INTERESTING ITEMS FROM JULIAETTA

Aid Meeting

An all-day meeting was held at the church Tuesday, when a crew of men was busy piping the water into the church basement. A chicken-pie dinner was served at noon by the Aid to about 65 people. A feature of the noon hour was a special table, presided over by Betty J. Huntsberger, who celebrated her eighth birthday anniversary. A birthday cake, with candles, baked by Mrs. Dora Daugherty, was the center of attraction for fifteen little people.

The Aid held its regular meeting in the afternoon, with 20 ladies attending. The next meeting will be at Mrs. Grace Stinson's, with Mrs. Jim Groseclose assisting. The program will be in charge of Mrs. L. Huntsberger and Mrs. C. Gruell.

Covered Dish Supper

Approximately forty men and women attended the covered dish supper given at the Methodist church Thursday evening. The meal was served entirely by the men—even to ice cream for their dessert. Following the supper an impromptu program was enjoyed. It consisted of songs, readings and games, which included fortune-telling that caused much merriment.

F. M. Talbott Rites

Funeral services were conducted Sunday by the Rev. Orval Peterson from the Brower-Wann chapel at Lewiston for Frank M. Talbott, brother of N. M. Talbott. Mr. Talbott and Mrs. Crayton Biddison attended from here.

Play a Success

The community play, "That Girl Ann," which was given Friday evening of last week, was enjoyed by a capacity house. The proceeds will be used to fix the lower story of the I. O. O. F. hall into a community building.

Suffered Stroke

G. H. Buckallew suffered a light stroke of paralysis Monday morning. At present he seems to be recovering rapidly. His son, Dennis, of Lewiston spent a few days with him, also his daughter, Mrs. Ben Wetherby.

Will Again Make Home Here

Mrs. Anna Nourse returned from Spokane Saturday, after a two-years absence. She was accompanied by her sister-in-law, who returned to Spokane Monday. Mrs. Nourse will make her home here.

Juliaetta Personals

Charlie Noble was a Lewiston visitor Wednesday.
Mrs. Kate Crutchfield visited her niece at Arrow Sunday.
Mr. and Mrs. Bill Carlton spent the week-end in Lewiston.
Ernest Walsh spent Sunday and Monday with his family here.
Miss Clara Nye returned Sunday from a few days' visit at Lewiston.
Mr. and Mrs. Chester Westling and Blaine Groseclose were Lewiston visitors Wednesday.
Mrs. M. Nutt, Mrs. Cecil Gruell and Miss Lucille Gruell shopped in Lewiston Wednesday.
Mr. and Mrs. Ed Taylor and family entertained the teachers at dinner last Thursday evening.
Mrs. Will Combs left Sunday for South Bend, Wash., for a visit with her son and his family.
Mr. and Mrs. Bert Ramey and children of Pottlatch were Sunday guests of Mrs. Hulda Buchanan.
Mrs. Mae McCall of Coldsac was a guest of Mrs. Grace Stinson from Wednesday until Saturday.

Weather and Roads

Yes, there is plenty of weather, but not much roads, according to people who are making the trip from here to Arrow and up on the ridges, where there is no gravel. However, the weather man has kept it reasonably warm and the rains will be a fine thing for the farmer—from every standpoint except roads.

Filling Between Tracks

The Northern Pacific brought in a car of cinders which were unloaded Wednesday, for the purpose of filling in between the main line track and a side track, just west of the depot. This will indeed be a big help as the place gets pretty muddy at this season of the year.

Many Go To Juliaetta

Quite a large delegation of Kendrick people went to Juliaetta last Friday night to attend the home talent play given there for the benefit of the community hall. A goodly sum was realized and those responsible for putting on the play are to be congratulated.

The play was a very good one and nicely presented, and the actors are to be congratulated on their individual performances, which was very much enjoyed by every one in attendance.

RENO WILL GO IDAHO ONE BETTER ON DIVORCE

Now that the Idaho legislature has passed a bill saying that it is only necessary to be a resident of Idaho for 90 days before a divorce action can be filed, word comes from Reno that the legislature of that state will "out-Reno" any other state in the union, and here's how:

An amendment to the Nevada divorce law which provides that actions for divorce can be instituted in the courts there one week after the plaintiff has established a residence and tried after either the plaintiff or defendant shall have resided in the state continuously for six weeks, was introduced in the lower house of the Nevada legislature by Assemblyman Guy Walts, republican, at the request of several Reno attorneys, who prepared the bill.

A three months' residence in Nevada is required now before a divorce action can be tried or filed.

The bill would also amend the present divorce act to make it possible to state the grounds of the action in the words of the statute without setting forth any particulars unless demanded by the defendant. The grounds for divorce are impotency, adultery, desertion, conviction of felony, extreme cruelty, failure to provide and insanity.

The bill was offered in the legislature at this time to have it ready for passage if Arkansas or some other state adopts a short time divorce law.

Card Party Well Attended

The public card party, given under the auspices of the local Bridge club, for benefit of the Red Cross, was a decided success in every way. There was a good attendance and the ladies netted a neat sum for charity.

A cafeteria supper was served at 6:30, brought by those taking part, and it was a feast fit for a king.

At bridge, the ladies honors went to Mrs. Ed Long, while Frank Rider carried off the honors for the men. At pinocle, Miss Allene Rider won first place for the ladies and Hugh Helpman was first for the men.

There were 16 tables at play during the evening.

Veterans' Employment Bureau

The U. S. Veterans' Administration, Boise, Idaho, has announced the opening of an employment bureau at the local office to aid veterans in securing employment throughout the state, according to C. H. Hudelson, manager.

He further announces the office is now in a position to accept applications for employment and to endeavor to place veterans in positions, in accordance with their qualifications.

Those veterans desiring to file applications should communicate with C. W. Walker, who has been assigned to employment activities.

Plans are being made to contact firms throughout the state for the purpose of listing available employment opportunities.

Residence Ruined by Fire

Shortly after 8 o'clock Monday evening the fire siren sounded the warning that Harry Flaig's house was on fire, and within a few minutes the fire department was on the job, but not until the house was enveloped in flames on the side. The interior became so hot that the windows were blown out. Water was poured in and the flames subdued before the building was consumed, but everything was ruined by smoke and water.

The house belongs to Mrs. L. J. Herres and was uninsured. It is understood Mr. Flaig had his household goods partially insured.

Will Give Play Here

"That Girl Ann," given so successfully by a group of home-talent players at Juliaetta last week, will be given in the Audian theater on Saturday night, February 28, commencing at 8 o'clock.

BAD LIGHTS CAUSE AUTO CRASH AND ONE DEATH

One man dead, four people hurt and four cars wrecked or damaged was the toll of two accidents on a quarter-mile stretch of the North and South highway, three miles east of Lewiston, Saturday. Lewis Reubens, 40, Indian of Lapwai, was killed and Andrew Red Duck sustained possibly serious injuries, says the Lewiston Tribune.

Reubens and Red Duck were in a light touring car which collided with a coupe driven by Ernest Kauffman, 2904 Main street, Lewiston, at 8:20 p. m., one-fourth mile west of the power dam. Mr. Kauffman and two passengers in the car, Miss Eva Unzicker and Miss Anne Lanagan, on the nursing staff at St. Joseph's hospital, were uninjured.

An official investigation of the accident made by State Traffic Officer Harry Clark, Sheriff Harry Dent and Deputy Sheriff Howard Coburn resulted in Mr. Kauffman being held blameless.

Reubens and Red Duck were driving eastward and the Kauffman car toward Lewiston. The car driven by Reubens had a defective light on the side toward the approaching car, Kauffman, reported driving at a moderate speed, told the officers that the accident happened so suddenly that he had no time to act. He stated that as the cars rounded a curve he saw the light on the right side of the Indian's car and that he considered his position safe, being almost two feet outside the center of the highway.

The left wheels of the Kauffman car struck the left wheels of the other and for a few seconds locked. The car containing the Indians turned over, crushing its occupants beneath. Among the first persons to reach the scene were Niles Wynkoop and Dr. S. A. Roe.

When Reubens was taken from under the car he was barely breathing, Deputy Sheriff Corbin said, and expired within a minute or so. His chest was crushed and his spine was broken at the base of the skull. Red Duck was unconscious when taken from the wreckage but recovered when he reached the hospital. The attending physician said his body was bruised and there was a possibility of internal hurts although this could not be determined until an X-ray picture was taken.

The Indians' car was wrecked and that of Mr. Kauffman had its lights broken and one wheel torn off. His damage was estimated at \$150.

Another serious accident was narrowly averted at noon Friday, a quarter mile west of where the one occurred Saturday night. A sedan driven by Isobel George and having three other Indians as passengers, Silas Samuels, Dorcas Miller and Agnes Corbett, was rammed by a truck belonging to the Haener freight service of Grangeville and driven by Albert Haener, according to the officers. The sedan and truck were traveling to Lewiston.

According to finding by State Traffic Officer Clark, the car slowed down when a hat was noticed on the highway. The Haener truck was following close behind and before it could be brought to a stop collided with the sedan, smashing its rear and forcing the back seat against the front. Dorcas Miller and Agnes Corbett were riding in the rear and were pinched between the seats. Mrs. Corbett sustained bruises to her body and was slightly cut by flying glass. The others escaped. The injured woman was treated at St. Joseph's hospital and allowed to return to her home. Mr. Haener received cuts in the face when the windshield shattered.

Birthday Dinner

A delightful 6:30 dinner party was given at the Ramey home Monday evening, February 23, in honor of Miss Rowena's sixteenth birthday anniversary. The evening was spent in playing games and singing.

The invited guests were Misses Elma Jones, Elizabeth Carlson, Hazel Reid, Allene Rider, Margaret Schultz, Maxine Keene, Jeanne and Rowena Ramey. All reported a fine time.

No Clue To Thieves

So far there has been no clue obtained to the identity of the thief or thieves who entered the Red Cross Pharmacy last week and took some \$125 worth of cash, drugs and other articles. There is some doubt expressed as to whether the thieves were professionals.

FARMERS MEETING WAS A SPLENDID SUCCESS

The farmers meeting scheduled to be held in Kendrick on Wednesday of this week was one of the best attended farmers meetings ever held in this section, it being estimated that between 75 and 100 farmers attended during the day. The meeting was held under the auspices of the University of Idaho, in conjunction with the Lewiston Chamber of Commerce and the Kendrick Commercial club.

The speakers from the University were Prof. J. E. Nordby and Prof. H. W. Hulbert, who spoke on "Livestock on the Farm" and "Crop Rotation"; Harry Stafford of Lenore told about the raising of Soy Beans, J. W. Thometz, county agent for Nez Perce county spoke on rodent control and Lloyd Harris, representing the road committee of the Lewiston Chamber of Commerce, made a short talk on "Farm to Market Roads."

While all the talks were of much interest to farmers in general, there was perhaps no subject that was of more interest than the road question. Mr. Harris said that the road from Arrow Junction through Kendrick to Deary, was a possibility, but that it might not be reached this year. However, to know that it is being given consideration by the state highway department is encouraging news. He also mentioned a road from Ahshahka through Southwick, to Kendrick as being in mind by the state highway authorities.

The Lewiston Chamber of Commerce has given the Kendrick section much help on the road question and are still ready to work with us along any feasible line—and we want the Lewiston Chamber to know that the people of this entire section fully appreciate the interest they have always shown in this section and her road problems.

Bootlegger Arrested

Village Marshal E. M. Davis arrested Bob Morgan of Spokane on the streets of Kendrick Tuesday evening and found that he was transporting some 23 gallons of alleged high-powered moonshine from Spokane to various points.

Morgan was taken to Moscow Tuesday evening, together with the alleged moon, and turned over to Sheriff Chas. Summerfield.

The alleged legger was given a hearing before Justice W. G. Barge and his bond placed at \$500, which he expected to furnish Wednesday morning.

Among the Sick

Mrs. Sam Stanton, who is recuperating from an operation in St. Joseph's hospital, Lewiston, is said to be getting along nicely.

Mrs. Amos Moore, who was taken to St. Joseph's hospital Saturday afternoon by Ed. Deobald, and who was operated on Monday, is getting along as well as could be expected. It is stated that she will probably have to undergo another operation before she can completely recover.

Farm Wages Not So Bad

Wages in the farm sometimes seem small. However, a Washington, D. C., economist points out, that real farm wages, including such perquisites as housing, garden privileges, pasturage for a family cow and provision for a poultry flock, bring farm wages higher than is commonly believed. Comparing all farm wages in all states, Idaho ranks third, Nevada and California place first and second.

Should Plant Walnut Trees

"A black walnut tree on every Idaho farm," is a slogan suggested by the University of Idaho school of forestry. These trees are a source of satisfaction as well as an economic asset. Trees continue to grow during periods of depression as well as during prosperity, and while people sleep as well as while they are awake.

Is Out Again

Clyde Daugherty, who has been absent from the Deobald garage since the first of February, with measles, has so far recovered as to be able to come up town again. He hopes to be able to go to work soon.

Made Good With Turkeys

Ten turkey hens and one gobbler increased to a flock of 300 birds for D. Grinenti, a farmer in the Rupert section. His sales netted him \$900, besides an adequate flock for next season.

The Taxpayers League

We last week received quite a lengthy document from P. L. Orcutt of Moscow, who now seems to be one of the main ones in the direction of the Taxpayers' League, setting forth various resolutions adopted by that organization and giving considerable figure data regarding the tax situation in the state and Latah county.

The report sets forth the loss to the county by lack of proper taxation of railroads, telegraph, telephone, power lines, cut over and timber lands and lumber companies amounting to some \$227,828.98.

CLUB SCORES SHOW A STEADY RISE; 23 HIGH

Sundays shoot again saw the best score made to date on the Kendrick grounds raised a notch, when Walt Bigham broke 23 out of 25 targets. Although Mr. Bigham did not equal his former straight run of 19, he did better the club mark, and a number of other scores were also raised during the day's performance. The scores are all very good, they will be found below, listed by squads. Basis, 25 birds:

Squad 1	
Walt Bigham	23
Wm. Behrens	18
Ed. Deobald	16
Frank Crocker	15
H. Thomas	9
Squad 2	
Wade Keene	20
H. Schupfer	16
Wm. Benschott	15
Frank Boyd	14
H. Thomas	10
Squad 3	
H. Schupfer	19
W. Bigham	17
H. Thomas	15
Frank Boyd	13
Frank Crocker	12
Squad 4	
Wade Keene	21
Frank Rider	20
Ed. Deobald	20
Wm. Behrens	17
Geo. Barnum	17
Squad 5	
Ed. Deobald	20
Walt Bigham	18
Geo. Barnum	18
Lester Roberts	14
H. Schupfer	13

Many were skeptical that the club would prove a success, but to date has done so and has every indication of continuing to do so. The membership has increased steadily, as has the quantity and quality of equipment. The club now owns a shot proof trap house, an automatic trap gun, shooting stands, cartridge holder and all other equipment necessary to make a club a success.

Last Monday Geo. Barnum built and donated to the Gun Club a fine big outdoor gun rack with accommodations for 22 guns, also a checking table for the scorer.

Mr. Barnum announces that next Sunday he will give a box of shells free of charge to the man making the highest score. The price of trap shells has been reduced to 90¢ a box.

If you have not tried this fascinating sport you are invited by the Gun Club to come as guest and try it.

Dempeys Return To Oregon

Mr. and Mrs. J. L. Dempey left Wednesday for their former home at Forest Grove, Oregon, where they will again make their home. Mr. Dempey has been employed at the Kendrick Hardware store for the past two years and both he and his estimable wife have made many warm friends in Kendrick who will be sorry to learn of their decision to leave Kendrick, but who will wish them the very best of everything for the future.

U. of I. Feeds Many Lambs

The University of Idaho college of agriculture owns and feeds lambs on a much more extensive scale than any other college in the United States. For each of the last three years 1000 lambs have been fed at the Aberdeen and Caldwell sub-stations where a surplus of feed results from crop experiments. Thus a market is created from material which has no ready sale.

Gave Pinocle Party

Miss Nettie McDowell pleasantly entertained a number of her friends at a pinocle party at her home Wednesday evening of last week. Those present were Mae Freytag, Alice Ingle, Bernice Whisler, Margaret and Nettie McDowell, George Bailey, Kenneth Brocke, Ralph Bley and Newt Morey.

WHEAT MARKET STEADY— FEED IN GOOD DEMAND

Domestic and foreign wheat markets strengthened slightly during the week ending February 21, influenced largely by a somewhat improved demand from important consuming areas and by a material reduction in the estimate of the Argentine crop, according to the Weekly Grain Market Review of the U. S. Bureau of Agricultural Economics.

Feed grains met a good demand at most markets and the rather liberal offerings of corn were readily taken at practically unchanged prices. Quotations on oats and barley were advanced slightly at some points. The rye market was independently firm under a more active demand for the limited offerings. Some strengthening in the Argentine flax market as a result of better demand for Argentine flax in Europe, was reflected in the strengthening of domestic prices.

There were no important changes in crop conditions for wheat during the period under review. Rains in the winter wheat belt of the United States relieved surface dryness and stopped soil drifting in parts of Kansas. The condition of the Kansas crop is estimated at 90 per cent normal. Spring wheat areas of both the United States and Canada remained dry. European crop conditions are generally favorable, with a good snow cover in Russia and the more northern parts of the Danubian countries. Milder weather was reported in the southern areas. Conditions in Italy and Germany continue favorable and prospects of crops in England are good. Conditions in France are still rather unfavorable. India received further beneficial rains in the Punjab; and the United Provinces, two of the most important producing areas of India.

World shipments of wheat continued relatively large, but for the most part moved readily under a fairly strong import inquiry, which held prices steady. Argentine shipments totaled about 4,250,000 bushels and Australian shipments about 4,500,000. Russia exported 2,000,000 bushels from Black Sea ports, and North American shipments totaled 6,400,000 bushels. Stocks on ocean passage were materially increased, totaling about 51,500,000 bushels at the beginning of the week. The official estimate of the Argentine crop has been reduced around 32,000,000 bushels. Based upon this estimate, around 165,000,000 bushels would be available for export and carryover for the current season, compared with 80,000,000 bushels exported and carried over during the last crop year. The protein content of early receipts of Argentine wheat is reported as high as 14 per cent, with the weight averaging 63 pounds per bushel. Prices of native wheats in Europe strengthened during the week, with quotations at Hamburg and Paris at the highest point since August. At the former market, native German wheat was quoted at \$1.79½, with French wheat selling at Paris at \$1.82½. Native wheat at Milan was quoted at \$1.55 per bushel, the highest price since November.

Domestic cash wheat markets were practically unchanged. Mills and domestic marketing agencies were absorbing the current offerings, which continued fairly large. Receipts at the principal southwestern wheat markets totaled 2,982 cars compared with 3,310 last week, and 1,829 two weeks ago. Receipts of spring wheat at Minneapolis totaled 1,257 cars. Market stocks have been increasing very steadily, because of the lack of an export outlet and at the middle of February totaled 206,500,000 bushels, a record amount for that date, and nearly equal to the record stocks accumulated during the heavy marketing season last summer.

The protein of arrivals remains at a fairly high level, with inspections for the week at Kansas City averaging 12 per cent and Minneapolis at 14¼ per cent. Prices quoted were practically unchanged on all classes of wheat. At the close of the market Feb. 20, No. 2 hard winter, ordinary portein was quoted at Kansas City at 70¢ and 13 per cent protein at 70½¢ per bushel.

Good milling wheat was readily taken by mills in the spring wheat areas, with elevators and other marketing agencies taking the remainder at practically unchanged prices. No. 1 dark northern was quoted at Minneapolis at about 76½¢. The same grade sold at Duluth at 74½¢. Canadian spring wheat markets advanced

English Believe In Advertising
A news item from London, England, under date of February 10 says that British radio manufacturers spent \$5,000,000 in newspaper advertising last year and did \$200,000,000 worth of business.
Called a "miracle of achievement," Captain J. W. Barber, C. E. B. chairman of the Brownie Wireless company, Ltd., attributes the successful year's business to the judicious generous use of newspaper space.
A year ago, Captain Barber said, the British radio industry was faced with competition from what he called "dumped" sets, results of mass production without mass outlets, the surplus units being thrown on markets at whatever prices they would bring.
"In face of this," Captain Barber said, "more money was spent on wireless in this country than ever before. We had the good sense to make use of the best media available for our advertisements, and we chose the newspapers."

Try a want ad. if you have anything to sell. They get results.

GOLDENRULE ITEMS

George and Carl Finkey were visitors at the Glen Betts home Sunday.
Sunday dinner guests at the Roy Martin home were Mrs. W. J. Nead and family.
We were visited by a fall of snow of about four inches Sunday night.
Miss Mildred Gbler visited the Cowger home Sunday.
Abner Cowger was an evening caller at the Glen Betts home Sunday.
Miss Emma Loyes is visiting with her sister, Mary Kazda. She arrived last Tuesday.
Roy Martin made a business trip to the Cowger home Monday.
Mr. and Mrs. Glen Betts and family visited at the C. A. Betts home Thursday.
Goldenrule School Notes
The Goldenrule school had art last Friday. Miss Gbler gave the school a picture to see which one could color the best. The pictures that were colored the best were put upon the wall. They were the creations of Elbirtzen Martin, Marie Smith, Irene Martin and Dean Luce.

PERSONALS

Miss Josephine Deagen was a Moscow visitor Sunday.
Mr. and Mrs. Marvin Long were Lewiston visitors Sunday.
Mrs. J. B. Helman was a passenger for Lewiston Saturday.
Miss Priscilla Baker was a passenger for Spokane Friday, returning to Kendrick Sunday.
Mr. and Mrs. Frank Nesbit returned Monday from a short visit with their son at Moscow.
Elbert Long came over from the "U" to spend the week-end with his grandmother, Mrs. N. B. Long.
Mrs. Clarice Flaig and children of Orofino, came over Monday for a visit with her parents, Mr. and Mrs. Geo. Leith.
Herman Schupfer went to Pullman Tuesday to attend a meeting of salesmen and managers of the W. W. P. company.
Mrs. George Brocke returned home Tuesday from Lind, Wash., where she had been visiting her parents for some time.
Mr. and Mrs. R. H. Ramey and daughters Jeane and Rowena, Maxine Keene and Allene Rider were Lewiston visitors Sunday.
Mr. and Mrs. D. V. Kuykendahl and daughters Alberta and Ernestine and son Jean were Sunday guests at the F. W. Ellis home.
Miss Vina Gokec returned to her home at Dayton, Wash., Sunday after a two-weeks visit with her cousin, Ben Cummings, and family.
Mr. and Mrs. H. B. Thompson and Mrs. A. K. Carlson made an auto trip to Spokane Monday, returning home Wednesday afternoon.
Rev. A. E. Jones went to Walla Walla Sunday where he met his daughter, Mrs. Walter Kayser, of Portland, who came for an extended visit at the parental home.
Mr. and Mrs. M. O. Raby, who went to Grants Pass, Oregon, last week are expected to arrive home today (Friday). They will be accompanied here by their son-in-law and daughter, Mr. and Mrs. P. A. Lind, who will make their home here.

Most Satisfactory Flowers

The ten most satisfactory annual flowers for the home garden are zinnia, cosmos, marigold, scabiosa, snapdragon, china aster, calendula, corn flower, blue salvia and larkspur. This list is offered by one of the leading gardeners in the country.

No matter what your printing needs may be, we can do it for you.

CAMERON NEWS

What was supposed to be a surprise party for Mrs. Jake Berreman last Sunday evening turned out otherwise, when a group of friends gathered at the Berreman home only to find that the family was not there, but were spending the week-end with relatives on Bear ridge. However, the party goers were determined to carry out their plans and proceeded to gain entrance to the house and make themselves at home. After some inquiry it was learned that the Berreman family were to return early that evening so the guests undertook to entertain themselves by playing games. After some two and a half hours waiting the guests were little surprised when the Berreman family walked in on all the merry-making. They expressed their regrets for not being home sooner but explained that they had spent about seven hours coming only a few miles, because of the bad condition of the roads. Their trials and tribulations were soon forgotten when they joined their guests making merry. About midnight a dainty lunch was served, consisting of sandwiches, cake and coffee which the guests had brought in. The guests were Mr. and Mrs. Russell Rodgers, Mrs. Ida Stoneburner, Miss Emma Hartung, Mrs. N. E. Ware, the Messrs. Frank Wilken, Edgar Estes, Henry Bleck, Herbert and Ernest Schwarz, Raymond Rodgers, Edwin Mielke and G. F. Cridlebaugh and the Misses Adeline Rodgers, Dorothy LaHatt and Marie Schwarz.

Lewiston visitors last Saturday were Mrs. Ida Silflow, Mr. and Mrs. John Schwarz and son Herbert, Fred W. Silflow and Paul Silflow, G. F. Cridlebaugh, Mrs. Carl L. Wegner, Mrs. Ida Stoneburner and Miss Emma Hartung.

Mr. and Mrs. W. Weyen and family, Mr. and Mrs. Fred Schoeffler and family and Mr. and Mrs. Wm. McCoy and sons were dinner guests at the Otto Schoeffler home, Sunday.

Guests at the F. W. Newman home Sunday afternoon were Ernest and Verner Brammer, Walter Koepf, Herbert and Edwin Mielke, Marie Schwarz and Dorothy LaHatt.

Mr. and Mrs. Otto Silflow are the proud parents of a 5 1/2-pound baby girl, born Tuesday evening at St. Joseph's hospital, Lewiston. Mother and babe are reported as doing nicely.

Sunday visitors in Lewiston were George Ehlers, A. O. Wegner, Mildred and Selma Wegner, Herbert, Ernest and Lawrence Schwarz, and G. F. Cridlebaugh.

Mrs. Emma Brunseik and Mrs. Aug. Brammer and children returned Friday after spending a week visiting friends and relatives in Lewiston and Clarkston.

Reports from those on our sick list are that all are doing nicely. We await their speedy recovery.

Mrs. Clay Albright and son spent the past week with her parents, Mr. and Mrs. A. H. Blum.

Mrs. N. E. Ware of Bear ridge is spending the week with her sister, Mrs. Jake Berreman.

A number of Cameron farmers attended the farmers meeting in Kendrick, Wednesday.

Walter Koepf and Ted Mielke were Sunday evening guests of Ernest and Verner Brammer.

W. Weyen and family of Crescent were week-end guests of Mr. and Mrs. Wm. McCoy.

Miss Dorothy LaHatt of Kendrick spent the last week-end with Maria Schwarz.

Rev. and Mrs. Ehlen and Mrs. A. W. Schultz were in Lewiston Tuesday.

Combating Automobile Accidents

The automobile accident problem will require the use of all possible resources if it is to be successfully combated, in the opinion of an eminent authority. He predicts that the insurance industry will pay even greater attention to accident prevention work in 1931 than in past years. About \$300,000,000 was paid out by insurance companies during 1930 as a result of automobile accidents, and nearly four-fifths of this was for deaths and personal injuries. The total is close to the amount paid out for fire.

According to this authority, effective accident prevention work has been done through the National Safety Council, the teachers in the thousands of schools and the police departments of hundreds of cities. During the past decade special effort has been given to teaching children the fundamentals of safety, with the result that, during a time when the death rate for automobile accidents has been steadily increasing among adults, it has been on the down-grade among children of school age. Apparently it is time that adults followed the example of children, and absorbed the common sense knowledge that makes for safety on the streets and highways.

Road Records in 1930

The states started more federal aid road projects in 1930 than in any other year, according to an official government report. The projects involved \$125,780,000 of Federal funds compared with \$74,616,000 in 1929. The increase in Federal-aid will have a salutary effect on road building and consequent employment in 1931. At the beginning of the year over 9,000 miles of Federal-aid road was under construction, and funds available for new construction totaled \$144,725,776, in addition to the recent emergency appropriation of \$2,000,000.

It is hoped that a sizable part of 1931 funds will be used in rural sections, where the benefit per dollar will be greatest. In recent years there has been a well-defined tendency to develop main highway systems and to let rural roads, for the most part, take care of themselves. As a consequence, American farmers suffer as much from lack of year-round transportation agencies as from almost any other social or economic malady.

New York, California and other states are taking the lead in studying the farm road problem with a view to remedying it at the earliest possible time. All other states should follow. So long as a majority of the farmers are shut off from their markets during many months of the year, permanent and general agricultural prosperity will be a hope, not an actuality.

Must Have Mirrors on Trucks

After April 10 all persons operating trucks, constructed or loaded so as to prevent the driver from obtaining a view of the road to the rear, on Idaho highways will be liable to arrest unless the machine is equipped with rear-view mirrors.

This is the order received Saturday by Harry Clark, local state patrolman, from the office of Emmett Pfost, new state commissioner of law enforcement. Many complaints have been registered with the highway patrol regarding trucks not having mirrors. Section 44, chapter 260, of the Idaho compiled statutes, reads:

"No person shall drive a motor vehicle on a highway, which motor vehicle is so constructed or loaded as to prevent the driver from obtaining a view of the highways to the rear by looking backward from the driver's position, unless such vehicle is equipped with a mirror so located as to reflect to the driver a view of the highway for a distance of at least 200 feet to the rear of such vehicle."

Arrow Missionary Society

The February meeting of the Arrow Women's Missionary Society was held Friday, February 20, at the home of Mrs. Geo. Gibbs. The program included special features for observing the day, which was a world day of prayer. A large number of members and friends were there for the meeting, which began with a lunch at 12 o'clock. Book report discussion was led by Mrs. Gibbs.

Eggs Sell For 10c Dozen

Nepesee, Feb. 21—Eggs again have struck a low point, selling in local stores at 10c a dozen, retail. Butter is bringing 27½c a pound. Wheat is quoted at 38½c for red and 41½c for white, per bushel, the price since the farm board pegged the market. Hogs alone remain on high selling ratios, a double-deck shipped by the Rochdale company last week-end bringing \$7.85 per hundredweight.—Herald.

Good Housing Big Help

The average yearly production of dairy cows in the United States is 180 pounds of butterfat, which leaves no profit for the commercial dairyman. Comfortable stables or other quarters for the dairy herd greatly reduce the cost of production.

SOY BEANS RECOMMENDED FOR ROTATION CROP

Soybeans make a good replacement crop for spring wheat in those sections where corn is a profitable crop, states Prof. H. W. Hulbert, head of the department of agronomy of the University of Idaho, college of agriculture. The success of the crop depends on the selection of varieties and the use of inoculation.

Experiments conducted at Lenore in cooperation with H. L. Stafford, a farmer of that district, and J. W. Thometz, Nez Perce county agricultural agent, have furnished much information regarding varieties adapted to this area. Minsoy and Wisconsin Black are two varieties best suited to the higher elevations along the Clearwater river. Ito San will mature at the middle elevations, while Manchú and Habero are best for the lowest and warmest sections. If a hay crop is desired, Chestnut or Manchú varieties should be selected. The choice of variety is complicated by the fact that more than 1200 different varieties are grown in the United States.

Since most of the adapted varieties are low in oil, soybeans should be grown as a supply crop for "hogging off" or for feed for other livestock. They add materially to the value of the ration when "hogged off" in combination with corn and supplemented with bundle grain. The meal and ground beans make an excellent grain ration feed for all kinds of livestock. The hay is nearly equal to alfalfa for milk production.

Soybeans require the same seed bed and cultural practices as corn. They should be planted in rows, like corn or beans, with hills 20 inches apart and two plants to the hill. The amount of seed required to the acre varies from four to seven pounds, depending on the size of the seed and the variety.

When raised for seed, the crop can be harvested with a combine or binder, the same as wheat. The mower or binder can be used to harvest the hay crop. Soybeans require no additional equipment if grown on farms now producing corn or beans.

LINDEN NEWS

Miss Fay Pippinger visited with relatives and friends here last week.

Gus Wegner of Southwick spent Saturday evening and Sunday with his sister, Mrs. Roy Bohn and family.

Mrs. Sylvia Jinks and son-in-law, Earl Dunbar of Clarkston, spent Sunday at the Louis Alexander home.

The Mesdames C. H. Fry, Weyen, E. Bohn, Helen Martin and Dick Colgrove attended the Washington's Birthday program at school Friday afternoon.

Mr. and Mrs. Weyen and sons visited over the week-end with Mrs. Weyen's sister at Southwick.

Mrs. John Gentry of Deary, who has been visiting her parents, Mr. and Mrs. J. H. Hunt, returned home Saturday.

Mr. and Mrs. Stewart Wilson spent the day Monday with her parents, Mr. and Mrs. Wm. Zimmerman.

The "Arizona Wranglers" had dinner with Mrs. Weyen Thursday.

Mr. and Mrs. Stewart Wilson visited at the A. G. Wilson home Sunday.

Mrs. C. H. Fry and son Dick called at the Jim Farrington and Smith homes Monday afternoon.

Play Be Given at Arrow

A home-talent play will be given at the Arrow school house, Friday evening, February 27, commencing at 7:30 p. m.—"Mrs. Briggs of the Poultry Yard."

Following is the cast of characters: Mrs. Briggs Mrs. Calvert
Ralph Briggs Marion Lee
Jimmy Briggs Chester Douglas
Alvira Briggs Ada Lou Sampson
Melissa Briggs Rachel Sampson
Mr. Lee Ben Gibbs
Virginia Lee Catherine Moore
Daisy Thornton
..... Ella Sturdevant Douglas
Mandy Bates Mrs. Sampson
Silas George Anderson
Mrs. O'Conner Mrs. Gibbs

Port Bill Introduced

A bill to make Lewiston a deep river port was introduced in the senate by the corporations committee at the behest of Senator Shafer, Nez Perce. The bill provides establishment of a port district on approval of voters.

A port commission would be authorized to "adopt a comprehensive scheme of harbor improvements." The district would have the privilege of issuing bonds and making assessments for these improvements.

New Packing Plant

The new \$100,000 all-concrete meat packing plant of W. H. Bristol, pioneer meat market man of Lewiston, started operations Wednesday of this week, with ten experienced craftsmen at work. The plant is at Clarkston, Wash., on the bend of the Snake river, opposite the mouth of the Clearwater. It is one of the most modern in the Inland Empire.

POPULAR ASTRONOMY

(By Wickliffe R. Smith)

At no time of the year is the sky more beautiful and interesting to students of the stars than it is during the latter part of February and the first two weeks of March. And now that Mars and Jupiter are each in an excellent position for observation the celestial view is grander and more magnificent than usual.

Jupiter, the giant of the solar system, is almost on the meridian at eight o'clock in the evening, and is a little south of the zenith. It is fourteen hundred times as large as the earth and is moving through space at the rate of nearly five hundred miles a minute. This evening, February 27, Jupiter will be about five degrees south of the moon, therefore easily distinguished.

A few degrees east of Jupiter is the bright red planet, Mars. Between Jupiter and Mars and two bright stars, Pollux and Castor, called the twins. Pollux is of the first magnitude and Castor of the second. In the south we find Orion, one of the most clearly defined and conspicuous groups of stars in the sky. By a little effort of imagination you can picture Orion as a mighty hunter with a club in his right hand, the skin of a lion in his left, about to attack Taurus. This constellation is mentioned in the bible. (Job XXXVIII, 31). The belt of Orion is composed of three stars and is three degrees long.

In the north the Big Dipper lies east of Polaris. Notice the star at the junction of the handle and the bowl. This star is called Megrez and lies in the Equinoctial Colure.

In the southeast is Sirius, the brightest of all the fixed stars, a mighty sun much larger and hotter than our own sun.

TEAKEAN GOSSIP

J. S. Lehman left last week for his home at Willamette, Oregon.

Mrs. Claude Browning is suffering from a bad attack of tonsillitis.

J. H. Butler helped Claude Browning butcher a veal Monday evening.

Earl Kime was a visitor at the Simon Baugh home Sunday.

Dinner guests, at the J. H. Butler home Sunday were Mr. and Mrs. John Lind, Mr. and Mrs. L. Clanin, Clarence Clanin, Elwood Brock, Miss Lottie Chladek, Mr. and Mrs. Wm. Groseclose, Bruce Groseclose and Carroll Groseclose.

Misses Nelda and June Butler visited at the home of Mr. and Mrs. Stanley Smith Sunday.

An interesting missionary program was given at the church Sunday evening. A number of slides were shown giving pictures of conditions in India, with a lecture on the same given by Bruce Groseclose.

Mrs. Edgar Weakley was called to Peck a few days ago to help her father, Mr. Shortledge, care for the postoffice, as her mother, Mrs. Shortledge, had fallen and fractured her leg and would be unable to take care of the office for some time.

Mrs. Hazel West and children went to her home at Orofino one day last week.

Velma Leah Butler called on Margaret Baugh Sunday afternoon.

School Notes (Delayed)

St. Valentine's Day proved to be very exciting, especially to the little folk. The parents were invited to the school house in the afternoon and were pleasantly surprised by a short program given by the children. After the program the valentines were distributed and then cookies and cocoa were served by the boys. Mrs. Weakley presided over the cocoa while Paul Baugh, Gordon Choate and Wallace Sewell served. There were twenty-six guests and every one had a good time.

The third grade are making Geography books, made up mostly of pictures and explanations.

Saws, hammers and planes were kept very busy all last week. Morning recess and noon hours sounded like a carpenter's shop or a factory during rush hours. The outcome, however, proved to be very satisfactory as each room is the proud possessor of a new book case. Mrs. Weakley and the older boys did the work.

The Davis children have been out of school for over a week on account of illness.

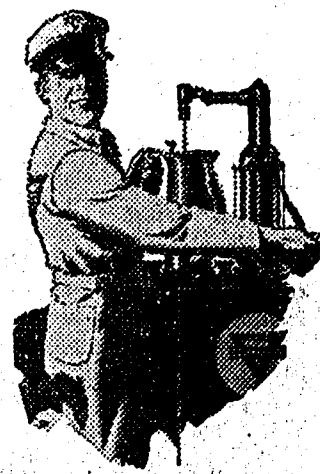

The primary room has been studying George Washington and Abraham Lincoln. Many interesting stories were told about each man.

The upper grade room, instead of having a spelling match, each pupil read a story. They had all week to write them. Fifteen stories were read and no two were alike. Some were fairly stories, some true and some imaginary.

Mrs. Fred Daniels, Mrs. Asa Choate and Mrs. Weakley were visitors Friday afternoon.

Brightening Up Hotel Interior

The fixtures of the Hotel Kendrick have been receiving a new coat of varnish this week, which adds materially to the appearance of the dining room and lobby.

"You can bet your Bottom Dollar Germ-Processed Oil won't fail you these cold days"

The multitude of motorists who have switched to Conoco Germ-Processed Motor Oil know what a great oil it is for summer use. Maybe they are wondering how it will act in cold weather at zero and below.

The makers of Conoco know. Better still, thousands of users know from their experiences of last winter. In Canada, Montana, the Dakotas in Denver with temperatures far under zero, Conoco Germ-Processed did not congeal. It remained fluid and continued to furnish efficient lubrication.

This accomplishment is no surprise. Conoco Germ-Processed is easy-starting, non-congealing at sub-zero temperatures, because it is a thoroughly de-waxed paraffin base oil. The Penetrative Lubricity of Germ Process makes certain an ever-present lubricating film in your motor, even after long periods of idleness... particularly valuable at starting time, when 40% to 60% of motor wear occurs.

Save this wear on your motor... your battery... your nerves. Drain and refill now with the proper grade of Conoco Germ-Processed oil at the sign of the Conoco Red Triangle. All grades, 35¢ per quart.

CONOCO GERM PROCESSED PARAFFIN BASE MOTOR OIL

Tune in on Conoco Listener's Hour... On 16 leading stations across the country... a program somewhere every day from Monday to Friday. Your nearest Conoco station will give you a log of stations, days and time. Here is a unique radio program... built upon the preferences of the listeners.

Butter Wrappers Printed at The Kendrick Gazette

Sacrifice Sale!

Of Thousands of Dollars Worth of New and Slightly Used Farm Machinery

Starting now and lasting for three weeks --- ending Sat. March 21, we are selling at far below real value, our large stock of implements --- including the slightly used equipment we purchased from the Eschohoff Farm Products Corporation.

Used 2-Row Cultivators at \$75.00
Bean Rakes and Planters 1/2-Price. New and Used.
Everything a Real Value

MCCORMICK-DEERING FARM-ALL TRACTORS
Three Year Terms

NEW NO. 38 CATERPILLAR COMBINE
At \$1,100.00

DUCK-FOOT WEEDER CULTIPACKER
1 USED ROD WEEDER

100 SECTIONS OF PEG-TOOTH HARROW

Terms Can Be Arranged. Three years given on all New Equipment

Kendrick Equipment Company

Girls of Arabian Race Eager for Instruction

Beirut, the leading center of education in the Near East, has more schools and colleges, native and foreign, than any city of its size in the world. But its girls' schools, before the World War, were all foreign and more or less of a missionary character. That is why Moslem parents refused to send their daughters to them. But during the war, when all the foreign schools were closed, a Syrian woman, Mary Kassab, opened a native school in the building of the English mission. The success of this school was such that the attendance in a few years rose from 20 to 300, and an enthusiasm for education was kindled in all the neighboring countries. From Iraq, from Palestine, from all parts of the Arabic-speaking world, girls of all creeds—Moslems and Christians and Druses—came today to the Ahl-yah school of Mary Kassab. The secret of its popularity, according to a writer in the New York Times, lies principally in the fact that, besides being native, it is non-sectarian. Technically and executive also it enjoys an unusual reputation.

Verses From Job Meant as Payment for Dinner?

The little houses on Camac street, where live the artists and even some ordinary mortals, became used to engaging and peculiar visitors. In one of these houses six worthy souls were making high wassal. Came a knock on the door. The host shouted, "Come in!" The door opened and a lady, seddy man strolled inside. He nodded affably to the merry-makers. "Gentlemen," he said, "I come to ask contributions to a sacred purpose—my dinner. If you would be so kind—" He collected an assortment of dimes and nickels. Then he put his right hand into his hip pocket. The guests ducked, but all that came forth was a small, leather-bound Bible. Standing before the hearth he read aloud a few verses from Job. Finished, he patted the book fondly and remarked, "I always carry that book, gentlemen," and strolled out, closing the door behind him.—Philadelphia Record.

The Challenge

Chairman Herbert S. Houston, of the International Chamber of Commerce, said of world politics at a dinner at the Century club in New York: "The militarists of each power yell out challenges to one another, but they are weak challenges after all, for the militarists know in their hearts that they haven't got the people behind them any more. These absurd challenges remind me of Henry Peck. "No man alive dare call me hen-pecked," he shrieked one night over a near-beer. "No? Why not?" laughed the near-beer drinkers round him. "Because if he did," shrieked Peck, "I'd tell my wife on him."

Porto Rican Violet Trees

In Porto Rico they look for the first sweet violets of early spring on trees instead of under them. In that country alone, says the American Forestry association, are to be found violet trees. These trees tower to sixty feet, with trunks twelve to fourteen inches in diameter. They are densely covered with thousands of violet-covered flowers.

But there are only six known living specimens, because the wood, being very hard, has been so greatly in demand for use as tool handles, parts of wheels, axles, or yokes and other necessities of the natives, that the trees have been sacrificed without thought of their possible extinction.

Ancient Indian Canoe

Discovery near Fontana, Wis., of a 12-foot Indian canoe, split lengthwise, by William Koepfen, Walworth, proved to be a historic find dating back to the days of 1836, when the Potawatomi Indians departed from Lake Geneva. Koepfen was walking along the shore of the lake when he discovered the relic. It is believed that recent storms washed the canoe up from its resting place on the lake bottom. It will be placed on exhibition in the Geneva Y. M. C. A. building by the Geneva Lake Historical society.—Indianapolis News.

Detects Tough Meat Cuts

To tell just how tough or tender a cut of meat may be, the Department of Agriculture has devised a simple tester which is being used extensively in research to find out why meat from one animal is more tender or tougher than that from another. A knife blade is pulled through small round pellets of the sample by means of a crank, and a scale in the center of the apparatus records the amount of pressure required to make the cut.—Popular Science Magazine.

Noises Disturb Stomach

That loud noises will momentarily disturb digestion by either contracting or relaxing the stomach muscles, is the claim of a Colgate university experimenter. Small balloons connected to a registering apparatus, reports Modern Mechanics Magazine, and placed in the subjects' stomachs disclosed the internal reaction to the noise. In either case, however, the momentary interruption of the digestive function was followed by increased muscular activity.

Few Learn Wisdom in School of Experience

The notion that experience is a good teacher is one of the most baseless of human obsessions. Were it otherwise, mankind would have reached perfection long ago. "Learning teaches more in one year than experience in 20," wrote Roger Ascham in the "Schoolmaster" with profound wisdom. The path of civilization through the ages is littered with splendid but wasted ideas. The largest visions, the deepest insights, the most compelling arguments, have been spread before the minds of men by prophets and by seers, by statesmen and by nation builders, and then let fall into the darkness of forgetfulness. Nearly everything that man has said well was best and most finely said by those ancient Greeks and Romans who after 2,500 years still rule the mind of the western world. Material waste is nothing compared with the intellectual and moral waste which follows upon our not heeding the counsels that have been offered us from generation to generation and from century to century.

He who is in advance of his time is called a prophet and he who is behind his time is called a laggard, but often laggard appears to count for as much as the prophet. It takes time, much time, to catch up with an idea. The inertia of habit is powerful indeed, and it struggles mightily against change even when that change is demonstrably for good.—From the Path to Peace, by Nicholas Murray Butler.

Ruins Show Design of Ancient Indian House

In a plowed cotton field in Mississippi the complete plan of a prehistoric Indian house was discovered recently, according to Henry E. Collins, Jr., of the United States National Museum. The plan showed three shallow circular trenches, the outermost of which was 60 feet in diameter. The builders set posts firmly two feet deep within the trenches as supports for the roof. The wall of the structure was very likely of wattle-work or reeds, plastered with clay. Traces of a fire pit were inside the house. In the outermost trench were found kitchen and household refuse, including bones of deer, bear and smaller animals, fish jaws, arrow points, a pipe and much broken pottery. Some of the pottery was of a red-and-white kind, heretofore found only in Arkansas.

Mother Cat Adopts Rabbit

Another supposed law of animal life has been proved to have an exception and the proof can be seen at the shop of M. W. Bergel at Bangor, Maine, where an old mother cat nurses and cares for a tiny wild rabbit along with her litter of kittens. Mr. Bergel found the little creature in the woods and brought it home. He was at a loss as to how he would care for the rabbit until he thought of placing it with the kittens. Mother cat gazed in a sort of perplexed manner at the strange visitor and then, as though taking pity on him, reached out her paw and drew him to her. Now the rabbit is her favorite kitten.—Boston Globe.

The Parasite

The late Secretary of War Good said at a luncheon in Washington: "It's wrong, when war comes, to conscript the youth of the country while the age of the country stays at home and prospers. So we must have conscription for all, or conscription of none."

"The partial conscription of the World War reminds me, in its shameless injustice, of young Jones. "The lazy and impudacious young Jones said to his oldest friend: "Well, I'm going to get married. Congratulate me."

"I do," said his friend. "But what will you live on? Love?" "No," said Jones. "Love's father."

Success and Failure

Uncle Joe Cannon on his ninetieth birthday talked to a reporter about success and failure.

"Too many of us," he said, "are like a fisherman I came across one day on a walk in the country. "Catching anything, friend? I said to him."

"Now," said he. "Every time a car goes over the bridge it scares all the fish down stream."

"Well, friend, why don't you move down stream a little?" "They ain't no comfortable rocks there."

Radio Aids Fire Fighters

When a fire breaks out at any point along the 150 miles of docks, which are under the patrol of the marine division of the New York city fire department, and the John Puroy Mitchell is dispatched to render aid, communication by means of a newly installed radio telephone is maintained with the fire fighting craft from the time it leaves its berth at the battery until it returns.

Didn't Mind 'Em

A poultry farm was infested with rats and the handy man bought a dog. After the first encounter with the pests the mistress inquired: "Is the new dog a good ratter?" "He is O. K. for the rats. He didn't seem to mind them at all," replied the nonplused helper.

Camel's Swimming Power Proved by Experience

Camels can swim if the occasion demands, despite their long association with desert travel. While making an investigation in the archives of the Mormon church, in Salt Lake City, Frederick S. Dellenbaugh of New York found an article written in 1857 by a member of Beale's expedition in the Southwest in 1857 and 1858. The purpose of the expedition was to determine the utility of camels for transportation in the American desert.

The article, according to Mr. Dellenbaugh, related how, when the expedition reached the Colorado river there was some doubt whether the camels could swim the 200-yard stream. Lieutenant Beale led one of the animals to the water and drove it in. As soon as it found itself out of its depth, the article related, the camel struck out with ease and swam the stream. The others were sent across in batches of five or six.

This despite the writings of Huck, which describe the detention of the author at the Yellow river, in China, on account of the difficulty of crossing with camels, which, he said, could not swim.

Why Attempt to Define Reason for Laughter?

Why do we laugh? Why do we ever begin to laugh? A psychiatrist explained the whole thing to the British association. He took the laughter of a child and divided it neatly into ten stages of development. At eighteen months the infant had discovered most of the reasons for laughter which adult minds possess.

And lucky child, it had no more idea at the end of it all than the rest of us have that laughter was not just a simple uproarious part of the whole jolly business of being alive. Shade of Babylon, shade of Oxyrhente, shade of English Shakespeare, why did you laugh? Would you have been merrier with a list of reasons for merriment in your hands like the list of "distinct indications" which Browning wrote about? Why do we laugh? Stuff!—Montreal Standard.

Aviator's "Reckoning"

Dead reckoning means navigating, or laying the course, taking into consideration the following factors: Air speed of the plane, true course from starting point to destination, magnetic variation at start and at destination which would affect reading of compass, miles between start and destination, wind, its direction and velocity (this would affect speed and direction of travel of plane). Considering these factors, one would figure what the true direction would be; then, applying the comparative speed and direction of the plane and how much he would have to "crab" it to keep him on his course, he would get his compass reading for his flight to make it. That is dead reckoning.

Coarse Ancient Tales

Fabliaux is the plural of fabliau, which is one of a kind of short metrical tales, composed chiefly in the Twelfth and Thirteenth centuries by the trouvères and told for amusement merely. Fabliaux are usually comic and satirical and strictly coarse, and are often cynical, especially in their treatment of women. They throw light, however, on the state of society and the manner of everyday life. Such are the fabliaux proper from which Boccaccio and other Italian tale-tellers, Chaucer and Mollere got directly or indirectly some of their material.

Odd Musical Instrument

The B. C. A. Theremin is a development of the Thermanvox, an invention of Prof. Leon Theremin of the Institute Physico-Technique of Leningrad. It is a musical instrument operating entirely by electrical circuits. It has no stops, keyboards, or any of the other mechanical contrivances with which musicians must labor. The music which can be obtained from the device depends upon the operator only, and the motion of his hands with respect to two electrodes, one for controlling volume and the other for controlling pitch.—Washington Star.

Radio in Argentina

Radio reception is so good in Argentina that the country has become the largest importer of American made radio apparatus. The government supervises the twenty broadcasting stations, whose programs reach virtually every part of the country. Most of the 150,000 radio receivers in use are in Buenos Aires and about half of them are crystal sets, but one, two, five and eight-tube straight regenerative and three-circuit regenerative sets are becoming popular. Germany supplies most of the head sets because of their low price.

Massage the Gums

A sound tooth imbedded in rotted gum is not only pretty, but it is an indication of good health. The gum which is bluish red, too pale in color, or too brilliant a red, is not healthy. A gum which is coral pink is a healthy gum.

The color of a gum is due to the circulation and, as elsewhere in the body, rubbing stimulates the circulation. Consequently, brushing of the teeth is not sufficient. There should be connected with the daily brushing a careful attention to the massaging of the gums.

- Built-in water heater keeps water hot.
- Super-Agitator feature offers faster washing action.
- Clothes never become tangled.
- Built to serve and last a lifetime.

- Beautiful green enamel finish.
- Extra large washing capacity—six sheets.
- Absolutely noiseless—motor mounted on rubber.
- Costs only a penny an hour for electricity to operate.

New 1931 Thor

Super Agitator Electric Washer

Introductory Sale Event

To the homes we serve electrically—to the wives and mothers who manage these homes we now present a new Thor.

What a practical introduction it is.

The price greatly reduced—special buying terms enable you to buy at only one dollar down.

This new Thor has a built-in electric heater that keeps the water piping hot during the entire washing capacity—six sheets.

It is the fastest electric washer ever built.

It is the one washer that fulfills your every requirement. Available now and for a short while only, at—

\$1.00 and small payments with your monthly light bill

The Washington Water Power Co. Electricity—to Serve You

THE NEW ART OF MENTAL HYGIENE

By S. P. Wilkerson, M. A., Southwick, Idaho

How many times as thinking individuals have we asked ourselves when answers to the following very personal questions will be found? "What keeps us sane? Why do people go insane? Is any one of us liable to go insane at any time? Why does monotony have a bad effect on people? When a person is maladjusted is there any organ in addition to the brain that is not functioning? How can we find out the laws of Mental Health? Will hard thinking drive a person insane? What causes hysteria? 'Spells'? Sleep walking? Why are we gloomy on some days and happy on others with no apparent reason? Do like natures attract each other or are the opposites more attractive? How can we cultivate and control our feelings? To what extent should fear be used in the control of children? Is it probable that insanity, nervous breakdowns, etc., in later life are often caused by the kind of discipline the child undergoes? Why do some boys and girls run away from good homes? The above questions are taken from D. W. LaRue's book, Mental Hygiene, as a fair sample of the type of questions Mental Hygiene is seeking the answers to. In somewhat modified form such problems have confronted thinking men for uncounted ages.

Superficial study would lead us to declare that we are no nearer the correct answers than ever before, but such a conclusion is hardly true. To presume that answers will never be found is to place ourselves among the doubters of all times who have ever checked the wheels of progress by declaring "it can't be done." The uninformed doubted if man would ever sail around the world. Psychiatrists and Psychologists tell us they are confident, that knowledge that we now have, together with facts to be gathered by understanding and co-operating people will ultimately give us a satisfactory remedy for practically all mental maladjustments. It requires no argument to convince a robust athlete that he can only retain his physical strength by obeying the laws of health. Yet this same man may not realize that his mind is also ruled and regulated by laws equally definite and penalties even more severe for their violation.

In America we admit to our hospitals for mental diseases, as new patients, seventy thousand every year.

From one-sixth to one-third of the expense of each state in the United States is used for the confinement and treatment of the insane. This great army of unfortunates, according to figures collected by the National Committee on Mental Hygiene, outnumber the college and university students.

The organization for the better treatment of mental defectives dates from 1909, shortly after the publication of "A Mind That Found Itself," by Clifford Beers. He so strikingly called attention to the disgusting and brutal forms of treatment used then in hospitals for the insane, that an organization was formed, having for its purpose improvement in the treatment of the insane. It is known as the National Committee on Mental Hygiene. A little study of the subject convinced this committee, that to spend money on prevention rather than cure of insanity was the more economical. These experts have discovered that a large per cent of mental troubles can be prevented by proper home and school environment and training.

However, the greatest gains to be expected from Mental Hygiene are among those who are never likely to become inmates of any hospital but suffer from emotional maladjustments nevertheless. These while not dangerous to themselves or to others are severely handicapped in their efforts to live well rounded and happy lives. To all those who have good minds and wish to keep them so as well as to mental defectives, Mental Hygiene promises help.

The accomplishments of the medical profession in the field of hygiene were very limited, until the facts of hygiene were understood and appreciated by the great majority of people. In precisely the same way Mental Hygiene will contribute to the general welfare when its principles are well enough understood to be generally used. Perhaps no more worthy subject for study, by culture clubs and similar organizations, could be found than Mental Hygiene. We should all do our part to help America conserve and use its brain power to the best advantage.

Never Despair

Doctor—An operation will save your life.

Patient—How much would it cost? Doctor—\$250.00.

Patient—I don't possess so much money.

Doctor—Then we will see what pills will do.

CAVENDISH ITEMS

Weather conditions this week have been a great surprise as everyone was sure spring was here, but Sunday night about four inches of snow fell. Sunday dinner guests of Mr. and Mrs. Earl Akins were: Chester McIver and family, Mr. and Mrs. C. M. Blackburn and daughter, Ivalee.

Mrs. E. L. Pearson came up from Kendrick Saturday to spend a few days with her parents, Mr. and Mrs. S. A. Sutton.

Mr. and Mrs. T. C. King and children spent Sunday at the Jess Daniels home attending church in the morning and evening.

Claude Kimes went with Mr. Ziemann to Spokane Saturday, where he received medical attention for his eye, which he injured some time ago.

Mr. and Mrs. Neal Vaughn and children were callers at the Tarry home Sunday.

Rev. Calvert is having a large attendance at the revival meetings and will continue them for a few evenings this week.

Mr. and Mrs. E. E. McGuire and Mrs. Edna Daniels called at the W. A. Reece home Saturday.

Mrs. Thelma Pitcher has been ill for the past week with flu.

Prospects Good

Inland Empire crop prospects are about "125 per cent," according to G. E. Krummeck, assistant general manager of the North Pacific Grain Growers, Incorporated. "The moisture situation is better today than at this time in the last three years."

The winter wheat acreage is about 40 per cent greater than last year, and the wheat looks very promising. However, Washington's wheat crop will not exceed normal because the increased winter wheat acreage is expected to be offset by a corresponding decrease in spring wheat planting. Last year's crop in Washington, Idaho and Oregon, totaled 91,000,000 bushels. As reports indicate this year's crop will run but a little heavier. "Last year at this time, many sections hardly had top soil moisture," said Mr. Krummeck, "While the present year's moisture is down 15 inches to two feet pretty generally in the Inland Empire."

The Census Taker

"What do you do?" "I keep house, scrub, scour, bake, wash dishes, cook, do the laundry, iron, sew, —" And the census taker listed her: "Housewife—no occupation."

SUMMONS
In the District Court of the Second
Judicial District of the State of
Idaho, In and For Latah County.
Frank A. Moore and Robert L. Moore,
Plaintiffs, vs. Joe Sears, Will M.
Sears and Louisa Spittler (nee
Louisa Sears); the unknown heirs
of Christian Sears, deceased, and the
unknown devisees and unknown
legatees of Christian Sears, deces-
ed, Defendants.

The State of Idaho sends greetings
to Joe Sears, Will M. Sears and
Louisa Spittler (nee Louisa Sears);
the unknown heirs of Christian Sears,
deceased, and the unknown devisees
and unknown legatees of Christian
Sears, deceased, the above named de-
fendants:

You are hereby notified that a com-
plaint has been filed against you in
the District Court of the Second Ju-
dicial District of the State of Idaho
in and for the County of Latah by
the above named plaintiffs of the na-
ture in general terms as follows, to-
wit:

An action to quiet in plaintiffs
title to real property mentioned and
described in plaintiffs' complaint
to which reference is hereby made
for a specific description thereof.

And you are hereby directed to ap-
pear and plead to the said complaint
within 20 days of the service of this
summons; and you are further notified
that unless you so appear and plead
to said complaint within the time
herein specified, the plaintiff will take
judgment against you as prayed in
said complaint.

Witness my hand and the seal of
said District Court, this 29th day of
December, 1930.

**WHEAT MARKET STEADY—
FEED IN GOOD DEMAND**

around 3½c per bushel, with No. 1
Manitoba northern quoted February
20 at Winnipeg at 62¼c. Domestic
durum markets weakened slightly
under a slow domestic demand and
the failure of foreign trade to ma-
terialize. May durum at Duluth de-
clined ½c during the week and closed
February 20 at 74½c. No. 1 and No.
2 amber durum sold at Minneapolis
at 69c to 75c and at Duluth at 73c
to 75½c per bushel.

Pacific Coast wheat markets held
about unchanged. Marketings in the
Pacific Northwest continued of good
volume, with terminal storage fac-
ilities rapidly filling. 355 cars were
received at Puget Sound and Colum-
bia river terminals during the week.
Stocks of wheat in the Pacific North-
west are estimated by the trade at
around 50,000,000 bushels in all po-
sitions, with around 40,000,000 bushels
for export, but with prices well above
an export basis. A sale of 16,000 bar-
rels of flour to Shanghai was reported
made at Seattle toward the close of
last week at around \$2.50 per barrel
F. O. B. Seattle. A further decline in
the Oriental silver market has re-
duced prospects of exportation of
wheat, although there were rumors
of export sales toward the close of
the week. With the exception of
Big Bend bluestem, prices of wheat
at both Portland and Seattle held
practically unchanged. Big Bend blue-
stem No. 1 hard white declined about
1c to 69c per bushel in Portland, re-
flecting the dull domestic milling de-
mand for this class of wheat. Soft
and western white wheats sold at Por-
tland at the unchanged price of 67¼c,
and hard winter, northern spring and
western red at 64½c per bushel,
sacked, basis No. 1. Montana dark
northern spring, 14 per cent protein,
in bulk, was quoted at Portland at
73c per bushel.

California wheat markets were dull
and slightly lower. New seasonal lows

were reached for both milling and
feed grains, following the decline of
2½c to 5c per 100 during the week.
California growers were offering a
little more freely with the approach
of the March tax-paying period, but
demand continued light. Northern
wheat was being offered freely at
\$1.22½ to \$1.25 for No. 2 soft white
and No. 2 western white, and \$1.27
for No. 2 hard winter, 12 per cent
protein, delivered San Francisco on
docks. No. 1 dark northern spring
from Montana was quoted at \$1.37½
to \$1.40, and western red feed wheat
at \$1.20 on the same basis. No. 2
hard winter from Utah and Idaho
was offered delivered California points
at \$1.26½, and 13 per cent protein
No. 2 dark hard winter at \$1.35 per
100 in bulk. Local No. 1 hard white
and No. 1 soft white wheats were
offered at \$1.22½ to \$1.25 at San
Francisco.

Demand at Los Angeles was limited
to light amounts for nearby require-
ments. Offerings of hard winters were
rather liberal, with No. 2 hard win-
ter, 13 per cent protein, quoted at
around \$1.37½ sacked, delivered Los
Angeles and No. 2 hard winter in
bulk, under 13 per cent protein, at
around \$1.30 per 100. No. 1 soft
white was quoted at \$1.32½ and No.
1 hard white, mostly of the Baart
variety, at \$1.35 per 100.

Many Men Put To Work

News reports this week indicate
more than 15,000 men are to be put
to work by the railroads at mainte-
nance of way jobs serving the north-
west. The announcement comes from
St. Paul that the Great Northern and
Northern Pacific each would add
5,000 men to their payrolls and the
Milwaukee 3,000. These 13,000 will
command a salary per month of \$1-
000.00.

In addition the Union Pacific and
the Spokane International will put to
work about 2000 men, adding another
\$175,000 to the amount which will be
given out in wages.

IDAHO ONE OF GREATEST STATES IN THE UNION

While the whole nation is hearing of drought, loss of crops, suffering and hunger it is encouraging to read of the records Idaho farmers made with their 1930 crops as recorded in a new publication of the Idaho State Chamber of Commerce. This pamphlet will soon be off the press. Ten thousand copies are being printed for distribution to inquirers about Idaho.

One reads in this pamphlet that Idaho ranks first in the nation in yield per acre of all wheat, the average being 27½ bushels. The national yield is 14.4 bushels.

Idaho is also first in clover seed, the production being 5.1 bushels and 5.4 bushels per acre, respectively. The national average for clover seed is 1.43 bushels and 2.91 for alfalfa.

With winter wheat, spring wheat, barley and beans, Idaho's yield per acre is second in the nation and the average yields are more than 100 per cent above the national average.

In potato yields Idaho drops into third place with an average yield of 214 bushels per acre. The national average, however, is but 106.4 bushels.

Idaho's corn yield for 1930 was 39 bushels per acre and was higher than any other state in the nation with the exception of six relatively unimportant corn states in the New England group.

Other information in the booklet deals with the magnitude and importance of the mining and forestry industries each of which is worth 35 to 40 millions of dollars annually to the state.

The growth of the dairy industry is reflected in the figures for 1930 showing that Idaho produced 26,128,007 pounds of butter in that year; that all dairy products manufactured in the state had a wholesale value of \$14,500,000; that the state ranks fourth in cheese production in the nation.

The wool clip for 1930 is shown to be 18,768,000 pounds with the state ranking seventh in wool production.

Two hundred cars of turkeys were shipped in 1930 as well as 240 cars of dressed poultry and 345 cars of eggs.

LELAND NEWS

Mr. and Mrs. Ed. Flesman and Mr. and Mrs. Everett Flesman and daughter Frances visited Saturday in Lewiston with Mr. and Mrs. Manly Watson.

A little daughter arrived Sunday for an extended stay at the Fred Arnold home. Mrs. Virgil Flesman is helping to care for the mother and babe.

High Parks was taken to a Lewiston hospital Sunday evening and was operated on for appendicitis Monday.

O. A. Walker and son Orval, accompanied by T. J. Virgil and Laurel Flesman, were Lewiston visitors Saturday.

Robert Smith and family visited Sunday with the Dick Winegardner family.

A. G. Peters and family were Sunday guests at the Lyle Harrison home.

Virgil Flesman and family and Mr. and Mrs. James Helton were Sunday guests at the T. J. Flesman home.

Mrs. Jesse Walker and three children of Kooskia are visiting relatives in the Fairview section.

Mr. and Mrs. Turnbaugh were Sunday dinner guests of Mr. and Mrs. B. Gouidward.

Maxine Flesman spent Monday night visiting with Vera Peters.

Mrs. Minnie Blackenship was given a birthday surprise on Tuesday night. Several people from here went to the sale Wednesday, near Lapwai, and still others were in attendance at the farmers' institute at the Audian Theatre, Kendrick.

Wm. Bond was a Lewiston visitor Wednesday.

North Idahoan Gets Job

Governor Ross announced two appointments Tuesday to state positions, one of them coming in time for senate approval.

M. Reese Hattabaugh, Grangeville, was appointed to the state public utilities commission, succeeding F. E. Smith of Orofino and R. E. Thomas, state game warden, as warden of the state penitentiary.

Thomas' appointment was made by the prison board, of which the governor is chairman. The other members are F. E. Lukens, Lewiston, secretary of state and Fred Babcock, Lewiston, attorney general. Both are republicans.

Duck Speed

A mallard duck, branded on November 23, 1930, at Big Suamico, Green Bay, Wis., was killed five days later near Georgetown, S. C., according to report to the Bureau of Biological Survey of the United States Department of Agriculture. This is a record for individual speed of migration, the bureau says.

We print school warrants and report cards. Need any?

TREES GROW IN SPITE OF BUSINESS DEPRESSION

The School of Forestry of the University of Idaho has just released the forest and shade trees available from the state nursery to citizens of Idaho at cost of production. In the pamphlet a total of 38 different species of forest and shade trees are listed and a chart is included, showing the trees recommended for planting in each of the 44 counties of Idaho. Sixteen species of conifers or evergreens and 22 species of hardwoods or deciduous trees make up the total. Many of the species may be secured in various sizes ranging from tiny seedlings to trees nine feet high or even larger. Fully half a million trees will be at the disposal of Idaho citizens through this medium.

Farmers of Idaho are again able to obtain tree seedlings for woodlots, shelterbelts, windbreaks, and roadside tree planting at half cost of production since the federal government, under the terms of the Clark-McNary law cooperates with the Idaho nursery in this arrangement.

Suggestions are given regarding the choice of species for ornamental, roadside, and farm forest plantings, both as to landscape and utility value. Directions for proper planting, care and attention are also included. Spring, just as soon as the frost is out of the ground, is the proper time for tree planting. According to the state nurseryman, an unusual number of early orders have been received and the prospects for another big year in Idaho's tree planting program is in sight.

Frogs In Hawaii Rank as "Livestock"

Frog culture is a newcomer to the livestock industry in the Hawaiian Islands. The Extension service of the United States Department of Agriculture recently organized two boys' 4-H frog clubs to encourage frog farming.

After studying the market for frog legs and learning that the Honolulu market alone could handle 6,000 pairs of frog legs a week at 20 cents a pair, the Extension service organized clubs in west Hawaii and on the Island of Kauai. Marketing specialists considered this demand sufficient to make frog raising a profitable enterprise. Other clubs will be organized.

The agricultural experiment station imported two species of frogs into Hawaii a few years ago because they feed on certain insect pests. They proved worthy insect fighters and likewise acquired a wide reputation for the cooking quality of their hind legs. The natives call these frogs "mountain chickens." The club members plan to have a frog show this winter in conjunction with the annual poultry show. It will be the first show of its kind in the Territory and possibly the first in the United States.

Two Ways To Increase Business

Every merchant realizes that there are two ways in which he can increase his business. One is by selling his merchandise to more customers. The other is by selling more of his merchandise to customers he now has. The easiest and quickest way to accomplish either of these alternates is by advertising.

Advertising will sell more merchandise to the customers one has. It will do it by first calling attention to the merchandise, getting the customer interested in it, creating a desire for it and by leading him to buy it. This has been tried a countless number of times and results have proven that it works out just this way.

Advertising can bring into a store more customers because it reaches out into a wider territory and brings in customers that otherwise would never think of coming to the store.

The history of American business is filled with instances where small businesses have grown to large enterprises purely through the power of advertising. No where is there a record of a business that has accomplished anything of note that has not resorted to advertising.

Advertising works for the small merchant the same as it does for the large department store.

Poor Yields, Drought, Cause Loss

Poor yields and low prices resulted in a two and one-half billion-dollar decrease in farm income in 1930. This amounts to a reduction of approximately \$400 for every farm home in the country.

Farmers Should Rat-Proof

The cost of rat-proofing all the farm buildings is less than the loss occasioned by rats in a single year. Many cities have added rat-proof clauses to their building ordinances, but the farmer profits most from such precaution.

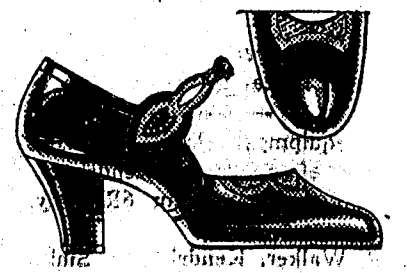

Bees Increased Apple Crop

By placing a hive of bees in his orchard, a western farmer is reported to have increased his apple crop from 1,400 bushels to 6,000 bushels.

NOTICE OF GUARDIAN'S SALE OF REAL ESTATE

In the Probate Court of the County of Latah, State of Idaho.

In the matter of the Person and Estate of John C. Hamil, an incompetent person.

Notice is hereby given that the undersigned, guardian of the person and estate of John C. Hamil, an incompetent person, will sell at private sale in one parcel to the highest bidder, subject to confirmation by the probate court of said county, on and after the 14th day of March, 1931, all the right, title, interest, and estate of the said John C. Hamil, an incompetent person, in and to those certain pieces and parcels of land, lying and being in the counties of Latah and Nez Perce, State of Idaho, and particularly described as follows, to-wit:

Northwest quarter of southwest quarter of section thirty-five and thirty acres off the east side of the northeast quarter of the southeast quarter of section thirty-four, all in township thirty-eight North, excepting a right-of-way for a private wagon road over and across the above mentioned 30 acres of land, commencing at a point about 40 rods west of the northeast corner of the NE¼ of SE¼ of section 34, and running

thence in a southeasterly direction and ending at or near the south east corner of said thirty acres, all of the above described tract is in Latah county, Idaho, except about 33 acres of the NW¼ of SW¼ of section 35, above described, which is situated in Nez Perce county, State of Idaho.

Terms of Sale: The purchaser to assume mortgage of the Federal Land Bank of Spokane, Wash., on premises for \$1090.44 and pay the remainder of purchase price in cash. All bids must be in writing and may be delivered to the undersigned at his office in Kendrick, Idaho, or they may be filed with the Probate Judge of said county. A certified check of at least five (5) percent of the cash offered under the bid, must accompany each bid; the balance to be paid upon confirmation of sale.

Dated, February 25, 1931.
 C. A. OPPENBORN,
 Guardian of the Person and Estate of John C. Hamil, an incompetent Person. Residence and Business Address: Kendrick, Idaho. 9-3

500 Bushels Per Acre
 Four acres of Netted Gem potatoes grown last season in Nez Perce county yielded 500 bushels to the acre of marketable product. The field is in the Lewiston valley.
