

## W. B. KINNE PASSES AT OROFINO

### LIEUTENANT GOVERNOR WAS NATIVE OF NORTH IDAHO

Orofino, Oct. 1.—W. B. Kinne, lieutenant governor of Idaho and recently acting governor in the absence of Governor H. C. Baldridge, succumbed to an attack of appendicitis and attendant streptococci poisoning at 7:12 o'clock.

The lieutenant governor, prominently mentioned as a leading candidate for governor in the next republican convention, was stricken with acute appendicitis Saturday night but an operation was not thought necessary until 8:30 Sunday morning. His condition was grave following the operation because of complications, but it was not believed that death was near.

#### Suffered Sinking Spell

Mr. Kinne rallied well Monday and hospital attendants said that he was apparently "on the road to recovery" and no great fears were felt for his life.

He suffered a sinking spell during today, however, which continued until the end. Throughout the long hours preceding death, Mr. Kinne was conscious and hopeful of an improvement that failed to come.

Mr. Kinne was thrown into state politics two years ago when Oscar E. Hailey of St. Maries decided he would not run a second time for lieutenant governor. Many persons believed Mr. Kinne would be Idaho's next governor, as the last two selections for chief executive—Moore and Baldridge—have been made from the lieutenant governor's office.—Lewiston Tribune.

### RECEPTION DRAWS LARGE CROWD

Reverend C. W. Groth of the Methodist Church returned a week ago Monday from the conference at Spokane to serve the Kendrick charge for another year. A reception for the minister and his wife was arranged for Sunday evening, and a goodly congregation greeted them at the service. After the service the crowd repaired to the basement and enjoyed refreshments and a social hour.

### REV. JAMES CARLOSS GREGORY

James Carloss Gregory was born in Michigan, Dec. 27, 1862, died Sept. 20, 1920, at the home of his daughter, Mrs. B. C. Reinikens.

Mr. Gregory was a member of the Oregon conference of the Methodist Episcopal Church. He served churches at Central Point, Springfield, Philomath, Gresham, and Lebanon, Oregon and at Southwick and Kendrick Idaho.

In 1929 he moved to Pasco, Wash., where he has since made his home. About 2 years ago his health began to fail and the everything was done to stop the ravages of disease, he passed away last Friday after four weeks in bed. Mrs. Gregory preceded him to the heavenly home on April 24, 1928. Funeral services were conducted at the Methodist Church in Pasco, with Dr. U. P. Hawk in charge. Interment was made in Pasco Cemetery beside the remains of Mrs. Gregory.

Mrs. Dave Waltz was a passenger to Moscow on the morning train Saturday.

C. A. Oppenborn transacted business in the probate court in Moscow Friday.

I. E. Foster is now employed as clerk in the Morgan Store.

Mr. and Mrs. M. O. Raby entertained Mr. and Mrs. Ira Bolon, Rev. and Mrs. C. W. Groth, and Mr. Millson at a chicken dinner Monday evening. After dinner the guests repaired to the parlor of the hotel and enjoyed the evening singing old-time gospel songs.

### WEDDING BELLS

Miss Muriel Crocker, daughter of Mr. and Mrs. Fred Crocker, of Kendrick, Idaho, and Mr. Seibert Hogarth of Genesee, Idaho were married Sunday afternoon, Sept. 29, 1929 at three thirty o'clock at the Congregational Parsonage at Lewiston, Idaho, by the Rev. Mr. Duker.

The bride wore a gown of white silk and carried a lovely bouquet. They had dinner at Mr. and Mrs. Louie Heingartner's at Clarkston, Wash.

The guests were: Mr. and Mrs. Louie Heingartner, Leo Heingartner, Mr. and Mrs. Oliver Clark.

The bride and groom will make their home on the Alexander ranch southeast of Genesee.

Their many friends wish them a long and happy life.

### McCOY—HANKS WEDDING

A very pretty wedding occurred Sunday at the home of Mr. and Mrs. Ben McCoy of Southwick, Idaho, when their daughter, Nadine was united in marriage with Wilmer Hanks of Lenore, Idaho. The wedding occurred at high noon. The bride was beautifully gowned in a pale blue georgette dress. The bridal couple were attended by Mae Grant and Russell Baker, as bridesmaid and best man. The home was decorated in pink and white, with a bower of evergreens in one corner, under which the bridal couple stood during the ceremony. The bride carried a bouquet of sweet peas while the bridesmaid had one of pink and white asters to blend with the pink silk flat crepe dress she wore.

Rev. Geo. F. Calvert, United Brethren minister from Clarkston, Wash., performed the ceremony. After the ceremony the many guests enjoyed the bounteous wedding dinner. Those present were: Nadine and Wilmer Hanks; Mae Grant, North Bend, B. C.; Geo. F. Calvert, Clarkston, Wash.; Mr. and Mrs. Lorin Miller and family of Lewiston, Idaho; Mr. and Mrs. Foster McPadden and baby of Cream Ridge, Idaho; Mr. and Mrs. Harry Smith and family, and Elma Moton, of Leland, Idaho; Mr. and Mrs. Joseph Hanks and family of Lenore, Idaho; and Russell Baker, Mr. and Mrs. Elton McCoy, Mr. and Mrs. Ben McCoy and daughter Eva, Mr. and Mrs. Homer Betts, Mr. and Mrs. George Jones and son Richard, Mrs. Eva Wright, and Miss Isabel Binford, all of Southwick, Idaho.

Many beautiful and useful presents were received by the bride as tokens of the well wishes of her friends. The young couple will make their home at Lenore, Idaho.

### BALDRIDGE ASKS SUPPORT OF FIRE PREVENTION WEEK

Boise—Governor H. C. Baldridge proclaimed the week beginning October 6 as fire prevention week, and urged citizens to sponsor a campaign of education that would end down the havoc created each year by fire.

"The pall of smoke which hung low over the entire northwest for several weeks past, impressed more forcibly than words may do the desolation wrought by fire," he said. "Human lives, homes, farms, an uncounted number of wild animals of the woods, and hundreds of thousands of acres of forests have been swept away."

Mrs. Charlie Flaig returned to bed home at Orofino Thursday after spending a few days with her parents here. Mr. and Mrs. Geoff Leith.

Mrs. Delano went to Juliaetta Tuesday.

Miss Blanch Aiken went to Orofino Tuesday.

Mrs. Hugh Stanton returned home Sunday after spending a week with her parents near Greer.

Albert Moseap of Spokane is visiting at the home of C. C. Blackburn for a few days.

Having been in the mercantile business in Kendrick for the past eighteen years, we have formed an attachment to this community and to our friends here which makes it painful indeed for us to sever our business relations. Kendrick is a delightful community, and we are glad that it has been our privilege to live here so long.

Now that our store is passing into other hands, we wish to commend the new management to our patrons. We know that the new institution will prove a worthy successor to the store that has served the community for so many years. We wish also to extend a message of sincere thanks to our many loyal patrons and to bid them cordial farewell.

—E. H. DAMMARELL and FAMILY

### CAR PLUNGES OFF GRADE

#### FRANK BYERS SEVERELY HURT

Monday evening a Star touring car driven by Frank Byers, 16 years of age, plunged from the Big Bear ridge road, near the Galloway place, turned over eight or ten times, and landed far below, in a complete wreck.

Frank's collar bone was cracked and two ribs were torn from their spinal attachments. His brother and sister, who were in the car, received only a few minor bruises.

The wreck was discovered at five o'clock by Claude Jones, soon after it occurred. Mr. Jones, extracted the injured boy from his position, wedged between two willows, and brought him to Kendrick. He remained under Dr. Field's care Monday night. Tuesday he was taken to St. Joseph's hospital in Lewiston. It is expected that he will recover.

### FIX RIDGE NEWS

Mrs. Charles Delano celebrated her forty-first birthday anniversary with the Taber and Groseclose families.

Rev. L. E. Tabor was appointed Bible Class teacher at Kendrick. The New Testament will be studied for three months.

### LINDEN

Mr. and Mrs. Weyen of near Spokane spent the week end with their son Weyen and family.

Mr. Ed Darby returned from a two-week's trip to California recently. He went down with his son, Walter, who had been home on a visit.

The Messrs. H. J. Starr and H. F. Forberg went to Libby, Montana, Friday, returning home Sunday.

Mrs. Jim Garner came down from Elk River Thursday to spend a few days with her son George and family.

Sunday callers at the George Garner home were: Mrs. McPhee and son, Cleve; Mr. and Mrs. Edgar Bohm and Mr. and Mrs. Claud Pippinger.

Mr. and Mrs. Frank Ellis of Kendrick were dinner guests at the Allen home Sunday.

Mr. and Mrs. Ed Darby visited their daughter, Lueille, in Moscow a week ago Saturday.

Mrs. Hunt and son, Louis, spent Monday with Mrs. George Garner, Aunt Carrie Allen and Mrs. Mitchell spent Monday afternoon with her.

Mrs. Longfellow is staying in Kendrick with her grandsons, Dan and Raymond Lyons.

Mrs. McPhee and son Cleve, Mrs. Edgar Bohm and daughter Alfreda, and Miss Fay Pippinger left Tuesday morning for Milton, Oregon, for a visit with old friends.

### RUMMAGE SALE

Methodist Ladies' Aid are having a Rummage Sale, Oct. 12, in the vacant store room of the Kendrick Hotel.

Anyone having Old Clothes, Fruit, or other articles they wish to donate, kindly take them to Mrs. Herman Schupfer's home.

### MR. MILLSON A RELATIVE OF WM. J. BRYAN

It will be of interest to the people of Kendrick to learn that Mr. Millson, who has been in charge of the Kendrick Store Sale for the past several weeks, is a nephew of William Jennings Bryan. His mother was Mr. Bryan's sister. The watch chain which he is wearing—a stone encircled by a gold band—is the one which Mr. Bryan displayed on his vest when he was waging the great and bitterly contested campaign for free silver in 1896. Mr. Millson traveled with Mr. Bryan in several of his campaigns and speaking tours.

It may not be amiss to remark that Mr. Millson's features, particularly the nose, the forehead and the mouth, show a distinct resemblance to Wm. Bryan's features, as anyone can readily see, who knew Mr. Bryan.

### KENDRICK TEACHERS ENTERTAINED AT PRES- BYTERIAN CHURCH

The teachers of the Kendrick school were entertained and welcomed Wednesday evening at an informal reception sponsored by the Presbyterian congregation. Following a social hour and a get-acquainted meeting in the basement the large crowd repaired to the auditorium of the church to enjoy a musical program.

Reverend Mr. Franklin, pastor, speaking not in behalf of his congregation alone, but in behalf of everyone present, extended a welcome to the teachers and pledged cooperation and support to the school. Supt. W. C. Jones responded in well chosen words.

Harold Thomas, accompanied by Mrs. Thomas at the piano, delighted the crowd with two solos on the flute. Mrs. C. W. Groth entertained at the piano, and she and Mr. Millson brought the evening's entertainment to a pleasing climax by singing two beautiful songs. The committee in charge, Mrs. Helpman, Mrs. Harold Thomas, Mrs. Leith and Mrs. Emery, deserve a great deal of credit for the careful manner in which they planned the reception.

### JULIAETTA ITEMS

Mr. and Mrs. Will Noble have returned from a two week's trip to Ohio. Mrs. Noble's father, who died recently, was taken there for burial.

Everett Custer was a Lewiston visitor Tuesday and Wednesday.

Mr. and Mrs. Fisher, who have been living in the Larkin's house for the past few weeks, are moving to Rosalia. Mr. Fisher will be the section boss at that place. Mr. Walsh will return here for awhile.

Mrs. M. Nutt and Mrs. Cecil Gruell were shoppers at Lewiston last Friday.

Tom Fox visited his daughter, Mrs. Paul Doodruff, at Elk River for a few days.

Mrs. Jack Heacock of Dayton, is spending a few days at her parents home, Mr. and Mrs. J. Behrens.

Rev. and Mrs. Forbis of Sweetwater are here this week. Rev. Forbis will preach at the M. E. Church on Sunday.

Mrs. T. O. Greene and grandson and brother spent Friday in Lewiston.

Mr. and Mrs. D. E. Buckalover and children of Lewiston visited here Sunday.

Tom Fox and Wick Kite left the first of the week for Wenatchee.

Mrs. Ed Gallaher and daughter, Cleta, visited relatives at Kamiah. They returned the first of the week.

Charles Leavitt and Mike Nye have gone to Wenatchee for apple harvest.

Mrs. Walter Cochran was a business visitor in Lewiston, Thursday.

## NEWSY ITEMS FROM NORTHERN IDAHO

### SUMMARY OF EXCHANGES FOR BENEFIT OF GAZETTE READERS

The Vandals defeated Montana State by a score of 39 to 6, at Moscow Saturday, in the first football game of the year.

Federal agents have caught a thief in Wisconsin who stole an auto in Bovil last summer.

Surfacing of the Nezperce-Orofino highway started Thursday and will be completed by the middle of November.

Two national forests—the Clearwater and the Nez Perce—were opened to big game hunting Tuesday. The Selway will remain closed awaiting a heavy fall of rain. Hunting of deer and elk will last 45 days, ending November 15. A rush of hunters into the Elk City country was going on Sunday and Monday.

Do Idahoans favor a proposed 13 month year, or a year of 12 months, eight of 30 days and four of 31 days? Members of the state Chamber of Commerce will vote on this question soon, so that the National Chamber at Washington D. C., may know what the sentiment of Idahoans is in regard to the question.

R. W. Lind of the University of Colorado has been chosen to succeed L. P. Parsons as supervisor of buildings and grounds at the University of Idaho.

A big Graham-Paige sedan left the road near White Bird last week, and tumbled a thousand feet without injuring its occupants, though the car was converted into a mass of wreckage.

\$500,000 was spent on construction work in Lewiston during the first nine months of 1929.

Petitions are being circulated in Lewiston and Nez Perce county for a county fair to be held in Lewiston next fall.

One hundred carloads of lambs have been shipped out of central Idaho in the past two weeks.

Clearwater County's annual fair is being held at Orofino this week. Friday and Saturday of this week. All space intended for exhibits was taken, and the management had to make special provision for the overflow.

Clarkston is starting a building and loan association. \$8,000 of the necessary \$25,000 has already been subscribed.

The Thunder mountain mining district in Idaho County is witnessing a revival of great activity. One concern from the Couer d' Alenes holds 30 claims there and is filing on 20 more. Tuesday marked the opening of the duckseason in Idaho, Oregon and parts of Washington.

Pulouse wheat farms are again being sold for as high as \$100 an acre, it was reported a few days ago by G. F. Sherrod, Spokane and Pullman real estate operator who closed three farm deals in the last few days.

Mining men from all parts of the country attended the mining convention held in Spokane last week, and it was pronounced one of the largest and most successful ever held in the city.

The investment of the government planes at Felt's Field, Spokane will be increased to \$170,965, according to Major C. V. Haynes, commanding officer of the 41st division aviation, who will take delivery of a Douglas 02K at Rockwell field, San Diego, on October 12.

The erection of a \$35,000 plant to treat China Clay is planned by the Idaho Ceramic Materials company of Troy, for next spring.

Twelve football fans of Moscow have chartered a 12 passenger airplane, and will fly to Eugene to attend the Idaho-Oregon game, October 19.

### NORTH IDAHO NEWS

(Continued from page 1)  
A. A. Seaborg has been named deputy game warden to succeed J. Wann, who has resigned to enter business at Orofino.  
The annual Coldspring Corn Show will be held October 11 and 12.

The holdings of the late Judge E. C. Steele have been appraised at \$33,627.

All plans for the development of a \$20,000,000 hydroelectric and nitrate recovery plant on the Salmon river have been cancelled by the German chemical organization which opened negotiations, but the project will be continued if patent rights for the recovery of nitrates can be obtained from their American holders.

#### Naval Nicknames

An enlisted man in the navy has little use for any other name than his last, since his shipmates refer to him only by that name. Should he however, have the name of O'Connor he is called Chuck O'Connor; Murphy becomes Spud Murphy; Ryan is always Patty Ryan, while Richards becomes Dick Richards and Webb is bound to be Spike Webb.

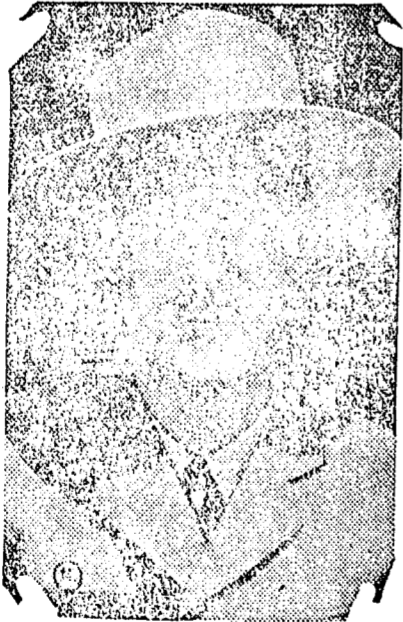

#### Misplaced Charity

There are too many people on this earth administering their medicines to the strong and healthy—American Magazine.

#### Little Nuisance

Truck Driver (telling of crash with a small car)—I see the little devil coming and I think—"There's a fly on my windshield." Then the thing dashes through the radiator and knocks the tops off all me spark plugs.—Weekly Scotsman.

### HEROIC PARK RANGER

Secretary of the Interior Wilbur issued the first citation for bravery to come from the Interior department to Charles B. Browne, a park ranger in the Mount Ranier national park, for his valiant and fearless efforts in the rescue and recovery of bodies of a party of climbers who fell into a crevasse, injuring four and killing two of them.

#### Medicinal Perfume

The use of perfume for medicinal purposes, among the ancients, was very widely practiced. Rosewater formed the basis for many remedies, while during a plague perfume was used extensively as a preventive. The savage and barbarous nations, as well as the civilized and refined, used perfume extravagantly. African chiefs anointed their bodies with it—perhaps as a sunburn protection.

#### It's Very Rare

Self-pride is that glow you feel when you can walk by a crowd and not stop to see what it's all about.—Little Rock Arkansas Democrat.

### THE "WHY" OF INSANITY

Do you know that one person out of every ten adult people, who die in the state of New York, dies in an institution for the insane? Do you know that there are more mental patients in the public institutions of the country than there are students in the public institutions of the country than there are students in our colleges and universities? Do you know that patients in hospitals for the mentally diseased almost equal in number those in all other hospitals combined? Do you know that from one-sixth to one-third of every state's expenditures is for the support of mental hospitals?

There is an army of about 500,000 individuals in institutions for the insane, the feeble-minded, and the epileptic in this country. About 300,000 of this number are insane. Estimates indicate that there is probably as great or perhaps a greater number of insane which are not cared for in institutions. I may add that there is a vast number of individuals who suffer from lesser nervous disorders as neurasthenia, psychasthenia, hysteria, etc. Estimates made in our larger universities indicate that at least 25 percent of their students are in need of advice regarding their mental health. I wonder how many of our high school and university teachers could recognize a "mental case" or would have the ghost of an idea what to do with it if he did?

There are two classes of mental disorders: A. Mental disorders which have their basis in habits of thinking. B. Mental disorders in which the brain or spinal cord tissue has been destroyed.

Did you ever get disgusted with life and just day dream of things as you would like to have them? Did you ever blame your difficulties on some other person in the dreams. Did you ever imagine yourself being some great person and doing great things? Every person does these things to some extent. Some more than others. Can't you see that a person might go so far to the extreme that he might come to believe these dreams? He would just forget reality and would act as if his dreams were really true. The extreme of this represents insanity. When do you resort to imagining in this way? Isn't it when life isn't going as you would like it? Isn't insanity of this type just a withdrawal from reality and isn't this withdrawal due to a fear of reality?

In short, here is what happens. An individual has something in life that he fears. This fear is apt to be an unconscious one. He is not directly aware of it. He compensates by his imagining things to be as he would like them. He comes to believe these lies which he is telling himself. He tells others that he has millions and would write checks for that amount. He may try to kill the person that he believes responsible for his troubles. He talks to himself of things which are meaningless to others. He laughs over the fun that his imagination is giving him. He may brood over his sins and enjoy his self pity. He may return to normal again but is not apt to remain so.

What I have described is just an exaggeration of normal tendencies. It is a matter of developing bad habits of thinking rather than a "mind being lost" due to some mysterious force which cannot be explained. And just why do some people get further away from normal than others? All of us face difficulties which we do not like but most of us do not become insane! You see the term insanity is a legal term and not a medical one any longer. One is adjudged "an insane person" when it has been shown that he cannot hold his place in society adequately. If we look to heredity for our answer we find but little basis for it here. Poor environment is the major cause. THE HABITS WHICH RESULT IN INSANITY ARE FORMED EARLY. DURING THE FIRST FIVE YEARS OF LIFE. Just the period that parents and educators consider the child too young to learn or to be "mor-

ally" responsible. Put the child every time that it cries or is hurt and it learns to love sympathy and to seek for it. Tease it into sulking and you are developing an abnormal tendency. Excuse the child's failures and he will expect society to do the same. Do everything for him and he will seek to escape work in later life. Blame his failures to the fault of another and he will continue to do so. Refuse to answer his questions regarding sex matters and you are doing the worse thing of all. From the psychologists viewpoint the silly sentimentalism which the child is constantly subjected is a damning factor. It is not conducive to a stable personality. Teach the child to solve his problems and to do his tasks. Let him take the bumps.

Just this quotation regarding the lesser nervous disorders: Dr. William J. Mayo of the Mayo Brothers Clinic, says, "Neureasthenia, psychasthenia, hysteria, and the allied neuroses are the causes of more human misery than tuberculosis or cancer." These disorders too, have their basis in habits formed in early life. Poor health of course may be a predisposing factor in any nervous disorder and is basic in neurasthenia.

The mental disorders, having an organic basis cannot be given much space. They are due to injury, use of alcohol, disease, old age, and drugs. A part of the brain or spinal cord is destroyed. Rational behavior is thus impossible.

Treatment of insanity is becoming more scientific. Modern institutions cure from 30 percent to 40 percent of its patients. It is a matter of curing the disease or of leaving off the alcohol and drug habits in the case of the organic insanity. Those functionally insane must build new habits.

The institutions of the state of Idaho are not modern. Very little scientific treatment is given. Their percentage of cures is small. This criticism is not directed in any way toward the

doctors in charge. I know of no finer men. No one is working harder for improvement than they are working. The matter is this: The state does not allow the funds necessary to build up modern hospitals. Nothing but public opinion can change this condition.—DWIGHT INGLE.

### CAMERON ITEMS

The following were visitors in Lewiston Saturday: Mr. and Mrs. A. O. Wegner and Mrs. Gustave Kruger, Herbert Schwarz and Herbert Mielke Mr. Reiche. On Sunday, Fred Silflow and sons, Marvin, Emil and Harold drove to Lewiston. "Grandma" Schultz was a guest of Mrs. Reiche over the week end.

"Bill" McCoy and family and Fred Schoeffler and family were dinner guests of Mr. and Mrs. Chas. McCoy Sunday.

Rev. and Mrs. Ehlen were callers at the home of A. O. Wegner Thursday.

Mr. and Mrs. Marvin Albright of Juliaetta spent Sunday at the home of A. H. Blum.

Mrs. H. E. Branner and sons, Ernest and Verner of Southwick visited at the home of Carl Koepf, Sunday.

"Grandma" Brammer called on Mrs. Oldag last Thursday.

Mr. and Mrs. Jake Berreman drove to Clarkston Sunday. Mrs. Berreman will remain in Clarkston for the winter with her daughters who are attending school there.

Mr. and Mrs. Fred Newman and sons, Harry and Wallace and Herbert Mielke, left Wednesday morning by car for a short visit with relatives in Kellogg and Spokane. They plan to return about Monday.

Mr. and Mrs. Jack Bechtel and Mrs. A. Bleck of Lewiston, and Miss Adelaide and Raymond Rodgers of Southwick spent Sunday with Mrs. Brunsveik.

Littel Glenn and Helen Newman are staying with their grandmother, Mrs. Fred Mielke while their parents are away.

Mrs. Henry Wendt spent Saturday with her parents, Mr. and Mrs. F. Silflow.

Mr. and Mrs. Dave Schoeffler and family called on Mr. and Mrs. Fred Newman, Sunday evening.

Mr. George Bunstien of Lewiston is visiting this week at the homes of "Bill" and Chas. McCoy.

Erna, Harry and Robert Wegner spent Sunday afternoon at C. L. Wegner's.

Mr. and Mrs. Carl L. Wegner and "Grandma" Wegner were at Herman Wilkin's Sunday afternoon.

Paul Silflow visited his brother, F. Silflow at the A. O. Wegner home Sunday afternoon.

Amos Spekter and family drove to Cedar Creek Sunday.

Mr. and Mrs. A. F. Wegner and family drove to Moscow Sunday to visit with Mrs. Wm. Rogers, a sister of Mr. Wegner.

Mr. and Mrs. Fred Mielke, Mr. and Mrs. Fred Silflow, Mrs. Ida Stoneburned and Miss Emma Hartung were callers at the John Schwarz home, Sunday P. M.

Mr. Ciddlebaugh, Herbert and Lawrence Schwarz were in Juliaetta Sunday afternoon.

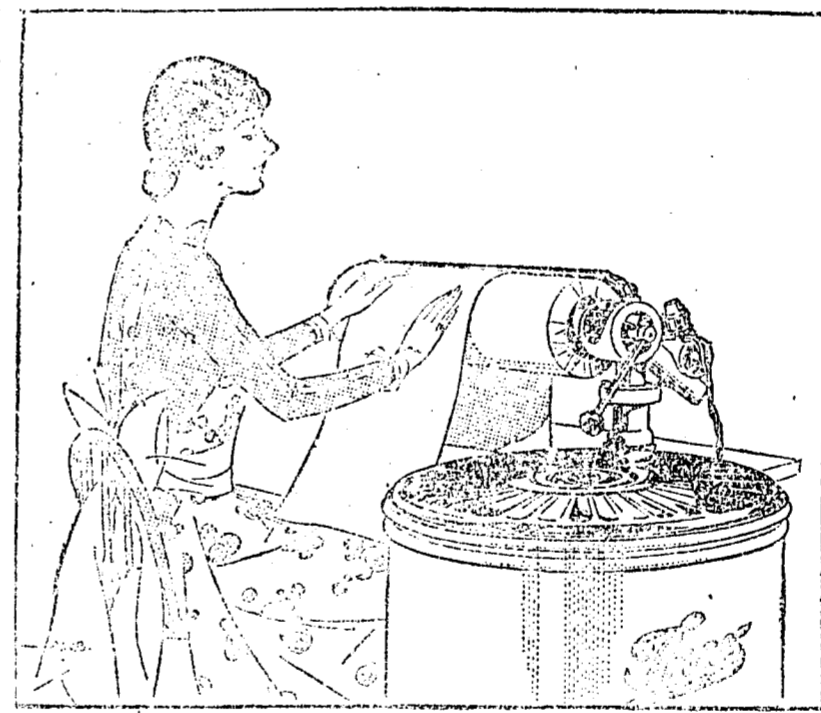

The Ladies' Aid of Cameron held their first meeting of the fall Wednesday afternoon. Lunch was served by Mrs. Carl Koepf and Mrs. Henry Brammer. Over two thirds of the members were in attendance as many business matters were to come before the Aid. The sale of fancy work sponsored annually by the Ladies' Aid has been set for some time during the week of November, 3-9.

Lewiston Wednesday to visit Mrs. Emma Brunsveik went to a short time with her mother and sisters of that place.

Mr. and Mrs. Gustave Kruger and daughter, Rosalie, were guests of Mr. and Mrs. Henry Wendt, Sunday.

Miss Nellie Buckles, County Superintendent with her assistant, Miss Crosier, visited the school Wednesday afternoon.

Born to Mr. and Mrs. Fred W. Silflow, Wednesday, at the St. Joseph hospital, Lewiston, a daughter.

**THE KENDRICK GAZETTE**  
"The Pulse of The Potlatch"

Published every Friday at Kendrick Idaho, by  
Rollien Dickerson  
Independent in Politics

Subscription Price **\$1.50**

Entered at the Post Office at Kendrick as second class mail matter.

Elsewhere in this issue readers will note an article on "The Why of Insanity," by Dwight Ingle. Mr. Ingle, whose home is on Big Bear ridge, is studying for his Master's degree at the University of Idaho. He is specializing in psychology, and the article in this issue, together with others that he will write for The Gazette, embody the results of his study at the University.

Those who attended the rally day service at the Presbyterian Church recently and the evening service at the M. E. Church last Sunday, are enthusiastic in their praise of the music at both places. It is evident that there is a wealth of musical talent in this community that is not often found in a village the size of Kendrick. And it is pleasing to note that this talent is coming forth from its hibernation. When such good singing is available and good preaching too, both churches may well look forward to a prosperous and successful year.

Can the big-town merchant undersell? Does he give greater value for the purchaser's dollar than the small-town merchant gives?

In answer to this question, Mr. Dammarell, pioneer merchant of Kendrick, says: "Quality considered, and the cost of transportation figured in the larger town cannot undersell the small one. Indeed, the small town merchant actually undersells the large town merchant in some instances. I believe that a great many people are coming to see this, and that they will support the local merchant more loyally in the future."

**God's Methods**

For, to make deserts, God, who rules mankind, begins with kings and ends the work by wind.—Victor Hugo

**IDAHO BIG GAME SEASON IS SET**

Boise, Idaho, Sept. 17.—With the approach of the big game hunting season, numerous inquiries regarding open season dates have been received here by the state game department from sportsmen throughout Idaho and neighboring states.

Deer may be taken from October 6 to October 31 in the following counties: Adams, Blaine, Boise, Butte, Custer, Elmore, Gem, Lemhi and Valley. October 20 is the open season on deer in Clark, Fremont, Jefferson, Madison, and Teton counties. In Bannock, Bear Lake, Caribou, Franklin, Oneida, Power and Twin Falls counties deer may be taken from October 20 to October 30. The entire month of November will be open in Benewah, Bonner, Boundary, Kootenai, Latah, Lewis, Nez Perce and Shoshone counties.

Open season on deer in other counties follows: Idaho county, south of Salmon river and east of Little Salmon river, October 6 to October 31; remainder of Idaho county, October 1 to November 15. Clearwater county, north and west of north fork and little north fork of Clearwater river, October 15 to November 30; remainder of Clearwater county, October 1 to November 15.

Elk may be taken in Clearwater and Idaho counties from October 1 to November 15. In Franklin county the open season extends from October 20 to October 30. December 1 to December 15 will be open season in Clark, Fremont, Jefferson, Madison and Teton counties.

**Mountain Goat**

Mountain goats may be hunted from October 6 to October 31 in the following counties: Adams, Blaine, Boise, Butte, Custer, Elmore, Lemhi, Valley and Idaho county south of main Salmon river and east of the Little Salmon river. In the remainder of Idaho county the open season is October 1 to November 15. The territory north and west of the north fork and little north fork of the Clearwater river in Clearwater county will be open from October 1 to November 15.

The bear season opened September 1 and will close May 31 in Benewah, Bonner, Boundary, Clearwater, Kootenai, Latah, Le-

**Live Stock Items**

Knowledge is power in the control of swine diseases.

Remove sow at weaning time. Allow no other hogs in the pasture.

Preventive measures to control pig diseases should begin before the litters are farrowed.

Lack of exercise causes weak lambs, so one should be sure the ewes receive a little exercise each day.

Like feeding, breeding is not the only thing to be considered in handling live stock; both must go hand in hand if the best results are to be obtained.

Pigs of all classes respond to good forage. It is especially valuable in the ration of young, rapidly growing pigs.

Pregnant ewes require a rather liberal supply of protein for developing the foetus and producing wool as well as for body maintenance.

Spring pigs that are to follow cattle on feed in the fall and winter should not be full fed prior to this time, as they become too fat and inactive to be best suited to the feed lot.

Wis, Nez Perce and Shoshone counties. There is no closed season on bear in other counties of the state.

The bag limit in Idaho is one deer one elk and one mountain goat of either sex.

**ERNEST L. JAHNCKE**

A new and unpublished portrait of Ernest L. Jahncke, of New Orleans, assistant secretary of the navy.

**Moon Myths**

The Dakota Indians think that the moon at its waning is eaten by mice. The Polynesians believe it is devoured by the spirits of the dead. The Kaffirs say that it wanes when, suffering from a headache, it puts its hand to its forehead and hides the latter from our view. The Eskimos imagine that the moon, harassed by fatigue, retires for a moment to take rest and food.

**Japanese Water Torii**

The Sacred Island of Miyajima in the inland sea of Japan is the home of the familiar Water Torii

**Pigs Over Summer**

Spring pigs that are not to be fattened for the early fall market may be carried through the summer on good pasture and a limited amount of grain. The pigs should receive enough grain to provide for normal growth, since they cannot develop on pasture alone. Pigs handled during the summer in this way will be in good shape to follow steers in the feed lot this fall and winter, or they may be fattened for market, as soon as the new corn crop is ready.

**Wouldn't It?**  
There is serious doubt whether, in spite of reports to the contrary, a shark ever bites a man. No one seems to be concerned about whether a man ever bites a shark, although, of course, that would be news. — Richmond Times-Dispatch.

SEAWEED LATEST HEALTH BUILDER  
Fed to Live Stock, It Also Provides Iodine in Milk.

Perhaps there is nothing new under the sun, but the new uses often found for old things are amazing enough to keep us interested in life. For instance, seaweed.

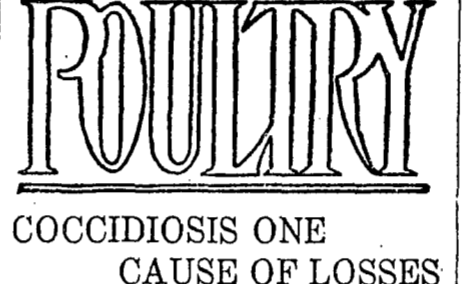

When the hogs owned by J. M. Ballard, of Indiana, won the grand championship at the last International Livestock show in Chicago, most of the farmers who inquired about their diet were amazed to find that they were being fed kelp, a rough brown leaf seaweed that grows in profusion off both American coasts.

Prof. Oscar Erf, of the Ohio State university, was the first to experiment with kelp as live stock feed. His success prompted experiments at Purdue university, and later ones at the Iowa and Utah agricultural experiment stations. It was found that the weed contained at least 30 important chemical elements and was especially rich in iodine, in which several regions of the country are deficient, says the Farm Journal. Mixed in a very small proportion with other feed it proved to have decidedly valuable medicinal qualities.

Not only has this addition to animal diet helped the animals, it also is providing a means of supplying iodine to the human population.

"It has been definitely proved that by using kelp in a cow's ration iodine can be fed into the milk. Chicago physicians are recommending this iodized milk to their patients," says the Farm Journal article, adding that similar experiments with eggs are proving successful.

Strangely enough, kelp has been used for many years in the making of iodine itself, although it never occurred to anyone that its health-giving properties could be transmitted directly to human and animal uses. That is, it had never occurred to anyone in the United States until recently. Over in Japan, wise little Orientals have been eating seaweed for ages, and Occidental visitors generally have regarded it as a primitive habit.

COCCIDIOSIS ONE CAUSE OF LOSSES  
Protect Pulletts From Parasites and Various Ills.

(By M. A. SEATON, Extension Poultryman, Kansas State Agricultural College.)  
Young pullets will develop into efficient egg machines if precautions are taken to protect them from parasites and diseases during the summer months and if proper feed is supplied for their development.

Coccidiosis is one of the enemies that must be conquered. It usually appears when the chicks are five to ten weeks old. Symptoms are blood in the droppings. Upon internal examination, the blind intestines are enlarged and filled with a grayish, bloody exudate. Often the liver is spotted. This disease is caused by an organism that tends to destroy the lining of the intestine. It is passed out in the droppings and carried over from year to year in the buildings and ground.

To prevent coccidiosis, move the brooder houses each year and brood on clean ground or use a sanitary platform and keep the chicks confined on the platform until ten weeks old. Keep the young and old stock separated. These precautions will usually prevent the disease.

In outbreaks of coccidiosis, the best-known treatment is to move the brooder house if possible, clean the house often, and feed large quantities of milk. If an all-mash system of feeding is being used, remove the meat-scraps from the mash and substitute 25 per cent dried buttermilk or dried skim milk. Feed this for about two weeks. Large quantities of milk solids in any form will be beneficial.

HOG WALLOW WILL GIVE PROTECTION  
Porkers Need Shade and Cool Water in Hot Season.

While there is nothing esthetic about a hog wallow, there is satisfaction—for the hogs—and protection for their owner. In hot weather the hog, more than most other animals, is liable to overheating, likely to be attended by very high mortality. Plenty of shade and cool water, together with freedom from any disturbance, are preventative against this source of losses in the hog lot.

On the John Brown farm near Mechanicsburg, Ohio, there is a hog wallow of concrete which pretty well suits the ideas of J. W. Waicher, animal husbandry specialist at Ohio State university, as to what a hog wallow should be.

About 25 feet square, the sides of the wallow slope very gradually toward a drain in the center. In one corner there is an automatic drinking fountain, the overflow from which runs directly into the pool. Over the wallow, there is a roof supported on posts. All four sides are open.

The capacity of the wallow is highly elastic, since every hog which grubs his way into the water, displaces his own volume in water and raises the level of the pool. The more hogs in the pool, the more water.

The surface of the film in the pool carries a floating layer of crude oil which keeps down insect pests on the hogs and also checks munge among them.

Practical Methods of Destroying Hog Munge

(By J. W. Lund, Extension Veterinarian, Kansas State Agricultural College.)  
Crude petroleum will turn itself into a money maker when used as a destroyer of munge of swine.

The three most practical methods of destroying munge are hand applications, spraying and dipping.

Hand applications may be satisfactorily provided if only a few hogs are treated. The hogs are confined and applications made with a brush or cloth. Petroleum should be rubbed over the entire hog, including inside the ears.

Spraying, if carefully carried out, will destroy munge. The hogs should be confined in a small pen, bedded with clean straw. A spray pump or sprinkling can may be used. The hogs' ears should be lifted so that spray material will coat the lower side. They should be left in the pen for an hour to become well saturated by contact.

Dipping is the most effective way of applying material to hogs for controlling munge. Concrete or galvanized iron dipping vats are more or less permanent and not prohibitive in expense for the large hog raisers.

Swine should be dipped at least twice, 12 to 14 days apart, and old beds burned. The house and sleeping quarters should be thoroughly cleaned and disinfected.

Value of Sulphur and Charcoal for Nowt

Sulphur is a medicine, and not a food. True, small quantities of it may be found in all our grains, as well as in some other articles of feed. But sulphur as found in grain is combined with some other substance which counterbalances it.

There are times when sulphur is beneficial if judiciously administered, writes Michael K. Boyer in the Farm and Ranch. It must not be recklessly given, and never during wet or damp weather, as its use at such times is apt to cause rheumatic troubles or a stiffening of the joints.

Sulphur is a blood purifier, and often wards off disease and invigorates a run-down system. In such cases a teaspoonful, once a week, mixed with the mash, for about twenty hogs, would be about right, but even so small a quantity as this should be given only during a dry period.

Charcoal consists almost entirely of carbon. It is prepared by heating wood so as to expel all the gaseous matter it contains. Ammonia is a gaseous compound-alkaline like potassium, and is often termed spirits of hartshorn.

When charcoal is properly treated there will not remain sufficient ammonia to be injurious to animal life. Any impurities that charcoal might contain would be absorbed through atmospheric conditions.

Use of Self-Feeders Is Most Satisfactory

The use of self-feeders in growing hogs we have found. With hand feeding so many times in the busy season, and that lasts all summer or most farms, a little neglect in chores checks up the desired growth. Living in a good, clean, legume pasture with self-feeders for corn and protein feeds and the opportunity to get at some minerals, the pigs are at fault if they do not make good. Last year corn was so scarce in our neighborhood that we ran the pigs through with a little less than they would have liked. The pigs were showed up by it, too, but with an all-winter rise in the hog market the financial returns were not so disappointing. Related pigs do not always meet that kind of a market reception. The general trend has always been the other way.

Do Not Force Pulletts Into Premature Laying

It is usually considered better not to force pullets into premature laying by feeding large quantities of mash. Instead, limit the mash until pullets are quite ready to lay and, by feeding a greater amount of grain, to get them fat. Such a ration emphasizes the fat making material and, by withholding the egg-making materials, removes the danger of a too early maturity. Mash should not be entirely eliminated, as it contains materials needed for building up the muscles of young fowls. Too much of it, however, may precipitate egg laying before it is desirable. Give the developing pullets all the grain they will eat during early fall and after they come into normal laying, gradually decrease mash with a corresponding increase in grain feeding.

The Kendrick Gazette  
COMMERCIAL PRINTING

Moscow Idaho, Tuesday, September 3, 1929.  
 The Board met this day pursuant to adjournment, present, JOHN L. WOODY, Chairman, RUDOLPH E. NORDBY, Commissioner, and HARRY A. THATCHER, Clerk. The first Monday of September, the date specified by law for a meeting of said board, to consider the final budget, being a legal holiday under the laws of the state of Idaho, the Board met this day pursuant to notice heretofore published, for the hearing of protests to the proposed budget of Latah County

for the ensuing fiscal year, and no one appearing in person to protest, now, therefore, BE IT RESOLVED that the following itemized statement of proposed expenditures and the same is hereby adopted as the final budget of Latah County for the ensuing fiscal year:

### Current Expense

	Salaries and wages	Maintenance and operation	Capital outlay	Income other than taxes	Taxes	Total
<b>Clerk of District Court and Ex-Officio Auditor and Recorder:</b>						
Harry A. Thatcher, Auditor.....	\$2,000.00					
Bessie Babcock, Deputy.....	1,680.00					
Einna J. Sayles, Deputy.....	1,680.00					
Special Clerks and labor.....	2,700.00

The indigency affidavit of Mrs. J. P. Howard and application for county aid, was examined and aid ordered extended as petitioned.

The indigency of Henry Steiger, and application for county aid, was examined and aid ordered extended as petitioned.

The change in valuation of various classes of property by the State Board of Equalization was examined and ordered placed in the Commissioners' files.

The Joint Statement of the County Auditor and County Treasurer for the quarter ending July 6, 1929, was examined and approved, ordered published and copy placed in the Commissioners' files.

At this time the County Auditor reported the following settlement made with the County Tax Collector for the collection of taxes appearing upon the tax rolls for the year 1928, and the same was examined and approved, and ordered spread upon the minutes of this Board at length:

Original Charge.....	\$654,162.48
First half payment.....	367,696.08
First half delinquent.....	13,870.23
Second half payment.....	253,962.27
Second half delinquent.....	18,633.90
	\$654,162.48

The Board now adjourned to meet Monday, September 9, 1929, at nine o'clock A. M., as provided by law.

ATTEST:  
 HARRY A. THATCHER, Clerk.  
 APPROVED:  
 JOHN L. WOODY, Chairman.

### Indigestion or Scours Most Serious Obstacle

Indigestion, or scours, is perhaps the most serious obstacle in the way of successful calf raising. It usually results from a disturbance of the digestive tract caused most frequently by improper feeding, of which over-feeding is probably the most common. This is due to the fact that not enough care is taken to regulate the amount of milk fed. The only way to be sure that the calf is getting the correct amount of milk is to weigh or measure it and feed each calf separately. The too common practice of allowing calves to drink from the same bucket or trough should not be tolerated. Irregular feeding, sudden change of feed, feeding unclean milk or using dirty buckets and feed boxes may also cause scours. The disease is indicated by the characteristic foul smelling dung. Prevention of the trouble is always easier than its cure. At the first signs of digestive disturbance affected animals should be isolated. The amount of milk fed should be reduced by at least one-half and if legume hay is being fed, it should be replaced by timothy or prairie hay until the trouble disappears.

### Have Silage Handy

Where silage is used in winter and summer it is better to have two silos than one. Where convenient, it is advisable to locate on the south or southwest side of the barn rather than the north or northwest. The biggest and most important matter is to have the silage close to the point of feeding, and at the same time be so placed that it will be in accord with all the requirements of a silo as to filling and feeding during the different seasons of the year.

### Dairy Hints

\*\*\*\*\*

When pastures are short, supply roughages.

\*\*\*\*\*

It usually pays to feed dairy cows grain even when on pasture.

\*\*\*\*\*

The difference between the keeping quality of whey butter and that of regular butter is insignificant.

\*\*\*\*\*

When the temperature of the cream is right very seldom will there be such a thing as difficult churning.

\*\*\*\*\*

Sweet clover pastures seem to give best satisfaction to dairymen who supplement the pasture with silage, hay, or grain.

\*\*\*\*\*

Many dairymen who complain over the high cost of producing milk could quickly correct this trouble by feeding more silage.

\*\*\*\*\*

Some farmers like to milk so well they keep ten poor cows rather than five good ones.

\*\*\*\*\*

Alfalfa hay is considered best for dairy cows, followed closely by clover and the annual legumes, such as soy beans and cowpeas.

\*\*\*\*\*

Protect Cows From Pests—Flies are a serious pest around the stable and milkhouse. Screened windows and darkened stables will help protect the cattle. Windows and doors to the milkhouse should be screened also.

# The DAIRY

### COWS DON'T MIND FLIES IN SUMMER

#### Using Repellents Only Keeps Animal Quiet.

Contrary to the general belief, annoyance of cows by flies is over-estimated, experiment station trials covering several summers have shown. This conclusion was reached when it was found that milk and fat production was not increased when the cows were sprayed with fly repellents.

The only advantage in using the repellents, says E. J. Perry, New Jersey state specialist in dairying, is that cows are less restless during milking time.

Furthermore, unless properly used, these mixtures do more harm than good. By their regular use the skin of the animal is covered with a sticky, gummy substance that is more objectionable than the flies. When a repellent is used the cows should be washed often enough to prevent such an accumulation.

Where a dairymen wishes, however, to use something to keep flies away, the following will be found a cheap mixture and one that is fairly satisfactory: One pound of rancid lard and half pint of kerosene. This is mixed into a creamy mass and rubbed on the backs and necks of the cows with a cloth or the bare hands.

Another satisfactory formula is: One pound of common laundry soap, four gallons of water, one gallon of crude petroleum, four ounces of powdered naphthalene.

Cut the soap into shavings and dissolve in hot water; dissolve the naphthalene in the crude oil and mix the two solutions thoroughly.

### Valuable Supplement to Corn in Feeding

Soy beans are a very valuable supplement to corn in feeding steers and hogs. They are about equal in feeding value to either linseed meal or cottonseed meal and can be substituted for the milk feeds to balance corn when feeding steers or hogs. From 2.5 to 3 pounds per head per day should be fed.

However, soy beans are very rich in oil and this will have a tendency to throw both hogs and steers off feed if the beans are fed for a long time. If hogs follow steers that are fed soy beans instead of linseed or cottonseed meal the hogs should have some tankage in addition.

## STABILITY

Stockholders of this company have always been proud of the stability of its securities.

For twenty-nine years this company has not missed the regular payment of dividends—an indication of the soundness of its financial structure and the quality of its service to its patrons.

The young daughter thinks she is a lot smarter than her mother. But we have yet to hear her ordering mother out of the kitchen so that she can bake the bread, fry the steak or wash the dishes.

**PRESIDENT OF ELECTRIC SERVICE COMPANY PASSES**

The story of the Washington Water Power's growth and expansion is of peculiar interest to citizens of northern Idaho. We are publishing, below, the biography of Mr. Huntington, who has done more, perhaps, than any other man, to make this great public utility corporation what it is today.

D. L. Huntington, president of the Washington Water Power company and a pioneer of the electric service industry in the Inland Empire, died shortly before noon Friday, September 27, at his home, W2515 Second avenue, Spokane. He had been confined to his home since the fall of 1927, although able during the greater part of that time to devote some attention to company affairs. His death resulted from cancer.

Mr. Huntington, despite his long illness, retained his keen mentality to the end. Though suffering at times desperately his spirit remained indomitable and he displayed the keenest interest in all public affairs.

Mr. Huntington's first position with the Washington Water Power company began October 18, 1894 as treasurer. He was made assistant secretary in 1895 and became general manager on February 4, 1896. His title was secretary and general manager in the same year and in 1903 he was made second vice president and general manager. On February 11, 1910 he was made active president of the company and its affiliated properties. He had been president of the Spokane United Railways since that company was formed July 1, 1922.

Mr. Huntington's business life was closely interwoven with the history of his company. The progress and expansion of the system was under his personal supervision. When Mr. Huntington came with the Washington Water Power company the system included only one hydroelectric power station and its lines were confined to Spokane. Today the company operates nine hydroelectric stations and its transmission and distribution system in ten counties of Washington and six counties of Idaho serves more than 52,000 acounts.

Mr. Huntington's faith in the future of the Inland Empire and his vision of the requirements of the communities served were largely responsible for the steady, consistent growth of the company. It contributed directly in many cases to the industrial, residential and rural development of the territories served. The courage and foresight required for early power line extensions into the Coeur d'Alene mining district and the Palouse and Big Bend territories was the foundation for the large outlying territory now served by the company.

David Lynde Huntington was born at Fort Trumbull, New London, Conn., October 18, 1870. He was the son of David Low and Gertrude Elizabeth (Shoemaker) Huntington, pioneers of New England. He was educated in the public schools of Washington, D. C. and afterwards attended Yale, from which he was graduated in 1891 with a Ph.D. degree. In 1916 the State College of Washington conferred on him an honorary degree of master of science in engineering. After leaving Yale he went to Lynn, Mass., with the Thomson-Houston Electric company. In 1892

**Be Independent**

The man or woman with a Savings Bank Account is independent. Financial worries do not interfere with success.

Opportunities come to those who are prepared to take advantage of them—they pass the others by. We welcome small accounts and are always pleased to assist our customers in every way. Complete banking service rendered when banking with us. We appreciate your account.

**THE FARMERS BANK**  
E. A. Clarke, Pres.  
N. S. Vollmer-Hopkins, Vice-Pres.  
W. J. Carroll, Cashier

he became assistant engineer for the General Electric company at Philadelphia. In 1894 he resigned from this position to become affiliated with the Washington Water Power company.

**THE JUGGLER**

**Freshmen Elect Officers**  
The Freshman class elected their officers for the first semester. They are: Clifford Franklin, President; Pete Blevis, Vice-President; Nettie Mae McDowell, Secretary; Elizabeth Carlson, Treasurer; and George Schulze, Sergeant-at-arms. They are all very satisfactory.

**Freshman View of the Initiation**  
The Freshman's views on the initiation were very satisfactory, when it came to the cats, and the first part was not so bad. We all returned from it feeling fine except for a few bruises. All we are waiting for now is to initiate the Freshmen next year and we feel that we can get even that way.

**Seniors Reorganize**  
When the Seniors reorganized this year they chose rose and platinum as their class color with a pink rose as their flower. The following officers were elected: President, Doris Evers; Vice-President, Howard Bammarrell; Secretary, Treasurer, Arthur Foster. The Seniors expect to order their class rings soon.

**Juniors Elect**  
Last week the Junior class of K. H. S. elected their officers for this school year as follows: President, Eldwa Jones; Vice-President, Walton Morey; Secretary, Eleanor Herres; Treasurer, Claude Woody; Advisor, Miss Deagen.

**Student Body Meets**  
The student body of K. H. S. held a meeting last week for the purpose of electing officers for the school term. They were elected as follows: President Arthur Foster; Vice-President, Eleanor Herres; Secretary, Eldwa Jones; Treasurer, Howard Bammarrell; yell king, Clifford Franklin; yell queen, Neva Ware.

We are very enthusiastic over our high school this year and expect to do all we can to make it better than ever before.

Thursday evening before the Genesee game a good percent of the students held a pep rally. They marched up and down the streets giving their yells for the

**Freshman Initiation**

team to play next day. **Viewpoint of Sophomores**  
The sophomores initiated the Freshmen at a party Friday, September 27. Several clever tricks were played on the Freshies and a good time was had by all. Refreshments of doughnuts and punch were served.

**SCHOOL NEWS**

The 3rd and 4th grade students find their new nature study books to be very interesting. The book in "Nature's Haunts with Youthful Minds" by William A. Bixler discusses in a very entertaining manner such subjects as: The Petrified Forest of Arizona, The Aurora Borealis, Some Peculiar Features of the Mirage, and many other subjects of significance.

The boys of the 3rd and 4th grade Art Class are doing some carving work. They have made some small hammers, Crusader's Axes, swords and daggers. The 3rd grade nature study class have been making a study of the bee. They have learned about the appearance, habits, characteristics, shape, home, and anatomy of the bee.

The students of the 4th grade enjoy the moving picture chart showing the Bible pictures. The new history text books have the study of Biblical characters so the chart helps to give the student a clearer vision of the lives of these men.

In a Reading Examination word Drill Ethel Mae Fraser and Dick Carlson were able to pronounce all of the words which the 3rd grade have had during the month of September. This was a 100 percent record.

The 3rd and 4th grade room are planning to introduce a Curiosity Department into their nature study and geography work. Important questions of interest which they have always wondered about will be brought up for discussion, and definite answers will be given to satisfy their curiosity.

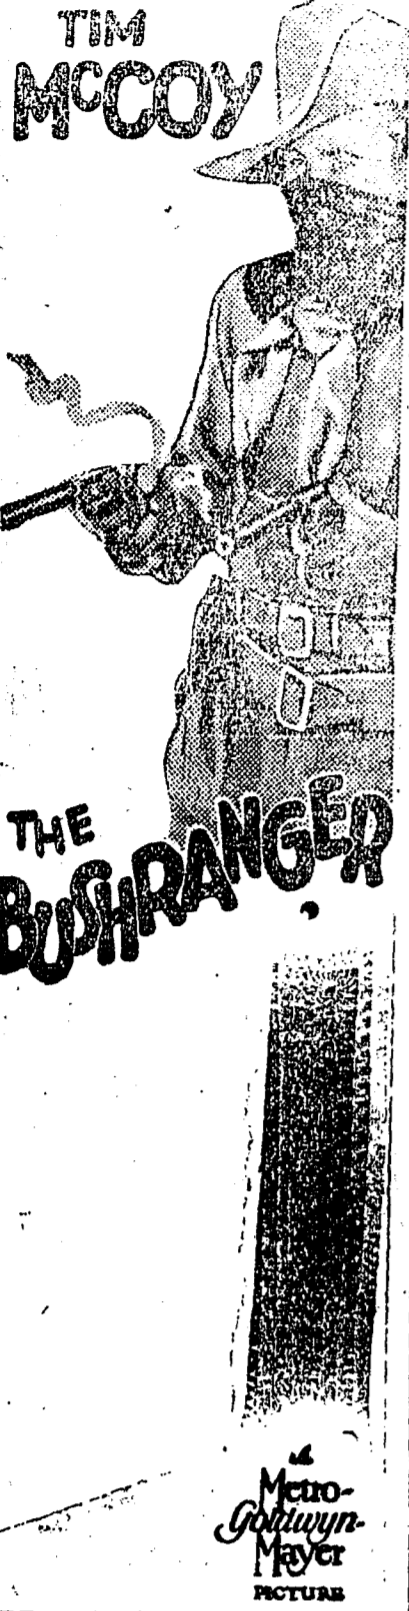

**5th and 6th**  
Is thirteen unlucky? We hope not, as there are thirteen pupils in the sixth grade and thirteen boys in the room. Time will tell!

The percentage of absence for the last month has been small. The main purpose of Ivory soap is for cleaning, but the fifth and sixth graders found a new use for it. They carved birds and animals of their own choice.

The sixth grade studied text-ile in geography. We were fortunate in having real silk cat-cuits giving their yells for the

**LUKENS WANTS IDAHOANS TO HASTEN ON HIGHWAYS**

Boise—Idaho automobile drivers must amble along faster than 23 miles an hour on state highways or be dragged out of traffic. Fred E. Lukens, commissioner of law enforcement rules.

In a letter to his staff of highway patrolmen he pointed out that too many accidents were caused when autoists were forced to get out of their lanes of traffic to get around creeping vehicles. A minimum speed, he asserted, would stop many of these accidents.

The speed minimum was adopted as a result of tests made in larger cities where it was found that 23 miles an hour was the lowest speed at which the greatest number of cars could be moved with safety past a given point.

It was a Kansas editor, notes the Hiawatha World, who referred to modern girls as the bare necessities of life.

**METHODIST CHURCH NOTICE**

Cameron, Emanuel Sunday School at 9:30 and Divine Services 10:30 A. M., in the German language. Religious instruction school on Saturday at 9 A. M. All Children Welcome. —OTTO G. EHLEN, pastor

Regardless of age, or physical strength, or suppleness of muscle, a man is in his prime when he lives in the highest spiritual state that it is possible for him to attain, when he can think calmly and wisely, when he has reached that consciousness wherein no business matter is transacted by him except in strict honesty and uprightiness, when he can live simply and without ostentation, when he lives above and beyond the thought of age and decay, and in that fullness of eternal spirit which knows no time or body limitation.—Christian Business
