## Back To Inland Waters

The salmon are running at Kettle Falls, Washington, says a Spokane correspondent.

One of the greatest mysteries of nature is the return of these fish from the ocean to their birthplace in inland waters. One of the most interesting sights of the west today, is to see their battle up stream. It is in progress again at Kettle Falls; the Indians are on hand again to profit; and hundreds of visitors to see the unusual sight.

## RED CROSS CHAPTERS TO ASSIST VETERANS

All honorably discharged veterans of the World War who believe themselves entitled to the "disability allowance" provided by the World War Veterans Act as amended July 3, 1930, may file their claims through the nearest Red Cross chapter according to an announcement received from Pacific branch headquarters in San Francisco. The first supply of application blanks has been hurriedly distributed to 300 chapters in the Pacific northwest in order that this service to veterans may begin without delay.

Many hundreds of veterans will be eligible to the new benefits. The act as amended provides a monthly allowance ranging from \$12 to \$40, according to the degree of disability, to honorably discharged veterans of the World War who served more than 90 days and who are suffering from a 25 per cent or greater permanent disability not acquired in service and for which compensation has not been paid. No payment of this allowance shall be made prior to July 3, 1930 and no veteran shall be entitled to it unless he has been exempt from payment of a Federal income tax for one year preceding the filing of his application. No veteran can receive both compensation and disability allowance during the same period.

Any veteran wishing to file claim must be sure to bring with him his honorable discharge or a certified copy of the same, the Red Cross states.

## Went Fishing, Too

You know, ever since the piscatorial artists of Kendrick read in the Gazette the other day about those fishermen leading sturgeon down the Snake river behind a skiff, every mother's son of them has wanted to go fishing and try the same thing—only the Kendrickites prefer leading their home behind a flivver or some other kind of a car.

First it was Marvin Long and Ira Bolon, who went the other Sunday, and who claim to have landed many fish, several of which would weigh a pound, and on Tuesday morning, bright and early M. O. Raby and Mitch Blackburn got a big can of worms and departed for Bull Run creek—and they, too, claim to have caught fish, but the "bacon and egg" sign was still left in the hotel window instead of "fresh fish" for dinner.

## Jones-Sherborn Nuptials

On June 26, 1930, at 7:30 o'clock Miss Agnes Jones became the bride of Ollis Sherborn of Arrow-Junction. The ceremony was performed at the Presbyterian parsonage by the Rev. E. L. McEwen of Lewiston.

After a rousing charvari at the home of her parents the young couple left for their home on the Clearwater river. Mrs. Sherborn is a daughter of Mr. and Mrs. A. W. Jones, prominent farmers of the Big Bear Ridge community. Mrs. Sherborn is a charming young lady and a very popular teacher of Latah and Nez Perce counties.

The entire community wishes them a long and prosperous married life.

## Girls Drowned In Clearwater

Two girls were drowned in the Clearwater river Tuesday afternoon about 2 o'clock near the spillway of the Washington Water Power Company's power plant, where it passes through the Clearwater Timber company's grounds.

When the girls entered the water they encountered a step-off into deep water and when one of the girls who entered the water first, called for help, the other girl went to her rescue, but was caught in the under-current from the spillway and carried to her death, together with her companion.

The drowned girls were Gladys Burdig, 15, of Lewiston, and her niece, Helen Callan, 11, of Starbuck, Wash. Both bodies were recovered.

## LATAH COUNTY NEWS— POLITICAL AND OTHERWISE

Your correspondent has been unable to get any accurate news from the Moscow press during the week except that Governor Baldrige and the Land Board took a flying trip around north Idaho Thursday and Friday of last week. The realization that a trip can be made from Moscow to Boise, Idaho, via air, in two hours is somewhat startling. Truly, there can be no North and South Idaho when the Capitol can be reached from the remotest parts of the state in about three hours. Idaho has overcome its lack of a North and South highway largely through the efforts of H. S. Ruddach who is responsible for Moscow's airport.

The hot, dry winds for the past ten days are having their effect on wheat sown on pea ground around Moscow last year. The agricultural experiment station of the University should make an effort to develop a strain of wheat which can be successfully grown after a crop of peas.

The voters in Moscow and vicinity have a feeling that Latah county should be represented in the Senate by someone who has had previous legislative experience.

Here is an item of news which neither of the papers of Moscow have published, although they had the same access to the same records as your correspondent:

The annual report of the last fiscal year of Nez Perce county shows that the expense of the Auditor's office in that county was \$10,814.77, while in Latah county, it was only \$7,361.10, or a difference in the sum of \$3,453.67 or better than a 30 per cent saving. The population and wealth of Nez Perce county is about the same as Latah county.

Another item which your correspondent gleaned from the reports of the two Counties reveals the fact that during the last fiscal year the expenses of the Commissioners in Latah County was \$473.52 less than it was in Nez Perce County.

Nez Perce County has a law library, the estimated cost of which is more than five times the cost of the law library owned by Latah County.

The coming primary will largely determine whether or not the campaign of misrepresentation, abuse and prejudice injected into it by Pestiferous Pete, the hired political writer of the two Moscow papers is to be effective. Everybody at the County Seat who knows the real motive back of the special articles appearing in the Moscow press realizes that if the Idaho Post had the county printing at double the price which the County is now paying for it there would have been nothing said at any time or at any place.

The old timers of Moscow and in Latah County still have a definite recollection of this same writer holding up one Barney O'Neill to the people as a person about whom nothing good could be said. Two years later Barney, in the opinion of Pestiferous Pete, became a saint and was entitled to be nominated for governor.

Your Moscow Correspondent.

## Return From Extensive Trip

Mr. and Mrs. George Buckallew returned to their home in Juliaetta Saturday after an extensive visit lasting seven weeks at various points on the coast.

The trip was made by way of Lewiston, Pomeroy, Walla Walla, Pendleton and so on down the Columbia river. They visited friends and relatives at Portland, Aberdeen, Olympia, Grays Harbor, Shelton, Port Orchard, Bremerton, Seattle and several other points. They report a splendid time but glad to be back home again.

## Getting Proud, Too

Frank Boyd and Eddie Dammarell are stepping a little high these days since Frank bought from the Kendrick Hardware on Tuesday a dandy new International six-speed special truck and Eddie is the proud driver of it. Frank says he isn't going to raise the price of ice, though.

## Add New Sack-Piler

In preparation for the large wheat crop expected in this section this season, the Vollmer-Clearwater company has added a new 24-foot sack-piler, or elevator, which gives them two "high boys" to work with. Manager Keene says they expect to be pretty busy after while.

## FORMER KENDRICK BOY WEDS CALIFORNIA GIRL

The following item concerning the marriage of William Dudley Brown, a former Kendrick boy, was taken from the Humbolt Times, Eureka, California, and will be read with interest by many Kendrick friends of the young man:

Among the interesting weddings of the week was that of Miss Marion Glenn, who became the bride of William Dudley Brown yesterday afternoon at an impressive service held in the Presbyterian church with the Reverend Robert A. Crichton reading the nuptial rites at 2 o'clock.

A charming gown of white crepe de chine was worn by the bride whose bouquet was a beautiful shower of bride's roses. Mrs. R. L. Williams, her younger sister, prettily garbed in blue and carrying a bouquet similar to that of the bride, acted as bridesmaid, while Carl Brown, brother of the groom was best man. Only intimate friends and immediate relatives of the couple were present at the ceremony which was followed by a handsomely appointed wedding dinner and reception at the Glenn home on I street.

Masses of early spring blooms in pink and white colors were used in decoration of the rooms, while in the dining room where the table was centered with an elaborate bridal cake, the pink and white color scheme was expressed in banked blossoms and tall pink tapers that graced the board. Suspended from the chandeliers was a large white wedding bell, while overhead myriad streamers of delicate pink and white were drawn from the chandeliers to the corners of the rooms.

On Tuesday evening, Mr. and Mrs. Glenn, parents of the bride, will hold open house for the young couple, who will later leave for a honeymoon trip to the south.

The bride is a popular member of the younger social circles who has been much feted since the announcement of her engagement. She is a graduate of the Eureka High school and of the Eureka Business college. The groom is the son of Mr. and Mrs. John F. Brown of Kendrick, Idaho, and after graduating from the Kendrick high school attended the University of Idaho. He holds a position with Baker & Stanton of this city.

Mr. and Mrs. John F. Brown, parents of the groom who recently celebrated their golden wedding, are expected to arrive in this city next month, and the couple will return to Idaho for an extended visit with them in the fall. After a short honeymoon in the south they will take possession of the new home which has been built for them at Carson and K streets in this city.

## Celebrates First Birthday Anniversary

A very pleasant little birthday party was given Wednesday afternoon by Mrs. W. L. McCreary for her little daughter, Patricia Jean, in celebration of her first birthday anniversary when some of Mrs. McCreary's Genesee friends and their babies were invited down to spend the afternoon. They were Mrs. D. L. Bressler and little daughter, Beverly Lee; Mrs. Margaret McCoy and little son, Keith; Mrs. N. M. Leavitt and little son, Jaren Kay, Mrs. Glenn Sampson and Miss Gertrude Sampson.

A birthday cake with one candle on it was the center of attraction for the little ones. Luncheon was served at noon and in the evening, Mrs. McCreary was assisted in serving by Mrs. W. C. Jones.

Patricia Jean received several nice presents as mementos of the occasion.

## Worm Horde Invades Farms

A horde of large worms has invaded two farms on Big Bear Ridge, according to L. B. Taylor, county agricultural agent, who was called there by farmers. Taylor took Paul Rice, university entomologist, to investigate, who found that the worms, some of which were three inches long, were white-lined sphinx moth larvae. Taylor said the worms would probably do little damage to crops.

This is the first appearance of the worms in Latah county, although they are said to be common in some parts of the west.

## And Why Not?

The question has been raised as to why the wholesale price of bread still remains at the same level as when wheat was worth more than a dollar a bushel. Does anyone know?

## Sunday School Picnic

The annual Bear Ridge and Bear Creek Sunday school picnic will be held at Bear Creek crossing on Sunday, July 20.

A program will be given, after which an address will be made by E. R. Martin of Portland, Oregon, superintendent of the American Sunday School Union. Following the picnic dinner there will be speaking by E. F. Mason of the University of Idaho.

Everyone is cordially invited to be present.

## AUTO TURNS TURTLE NEAR JULIAETTA

C. W. Jessup and wife and two grandchildren of Juliaetta had a very narrow escape from death Wednesday when the car in which they were riding turned turtle.

Mr. and Mrs. Jessup and grandchildren were descending the Hamill hill between Juliaetta and Kendrick when on the last sharp turn, just above the main road the right side wheels dropped over the bank, estimated to be between twelve and fifteen feet and the car turned over in the air, landing on the right front corner of the top. All the occupants were bruised and shaken up, Mrs. Jessup being the most badly hurt of any, due to the cuts received from flying glass. However, none were hurt badly enough to necessitate hospital attendance and after their wounds were dressed by Doctor E. H. Field they were taken to their home at Juliaetta. It is thought that no lasting effects will be felt by any one.

The exact cause of the accident is unknown as Mr. Jessup is a very careful driver and the car a new one.

## Regarding News Items

We have asked you for your news items, and we want to assure everyone that such items are duly appreciated, but we would like to have them in time for publication the week they happen, in case such is possible, but in order that they may be gotten in the current issue, it is necessary that they reach the Gazette office not later than Thursday morning, but preferably on Wednesday if possible, as we go to press promptly at noon on Thursday.

Two items reached this office last week too late for publication. This we regret very much, but as they did not arrive until Thursday afternoon it was impossible to get them in the paper. The reason for going to press promptly Thursday noon is to make sure that the papers go out in time to catch the rural routes, thus giving the readers an opportunity to read the advertisements and make their selection of goods for their Saturday and Monday requirements—it helps the readers as well as the merchants who advertise.

## Many Inhabitants of "Jungle"

Every town, large or small, has its "jungle" and Kendrick is no exception, and it is well inhabited most of the time.

Trainers of the "highball" which left Spokane Monday evening said they left that city with a cargo of 100 "tourists" who were distributed at towns along the entire distance, but there were still quite a few on board when the train went through Kendrick.

While many of these men are actually looking for work and are probably perfectly honest, yet it behooves everyone to look well to their locks and take no chances as there are undoubtedly a few of these travelers who are not looking for work, but must live just the same as those who are. That ounce of prevention is advisable.

## Shoots Self In Hand

Wilford Mendenhall, last Friday evening about 6 o'clock, accidentally shot himself through the palm of his right hand, while playing with a 22 caliber rifle at the home of his cousin, Arthur Johns.

Dr. E. H. Field dressed the wound and at last reports he was getting along nicely.

## Improving Property

Wade Keene is still having improvements made to his residence property. He is having the lower rear part latticed in and generally made for convenience and better appearance.

It is these little things that make for beauty of property and the town.

## WHEAT MARKET WEAK— FEED GRAINS FIRMER

Domestic grain markets were very unsettled during the week ending July 12. Wheat prices made further declines, influenced by increased offerings of new winter wheat, continued slow export inquiry for the large North American stocks and generally favorable prospects for the new wheat crop in the northern hemisphere according to the weekly grain market review of the United States bureau of agricultural economics. Feed grains, on the other hand, were firmer under a good demand for the moderate offerings. Corn prices advanced, while oats and barley held steady at most markets. Rye was lower with wheat and flax declined sharply with spot prices near the new crop basis.

Crop developments were again an important factor in the wheat market. Prospects for a crop in the northern hemisphere were about the same as last year, together with another large carry-over, had a weakening influence upon both the domestic and foreign markets. The domestic wheat crop now promises to be as large as the 1929 harvest, with some decrease in winter wheat offset by an increase in spring wheat. A crop of about 558,000,000 bushels of winter wheat was indicated by the condition of the crop July 1. Of this, approximately 340,000,000 bushels is hard winter, 175,000,000 bushels soft red winter and 43,000,000 bushels fall-sown types of white wheats. A spring wheat crop other than durum, of 193,000,000 bushels was indicated by the July 1 condition with the durum wheat crop forecast at 57,000,000 bushels.

The Canadian wheat acreage is slightly larger than last season and is officially reported at 24,583,000 acres. The condition of the crop on July 1 was placed at 91 per cent of the ten year average yield, which would indicate a harvest of approximately 385,000,000 bushels, compared with the final estimate of 300,000,000 bushels harvested in 1929.

European wheat crop prospects are irregular. Harvesting of winter wheat is nearing completion in the Mediterranean countries. Trade reports indicate a downward revision of the early official Spanish forecast from the near record figure of 161,000,000 bushels. French and Italian crops also may be considerably below expectations. On the other hand yields considerably above those of last year are reported from the countries of the lower Danube where the harvest is in progress. Conditions in northwestern Europe, including the Scandinavian countries, Germany and Poland, are generally above average, although recent dry hot weather has resulted in damage in some areas. Supplies of old wheat remaining in the principal exporting countries appear to be around 60,000,000 to 75,000,000 bushels larger than a year ago, but this increase is probably more than offset by smaller stocks on ocean passage and in Europe.

Harvesting of the domestic wheat crop is now general in Kansas and Nebraska, and is completed in much of Southern Kansas, Oklahoma and Texas. Marketing increased sharply during the week and over 5,500 cars were received at Kansas City. The quality of the new wheat is excellent, being of heavy weight and unusually low in moisture. While large amounts are reported being placed in storage, offerings were heavy and were a weakening factor in several markets. Demand, however, was active, particularly from the domestic mills and current arrivals were readily taken. Cash prices of hard winter wheat declined 3c to 4c per bushel during the week. No. 2 hard winter ordinary protein, was quoted at Kansas City July 11 at 79c to 80c per bushel. 12 1/2 per cent protein brought 1 cent premium and higher proteins higher premiums.

Prices of soft winter declined even more than those of hard winter, reflecting the offerings of the new crop. No. 2 soft red winter being quoted at St. Louis at 85c to 88c and at Kansas City 82c to 83c. Mills were active buyers of fth wheat. Demand at St. Louis, however, was of only moderate volume, as many mills were obtaining supplies locally.

Spring wheat markets followed the decline in winter wheat, but offerings were light and cash premiums held steady in relation to futures. The trading basis was changed to the September delivery during the week at Minneapolis and at the close of the market July 11, 12 per cent pro-

**X. Y. Z. Says**

X. Y. Z., the local weather observer for the Lewiston Tribune, has the following to say about weather conditions for the coming week, which may be of interest to many, since he has been hitting the weather pretty well for the past several months.  
The article was written under date of Sunday, July 13:  
The coming week is expected to have some of the highest temperature of the month, perhaps of the summer. The culmination of the present heat wave is expected to bring storm conditions with either high winds or electrical disturbances, rain or hail.  
The last week of the month is not expected to have quite as high temperature as that of the middle portion. The ups and downs of temperature this month are expected to be sudden, extreme and of comparatively brief duration.

**CAVENDISH NEWS**

A large crowd attended the dance Saturday night.  
Lesco Reece spent the week-end with his family.  
Mrs. Walter Taylor was bit by a rattlesnake while hoeing in the garden last week.  
The farmers are still putting up hay and working in the beans. It is nice weather for both.  
Mrs. Mitch Blackburn and daughter, Ivalee, Mrs. Jess Daniels and children were visitors of Mr. and Mrs. T. E. King Monday.  
Mrs. W. A. Reece and daughter, Gladys, visited at the Avery Miller home at Tekean Tuesday.  
Jess Daniels got hit with a pole while working in the timber Saturday. He has not been able to work this week.  
E. E. McGuire and family, Lesco Reece and family and W. A. Reece and son Bernard took their lunch and went to the pole camp where Mr. McGuire has been working.  
Mr. Card is helping the Lebron brothers hoe corn this week.  
A. Sackett spent Sunday afternoon with his brother, Martin Sackett, at Southwick.

**Excavation Work Being Pushed**

The work of excavating for the new school gymnasium was begun the latter part of last week and is being pushed as rapidly as possible and much dirt is being moved. Frank Ellis took a large amount for the filling in of one of his lots and the Kendrick-Rochdale is taking about 150 cubic yards of the dirt to fill in the driveway just east of their elevator, along the warehouse.

The Hotel Kendrick is a good place to eat and sleep, when you stay in town.

WE HAVE WEED CONTROL MATERIAL IN CAR LOTS

ATLACIDE is the BEST weed control material. Is non-explosive and there is no fire danger by its use to fields, buildings, etc.

IN 1927 IN WISCONSIN THE ESTIMATED LOSS FROM WEEDS WAS \$27,000,000.00.

We also have the Sodium Chlorate in 100-pound drums at \$10.00. Sodium Chlorate is effective as a weed control but great care must be used in handling, as it is highly inflammable and explosive and therefore dangerous to life and property.

WHEAT MARKET WEAK—  
FEED GRAINS FIRMER

tein No. 1 dark northern was quoted at 1c under to 2c over the Sep-90 1/4c.

Durum wheat prices also declined, tember delivery, which closed at but not so much as bread wheats. There was a scattered export inquiry and domestic mills were also fair buyers of good quality durum.

Pacific coast markets were weaker but declines were less marked than at eastern points. Prices at Portland and Seattle declined about 2c per bushel. No. 1 hard white of Big Bend bluestem or early Baart varieties was quoted at Portland at \$1.05 and at Seattle at \$1.04; No. 1 soft and western white at Portland at 91c and at Seattle at 92c; No. 1 hard winter, northern spring and western red at Portland at 89c and at Seattle at 92c per bushel. 14 per cent dark hard winter in bulk was quoted at Seattle at 98 to 99c and 14 per cent No. 1 dark northern spring at \$1.06 per bushel. Export demand continued dull with only a few parcel lots of white wheat reported sold to the United Kingdom. Freight rates are unusually low, some space being available as low as \$3.65 per ton.

Harvesting of winter wheat began during the week in the Walla Walla and Pendleton districts but shipments of new wheat were not expected to reach the coast before July 20.

California wheat markets held fairly steady. Harvesting in central California progressed rapidly under favorable weather conditions. The new crop is generally clean and of heavy weight. Some lots of Baart received weighed 62 to 64 pounds per bushel. Stocks of old crop grain are not selling freely, according to trade reports. Bids to growers were around \$1.40 to \$1.50 per 100, sacked f. o. b. cars interior points for No. 1 hard white wheat. No. 1 hard white was quoted delivered at San Francisco on July 11 at \$1.65 and No. 2 soft at \$1.62.

Prices at Los Angeles held about unchanged, with No. 2 hard white quoted at \$1.67 1/2 to \$1.75 per 100, with the season's storage paid. No. 2 soft white on the same basis was quoted at \$1.62 1/2 to \$1.66 1/4. Three carloads of new dark hard winter from Kansas were received by local mills during the week. Current offerings, however, were principally Sonora and Federation from the central and lower San Joaquin valleys.

The Arneson-Peckham Squint Korector is here.  
When it comes to the attention of the public that there is a simple method and a simple device by which crossed eyes are being straightened literally by the dozens; when it is known that amblyopic eyes are being made sensitive and caused to function in harmony with their mates even in patients well along in years; when hundreds of case records prove the physiologic correctness of the system and the machine; then it is time for progressive refractionists to acquire the technique and the instrument by which such unusual things are accomplished.  
Dr. A. E. Jones is the first to receive his and has had same about three weeks. He made his regular visit in Kendrick last Wednesday.

### Household Hint!

In order to keep your wife from talking too much: put a little concrete into her beauty clay!

There has been considerable activity in the implement line this week. Arley Allen and Merton Pierce took delivery of binders and Frank Boyd one of the new Six-Speed special International trucks for his dray line and Homer Betts took delivery of a McCormick-Deerling mower.

Send it in to "True Story" Boss (to pretty applicant) So you want a job? Had any experience? Applicant: Oh, some wonderful ones!

We have a nice assortment of grey enamel ware for harvest (at very attractive prices).

The old-fashioned mother who saved her wedding dress for her daughter now has a daughter who saves her wedding dress for her next wedding.

You need not ride on flat

tires any more. We have all standard sizes of tubes from \$1.00 to \$1.50.

At least four things which are apparently obsolete: the hitchrack; the petticoat; chin whiskers and high prices for hardware.

We're wondering if you have your binder twine. If not let us supply you. It's the best.

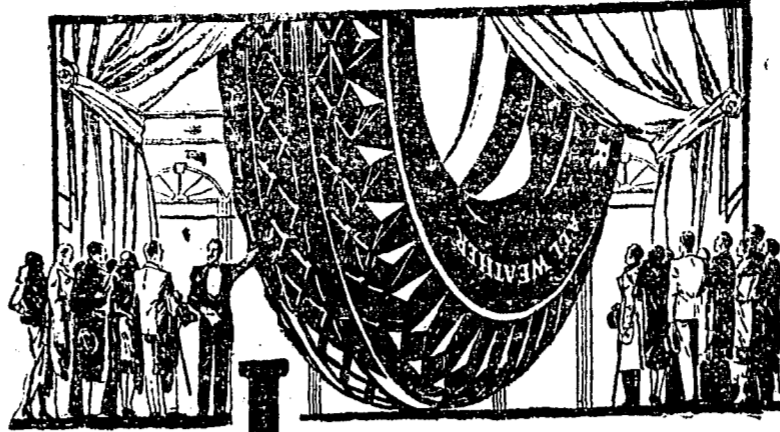

If there is no hell then what is it a girl wearing unfastened galoshes looks like,

Young Isaac had not been away from home long when he sent his father this telegram: "Am broke and have no friends; what shall I do?" Abraham, his father, wired back: "Friendship is a wonderful thing, make some friends right away."

Friends are handy and so is that five per cent off that we give for cash.

### Few Forest Fires Reported

Mid-July finds Pacific coast forest fire conditions that are unusual and puzzling, according to bulletins from private, state and federal protective agencies to their clearing house, the Western Forestry and Conservation Association.

Comparatively cool dull weather without excessive wind or low humidity, has continued abnormally late. Few seasons in history have had so little fire up to this time. On the other hand rainfall has been much below normal in most regions and the forests are dry. The first bad fire weather will bring critical conditions almost instantly, without the usual warning experiences to incite the public to care with fire in every form.

Idaho has had only 54 fires reported on national forests and 32 on state and private lands, with losses negligible. Smokers and campers lead as causes. Montana reports 95 national forest fires and 28 others, damaging less than 100 acres and practically no mature timber. Oregon and Washington have had no serious fires, damage being considerably less than at this time last year. California national forests report 238 fires, mostly on grass and brush lands, with far less damage than last year. A telegram from the U. S. regional forester at Ogden says the intermountain district has had only 67 fires and negligible loss, but conditions are dry and dangerous.

Notwithstanding these reports of good fortune so far, fire-fighting and meteorological experts throughout the coast states are equally unanimous in emphasizing that they indicate no security. They point out that some of the worst seasons have followed rain as late as July, while now dryness of forests material is already abnormally advanced, so campfires, cigarettes, slashings and logging operations constitute a danger to the land property that can be made serious by very few hours of changed weather conditions.

### Big Crusher Has Arrived

The big crusher, which will be set up on the old Evans place, near the head of Brady Gulch was brought over from Elk River last Friday and will be put in running order just as soon as things can be gotten together. Everyone is anxious to have this road improved and it is hoped soon to have it connected with the Troy Highway district. The ascent of the Gulch is the only bad feature of the entire program. It is understood that this section of the road, too, will be greatly improved.

It is hoped that some of these days another ascent of the hill can be worked out.

### Building Being Repaired

The building formerly occupied by the offices of the Continental Oil Company on the north side of main street is being repaired and redecorated. It is understood that it will be occupied by LaHatt as a jewelry repair shop.
