### Life's Happiness

The best provision for a happy life is to practice honesty in good earnest, and speak truth . . . live easy and cheerful, and crowd one good action so close to another that there may not be the least empty space between them.—Marcus Aurelius.

### Determining Emotions

An apparatus, described as a "complete give-away of the emotions which a robber attempts to conceal," has been designed by an electrical engineer. The device registers the heartbeats of the person under examination.

### THE KENDRICK GAZETTE

"The Pulse of The Potlatch"  
Published every Friday at Kendrick Idaho, by Rollien Dickerson Independent in Politics

Subscription Price \$1.50

Entered at the Post Office at Kendrick as second class mail matter.

### PHARMACY HAS SUCCESSFUL SALE

The Rexall One-Cent sale, put on recently by the Red Cross Pharmacy was so successful that all the articles offered were disposed of at the end of the second day. Patrons who came on the third day in search of bargains were disappointed to find that others had got there first—a case of the early bird getting the worm. Mr. Nesbit, commenting on the success of the sale, said that a great many people came into the store, carrying a copy of the half-page ad, clipped from The Gazette, and that they used this ad as a guide in making their purchases.

Do subscribers read the ads? This would seem to answer the question admirably.

The success of the two local talent plays which have been put on in Kendrick this autumn indicates that there is plenty of local talent in dramatics, and that there is need of further self-expression along this line. Persons who get a "kick" from acting might well form a dramatic club and put on a good local talent play every month or perhaps every other month. The community would welcome such an effort, and would patronize the plays generously and appreciatively. The club might donate the funds to the churches, to the needy (if such there be) or to any other worthy cause, thereby making itself a blessing to the community as well as an avenue of entertainment.

### ANNIVERSARY

The eleventh hour of the eleventh day of the eleventh month eleven years ago—Roar of cannon stopped, rifles fell, machine guns stilled. Marshal Foch had given out the word from the Eiffel Tower, Paris. The Armistice was on.

Paris crowds poured out on the boulevards, jammed traffic, shouting, singing, kissing, crying people, waving flags. Bands played. Italian flyers showered printed messages of congratulation on the walking, walking, walking throng. It was a great day in Paris.

New York got the news and roared and praded, gloriously, hysterically happy. Every little American home town woke up in its turn, got out its noisemakers and had an unforgettable celebration. It was a great day in the United States.

And how was it in No Man's Land? Dead stillness first, unreal, oppressive. Then out into the barbwire tangle men in "feldgrau" came running upright—Germans. And out from points along the Allied lines came other men to meet them—Yanks in khaki. Enemies to the death before eleven o'clock, they grinned curiously at each other now, swapped souvenirs for tobacco and tried to tell how they felt about its being over. Truly it was a great day ending a great war. Far into the night the people stretched it with rockets, bonfires and flares but at last quiet fell and a great peace descended upon a hopeful world.

### MRS. COW

Almost fabulous are some of the tales that come to our ears regarding the leaps and bounds of the dairy industry in Idaho. Huge success and optimism are spread through every report of the cooperative creameries located in almost every small town.

The industry is well established and the market is stable. Idaho yearly ships astounding quantities of butter to outside markets, much of it going to California. It is a small plant indeed that doesn't dispose of at least a carload a week. There are other milkproducts which are much in demand, including cheese, casing, ice cream and dried buttermilk.

No one can deny that Mrs. Cow has done her share in help-

ing the Gem state to ride the wave of prosperity. The immensity of the industry with in our own state somewhat dawns upon us when we read that the average creamery claims and expects a regular annual gain of around 25,000 pounds in butter output alone.

At this rate, Idaho's cows will soon rival the famed Idaho spud for keeping the Gem State on the map. She, along with her sisters, is providing dairymen with a good living, she is the basis of thriving business and she is supplying many men with work. But that is not all of her benefits. Perhaps her greatest worth is keeping failure away from the door of the average Idaho farmer who owns a small herd.

After poor markets, or crop failure, the cow generally tides Mr. Farmer over until the next season. She supplies his family with a necessary food and gives him a monthly check beside. And when success does meet his efforts, the farmer usually takes off his hat to Mrs. Cow for keeping him in the game.—Boise Statesman.

### KENDRICK PRESBYTERIAN

—N. E. FRANKLIN, Pastor.  
We invite you to our services next Sunday morning, we need you in the congregation, and you need the service. Our aim is to help you, and we feel sure that you will receive much help by coming to the House of God. Sunday School 10 A. M., preaching 11 A. M. Our subject next Sunday morning will be "The Cities of Refuge." Come and hear this subject discussed. Everybody is cordially invited.

### Presbyterian Ladies' Aid

The Presbyterian Ladies' Aid meets Friday, Nov. 15, at 2:30, at the home of Mrs. G. F. Walker.

### METHODIST CHURCH NOTICE

Southwick  
Sunday School at 10 and Morning Worship at 11 A. M.  
6:30 P. M. Epworth League Devotional Meeting. 7:30 P. M. Evening Worship: Topic, "Ministry of Hidden Leaven." Saturday, 7:30 P. M., Chair Rehearsal at the church. Evening service in charge of Mrs. Groth.

### Kendrick

10 A. M. Sunday School. 3:30 Epworth League Devotional Meeting. 7:30 P. M., evening worship.

The regular mid-week prayer service will be held on Wednesday at 7:30 P. M. and choir rehearsal will be Thursday evening at 7:30 P. M. at the parsonage, and said schedule will continue.

—CLAUDE W. GROTH pastor

### Compliments Weekly Newspapers

One of the highest compliments ever paid the weekly newspapers of the country comes from James O'Shaughnessy, former executive secretary of the American Association of Advertising Agencies, who declared in a Boston address that "country weeklies are the corner stone of American journalism."

The weekly in a small town talks to its readers more intimately and confidently than any other medium, Mr. O'Shaughnessy said.

Such a tribute from one of America's leading advertising authorities is gratifying to the thousands of country publishers, many of whom are struggling under adverse conditions to serve their communities.—Genesee News.

### Distasteful Flavors in Cream Caused by Weeds

Off flavors in cream may be caused by feeds and weeds, such as wild onion, garlic, leek and ragweed. Flavors may be absorbed from the surroundings. For example, oil, gasoline, and vegetable flavors may cause trouble. Another class of flavors resulting from bacterial contamination are called stale, cheesy, yeasty, bitter, or acid. All of these off flavors result in poor quality of cream and cause a financial loss to the dairy farmer. They may be eliminated by keeping cows out of pastures which contain undesirable weeds, handling and storing cream in sanitary surroundings, and by careful methods in production and handling. Cooling of cream to 50 degrees Fahrenheit immediately after separation and frequent deliveries will help win the battle against poor cream.

### Best Quality

## POULTRY

### VITAMINE NEEDED IN CHICK RATION

### Liberal Use of Milk Quite Essential for Chickens.

A vitamine required by poultry and hitherto unrecognized, has been discovered by L. C. Norris, G. F. Heuser and H. S. Wilgus, Jr., of the Cornell university agricultural experiment station. This vitamine which is contained in milk is essential for the growth of chicks and for the prevention of a peculiar type of paralysis which may result in incurable deformities.

The discovery was in part accidental and resulted from an attempt to get a chick ration low in calcium and phosphorus, which would be suitable to study the requirements of chicks for these minerals. Casein, a purified milk protein, was used as the main source of protein in the experimental ration. When it was used in place of milk the chick ration was found lacking in this vitamine which prevents paralysis.

The experiment demonstrates that the use of liberal quantities of milk is essential where chicks or mature birds are confined indoors and are not provided with succulent green feed. To conclude from this experiment that milk should invariably be used in all poultry rations would be unwise, they say, as good chicks have been reared in the past with little or no milk and good winter egg production has also often been obtained with rations which contained no milk. It is probable, therefore, that this unknown factor is present in slight amounts in meat products, cereals and cereal by-products, and in large amounts in succulent leafy green feeds.

### Barred Plymouth Rock

### Favored to Caponize

One of the best breeds of poultry for caponizing is the Barred Rock as the sex can be determined at an early age. The cockerels will be light and the pullets dark and when the chicks are about six weeks old and weigh close to one and a half pounds each, the poultryman can go into his colony houses with a spotlight and collect cockerels as fast as he can pick them up.

In caponizing such breeds as Rhode Island Reds or White Wyandottes, it is more difficult to pick out the male birds at an early age, says a writer in the Michigan Farmer. Considerable accuracy is possible by studying the heads. The male birds soon appear more coarse and have a harsher voice than the pullets. Pullets of any color soon develop what might be called the feminine type of head. It is smaller and more refined than the head of the male bird. The heads, beaks, and even the undeveloped combs on male chicks have a different appearance from pullets.

Some breeders caponize White Leghorn cockerels and make them weigh as much as six pounds but in general the caponizing is confined to the heavier meat breeds like the Barred Plymouth Rock, Jersey Black Giant or Light Brahma.

### Birds Easy to Confine

Because birds such as the flamingo and stork (and others of similar structure) require time in their takeoff to get up speed to fly, it is possible to keep them in open inclosures.

### Big Quantity of Humus in Soil Most Desirable.

One of the important explanations of the desirability of having a quantity of humus or decomposing organic matter in the soil is found in the capacity of humus for soaking up and storing water which is thus made available later for use by growing plants. Experiments have revealed that 100 pounds of sand can hold only 25 pounds of water, and 100 pounds of clay soil can hold only half its weight in water. In contrast, 100 pounds of decaying organic matter may hold as much as 100 pounds, or nearly twice its weight of water. Most soils are mixtures in varying proportions of sand, clay, silt, and organic material. As a rule the greater the proportion of organic matter contained in the soil the greater its water-absorptive capacity, and the greater reserves of moisture it will retain for resistance to drouthy and hot weather.

### Eradicate Barn Flies With Creosote Spray

Flies grow in filth and the first step in cleaning up a place is to remove all the dust, straw, manure, etc., from the barns and haul it out to the fields. Spray the floors and walls with a very strong solution of creosote. It is better to use this dip in its original strength if you can do it. After the dip has soaked in for a day or two spray again with kerosene, following that with an application of naphthalene crystals. Be very careful of fire. Keep the hogs away from these breeding places and it is likely you will have no further trouble.

### Impending Disaster

Speaking of silent drama, there's mother's face when dad asks for more at a company dinner and there isn't any more.—St. Paul Dispatch.

Try This Pleasant Easy Way to Stop a Cold!

Vapure 50 cents

Just a few drops of Vapure on your handkerchief! Then inhale it. The tiny particles of balsam oil compounds lodge in the lining of the nose and throat; soothe the membrane; clear up a cold in no time. Sold only at Rexall Stores.

### Various Good Points

#### of the African Goose

The African goose has had at different times several names, among which were China goose, swan goose, Chinese swan, Guinea goose, Spanish goose and others. Its origin is unknown, but it is quite probable that it originated in a cross between the goose we now call the China goose and the Toulouse, and from this cross was perfected until it is now an enlarged kind of a Brown China goose.

The African goose lays better than any of the other larger breeds and it grows to be as large as any other. Specimens that were given the best care have grown to weigh 25 pounds, but the standard weight for a full-grown African goose is 20 pounds. They are very hardy and easy to raise. They are very watchful and know strangers from those whom they see every day. When a stranger comes among them they set up a clamor that notifies every one within hearing that something out of the ordinary has happened.

### Keep Cream Cool During Hot Months of Summer

To receive the highest price for cream during the hot months, dairymen must exercise extra precautions. The following facts are worthy of consideration:

Water cools 20 times more quickly than air.

A simple cooling system may be made by piping water from the windmill into a hardwood barrel and from there to the stock tank. The cream can be placed in the barrel through which the fresh, cool water flows.

Cream cooled to the proper temperature keeps sweet the longest possible time.

Never mix warm cream with cool cream.

Cream should be stirred frequently.

Cleanliness, cooling, stirring and frequent deliveries of cream are important.

Have your printing done in Kendrick.

### SOUTHWICK ITEMS

Pete Stump and wife drove to Moscow and back Monday.

Mrs. Dave Schoeffler and children visited at the home of Mrs. Schoeffler's sister Saturday evening.

Wm. Henderson and family and Roy Southwick and wife were the guests at the Gordon Harris home Sunday.

John Lettenmaier and family spent Sunday at the Homer Betts home.

Mr. and Mrs. Wm. Kauder spent the day Sunday at the Roy Southwick home at Lenore.

Frank Thornton and family drove to Clarkston Sunday, where they visited at the home of Mrs. Thornton's brother, Fred Whittinger, returning home Monday.

Harold Whittinger and family spent Sunday at the home of John Draper in Juliaetta.

Wm. Berriman and wife returned Saturday from a two week's stay in Clarkston.

Jack Travis, wife and son returned Saturday from Wenatchee where they have been for the past few weeks.

Mrs. Hoffman came up from Leland Sunday to visit her daughter, Mrs. Winegartner.

Mr. and Mrs. Howard Southwick and family, Lois Christensen, Edith Bateman and Walter and Ed Kent were dinner guests at the Dick Winegardner home Sunday.

Nels Longtag and wife and Milton Benjamin and wife spent Sunday at the home of Julius Hoppe.

Austin McCoy and daughter and Chas. Miller and family of Linden were guests at the home of Elmer McCoy Sunday.

Miss Rointon spent the week end with her parents at Koozika.

Mrs. Dick Winegardner and two boys were the over night guests of Mrs. Homer Betts Friday night.

While coming from school Tuesday morning Miss Georgine Christensen was knocked down by a car. She received a severe scalp wound requiring about six stitches to close the wound.

Walter Need has moved his family from the Conner place east of town to Myrtle.

Ben Presnal and family visited with relatives in Palouse the week end.

Mrs. Eva Wright was a dinner guest of Mrs. Arnold Cuddy Sunday.

Mr. and Mrs. Brammer drove to Lewiston Saturday returning home Sunday.

A number of the young people spent Sunday evening at Geo. Christensen's home.

Walter Silflow was an over night guest of the Brammer boys Saturday night.

Doyle Hayward and Ernest Brammer were out on a hunting trip Tuesday.

### Epicurean Porkers Are Favored at Beltsville

The hog's reputation as a gourmand is so general that he is rarely credited with any refinement of appetite. Even farmers were surprised a few years ago to find that these "greedy animals" would select the proper feeds for a balanced ration if served the cafeteria way.

Some hogs, however, it now appears, are capable of even finer gastronomic discrimination, according to J. H. Zeller, swine specialist of the United States Department of Agriculture.

Two shoats at the department's experiment farm at Beltsville, Md., he says, have apparently found the inside of the corn kernel a great delicacy. Unlike most of their kind, they do not eat the whole kernel, but like squirrels spend hours at a time cracking the grain, deftly extracting the meaty inside, and ejecting the kernel shells in neat piles about the lot.

Kernel cracking, however, is not a common accomplishment of the porker, Mr. Zeller says, and he doubts the possibility of teaching the trick to the common herd even if it were found a desirable trait to develop.

### Killing Horse-Radish a Very Difficult Matter

The cutting out of horse-radish after it has become established is a very difficult matter. The same general procedure will need to be followed as in the case of any other weed that has a large storage root. If the infested patches are kept bare so that the plant cannot develop leaves for the manufacturing of plant food, starvation will result. The procedure may be most effective after the land has been plowed quite thoroughly. If the areas are not very extensive they may possibly be cleared out by chemical treatment. However, we have very little information concerning the specific action of these materials on horse-radish.—H. O. Werner, University of Nebraska.

### One Common Mistake in Feeding Dairy Calves

The most common mistake in feeding dairy calves from the bucket is feeding them too much. The amount that a calf should really have, divided over three feeds, seems so ridiculously small that most of us feel stingy about it and are tempted to add a little more. To avoid being generous at the calves' expense it is well to actually weigh the milk for each calf and stick to the rule. Many rules have been given, all emphasizing the danger of overfeeding, but as good a rule as any is one pound of milk to each ten pounds live weight. A fifty pound calf, therefore, would get only five pounds of milk daily, or two quarts. If fed twice daily this would be just a quart of milk at a feed. In some stables this rule is observed so closely that the calf is weighed every month to check up on the amount of milk that should be fed. At no time should a calf get more than 16 pounds of milk daily.

### Live Stock Facts

Corn, soy beans and a well balanced mineral, make a good ration for hogs.

Of the non-legumes, rape is the best forage crop for hogs where it can be grown successfully.

An acre of good forage usually can be depended upon to carry from 1,000 to 2,000 pounds of hogs.

A farm on which hogs are raised, as a major or minor enterprise, should have suitable pastures for hogs.

A good acre of land should produce ample pasture for 20 to 25 pigs from weaning to market age, and if the grower will bear in mind that "a constant supply of green feed is desirable rather than surplus at one time and shortage at another," he can gauge his planning and planting to secure it.

### Export Self-Defense

Jujitsu is the Japanese art of self-defense without weapons. It depends for its effect largely upon the principle of making use of an opponent's strength and weight to disable or injure him and by applying pressure so that his movements will throw him out of balance, dislocate or break a joint, etc. It opposes knowledge and skill to strength and demands an expert knowledge of human anatomy.

### Truth About Eskimos

Eskimos are frequently seen sweating under a powerful sun. The general idea of Eskimos and all inhabitants of the Arctic circle is that they live in conditions of eternal winter. Quite wrong, Mr. Stefansson, the Arctic explorer, tells us. The wild flowers of the Arctic are exquisite, he says, and very few Eskimos have even seen a snow house—or heard of one except at school!

# CONSERVATION

The northwest is rich in timber resources, yet no one urges forest fires to use up the forests.

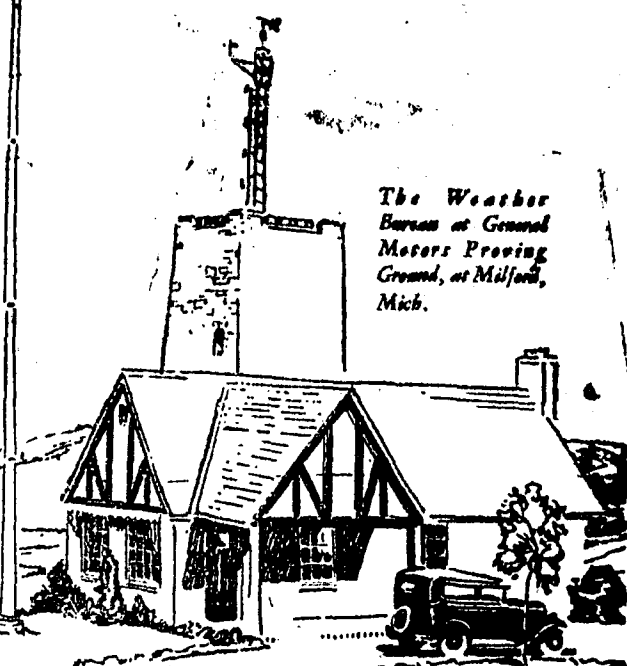

Water power, another resource, must also be developed economically to meet the need for power in this growing territory.

THE WASHINGTON WATERPOWER CO.

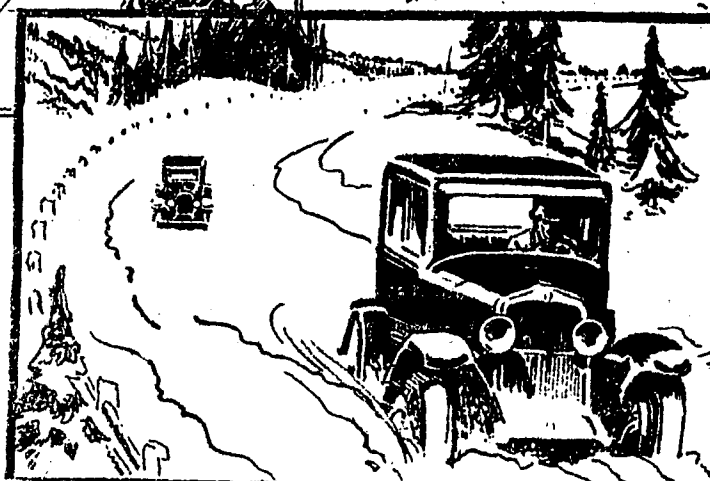

# "What! A weather bureau?"

Testing a car's performance in heavy rain. From actual photograph.

The Weather Bureau at General Motors Proving Ground, at Milford, Mich.

Drawn from a photograph of a car being tested on snowy roads.

VISITORS to General Motors' 12.68-acre Proving Ground marvel at the sight of a complete weather bureau and ask what it is for.

The answer is that in the testing of cars every possible factor that might affect a car's performance is considered by General Motors' engineers.

So precise are some of the tests that even the difference between a sunny day and a partly cloudy day—or between a north breeze and a south breeze—is considered.

With each day's record of the mechanical tests applied to a car on the roads and hills of the Proving Ground is included a report of the exact weather conditions prevailing. The engineers then can know how weather affects performance, and can have a comparable record so that every car tested is given an equal opportunity to prove itself under exactly the same conditions.

Advance models of all the cars listed below were proved at the Proving Ground before they were introduced to the public. Read about them; then clip and send the coupon.

### "A car for every purse and purpose"

**CHEVROLET.** 7 models. \$525—\$695. A six in the price range of the four. Smooth, powerful 6-cylinder valve-in-head engine. Beautiful Fisher Bodies. Also sedan delivery. Light delivery chassis, 1 1/2 ton chassis and 1 1/2 ton chassis with cab, both with four speeds forward.

**PONTIAC.** 7 models. \$745—\$895. Now offers "big six" motoring luxury at low cost. Larger L-head engine; larger Bodies by Fisher. New attractive colors and stylish lines.

**OLDSMOBILE.** 8 models. \$875—\$1035. The Fine Car at Low Price. Now offers further refinements, mechanically and in the Fisher Bodies. Also eight optional equipment combinations in Special and De Luxe line.

**MARQUETTE.** 6 models. \$965—\$1055. Buick's new companion car, designed and built by Buick. Six cylinders. Fisher Bodies. Its price puts Buick quality and craftsmanship within reach of more families.

**OAKLAND.** 9 models. \$1145—

\$1375. Oakland All American Six. Distinctive original appearance. Splendid performance. Luxurious appointments. Attractive colors. Bodies by Fisher.

**VIKING.** 3 models. \$1595. General Motors' new "eight" at medium price. 90-degree V-type engine. Striking Bodies by Fisher. Unusual appointments, also optional equipment combinations.

**BUICK.** 14 models. \$1225—\$1995. Three new wheelbases, 118-124-132 inches. The greatest Buick of them all. Many new mechanical features. Fisher Bodies with new lines.

**LASALLE.** 14 models. \$2295—\$2875. Companion car to Cadillac. Continental lines. Distinctive appearance. 90-degree V-type 8-cylinder engine.

Striking color combinations in beautiful Bodies by Fisher.

**CADILLAC.** 26 models. \$3295—\$7000. The Standard of the World. Famous efficient 8-cylinder 90-degree V-type engine. Luxurious Bodies by Fisher and Fleetwood. Extensive range of color and upholstery combinations. (All Fisher's o. b. Factories)

### ALSO

**FRIGIDAIRE** Automatic Refrigerator. New silent models with cold-control device. Two-tone cabinets. Price and model range to suit every family.

**DELCO-LIGHT** Electric Plants—R. Water Systems. Provide all electrical conveniences and labor-saving devices for the farm.

The fee report of Harry A. Thatcher, as Clerk, Auditor, and Recorder, for the quarter ending October 12, 1929, was examined and approved.
The fee report of Adrian Nelson, as Probate Judge, for the quarter ending October 12, 1929, was examined and approved.
The fee report of Leola R. King, Co. Tax Collector, for the quarter ending October 12, 1929, was examined and approved.
The fee report of Charlie Summerfield, as Sheriff, for the quarter ending October 12, 1929, was examined and approved.
The report of L. P. Hunt, as Superintendent of the County Poor Farm, for the quarter ending October 1, 1929, was examined and approved.
It is at this time ordered that the sum of \$2215.87, be transferred from the Weed Control Fund to the Current Expense Fund of the county.
The indigency affidavit of T. E. Ellis, and application for county aid ordered extended as petitioned.
The indigency affidavit of Dan Sieber, and application for transportation, was examined and granted as petitioned.
The indigency affidavit of Mrs. J. W. Boone, and application for county aid, was examined and approved, and aid ordered extended as petitioned.
The report of Harry A. Thatcher, County Auditor, on interest collected on county deposits, for the quarter ending Sept. 30, 1929, was examined and approved.
Upon the certificate of L. B. Taylor, County Agent, the County Auditor is hereby ordered to extend the weed extermination tax on the S 1/2 SE 1/4 21-38-4, W. B. M., in the sum of \$71.50.
In the matter of bids of Syms York Co., Geo. D. Barnard Stationery Co., Pioneer, Incorporated, and Capital News Publishing Co. for furnishing Latah County with the 1930 tax rolls, after due consideration, a contract also for the 1931 tax rolls, was at this time let to Syms-York Co., for said 1930 tax rolls as follows: Four (4) county real estate; two (2) city and One (1) personal roll, with the necessary tabs, extra sheets for recapitulation, one Graves Index, 16 M. Byron Weston 40th paper, at the agreed price of \$900.00 for the two years.
At this time the clerk presented a list of claims and accounts examined and allowed, and in settlement of which warrants have been ordered drawn at this session of the Board, which list was compared with the proceedings of this Board and found to be correct, and was thereupon duly certified to and delivered to the County Treasurer.
A recess was now taken until Friday, October 25, 1929, at nine o'clock A. M.
ATTEST: HARRY A. THATCHER, Clerk.

They Treat the Freshies Rough in New York

Freshmen of the City College of New York being made to go through wheelbarrow antics by their foes of the sophomore class during the annual interclass carnival.

Pullets and Hens Pay Better if Kept Apart

In order to lay the maximum number of eggs during the winter, pullets that are ready to lay must be well fed during the fall and winter months. They should be well developed and carry a surplus of fat before they are placed in winter quarters. Since these birds are ready for egg production, they should be given feed that will enable them to lay during this season of high prices. Allowing pullets free range to a good laying mash will bring them into production and make them return a profit during the winter. After they stop laying in the fall, there is a natural tendency for hens in the old laying flock to eat much less mash than they have been eating. It, therefore, is a good plan to increase the grain allowance in order to keep them in good flesh. The hens which are to be used as breeders next spring should be given a vacation this winter so that the hatching eggs they lay will produce strong, healthy chicks.—Illinois College of Agriculture.

Agricultural Notes

Feed a dry mash. Hoelng is the life of pens. Give them plenty of it. Sudan grass used for pastures is not nearly so hard on the land as sudan grass used for hay. One of the latest devices is a conveyor and self feeder for baling straw directly from the threshing machine. Vegetables will not develop satisfactorily if the plants are thick, hence judicious thinning is very important. Don't forget to take a daily lookout for bugs and give them a shot of poison. One bug can produce a big family in short order. Unless turnips are thinned just at the right time they will be disappointing. Get them pulled to reasonable distances to permit growth. Light of Darkness A pessimist is a man who goes through life with one eye shut. The optimist has both shut.

Prevent Calf Scours by Using Care in Feeding

Calf scours is a common disease of the digestive tract and is usually caused by indigestion. The calf that scours early in life may be seriously handicapped and of course sometimes dies. Prevention is best but not always possible. Care should be taken that the calf is not overfed, that the milk is always fed warm, and that the milk is uniformly sweet and fed from clean buckets. If scours occur, cut the milk down one-half and give a dose of one to three ounces of castor oil or of mineral oil. Raw eggs may be used to correct the trouble. Two or three tablespoonsful of lime water in the milk is sometimes effective.

Gossip and Ignorance

It is among uneducated women that we may look for the most confirmed gossips. Goethe tells us there is nothing more frightful than bustling ignorance.—Chaunfort.

The Good Old Days

One of the best things about counting on the old sofa and in the hammock was that a fellow could go home with just as much money in his jeans as he had when he arrived.—Cincinnati Enquirer.

Lesson Not Absorbed "The wisdom of our ancestors," said Hi Ho, the sage of Chinatown, "gives us reverent pleasure, but never saves us from the same mistakes our ancestors made."—Washington Star.

## LOCAL NEWS

Mr. and Mrs. Clifford Davidson were Lewiston visitors Saturday.

Dr. and Mrs. McKeever entertained with a bridge supper last Saturday evening, having as their guests Mr. and Mrs. Jones, Carroll and Behrens.

Mrs. W. Watts and the Misses Rilla and Marjory Davidson spent the week end in Deary with Mrs. John Waide.

Mr. and Mrs. H. P. Hull, son and wife accompanied Rev. and Mrs. Franklin to Clarkston last Saturday to the Harvest Festival.

Mrs. G. W. McKeever was a Moscow visitor last week end. Mrs. Claire Stanton left for her home at Greer Monday.

A. C. Deeter went to Moscow Tuesday.

Mrs. Groth and Mrs. Fraser motored to Lewiston Tuesday.

Fred Flaig and family visited their relatives, the McDowell family, Sunday. They motored thru the Cedar Creek country Sunday afternoon, and in the evening Mr. and Mrs. Flaig started on their return to St. Maries.

A. E. Robbins and family returned Tuesday from Wilder near Boise, after visiting for a week with their two daughters there.

Oscar Raby visited Cream ridge last week. While there he attended the Hallowe'en celebration at Agatha School House.

Mr. H. P. Hull, Kendrick's veteran pioneer, has been confined to his home by illness for several days.

At Rebecca lodge Tuesday evening an oyster supper was given as a surprise to Mrs. Cook, who had returned from Grand Lodge at Burley. Mrs. Cook gave an interesting account of the meeting of the Grand Lodge.

J. L. Johnson is shipping his

fine quality Italian prunes by parcel post, express and freight to various points in Northern Idaho and Eastern Washington. Mr. Johnson is skilled in drying prunes in such a manner as to preserve the natural flavor.

Mrs. Scott of Clarkston and Miss Fern Carlyle visited from Sunday to Tuesday at the home of Mrs. E. W. Fraser.

Mr. and Mrs. Georg Broeke have rented the John Dammarell residence.

Mr. and Mrs. G. F. Walker visited Mr. Walker's mother at Peek, over the week end.

Mr. and Mrs. Philip Asplund of Troy were week end visitors at the E. H. Dammarell home.

The Presbyterian Ladies' Aid put on their play, "The Ladies' Aid Strike," at Lapwai Wednesday evening. We think Kendrick can feel highly elated for the wonderful talented people that live here. For a town of not over 600 population, when it comes to home talents, Kendrick surely "puts it over." Be it Musical, Comedy, or Classic, there's no question, our people do not have to take a back seat.

Mrs. John Dammarell and children are visiting at the Wesley Hartinger home at Lealand.

Everett, Kenneth and Elmer Frasier left Saturday for a weeks hunting trip in the Selway country.

Mr. A. C. Deeter left for Moscow Monday where he is serving on the jury.

Mrs. Everitt Frasier is carrying the mail for Mr. Frasier this week while the latter is hunting.

Miss Emma Haag is staying at the Everitt Frasier home.

Mr. and Mrs. Keith Dammarell and children from Rubens' spent the week end at the E. H. Dammarell home. Mr. Keith Dammarell was assistant cashier at the Farmers bank for four years.

Mr. and Mrs. Archie May, Mr. and Mrs. Frank W. Ellis, and

Mr. Clyds Daugherty attended the Elk's doings Thursday evening at Lewiston.

Mr. Frank W. Ellis was a Kooskia business visitor Thursday. Mrs. Ellis accompanied him on the trip.

Miss Margaret Daugherty entertained six of her little friends at a Hallowe'en party last Thursday evening. Games, Jack-o-Lanterns, and spooky stories were enjoyed.

Mrs. Daugherty served a dainty lunch after which the guests departed, calling Miss Margaret a perfect hostess.

Messrs. Tom Long, Wade Keene, John Woody, Geo. Davidson, Ben and Nora Callison left Tuesday for the Selway to be gone on a hunting trip for a week or ten days.

About 15 of the Kendrick Star Rebecca Lodge surprised Mrs. H. B. Stanton with a handkerchief shower between 7 and 8 o'clock Friday evening. Mrs. Stanton received a lot of very pretty handkerchiefs. The Rebeccas regret very much to have such a faithful member as Mrs. Stanton leave. Nevertheless we wish her well in her new home.

Mrs. Sylvia Cook entertained the afternoon bridge club at her home Saturday afternoon. High honors went to Mrs. Byrd Consolation to Mrs. Herras. After several hours of playing the hostess served a dainty lunch.

Mr. and Mrs. Frank W. Ellis were Walla Walla week end visitors Sunday morning. They attended the First Pres. church which is a beautiful big church, with a large pipe organ. On their return Sunday they called on the Jack Heacox family at Dayton. The Heacox's friends will be glad to know they are doing wonderfully well in their new business at Dayton. Mr. and Mrs. Heacox were formerly in the confectionery business at Julietta.

**Measuring Actions**  
Fools measure actions after they are done by the event; wise men beforehand, by the rules of reason and right.—Bishop Hale.

## NORTH IDAHO NEWS

(Continued from page 1)

Mexico, California, Oregon and Washington.

Central Idaho is all pepped up over the bonding of some thirty claims in the Green Mountain section by the Bradley interests or the Bunker Hill & Sullivan Mining & Concentrating company. Oscar Hersey, nationally known engineer and geologist, has been on the ground, and it is reported that a crew will work all winter with the idea of completing a program of underground development so that the property may be more thoroughly examined in the spring. The ore is silver-copper and is described as very rich.

It is reported that a MacL Marr store will open at Kamiah in the near future.

The first night landing in the history of Lewiston and Clarkston was made at 7 o'clock Friday by Ensign Jones and Blum, both of the Sand Point base, Seattle.

5,000 cases of the new "Date Prunes" have been canned this season at Clarkston.

### MOSCOW, IDAHO (Special)

An air circus bringing a dozen to 16 planes to Moscow for two days, including a contingent of army bombing planes from the national guard unit of Spokane, is promised for aviation fans of this territory as a feature for an Armistice day Celebration at Moscow.

### Cat Mother's Sparrow

Trained not to harm birds, a cat in London is mothering a tiny sparrow. Recently the half-fledged bird fell out of its nest and lay neglected on the lawn. Puss took it in her mouth and deposited it in her basket, where she had two kittens, and curled up to sleep with the little tabbies and the foundling. The owner of the cat fed the tiny stranger until it grew feathers. It now flies in and out of the window and often sits on the cat's back.

### Famous French Institution

The Hotel des Invalides is the famous military hospital and soldiers' home in Paris. It was founded in 1670.

### Selecting a Sire

Thorough investigation should be made to measure the true worth of a bull in selecting a proved sire. The fact that a sire has a number of tested daughters is not adequate and may be no reliable measure of his worth.

A proved sire is considered to be one with five or six unselected daughters with records, preferably for one year. Tests show that a sire mated with a given type of cow will continue to produce similar daughters. If six of the daughters are good, the sire should be saved.

### Live Stock Notes

All lambs should be docked and the ram lambs castrated.

The sheep man should gauge the feed given by the condition of the ewes, but it is always advisable to feed some grain for at least six weeks before lambing.

Bloating is to some extent an individual matter with the animals, some animals showing a much more frequent tendency to bloat than others, possibly because they are more greedy.

Farm ewes need exercise. Feed them so as to move them away from the barn lot.

Swine sanitation will result in saving a larger percentage of pigs and more economical gains for feed consumed.

It has been estimated that only 50 per cent of the pigs farrowed live to marketable age. It is commonly assumed that 90 per cent of all losses from diseases in swine may be charged to hog cholera.

### Important Advantage of Taking Manure to Field

One important advantage of hauling manure to the field daily on the dairy farm is the fact that direct hauling robs flies of an excellent place to breed and multiply. Flies are a serious menace to milk sanitation, in fact, a prominent dairyman stated recently that he considered the control of flies sufficient reason in itself for hauling out farm manure daily.

Besides controlling flies and keeping the barnyard cleaner and more slightly, direct hauling of manure prevents losses from leaching, fermentation and other agencies.

### Alfalfa Probably Best Hog Pasture Obtainable

Alfalfa is probably the best hog pasture that can be obtained. It will support more hogs per acre than any other forage and has a longer growing season. It is followed closely by red clover, sweet clover and alsike. Sweet clover will not be very satisfactory the second year nor if it is allowed to grow rank. Rape, or rape and oats mixtures make good forage when legumes are not available. Blue grass is probably the most extensive used, but is the least satisfactory to the common forages. It is the one most likely to be infested with parasites because of its permanency, and has little feeding value for hogs during the hot summer months.

### Temptation

If you would not fall into sin, do not sit by the door of temptation.—Goffe and Spurgeon.

## A Modern Electric Laundry

### That Does Away With Two Days of Hard Work—Each Week

According to the previous order of housekeeping—Monday was wash day—Tuesday ironing day.

Now this idea is not only out-of-date but absolutely unnecessary.

To all who use our electric service we bring good news.

The new Thor Combination, consisting of an Electric Washer and Electric Ironer—or a complete electric laundry—is offered at a reduced price and only One Dollar Down.

This opportunity is presented for a short while only.
