OFFICIAL PAPER OF LATAH COUNTY

VOLUME XXXIX

KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, SEPTEMBER 6, 1929

No. 36

N. IDAHO MAN BUYS RECORDER HERALD PLANT

RALPH B. KNEPPER OF KENDRICK, IDAHO, WILL TAKE OVER NEWSPAPER PLANT AND EQUIPMENT SEPT. 1.

The sale of the Recorder Herald newspaper plant and equipment was effected this week to Ralph B. Knepper of Kendrick, Idaho, who will take possession Sept. 1. The latter part of May the Knepper family of three made a trip into the Salmon river country and what they saw on that trip and what they had read of it convinced them that this was where they would like to establish a home. Correspondence with Mrs. Evelyn Melvin, who was on a vacation in New York state, made partial arrangement for the purchase, and since her return last Friday the deal has been completed.

Mr. Knepper has been editor and publisher of the Kendrick Gazette for the past fourteen years and previous to that time had had newspaper experience. By training and experience he is fitted to give the people of this community a splendid newspaper. He is a keen and true sportsman, the fishing, hunting, study of wild game and nature afforded in this section strongly attracting him to become a resident. He is interested in dairying, stock raising and kindred industries and realizes the worth of mining in any section so all industries of Lemhi county will receive due consideration from his pen.

Accompanying Mr. Knepper is E. O. MacPherson who has been for fourteen years operator and foreman of the mechanical department of the Gazette. Mr. and Mrs. Knepper and son, John, occupy Mrs. Melvin's house on the bar and the MacPherson family of four are domiciled in the Carlson home on the bar.

Mrs. Melvin expects to go to New York city as soon as possible and will take a course in topography in Columbia university expecting to continue in some branch of the newspaper work.—Recorder Herald, Salmon, Idaho.

NIMRODS BAG 32 BIRDS

Saturday evening a group of Kendrick sportsmen, including Martin Thomas, H. B. Thompson, E. H. Emery and Carl Emery, drove to the Wesley Thomas ranch on Central ridge, in search of grouse.

After staying overnight at the home of Wesley Thomas, the party were joined by Ben and Nora Callison, and by three men from Lewiston. Starting early, the hunters divided, one group working the Little Canyon territory, the other, the Big Canyon, till breakfast time.

After eating a wonderful breakfast prepared by Mrs. Howard Thomas, the party divided again, and with the aid of two fine setters and a spaniel, they hunted the ravines of Big Canyon, till the middle of the afternoon, when they assembled once more, and counted their birds. There were 32.

In the early morning the grouse were feeding in the fields on top of the ridges. Later they sought refuge on the canyon slopes. When searched out by the dogs, they sailed out and down toward the bottom of the canyon, and were thus taken on the wing.

Willie Mosquito—A man clapped his hands at Daddy.

Mother Mosquito—What if he did, pet?

Willie Mosquito—Yes, but Dad was in between them.—Smith's Weekly (Sydney).

SOME EXPRESSIONS FROM PATRONS

If there is anything we can do to help make the school a success, we hope the teachers, the school board, and the students will call upon us. We want them to know that we are one-hundred percent with them.—N. B. LONG & SON.

Here are our best wishes to teachers and children as they begin the new school year. May this be the most pleasant and successful term we have had in Kendrick in many years.—W. A. PERRYMAN.

Now that the teachers are all engaged and school ready to start it might be well for the parents and patrons of our district to do a little studying.

The teachers and scholars all want to make good, but they as well as the School Board appreciate the interest and cooperation of the public. Take a little time off and visit the school and see what is being accomplished. Don't sit at home and knock the school board and teachers or blame the scholars for poor grades.

No sane business man would hire a stranger to run his business and pay his salary without inspecting his work. Our school is a business proposition.—Geo. P. BARNUM.

We have noted with a sense of satisfaction the personnel of the faculty of the Kendrick School for the year now beginning. We trust that as the year progresses we will become better acquainted, and that our work shall be enjoyable, as we labor together to build in the minds of our young people intellectual and spiritual ideals.—Rev. CLAUDE W. GROTH.

Sometimes friction arises because teachers and parents do not learn to know each other. May we not express the hope that parents and teachers during the coming school year will become intimately acquainted and that there will develop such a complete and mutual understanding that all differences and causes of friction will disappear.—N. E. WALKER.

One thing that would help to make our school more successful is a curfew law. Children should be at home by nine o'clock, ready for a good night's rest in order that they may be in condition to study on the following day.—PAUL SCHULZE.

We are always glad when school re-opens because we feel that institutions of learning help greatly to elevate the standards of the world.

Yours for a successful year.—S. COOK.

Faculty and facilities good. Public spirit and good fellowship abundant. Harvested; the harvest will be excellent.—C. A. OPPENBORN.

We wish to extend to our teachers a hearty welcome and to assure them our full cooperation and support.—FRANK ELLIS.

FOOTBALL PROSPECTS

The prospects for a winning football team in the local camp aren't very bright at present. Kendrick started football for the first time last year and at best would be quite inexperienced. In addition several of the heavier players are lost either by graduation or transfer. Among those missing will be H. Richner, C. Woody, B. Jones D. Brocke, Ingle.

Among those who will return are: A. Foster, C. Davis, Charles Davis, W. Murey, George Bailey, W. Brocke, H. Dammarell, J. Plummer.

SUPT. W. C. JONES TELLS WHAT EDUCATION IS

APPEALS FOR COOPERATION OF SCHOOL, CHURCH AND HOME

Education and knowledge are often confused. Knowledge is the possession of facts. Education is the process of attaining knowledge. Education is not that which is found between the covers of a book. It is much broader and deeper. We are constantly being educated. If all the education we received was attained during a brief sojourn of four years in high school or college we would not have a great deal. During our school career we lay the foundation for the structure we are to erect. If the building is to be of a fine quality and long lived we should be careful to put in the best material and devote our most careful attention to the workmanship of the foundation.

Some students drop out of school after finishing the seventh or eighth grade, and others before receiving their high school diploma. They do not realize their mistake. Some of them argue that others have made a success without very much schooling. There are exceptions to every rule but they are few. The chance for success is much greater for the boy or girl who has received a high school or college diploma. The demand for young people with a high degree of training is constantly increasing. Why? because they have the foundation upon which they can build.

What is the purpose of a high school and college course? The aim is to train youth mentally, morally and physically, that they may become better members of society, more useful citizens.

During the last great war it was estimated by a certain writer that twenty percent of the drafted men from the mountainous part of Kentucky were illiterate. How could you expect such people to help run our government? They are citizens, they have the power to vote.

Statistics bear out the fact that immorality is highest among those poorly trained. Over fifty percent of the criminals come from the uneducated masses.

The development of mind and body seem to go hand in hand. Most schools have a system of physical culture and every school should have. Here again it has been found that the strong healthy boy or girl will develop more rapidly mentally.

The school, the church, and the home are the institutions that furnish material for the construction of the foundation. That material must be of a high quality. The school officers have a great task to perform when they select their teachers. They must look for instructors having a high degree of training and ones who are worthy examples for their children. Teachers must be able to train and discipline children and still command their admiration. These three institutions, the school, the church and the home, must contribute to make the work of the child interesting, because a child must be interested in his work if he is to receive full benefit from it.

Let us hope that Kendrick offers something worth while to its students.—W. C. JONES, Supt.

PATRONS EXTEND WELCOME TO TEACHERS AND STUDENTS

CITIZENS DESIRE TO HELP MAKE SCHOOL YEAR SUCCESSFUL

CONTRIBUTIONS FROM THE BOARD OF EDUCATION

We expect to have a better school this year than ever before. Seldom have we been able to employ a faculty so uniformly good. We hope that students from the country surrounding Kendrick will appreciate the opportunity we are offering, and that they will take advantage of it.

Our business course is excellent. Very seldom is its equal found in a school the size of Kendrick's Mrs. Jarvis is efficient and has natural ability as a teacher of commercial courses.

Our domestic science teacher comes highly recommended. Besides being an efficient teacher she has special talent in dramatics and in girls' athletics, and in other extra-curricular activities.

An efficient faculty, well supported by patrons, assures a successful school year.—A. K. CARLSON, Chairman.

One thing that helps to make the school a success is the visiting of the school by patrons. Let us hope that during the term just ahead many fathers and mothers will remember to call occasionally at the building. This will encourage both teachers and children, and will help to make things move more smoothly.—E. H. EMERY.

SOME EXPRESSIONS FROM PATRONS

The high school attendance has quadrupled in the United States in the past twenty-five years. Every body wants to attend. There must be something valuable to be gained there. Hope the students of Kendrick High School will not miss any of it.—Dr. E. H. FIELD.

The school will soon be operating full force. We feel that the education that our children receive is something that cannot be destroyed. This training makes of them better citizens.

Let us boost the Kendrick High School.—E. A. DEOBALD.

Upon the shoulders of the growing generation rests the responsibility of the next. The school helps to build worthwhile citizens.

May Kendrick High School build for the future.—Dr. McKEEVER.

All work and no play makes our John a dull boy. The old saying still holds true to a certain extent. Every school should have a physical as well as an academic program.

We are back of the Kendrick School 100 percent.—Kendrick Dray and Ice Co., FRANK BOYD.

America's greatness is due largely to the incomparable efficiency of her teachers in the public schools. It is with pleasure we welcome our teachers to Kendrick and the rural districts about us, and hope they will find that friendly atmosphere so characteristic of the rural communities. It is our desire to make you as happy in your work here as possible, and trust you will enjoy your work immensely while here.—H. B. THOMPSON.

This is to wish the faculty, the students and the patrons a pleasant school year, and to express the hope that the relation between school and home may be cooperative and helpful. Kendrick has a good school; let us make it better. To this end you have our support.—RED CROSS PHARMACY.

A successful school depends largely on the mutual understanding and good will existing between parents and teachers. We extend to the faculty and students our best wishes and the promise to do what we can to make the school a success.—W. J. CARROLL.

Teachers help to mold both the mind and the character of boys and girls. Their influence on character is especially vital. May their example during the coming school year elevate and enoble the life and character of our young people.—E. H. DAMMARELL.

In behalf of our church we extend a welcome to teachers and students, and we wish to assure them of our cooperation and support. We extend a cordial invitation to attend services.

Judging by the information we have the future looks bright for the Kendrick schools.—Rev. N. E. FRANKLIN.

RETURN FROM THE YELLOWSTONE

Otto Schupfer and family returned last week from a twelve days vacation which took them thru Yellowstone park and Jackson's hole. They report that there were more people in the park during August than ever before. At one point Mr. Schupfer counted 42 sight-seeing buses, each carrying twelve to thirteen passengers.

At some points on the highway the oil was bad. It took two men four hours at Boise to clean Mr. Schupfer's oil-splattered car.

NEWSY ITEMS FROM NORTHERN IDAHO

SUMMARY OF EXCHANGES FOR BENEFIT OF GAZETTE READERS

The Orofino Mercantile Company has affiliated with a group of stores associated with Marshall Field and Company.

The State of Idaho has reduced its debt \$600,000 in two years.

Yellow jackets are so numerous in certain places near Orofino that they are completely consuming the berry crops.

The Winchester Reporter has been purchased by Mrs. O. C. Lodrea, owner of the Lewiston Banner, and the Winchester paper will hereafter be printed in the Banner offices.

Orangeville tax payers defeated a proposal street improvement bond election by a vote of 132 to 86 last week.

Central Idaho's bird hunting season opened Sunday, when blue grouse, ruffed grouse and native pheasants may be shot in Idaho, Nez Perce, Clearwater and Lewis counties for 20 days. The season will continue again on October 1 with opening of seasons of waterfowl.

The Craigmont Civic Club held their second annual Flower Show last Saturday.

Cottonwood is to have a boy's band within a few weeks.

Walter Flieger of Moscow, a high school student, has some corn that is over ten feet high. It has attracted much attention and has been the subject of favorable comment by farmers. The high school had raised the corn as a part of a Smith-Hughes project in agriculture.

Teddy Madison, 8 years, and Wayne Anderson, 13, performed the remarkable feat of swimming Snake River at Clarkston Beach last week. They started at a point where the river is 400 feet wide with the swift current perhaps 100 yards wide in the middle and a current of six miles per hour. Teddy had recently completed the course in swimming given by the Red Cross.

The apple market opened in Clarkston at \$1.25 per box, the highest price in recent years.

Oliver J. Smith produced just a fraction less than 93 bushels of wheat per acre on 9 acres, near Weiser.

An indignation meeting was held in Troy recently, to protest against Lewiston's adopting the slogan "Biggest Little Town on Earth." Several prominent citizens of Troy adopted a resolution protesting against Lewiston's action, on the ground that this is, and has been for 20 years, Troy's own.

Several building improvements are under way at the Lewiston normal, in preparation for the fall opening.

It is reported that a ten-foot vein of cooper, gold, silver, and lead ore has been opened up on the Pullman mining and Milling property at the junction of the Salmon and the Snake.

Boy Scout executives from Idaho, Washington, Oregon and Montana will convene at Hayden Lake, September 16, for a regional conference.

One hundred carloads of freight were shipped from Troy during August—grain, wood, lumber and peas.

The state of Idaho during the first six months of 1929, produced butter fat to the value of \$6,256,724. This is an increase of \$744,000 over the same period last year.

G. P. Mix of Moscow returned Sunday from a farmers' meeting at Twin Falls. He represented the northwest regional wheat growers, an organization recently formed at Pullman. At the Twin Falls meeting it

MOTION PICTURES TO ADVERTISE IDAHO

A motion picture film showing the resources, industries, points of historical interest, and places of recreation in Idaho is being prepared by the Idaho State Chamber of Commerce, it is announced by L. F. Parsons, secretary, in a letter to chambers of commerce in the state.

When completed the film will be used as a medium of advertising. It will be shown in all parts of the state free in order that Idaho people may know about all their state instead of the section in which they live. It will also be used for advertising purposes in other parts of the country.—Lewiston Tribune.

The misses Ray and Matilda Riley spent a few days at home last week, returning Saturday to Wawawai, Wash., where they are helping with fruit harvest. They were accompanied by Nadine and June Batty from Wawawai.

The Misses Hazel and Edna Stanton went to Troy and returned Friday.

C. A. Oppenborn made a business trip to Moscow Friday.

Ingh Stanton was a Moscow visitor Saturday.

Mrs. Percy Ware and daughter went to Lewiston Tuesday.

Miss Edna Stanton visited friends in Lewiston the first of the week.

Wedding Bells to Ring Soon

Complete plans for the marriage of the Widow Zander to Bimbo Gump are announced today. The ceremony, at which Major Hoople will officiate, will be performed in the Kendrick Theatre on Thursday evening, Sept. 12, at 8 o'clock, in the presence of as many people as the house will accommodate.

Bimbo and Henrietta will come by airplane, bringing with them a host of friends from Conierville, among which will be the Jiggs, Katzenjammer and Gump families, the Wallets, including Rachel, the Rinkey Dinks, Mary Gold and Tom Carr, and many other of the Elite.

Big hearted Uncle Bin and his fiancée extend invitations to the people of Kendrick and vicinity to attend this solemn affair.

All guests are requested to follow the following simple rules:

Do not laugh.
Do not applaud.
Do not let the babies cry.
"Goliath Gump will do plenty of that."

Have your kerchief ready in case you are moved to tears.

Keep your seat. Do not leave until this solemn ceremony is over, and you have kissed the bride, and tendered your sympathy to the groom.

SCHOOL DAYS AGAIN!

September days have rolled around and we are again about to match children and school and children and books together. Why? For their education. And what is education? The average person is apt to say, "It is what one gets in school."

But should the school, efficient as it is nowadays, be looked upon as the only educational factor in the children's lives? What of the influence of home, field, street...all the varied contacts of the child in the out-of-school hours which so far outnumber those actually spent in school? Older people know from experience how important are the impressions and observations of childhood in providing the right "set" for life. How difficult it is to tear away in later years from the things, good or bad, that father and mother, associates, or the community did to one as a child!

Next Monday the children will troop into Kendrick classrooms. The most we can ask of our school is that it share with us the task of building useful, purposeful lives. A corps of earnest teachers have assumed the responsibility of helping the boys to bet something out of school. The effectiveness of the educational effort will depend in large measure upon the loyal cooperation of parents and community.

A GREAT ADVENTURE FOR THE SIX-YEAR-OLD

There are great adventures in the life of everyone; and not the least of these is the child's first day at school. How he has looked forward to it all, conjuring up in his little mind the joy of working and playing with his fellows.

The zest of childhood,—what a wonderful thing it is. Every experience a thrill, every happening full of novelty and wonder. A kind of fairyland is this world of the child, full to overflowing with joyous expectancy and with innocent trust.

It matters little now that the novelty and thrill will one day turn to dull routine, and the cup that seemed so full will lose its flavor. It matters not that the innocent trustfulness of the little one will one day turn to disillusionment. Only this matters now: the great adventure lies just ahead,—school days are here.

Our best wishes go with you, little lady and little man, as you saunter forth with face aglow and heart aflutter, to the place of mystery on the hill!

JULIAETTA ITEMS

Needle Club Entertained

The Needleclub motored to Lewiston last Thursday, where they were entertained by Mrs. Dennis Buckallew. A two-course dinner was served at noon by the hostess and her daughter, Clarabell. (It used to be that Needleclub husbands ate in the kitchen; now they eat in the cellar.) The afternoon was spent in needle work and visiting. The members present were: Mesdames Cochran, Nutt, Alexander, Adams, Jones, Behrens, Biddison, Houck. Mrs. Cecil Gruell and Gladys Cochran were the invited guests.

—Steensma-Groseclose—

Miss Helen Steensma, daughter of Mr. and Mrs. P. J. Steensma of Moscow and George Groseclose, son of Mr. and Mrs. Jim Groseclose were married last Thursday afternoon at 4 P. M. The ceremony took place at the Tabor home in the Lewiston Orchards, and was performed by Rev. Lester Tabor, brother-in-law of the groom. Mr. and Mrs. Groseclose expect to make their home on Fix Ridge.

—Hayman-Wilcoxon—

Jessie Hayman and Edgar Wilcoxon, local depot agent, were quietly married at the Presbyterian Parsonage at Lewiston last Wednesday evening. Mr. and Mrs. Frank Rider accompanied them to Lewiston. Mrs. Wilcoxon's home has been in Spokane, where she has clerical in Kemp & Heberts Store for the past six years. They will make their home here.

NORTH IDAHO NEWS

(Continued from page 1)
was decided to form a similar organization, for Southern Idaho. A general conference of regional organizations will probably be held at Walla Walla soon, to lay plans whereby the farmers of the northwest may cooperate more fully with the federal farm board.

Two hundred cars of apples will be shipped from Lewiston in the next six weeks. It is estimated that shipments of apples from Idaho will aggregate 6,700 cars this year.

A new bureau will be inaugurated at the University of Idaho this fall for the purpose of offering advice to students along educational lines. An effort will be made, based on the latest scientific findings in psychology, to choose courses best adapted to the talents and probable vocational future of the individual student.

SURPRISE PARTY GIVEN ON BIG BEAR RIDGE

A week ago last Sunday the people of Big Bear ridge staged a surprise picnic at Slind's Grove, in honor of Zack Aas and family, who are leaving soon for Moscow. Ole Lien, brother of Mrs. Aas, took the Aas family for a ride up the ridge, and returned about 11 o'clock to the grove just in time to find the whole neighborhood assembled there to welcome them.

Rev. Mr. Hesby gave a talk in which he thanked Mr. and Mrs. Aas for their help in the church, and expressed appreciation especially of Mrs. Aas work as organist and as a member of the Ladies Aid. He then presented them with a sum of money contributed by friends as a token of their appreciation.

Mr. Aas, who has lived on the ridge for 25 years, has leased his farm to Ernest Jones. The family will move to Moscow, where Miss Elma will enter the University, Miss Martha, the junior high school, and Adolph the grade school.

Mr. Aas, in speaking of the picnic, said that he and his family greatly appreciate this fine demonstration of friendship and good will. He hates to move away from his old home and from his neighbors. "But I must educate my family," he said. "It is the biggest thing I can do for my children."

Miss Agnes Jones left for Gifford, Idaho Friday, where she will teach this coming year.

GILLIS D. HODGE APPOINTED JUDGE

Governor Baldrige appointed Gillis D. Hodge to succeed Judge E. C. Steele as judge of the second judicial district, according to a report which came Mr. Hodge acted as court reporter for 25 years' previous to his appointment to the judgeship.

Miss Helen Clem left Wednesday for Lewiston where she will enter the St. Joseph hospital to take training.

Thomas Ramey left on the afternoon train Wednesday for

his home at Gate City, Va., he has spent the last ten days at the home of his uncle, R. H. Ramey.

Mrs. Claus Eichner was a passenger for Spokane Wednesday to taken in the interstate fair.

Mr. and Mrs. Kester Dammarrell and children spent Sunday and Monday here visiting home-folks.

FOR SALE: New Zealand Red Rabbits. Call Mrs. Ellis, 196 36-2.

Grandpa in a speedy car, Pushed the throttle down too far to take training.

FOUR ROW BEAN CUTTER WORKS

W. F. BEHRENS, CLETRAC TRACTOR DEALER OF KENDRICK, has succeeded in harnessing a Cletrac to farm a crop of beans, absolutely without the use of a horse. Mr. Behrens says he has had a very profitable year, managing his business in Kendrick and as a side line planted 110 acres of beans on the May Farm near Leland which yielded a nice profit. Here is what Mr. Behrens has to say at this time.

"I have absolutely proven that a Cletrac can harvest a crop of beans, without the use of old 'Dobbin.' I have built four-row bean cultivators which we all know are a success. I have built a four-row bean cutter, which is also a big success. I just got thru cutting 110 acres of beans with it. This cutter pushes ahead the same as the cultivator and does much better work than a horse drawn cutter for several reasons: first it runs same depth all the time; second, on hill sides it is a wonder, for you all know a Cletrac crawler will not slip on hill sides. It does not matter whether thru ditches, uphill, down hill or on a 40 percent side hill it is all the same. There are no beans left uncut. In actual running time I cut down 110 acres of beans in 36 hours. Can you beat this? Besides it cuts and rakes into windrows all at one operation. The only trouble I experienced this year is; in using a rake behind the cutter the driver is in the middle and the soil being so dry it is almost impossible to see for dust. For that reason we used a team on the rake part of the time. There is money in beans, especially the way I farmed beans this year, besides we are using a Combine Harvester to thresh them, which is a great saving on our threshing bill. We simply change our cylinder speed on the Combine, drive up the rows, dump the straw in Windrows, and that is the end of the harvest. Our plans are all laid for the coming winter when we will manufacture bean cultivators and cutters in Kendrick. We will sell Cletracs, Tractors and between acts we will put in about 200 acres of beans next summer.

We have a full line of farm machinery, plows, drills, disks and repairs for Cletrac tractors.

Bring in your job—we fix 'em or no money.

We have on hand some used tractors priced right.

"EARL"

ALASKA, OUR SCENIC FRONTIER

By Rev. CLAUDE W. GROTH

Do you ever remember viewing a painting and then hearing this remark from your lips, "The coloring is too bright. The artist has overdone his tinting?" If that was your decision then, then any picture truly portraying landscapes, waters, & skies in Alaska would be given the same judgment by you,—unless you have been to Alaska and have seen the originals of these pictures. And in a case of this kind, even Sydney Lawrence, Dahlager, or Paul Zeigler, cannot match in beauty, brilliancy, and majesty, the glorious and glowing natural pictures painted by the Hand of God in Alaska. And this is paying high tribute to these artists.

I want to describe the scenery on Resurrection Bay near Seward, first of all. Think of a blue-green bay hemmed in by rugged, bold mountains, below the snowline of which grow vast forests of Alaska Spruce. Above this are the meadows which have a greenish-brown appearance in the summer time and even become reddish in early fall. But in winter-time

the snow covers all this while back in the vast and silent recesses of these kingly crags and jutting shoulders, one may see the great glaciers in outline only, and covered by a blanket of blue-white snow. And the morning and evening of the day, delight all who love beauty. Before the sun appears, and after he hides away behind these snow-covered barriers, there is a glow in the sky that is hard to describe. To the north the sky is leaden in color, this merges into a deep blue farther south, from that to a lavender, from that to primrose, from that to pink, old rose, orange, crimson, and sometimes the orange and crimson clouds are silhouetted in that color upon an apple-green or delicate yellow sky. The atmosphere is clear, everything stands out distinctly, and the round crater-shaped island in the Bay which is a good seven miles distant seems only one or two. To the northward lies the Bear River, which flows down into Resurrection Valley tower, more snow-covered peaks higher than those around Resurrection Bay. Resurrection Mountain stands out like a white sentinel a little to the Northwest. From just west of the Jesse Lee Home, Mountans, Taylor, Me-

Queen, and Marathon cast their mighty shadows across the valley from early afternoon until twilight.

Now let us go a long journey from there to Southeastern Alaska near Juneau, where we will be traveling on the Steamer along the "Inside passage." It is early morning and the fog is lifting. To the southward, one sees an expanse of water, then a heavy blanket of fog, and above the spruce-covered mountains that have the appearance of resting in the air. All around are magnificent fiords, inviting exploration among the blue mountains. The waters are so blue that the white sea-gulls have a blue appearance as they fly near the water.

Come again on a journey twenty-three miles north of Seward, at Kenai Lake. The lake is ordinarily peaceful, but when a storm comes up the waters are lashed by the wind in great fury. The lake occupies a depression where two canyons meet, and the two arms of the lake are at right angles to each other. When the clouds bank at the end of the western arm, and the sun shines through, casting a silver sheen over the waters, it is indeed a beautiful sight. To the southeast a tremendous mountain separates this valley from Snow River Valley, the abode of black and brown bears, mountain sheep, and moose. Seventeen miles north of here is a tiny lake, which reflects the mountains around, so perfectly that one could get a kodak picture of it and be unable to tell which portion of the picture was the reflection, and which was the real thing.

Perhaps the best known Nimrod in Alaska is Nellie Neal who has a roadhouse at Kenai Lake. She has had encounters with bears and mountain goats, has killed moose, and caribou.

One time she was hunting wild goats, saw several on the ridge above her. She fired and a goat fell, sliding down the opposite side of the ridge. She sprang after it in haste, and came over the summit so rapidly, that she did not see that it was only a short distance to a bluff over which the goat had fallen. She threw herself to the ground and dug toes and fingers into the loose shale, but didn't get stopped until her feet were about a foot over the edge of the precipice. It was a scary moment, she at last was able to climb back to safety.

At another time she had a very narrow escape from a hungry brown bear. He chased her to an old barn, where he kept her for an hour. Then he started away, but she ran to the house, obtained her rifle, and came back after him. By this time the bear had seen her and renewed his attack, but as he charged toward her, she shot him five times and then put another into the beast after he was down, for the sake of safety.

A garage man in Seward was out hunting with a double barrel shot-gun. It was getting dark and he had left camp and gone down by a nearby stream. Suddenly a bear loomed up before him in the dusk. He shot it at close range and it fell. But it soon was up and coming for him again. Again he fired, and again the bear went down. This time he retreated, reloading the gun as he did so, and then the bear was charging again. The third time that he fired, the bear fell and remained there. The man hastened back with a light to see the bear. But when they arrived there, there were two black bears lying dead very near each other and a third a short distance away. One charge from the shot-gun had killed a bear each time. I do not vouch for the truth of this story, but thus it was related to me.

One day while on a five-day vacation at Kenai Lake, by the aid of field-glasses we saw three bears chasing some mountain-sheep on one of the shoulders of a mountain. But the sheep ran away from the bears, climbing swiftly upward among the steep bluffs. At another time I saw a herd of mountain-sheep about twenty-six in number, feeding on a steep grass-covered incline just below the

snow-line. Mr. J. Dean King, of the Jesse Lee Home, was out hunting, one day last summer. A black bear came walking down the highway toward the stream. Mr. King went toward him until he was fifty yards from the bear, whereupon Bruin turned to retreat. As he did so, Mr. King fired. The bear gave two or three bounds and started in flight through some shrubbery by the side of the road. Mr. King ran in to "head him off," and they came upon each other from behind a bush. Mr. King fired, and this time he brought the bear down for good.

I was a party to several hunts while in Alaska and often long to go there again, and "get" that moose that I trailed and heard, but didn't catch sight of.

Great herds of caribou "trek" across the plain country around Fairbanks, (and it is believed that they number over a million) forth and back annually. Caribou steak has a finer flavor than any other meat the writer ever tasted. The caribou is not hard to kill, and of course they are protected by law enough to keep the herds from being depleted.

The greatest menace to the game of Alaska now is the presence of wolves and coyotes, but the Alaskan government through the Game Commission is taking steps to bring about their extermination. Mountain-sheep and goats, members of the antelope family suffer most perhaps from the wolves.

NEW PUBLICATION GIVES MONTHLY REVIEW FOR FARMERS

A new publication, "The Idaho Agricultural Situation," has recently made its first appearance. It is compiled and published thru the cooperative efforts of the University of Idaho, Idaho State Department of Agriculture and the U. S. Department of Agriculture. The aim of this service is, to give the producers and others directly interested reliable current economic and marketing information that will be of help to them in their situation. It is hoped that as this service grows and develops the information it contains will prove to be of increasing value and aid to the Idaho producer in solving his problems.

Following are some quotations from this report which will interest local farmers:

Wheat
The August first crop report of the U. S. Department of Agriculture gives an estimate of a total wheat crop in the United States of 773,885,000 bushels from the July first estimate. Conditions to date indicate the world production to be 3,350,000,000 bushels, or 515 million bushels less than last year. Should the world's crop turn out 500 million bushels less than last year, the world's supply would be 360 million bushels less than last year, allowing for the increased carryover. Allowing for the normal increase in world demand of about 70 million bushels, the world's supply would then be about 400 million bushels less than last year. With higher prices the disappearance of the supply or the world's consumption of wheat will not be as great as last year when the foreign trade in wheat was extremely large. The Idaho crop report for August as issued by the U. S. Department of Agriculture gives Idaho promise of 25,659,000 bushels of wheat. In 1928, 28,792,000 bushels were harvested.

Beans
It has been too dry for beans in Michigan, Montana, and some other States and prospects have declined somewhat notwithstanding the good rain in New Mexico. With an acreage above that harvested in any year since 1918, and with prospects for a yield close to the average of recent years, the crop is forecast at 17,626,000 bushels compared with 16,600,000 bushels last year. Idaho production is forecast 1,760,000 bushels compared with 1,47,000 last year.

Fed Angry Gods
Sailors of ancient Greece thought that storms at sea were caused by the anger of the gods, and to distract and please the deities they would throw pieces of bread into the sea

Clean clothes for SCHOOL

WHEN you are bothered with wearisome old-fashioned washday, how can you expect to send the children off to school with a cheery smile? Let us replace that washday frown with our laundry smile.

Rupture Shield
Expert Coming to Moscow
Wednesday and Thursday September 11 and 12. Moscow Hotel
from 10 a. m. to 4 p. m. Evenings by telephone appointment only TWO DAYS ONLY No Charge for Consultation
Mr. C. F. Redlich, the successful expert says:
The "Perfect Retention Shields" hold the rupture perfectly, no matter what position the body assumes or how heavy a weight you lift. They give instant relief, contract the opening in a remarkably short time and strengthen the weak tissues (the real cause of rupture) so that they frequently recover their previous natural retaining power, needing no further outside support. Each trouble, backache, constipation often caused by rupture promptly disappears. Truly remarkable results have been obtained not only with recent and old developed ruptures but with old, long neglected ones. Ingenious, recently developed devices are now holding ruptures firmly which have never had been retained. No elastic belts nor straps are used. I guarantee the durability of my absolutely sweat and moisture proof, sanitary appliances. 75% of ruptured hernias cover completely and prevent mechanical treatment according to statistics. Do not waste your money on widely advertised mechanical contraptions. You can cure yourself.
C. F. REDLICH, Rupture Specialist, Home Office, 530 Boston Block, Minneapolis, Minnesota.

We don't see how either Russia or China is going to be able to make the down payment on a 1929 model war.

Perhaps.
She kissed her husband very sweetly and didn't ask for a new hat, or a new coat, or a new dress; in fact, she kissed him for no reason at all. And he, poor fellow, sank to the floor, murmuring: "The thrill that comes but once in a lifetime."—Sour Owl.

To feel well you must eat well.

LOCAL NEWS

Mrs. Boyd was a Lewiston visitor Thursday.

Mr. and Mrs. Carol, their daughter Lida Jane, and Mrs. Carroll's brother, Marlow Haynes went to Leopold Creek, beyond Leland Saturday and camped over Sunday.

Mr. and Mrs. G. W. McKeever and daughter Paula went to Spokane Sunday. Dr. McKeever returned Tuesday A. M. but Mrs. McKeever and Paula will spend a week in Spokane visiting relatives and friends.

Mr. and Mrs. George Davidson and family went to Spokane Wednesday to attend the Fair.

Mr. and Mrs. John A. Becker and children of Nampa, Idaho, visited over the week end at the E. A. Deobald home. Mr. Becker is an older brother of Mrs. Deobald.

Mr. and Mrs. Elmer Bechtel from Moscow, Mr. and Mrs. Otto Schupfer and family, Mrs. Mary A. Deobald, and Mrs. Anna Bechtel picnicked in Lewiston Sunday.

Mrs. Mary A. Deobald had as dinner guests Wednesday evening Mr. and Mrs. Emery, Miss Green and Mr. Frank Broeke from Troy.

Mrs. H. B. Thompson returned from Spokane Monday. She met her mother, Mrs. Leshner there and had a short visit with her before Mrs. Leshner returned to her home in Kansas.

Mr. and Mrs. G. F. Walker motored to Lewiston, Pullman and home thru Moscow Thursday.

Mrs. Perryman has been helping her husband in his confectionery store evenings.

Mr. and Mrs. Reinmer from Spokane visited at the Chamberlin home over the week end. Mrs. Reinmer and Mrs. Chamberlin are sisters.

Mr. and Mrs. O. V. Morey and family have rented the Chamberlin house and will move in soon to put the children in school.

Harley and Clarence Perryman left Saturday for Ellensburg and other points where fairs will be held. They will conduct a concession at the fairs.

Mrs. Freytag has been very ill for the past week.

Mr. Bolon and his son James went hunting on the Rimrock Sunday. The week before they went fishing in Slate Creek on the Salmon River. They caught some good sized trout, James catching a cut-throat measuring fourteen inches.

Mr. Rider from Juliaetta is helping in the N. B. Long store. Mrs. Rider is taking care of the confectionary.

The Rebekah Lodge met Tuesday night in Fraternal Hall. Mrs. Elizabeth Cook and Mrs. Ed Long were elected delegates to the Grand Lodge at Burley, Idaho. Mrs. Lester Hill is deputy president.

Mrs. Ed Long entertained eighteen guests at an "Aid Society" dinner Thursday evening. Dinner was served cafeteria style and a good time was had by all.

The Misses Viola and Myrtle Gertje and Mr. Edwin Hillerud spent Sunday in Lewiston.

Mr. and Mrs. George Gertje of Russel Ridge were dinner guests Sunday of E. C. Gertje.

Miss Opal Jones left Tuesday for Lendore, Idaho, where she will teach the 4th, 5th and 6th grades in school there.

Mr. and Mrs. Egnaz Flaig and family from Orofino were visiting Mrs. Flaig's parents, Mr. and Mrs. Leith, over the week end.

Rev. Kunkel from Bovill held services in the Catholic church here Tuesday A. M.

Wilber and Howard Delano and their friend Mr. Dina Baker visited at the home of their parents over the week end.

Mrs. S. E. Alexander and two daughters, Bernadine and Merriam and Mr. Lawrence Donavan and Robert Truckey, all of Seattle, were visiting at the Plummer home Friday.

The Misses Ruby and Ethel Kink from Moscow spent Tuesday night with their aunt, Mrs. George Leith. They will teach up Cedar Creek at the Crescent and Cedar Ridge schools this winter.

Mr. and Mrs. Cecil Gruell are moving into Mrs. Sophia Taylor's house, on State Street.

Rev. Forbis left last week for Hagerman, Idaho, where his sister is seriously ill.

Miss Arta Groselose is visiting relatives before returning to Lewiston, where she will re-enter the Lewiston Normal. Miss Groselose will graduate after one more quarter's work.

Mr. and Mrs. J. DeBaum and daughter and Mr. and Mrs. J. Noble of Clarkston visited Mr. and Mrs. Will Noble last week.

Mr. and Mrs. Frank Daugherty and children are the guests of Mrs. E. V. Adams and Mrs. A. Alexander.

Mr. Cargill and wife purchased the Schupfer property in west Kendrick and moved from Juliaetta to their new home last week.

Miss Opal Jones is leaving for Learere, Idaho, where she will teach during the coming year.

Hester Knepper and Lizzie Jones were week end guests of Margaret McDowell. Miss Knepper has been visiting at the Jones home on Big Bear ridge since the middle of August. She will enter the Lewiston Normal next week.

Marlow Haines of Helena, Montana, will attend school here, making his home with his brother-in-law, W. J. Carroll.

Edwin Parish, who makes his home with W. C. Jones, will attend high school at Kendrick. He will work part time at Morgan's store.

Mrs. Ford Harvey and children arrived from Noxon, Montana, Monday. Her husband will follow in a few days. Mr. Harvey is a timber contractor, and if he can find the kind of a timber deal he wants, he and his family will locate here. He has been associated with the McFarland Company of Sandpoint for several years.

Mrs. Lula Buchanan's daughters, Mrs. Robt. Morgan of Potlatch and Mrs. Alice Moe of Spokane, returned to their homes last Sunday.

Mrs. Frank Rider and children visited in Orofino last week.

Mrs. E. V. Adams and son Keith returned from Wallace last Thursday.

Lee Houek was a Spokane visitor two days last week.

Mrs. Jess Cox and children of Lewiston spent a few days visiting at the George McClintic home.

Mr. and Mrs. D. E. Buckallew and children, of Lewiston spent Sunday and Monday in town.

Donald Miller of Moscow is staying with his grandmother, Mrs. T. O. Greene, and attending school.

Shrinkage in Weight of Shipping Steers

When steers are shipped to market there is always some shrinkage or loss in weight. By proper handling it is possible to reduce this loss. Steers which have been getting a full feed of corn and alfalfa hay should have their grain somewhat reduced a day or two before shipping and given mostly prairie hay or fodder in place of alfalfa. Steers which have been getting a good deal of silage should be fed dry fodder before shipment to market. Arrange to ship so that the cattle will arrive at the stock yards during the night or early in the morning so they can take on a fill before the buyers bid on them.

Live Stock Hints

Most men will do fairly well to keep an ordinary supply of live stock in good condition and, paying its way.

This year there is a nation-wide movement among sheep raisers to put on a docking and castrating campaign.

As in the case of all other live stock, care and attention are the main essentials in producing good hogs for early market.

A good hog often kept filled with old crank-case oil, diluted with coal oil, and a little coal tar dip added, will hold the lice in check and keep down mange or scurf.

CRESCENT CLIPPINGS

Quite a large fire has been burning for the last week or longer east of Crescent, on Alderman's Ridge. Fighters have been trying to extinguish it day and night, but so far haven't succeeded. Some of the logging camps north of here have all turned out—and a camp of about two hundred men is located at Mason Meadows. Several smaller fires have started after various electrical storms but are not serious.

The C. E. Harris family visited at the Abe Dorendorf home Sunday.

Mrs. William Kauder spent Saturday and Sunday with her daughter, Mrs. Leroy Southwick of Cream Ridge who has been ill.

Mrs. M. L. Robeson returned home Wednesday after staying a couple of weeks with her daughter, Mrs. Art Anderson of Agatha.

Wm. Kauder is helping John Darby stack oats this week.

Sue Robeson and Alice Cramer visited with Mrs. Axel Ekman Thursday.

Sunday guests at the Mike Forest home were Mrs. Anna Kimbley and children and Mr. and Mrs. Bell Dorendorf and children.

Mrs. M. L. Robeson and daughter, Sue, and Alice Cramer visited with Mrs. Geo. Lockhart Monday.

Mrs. Andrew Dorendorf and grandsons, Floyd and Teddy, and Mrs. Alfred Swanson visited at the Axel Swanson home Sunday afternoon.

The John Darby family visited Sunday afternoon at the Gus Farrington home.

W. L. Hunt spent Saturday night at the James Farrington home. Sunday Mrs. Farrington and son, and Ruth Hunt, who is staying with her sister, Mrs. Farrington, accompanied Mr. Hunt to C. Craig's home at Leland. Maude and Alice Hunt who have been visiting at that place, returned home with them.

FARM STOCK

CLEAN QUARTERS ARE MOST VITAL

Pigs Cannot Escape Parasites in Foul Pens.

Probably there is no more common or more serious parasite of domestic animals than the common roundworm of swine. These worms, says R. F. Bourne of the veterinary division, Colorado Agricultural college, ordinarily occur in the small intestines but are frequently found invading the adjacent organs, particularly the bile ducts of the liver.

It is practically impossible to raise pigs free from worms in quarters which have been used for hog raising for years because the soil is polluted with millions of eggs passed by animals of previous years, each egg containing a live embryo ready to launch its attack when ingested by the young pig. Because of this fact it is important that all farrowing pens be either located on clean ground or that they be thoroughly scrubbed with boiling water and lye. Ordinary antiseptics do no good in so far as destroying worm larvae is concerned.

Pigs born into a clean environment and kept free from contact with old infected pens escape the various hazards accompanying worm infestation. It is desirable to move them from these clean pens into open fields or pastures wherever this is possible and to keep them away from infected quarters until they are at least four or five months of age. A good deal can be accomplished by ordinary sanitary measures in removing the filth which accumulates in hog pens and in the use of sanitary wallows.

Removal of worms from adult pigs is best done by a qualified veterinarian since no simple treatment seems to be very effective.

Money in Raising Pigs by Saving Little Ones

The sure way to make money raising pigs is to save them. Every little pig that is lost increases the cost of those saved. Very commonly one-third to one-half the pigs farrowed die before weaning time. A pig at farrowing time is worth or has cost approximately \$3, and it pays well to keep as many of them alive as possible. Aim to be on hand when the sow farrows to see that everything goes well and that the little pigs get their first meal as soon as possible. Then, be sure they have a place to keep warm. Have a sand rail around the pen or a protected corner with most of the bedding in this protected place.

Miss Lucille Gruell entered _____ College in Lewiston, _____ Sunday.

YOUTH--AND THE NEW LEADERSHIP

By CRAIG B. HAZLEWOOD
President American Bankers Association

LEADERSHIP is a picturesque word. With it, one pictures Hannibal of the Alps—Napoleon in his campaign—or Washington holding together his half-frozen army by the sheer magnetism of his character at Valley Forge. But I visualize something that holds a more astounding spectacle in many respects than any of these.

Craig B. Hazlewood

It is the onrush of our business life. Our economic progress plunges ahead at a rate unheard of in the history of the nations of the world and every industrial and financial leader is daily brought face to face with new and perplexing problems requiring the highest courage and intelligence for their solution.

Ninety billions a year, they tell us, this country is now producing in new wealth. The rate of increase is even more staggering than the amount. It is difficult to say where it may lead us in even ten or fifteen years.

We are moving exceptionally fast. Our economic and industrial structure is placing before us problems of greater and greater magnitude. Few men can see far ahead. Few are in complete control, for this is a changing world, as even the most inexperienced business man will readily testify. Our methods of adjusting ourselves rapidly to economic changes and of cooperating are far from perfect.

Snow Houses in Labrador
The first known record of any snow houses built by Indians occurs among the Nakiapi of Labrador who were investigated recently by the Rawson-MacMillan expedition of the Field museum of Chicago.

Fruit Trees
Will fruit trees grow from seeds? Fruit trees will grow from seeds, but the varieties do not come true. A large proportion of seedling trees produce fruit of an inferior quality.—New York Telegram
