

NEWSY ITEMS FROM NORTHERN IDAHO

SUMMARY OF EXCHANGES FOR BENEFIT OF GAZETTE READERS

Craigmont's city jail, a modern fireproof structure, is rapidly nearing completion.

Credited with producing 12,425 pounds of milk and 305 pounds of butterfat in 130 days, Idaho Piebe Priscilla, a three-year-old purebred Holstein-Friesian cow owned by the University of Idaho college of agriculture, has broken the old state 7-day milk production record, and bids fair to smash a few more records before her year's test is finished.

Some of the finest turkey stock of the country is expected to be on exhibition at the Idaho National Turkey show which will be held in Boise, December 17 to 20 inclusive, it is announced by Frank J. Keenan, manager. An institute will be held two days during the show and experts will give information on the care and raising of turkeys. The show is made possible through the cooperation of the Boise Chamber of Commerce and the Retail Merchants' Bureau, and a large list of premiums have been provided.

The third tragedy among the Clearwater Indians in the past month occurred Saturday, when Dorothy Allen, 14-year-old Indian girl of Lapwai, was killed in an auto accident. Reckless driving is given as the cause.

A new dormitory for girls will be constructed at the Lewiston Normal in the near future.

Fearful that another serious outbreak of hemorrhage septicemia will ravage the livestock of the central Idaho and eastern Washington regions this winter, stockmen are now resorting to vaccination in an effort to prevent the disease from spreading as it did last February.

The Children's Home in Lewiston now has an enrollment of 55, the largest in its history. A number of building improvements have recently been authorized. The receipts of the Home have been \$16,000 so far this year.

The Clarkston Chamber of Commerce are laying plans for the organization of a poultry association (to embrace Asotin and Nez Perce counties).

The first car of dressed turkeys to be shipped out of Lapwai was started on its journey to Southern Idaho, Friday. From Nampa it will go into a pool, and will be sent to Philadelphia. The weight of the dressed birds is 10,500 pounds.

Orofino.—The Atherton building on Main Street has been sold to Portfors Motor Company.

The crash in the stock market has caused a sharp decline in the demand for furs, Coyote, Slink, marten, and other furs, which ordinarily bring good prices, are a drug on the market, and northern Idaho trappers are finding it hard to keep going. Furs are a luxury, and the demand for all luxuries declines when people throw their savings away in stock speculation.

Eighty earloads of apples are being held in Lewiston warehouses for better prices.

Leonard J. Warmell, 95, Asotin county's oldest resident and for 50 years a prominent citizen of the county passed away at Asotin, Friday.

The Washburn-Wilson Seed company have purchased 200 acres more land near Moscow for raising seeds for the market. Idaho Falls won the football championship of the state on Thanksgiving day by defeating the fast Rupert team 14-6.

The Spokane Chamber of Commerce is seeking to have Asotin county included in that part of Eastern Washington which has mountain time. It believes all northern Idaho would be better off with mountain time, which would set all clocks up an hour, and would "give us daylight saving both summer and winter."

A PLEASANT PARTY

The Neighbors of Woodcraft Circle No. 456 gave a pleasing party at Fraternal Temple Wednesday evening. The 45 guests played pinochle and bridge till eleven o'clock, after which they partook of dainty refreshments. Mrs. Frank Boyd presided at the bridge group and Mrs. Ira Bolton at the pinochle group. Mrs. Oppenborn was the committee chairman in charge of refreshments.

GOOD SHOW THIS WEEK

"The Godless Girl," to be shown at the Kendrick Theatre Friday and Saturday of this week is widely heralded as a sensational melodrama. One critic has numbered it among the first ten best pictures of the year.

Many notable screen players appear in the cast of "The Godless Girl." They include Lina Basquette, former Follies girl and dancer who scored in "Ranger of the North," "The Noose" and other photoplays; Marie Prevost, famous star comedienne in Pathe pictures; George Duryea, a promising newcomer to the screen who scored in "Marked Money;" Noah Beery, the greatest screen heavy character player who won world wide fame by his work in "Bean Gests" and many other pictures; Eddie Quillan, a new recruit to the screen who won praise by his capital work in "Show Folks;" Julia Faye, whose work in "The Volga Boatman" and "Chicago" was greatly admired; Kate Price, a stage favorite; Clarence Burton, Mary Jane Irving, Hedvig Reicher and others. Indeed, the cast was picked with care and the results are apparent in the effective characterizations of which "The Godless Girl" can boast.

A GREAT GAME AND A GREAT CAUSE

Spokane, Wash.—More than \$10,000 was realized from the first annual football game for the Shrine hospital for crippled children, Spokane a week ago last Saturday, when the Inland Empire All Stars defeated the Spokane All Stars, before a crowd of more than 8,000 people. Both teams were well named as they were all there, but Kennedy of Sandpoint, fullback on the invaders, shone above them all. His number was 13 and he is the son of a butter maker of Sandpoint.

It was a great football game for a great cause. The officials donated their services, and Spokane business men guaranteed the expenses. All money will be used for the hospital. It was reported that this will be a yearly event so that the hospital in time can be enlarged to care for those on the waiting list.

Asotin county is receiving cash taxes more rapidly than for several years, which indicates that the people are prosperous.

According to the Troy News, "It is understood that the next road work of importance to be undertaken in this district is the improvement of the American ridge highway. This road is called upon to take care of an immense amount of traffic annually, being a part of the main thoroughfare from this section to the Clearwater and Snake river regions and shortening the distance from here to Lewiston a number of miles by way of Kendrick and Juliaetta."

George L. Huber, a graduate of Kellogg high school and at the University of Idaho, has been awarded a Rhodes scholarship at Oxford. This scholarship carries a stipend of 400 pounds (about \$2000) annually for three years.

Two bullet proof vests have been purchased by the Nez Perce county commissioners for use by the sheriff and his deputies. This step was taken by the commissioners because they believe the lives of law enforcement officers are being constantly jeopardized by the type of criminals now operating all over the United States.

HAND COLORED SLIDES WILL BE SHOWN

Next Thursday evening there will be an illustrated lecture at the Kendrick Theatre, featuring a series of beautiful hand colored slides. The title of the lecture is "Flaming Canyons and Prismatic Amphitheatres." These slides show 150 views that are said to be spectacular and thrilling. The lecture on the slides as they appear will be given by E. E. Holmes, of the Lewiston Normal School. Mr. Holmes is well known as an entertaining speaker.

This lecture is sponsored by the Loheese Club, and the net proceeds will go into the library fund. Those who attend will enjoy and evening of high class entertainment, and they will at the same time help a splendid cause.

The price is only 25c and 10c.

FARMERS HOLD IMPORTANT MEETING

MOVEMENT TOWARD IDAHO'S FIRST LOCAL COOPERATIVE IS BEGUN

A week ago last Wednesday 200 farmers of Latah and adjoining counties met at Moscow to organize the first Idaho local group under the farm marketing act. Machinery was set in motion to this end, and nine men were charged with the responsibility of carrying the project through. These men are J. A. Harsh, Deary; Ole Bohman, Troy; Hawkin Melgard, J. S. Heckathorn and Harry Whitier, Moscow bankers; Ted Nelson, Moscow; Fred Goetz, Viola; and Ed Snow, Moscow, farmers; and G. P. Mix.

It is estimated that within three months "the local cooperative will be on entity by itself, with an organization, warehouse and elevator facilities leased or friendly, officers and manager elected, ready to function on next year's crop of Latah county."

Several growers have already signed with the local, or have indicated their intention to do so. The largest of these, the Moscow Elevator company, alone, will throw 250,000 bushels into the pool.

Harry Goldsworth of Rosalia declared in his speech before the assembled farmers that the local cooperative will save money for its members in several ways. First, he said, it will save one cent per bushel handling charges, second, by operating its own terminal facilities it will save from four to seven cents per bushel, third, it will give its members a lower interest rate on loans by negotiating these loans thru the machinery of the marketing act. And fourth, it will reap any profit that may accrue from stabilization corporations to be established by the national farm board.

It appeared to be the opinion of those that expressed themselves at the meeting that farmers have nothing to lose and a great deal to gain by joining the local cooperative.

GOOD MUSIC AT BROWN'S HALL

The music provided by the DeFrau and Fanning Dance Band at Brown's Hall last Friday was greatly appreciated by those who attended the dance. The same band will play at the dance tonight (Friday, Dec. 13), and a larger attendance is expected.

BAND CONCERT POSTPONED

The Public Concert which the Kendrick band had hoped to give in the near future has been postponed till after the holidays, because of the prevalence of colds and mumps.

Mrs. Arless Crocker and Mrs. Benjamin are guests of their mother, Mrs. B. N. Emmett, this week.

MORE ABOUT KEND- RICK FIRES AND FLOOD

Dec. 3, 1929.
Plummer, Idaho

Kendrick Gazette
Kendrick, Idaho
Dear Editor,

My daughter, Mrs. Geo. Gregory sent me the Gazette dated Nov. 22, which asked the question, "When did the Kendrick big fires and Flood occur?" According to my diary, the first one was August 16, 1892; the second, August 5, 1904. There were only two. The Flood January 12, 1900. The Flood was caused by the big wrick, which occurred between my house and the Vollmer warehouse. The track was so weakened that the weight of the water forced it away.

Yours truly,
Mrs. J. W. Bricker
(F. E. Meyer)

TOWN TEAM WINS TWO OUT OF THREE

HOOPERS, OUT TO WIN MAKE GOOD SHOWING IN EARLY GAMES

Kendrick Town Basket Ball team won a fairly fast game from the Southwick Club Tuesday night in the Kendrick gymnasium. Both teams used a man-to-man defense, thus speeding up the game. The final score was 54-28.

The line-up of the teams and scoring follow:

Kendrick points position
Ed. Dammarel (18) RF
W. C. Jones (14) LF
Fred Jessup (1) C
Marvin Dickson (6) RG
Ralph Woody (4) LG

Southwick points position
Ben Cook (8) RF
R. Armitage LF (10)
Evans (3) C
B. King (1) RG
TRAIL (6) LG

Kendrick substitutions: Flaig for Jessup, Broeke for Woody.
Southwick substitutions: Trail for Zeeman, Travis for King, Zeeman for Trail.
Referee: Art Foster.

Kendrick defeated Southwick earlier in the season 45-44, and in turn lost to Lapwai at Lapwai 27-38.

The Town team asks for the town's support, as they have a few expenses to meet.

A very important note of the affair is that a winning team advertises the town, and they promise to be out to win.

LINDEN

Mrs. F. K. Grayson enjoyed a visit from her sister and family of Lewiston last week.

Mrs. C. H. Fry went to Kendrick Friday to be with her children over the week end while Bob was entertaining the mumps.

Mrs. Jim Smith and daughter spent Friday afternoon with Mrs. Weyen.

A large crowd attended the dance here Friday evening and reported a good time.

Mr. and Mrs. Clem Israel called on the C. E. Harris family Sunday.

Mrs. York Martin spent the week end with her husband who is in a Lewiston hospital.

Addison Alexander and Walter Carnin visited Mrs. Adah Alexander Sunday who is in St. Joseph's hospital at Lewiston.

Mr. and Mrs. C. H. Keeler, Mrs. Jim Smith, Grandma Keeler, and Mrs. Craig were dinner guests at the Smith home Sunday.

Mrs. Herman Schupfer was a Troy visitor Friday.

Mrs. Dora Heil was a Moscow visitor Monday.

Mrs. Biglow went to Moscow Thursday.
Mrs. N. B. Long has gone to Spokane to visit her daughter till the first of the year.
Mr. and Mrs. Frank W. Ellis were Moscow visitors Saturday.

IRA HAVEN ODD FELLOW HEAD

At the regular meeting, Saturday Dec. 2, Ira Haven was elected Noble Grand; J. B. Davis, Vice Grand; Edgar Long, recording secretary; J. B. Helman, financial secretary; E. H. Emery, treasurer; and N. Broeke to serve on the board of trustees for a term of three years.

R. H. Ramey is captain of the degree staff.
The Lodge conferred the third degree and at a late hour, lunch was served by N. Broeke.

POULTRY SHORT COURSE PROVES POPULAR

UNIVERSITY OF IDAHO,
Dec.—Poultry farmers who desire to broaden their technical knowledge of the industry will have an opportunity to do so at the fifth annual poultry short course offered by the University of Idaho college of agriculture, which opens December 16 and continues for one week. The course, explains Prof. C. W. Lampan, head of the poultry department, is a condensed and intensive consideration of the various major phases of poultry raising, covering such topics as incubation, brooding, feeding and management of chicks, disease prevention, culling, feeding for winter egg production, turkey raising, and many other topics.

Last year the attendance at this short course increased 60 percent over that of the previous year. A similar increase is anticipated this year in view of the large number of farmers in northern Idaho who are adding poultry as a side line.
The short course was set for the early date so that knowledge gained might be used to advantage during the period of high egg prices this winter.

SALE IS GREAT SUCCESS

The annual dinner and sale sponsored by the Presbyterian Ladies' Aid in the dining room of the Commercial Hotel last Saturday evening proved a gratifying success. It seemed as if just about everyone in the village declared time off to partake of the delicious chicken dinner.

Although a good many articles were sold during the afternoon, there was still a goodly assortment left in the evening, and it was decided that everything remaining should be auctioned. Under the skillful action of Mr. N. E. Ware, most everything—fruit, Christmas cards, novelties, hand work, etc.—bought a very good price.

More than \$100 was realized from the dinner and sale.

Saturday evening, Dec. 14, the Methodist Ladies' Aid will put on a supper in the basement of the church, similar to that given last week by the Presbyterians; and Kendrick people will then have another chance to enjoy a feast, in a good cause.

HOOVER THANKS IDAHO FOR HER COOPERATION

President Hoover in a letter to Governor H. C. Baldrige expresses his appreciation of the cooperation pledged by Idaho to the president's 1930 "Prosperity boom" program. The text of the president's letter follows:

"I have received your response to my telegram of Nov. 23. I deeply appreciate the fine spirit of cooperation which you have extended in this national effort. I am arranging for Secretary Lamont to keep you informed as to the progress in other states in order that you may be assured of the unity of action necessary for national results. Yours faithfully,
"HERBERT HOOVER"

Nettie Mae McDowell will return to school Monday, after having recovered from the mumps.

Mr. M. O. Raby made a business trip to Spokane Sunday and returned Monday.

HYDE'S REPORT BREATHES OPTIMISM

SECRETARY GIVES BIRD'S EYE VIEW OF AGRICULTURAL SITUATION

On December 7, Secretary of Agriculture Arthur M. Hyde's annual report to the President was made public. The Secretary's conclusions in regard to the outlook for agriculture are on the whole, encouraging. His report brings out, among other things, the following facts:

The widespread drought of the past year has resulted in a lowered production, but the total income from farms for 1929-30 will equal, if it does not exceed that of 1928-29.

Gross returns to livestock producers in 1929 were \$93,000,000 greater than those in 1928.

Prices of butter, cheese, and other dairy products have averaged slightly lower than prices did in 1928. We still produce less, by one percent, than we consume, however, and the dairy industry is in a stable and healthy condition, despite increased output.

Land values declined a little during the year 1929, but the value of livestock and personal property increased so much that agricultural real estate and personal property to gether are worth \$400,000,000 more now than they were worth in 1928.

Commenting on The Agricultural Marketing Act, Mr. Hyde declares that rapid progress may be expected from now on in the coordination of cooperative marketing. "Time will be required to work out the necessary details," but when this is done, "an important step will have been taken toward placing agriculture on a parity from a business standpoint with other industries."

Farmers will probably be sorry to learn that, throughout the country, taxes on farm property have increased 1 1/2 percent. However, the movement for readjustment is strong and will, according to the Secretary, result, eventually, in equalizing the tax burden among all the tax paying groups. He believes, in other words, that the burden on land will be somewhat lightened as time goes on.

The drift of population from the country to the city continues, but at a slower rate. 1,960,000 persons left the farm during the year, but to offset this, 1,362,000 persons forsook the city for the farm.

Secretary Hyde's remedy for over extended agriculture is to curtail production. We must cease to cultivate poor land, and must proceed slowly in expanding our acreage. Farms "where basic physical conditions or general economic conditions are unfavorable" should no longer be tilled.

SELLING IDAHO BY ADVERTISING

Boise.—Sixty-eight persons in 15 different states answered advertising of the Idaho State Chamber of Commerce in the week ending November 29. Some of the answers came from points as distant as Ohio, New Jersey and North Carolina. Questionnaires to determine their interest in the state are mailed immediately to those inquirers.

In addition the chamber received nine questionnaires from persons who had previously answered chamber of commerce advertising. A great many of these inquirers say they are coming to Idaho next summer.

The type of advertising now being done by the chamber is classified insertions telling of Idaho. These are appearing once each week in a large number of middle-west and coast papers. The combined circulation of the papers in which they are printed is several millions.

Miss Opal Davis has been quite seriously ill the past week.

Published every Friday at Kendrick Idaho, by
Rollien Dickerson
Independent in Politics

Subscription Price \$1.50

Entered at the Post Office at Kendrick as second class mail matter.

To give an idea of how much this part of the state was benefited by the recent carlot shipment of poultry to the Seattle market Wm. Ruhoff figured up this week and informs us the shipment left \$486.53 more with the farmers here than if the same amount of poultry had been shipped out by express in coops, which is conclusive evidence that it pays to ship in large quantities.—Cottonwood Chronicle.

SWAT THE BILLBOARD

The Goodyear Tire company will abandon billboard advertising and will spend more money for newspaper advertising instead. This great concern has come to the conclusion that it is newspaper advertising that pays. Besides, as the taste of the people gradually improves, public opinion will become more and more critical of the unsightly billboard; and the Goodyear company has the good sense to see that it may eventually lose the public's good will, if it should persist in billboard advertising.

It is devoutly to be hoped that other concerns will follow a similar policy, and that another evidence of bad taste in America will disappear,—for surely the typical billboard, with its blatant hugeness, and its ruination of natural beauty, is evidence of that "American barbarism" of which so many cultured Europeans have accused us.

The movement that has been started by the Lohese Club to build up a library for young people is worthy of the support of every citizen in this community. Those who subscribe for magazines sold by the club will be doing both themselves and Kendrick a favor; for each magazine subscription adds a few pennies to the library fund.

DEARY BACKS IT'S PAPER

Editor Ben S. Nelson of The Deary Enterprise is to be congratulated on the neat and newsy little paper he is publishing. It is said that every business man in the village of Deary is advertising in the local paper. This fact must indeed gladden the editor's heart, not alone because advertising fills the editor's larder but because it leaves no room for doubt that the town is backing him 100 percent.

The editor of the Kendrick Gazette and 10,000 others like him would be as proud as seven peacocks and as happy as a newlywed, if their papers had the backing of every business man in town.

Good luck, Editor Nelson.

STOCK MARKET CRASH NATIONAL CALAMITY

Our greatest national asset is confidence. Men who destroy such confidence come pretty close to constituting a national menace. The Wall Street barons should be made to realize their little money-mad speculator who permits himself to be drawn into the trap, ruins himself and everything about him. One apparent good result of the recent market debacle is the face about towards honest industry and legitimate profits.

Wall street barons accept no public responsibility. Their cowardly and selfish tactics deserve public condemnation. With all their ill-gotten money power they cannot permanently impair the great strength of the great nation of the United States, but they have wrought frightful damage to that most unfortunate class of our citizenship, the small speculator.

Summing It Up

Fear does not prevent the approach of that which is feared; it only exhausts beforehand the strength one needs to meet the thing he fears.

Highest Falls

The Kaleteur falls, highest in the world, and more than five times the height of Niagara, are situated about 250 miles from Georgetown, British Guiana.

LELAND NEWS

Mr. and Mrs. R. B. Parks are visiting at Palouse and Spokane.

Several of the Leland farmers attended the wheat growers meeting in Lewiston Monday.

Mr. and Mrs. Fred Haase and family were Sunday guests at the C. P. Powell home.

Mrs. Wm. Gephart has been visiting her sister, Mrs. Wade Candler at Orofino, returning Tuesday.

Born to Mr. and Mrs. Jesse Thornton in a Lewiston hospital, a son.

Mr. and Mrs. A. G. Peters motored to Spokane Friday visiting Mrs. Peters sister and visiting with Henry Peters family on their way home.

Virgil Fleschman was a business visitor in Lewiston Monday.

Byron Tupper of Clarkston spent Tuesday and Wednesday at the Enoch Harrison home.

Helen Jones returned to school Monday after having the mumps.

Mrs. Ernest Schmidt visited her daughter, Mrs. Herman Meyers, Wednesday.

Mr. and Mrs. Turnbaugh and Miss Ruby Heffel were Tuesday evening guests at the E. Harrison home.

Rev. Dills, presiding elder, was here Sunday and preached to a good sized meeting at the morning service.

Mr. and Mrs. E. Harrison and Mrs. Wm. Clem and son Junior were Sunday dinner guests at the Lyle Harrison home.

L. H. Daugherty and Jeff Fowler spent a few days visiting at the T. H. Daugherty home.

Mrs. Fred Arnold and family called on Mrs. Virgil Fleschman Monday afternoon.

Corinne Goudzward spent the night Monday with Neva Craig.

Those on the sick list this week are the Misses Mildred and Maxine Fleschman, Roy Blankenship, Denzil Kuykendall and Clayton Gephart.

Emmet Thornton of Lapwai was here Tuesday to attend the funeral of Richard Blankenship.

Mr. and Mrs. Ed Johnson visited at the R. C. Smith home Sunday.

There were several present at the League Party given at the R. M. Smith home.

Miss Jennie Fleschman is spending a few days visiting her parents, Mr. and Mrs. J. T. Fleschman.

Vera Bernadine, Irene and Cornelia Peters spent the week end with their grandparents, Mr. and Mrs. T. H. Daugherty.

Tasty Salads

Place pieces of grapefruit on lettuce. Top with a slice of orange and sweet dressing.

Select large orange and grapefruit. Peel and skin out the sections. Place lettuce leaf on plate. Arrange two sections of fruit, grapefruit, orange and pear, across the plate. Stripe the top of each with a thin cutting of green pepper.

Oranges, sliced and covered with sliced bananas and walnuts.

Four dates or soaked prunes, stuffed with cheese on sections of grapefruit or orange.

My Favorite Stories

by Irvin S. Cobb

For Purposes of Concealment

NOT so very long ago the military attacks of one of these flywheel republics in Central America, where they are always having revolutions, came up to New York from the legation at Washington on important official business. Calling upon a military tailor on Fifth avenue he explained his mission. There had been a change of administrations in his country—the first one, it would seem, in nearly nine months—and the new government had decided to alter the uniforms of all branches of the national defense.

It was the visitor's purpose to give the contracts. He had brought with him special designs, hand-colored in the chosen effects. There ensued a busy time in the tailor shop. It would seem that the fancy of the Central Americans ran to startling contrasts in color and to much use of braid, buttons, rosettes, festoons and plumage.

Undress and full-dress had been selected for the navy, for the officers and men of the infantry, and for the artillery. Next, the attache produced a drawing for a costume more gorgeous than any he already had shown. There was a cocked hat, rather resembling the kind worn by the Knights Templar in this country excepting that it was bright red in color with an adornment of vivid green parrot feathers floating out behind. There was a double-breasted blue coat heavily embossed with gold lace on the cuffs, sleeves, breast, collar and skirts. There were baggy, crimson riding breeches also, belaced down the seams. There was a pair of shiny black, patent-leather riding boots with an adornment of silver spurs and, for final touches, massive bullion epaulettes and white crossbelts finished off with bright buckles.

"Ah," said the dazzled tailor, "how very striking! I presume this uniform is to be worn by your cavalry?"
"Oh, no," said the attache. "This is for our secret service."

Directions for Washing

Various Silk Garments

Silk manufacturers have given considerable attention to the matter of dyeing their products in such a way that they can be washed. While it has been found possible to use certain dyes that will withstand high temperatures, the silk itself suffers if put into too hot water. Both colors and fabric come out best when lukewarm water is used for washing.

The bureau of home economics of the United States Department of Agriculture gives these directions for washing silk garments of any kind: Use lukewarm and neutral soaps. Do not rub hard. Squeeze and work the garments in the suds. Do not twist the fabric. Rinse thoroughly in water of the same temperature, and remove the water finally by squeezing and patting between dry towels. Dry as quickly as possible, but never in the sun. Silk hose should not be ironed, and many other knit silk garments do not need pressing. For crepe de chine and other woven silks, use a warm, but not hot, iron, and protect the fabric with cheesecloth. The fabric should be evenly damp, but not wet. To keep pongee silk from spotting, iron it dry.

My Favorite Stories

by Irvin S. Cobb

Leaving While the Leaving Was Good

BERT SWOR, the minstrel man, uses real life incidents for the material of his monologue acts. He gathers them up in the South during his vacations and repeats them on the stage in the theatrical season.

Here is one which he tells in black-face with great effect. He swears it really happened in a small Texas town:

It seems a colored girl was entertaining a gentleman friend when another suitor for her favor appeared at the locked front door and demanded admittance. There was jealousy in his manner and anger in his voice. Also, there was a justifiable suspicion on the part of the occupants of the house that he might be toting a razor. Anyhow, the newcomer had a reputation for behaving violently at times. His rival within doors was of a more pacific turn of mind.

"Gal," he said to his hostess, "I ain't a-minin' to have no rookus wid dat tough nigger outside yonder."

"You ain't skeered of him, is you?" demanded the lady.

"I ain't skeered—I-se jest careful, that's all. I reckon de best thing fur me to do is jest to climb out of one of dese here back windows and go on 'bout my bizness."

"You better not do dat," said the girl. "Dey's a dwag in de back yard."

"Honey," quoth the departing one as he skinned over the window sill, "de way things is out in front it don't make no dif'rence to me ef de back yard is upholstered in dawgs."

Corn Smut Will Decrease Yields

Disease Is Caused by Certain Type of Germ Belonging to Molds.

"The enlarged outgrowths or galls which may now be seen on the corn is smut," according to W. E. Brentzel, botanist and plant pathologist at the North Dakota Agricultural College.

"This disease is caused by a certain type of germ belonging to the class known as molds. These germs may now be seen as a black powder falling from the corn smut galls. They pass from one season into the next by wintering over in old diseased stalks, sometimes in the soil and may also live in manure for several months.

"Corn smut is not particular about which part of the plant to grow on. When the parasite attacks the ears the grain usually is a total loss. When other parts of the plants are smutted, such as the leaves, tassels, silks and nodes, the amount of loss is hard to estimate. Often the plants are broken over, sometimes by the excessive weight of the smut galls and sometimes by the weakening of parts where the smut growth comes out. In one way or another smut is causing heavy losses in some fields.

"Growers have asked whetherilage made from these smutted ears and stalks will injure cattle. It is very true that these smut galls have an ugly appearance and some may hesitate to feed them to a fine lot of cattle. However, so far as is known corn smut has never caused any disease or ill effects when fed to cattle. In experiments conducted by the experiment stations of South Dakota, Kansas, Michigan and the United States Department of Agriculture cattle were fed corn smut in heavy amounts. In no case was any injury done to the cattle resulting from the smut.

Only Known Remedy. The only remedy known to avoid smut to the crop is to destroy the nearby source of the disease for the next year. In fields where this means of control is impractical it is necessary to rotate crops. Smut resistant corns have not been developed yet but plant breeders are having some success in this direction. It is hoped that in the near future we may have developed a variety of corn which will resist smut.

Where They Came From A young dentist, just getting up an office in this city, was given an old magazine shower by friends recently. Detroit News.

ANTI-THEFT LAW WILL BE OBSERVED

Boise.—Strict compliance with the provisions of the automobile anti-theft law will be required at the time of obtaining 1930 licenses, it is announced by Fred E. Lukens, secretary of state, in a bulletin to Idaho's county assessors.

Under regulations which will be effective with the new year assessors will refuse to license any car for which the applicant for license cannot show a certificate of title in his own name. Transfer of title by assignment must come to the secretary of state's office and a new certificate of title issued. No less than 10,000 letters have been written out of the secretary of state's office in the past year clearing up difficulties arising through the issuance of license plates on cars for which the owner did not have a certificate of title in his own name.

Mr. Lukens announces that renewal applications for 1930 registrations will be received after December 15 and plates will be issued at that time but 1930 registrations are not valid until Jan. 1, 1930. The 1930 plates for new cars, not licensed in 1929, will not be issued until after December 31, 1929.

CHRISTMAS GREETINGS VIA AIR MAIL

Special Stickers Used

The Season's Greetings from out of the sky. Borne on the wings of thundering man made birds, roaring through winter's icy blasts, high above the snow bound earth—speeds the air mail carrying messages of good cheer at Christmas time. Modern man is expressing an ancient custom in the latest mode.

This season on account of improved service and the general public knowledge of the new postal system, Northwest residents are expected to increase last year's volume of holiday air mail by 200 percent. In the neighborhood of 10,000 "greetings" will daily fly out of the Northwest during the two weeks period before Christmas, according to air mail officials.

Postmaster, J. H. Dammarell, announces that he has received a supply of special air mail Christmas stickers intended to be used on all Christmas mail intended for air mail dispatch and bearing the necessary postage. These stickers, the postmaster explains, are distributed to post offices in order that the public might have some distinctive marking for their air mail messages. Their use not only adds the desired distinctiveness for holiday mail, but they also greatly assist postal clerks to segregate air mail from regular mail, thereby avoiding delays and misrouting. Air mail receives special handling at all post offices and it is therefore quite important that all air letters be easily recognized by clerks.

The postmaster points out that the stickers may be obtained at the post office without cost. They are free to mailers and should be placed on the addressed side of envelopes or cards intended for air mail dispatch and should not be used for ordinary mail.

Practically all styles of Christmas greeting cards, including the customary envelopes, may be carried by air mail to any point in the United States for 5c. Air mail may also be sent to Europe, Mexico, Eastern Canada and South America.

NEWSPAPER MIXUPS

Newspaper compositors and men who edit copy, no matter how eagle-eyed they may be, sometimes allow errors to get by that are either humiliating or laughable. The Chicago Tribune in reporting a political meeting said that the vast audience rent the air with their snouts. Another Chicago paper reported the propeller Alaska as leaving port with a cargo of 40,000 bushels cats. A Buffalo paper, in describing the scene when Roosevelt took the oath of office as president, said it was a spectacle never to be forgotten when Roosevelt, before the chief justice of the supreme court and a few witnesses, took his simple bath.—Exchange.

Primitive Living

Canada's native population in the Far North is dependent on the fur-bearers and other wild animals of that region for supplies of food and clothing.

DAIRY FACTS

FEEDING GRAIN TO DAIRY COWS

Wise Feeder Will Supply Balanced Ration.

(By J. W. LINN, Extension Dairyman, Kansas State Agricultural College.)

Balanced rations are just as important to the dairy cow in summer as in winter. To maintain the balance and keep up the high production record, grain must be fed.

Grain feeding is always more expensive than roughage or pasture feeding in Kansas. If grain feeding is more expensive than roughage or pastures, there can be only one reason for its use, and that is to supply nutriment that the heavy producing cow cannot get from the roughage or pasture.

Profit from dairy cows is linked so closely with high production that it is impossible to separate them. In other words the cow producing 400 pounds of fat is making two and a half times as much profit as the one making 200 pounds of fat.

The wise feeder will feed a balanced ration and do so according to production. He will feed such as to have the same ratio between protein and carbohydrate—about one to six.

The grain ration that will usually be found most profitable is two parts of corn to one part of oats or bran. This will be true until the grass begins to dry up or grow short. It is important to again increase the protein part of the grain ration at which time the 4-2-1 ration which consists of four parts corn, two parts bran or ground oats, and one part cottonseed or linseed meal should be used.

The second important thing in profitable grain feeding is to use the grain according to production because the cow producing 50 pounds of milk will need about three times as much grain as the cow producing 20 pounds.

Production Best Guide for Feeding in Summer

It's the high producing cow that needs grain while she is on pasture, according to I. W. Rupel, of the animal husbandry staff at the Wisconsin State College of Agriculture.

Some have the idea that their cows do not require grain because they turn up their noses at it when they first go out on pasture. These men will find, according to Rupel, that as soon as the cattle have been on the new grass about a week, grain will keep them from slumping in production.

The proper way to determine how much grain to give during the summer, Rupel believes, is to feed according to production. A Holstein, producing over 30 pounds of milk per day, should receive grain at the rate of one pound for every four pounds of milk produced above 30 pounds. That is, a cow producing 50 pounds of milk should have five pounds of grain. Jerseys and Guernseys should have a little more grain than Holsteins, and when the pasture is poor, the grain ration should be increased.

Equal amounts of corn and oats make a good mixture for the summer grain ration. A little oil meal may be added to make the feed more palatable. Protein supplements are not usually necessary because sufficient protein is obtained from the average good pasture. When pastures become poor during the dry season, some protein feed is beneficial.

Dairy Facts

Heavy producing cows pay best.

To feed cows well is to feed them profitably.

In calf production, the influence of a good bull is of major importance.

Feeding dairy cows according to the amount of milk they produce is a profitable practice.

Milk can't be manufactured without salt and water. See to it, therefore, that the cow, the ewe, and the sow have plenty of both.

All kinds of young animals thrive best on green pastures. A green patch, enclosed with a temporary fence, often solves the grazing problem.

Creameries which buy whey cream should have no fear of ill effects from mixing it with the regular supply of cream. If the quality of the whey cream is equal to that of the regular supply.

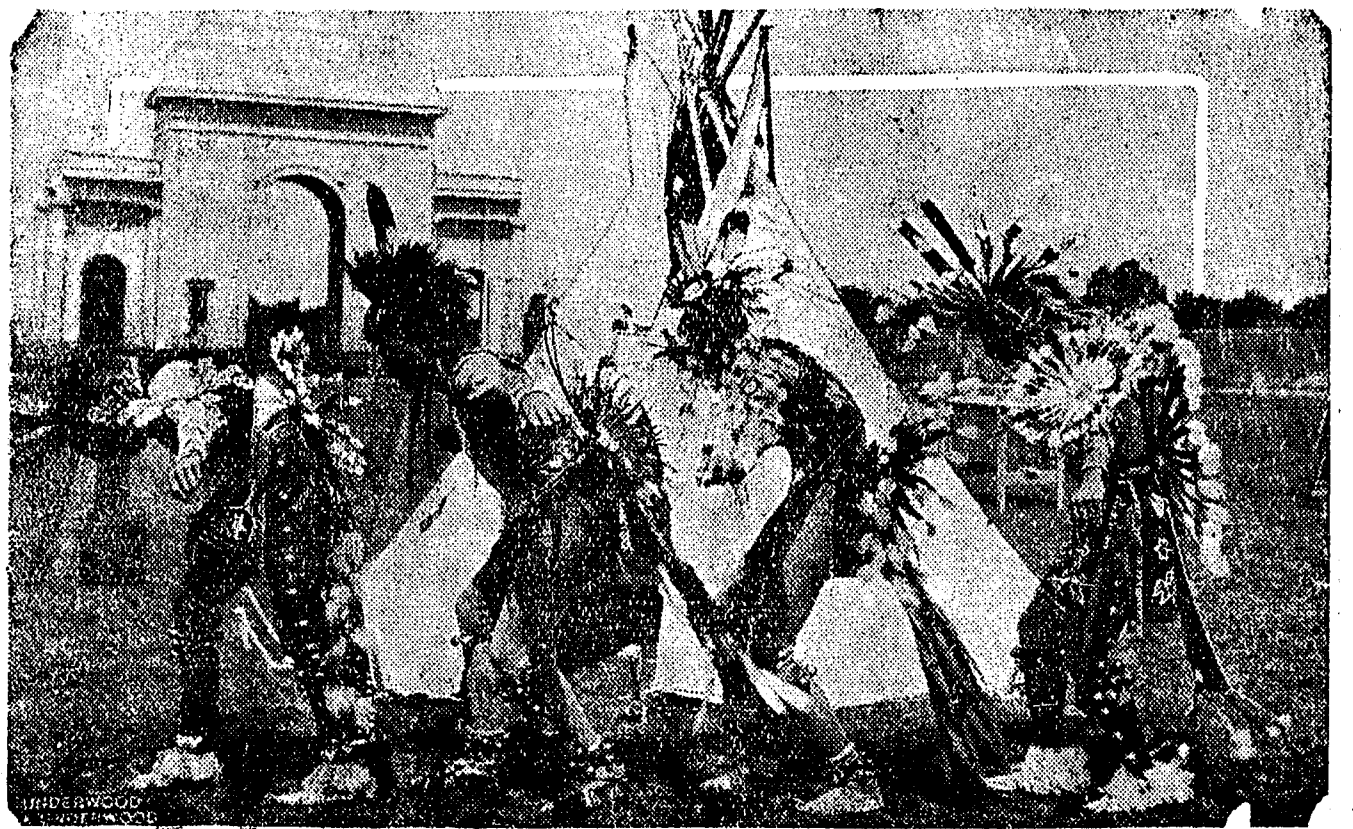

To keep the average butterfat production on a steady increase, a herd owner must cull unprofitable cows.

Destroy all breeding places of flies by hauling away manure daily and preventing accumulation of any filth.

Sounds O. K.

To hunt on a farmer's land in many places in Germany, it is first necessary to get permission. A price is set on every piece of game taken off his land, and he usually is paid the market price for the game.

Haskell Institute Graduates in Native Costume

While most of the institutions all over the country are graduating members of their senior classes in the traditional cap and gown, students at Haskell Institute donned their native costume. Many of the seniors wore their tribal garb and took part in the war dance—a part of the graduation ceremonies. Haskell Institute at Lawrence, Kan., is the largest Indian school in the United States.

Live Stock Hints

Lambs should be docked and castrated before they are three weeks old.

Alfalfa hay may be fed with safety as the sole roughage for ewes and young lambs.

Records are a necessary part of an intelligent conduct of the hog business.

Experiments indicate that 100

pounds of boiled potatoes will go about as far in feeding hogs as 140 pounds of raw potatoes.

Sheep are useful in destroying weeds, and they will eat more different kinds of weeds than other live stock.

The breeding ewes should have grain a few weeks before the lambing season and be well fed while suckling lambs.

Mange stunts pigs and prevents satisfactory gains. In severe cases they become unmarketable. Dip the pigs in a one to 40 dilution of lime-sulphur. Keep the quarters clean.

Worth Remembering Rise, if you can, as far as you can, but while you rise remember that true progress does not consist of getting on in life—it may be exactly the opposite.—Canon Alexander.

The Lead Boats Scientists are evolving a method to locate fish by sound. You can always locate a fisherman by sound, especially if he's successful.—Arkansas Gazette.

Excellent Lubricant Castor oil is a very fine lubricant, and is used extensively in racing automobiles. It is also often used in new cars to break them in.

Mr. and Mrs. Bryon Deabold spent Sunday at the home of Mrs. Mary Deobald, the latter serving a chicken dinner.

Mrs. Julia Brocke's daughter, Miss Marguehite and son Walter, Mrs. Geo. Brocke and Mr. Robert Dammarell were Lewiston visitors Wednesday.

Rev. Franklin was a business visitor at Lewiston Monday.

J. A. Michels and T. W. Lubaugh of the International Harvester Company, the former from Spokane and the latter from Lewiston, called on Geo. Brocke Wednesday. Mr. Brocke is the International Harvester company's representative here.

Mrs. Chas. Haig of Lenore was a week end visitor at the Chas. Wentendahl home.

Bud McNeal left Monday for Alpo to do some trapping.

Mr. E. H. Emery was absent from the bank Monday and Tuesday on account of illness.

The Boy Scouts entertained their girl friends at a party in the church parlors. The evening was spent playing games after which a dainty lunch was served, Rev. Franklin being with them.

Messrs. L. J.; R. H.; Robert, and Kenneth Pearson were Lewiston visitors Sunday.

Mr. and Mrs. Frank Boyd were Lewiston visitors Tuesday.

Mrs. Jim Smith and baby were Lewiston visitors the week end.

Mr. and Mrs. O. C. Aiken entertained Mrs. Jane Smith and daughter a few days last week. Mrs. Smith's home is in Spokane. She is the daughter of Mr. and Mrs. Chas. Keeler.

Mrs. Tom McDowell is able to be about again after being confined to her home for several days.

Mrs. Georgia Rowe from Lewiston is here visiting at the home of her father, Mr. Wright.

Mrs. Lydia Ameling received a letter from Mr. and Mrs. Harry Ameling saying they arrived at Santa Rosa making the trip in four days. They enjoyed the good roads and scenery.

The infant daughter of Mr. and Mrs. L. J. Person is improving rapidly.

Mrs. Bob Spencar and children from Moscow are here visiting at the home of Mr. and Mrs. Geo. Leit.

The many friends of Mrs. Geo. Leith will be glad to know she is recovering nicely from a week's illness.

The Presbyterian Aid meet at the Commercial hotel Friday. Mrs. H. B. Thompson will be hostess.

Mrs. Fred Rinnick and children of Lind, Wash., were the week end guests at the home of Mr. and Mrs. Geo. Brocke. Mrs. Rinnick is Mrs. Brocke's mother.

Mr. and Mrs. Walter McCall and family moved to Leland Tuesday to the home of Mr. and Mrs. Wan. Wolfe. We are indeed sorry to lose people like the McCalls. Our loss is Leland's gain.

Mr. and Mrs. Bud McNeal were Moscow visitors Saturday.

Mr. E. H. Dammarell was a Moscow visitor Saturday.

Mr. and Mrs. Clyde Daugherty and family were dinner guests of Mr. and Mrs. T. H. Daugherty at Leland Sunday.

Mr. and Mrs. A. K. Carlson and Mesdames Jones and Dempsey were Lewiston visitors Tuesday.

Rubin Pearson, nephew of Mr. and Mrs. L. J. Pearson, is sick at White's hospital, Lewiston. The Pearson's, who were with him from Thursday to Saturday, are able to see some improvement in his condition.

Mrs. Gust Luken was a Troy visitor Monday.

Miss Blanche Wood went to Lewiston Saturday.

The girls' basketball team of the high school expect to go to Deary to play next Wednesday evening.

Mr. and Mrs. Boyd Cook and family visited relatives in Kendrick Sunday. Mrs. Cook is a daughter of Mr. and Mrs. M. O. Ruby.

The DAIRY

GOOD DAIRY FARM WILL HAVE SILO

Modern Affair Permits Production of More Milk.

Because the silo is an investment and not an expense, the good dairy farmer usually has one or more according to the size of his herd.

"Silos are growing in popularity," says A. T. Holman, agricultural engineer at the North Carolina State college. "Hundreds of modern silos were constructed in 1928 and a greater number will be built this year. We observe that farmers show a marked tendency to have a better silo than formerly, built from good materials and of the proper size. It permits the production of more milk at less expense, and as it lowers cost of production, it automatically increases profits and the labor income. The silo is the cow's fruit jar where green feed is stored and cured until most needed."

Silage must not be considered a substitute for grain, but is a supplement to it. Cows require both grain and silage or grain and pasture for the profitable production of milk. When winter comes and there is no pasture, the silo proves its value, but the silage is better than pasturage in that it contains the corn grains in addition to the succulent leaves and stalks. Silage also appeals to the cow's taste.

A number of crops may be canned in the silo though corn is still the most popular. The size of the silo depends on the size of the herd, the rate of feeding and the length of the feeding period. The average feeding rate for the dairy cow is about 30 pounds per day, so when feeding ten to fifteen cows, the diameter should be 10 feet; 15 to 25 cows, 12 feet; 25 to 35 cows, 14 feet, and for 35 to 40 cows the diameter should be 16 feet. The height will be calculated by dividing the number of days in the feeding period by six when feeding off two inches of silage per day. If three inches are fed off, as should be the case in hot weather, the days of the feeding period should be divided by four and this will give the height needed when the proper diameter has been determined. It is better to have two silos than one extra large one, says Mr. Holman.

Soy Beans Win Fame for Illinois

Popularity of Crop Brings Inquiries From Eight Different States.

What baked beans did for Boston, soy beans are doing for Illinois—making her famous, says J. C. Hackleman, crops extension specialist of the college of agriculture, University of Illinois. Because of the widespread reputation of Illinois as a soy bean producing center, Hackleman recently received within the short space of a few days inquiries regarding soy bean seed or the commercial utilization of the crop from eight states and one foreign country.

Brighter Day for Beans. Incidentally he considers the letters as additional evidence that an even brighter day is dawning for soy beans. What popularity the crop already has gained in this state is indicated by the fact that Illinois last year produced slightly more than 3,000,000 bushels of soy beans, which was more than any other two states and about a third of the production for the entire country. The recent inquiries which the college has received about the crop came from Montana, Nebraska, Indiana, Missouri, Wisconsin, Ohio, Arkansas, Texas and Porto Rico.

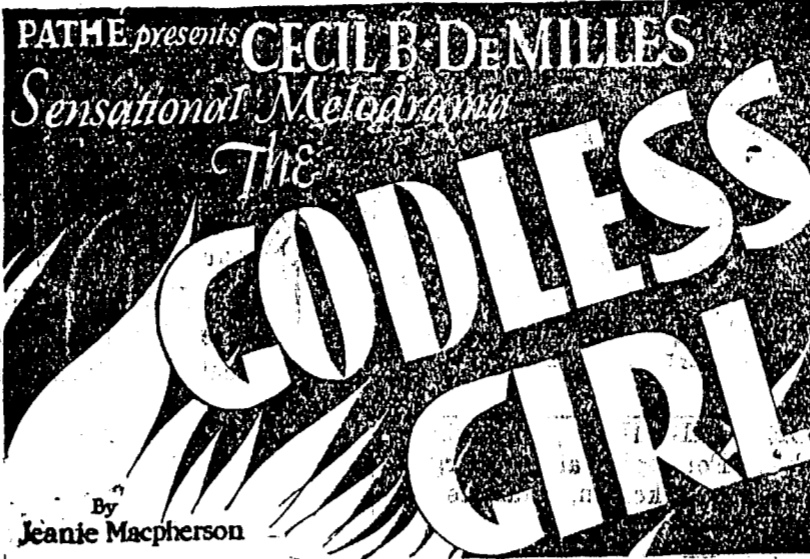

Riding high on the wave of soy bean popularity now sweeping Illinois is the Illini variety, a new high yielding developed by plant breeders in the experiment station of the University of Illinois College of Agriculture. This past year it again proved superior to all other varieties grown at the experiment station and produced the highest yield ever recorded for a soy bean variety on the station plots. This was 42.5 bushels an acre in a rotation grown on rich soil. In a rotation grown on rather light soil it made 30.8 bushels an acre.

Seed Distributed. Seed from the new variety is gradually being distributed over the state, farmers in 31 counties growing it this past year. Reports from these farmers indicated that the new variety averaged 25 bushels an acre, or about five bushels an acre more than the average for all other varieties. Superiority of the Illini variety, as a seed producer is especially marked on the more fertile soils of the central and north-central portions of the state.

Chain Store Idea Old. Although the American chain stores are generally looked upon as a modern institution, the idea is very old. The enormous Mitsui chain system in Japan dates back to 1648. The Fuggers of Augsburg, flourishing in the fourteenth century, managed scores of branches in much the same manner as those of today.

Ambidextrons

An Irishman, who was signing articles on board ship, began to write his name with his right hand; then changing the pen to his left hand, finished it.

"So you can write with either hand, Pat?" asked the officer.

"Yis sor," replied Pat. "Whin I was a boy, my fater always said to me, 'Pat, learn to cut yer fingernails wid yer left hand. For some day ye might lose yer right.'"

Splendid Carillon

The carillon given by Arthur R. Baxter to the Scottish Rite cathedral in Indianapolis, Ind., has 63 bells, ranging in weight from a few pounds up to 12 tons. The carillon differs from chimes in that its bells are stationary. This one may be played in three ways—from a keyboard similar to the organ or piano, from a clavier worked by handles and pedals and by perforated rolls.

Patience

Patience is the greatest of all shock absorbers. The only thing you can get in a hurry in a trouble—Lord De-
