OFFICIAL PAPER OF LATAH COUNTY

VOLUME XXXIX

KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, MAY 24, 1929

No. 21

KENDRICK DEFEATED BY TROY LAST SUNDAY

Locals Lose By a Close Score of 4 to 5.

Las Sunday was a Jonah day for the local baseball club when they lost the game to Troy by a one score margin. To start the period of gloom, Bill McCall, Kendrick's crack firstbaseman, was unable to play, having been called away on business. This required a shifting of the infield that didn't work with the machine-like precision that the team exhibited the previous Sunday at Potlatch. This, taken in connection with a flock of errors and combinations of hard luck, lost the game.

Troy had a good team picked from Lewiston, Clarkston, Pullman and Moscow, with an extra good southpaw pitcher, whose offerings were hard to locate.

Ed Dammarell, near the end of the game made a hard drive to right field and by the time the ball had come to rest, after bouncing off the tops of several parked cars, Ed reached home. He had time enough to stop and sing a melody during his progress of circling the bases, but in his haste to bring in the one run needed to tie the score, he failed to touch second base and was called out after reaching home plate.

Following are the high spots of the game in detail:

	Ab	R	H	SO	E
Troy	5	1	0	1	0
Munden	5	1	2	0	1
Carson	5	0	0	3	0
Schetzle	4	1	0	0	1

Mary's Lamb Again

Teacher: "Mary, why doesn't the lamb follow you to school nowadays?"
Mary: "What, at fifty miles an hour?"

Railroad to Park

The Potlatch Lumber company is building a railroad from Boulder Creek Ridge to connect with the main line of the W. I. & M. at Camp 6, near Helmer. The road is said to be some fifteen miles long and will be used as a logging road over which to transport logs from what is probably the largest body of standing timber left in that section. It is said the road is being built of standard weight steel the same as a regular railroad. It will start at the P. A. Enger farm and descend to Potlatch on grade, and we were told that upward of a thousand men are now employed on the job.—Troy News.

Julietta News

Mrs. Celia Garrison returned home after a year's absence. She was accompanied by her daughter and husband, Mr. and Mrs. Jimmie Reed.

The Seniors, their parents, the faculty and the school board, with their husbands and wives, gathered at the Oddfellow hall, Wednesday evening where a splendid banquet was served to them.

Bun Penland and son, Vance, of Lewiston, was doing some plastering for Mrs. Garrison last Saturday.

Mrs. E. L. Lowry and three children of American Falls is visiting her mother, Mrs. Manford Nutt.

Charley and Frank Snyder are enjoying a visit from their sister and brother from Santa Barbara, California.

Miss Kathryn Weitz left for Spokane, Saturday.

Mrs. Rider entertained the Needle Club Saturday afternoon, complimentary to the teachers, before leaving for their various homes. A splendid dinner was served in the evening.

School closed Friday, 14 eighth grade diplomas were received and 8 high school graduates. Commencement exercises were held in the M. E. church, Friday.

Mrs. Anna Hartley and two daughters surprised her sister, Mrs. Manford Nutt, by arriving Saturday from Marysville, California. They made the trip by auto.

Rev. J. L. McCann and family are spending the week in town.

Miss Crystal Otosen returned home from Rockland, Idaho, where she has been employed in the Rockland schools for the past three years. As a pre-nuptial compliment to Miss Otosen, whose marriage to Cecil Gruell will take place in June. A shower of beautiful linen was given her. It was followed by a mock wedding and a delicious luncheon.

Miss Arta Groselose finished a three month's term of school near Joel.

William Spray and wife are visiting his mother, Mrs. Lou Spray.

Mrs. Will Irwin and George Irwin of Albion, Wash., attended commencement here Friday.

Linden News

Miss Viola Sadler returned Sunday evening from a weeks visit with relatives at Coeur d'Alene and Troy.

Mr. and Mrs. Addison Alexander, Walter Carmin and James Keeler went to Lewiston, Sunday to spend the day. They were accompanied home by Lola Stone.

Mr. and Mrs. Edgar Bohn of Park spent Sunday on the ridge.

Eddie Hunt and Alvia Hudson went to work at Gus Farrington's mill the first of the week.

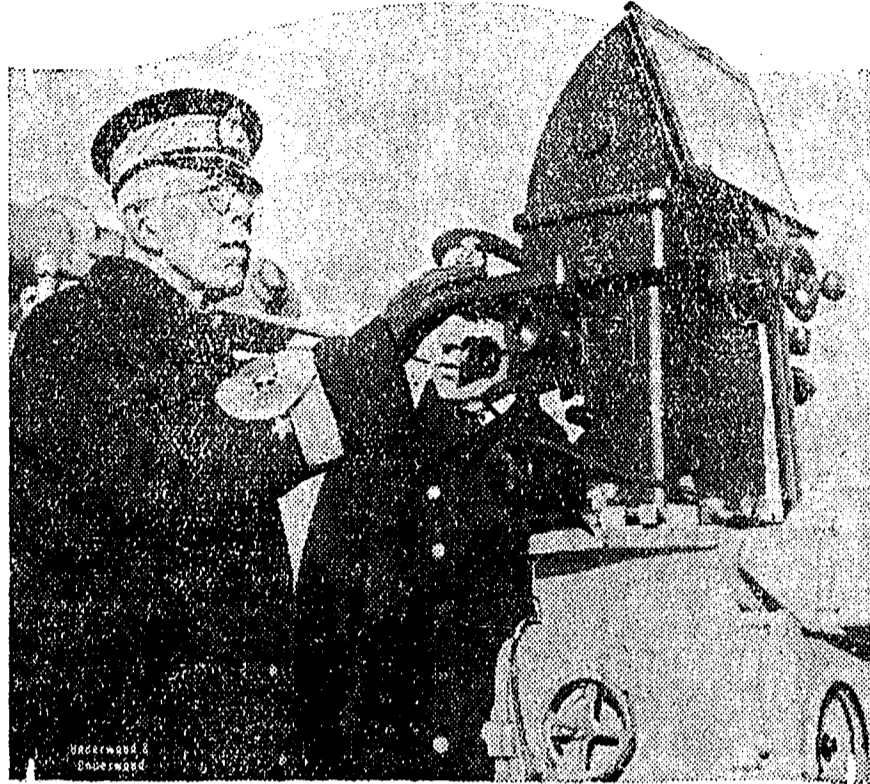

Mrs. C. H. Fry spent Tuesday with Mrs. Georg Garner.

Grandma Keeler is visiting at the Smith home.

Ed Swinson of Troy is hauling poles to Kendrick for John Kerr.

Mr. and Mrs. Harry Langdon and family from American ridge and Mrs. Emma Longfellow spent Sunday at the Allen home. Aunt Carrie Allen spent Monday with Mrs. Ed. Darby.

King Gustaf Inspects New Destroyer

King Gustaf of Sweden on the bridge of the new destroyer, Ehrenskold, as he inspected the latest addition to the Swedish navy. The monarch is an expert navy tactician.

Celebrate Third and Fourth

At a meeting of the commercial club, held last Tuesday evening, it was decided to put on a two-day celebration here July 3 and 4. Committees have been appointed to take charge of the various features of the celebration. The executive committee is composed of W. J. Carroll, Geo. Barnum, Jack Barnes, Mrs. L. J. Herres, H. B. Thompson, E. A. Deobald and E. T. Long. The committee met last evening to elect a chairman and perfect the organization.

Every effort will be made to put on two days of good entertainment. Plans include a three-team baseball tournament, which should prove to be an interesting feature.

Further details and plans will be given in the Gazette from time to time.

The Magpie Contest

The number of points secured by the various participants in the magpie contest, remains unchanged from the report given in last week's Gazette. Evidently the boys are now holding back their remaining supplies of magpie eggs for the final windup.

Sixteen boys have entered the contest and their combined offerings to date show a harvest of over 3,000 magpie eggs. These figures show beyond question that the contest is a huge success and was well worth the effort.

At the meeting of the commercial club last Tuesday evening it was agreed to invite all the boys in the contest to be guests of the club during the dinner hour at the June meeting, which falls on the eleventh, the day after the contest closes. Prizes will be awarded at this time to the winners.

To Surface Juliaetta Roads

At a meeting held in the rooms of the Bank of Juliaetta, Saturday, by commissioners of good roads district No. 2, a contract was let to J. F. Konen, Lewiston, for crushing 400 yards of rock for surfacing approximately six miles of highway in and leading to the village of Juliaetta, at a price of \$1.75 per yard, about \$7000 for the rock and \$1000 for laying.

The work will be done without the issuance of bonds or the incurring of any other expense that will not be taken out of the 1929 tax levy.

Later commissioners of the Clearwater highway district held a meeting to devise ways for resurfacing the highway between Arrow Junction and the Latah county line.

Careless Auntie

Suspicious Husband: "Who called this afternoon?"
His Better Half: "Only Aunt Sophie."
Suspicious Husband: "Well, she left her pipe."

Moreheads Are Leaving

Dr. Morehead announced this week that he had sold his practice and office fixtures to Dr. E. II. Field of Rose Lake, who will take charge here June 1. Dr. and Mrs. Morehead will leave the first of the month for Rochester, Minn., where the Doctor will take graduate work in diseases of children for six months or a year. He then plans to locate in the midwest with his brother who is now taking advanced work in surgery with the Mayo clinic.

Dr. Morehead stated yesterday that he felt regret in leaving this community but he believed his plans would provide a wider field in the future. The Moreheads are very popular here and a host of friends will regret to learn of their leaving, but will wish them every success in their new location.

Test Latah County Cattle

As the result of action taken by Latah county commissioners all cattle in Latah county will be tested for tuberculosis. This work will be sponsored by the county commissioners and department of agriculture. The expense to the county will be about \$800.

Latah county is the last one of the northern counties of the state to authorize this test. It will start in the latter part of the summer under the direction of Dr. A. J. Dickman, director of animal husbandry, and W. A. Sullivan.

It is estimated there are 8,000 head of cattle in the county. All of them will be subject to the test.

Any cattle found to react will be slaughtered at a slaughter house where the meat will be government inspected and salvage of the animal will go to the owner. The value of the animal will be considered at double its assessed valuation.

The test will be made once this fall, and if less than one-half of one percent of the animals prove to be tubercular, the county will become a modified accredited area, and quarantined against all cattle that have not been tested. A partial retest is taken every three years after the county is accredited in order to keep that standing.

Such is Fame

Several years ago, Firestone, Ford, Edison and Burroughs were touring through West Virginia. A light on their car went bad and they stopped at a little cross-roads store in the Buckingham section. Henry Ford went into the store to make the purchase.

"What kind of automobile lamps do you have?"
"Edison", replied the merchant.

"I'll take one," said Ford, "and you may be interested to know that Mr. Edison is out in my car."

When the light was put in it was found that a new tire was needed, so Ford went back to the store and asked what kind of tires the merchant had.

"Firestone," was the reply.
"By the way, you may be interested to know that Mr. Firestone is out in my car, and that I am Mr. Ford—Henry Ford."

"So?" said the merchant, and aimed a long squirt of tobacco against the wall.

While the merchant was putting on the tire, Burroughs, who had white whiskers, leaned out of the car and said "Good morning, sir."

The merchant looked up at him with a grin of sarcasm, and said, "If you try to tell me that you are Santa Claus, I'll be d—d if I don't crown you with this wrench." —Ex.

Mr. and Mrs. John Brown returned last Friday from a trip to Seattle and points in California where they visited their children. They made the greater part of the trip in their car. They expect to remain here for a while this summer to look after their property interests.

TRAFFIC OFFICERS PATROL HIGHWAYS

Will Rigidly Enforce the Motor Vehicle Laws.

Boise—Ten traffic officers are patrolling state highways in 25 counties of Idaho, it is announced by Fred E. Lukens, secretary of state. These officers are working under a co-operative arrangement whereby counties or highway districts pay their salaries and the state motor vehicle fund provides equipment and pays their expenses. Headquarters of the 10 officers are located respectively at Wallace, Coeur d'Alene, Lewiston, Payette, Boise, Twin Falls, Pocatello, Preston, Idaho Falls and Rexburg.

Mr. Lukens hopes that a fairly thorough enforcement of the motor vehicle laws may be accomplished this year and the foundation laid for a well-organized, state-controlled traffic organization. In discussing policies to be adhered to in enforcing motor vehicle laws Mr. Lukens said:

"These men will give their whole attention to enforcement of the various motor vehicle laws. We feel that one of the most important duties of these officers is the enforcement of the license laws. It is a regrettable fact that many people are still operating their cars under 1928 license plates. It is not fair to those who have bought license plates that others should be permitted to operate cars under old plates. Our men, we hope, will be able to get co-operation of local officials in bringing about an early compliance with the license laws on the part of all citizens of the state.

"In the matter of speed and safety of traffic, we expect to place primary emphasis on the importance of care and prudence in driving. We shall not place as much emphasis on limiting speed on highways as we will on bringing about a careful regard for the rights of others. Our men will have no sympathy for the driver who drives while intoxicated but will work to protect those whose lives are endangered by such drivers and we shall hope that whenever this offense is committed punishment may be inflicted in the form of jail sentences.

"Another abuse which will receive particular attention is the regulation of lights. A great many people are operating cars with defective lights and very frequently cars appear on the highways at night with only one light.

"We cannot this year promise perfect traffic conditions in the state but we feel that if there are a few uniformed traffic men traveling the highways daily in the state, the influence on traffic will more than pay any cost which might accrue."

Caught Big Trout

Howard Dammarell caught a beautiful rainbow trout in Bear creek Saturday morning. It measured 25 inches and weighed over four pounds. Howard has tied for first place for the largest trout caught in nearby streams, with Ernest Roberts who landed on the same size the first day of the open season.

Willie Wegner of Kellogg was visiting friends here the first of the week.

Afternoon Bridge Party

The afternoon bridge club was entertained Wednesday afternoon by Mrs. Ramey and Mrs. Thompson at the Ramey home. A very pleasant afternoon was spent at the card tables after which the scores were added, high going to Mrs. Leith and Mrs. Harold Thomas. Dainty refreshments were served by the hostesses.

The band concert last Saturday evening was pronounced the best one of the season. A big crowd attended and greatly enjoyed the splendid music. The concert is proving popular features of the community life.

THE JUGGLER

Students Win Medals

This month the Underwood Typewriting Company, for the first time, offers the accuracy medals. Lillian Long is the only one in this school who has earned the award. She was supposed to write without any mistakes for fifteen minutes, which she did and earned the fifty-word accuracy medal.

Two other students, Bessie Blevins and Eleanor Herres, have won speed medals. Each of the girls wrote forty words a minute for fifteen minutes with less than five mistakes.

Exemption List

Those exempt must have maintained an average of 90% for the past eighteen weeks. Those who have done this are as follows; English II: Edna Stanton, Eleanor Herres, Eldwa Jones, Daniel Lyons, Raymond Lyons; American History: Carl Davis, Elbert Long, Bernard Jones, William Ingle; Domestic Science, Edna Bolon, Ethel and Burneda Cummings, Marjory Davidson, Doris Emery, Nona McAllister; General Science: Edna Bolon, Burneda and Ethel Cummings, Irene Davis, Eleanor Herres, Nona McAllister, Marie Schwarz, Edna Stanton; English III; Doris Emery; English I: Edna Bolon, Nona McAllister, Burneda Cummings, Jack Plummer; Book-keeping: Emma Lou Wegner; Economics: Minnie Craig, Carl Davis, Elbert Long, Arthur Foster, Doris Emery; Chemistry: Marjory Davidson, Doris Emery, Carl Davis, Elbert Long, Bernard Jones, William Ingle, Arthur Foster; Algebra: Edna Bolon, Nona McAllister, Edwin Mielke; Geometry: Daniel Lyons; World History: Eldwa Jones and Daniel Lyons.

Sophomore Class Picnic

Friday evening after school the Sophomore class with their advisor, Miss Ledbetter, held a picnic at Cold Springs. After a bonfire was built the weiners and marshmallows were roasted and eaten, later games being played.

Honor Roll For Entire Year

Even if the Frosh are supposed to be "green" two of them are able to maintain an average of 90% for the past year, which is more than any other class in high school has been able to do. The Junior class is represented by one, but the Sophomore and Senior classes have none on the honor roll for the year. Nona McAllister and Edna Bolon are the bright Freshmen and Doris Emery, the Junior. These girls' names have appeared on the roll every six weeks for the past nine months.

School Picnic at Lake Waha

Last Thursday the whole high school held their annual school picnic at Lake Waha. They left early in the morning taking their dinner with them. They returned a tired, but happy, group of people.

Senior Class Will

We, the Senior Class of the Kendrick High School of 1929, being of a sound mind and of a disposing disposition do make this our last will and testament superseding all previous wills and testaments.

To the Board of Directors, we bequeath as many looks as they wish to take at the clean lot back of the school house, all of the scenery they can see from the school house hill, and all of the air that they can breath fresh or otherwise.

To the Teachers:
To Mr. Beardsley, the good will of the Kendrick High School.
To Mr. Jarvis, all of the football and basket ball letters.

To Mrs. Jarvis, the appreciation for the honors which have been won by typing students thru her efforts, and all the profits made in bookkeeping.

To Miss Ledbetter we will our best wishes for a successful fu-

ture.
To Mrs. Knepper and her primary students we bequeath all of the space occupied by the Seniors on the playgrounds.

To Miss Dille and her students we will all of what was left over from the Senior sneak.

To Miss Nannie Weaver and the fifth and sixth grades we will all of the plaster and materials that have been taken from the gymnasium.

To Miss Mary Weaver and her room we bequeath our kind regards and a hopeful future for her and her students.

To the Freshmen we bequeath all of the wads of gum left on the seats and desks.

To the Sophomore Class we will the right to become Seniors.

To the Juniors we bequeath the row of seats that have been occupied by the Seniors for the last year.

To the Individuals:
Miss Emma Glenn's impressive record of A's to Bill Fry.

Miss Minnie Craig's ability to remove warts to Neva Ware.

Mr. Bernard Jones' cautiousness to Carl Davis.

The remains of the Long and Glenn mush factory to Howard Dammarell and Thelma Mills.

Herman Hartung's ability as a professional heart smasher to Charles Elliott.

All of Harley Eichner's small-pox scars to George Bailey.

To Mr. McAllister we will all of the used up and worthless material which has been given off and discarded from the chemistry lab.

In witness whereof we have set our sign and seal this 22nd day of May.

Class of 1929.

The Misses Weaver and Miss Dille will leave Kendrick today to go to the home of the former. A week after school closes, they intend to drive to Seattle to spend a week or ten days after which time they will probably be at their homes, Lenore and Rupert, respectively, until the opening of their various schools.

Miss Ledbetter will leave for her home at Alicel, Oregon, today. This summer she will attend summer school at Oregon State College, Corvallis, Oregon, for six weeks, after which time she will remain at home until school opens in September.

Seventh and Eighth News

Fifteen eighth graders received their diplomas Wednesday evening. They were: Mary Johnson, Allie Foster, Nettie Mae McDowell, Fay Abrams, Harold Abrams, Dorothy Candler, Elizabeth Carlson, Nellie Crocker, June Davis, Hazel Reid, Carrie Lee Riley, Geneva Van Wert, Karl Emery and Elmer Fraser. The highest averages were made by Mary Johnson, who received ninety and four-ninths per cent, and Allie Foster who received ninety and one-ninth per cent.

The seventh and eighth grades held their picnic at Cold Springs near the Brocke home.

Wednesday morning the eighth grade entertained the lower grades by their Class Day exercises. Their history, prophecy, will, poem and horoscope were read. About one half hour was spent in singing. Miss Ledbetter was also our guest.

Tuesday the pupils of the 7th and 8th grades surprised Miss Weaver with a handkerchief shower, the occasion being her birthday. The surprise was arranged by calling Miss Weaver to the telephone and when she returned her desk was heaped with lovely gifts. It was greatly appreciated.

Fifth and Sixth Grade News

The following pupils of the fifth and sixth grades made perfect attendance records for the term: Elmer Emery, Marjory Onstott, Thomas Blevins and Bud Carlson. Each pupil was awarded a certificate issued by the state. Miss Weaver also presented each with a prize for making this perfect record.

More Barley Should Be Be Cultivated for Stock

Those who have studied the fields of oats and barley over a period of years are of the opinion that, except for sections where chinch bugs are bad or the soils sandy, barley should be more generally grown with a corresponding reduction in the acreage of oats. Figure this out for your own community. Take the average yield of oats and of barley and reduce this to pounds. Then subtract from this the 30 per cent hull which is found in

FARM POULTRY

COCCIDIOSIS IS EASY TO CONTROL

Success Depends to Large Extent on Recognition.

Success in controlling coccidiosis depends to a large extent on immediate recognition of the affected chicks, points out J. C. Taylor, associate poultry specialist at the New Jersey College of Agriculture, Rutgers university, New Brunswick.

It is possible for chicks to become infected with coccidiosis at any time during the growing period, but the disease generally makes its appearance when the birds are between four and eight weeks old. Chicks that have coccidiosis will stand around near the stove or in the corner of the brooder house with their eyes closed and wings down. The beaks and legs of the affected chicks will be white. To diagnose coccidiosis definitely, it is a good plan to cut open one or two of the affected chicks. The cece, or two blind pouches of the intestines, of diseased chicks will be greatly enlarged and filled with a hard, cheesy mass. When such conditions are found, steps should be taken to stop the spread of the disease.

The disease is spread principally through the droppings of the affected chicks, and for this reason the brooder house should be cleaned every five days. Keep the chicks off the bare ground around the brooder house by moving the house to a new location. In some cases where the house cannot be moved it is a good practice to confine the chicks to the brooder house.

It has been found that feeding plenty of milk is a great help in controlling coccidiosis. The following ration composed of 40 per cent milk has proved valuable for use at the time of the outbreak; 40 pounds dried skim milk or buttermilk, 30 pounds ground yellow corn, 20 pounds ground rolled oats, and 10 pounds wheat bran. This mash should be given the chicks as soon as the disease is recognized and kept before them as long as they appear affected. The scratch grain should be greatly reduced so that all chicks will be compelled to eat the mash. Provide plenty of hopper space so the chicks can eat without crowding. When all symptoms of the disease disappear, gradually change the ration to the regular feed that the chicks were given at the time of the outbreak.

Gravelly Soil Is Most Desirable for Sites

Poultry yards and the sites for poultry houses should be selected with a view to dryness and shelter. A sandy, gravelly soil is most desirable for this purpose, while the lay of the ground should be such as to provide a free natural drainage. If the topography is of such a nature as to render the latter difficult or impossible, recourse must be had to some artificial means of securing dryness. Excessive moisture of the environment is always objectionable from the standpoint of poultry production, while furthermore the presence of surface water, which birds are apt to drink, must be regarded as a very serious source of mischief. For this reason, pools and puddles, filled wagon ruts or open drains should never be tolerated in yards used for poultry.

Making Plans Now for Improvement of Flock

As the returns from the flock depend largely upon the number of eggs laid, we must first get better stock. This means stock with the ability to lay more eggs bred into them. In the case of farm flocks, this may be brought about by improving the present flock or by the purchase of new foundation stock. The method that appeals to the true poultryman is the former. Starting with what you have, provided it is of a standard breed, it is possible to see a marked change in a few years. This may be brought about without the use of the trapnet, although exact records will hasten the process of improvement.

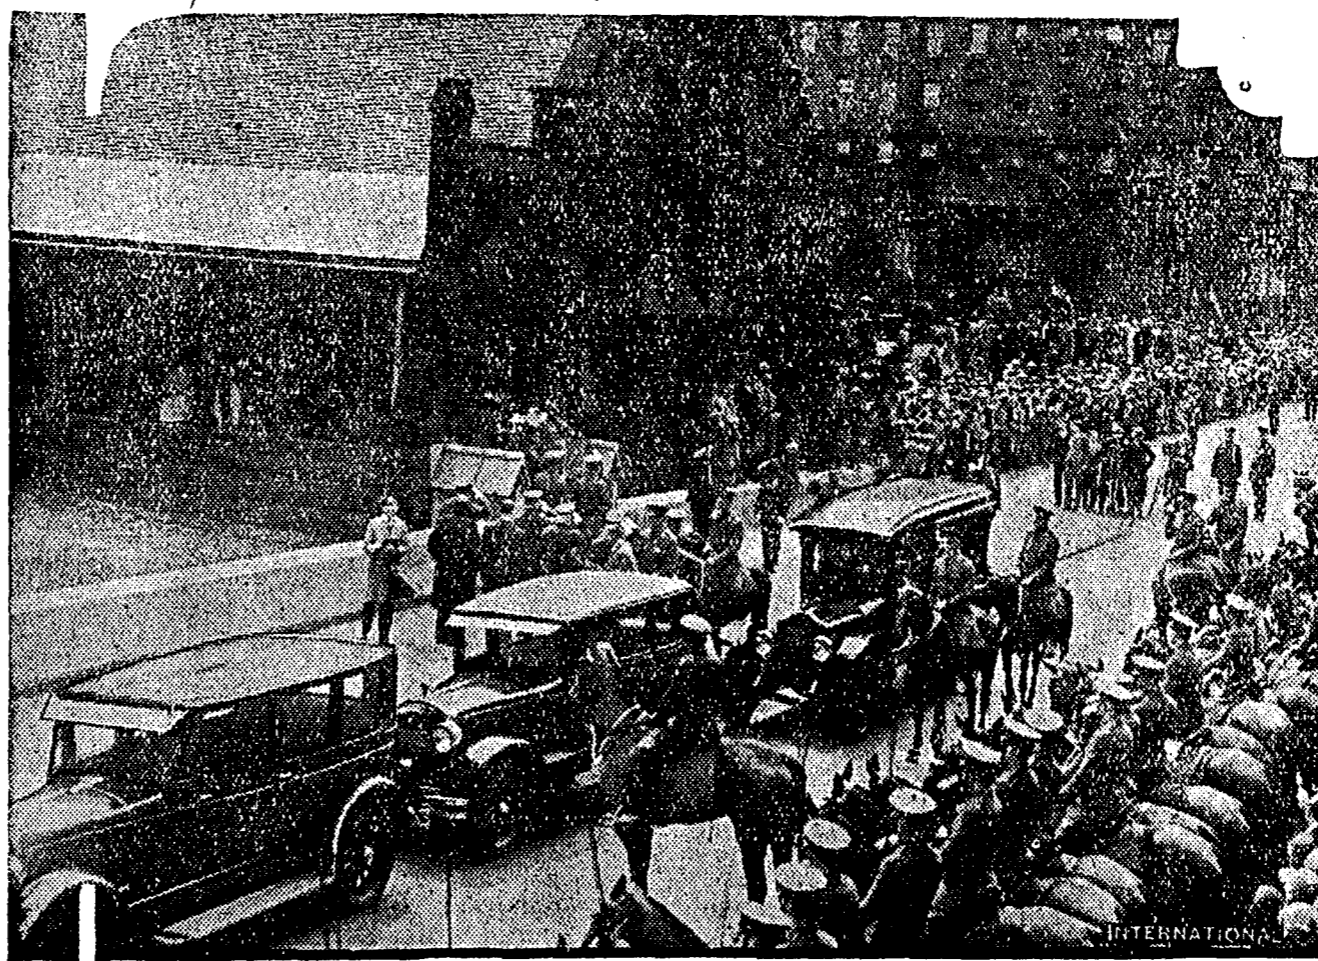

Some Chicken Don'ts

Don't use eggs for hatching from hens that have laid heavily all winter.
Don't start the hatching season with any old rooster.
Don't use pullet eggs for hatching.
Don't run away with the idea that one rooster is good for more than fifteen to twenty hens.
Don't feed too heavy with meat while you are saving eggs for hatching.
Don't keep eggs over ten days.

Best First Feed

Sour skim milk or buttermilk is the best first feed for baby chicks, but they should be given no feed until they are from forty-eight to seventy-two hours old. To feed chicks too early may cause common white diarrhea. After the first feed of sour milk or buttermilk give a chick grain consisting of equal parts of fine cracked corn and cracked wheat or rolled oats. An amount of scratch feed should be fed five times a day which can be cleaned up in 15 minutes.

Funeral of the Late Ambassador Herrick in Cleveland

Scene in front of Trinity Episcopal cathedral in Cleveland, Ohio, when the body of Myron T. Herrick, the late ambassador to France, was being taken in to lie in state before interment.

Great Value of Clover as Crop

Big Returns Obtained From Plant as Builder of Worn Soils.

Of all the legumes grown in Illinois, probably none has greater possibilities for soil improvement than sweet clover, according to O. H. Sears of the University of Illinois. The in-

creased yields of crops following its use testify to the worth of this legume for "soil-building" purposes.

Returns Comparable.

That the returns secured from the use of sweet clover as a green manure crop are comparable with those obtained from other system of farming, is shown by the fact that both first and second year corn after sweet clover yields as well as that on land to which farm manure has been applied when both the sweet clover and manure plots have received limestone and phosphate applications. As an average of the last rotation on four ex-

periment fields located on dark colored soils, the yields were 65 and 62 bushels per acre, respectively, on first and second year corn for both the sweet clover and farm manure plots.

It is of interest to find that on the same fields the response to phosphate fertilization has been more pronounced on plots growing sweet clover than on those receiving farm manure. In fact, in these cases, no increased corn yields have resulted from application of phosphate in addition to the manure, whereas, on the sweet clover plots an average increase of four bushels per acre has been re-

corded. These results which are typical of those secured throughout the state, indicate that on those soils in need of phosphate applications, greater returns will likely be secured where sweet clover is being used as a source of organic matter than will be obtained where manure is spread liberally.

Potash Profitable.

There are also indications that the purchase of potash salts may become a profitable practice when used on land where sweet clover has been employed for soil building purposes. Particularly on the lighter soils of the state, there appears to be an increasing need for potassium with the increased growth of sweet clover green manure crops.

It appears, therefore, that in order to secure the greatest benefit from the sweet clover crop, consideration should be given to other soil improvement practices which may enhance its value.

Soil gives returns as well as the bank. Spend a little money to lime your soil and collect the interest that will surely come your way as a result.

Give your fence posts a treat. Properly treated posts of nondurable species last from 15 to 20 years; untreated, they average about five years. Treating costs less in the end.

Plan to Make Farming Better Paying Business

Farming has changed from an art in grandfather's day to a business now, and one of the first steps toward making it a better paying business is the keeping of suitable accounts. Accounts will tell definitely whether or not the farm is accomplishing its purpose of making money so that the operator may be able to buy the many things which modern ways of living demand. If the farm is not measuring up, the accounts will indicate the changes which should be made in the way of doing business. It pays better to strengthen the business at its weakest point than to add strength at the strongest points.

You might call this "putting the car over the bumps." Drawing made from a photograph of a car driven over a road scientifically made bad as the Proving Ground.

Here's where a car leads a tough life

NO General Motors car is turned out of the factory until a fleet of exact duplicates of that model has been found good by the engineers at General Motors' Proving Ground.

Such an advance model must prove itself from stem to stern. The tests involve speed, power, endurance, braking, riding comfort, handling ease; fuel, oil, and tire economy; body strength—every phase of car construction and performance. It's a *tough life*.

Such testing would be beyond the means or resources of an individual. 1268 acres of land at Milford, Michigan, are devoted to this outdoor laboratory where hills are steep and roads are vicious. Men who are among the world's best automotive engineers conduct the tests.

This tested performance is as much a part of a General Motors car as the chassis. You can't see it. You don't pay extra for it. But you *know it* as you give the car long use on the road.

CHEVROLET. 7 models. \$525—\$725. A six in the price range of the four. Smooth, powerful 6-cylinder valve-in-head engine. Beautiful new Fisher Bodies. Also Light delivery chassis. Sedan delivery model, 1 1/2 ton chassis and 1 1/4 ton chassis with cab, both with four speeds forward.

PONTIAC. 7 models. \$745—\$895. Now offers "big six" motoring luxury at low cost. Larger L-head engine; larger Bodies by Fisher. New attractive colors and stylish line.

OLDSMOBILE. 7 models. \$875—\$1035. The Fine Car at Low Price. New models offer further refinements, mechanically and in the Fisher Bodies—yet at reduced prices. Also new special De Luxe models.

OAKLAND. 8 models. \$1145—\$1375. New Oakland All American Six. Distinctively original appearance. Splendid performance. Luxurious appointments. Attractive colors. Bodies by Fisher.

VIKING. 3 models. \$1595. General Motors' new "eight" at medium price. 90-degree V-type engine. Striking bodies by Fisher. Unusual appointments. Three years spent in its development and test.

BUICK. 19 models. \$1195—\$2145. The Silver Anniversary Buick. Three wheel-bases from 115 to 128 inches. Masterpiece bodies by Fisher. More powerful, vibrationless motor. Comfort and luxury in every mile.

LASALLE. 14 models. \$1295—\$1875. Companion car to Cadillac. Continental lines. Distinctive appearance. 90-degree V-type 8-cylinder engine. Striking color combinations in beautiful bodies by Fisher.

CADILLAC. 25 models. \$3195—\$7000. The Standard of the world. Famous efficient 8-cylinder 90-degree V-type engine. Luxurious bodies by Fisher and Fleetwood. Extensive range of color and upholstery combinations.

(All Prices f. o. b. Factory)

ALSO

FRIGIDAIRE Automatic Refrigerator. New silent models with cold-control device. Tintone cabinets. Price and model range to suit every family.

DELCO-LIGHT Electric Plants — B-Water Systems. Provide all electrical conveniences and labor-saving devices for the farm.

All General Motors products may be bought on the low-cost GMAC Time Payment Plan.

Starking Apple Is Delicious

Starking Apple Tree; Apple in Inset.

Color is recognized as being of the utmost importance in selling manufactured articles nowadays. Motor cars, alarm clocks, bathtubs, even kitchen ranges are being made in colors to help them sell. Is it strange that color should be considered vital in marketing agricultural products, especially such an attractive one as a bright, red, apple?

With its brilliant red color stressed as its most important improvement, a nursery firm of Louisiana, Mo., has introduced a new strain of the famous Delicious apple, which has been given the name Starking. The big point of difference between the Delicious and the Starking is that Starking is solid, rich red all over the apple while the parent is a striped and lighter colored apple. Furthermore, the Starking colors red several weeks before the original Delicious starts to color. Otherwise the two apples are of identical quality. As one expert puts it: "The Delicious got ripe before it got red; the Starking gets red before it gets ripe."

Whereas the Delicious lacked color, when it was picked at a state of proper firmness which permitted storage, the Starking has attained its brightest color when still solid and ready to be picked when hard ripe. It is estimated by apple experts that the item of increased color alone would mean an increase of \$1,000,000 a year additional income to the grow-

ers of such a district as the Wenatchee, Washington apple growing district, could all the fruit on the Delicious trees in that section be given the solid red color of the Starking. Experience has proved that the color, which the buyer can see, is far more important than the flavor, or any other quality in determining the market price. "The markets, however, have recognized the superior quality of the Delicious type of apples. Only highly colored good quality fruit can be graded extra fancy and get the top market figure. This teaches that even orchardists are affected by fashion, and must pay attention to the appearance of their product.

The Starking was discovered on a single branch of a Delicious apple tree in a New Jersey orchard. This branch was observed to be loaded each year with apples that became red in late August, a month before ripening, when the apples on the other limbs of the same tree were still green. This is a natural phenomenon which occurs possibly only once in a million or more trees; it is termed a "mutation" or an unexplained departure from type, one of the ways nature has of improving the species the cause of which men have so far been unable to explain. By taking the wood of this exceptional branch, and propagating it on root stocks, trees possessing the qualities of the single branch were obtained, and the Starking apple was made available to all orchards.

The Starking apple was awarded the American Pomological society's Wilder medal in 1920. Except for its color, the trees and fruit of Starking have the same characteristics as the Delicious. A number of orchardists have observed that Starking bears at a younger age, often when three or four years old. The apples have exhibited greater storage endurance, having been kept more than a year without deterioration. Like the Delicious it grows rapidly and is exceptionally resistant to the attacks of insects and diseases.

LIVE STOCK

HOG CHOLERA IS CAUSE OF LOSSES

Measures to Control Various Diseases Are Needed.

(By J. W. LUMB, Extension Veterinarian, Kansas State Agricultural College.) Knowledge is power in the control of swine diseases.

It has been estimated that only 50 per cent of the pigs farrowed live to marketable age. It is commonly assumed that 90 per cent of all losses from diseases in swine may be charged to hog cholera.

While in continuous use, the old hog lots and houses may become centers for external parasites such as lice and mange mites and more death dealing microscopic organisms, those that cause pig diseases such as scurvy, scours, infectious nasal catarrh, bronchitis, infectious odema, swine pest, undesirable sequels to wound infections, eczema, necrobacillosis of the skin, nose, stomach, and intestines, and various types of pneumonia. Besides all these troubles, there are the ever present large round worm eggs.

Preventive measures to control pig diseases should begin before the litters are farrowed.

Thoroughly clean farrowing house, removing all litter and scrubbing floor and walls with boiling water and lye.

Wash sows with soap and water before placing them in cleaned houses.

Within two weeks after farrowing, remove sow and pigs directly to a field that has not been used for hogs for at least one year.

Remove sow at weaning time. Allow no other hogs in the pasture.

Keep pigs on the pasture until four months old or until they are past the period of greatest danger.

Plow hog yards and lots each year and plant crops to help destroy round worm eggs.

Liver Fluke of Sheep Cause of Much Damage

(Prepared by the United States Department of Agriculture.)

A poster dealing with the common sheep liver fluke has been issued by the bureau of animal industry, United States Department of Agriculture, to enlist the aid of live stock owners in checking the spread of the parasite. The poster describes and illustrates the life cycle of the fluke and outlines simple methods of control. Since young flukes spend a part of their life-history in the snail, it is especially important to drain, fill, or fence off wet areas in which snails breed. Snails may also be destroyed by the application of copper sulphate, as a spray or powder, to infested pastures.

Besides killing many sheep and cattle annually, flukes cause an annual loss of fully \$300,000 because of damage to livers as a food commodity. These parasites, sometimes incorrectly called leeches, are spreading from the West coast, Rocky Mountain states, and South toward the East and North. Copies of the poster may be obtained on request to the bureau of animal industry, United States Department of Agriculture, Washington.

Manicuring Cattle to Save Much Discomfort

Cattle kept in the stable or in yards often suffer discomfort because of excessive growth of the claws. This is due to lack of wear, writes Dr. L. Van Es, in Kansas Farmer. Excessively long claws lead to a faulty position of the limbs, strains of tendons and pain during motion. This discomfort and pain may reduce the milk yield.

Heavy bred bulls are particularly apt to suffer, and their usefulness may become impaired. They should have their claws properly trimmed about twice a year. With appropriate tools the excessive horn may be removed and the whole smoothed with a rasp. It may be necessary to throw the animal but this should not keep the job from being done.

Oats Replace Corn for Hogs in Purdue Ration

Swine feeding results at Purdue university, Lafayette, Ind., show that oats in rations for swine should be limited to one-half the weight of the ration. More than this weight is not used economically and gains are slower.

The corn replacement value of the oats varies according to the amount of oats used. When one-fourth of the ration was oats, one bushel of oats replaced two-thirds of a bushel of corn. Where oats made up one-half the ration, a bushel of oats was equal to only one-half bushel of corn.

Get Lambs Eating

Many shepherds clip the wool from around the ewe's udder which, of course, lessens the wool ball danger, but with wool always on fences and troughs one has to get the lambs to the eating habit as soon as possible. Lambs a few weeks old enjoy nibbling at grain, oats, bran and cracked corn with a sprinkling of linseed oilmeal, which makes a fine lamb feed, and it is surprising how soon the lambs will become accustomed to eating whole corn.

HEADS TENNIS TEAM

Eitz Eugene Dixon, who has been named captain of United States Davis cup team. He succeeds Joseph W. Wear, who was temporarily placed in charge in France last summer after William T. Tilden had been declared ineligible.

NEW NAVY AID

Ernest L. Jahncke of New Orleans, who has been named assistant secretary of the navy by President Hoover. He succeeds Theodore Douglas Robinson of New York.

Wheat Smut Losses Show Big Increase

Growers Are Urged to Treat Seed Before Planting.

As stinking smut of wheat has increased rapidly in the United States since the war, causing greater losses than any other plant disease, wheat growers are being urged to treat their seed with copper-carbonate dust before planting as a preventive measure.

An investigation of conditions in eastern Colorado showed seven to ten per cent of the wheat crop ruined by smut the past year, according to E. A. Langren of the Colorado Agricultural college. In some cases fields have shown as high as 30 to 50 per cent smut with consequent losses of ten to twelve dollars an acre.

Smut losses can be prevented by treating the seed wheat before planting with copper-carbonate dust, applied to the grain in an air-tight mixer, the college says. This treatment gives practically perfect results, not only killing the smut spores on the kernels before planting but protecting them from smut infection that may be in the sacks or drill. The commercially pure copper dust or powder can be mixed with the seed wheat at the rate of two to three ounces, or two to three heaping tablespoons of powder to the bushel. The best method of applying dust is to use a barrel mixer or box fixed in the manner of a cement mixer.

Since the copper carbonate is a dry treatment, the seed can be planted immediately after dusting, or held a long time. The effect of the treatment is permanent. Moreover, seed germination is not injured by the copper-carbonate-dust treatment.

Thin-Shelled Eggs

There are apparently three causes for shell-less and thin-shelled eggs. Shell-less and very thin-shelled eggs are often laid by hens that have met with a slight accident, such as falling off the roosts, or that have become frightened. Such eggs are usually not full when laid and are caused by the egg slipping past the shell glands before the shell has been made. Clumsy, overfat hens are more likely to lay this type of egg.

Bolster Pasture With More Crops

If Supplement Is Provided Live Stock Will Not Suffer for Feed.

Blue grass is the main constituent of our best pastures and makes abundant growth during spring and early summer, and again in the fall months, but there is usually a period during the summer when little growth is made. The capacity of the pasture during that period of the year is apt to be rather uncertain, particularly in a dry year.

Supplemental Crop Helps.

H. R. Cox, farm crops specialist at the New Jersey State College of Agriculture, suggests that if a supplement to the pasture is provided during part of the summer, the stock will not suffer from lack of feed, and the pasture will not be injured by grazing too closely. This supplement may be of various kinds. Sometimes additional grass pasture may be rented. With some farmers it may take the form of providing for temporary pastures or using soiling crops, or even by the use of silage.

Hay land may be pastured after mowing. Grain stubble is sometimes pastured but the cows do not get much besides ragweed. In case of necessity, some of the first cutting of grass and clover may be grazed. A few farmers in New Jersey pasture the second cutting of alfalfa after it is well along. This is not particularly good for alfalfa, but it is not as hard on the crop as pasturing during the entire season. Of the crops that are sown for temporary pasture, there is nothing that will beat sweet clover where the soil conditions are right for it.

Using Method of Soiling.

A few farmers meet the shortage of pasture by using the method of soiling, that is, cutting green crops for the cows. Corn, clover, and grass may be used in this way; or certain crops may be planted specifically for this purpose, such as oats and peas in early spring, and soy beans in late spring. Soiling involves considerable labor, however, and it is usually cheaper to let the cows gather their own roughage.

You can bank on the quality of a cigarette that continues to be the biggest success in smoking history

CAMEL CIGARETTES

WHY CAMELS ARE THE BETTER CIGARETTE

Camels contain the choicest tobaccos grown . . . expertly blended for matchless taste and fragrance.

They have a welcome mellowness and mildness that you will find in no other cigarette. Smoke them as often as you like, Camels never tire your taste.

The quality of Camels is never permitted to vary.

Only a superior cigarette could have won and held world leadership for all these years as Camel has done.

NOTICE OF ADMINISTRATOR'S SALE OF REAL ESTATE

In the Probate Court of Latah County, State of Idaho.

In the matter of the Estate of Columbus N. Clark, Deceased.

NOTICE IS HEREBY GIVEN

that the undersigned Administrator of the estate of Columbus N. Clark, deceased, will on Monday, the 27th day of May, 1929, at 11 o'clock A. M. of said day in the office of A. H. Oversmith, at Moscow, Latah County, State of Idaho, sell at public auction all of the right, title and interest that the said Columbus N. Clark had in and to the herein-after described premises at the time of his death, and also all of the right, title and interest which the estate of the said decedent has acquired by operation of law or otherwise in and to the following described premises situated in Latah County, State of Idaho, to-wit:

The East Half (E 1/2) of the Northeast Quarter (NE 1/4) and the East Half (E 1/2) of the West Half (W 1/2) of the Northeast Quarter (NE 1/4) of Section Eight (8), in Township Thirty-seven (37) North, Range Three (3), West of Boise Meridian; also a strip of land one rod wide beginning at the Northwest corner of the above described tract and running west 40 rods to the Quarter Stake of said section.

Also the Northeast Quarter (NE 1/4) of Section Twenty-six (26) in Township Thirty-eight (38) North, Range Four (4), West of Boise Meridian.

NOTICE IS FURTHER GIVEN that such sale will be made subject to the lease on the above described real estate expiring on October 1, 1929, and that ten per cent (10%) of the sale price shall be paid by the purchaser on the date of sale and the balance shall be paid upon the confirmation of the sale by the above entitled Court.

Dated and signed at Juliaetta, Idaho, on this 1st day of May, 1929.

A. W. BEHRENS, Administrator of the estate of Columbus N. Clark, deceased. 18-4

Notice of Sale of Real Estate by Latah County for Monday, June 10th, 1929.

Notice is, Hereby Given That in under and by virtue of an order of sale and resolution made by the Board of County Commissioners of Latah County, Idaho, on Wednesday, April 10th, 1929, the hereinafter described lots, pieces and parcels of land, situated in the County of Latah and State of Idaho, will be sold, or offered for sale, by the sheriff of said County, at public auction, at the front door of the county courthouse, in Moscow, Latah County, Idaho, on Monday, June 10th, 1929, at 2:30 o'clock P. M. of said day, or at such time as on the day to which the sale may be postponed or adjourned, to the highest and best bidders for cash, or such terms as the Board of County Commissioners may determine, which property is held by Latah County, under and by virtue of tax deeds, and is known and described as follows, to-wit:

Lot Two (2), Block (4), Old Town of Genesee in Section Thirteen (13), Township Thirty-seven (37) North, Range Five (5) West of the Boise Meridian, in Northeast Quarter of the Southwest Quarter, assessed to L. H. NICHOLS.

Southwest Quarter of the Northwest Quarter (SW 1/4 NW 1/4), Section Five (5); Southwest Quarter of the Northeast Quarter (SW 1/4 NE 1/4); Southeast Quarter of the Northeast Quarter (SE 1/4 NE 1/4), and Southeast Quarter of the Northwest Quarter (SE 1/4 NW 1/4) of Section Six (6), Township Forty-two (42) North, Range One (1) West of the Boise Meridian, assessed to FRANK E. FEATHERSTONE.

Northwest Quarter of the Northwest Quarter Lot One (1), Section Nineteen (19), Township Forty-two (42) North, Range One (1) East of the Boise Meridian, assessed to GERTRUDE M. PITTARD.

Lots 1 and 4, Block 21, Lot 8, Block 30, Original Town of Kendrick, assessed to GEORGE F. WALKER.

Lot 8, Block 16, Original Town of Kendrick, Assessed to LATAH COUNTY.

Lots 1, 2, 3, 4, Block 32, Original Town of Kendrick, assessed to ALBERT KLEETH.

Lots 5 and 6, Block 16; Lot 7, Block 20; Lot 10, Block 38, all in Original Town of Kendrick, assessed to E. R. PORTER.

Lot 3 (less Ry.), Block 100, Oak's Addition to Kendrick, assessed to CHAS. BODENHOUSE.

Lot 4 (less Railway) Block 101, Oak's Addition to Kendrick, assessed to LATAH COUNTY.

Lots 8, 9, 10, Block 96, Oak's Addition to Kendrick, assessed to CHAS. BODENHOUSE.

Lots 2, 8, 10, 12, Block E: Lot 1, Block F, Addison's Addition to Kendrick, assessed to G. F. WALKER.

Lots 1, 2, 4, 5, 6 and 8, Block 23, all in Original Town of Kendrick, assessed to JOHN NISBET.

West 20 feet of Lot 17, Block 1,

Original Town of Juliaetta, assessed to F. KOHLENBERG.

East 20 feet of Lot 12, Block 1, Original Town of Juliaetta, assessed to W. B. ROBINSON.

South half of Lot 10, Block 1, Original Town of Juliaetta, assessed to O. F. HOTTLE.

Lots 15 and 16, Block 4, Original Town of Juliaetta, assessed to C. MUZIK.

Lot 5, Block 18, Original Town of Genesee, assessed to M. B. QUILLEN.

Lot 6, Block 18, Original Town of Genesee, assessed to F. S. CASEBOLT.

Lot 3, Block 18, Original Town of Genesee, assessed to JAMES J. KEANE.

Oliver Tract, North Addition to Genesee, assessed to JOHN W. LAWSON.

South half of Lot 2, Block 17, North Addition to Genesee, assessed to BEN CALDWELL.

North half of Lots 1 and 2, Block 15, West Addition to Genesee, assessed to HENRY LORANG.

Lot 12, Block 8; Lot 12, Block 9; Lot 6, Block 14, Harvard, assessed to J. W. HASTINGS.

Lot 13 and 14, Block 17, Original Troy, assessed to BLANCHE ROSS.

Lots 4, 5, and 6, Block 3, Daniel's Addition to Troy, assessed to L. F. PARSONS.

Lots 43, 44, 45, 46, 47, and 48, Block B, Lievalen's 2nd Addition to Moscow assessed to A. J. SIMONSON.

Any of the above described property shall vest in the purchaser all of the right, title and interest of the county in the property so sold, including all delinquent taxes which have become a lien on the property since the date of the tax sale certificate upon which any tax deed has been issued.

Dated at Moscow, Idaho, this 10th day of April, A. D. 1929.

HARRY A. THATCHER, Clerk of the Board of County Commissioners, Latah County, Idaho. 16-6

TORCH SLAYER

H. Colin Campbell, civil engineer, formerly of Chicago, who has confessed to having shot and killed his bigamous wife, who was Mrs. Benjamin S. Mowry, a nurse of Greenville, Pa. After murdering her he saturated her body with kerosene and fired it in an attempt to hide his crime.

Grit Quite Necessary to Hens When Confined

Grit seems necessary to hens when they are confined, but the supply is neglected in some flocks, and it must greatly reduce their powers of grinding feed like whole corn. We have been using a commercial mineral grit with good results, says a writer in an exchange. It contains 70 per cent carbonate of lime and 22 per cent tricalcium phosphate. This grit seems to have good grinding powers, and supplies some phosphorus for the making of eggs. It also seems to help in producing eggs of a good shell texture, and there are practically no soft-shelled eggs laid, at least they are not found. But we use oyster shells along with the mineral grit, and the combination seems all right. I don't know which material deserves the most credit for the good shell texture on the big Leghorn eggs.

Seed Is of Importance in Growing Many Crops

Only the soil itself is a more important factor in the growing of grain, flowers, clover, vegetables or any crop, for business or pleasure, than the seed used. Farmers and gardeners have no control over the growth in the spring and again before maturity in the fall. There may be a drought, or a flood, or a hail storm, and all are beyond the control of man. But he has control over the seed used and his profit or pleasure is largely determined by the sort of thing he sows.

"One has every reason to be suspicious of cheap seed just as one is suspicious of a cheap horse or cow," states W. J. W. Lennox of the Dominion seed branch at Vancouver, B. C. "When you are offered a No. 1 horse at a low price, you immediately start looking for defects, and if you don't know very much about a horse, you will have him taken to a veterinary for examination. Follow the same rule with your seed supply."

NOTICE

Notice is hereby given that I, the undersigned, will at the next regular meeting of the Board of Pardons for the State of Idaho, make application for pardon

from that certain judgement and conviction of the crime of burglary, made and entered in Latah County, State of Idaho, on or about May 31, 1921.

Signed: Harold McManus. 21-4

Linden News

(Too late for last week)

Mrs. J. W. Bricker of Plummer, Idaho, and niece, Mrs. Abrams of Kendrick were on the ridge Thursday.

Mrs. Addison gave a farewell party Friday evening for Miss Popkey, a large crowd attended and a jolly good time was had by all.

The evening was spent playing games. Refreshments of ice cream and cake were served.

Mrs. Vaughan and son, Ted, arrived from Milton, Oregon, Friday evening to visit her daughter, Mrs. C. H. Fry and family. They returned home Monday.

Aunt Carrie Allen visited with Mrs. J. H. Hunt, Sunday.

Grandma Keeler returned from Kendrick, Saturday, where she visited friends.

Miss Virginia Allen spent the day Friday with Eva Smith.

Mr. and Mrs. W. M. Sadler and daughters spent Sunday in Troy.

Mr. and Mrs. Will Whybark and family of Texas ridge visited at the Dan Whybark home Sunday.

Mrs. Sylvia Jenks came up from Carleton, Sunday to help care for her grandchildren who have the measles.

The Harris and Keeler children also have the measles at this time.

A number from here attended the Cherry Blossom Festival in Lewiston, Saturday.

Miss Josephine Popkey left Saturday for her home in Boise.

THE STATE WE LIVE IN

By Byron Defenbach

SECTIONALISM

Due to the fact that Idaho is more nearly triangular than square in form, it tends to divide into three, rather than two or four sections.

In a considerable degree politically, and to a lesser extent commercially and socially, the state may be said to consist of a north, a south and a southeast.

Northern Idaho comprises the ten counties lying north of the Salmon River. The division between the other two sections is not so clear, but a majority of the citizens consulted in the preparation of this article place the following sixteen counties in southern Idaho, all the remainder being either northern or southeastern: Twin Falls, Jerome, Lincoln, Blaine, Adams, Washington, Payette, Gem, Ada, Canyon, Owyhee, Valley, Boise, Elmore, Gooding and Camas.

The ten northern counties contain 25 per cent of the area, 26 of the population, 30 of the wealth, 21 of the farm land and 80 of the timber land of the state.

The eighteen southeastern counties contain 38 per cent of the area, 38 of the population, 34 of the wealth, 47 of the farm land, and practically none of the timber. The sixteen southern counties contain 37 per cent of the area, 36 of the population, 36 of the wealth, 31 of the farm land and 20 of the timber.

The north furnishes 25 per

cent of the school children of the state, 27 of the voters and 24 of the legislative members with 12 of delinquent taxes. The south has 35 per cent of the school children, 38 of the voting strength, 38 of the legislature, and 36 of the delinquent taxes.

The southeast furnishes 40 per cent of the school children, 35 of the voters has 38 of the legislature and 36 of the delinquent taxes.

Of the six largest towns, one is in the north, three in the south, and two in the southeast. Ada county leads all in population, wealth, school census, and voting strength. Clark is at the foot of the list in all these phases.

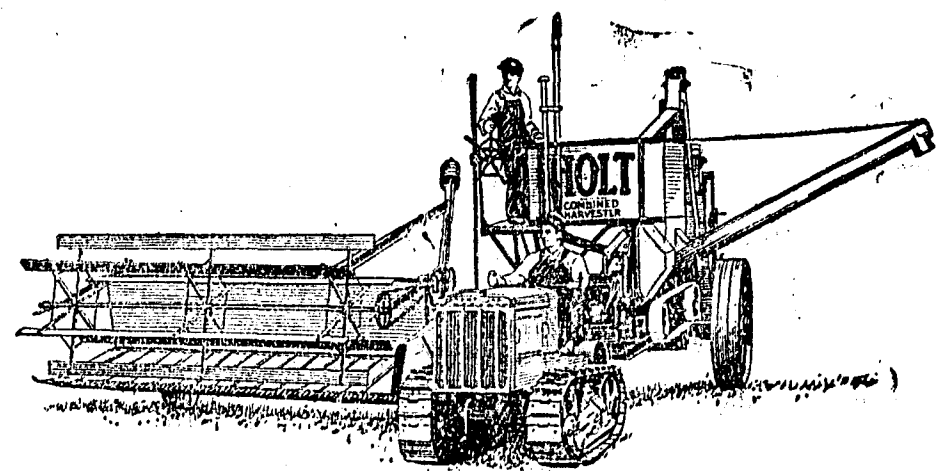

The largest county in area is Idaho, which also boasts of the greatest wealth in livestock. The smallest county in area is Payette. The most densely populated is Canyon, and the most sparsely is Owyhee. Canyon county has over fifty people to each section of land, Owyhee averages considerably less than one person.

Lewis county has the smallest portion of waste land and is the leader in the production of wheat. Ada county has 9,775 children of school age, while Clark county has 356. In the last general election, Ada county cast 14,505 votes for governor, and Clark county 515.

The least wealthy county in north Idaho is Boundary, with an assessed valuation of six million. In southern Idaho there are eight counties with less wealth than this and in southeastern Idaho seven. The average taxable wealth of a citizen of Clark county is over \$3,000 or about double that of the citizen of Ada county.

A Message for Inland Empire Farmers

- get ALL your grain!

--and harvest better--quicker--cheaper

You pay for a

Why not own one?

If you are farming without tractor power, the extra time, effort and money required is more than paying for a "Caterpillar." Why not own one now and start to benefit from the saving. See the new models Ten and Fifteen.

THE sure way of reducing grain harvesting costs of getting all your grain with a saving of time, effort and money is to invest in a Holt Combined Harvester.

For over 40 years Holt Combined Harvesters have been reducing harvesting costs. The Holt has been constantly improved saves grain separates clean puts extra bushels in the bin swells the harvest with extra dollars.

Level land or steep hillside, the Holt gives the same dependable performance. Big, strong wheels make it easy to pull. High grade anti-friction bearings reinforced channel steel frame evenly balanced header powerful engine protection against dust no excessive vibration light weight easy operation these are but a few of the features you want and will find in a Holt.

Let us tell you more about Holt Combined Harvesters and "Caterpillar" Tractors. See them on display at our new modern home and place your order early to assure prompt delivery.

When your grain is ripe, it won't wait! Be ready when your grain is ready! Get your Holt Combine now! Extra bushels will reward your foresight!

Whybark graduated from the Deary high school, while William Ingle and Bernard Jones graduated from the Kendrick high school. A large number from here attended the commencement exercises at both places Tuesday and Wednesday evenings.

Cameron News

Last week's call for volunteers to fix up the Cameron cemetery brought a good response; but not enough to entirely finish the work. The fence was repaired and many graves fixed up, but more men with brush scythes are needed; therefore, it has been thought advisable to ask for more volunteers on Decoration Day. If each man who visits there on that day, will swing the scythe or pile brush for one half hour, the work can easily be completed. It would be splendid if each lady would fix up one forgotten grave.

A few donations of a dollar each have been received and it is hoped that enough will be received that help can be hired to keep the weeds down for the remainder of the summer.

A brief meeting will be called at the cemetery at 10 a. m. on Decoration Day to make plans for keeping up the grounds in the future.

Fred Mielke and sons, Herbert and Edwin, went to Moscow, Saturday on business.

Miss Anna Wegner left for Spokane, Saturday, after spending a few days here with relatives.

Fred and Henry Reil spent Sunday at the George and Herman Wilken home.

Mr. and Mrs. John Schwarz and Mrs. Fred Newman and children spent Sunday with Mr. and Mrs. Fred Mielke.

Mr. and Mrs. George Ehlers spent Friday night at the Carl L. Wegner home.

Grandma Wegner spent Sunday with Mrs. Wilkens.

Mr. and Mrs. A. O. Wegner were visitors of Mr. and Mrs. Gus Kruger, Sunday.

Wilma Schultz spent Sunday at the Carl Hartung home.

Mrs. Wm. Johnson of Peck spent this week with her parents, Mr. and Mrs. H. Wilken.

G. F. Cridlebaugh closed a successful term of school last Friday. He will again teach the Cameron school next year. In the evening a very interesting program and commencement were given by the pupils and teacher. Those graduated were: Wilma Schultz, Selma Hartung, and LeVern Spekter. Mr. Cridlebaugh left for his home at Lewiston, Monday, to spend the summer.

Mr. and Mrs. A. W. Schultz and children spent Sunday with Grandma Schultz.

Grandma Schultz was a caller at the Emma Hartung home Wednesday.
