content of the feed ration," said Prof. G. F. Heuser, at the Cornell university at Ithaca, N. Y.

Chicks grow rapidly in the beginning. During the first month they have the fastest growth, and after the second month the rate of growth begins to decrease until the time of maturity. Since protein is needed for growth larger amounts should be fed at first, and less as the chicks grow older."

According to Professor Heuser, the experiments at Cornell show that certain amounts of protein are best for chicks at different ages and that feeding more than these amounts will not give greater growth, but that feeding less than these amounts is apt to result in decreased growth.

These experiments show that the best amount of protein in the feed for chicks from one to six weeks old is 20 per cent; for chicks of from 6 to 12 weeks, 17 per cent; and for those from 12 to 20 weeks old, 14.5 per cent.

Large amounts of protein feed will not hasten maturity, but enough should be fed so that the best possible growth can be attained at the time of maturity and this will mean larger eggs and better production.

Cannibalism Is Serious Habit Among Hen Flock

What is known among poultry raisers of experience as cannibalism among hens is in many cases a really serious proposition. If a hen with nothing else to occupy her gets to pecking at one of her mates and perchance plucks a feather and that feather perchance is a new one and a little blood should appear, another and more vigorous peck is made; this time a real wound is made and more blood is brought forth. From this time on this old hussy becomes a veritable cannibal. Others of the flock are more than likely to join her in this cannibalism and it takes but a short while for them to actually get their victim down and tear her to pieces. Poultry experts of the Ohio Experiment Station have found that trimming off the point of the under beak just about down to the quick will at once stop the mischievous work of an individual so treated. Sometimes it is but necessary to trim one or two individuals that happen to be leaders in the trouble.

Crooked Breast Bones in Turkeys Avoidable

There are two things responsible for crooked breast bone in turkeys. The first would be faulty breeding, that is, because there is a lack of the mineral matter of the right sort, because of faulty metabolism of the same. Another reason is faulty roosting places or letting them roost too early, that is, a round roost is more likely to cause a crooked breast bone than a flat one and too small a roost, that is, a roost that is too small in diameter is more likely to cause crooked breast bones than a flat roost. The toms naturally are heavier than the pullets and a round roost or a roost that is too narrow would account for the fact that the toms had crooked breast bones while the pullets had none.

Theories to Determine Sex of Little Chicks

Many rules and theories have been proposed for determining the sex of the chicks at hatching or even from the egg. To date, most methods have proved unreliable. In the Barred Plymouth Rock breed, the size of the white spot on the head may be used to separate with some degree of accuracy the two sexes. The chicks with the large head spots are usually males. The crossing of certain breeds will result in chicks, the sex of which may be separated relatively accurately on the basis of color.

Brooding Chicks

The most important consideration in brooding chicks is to keep them always on fresh soil to prevent the contraction of disease and parasites which come from soil recently used by other fowls. In order to prevent soil contamination the brooder house needs to be of a type which can be moved easily. To make the brooder house safe from rats and other vermin, it must have a tight floor, and in order to be readily movable this floor must be made of boards.

Care of Young Turkeys

The young turkeys, when first hatched, require good attention. First, look for lice and be sure to get rid of every one of them, then put them in a paper sack and shake them up. Second, be sure to keep them dry and warm—not too closely confined. Place the mother in a coop with a little pen in front so the little turkeys cannot run away, for, at first they are very shy.

Let Water Power make MONEY for YOU

THE WASHINGTON WATER POWER COMPANY believes that the money it pays every three months as Preferred Stock Dividends should go to customers and other local people. They support the Company, and they should share in its success and can do so if they are stockholders. Therefore, you are invited to invest in

THE WASHINGTON WATER POWER COMPANY \$6 PREFERRED STOCK

This is a very attractive investment, one requiring the least attention or thought; one over which you need not worry --- and these are some reasons why:

- The Company supplies necessities of every day life—electric light, electric power and water. The demand for our service is continuous and constantly increasing.
- The Company's business is with many thousands of people, industries and business establishments in the Inland Empire.
- The Company's great modern properties stand back of an investment in this Stock.
- The Management has demonstrated its ability and efficiency.
- The Company enjoys the confidence and good will of the people whom it serves.
- The Company's securities are well known to bankers and investors, locally, as well as in other financial centers.
- All of the Company's properties are within inspection range of residents of the territory served.
- Dividend checks are mailed to stockholders every three months, on the 15th of March, June, September and December.
- Authentic information regarding the business may be obtained directly from the Company.

Dividends Paid For the Last Twenty-nine Years
The Washington Water Power Company has paid regular quarterly dividends on Preferred Shares since their issuance and has paid common stock dividends every 3 months without a break for the last 29 years.

Price \$102.00 and accrued dividend per share for cash or easy payments as follows:
\$10.00 per share to start.
\$10.00 per share per month until \$102.00 and accrued dividend is paid.
Interest credited to you on your payments at the rate of 5% per year.
Your money refunded, including interest at 5% per year, on 10 days' notice, any time before final payment.
You may pay in full at any time and get your Stock Certificate entitling you to the full dividend rate.

Deadly Derris Root Poison for Insects

Safe for Use as Spray on Fruits and Vegetables.

(Prepared by the United States Department of Agriculture.)

One of the deadliest poisons known to chemistry is also considered one of the safest for use as a spray on fruits and vegetables for the control of certain insects. This poison is rotenone, the active principle of derris root. Its principal advantage for use as an insecticide is its chemical instability. According to Japanese scientists, about two days after rotenone has been applied to the plant or fruit it disintegrates and ceases to be poisonous.

A Japanese chemist isolated rotenone and gave it its name from the Japanese name for derris. Much of the world's supply comes from the federated Malay states. At present it is an expensive drug.

The poisonous properties may be preserved in the root, or after extraction, in an oil solution. Chemists believe that the oil solution mixed with soap and water to make an emulsion should prove an effective spray. The lead arsenate sprays now used in some orchard districts have forced the installation of expensive machinery for washing the poison from the fruit before it may be marketed. Rotenone would not have this disadvantage.

In the United States Department of Agriculture rotenone is now under investigation by Dr. F. B. La Forge, of the bureau of chemistry and soils. The active principle of derris is described as a white crystalline material insoluble in water but soluble in ether, alcohol, oils, and other organic solvents. Dr. R. C. Roark, of the same bureau, says too little is known of the consti-

Berry Growers Warned Against Size of Boxes

Reports have reached the United States Department of Agriculture that some dealers in berry boxes are endeavoring to secure sales by telling prospective customers that boxes sold by them hold less than other berry boxes. Growers are warned to pay no attention to such claims. If actually true, it means that the boxes are below the standard in capacity, in which case persons using the boxes might find themselves in violation of the United States Standard container Act of 1916.

Department of Agriculture officials declare that there is very little difference in capacities of the berry boxes turned out by different manufacturers. Samples of the output of each factory are tested by the department at intervals and but little variation is found. Differences in the dimensions used by individual manufacturers, however, sometimes make one box appear to be smaller than another. One box, for example, may have a slightly smaller top and yet have a slightly larger capacity than a box with a larger top.

Official Records Made Before Cows Freshen

The making of official records begins before the cows freshen. It is generally supposed that the condition of the animal at freshening time determines to a large extent her butterfat production while on test, the claim being made that the stores of body fat are drawn on to produce milk fat. Some men state that they have never made big records on really fat cows.

Alfalfa Does Not Thrive With Too Much Water

There is an old tradition among farmers of experience to the effect that alfalfa will not grow well with wet feet. If the land lies approximately level with the river it is probable that the water stands rather high in the soil at all times. There should be four or five feet between the surface and the ground water level if alfalfa is to make any kind of satisfactory growth.

Neither does alfalfa stand much overflowing. If water was to stand on an alfalfa field for several days to a week it probably would cause some damage. This land would be better suited to timothy, red top and alsike clover and to some of the filled crops than to a permanent stand of alfalfa. Should you find, however, that the water level is low in the land it may be that the alfalfa will grow satisfactorily.

Many Varieties of Tree Fruits Must Have Bees

Bees may not have grown bigger and better but they have been given another task to perform in orchards and small fruit plantations, according to statements made by specialists in agriculture at Michigan State college. Studies made during the past few years have proved that many varieties

Cause of Failure With Stand of Clover Crop

Not the least important factor in obtaining satisfactory stands of clover is the sowing of good seed. A farmer might use ground limestone to correct acidity of his soil and apply manure and phosphate to insure a growth of clover, yet get a poor stand of clover due to poor seed.

Out of 218 samples of red clover seed tested the past year at one experimental station, 70 samples showed an average of 27 per cent seed so hard that they will not grow. This means that if seed of this sort were sown at the usual rate only three-fourths of a stand would result if all of it escaped the usual clover hazards.

Paper Mulch Is Too Expensive to Use on Crops Having a Low Acre Value.

Get acquainted with your milking machine. It may be able to explain how the milk can be better.

You must have an abundance of manure and fertilizer. Don't be afraid you will make your land too rich.

Good equipment, good seed and plenty of fertilizer, coupled with fertile soil, make a profit out of the farming business.

Commissioners' Proceedings

Moscow, Idaho, Monday, April 8, 1929.

The Board met this day pursuant to adjournment, present: JOHN L. WOODY, Chairman, JOHN CONE and RUDOLPH E. NORDBY, Commissioners, and HARRY A. THATCHER, Clerk.

The Statement of the County Auditor showing sufficient funds in each budget appropriation to cover claims filed, was examined and ordered placed in the Commissioners' files.

Claims against Latah County were examined and allowed, and the County Auditor directed to draw warrants in settlement thereof, as follows:

CURRENT EXPENSE FUND

Table listing various expenses and amounts, including Harry A. Thatcher salary, Bessie Babcock salary, Emma J. Sayles salary, etc.

Samms Furniture Co., Mattresses, etc. 37.45
Moscow Sheet Metal Works, Work on Jail 18.00
Alfred Ekholm, Justice Fees 2.50
Eilmore East, Witness, Justice Court 2.00
Frank McVay, Witness, Justice Court 2.00
The Board now adjourned to meet tomorrow, Tuesday, April 9, 1929, at nine o'clock A. M.

Moscow, Idaho, Tuesday, April 9, 1929.

The Board met this day pursuant to adjournment, present as before.

Claims against Latah County were examined and allowed, and the County Auditor directed to draw warrants in settlement thereof as follows:

CURRENT EXPENSE FUND

Table listing various expenses and amounts, including Harry A. Thatcher salary, Bessie Babcock salary, Emma J. Sayles salary, etc.

the years 1929 and 1930, was examined and approved, and contract let to said firm, as per bid submitted.
The report of Harry A. Thatcher, County Auditor, on the interest collected on county deposits from the various county depositories, for the quarter ending April 1, 1929, was examined and approved, and ordered placed in the Commissioners' files.

In accordance with the recommendation of Byron Defenbach & Sons, Accountants, in their report, all outstanding unpaid county warrants, issued prior to the fiscal year of 1928, or for the years 1925, 1926 and 1927, and particularly itemized by number year and fund in said report, are at this time ordered cancelled and held for naught, said cancellations being for the total amounts, and against the various funds as follows:

CURRENT EXPENSE FUND

Table listing current expense fund items, including Year, Number, and Amount, with a total of \$114.85.

Original Town of Kendrick, assessed to E. R. PORTER.
Lot 3 (less Ry.), Block 100, Oak's Addition to Kendrick, assessed to CHAS. BODENHOUSE.
Lot 4 (less Railway), Block 101, Oak's Addition to Kendrick, assessed to LATAH COUNTY.

WHEREAS, the whole or any part of said lands is not necessary for the use of the aid Latah County, and

WHEREAS, it will be to the best interest of the said Latah County that the above described lands be sold at public auction:

BE IT RESOLVED that the above described lands and premises be sold to the highest and best bidder for cash at the front door of the county courthouse in Moscow, Latah County, Idaho, on Monday, June 10th, 1929, at 2:30 o'clock P. M., of said day, or at such time or on the day to which the sale may be postponed or adjourned, and that the public notice of such sale be given by publication in the KENDRICK GAZETTE, for thirty days prior to said sale, and

BE IT FURTHER RESOLVED, That Charlie Summerfield, Sheriff of Latah County, be and he is hereby designated to conduct said sale.

BE IT FURTHER RESOLVED that the Chairman of the Board be, and he is hereby authorized and directed to execute and deliver to the purchaser or purchasers of said property, deeds of conveyance under the seal of said Board, conveying all and any interest Latah County may have in and to the said above described property, or any part thereof, by virtue of said tax deeds, as fully and absolutely as this Board might, could or should do under the statutes of the State of Idaho, in such cases made and provided.

The Board reserves the right to reject any and all bids at the sale above mentioned.

The Board now recessed to meet tomorrow, Wednesday, April 11, 1929, at two o'clock P. M.

ATTEST: HARRY A. THATCHER, Clerk.

APPROVED: JOHN L. WOODY, Chairman.

Moscow, Idaho, Thursday, April 11, 1929.

The Board met this day pursuant to adjournment, present as before.

At this time the clerk presented a list of claims and accounts examined and allowed, and in settlement of which warrants have been ordered drawn at this session of the Board, which list was compared with the proceedings of this Board, and found to be correct, and the same were thereupon duly certified to and delivered to the County Treasurer.

A recess was now taken until Monday, April 22, 1929, at nine o'clock A. M.

ATTEST: HARRY A. THATCHER, Clerk.

APPROVED: JOHN L. WOODY, Chairman.

Moscow, Idaho, Monday April 22, 1929.

The Board met this day pursuant to recess adjournment, present as before.

It is hereby ordered that the County Auditor be, and he is hereby instructed to transfer the sum of \$12.20, from the Road Fund to Road District No. 26 Fund.

The Bond of Ray Nolan, as Justice of the Peace of Potlatch Precinct was examined and approved.

The bids for painting the buildings at the Latah county farm, were examined and the bid of J. T. Buck, in the sum of \$439.00, for two coats of paint on all buildings, being the lowest and best bid, contract was awarded to the said J. T. Buck, as per agreement entered into, and the said J. T. Buck is requested to furnish a bond in the sum of \$500.00 for the faithful performance of said contract.

A recess was now taken until Monday, May 13, 1929, at nine o'clock A. M.

ATTEST: HARRY A. THATCHER, Clerk.

APPROVED: JOHN L. WOODY, Chairman.

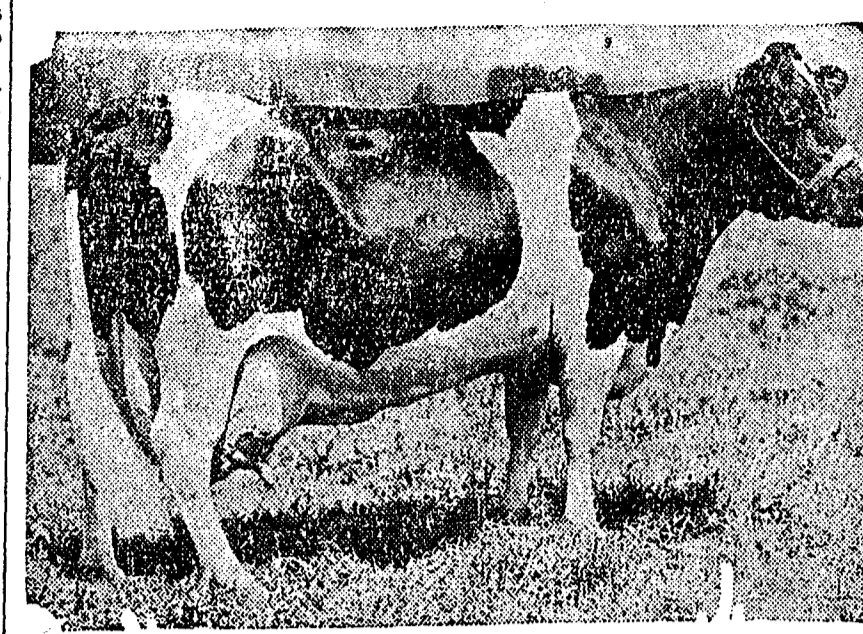

Moscow, Idaho, Wednesday, April 10, 1929.

The Board met this day pursuant to adjournment, present as before.

The report of L. P. Hunt, as Superintendent of the County Poor Farm, for the quarter ending April 1, 1929, was examined and approved.

The bid of Defenbach & sons for auditing books of Latah County, for

Holstein Nears 1,500-Pound Mark

Carnation Walker Hazelwood.

Three-fourths of a ton of butter in 365 days is the approximate amount that could be made from nearly 15 tons of milk produced during the past year by Carnation Walker Hazelwood, a 2,000-pound Holstein-Friesian cow, and the new national senior four-year-old champion. According to the Holstein-Friesian Association of America, she is the one hundred and thirty-second Holstein cow to produce more than 1,000 pounds of butterfat in one year, has just won sixth place among all breeds for all-time records, and is one of the three cows now living that have equalled that production.

On four milkings a day, Hazelwood, owned by Carnation Milk Farms of Seattle, Wash., produced 29,082.5 pounds of milk containing 1,198.85 pounds of butterfat, equivalent to 1,498.56 pounds of butter. This tops the record of Redfield Segis Johanna, former class champion, owned by the South Dakota State School and Home for the Feeble-Minded, whose production in 365 days was 31,000.3 pounds of milk containing 1,182.03 pounds of butterfat (1,476.06 pounds butter).

Cleaning of Seed Wheat Is Favored

Quite Useful in Control of Smut.

(Prepared by the United States Department of Agriculture.)

Cleaning of seed wheat for the removal of weed seeds is generally recognized and recommended as good farming policy, and in recent years, says the United States Department of Agriculture, the desirability of the copper carbonate dust treatment of smut wheat for control of stinking smut or bunt has also had general acceptance.

Early applications of the copper carbonate treatment were largely in hand machines, but more recently power dusters have been perfected. Leaflet 33-L, "The Combination Cleaning and Treating of Seed Wheat," just published by the Department of Agriculture for free distribution points out that the cleaning and treating of seed wheat may well be applied in a single operation.

Useful Machines.

The authors point out that several successful machines for either the cleaning or treating operations are on the market and that they may be combined and mounted on trucks so as to be easily moved from farm to farm, or set up as stationary equipment.

Also several makes of machines designed to combine cleaning and treating in one operation are now on the market. Last year an eastern railroad mounted equipment in an old baggage car to serve wheat growers along its lines and to demonstrate the value of the two treatments.

Mounted Machine.

The leaflet also contains a section describing a combined machine mounted on a truck and driven by a small gasoline engine which was operated as a community enterprise in San Luis Obispo county, California, last year. The county farm bureau financed the equipment which in 1927 operated for nearly three months and served 134 grain growers, hulling more than 35,000 bushels of seed wheat. In 1928 more than 200 farmers were served and even more seed grain was cleaned and treated. This outfit can handle grain at an average rate of more than 50 bushels an hour. The cost of the farmers is low. It averaged \$1.94 a ton in 1927. The leaflet, which includes photographs and a drawing of the equipment in use, may be obtained free on application to the United States Department of Agriculture, Washington, D. C.

Barley Production Shows Big Increase

Becoming of More Importance as Feed for Stock.

(Prepared by the United States Department of Agriculture.)

In 1928 the production of barley in the United States was more than 100 per cent greater than in 1921, and was by far the greatest production on record. This production, says the United States Department of Agriculture, resulted from an increase of about 30 per cent of the acreage seeded to barley, coupled with a relatively high average yield of more than 28 bushels an acre.

In many parts of the United States barley is becoming of more importance in the feeding of live stock. Exports of barley from the United States to Europe were heavy last year, owing to a shortage of feed grains in Europe. Indeed, the European situation has had much to do with the increase in barley production in the United States in recent years. Large exports to Europe in 1927 and 1928 maintained a price in this country which was probably higher than normally would have prevailed. In 1928, however, the price of barley decreased appreciably under the weight of the largely increased supply.

In the United States the acreage and the production of barley have increased steadily since 1868. Barley acreage has been expanded steadily in Minnesota, North and South Dakota, Wisconsin, and the irrigated western areas. World production of barley has been increasing since 1920.

Usually a rather definite relation exists between the total supply of corn and barley in the United States and the price of barley. In 1927, however, this relationship was modified by the influence of a shortage of feed grains in Europe, with the result that acreage in the United States was expanded unduly.

Agricultural Notes

Young chicks should be raised on clean ground. If possible, to keep them from getting worms.

Cows in milk and sheep need the largest amount of salt. Fattening cattle, horses, dry cows, and stock cattle require less.

With some varieties, summer pruning has hastened the bearing of young apple trees and increased crop production.

White rape is usually quite palatable, complaint is sometimes made that it is difficult to get hogs to eat it. However, if they are given access to no other green feed, they will usually learn to like it before receiving any serious setback.

Tree fruit plants and hardy grapes may be pruned any time during the winter. The particular date is not important except that the work may be more accurately and comfortably done during periods of moderate temperatures.

Baby Chick Feed

Experts in poultry feeds urge the importance of proper feeding of baby chicks to give them a good, healthy start and to put them in a healthy, vigorous, growing condition. Chick diseases are prevented if care is taken in the method of feeding. The best of grains should be used for chicks. Regularity in feeding is immensely important. Pure, clean water should be available. Brooder facilities, in fact, orderliness and cleanliness should prevail.

ATTEST: HARRY A. THATCHER, Clerk.

APPROVED: JOHN L. WOODY, Chairman.

Chairman.

Animals and Parasites

Man is less bothered by parasites than he has ever been, but domestic animals, concentrated in small areas, are probably more pestered than in the past.

Soy beans, from which the oil has been extracted, is spoken of as soy bean oil meal. It is higher in digestible protein than the seed before the oil has been extracted.

A very good home-mixed calf meal is made up of equal parts by weight of old process linseed meal, hominy feed, red dog flour or wheat middlings, and high grade dried blood.

Plant a bed of lettuce in a cold-frame or some protected spot to make plants to set in March.

Early hardy varieties of English peas such as John L. and Alaska may be planted any time.

How about getting those gates up so you can handle them without losing a part of your religion?

NOTICE OF ADMINISTRATOR'S SALE OF REAL ESTATE

In the Probate Court of Latah County, State of Idaho. In the matter of the Estate of Columbus N. Clark, Deceased. NOTICE IS HEREBY GIVEN that the undersigned Administrator of the estate of Columbus N. Clark, deceased, will on Monday, the 27th day of May, 1929, at 11 o'clock A. M. of said day in the office of A. H. Oversmith, at Moscow, Latah County, State of Idaho, sell at public auction all of the right, title and interest that the said Columbus N. Clark had in and to the hereinafter described premises at the time of his death, and also all of the right, title and interest which the estate of the said decedent has acquired by operation of law or otherwise in and to the following described premises situated in Latah County, State of Idaho—to-wit: The East Half (E 1/2) of the Northeast Quarter (NE 1/4) and the East Half (E 1/2) of the West Half (W 1/2) of the Northeast Quarter (NE 1/4) of Section Eight (8), in Township Thirty-seven (37) North, Range Three (3), West of Boise Meridian; also a strip of land one rod wide beginning at the Northwest corner of the above described tract and running west 40 rods to the Quarter Stake of said section. Also the Northeast Quarter (NE 1/4) of Section Twenty-six (26) in Township Thirty-eight (38), North, Range Four (4), West of Boise Meridian. NOTICE IS FURTHER GIVEN that such sale will be made subject to the lease on the above described real estate expiring on October 1, 1929, and that ten per cent (10%) of the sale price shall be paid by the purchaser on the date of sale and the balance shall be paid upon the confirmation of the sale by the above entitled Court. Dated and signed at Juliaetta, Idaho, on this 1st day of May, 1929. A. W. BEHRENS, Administrator of the estate of Columbus N. Clark, deceased. 18-4

Notice of Sale of Real Estate by Latah County for Monday, June 10th, 1929.

Notice is, Hereby Given That in and by virtue of an order of sale and resolution made by the Board of County Commissioners of Latah County, Idaho, on Wednesday, April 10th, 1929, the hereinafter described lots, pieces and parcels of land, situated in the County of Latah and State of Idaho, will be sold, or offered for sale, by the sheriff of said County, at public auction, at the front door of the county courthouse, in Moscow, Latah County, Idaho, on Monday, June 10th, 1929, at 2:30 o'clock P. M. of said day, or at such time or on the day to which the sale may be postponed or adjourned, to the highest and best bidders for cash, or such terms as the Board of County Commissioners may determine, which property is held by Latah County, under and by virtue of tax deeds, and is known and described as follows, to-wit: Lot Two (2), Block (4), Old Town of Genesee in Section Thirteen (13), Township Thirty-seven (37) North, Range Five (5) West of the Boise Meridian, in Northeast Quarter of the Southwest Quarter, assessed to H. NICHOLS. Northwest Quarter of the Southwest Quarter (NW 1/4 SW 1/4) less East 90 feet, of Section Three (3); Northeast Quarter of the Southeast Quarter (NE 1/4 SE 1/4). Northwest Quarter of the Southeast Quarter (NW 1/4 SE 1/4) and the Southwest Quarter of the Southeast Quarter (SW 1/4 SE 1/4) of Section Four (4), Township Thirty-nine (39) North, Range 1 East of the Boise Meridian, assessed to O'NEAL-IRWIN CO. Southwest Quarter of the Southeast Quarter (SW 1/4 SE 1/4) of Section Seven (7), in Township thirty-nine (39) North, Range One (1), West Boise Meridian, assessed to KATIE MAYBEE. Southeast Quarter of the Southwest Quarter (SE 1/4 SW 1/4). Northwest Quarter of the Southeast Quarter (NW 1/4 SE 1/4) Southwest Quarter of the Southeast Quarter (SW 1/4 SE 1/4) and Southeast Quarter of the Southeast Quarter (SE 1/4 SE 1/4) of Section Seven (7), Township Forty (40) North, Range Four (4) West of the Boise Meridian, assessed to A. A. WILSON. Northwest Quarter of the Northeast Quarter (Lot 2), Northwest Quarter of the Northwest Quarter (Lot 3), Section Two (2), Township Thirty-nine (39) North, of Range 1 West of the Boise Meridian. Southeast Quarter of the Southwest Quarter (SE 1/4 SW 1/4) Southwest Quarter of the Southeast Quarter (SW 1/4 SE 1/4). Southeast Quarter of the Southeast Quarter (SE 1/4 SE 1/4) of Section Thirty-five (35), Township Forty (40) North, Range 1 West of the Boise Meridian, assessed to OSCAR LARSON. West Half of the Northeast Quarter of the Southeast Quarter (W 1/2 NE 1/4 SE 1/4) in Section Thirty (30), in Township Forty-one (41) North, Range One (1), East of the Boise Meridian, assessed to MINNIE K. HOFFMAN. Northeast Quarter of the Northwest Quarter (NE 1/4 NW 1/4) of Section Twenty-seven (27), Township Forty-one (41) North, Range Two (2) West Boise Meridian, assessed to HENRY FLICK. Northwest Quarter of the Southwest Quarter (NW 1/4 SW 1/4), less five acres, right-of-way, Section Sixteen (16), Township Forty (40) North, Range One (1) West of the Boise Meridian, assessed to W. F. HEAD-RICK. Northwest Quarter of the Northwest Quarter (NW 1/4 NW 1/4). Southwest Quarter of the Northwest Quarter (SW 1/4 NW 1/4) Northwest Quarter of the Southwest Quarter (NW 1/4 SW 1/4) of Section Thirty-two (32); Northeast Quarter of the Southeast Quarter (NE 1/4 SE 1/4), of Section Thirty-one (31), Township Forty (40) North, Range One (1) East of the Boise Meridian, assessed to E. H. ATHERTON. Northeast Quarter of the Northwest Quarter (Lot 3), Section Four (4), Township Forty-one (41) North, Range Four (4) West of the Boise Meridian, assessed to MARTIN SOLBERG. West Half of the Southwest Quarter of the Northwest Quarter (W 1/2 SW 1/4 NW 1/4) of Section Seventeen (17); Southeast Quarter of the Northeast Quarter (SE 1/4 NE 1/4) of Section Eighteen (18), Township Forty-one (41) North, Range One (1) West Boise Meridian, assessed to GEO. A. NELSON. Southwest Quarter of the Northwest Quarter (SW 1/4 NW 1/4), Section Five (5); Southwest Quarter of the Northeast Quarter (SW 1/4 NE 1/4); Southeast Quarter of the Northwest Quarter (SE 1/4 NW 1/4) and Southeast Quarter of the Northwest Quarter (SE 1/4 NW 1/4) of Section Six (6), Township Forty-two (42) North, Range One (1) West of the Boise Meridian, assessed to FRANK E. FEATHERSTONE. Northwest Quarter of the Northwest Quarter (Lot 1), Section Nineteen (19), Township Forty-two (42) North, Range One (1) East of the Boise Meridian, assessed to GERTRUDE M. PITTARD. Lot 1 and 4, Block 21; Lot 8, Block 30, Original Town of Kendrick, assessed to GEORGE F. WALKER. Lot 8, Block 16, Original Town of Kendrick, Assessed to LATAH COUNTY. Call For Bids For Crushing And Hauling Rock

Sealed bids and proposals will be received by the undersigned good road district at the office of the clerk of the Board of Commissioners, at the Bank of Juliaetta, Juliaetta, Idaho, at any time prior to the hour of nine o'clock, A. M. on the eighteenth day of May, 1929, for crushing, hauling and delivering approximately four thousand yards of rock. Approximately three thousand yards thereof not to exceed one and one-half inches in diameter and approximately one thousand yards thereof not to exceed three-fourths inch in diameter. All of said rock to be hauled and delivered at such points on the highways hereinafter mentioned as shall be designated by any duly and regularly authorized officer, agent, or employee of the undersigned good road district. Said highways being more particularly described as follows, to-wit: Commencing at the western boundary line of Juliaetta, Latah County, State of Idaho, extending thence in a westerly direction along the main highway for a distance of approximately four miles. Also, commencing at the southern boundary line of said town of Juliaetta, extending thence in a southerly direction on the main highway to Lewiston for a distance of approximately one mile. Also, commencing at the north end of main street in the town of Juliaetta as now existing, thence northeasterly on the Kendrick highway for a distance of one mile. The undersigned good road district undertakes and agrees to furnish a crusher site as heretofore designated. All bids shall be in writing, and must be accompanied by a certified check or cashiers check in a sum equal to five per cent of said bid, payable to the order of the undersigned highway district to be held by it as a guaranty of good faith pending the completion of any contract based upon the acceptance of said bid. Any contract made pursuant to this notice shall be accompanied by a bond as required by law, and the successful bidder shall be required to carry Industrial Accident Insurance as provided by statute. The Board of Commissioners hereby reserve the right to reject any and all bids received pursuant to this notice, or to accept any bid or proposal which it may deem for the best interest of the district. Inquiry concerning further particulars may be made at the office of the Clerk of the Board of Commissioners above mentioned. Dated this twenty-third day of April, 1929. GOOD ROAD DISTRICT NO. 2, OF LATAH COUNTY, IDAHO. By R. H. Hall, S. S. Taber, J. Whalen. Correct-Attest: A. W. Behrens, Clerk. (Seal) 17-3

CAMEL

CIGARETTES

WHY CAMELS ARE THE BETTER CIGARETTE

Camels are made of the choicest tobaccos grown.
The Camel blend of Domestic and Turkish tobaccos has never been equaled.
Camels are mild and mellow.
They do not tire the taste.
They leave no cigaretty after-taste.
Camels have a delightful fragrance that is pleasing to everyone.

Variety Is Important Factor With Lettuce

Variety is an important factor in growing head lettuce. For real early planting of transplanted plants the Improved Hanson is best, for it not only grows a large percentage of good heads but it is also the best in quality. The New York or Wonderful is also very good for early planting, but Stonehead Riviera and All Seasons are more dependable for later planting and will do for field seeding. Crisp Ice is one of the surest heading sorts for field seeding but it is not desirable for market. It is of very good quality, however.

When Silage Spoils

Silage may spoil sometimes in concrete silos because the wall is porous, and therefore neither airtight nor waterproof. The best way to render it nonporous is to puddle the concrete during construction next to the inside wall with a flat spade. The silage at the juncture of the stave silo with its concrete foundation is due neither to the concrete nor to the wood, but either to a poor ledge, or the fact that the joint is not airtight.

Ship of Famous Pirate

"Adventure" was the name of the ship commanded by Captain Kidd. This famous pirate sailed from Plymouth, England, in April, 1696, in the galley Adventure, carrying 30 guns and a crew of 90. He put in first at New York and later went to Madagascan. He was eventually put to death for his piratical exploits.

International Bureau

By treaty the United States, with twenty-seven other nations, maintains the International Bureau of Weights and Measures at Paris on neutral territory in the historic Parc du St. Cloud, at Sevres. The bureau is official custodian of the international standards of length and mass, the meter and kilogram.

SCHOOL NOTES

Today brings the close of school in this district. As a feature of this day the pupils will present their Closing Day program and Graduation Exercises this evening at eight o'clock sharp. The program has been arranged in three parts as follows: Songs, recitations and graduation exercises and drills. The three comprising the eighth grade who will graduate this year are: Wilma Schultz, Selma Hartung and LeVern Spekker. Patrons of the school and friends are cordially invited to attend and are requested to come early if you desire a seat as only a small space will be allotted to seating.

Report cards will be given out Saturday morning at 9:00 o'clock and all pupils are requested to be on hand promptly at that time.

Monday, a number of the patrons of the school attended the school exhibit conducted from 2:30 until 4:00. To the great surprise of Mr. Criddlebaugh and pupils, the ladies very kindly brought cake and cookies with which coffee was served. After the exhibit. The visitors seemed greatly pleased with the large amount of work on exhibit.

Mrs. O. W. Henry was a visitor in school, Wednesday.

Owing to the amount of preparation to be made for tonight's program, the lower grades were dismissed from school this morning while the upper grades assisted with the work.

Card of Thanks

We wish to extend our sincere thanks to our friends for the kindness and sympathy shown us during our recent bereavement.

Mrs. Cora Burnetta Davis and children.

Medical Discoveries

Children who lived before 1788 didn't have to take castor oil. It was in that year that the medicinal value of the oil was first officially recognized by medical men. Other important factors in medicine came even later. Morphine was discovered in 1804, quinine in 1819, bromine in 1824 and hydrogen peroxide in 1818.—American Druggist
