

Julietta Man Fatally Injured

George Dougharty of Julietta drove his Ford touring car off the Texas Ridge grade at the "Devil's turn," Thursday morning about 7:30. Early reports are that he was fatally injured.

Doc Van Wert and Ernest Clem, on their way to a painting job, discovered the wreck possibly 30 minutes after it had occurred. The injured man lay about 150 feet below the grade. The car, totally demolished, had plunged to the bottom of the canyon, 300 yards below.

Doctor Field, local physician, was called, and he arrived a few minutes after the wreck had been discovered. Bringing the injured man quickly to Kendrick in his own car, the Doctor gave first aid, then hastened on with him to Lewiston.

Mr. Dougharty is one of the first three pioneers of the American Ridge country.

As we go to press we are informed that Mr. Dougharty passed away soon after arriving at the hospital. He is survived by a widow, two sons, Lawrence of Julietta, and Clarence of American Ridge, and one daughter, who lives in Florida.

The obituary will appear in next week's issue.

Kendrick Gazette Changes Hands

A deal was closed yesterday whereby the Kendrick Gazette passed into the hands of Rollien S. Dickerson of Eugene, Oregon. Mr. Dickerson took possession of the paper the first of the week and this is the first issue under his management.

The former publisher, Ralph B. Knepper, who has owned and operated the plant for 13 years, has another location in view and if his present plans are carried out will be in the publishing business about September 1. Mr. MacPherson, who has been with him for the past 13 years, will accompany him to the new location.

Farmers Field Day

On next Monday, July 22nd, at ten o'clock a. m., a field excursion will start from Leland. Visits will be made to bean fields where Professor J. Raeder, Department of Plant Pathology, of the University of Idaho, will explain plant diseases of beans.

A weed spraying demonstration will also be given on this trip; a number of bean fields will be visited between Leland and Southwick in the morning. A basket lunch will be held at Southwick at 1 o'clock.

In the afternoon talks will be given by prominent men of Lewiston and the University of Idaho.

Miss Hattie Abbott, District Home Demonstration Agent, will meet with the women of the community and plan out their work for the future.

This field day is for the entire family. Bring them all—and a basket lunch—and meet old friends again.

Arrives at 85th Milestone

H. P. Hull, who carries the double distinction of being a Civil War veteran and the oldest pioneer citizen of Kendrick, celebrated his 85th birthday on Wednesday, July 18. Mr. and Mrs. Edwin A. Smith and daughter, Edith, were guests at the Hull home on this occasion.

Mr. Smith is editor of the Twice-a-week Spokesman and the Idaho Farmer. Mrs. Smith and Mrs. Hull are sisters.

May Residence Burns

The William May residence in north end of Kendrick burned to the ground, Wednesday morning about three o'clock. The building had not been occupied for some time. Mr. May and his son are in the east and Mrs. May is staying with her daughter, Mrs. Grady at Fernwood, Idaho. The origin of the fire is not known.

Attorney Oppenborn reports that the house and its furnishings were insured with the Caledonian Company for \$2,000.

Hottest Day Wednesday

The Potlatch country felt the withering lash of a severe heat wave, Wednesday, the hottest day of the year. A conservative average of thermometer readings in Kendrick indicated 100 degrees or a little more; in other towns as follows: Lewiston 102, Moscow 102, Cullisac 100, Orofino 106. The hottest day last year, (July 26) was 113 degrees.

Underdahl-Giese

Miss Lillian Underdahl, daughter of Mr. and Mrs. P. J. Underdahl, prosperous farmers of the Moscow section, was married last Sunday morning at 7:30 to Mr. Julius H. Giese, son of Julius Giese of Fix ridge. The wedding took place at the home of Rev. and Mrs. Heggs at Moscow.

Miss Underdahl was graduated from the Moscow high school with the class of '24 and later from the Lewiston normal. She taught school for the past three years.

Mr. Giese is well known in this section. He was born and raised on Fix ridge and for three years farmed for himself. Two years ago he was a member of the Kendrick band. He is now with the Mac Marr, Inc. Stores in Medford, Oregon, where he and his bride will make their home.

Mr. and Mrs. Giese are now on their honeymoon trip to the coast and at Southern Oregon points.

The Gazette joins their many friends in wishing them success and happiness.

Big Bear Ridge News

Miss Zelma Stewart has returned to her home in Grangeville, having been a guest of Mrs. Claude Jones.

Mr. and Mrs. O. E. MacPherson and sons spent the week end at the N. E. Ware home.

Rev. and Mrs. J. O. Sibert and daughter, Miss Esther of Elberton, Wash., were camping at Atwater Lake and visiting old time friends here last week. Rev. Sibert was pastor of the U. B. church about 17 years ago.

Mr. and Mrs. Wade Keene and children, D. Hunter and Mrs. Owen Hardeman of Peck left last Sunday for an overland vacation trip to Boise and various places in southern Idaho.

The annual daily vacation bible school was conducted at Tancy last week under the supervision of W. R. Johnston of Lewiston, assisted by Miss Agnes Jones. The Sunday school picnic will be held Sunday August 4th.

Mr. and Mrs. W. L. Hedge of Spokane were recent visitors at the Halfor Lien home.

Mrs. Ward Gano of Moscow attended the funeral services of Mrs. Floyd Harrison Hollingsworth Tuesday.

The Lutheran church congregation of Deary and Bear Ridge will hold joint services near Avon, Sunday. This will be followed by a picnic dinner.

Mrs. M. L. McGraw, Mrs. Jake Alber and Mrs. Henry Femrite of Texas ridge were visitors here Tuesday.

Mr. and Mrs. Gabriel Forest spent Sunday in Colton.

Anton Nelson returned home the first of the week from Agawam, Montana, where he has spent the past year with his sons.

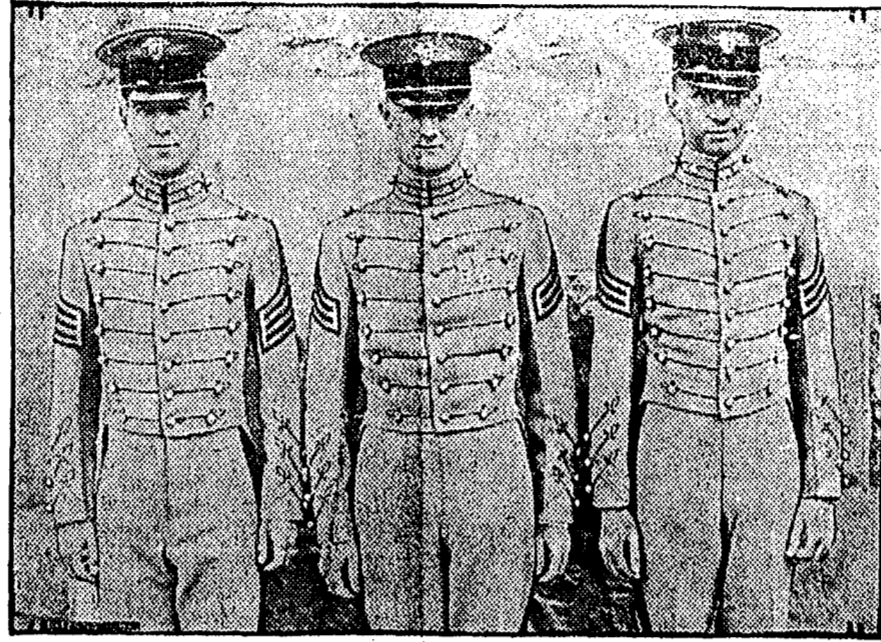

Test Idaho Laws

The constitutionality of several Idaho statutes will be tested in the federal court now convening at Boise. Among these are the oleomargarine act, requiring dealers to be licensed, and the butcher's licensing act, aimed at checking up on cattle rustlers.

Pray, Brother

"Reverend," Sam Johnson said, "De doctah done told me Ah got a floating kidney, Ah wish you would say some prayers fo' me next Sunday." "How come prayers fo' a floating kidney?" inquired the good pastor. "All mah congregation would bust out laughing." "Ah do see why," insisted Sam. "Last Sunday you done pray fo' all the loose livers."

Three Best Scholars at West Point

Left to right—Horace F. Sykes of Omaha, Neb., Raymond L. Hill of Oakland, Calif., and Frank Blue of North Carolina, who are the three highest ranking scholars of the graduating class in the United States Military academy at West Point.

Escape From Lewiston Jail

On the night of July 11, Matt Matzberg, prohibition law violator, and A. C. Irwin, federal prisoner, escaped from the supposedly breakproof Nez Perce County jail at Lewiston. The prisoners broke a bar in the ceiling of the "bull pen," climbed thru a ventilator, and lowered themselves to the ground three stories below, by means of a jail-blanket rope. Investigation shows that the bar was "jacked" in two by the use of a screw from a swivel chair, and by the use of a table leg, the latter serving as a block against the bar. So far the officers have been unsuccessful in tracing the fugitives.

Pioneer Woman Passes

Mrs. Flora Harrison Hollingsworth of the Big Bear Ridge district passed away in Clarkston, Washington, at the home of her daughter, Mrs. Frank Davis, last Saturday. She leaves a husband, three daughters and one son.

Funeral services were held at the Lutheran church on Tuesday at ten o'clock, Reverend Stivers of Albion officiating. A mixed quartet, consisting of N. E. Ware, Miss Neva Ware, Mrs. O. E. MacPherson and Oscar Shind, accompanied by Mrs. Claude Jones, furnished music. Pallbearers were O. V. Morey, Amos Moore, O. Forrest, D. J. Ingle, James Emmett and H. Lien. Interment in the Wild Rose cemetery on Big Bear Ridge.

Mrs. Hollingsworth was a pioneer.

Rinkydinks Improve The 'Ole Swamin' Hole

A half-dozen red-blooded "Rinkydinks" invaded the business houses Wednesday, soliciting aid to help them put in a springboard at the swimming hole near the depot. Their enthusiastic expectations met with ready response, nearly five dollars being contributed in a few minutes.

Who can resist the appeal of a group of freckle-faced, clear-eyed lads for such a cause—and who would want to resist it if he could?

Minister Surprised

Rev. N. E. Frankin was pleasantly surprised Sunday evening when a group of his parishioners from Kendrick walked, unannounced, into the church at Lapwai. They arrived just as the minister and his wife were singing a duet.

It is rumored that a goodly number of the members of the Lapwai congregation plan a return visit at the Kendrick church soon.

Parsons Leaves University

L. F. Parsons, for eleven years executive secretary of the University of Idaho, has resigned to become executive secretary of the Idaho Chamber of Commerce. Mr. Parsons will succeed Ralph Thomas whose resignation becomes effective September 1.

Ship 70 Carloads Cherries

Now that the final shipments of cherries from the Lewiston orchards are being made, it is known that they will approximately 70 carloads. This is 22 cars more than the shipments for last year. The picking, hauling, packing and shipping involved an expense of \$30,000, distributed among 500 to 600 men, women, boys and girls. Some of the shipments were sold for cash but more of them on consignment. The exact returns will not be known till near the end of July.

Linden News

Mrs. Gus Farrington and children, Mrs. Bess Keeler and Grandma Keeler spent Sunday with Annie Morrison.

Mrs. E. L. Mitchell returned to her home at Newport, Wash., Thursday, after spending a few weeks with her sister, Miss Eva Smith.

Mr. and Mrs. L. B. Vaughan of Milton, Oregon, called on several families of the ridge Wednesday.

Mrs. Emma Longfellow visited with Mrs. Kunes in Lewiston, Lewiston, Monday.

Mr. and Mrs. C. E. Harris and family visited relatives in Lewiston the first of the week.

The ridge was well represented at the camp meeting near Southwick, Sunday.

Mr. and Mrs. Edgar Bohn and daughter of Park attended the show here Saturday evening and visited with relatives.

A number of Miss Whybarks friends gave her a very pleasant surprise birthday picnic dinner Sunday and a good time was reported by all.

Guests at Ameling's

Guests at the home of Mr. and Mrs. Harry Ameling of American Ridge, during the past week, were Mr. and Mrs. Don Falconer of Stockton, California, and Miss Thelma Neeley of San Francisco. The Falconers are friends of the Ameling family and Miss Neeley is a sister of Mrs. Ameling. Mr. and Mrs. Falconer left for Yellowstone Park yesterday.

Mrs. Ramey's Father Dies

A telegram was received here Sunday announcing the death of Mrs. Ramey's father in Florida. Mrs. Ramey was on a vacation trip to the Red River Hot Springs when the message came. It was relayed to her by phone.

Jeff Buckles of Agatha was in Kendrick yesterday morning on business.

Retired From Circulation

"What is your occupation?" asked the judge, sternly. "I haven't any," replied the prisoner. "I just circulate around." "Please note," said the judge to the clerk of the court, "that this gentleman is retired from circulation for thirty days."

Weed Warfare to Begin

Two tons of calcium chlorate (Altaicide) have arrived in Lewiston for use by farmers of Nez Perce County in their warfare against weeds. More of it will follow. A barrage of poison will begin, under the leadership of County Agent Thometz, when weeds are in full bloom.

Comments on Julietta Crops

A. W. Behrens, cashier of the Bank of Julietta, commenting last Tuesday on the crops in that region, estimated the returns on cherries alone at \$60,000 to \$70,000. He stated that there were 40 to 50 acres of melons, 30 to 40 acres of tomatoes, and 15 acres of beans. Without venturing a guess as to yields, he declared with the conservatism that is characteristic of a banker, that these crops never looked better than they do this year.

Speaking of dairying, Mr. Behrens remarked that eight or nine years ago when an occasional can of cream appeared at the station, it was an object of curiosity and a subject of comment. At present, however, there are as many as 250 cans per month shipped from Julietta in the spring of the year. It is Mr. Behrens opinion that the number of cows in this region will continue to grow for some time to come.

Youth Named in Will

Raymond Mathews, youthful murderer of his own father, is named in the father's will as one of the heirs. Officers say that if the lad is ever released from Orofino asylum, he will face murder charges.

Commissioner Finance Here

E. W. Porter, State Commissioner of Finance, was a visitor in Kendrick last Tuesday. He said he could not remember a time when the immediate future looked better in this part of the country than it does just now.

Julietta News

The Julietta cannery, under the management of F. W. Dustan & Son, began a run in beans Wednesday.

Mrs. Charles Talbot and sons, Richard and Charles, Jr., of Potlatch, arrived last week to visit for some time.

Mrs. Jack Heneox of Dayton, Wash., spent the week end visiting relatives.

Mrs. James E. Custer, S. Gruell, C. Gruell and M. Nutt spent Saturday in Lewiston.

Mrs. Sue Armstrong of Spokane is visiting at the Alexander and Adams homes.

Mr. and Mrs. Cecil Gruell, Mrs. M. Nutt, Ms. Frank Howell and son, Donald, and Mrs. Anna McGlynn enjoyed a beach party at the Clearwater beach below Arrow, Sunday evening.

Charles Levitt returned Saturday from Boise. Everyone is glad to see Charles here again.

Mr. and Mrs. Floyd Millard of Lewiston spent Sunday with Mr. and Mrs. Herb Millard.

E. W. Porter and family of Boise are visiting relatives here this week.

Albert Collins and wife of Lewiston spent Sunday at the B. Beard home.

A Dirty Shame

The proud mother of a promising son met some friends at a party. "By the way, Mrs. Johnson," inquired one, "how did your boy get on at his last examination?" "Not well at all. They had the nerve to ask him about things that happened before he was born."

Increases Fire Equipment

A Ford truck and two chemical tanks were purchased last week from the city of Waitsburg, Washington, by the village of Genesee.

Farm Bill Aid to Farmers

Farmers are expected to begin to benefit by the Farm Relief Bill this fall, according to plans President Hoover has made for stabilizing prices, handling surpluses and marketing crops. September 1 has been set as the time the newly created Federal Farm Bill is expected to be in full operation.

The action of Congress is passing the farm relief measure and in immediately appropriating \$151,150,000 to finance the Government's aid to farmers will insure Federal help in marketing all major crops this fall. The weeks between now and then will be required to establish the Federal Farm Board, its advisory councils, the necessary stabilization corporations and the warehouse associations.

The Government meanwhile will be utilizing all its machinery and the Farm Board the service of many experts to devise new markets for American farm products. Drives will be made by the Government to expand foreign markets and to create new demands for home products in this country.

All in all, the Government's aid will remove price-busting surpluses from the home market, encourage the organization of cooperative associations among farmers, provide modern marketing facilities for all producers, reduce the overhead costs of marketing any crop, and prevent waste and loss in the distribution of crops.

The whole relief organization was created, not to meet an emergency but to teach the American farmer how to organize—as has industry—and how to get the most of his crop.

Bumper Harvests at Julietta

The harvesting of a \$40,000 cherry crop at Julietta will be completed by the end of the week. Growers will then start picking a record crop of beans. According to Mr. Dustin, Clarkston cannery expert, the bean crop will approximate 13 tons. Overhauling of the cannery and the addition of new machinery, now underway, will put the big plant in readiness to handle the heavy yield. Large numbers of experienced local workers will be employed in harvesting and canning the beans.

Aided by favorable weather throughout the season, the tomato crop promises to be large and of excellent quality. Early estimates are that the crop will run from 400 to 500 tons.

The outlook for a melon crop also is promising. By the last week in August or soon after cantaloupes and watermelons will be pouring forth for hundreds of miles around to sustain the name of this particular region as the melon center of north Idaho.

Truckman Killed by Train

Mike Honig, 31, living at Clarkia, was killed Friday afternoon when a truck he was driving was struck by Milwaukee & St. Paul train No. 103 near Bovill.

Mr. Honig was driving a truck loaded with lumber and evidently did not see the train, approaching from the north.

The accident happened at Crystal creek, 25 miles from Bovill. He was not dead when picked up by members of the train crew and was brought to the Bovill hospital by the train. He died about 30 minutes after being received at the hospital.

The dead man leaves a wife and baby.

Mrs. Peter Blake Killed

Mrs. Peter Blake, 23, of Ahsahka, was killed last Thursday when her car pitched to the bottom of the Clearwater Canyon about a mile from Ahsahka. A. H. Crox, Camas Prairie railroad engineer, discovered the accident while the body was still warm. Mrs. Blake was a niece of R. B. Parks of Leland.

P. G. Candler of Lewiston was transacting business in Kendrick yesterday.

SCHOOL OPENS SEPTEMBER 7th. GET READY!

This year Lewiston Business College had a big class of graduates; all got good office positions; some were offered choice four places. What we have done for others, we can do for you. Students may enter at any time. Write for Booklet-Picture stories of success. Established 25 years.

LEWISTON BUSINESS COLLEGE, Lewiston, Idaho

THE KENDRICK GAZETTE "The Pulse of The Potlatch"

Published every Friday at Kendrick Idaho, by
Rollien Dickerson
Independent in Politics

Subscription Price \$1.50

Entered at the Post Office at Kendrick as second class mail matter.

FAREWELL

Beginning with this issue of the Kendrick Gazette the paper is in charge of a new owner and publisher, Mr. Rollien S. Dickerson of Eugene, Oregon. That it is in good hands I firmly believe. If the people of this community will give it the same loyal support that it has had during past years, its success is assured. Mr. Dickerson has outstanding ability as a writer and will publish a paper that will take a prominent place in the newspapers of the state.

In saying farewell to my Gazette family, I do so with sincere regret. My work here for the past thirteen years has been full of interest and pleasure. In no other community will I ever find a finer class of people than all of you with whom I have been associated. I wish to take this means to thank you for your interest in the Gazette and for your co-operation in making it a success.

Mr. MacPherson, who has been with me these thirteen years, will go with me to the new location. We enjoy working together and feel that we will mutually benefit in our new plans. He has been a member of the local band for nearly fourteen years, one of the pioneer members. He has been active in social and civic affairs and has a host of friends here who will regret to see him leave.

I hope all of you will be as good to the new publisher as you have been to me. You will like him and I am sure he will take good care of the Gazette.

Ralph B. Knepper.

FORWARD

Beginning with this issue, we are taking over the ownership and operation of the Kendrick Gazette, including all its equipment and goodwill. The paper will continue as an independent organ devoted to the interests of Kendrick and the wonderful Potlatch country.

We are greatly impressed by the extent and variety of resources in northern Idaho, and we sincerely appreciate the opportunity to live in a region such as this. The productivity of the soil, the never-failing crops, the mildness of the climate, and the progressive attitude of the people point toward a still better future which it is our desire to hasten and to share. Our ambition is to make the Kendrick Gazette one of the best weeklies in Idaho. In our effort to realize this ambition, we respectfully solicit the same fine and full cooperation from the business men and farmers that they have so loyally given the paper during the thirteen years that it has been under Mr. Knepper's management.

We had hoped to retain Mr. MacPherson in the position which he has occupied for the past 14 years, but he prefers to follow, his employer, Mr. Knepper, wherever the latter may locate. For both Mr. Knepper and Mr. MacPherson to leave will be a disappointment to their many friends and a distinct loss to Kendrick. We are certain, however, that they take with them the good will and best wishes of everyone in this community.

Rollien Dickerson.

AN S. O. S. CALL

The new editor is a stranger and he finds himself handicapped in the search for news. He would greatly appreciate the kindness if the people of Kendrick and vicinity would phone or mail to the office any items of interest that may come to their attention. Several persons have volunteered already to do this. It is the editor's ambition to publish a good paper from the start, and he will be able to do so, with the community's cooperation.

OVERPRODUCTION OF CHERRIES

Although overproduction is a spectre which has haunted fruit-growers for many years in certain parts of the West, there are signs now of an expanding market that may well absorb all the good quality fruit that can be produced.

For example, a half carload of

cherries shipped to Mexico by the Wenatchee-Beebe Fruit Company a few weeks ago was so satisfactory that the Mexican dealer is loudly calling for more. Likewise a recent carload shipment by the same company to Springfield, Massachusetts, early in July, brought a wire from that distant city calling for a second carload of the high quality fruit. These facts prove the ability of local cherries to compete in eastern and in foreign markets.

There is only a limited area of the West that can produce a fine quality of Royal Anne, Bing, and Lambert. The Juliaetta and Lewiston areas are without doubt among the best. As this fact becomes better known in distant markets local cherries will command better prices, and a larger acreage can be planted, with confidence that the increased output will find a ready sale.

A CREAM STATION FOR KENDRICK

Although the Potlatch is not primarily a dairying country, the amount of cream shipped from this region has increased year by year slowly but steadily. In May of 1929 some 800 five-gallon cans left Kendrick by express and 100 cans by parcel post. Within another year or two the monthly shipments in the spring of the year may well exceed 1000 cans, representing a value of \$6,000.00. Such a sum, flowing somewhat steadily month by month into the community, would help to stabilize business and to neutralize the ill effects of uneven crops from year to year.

If a cream station could be established here it would to some extent stimulate cream production. Some of the cream that is now being shipped at other points would come to Kendrick instead. Farmers would be able to observe the testing of their cream, which at present they cannot do. Later, doubtless, a creamery would develop, which, in turn, would still further stimulate the basic industry of dairying.

At least one experienced creamery man at the present time has his eye on Kendrick as a possible opening for either a cream station or a creamery. Such encouragement as the business men may see fit to extend to him will pay handsome dividends.

M. E. CHURCH NOTICE

Zion — Juliaetta

Divine services in the German language. Sunday school at 1:30 p. m. and worship at 2 p. m.
Otto G. Ehlen, Pastor.

PRESBYTERIAN CHURCH

Regular services next Sunday. Sunday school at 10 a. m. and preaching at 11 a. m. Everybody welcome.

N. E. Franklin, Pastor.

Advice handed out by Walt Mason: "Get married, then, Jemina, dear: don't fiddle with a cheap career. Select a man who's true and good, whose head is not composed of wood, a man who's sound in wind and limb, then round him up and marry him. Oh, rush him to the altar rail, nor heed his protest or his wail. 'This is,' you'll say when he's been won, 'the best days work I've ever done.'"

A Weighty Question

It's hard for a woman to understand statistics," said a man to a neighbor. "Yeah? What makes you think so?" asked the neighbor. "Well, I told my wife the other night," he explained, "that for every passenger the railways of this country transported two tons of freight. She wanted to know why the passengers were allowed to carry so much baggage."

It's too bad the old fashioned father who thinks that his six-year old son is the most foolish thing the world has produced, can't remember back to the days when he was sixteen himself.

Largest Water Bird

The albatross is the largest of the water birds, its wings often measuring more than 10 feet from tip to tip. It lives mostly on the wing, following a ship for days, lighting on the water only to snatch a bite of food.

Oldest National Forest

The Shoshone forest is the oldest national forest in the United States, and the largest in the Rocky mountain district. It was first reserved with Yellowstone park, and in 1902 was proclaimed a national forest.

London Gets Photoradiogram From San Francisco

The transmission of the first commercial photoradiogram from San Francisco to London, utilizing the new transcontinental radio circuit which Mayor Walker of New York opened, was announced by R. C. A. Communications, Inc. The picture, shown above, was posed and developed in the Hollywood studios of Radio Pictures, the motion picture producing organization of R-K-O, rushed by airplane to San Francisco, and there filed for transmission to London, via New York. This feat marked the first time that a photograph has traversed a distance of approximately 6,000 miles to its destination, in commercial radio transmission. The photograph shows Henry Didot, French consul at Los Angeles, and Henry Bancroft-Livingston, English vice consul of the same city, with Bebe Daniels and Betty Compson grouped around a representation of the northern hemisphere topped by a radio tower.

a precaution to those administering treatment. The drench may go into the cow's lungs and the tapes may cause the teats to slough off. The theory that some dairymen have tried adding a little molasses to the cow's ration four to six weeks before calving has been found to be effective in some cases in preventing milk fever.

The characteristic position of the cow affected with milk fever is lying down with her feet extended forward under her body and her head turned backward toward her flank. There is generally a crook in the animal's neck resembling the letter S. Later the cow will become unconscious and stretch out full length on her side if she is not properly treated.

Calf Scours Is Usually Caused by Indigestion

Calf scours is a common disease of the digestive tract and is usually caused by indigestion. The calf that scours easily in life may be seriously handicapped and of course sometimes dies. Prevention is best but not always possible. Care should be taken that the calf is not overfed, that the milk is always fed warm, and that the milk is uniformly sweet and fed from clean buckets. If scours occur, cut the milk down one-half and give a dose of one to three ounces of castor oil or of mineral oil. Raw eggs may be used to correct the trouble. Two or three tablespoonfuls of lime water in the milk is sometimes effective.

Off-Flavored Milk Due to Bacteria in Pails

Bitter and off-flavored milk is generally caused by bacteria that enters the milk after it is drawn from the cow. A careful sterilization of every utensil that comes in touch with the milk will probably eliminate the trouble.

It is suggested by the University of Kentucky, in case of bad flavored milk, that a sample of normal flavored milk that has soured, be added to the bucket at the time of the milking. This will enable the normal bacteria to gain the supremacy in the milk and will again bring it back to its normal flavor.

Stimulate Milk Flow

When cows are stabled much of the time the udders and rear quarters usually become more or less soiled. This can be prevented in a measure by clipping the long hair around those parts but even then frequent washing is necessary. If the best quality of

Waste to Market Poor Vegetables

If Not Good When They Leave Ground Never Will Be Any Better.

Vegetables that are not good when they leave the field will never be any better, according to Paul Work of the New York State College of Agriculture. It does not pay to put poor vegetables on the market. For the good of both the producer and the consumer poor stuff should be plowed under for fertilizer or fed to live stock and not dumped on the vegetable market.

Grading Pays.

Careful grading of vegetables pays. When the produce merchant or the customer sees poor specimens of vegetables or fruit in a carload or a basket, he judges the whole lot to be poor in quality. The buyer assumes that there is more of the worst than he sees, and he therefore uses the defective specimens to make the seller lower his price. The cost of marketing is so great that low grade vegetables are seldom worth shipping or taking to market.

Less Storage.

Storage of vegetables is less important than formerly because shipping under refrigeration has improved. The movement of products to market over long distances and during all seasons of the year has reduced the need for long time storage. However, the fluctuation of prices from day to day and the eagerness of merchants as well as growers to catch the best prices has increased the use of storage plants for short periods. Refrigerated storage is used more because it keeps the vegetables in the best condition. Burying vegetables in pits and other forms of outdoor storage are rapidly going out of use.

Different With Romance

A La Grande high school student has made an interesting, if not original, discovery. In the world of science, he says, light means heat—but not so in the world of romance.—La Grand Observer.

milk is to be produced the udder should be washed before each milking. One man should go through the barn with a soft cloth and a pail of warm water doing this just before milking is started.

Study Insecticides in Corn-Borer Plan

Some Chance of Securing Control Measure for Pest.

(Prepared by the United States Department of Agriculture.)

The likelihood of effective control of the European corn borer on a large scale by direct applications of insecticides is remote; nevertheless, the possibility of such control is worth investigating in the hope that something of value in this direction may develop, says the United States Department of Agriculture. Moreover, there is some chance of securing a control which may be practical for the protection of small plots of corn grown for the production of roasting ears for market or table use. A study of the possibility of the use of insecticides and moth attractants has been a phase of the corn-borer research program almost from the start.

In the 1929 research program for corn-borer control there will be close co-operation between the insecticide division of the bureau of chemistry and soils and the bureau of entomology, and also with various state workers and the Dominion of Canada. The development of new insecticides for corn-borer control is one of the primary objectives of this division, which has already made many analyses of insecticidal materials and of plants which have been sprayed or dusted with insecticides, to determine the residue left thereon.

The bureau of entomology plans to make a number of experimental tests with the usual insecticidal materials and the newer ones recommended, including tests of toxicity, adhesiveness, number of applications, plant tolerance, compatible combinations, and costs. The method of application of each of these materials and the number of applications with reference to the stage of development of the plant and the insect, and in relation to meteorological conditions, are points of importance.

Burial in Arlington

A President of the United States is not eligible for burial in Arlington cemetery unless he has had active military service.

May Be Great Comfort

A cultured man has a lot of information that doesn't make him money, but enables him to understand what is going on in the world.—Terre Haute Tribune.

DAIRY

PUT POLISH ON COWS FOR SHOW

Animals Should Be Blanketed and Tied in Cool Barn.

Cattle which are to wear blue ribbons at the county or state fair this fall, should have the fine polish put on their appearance, according to the specialists in dairying and animal husbandry at the Ohio State university. After the animals to be shown have

been selected, the specialists say, they should be tied in a cool, dark barn, and should be blanketed, and that within the next few days, not just a week or so before the fair at which they are to be shown.

Before their blankets are put on, the prize-winners-to-be should have a bath, in water which is not too cold. If they have not shed their long, rough hair, it should be clipped at once, so that their coats will be smooth by fair time.

Their tails, necks and heads should be clipped again about a week before the fair, and their horns polished at the same time. They should be groomed and rubbed down daily.

Animals should be in good flesh to show well. If rapid gains in flesh must be made, a little molasses along with their grain mixture may help. Soaked beet pulp will also help in putting them into condition. Bulky feeds, rather than highly concentrated ones, are better in fitting show ani-

mals for the ring.

Every day the animals should be led into the open for a little exercise and to be trained in posing for the judges. "The benefits derived from showing at fairs are not measured by the premium money received, but by the education, acquaintance, and advertising that one gets," say the specialists.

Milk Fever Treatment Given by Nebraska Man

Inflating a cow's udder with sterile air from a regular milk fever outfit when signs of milk fever first appear, and tying the teats with broad tapes just tight enough to retain the air is the most effective treatment known for milk fever, says Dr. L. V. Skidmore, Nebraska College of Agriculture, Lincoln.

Never drench the cow with any liquid or allow the tapes to remain on the teats more than 20 minutes, is

LIVE STOCK

POTATOES RIGHT FOR LIVE STOCK

Rations Are Generally Comparable to Corn Silage.

Potatoes make a good succulent feed for all classes of live stock when fed as a part of the ration, declares E. J. Maynard, associate animal husbandman for the Colorado Agricultural college experiment station in a new bulletin just issued on "Potatoes For Live Stock."

Copies of this bulletin may be obtained free of charge by writing the extension service of the college.

Subjects discussed in the booklet include preparation for feeding, potato ensilage, potatoes and potato silage for sheep, potatoes for dairy cows, swine and horses.

The bulletin is summarized as follows:

Potatoes fed in live stock rations are generally comparable to good corn silage.

Potatoes may be fed raw to cattle, sheep, horses and swine, but are best cooked for swine. Raw potatoes have only 23 the value of cooked potatoes fed to pigs. Raw potatoes proved to be as good as cooked potatoes fed to dairy cows.

Raw potatoes may safely constitute one-half the dry matter in rations for cattle and sheep and one-fourth the dry matter in rations for horses. Cooked or raw potatoes should not replace more than one-half the grain allowance in fattening pigs.

Raw potatoes fed to dairy cows at the rate of from 25 to 35 pounds daily have actually increased milk production, but larger amounts will taint the milk, cause a salty butter and may cause indigestion and bloating.

The dry matter in potatoes is composed largely of starch, a carbohydrate valuable in both fattening and milk-producing operations.

Potatoes are low in protein, or growth-producing material and some protein concentrate or roughage should be fed with them.

Raw potatoes are best fed sliced through a root cutter. Frozen, rotted, or decayed potatoes may cause trouble if fed to live stock.

Raw potatoes have an acrid taste and tend to increase the flow of digestive juices. They should not be fed with other feeds that tend to irritate the digestive system and they should always be fed with caution.

Efficiency Is Key to Beef Feeder's Profit

Efficiency in feeding methods—not a wide margin between the prices paid for feeder cattle and the prices obtained for them on the market—are likely to determine the profit of the beef cattle feeder for the next few years, in the opinion of C. R. Arnold of the rural economics department of the Ohio State university.

However, Arnold believes the beef cattle outlook is at present favorable for the man who produces feeder cattle. It is also favorable for the man who can purchase calves and carry them through a large portion of their growing period, and then feed them out, providing he has an abundance of cheap pasture.

The market outlook for fat cattle does not appear favorable for the next three months, but may strengthen in the late summer, Arnold concludes after a study of figures on receipts of cattle thus far this year, and on the number of cattle now on farms in this and other states.

Best Hog Pasture

Some farmers are short of suitable land or believe that they cannot afford to use good crop land for hog pasture. Anyone who has efficiently used pasture and kept close check on the financial end of his business would testify that the average acre of farm land devoted to hog pasture will yield a return far in excess of that secured from crops of wheat, oats, corn, or hay. Where failures have been noted in the use of pasture, the evident cause was that of an attempt to make some rocky, barren, out-of-the-way piece of land grow the crop.

Before Sow Farrows

A day or so before each sow farrow she should be washed with warm water and a good laundry soap. After washing, the belly and udders should be rubbed with lard to keep the skin from cracking and becoming sore. She should then be put into a properly cleaned pen and left there until the pigs are farrowed. Clean straw, and not old litter scraped up around the pens, should be used for bedding.

Water for Ewes

Ewes with twins, getting a little extra grain food, drink a good deal more than ewes with single lambs getting no grain. The excessive call on the ewe by their lambs causes all the more drought on the system, and thence more thirst, naturally because there is not so much sap in that dietary as there is in green feed. Indeed, when the lambs get strong, they begin to drink even before they are weaned. If milk runs short and the herbage is dry through a spell of dry weather,

POULTRY

PASTURING GEESE ON CLEAN RANGE

As General Rule Fowls Are Given Freedom of Field.

The raising of geese has not been specialized like duck raising, for the reason that geese secure most of their feed by grazing. For this reason, geese are raised on most farms in comparatively small flocks. These facts are the principal reasons why geese raising offers an opportunity for most farmers to add another source of income to their spring poultry raising.

Geese may be pastured at the rate of 60 head to an acre, but, as a general rule, they are given free range. This is satisfactory so long as they are not numerous. However, if a large flock of geese is pastured on the regular pasture the live stock will not relish the pasture on account of the goose manure on the grass. Ordinarily, the number of geese raised on any one farm are not numerous enough to cause any trouble from this source.

Geese do not require a great deal of attention. After the first two weeks they are able to look after themselves if given a good range. The principal food of geese is grass, supplemented by insects and other low forms of animal life. If suitable range is not accessible it is not advisable to go into geese raising.

Houses that will protect the geese from rains in summer and from snow, cold winds and dampness in winter are the only essentials from the housing standpoint. Low, open front sheds are often used for this purpose. Care should be taken to see that the interior of the house is dry at all times. Geese like to swim and they will exercise in the snow practically all day, but they should have dry places to roost or they will contract rheumatism. The floor of such houses should be of earth. This should be covered with straw and renewed often enough so that it will be dry. A thin coating of sand often proves helpful in keeping the house dry.

Geese mate more successfully after they are two years of age than when mated earlier. This is more true of the females than of the males. Occasionally yearling geese will produce fertile eggs, but they cannot be depended upon. Small, undersized geese should not be used for breeding purposes. On the other hand, extra large, coarse geese are not as satisfactory as those of full development, but not so coarse. With most breeds the gander will mate with from three to four geese.

Ohio Station Advocates All-Mash Chick Ration

The rearing of chicks to maturity on an all-mash ration is a rather new venture in poultry keeping, and we shall have to take the word of those who have tried it as to its value. This system has been developed and advocated by the Ohio agricultural experiment station, at Wooster, and is fully described in a bulletin issued by this station. They state that they have found the method successful on their experimental farm and equally so in the hands of other poultrymen of the state. Some other stations, where it has been tried, discount these claims somewhat. There is no question as to the attractiveness of the plan and the results at the Ohio station should be sufficient to give warrant for trying it out.

Those who have followed the teaching of poultry experts over a considerable period of years have learned that there is little that can be considered as absolutely fixed, even in the seemingly fundamental principles of feeding and care. Revolutionary findings are apt at any time to upset long accepted practices. The all-mash ration should not have scratch grains added to it, since it combines in itself both the scratch and the mash and the addition of more scratch grain would unbalance it. That is, it would change the proportion of protein foods to the other ingredients and presumably lessen its value. An all-mash should be more coarsely ground than other mashes, to make it more palatable.

Raising Turkeys

Turkeys can be raised by artificial methods with less loss and more profit than by the hen-hatched and hen-brooded method. Each year the number of growing more than 20 or 30 per cent of the poult is become more difficult. That the association of turkeys and chickens is one of the leading causes for the heavy losses in baby poult and that turkeys can be raised in brooders and hatched in incubators are comparatively new developments in the turkey situation.

In Case of Roup

Should any of your flock begin to show symptoms of roup, no time should be lost in starting measures to prevent further spread. All houses, pens, coops and runs should be thoroughly cleaned and sprayed with a strong solution of a good coal tar disinfectant. Droppings, litter and trash of every description should be removed and burned. All unnecessary equipment of every kind should be removed from houses and yards and stored elsewhere.

Give Additional Feed to Pigs in a "Creep"

When about three weeks old, the pigs will begin to eat grain from their mother's trough. It is important that they be now supplied additional feed, where the sows cannot get at it. This is best done by providing a "creep" in a corner of the paddock or pasture, with openings of such size that the pigs can run in and out while the sows are excluded. At first a little cracked corn seems about the most palatable feed. Later they may be fed a suitable mixture of concentrates, either being hand-fed all they will clean up twice or three times a day or else being fed by means of a self-feeder. For young pigs skim milk and buttermilk are easily the best of all protein-rich feeds. Nothing else aids so greatly in keeping them growing lustily. The concentrates fed pigs at this time should consist of the farm grains, with a considerable proportion of protein-rich feeds like middling (standard middlings or preferably flour middlings), linseed meal, and tankage. If there is an abundance of skim milk or buttermilk, relatively little of other high-protein feeds need be used.

Labor's Great Purpose

Labor is life; from the inmost heart of the worker rises his God-given force, the sacred celestial Life-essence breathed into him by Almighty God; from his inmost heart awakens him to all nobleness—to all knowledge, self-knowledge and much else, as soon as Work fitly begins.—Carlyle.

FIRE

Do not neglect insuring your growing grain against fire. Costs less to insure your grain now than after you thrash. Remember a policy written at this time protects you until December 31st. Our rates—the very lowest.

HAIL

The hail season is now upon us. Insure your Wheat and Beans—rates low—protection assured.

Phone, write or call, we will give your insurance prompt and careful attention.

AUCTION SALE

I will sell at public auction at the old Raby place about one mile from Kendrick, the following described property. Sale starts at 1 o'clock sharp.

Saturday, July 20

LIVESTOCK

- One Guernsey Cow, age 10 years, will be fresh about the last of September
- One Jersey-Holstein Cow, age 3 years, giving milk.
- One good team, weight 2600, 10 and 11 years old.
- One saddle horse, age 12 years, weight 1000.

IMPLEMENTS

- One DeLavel cream separator.
 - One Buckeye breeder stove.
 - One Deering mower.
 - One 12 inch walking plow.
 - One saddle.
 - One McCormick rake.
 - 15 or 20 tons of hay.
 - One hack.
 - One set butt chain harness.
 - One 2-horse cultivator.
 - One 1-horse cultivator.
 - 100 White Leghorn hens
- Many other articles too numerous to mention.

Terms: All sums of \$20.00 cash. All over that amount bankable notes, bearing 10 per cent interest, due October 1, 1930.

Around the Farm
Drag the farm roads—let's save some auto repairs.
Use best seed obtainable. Poor seed is expensive at any price.
Put grease instead of oil on the farm machines when you store them. It is better because it stays put.
Southwick News

Pigs at Weaning Time Should Be Given Grain
Pigs at weaning time should be getting all the grain they will eat. The ration should include tankage or skim milk. With a good pasture on which to run, pigs should be getting a good start for market weight. Pigs which are doing well should make a pound a day gain in weight. Self-feeders are a convenient means for feeding corn and tankage, and the use of self-feeders results in as good and often better gains than the hand-feeding method. A self-feeder should keep the feed dry, keep feed before the pigs at all times, and prevent waste.

Treating Potato Seed Increases Usual Yield
Seed potatoes treated three or four weeks ahead of planting will show no delay in sprouting as is often the case with seed treated to kill disease organisms it may be carrying. Treating seed that is coming out of dormancy may cause it to become somewhat dormant again. Early treating gives the seed time to come out of dormancy and be ready to grow as soon as planted. Treating seed potatoes has increased the average yield 22 bushels per acre in the test plots conducted for the past eight years in Kansas.

Dusters Satisfactory in Fields for Killing Bugs
Dusters are fairly satisfactory in potato fields, for killing bugs. However, under most Nebraska conditions they are not nearly as satisfactory as they are in regions farther east. To be used most advantageously the dust should be put on when the plants are damp with dew and when there is little wind. It is not at all advisable to try to use a duster on a windy day. Consequently it is very desirable to dust the plants in the early portion of the day before the wind comes up.
—H. O. Werner, University of Nebraska.

Grinding Feed Does Not Increase Digestibility
For feeding dairy cattle, the grinding of a roughage will not increase its digestibility nor its value as a feed. Grinding coarse feeds may reduce waste by eliminating the coarse parts of the feed and may make the feed more palatable. When feed is high in

price, grinding may prove advantageous. Grinding coarse feed will not make the feed into a concentrated feed. Neither will grinding dry, coarse roughage make the feed as good as when put in the silo.

Select Turkey Breeders for Next Season's Crop
Before picking the Thanksgiving birds select the breeders for next year. Choose those birds which show good growth and development. The shanks should be heavy and fat and the legs well-set under the birds. A knocked condition reveals lack of vigor. Crooked keel bones are objectionable. They may be caused by poor feeding or they may be the result of breeding. If possible, do not keep birds with crooked keel bones for breeding purposes. In the colored varieties, turkey growers prefer birds with good color, but health and vigor are more important than color.

Application of Orchard Sprays to Save Fruit
Nearly everyone has read and appreciated the truthfulness of this terse sentence—"Save the Surface and Save all." This statement may be applied with equal effect and force to the application of orchard sprays. Like the paint on buildings and fences, sprays, when applied to the surface of the fruit and foliage at intervals of from twelve to fourteen days up until five or six weeks of harvest time, will save the surface from injury by insects and disease and may prove to be the best insurance against failure.

Southwick News
Howard Southwick and wife drove to Lewiston and back last Tuesday.
Homer and Charles Hayward drove to Stites, Monday, to see John Ritche who is ill at his home. He was reported as being seriously ill.
Doc Triplett has moved his family from Clarkston back to Southwick having sold his Clarkston property.
Mrs. Organ of Boise visited at the Nels Longeteig home last week.
Miss Binford of Dayton arrived here Monday evening to take up her work as pastor of the U. B. church.
Ed Kent and family and Clem Israel and family of Linden spent Sunday at the home of Pete Stamp.
John McIver left Tuesday for Roadene, Sask.
Harry Webster of Montana was a caller at the Harold Whiting home last week.
Pearl Cowger left Sunday for Orofino where she has employment.
Mrs. Harvey Bales of Grangeville spent a few days of last week with her parents.
Roy Douglas left Sunday for Elk River to work on the fire patrol.
A farewell party was given Monday night to Rev. Mathes and wife who are leaving for Clarkston this week.
Miss Nadine McCoy is spending this week with her sister in Leland.
Sunday guests at the home of Ben McCoy were Mr. France, Wilma Hanks and Elton McCoy and wife.
Funeral services were held at the M. E. church last Sunday for Walter Bateman who was killed at his home in Oregon last week by the bursting of a fly wheel on

a buzz saw. A large crowd of sorrowing friends were present. He leaves a wife and four children who have the sympathy of the community in their bereavement.
The families of Doc and Homer Betts enjoyed an outing in the timber last Sunday.
Camp meetings are still continuing for this week and much interest is being taken in them. The

REPAIRS

WE make a sincere effort always to have on hand an adequate stock of GENUINE IHC Repairs for McCormick-Deering Farm Operating Equipment. We are in position to meet every reasonable repair demand on short notice. Nevertheless, there are definite advantages to you in ordering your parts and repairing your machines during the slack season rather than when you are in desperate need of the machines.

We suggest that you look over your equipment and order your GENUINE IHC Repairs now.

POUR COOL WATER ON HEAD OF HOG

Ley Liquid on Animal's Body Will Do Much Harm.

When a hog gets overheated, pour cool water on his head, but not on his body, warns J. W. Wulchet, extension specialist in animal husbandry at Ohio State university. "Pouring water on the body of the hog is for some reason very likely to kill him," says Wulchet. "Pouring water on his head cools him off and helps him."

Hogs should be protected from any necessity for violent exercise during hot weather, Wulchet says. There should be no reason why they should be compelled to run about or even to move more than necessary. They should have plenty of shade, and cool water available at all times.

"The hog has very little natural protection from the sun, and consequently some artificial protection must be provided," says the specialist. "Natural shade probably is best, but it is not always available in the hog lot. Where it is available a covering about four feet from the ground and open on all four sides will usually prove satisfactory. In some localities it may be advisable to give additional protection on the side in the direction of the prevailing storms. The shelter need not be elaborate. Almost any sort of open framework over which straw, fodder, or similar material is placed, will suffice.

"Many hog men use a wallow as an additional protection against overheating. If properly constructed and handled, the wallow is a great aid. There is one possible objection to its use for the man who is shipping hogs in the summer time. The hogs which are accustomed to the wallow will suffer more severely when they are loaded in cars for shipment, and the loss from this cause will be greater than if the hogs had been insured to hot weather."

Covered Holy of Holies
The veil of the temple of Jerusalem was precisely the same as the original veil for the tabernacle built according to the specifications given by Moses, of blue, purple, and scarlet, and fine twisted linen. The exact dimensions of the veil are not given, but it was sufficient to cover, without any opening, the entire Holy of Holies, into which the high priest alone might enter.

JULY SPECIALS
