figure it out, yourself

If your tires are pretty smooth right now, the slippery roads of fall and winter make the full grip of new Goodyears a sensible precaution. And new tread lasts about TWICE as long on cool roads as on hot summer roads. So Goodyears put on now still will be practically as good as new for next spring and summer. You'll be protected from skids and free from the expense or worry of tire trouble all winter. Better buy now!

GOV. ROSS' MESSAGE TO 22ND STATE LEGISLATURE

upon a cash basis, thus helping to eliminate the present necessity of transacting practically the entire business of the country upon a credit basis.

Economy in Government

The states can do but little through their legislative bodies to increase the income of our people. That responsibility rests with Congress and the Chief Executive of the United States. But, we can reduce the cost of government and distribute the burden more equitably among those who receive the benefits. To give the necessary relief to the people, local subdivisions, counties, municipalities and school districts, must economize by reducing their cost at least 25 per cent. In these times of depression when the earning power of our people is at its lowest ebb, the responsibility rests upon this body of lawmakers to pass legislation that will require the various political subdivisions of the State to make a material

reduction in the cost of government.

It is not a matter of what we think we need or what we are entitled to, but the whole question before us is what can we pay for. Measured by the prevailing prices of commodities of the farm, the mines and the forests, taxes are two and one-half times higher than they were in 1928. The situation resolves itself down to this: can we save the homes and leave the real and personal property of our people in the hands of the original owners? Can we lighten the burden so that the state will not be required to take the property of the taxpayers because of delinquencies?

Therefore, the strictest economy must be practiced, and it devolves upon your body to restrict the various taxing units to expenditure of the least amount of money consistent with good government. Too many boards or taxing units are authorized to make levies upon the taxable property in the State. If a plan can be devised giving to a centralized governing board of each county the authority to re-

view the total amount of levies made by all the different boards or taxing units, showing the total tax imposed upon the taxpayers, I believe that the amount of revenue now being raised by taxation could be materially reduced. Every county has several boards authorized to levy taxes, aggregating hundreds within the State. If the officers of the different taxing units in each county could see and consider the total amount of taxes being levied on the taxpayers, instead of merely being advised of the amount made by their particular board without any consideration of other levies, it is my judgment that these different units would appreciate the enormity of the aggregate levy and that they would find some way to reduce the cost of their particular local government, whether it be schools, highway districts, cities or counties.

By requiring levies of all the different taxing units to be submitted to a central board of control and providing for a general meeting and discussion of the total levy, there could be an appreciable reduction. The board of control should be vested with sufficient authority to keep the total levy within reasonable bounds.

Where it is possible, duplication in counties and local government should be eliminated, and such boards as can be dispensed with should be abolished. One example of this is the present possibility of creating several highway districts in one county, whose officers are duplicating the work of county commissioners. Highway districts should be abolished.

Delinquent Taxes

The amount of delinquent taxes on real estate has reached alarming proportions in the State, effecting the ability of the different governing bodies to properly function. It is questionable of the continued selling by the public of real estate for delinquent taxes will solve the problem. More owners of real estate, because of general business conditions, are unable to meet their tax assessments, but are honestly desirous of retaining the ownership of their premises and meeting the delinquent taxes assessed thereon and have indicated their intention of paying such taxes, they should be given the opportunity to do so. Extension of time on all delinquent taxes charged against real property by the county tax collector, the tax collector of special improvement districts of cities, villages and of irrigation districts for the years 1928, 1929, 1930 and 1931, should be given, adjustment of the accrued interest should be made, with the view of assisting bona fide real estate owners in paying their taxes and in holding their property.

Placing Departments on Fee Basis

The present burden of taxation requires the curtailment of departmental expenses wherever possible, and in this connection your attention is especially called to the fact that under our present laws and system of administering certain state departments, the public is paying for a great many services that are in fact private in their nature. In these departments where this is found to be the case, and where service is rendered by the State for the benefit of private interests, those benefiting should be required to pay a fair and reasonable amount for the service rendered. Several departments, in so far as a great many of their functions are concerned, can be properly placed upon a fee basis.

Uniform Collection of Taxes

Previous to the year 1927 all taxes and assessments for both municipal corporations and the State and counties were collected by the county tax collectors in the different counties. A reasonable provision was made for the payment to the county and deducted by the tax collector for the necessary work and expense in making these collections. By Chapter 257 of the Session Laws of 1927 it was provided that special assessments in improvement districts in cities and villages should be collected by the city treasurer. This has caused a duplication of work and an added expense to the taxpayers of every municipality and has not reduced the work of the county officials to any appreciable degree. County tax officials are still collecting all of the municipal taxes except the special improvement taxes. In addition, this method of collection has caused endless confusion and dissatisfaction to the taxpayers, who have been educated to pay all of their taxes at one time and at one particular place, and I recommend that the law be so amended that all municipal taxes or assessments be collected as heretofore by the county tax collector.

Peddlers

The subject of itinerant peddlers is one deserving of your attention. It naturally will not be the purpose of your body to favor any particular class of business, but our farmers and established places of business, such as merchants and legitimate dealers in produce, are entitled to such reasonable protection as will require those competing with them to pay their just proportion of the expenses of government.

Refunding Outstanding Warrants By Issuance of Bonds

Warrants of counties and school districts issued for legitimate purposes are outstanding and cannot at present be paid by reason of delinquent taxes. Some provision could properly be made providing for refunding present outstanding warrants by the issuance and sale of bonds, thus reducing the rate of interest on uncalled warrants, but such legislation should only permit of warrants now outstanding that cannot be paid and should not authorize or encourage future bond issues.

Transportation

The State is spending a great amount of money in providing a system of improved highways for the use of the public. At present it appears that commercial interests using the highways entirely for profit in their business, are not paying their just proportion of the building, upkeep and maintenance of the highways. When

Mr. and Mrs. Norman Koker and Bobbie May spent Monday at Harve Southwick's home.

Mrs. John Frisbee called at the Winfield Powell home Monday.

We take into consideration the wear and tear upon improved highways occasioned by such use, and where private enterprises are acting as common carriers, they should pay what is adequate for such use. The public should also be protected in the class and permanency of service rendered by such common carriers, in the rates charged and in the proper remittance to customers for collection made on any customer's behalf. It is my recommendation that a general study of this matter be made by the Legislature and such amendments, together with such additions as may be necessary to fairly protect all interests effected, be made to our present laws.

Conservation of Water

The greatest economic waste sustained by the people of southern Idaho is the fact that we are allowing much of the melting snow of our watersheds to flow unobstructed in its course to the Pacific ocean. Adequate reservoirs should be constructed to store the surplus water of this territory. The immediate attention of our representatives in the United States Congress should be called to this enormous waste that is going on year after year.

Legislative Investigation

One of the most, if not the most important function of the State is to properly protect, and at all times account for the use of public funds. Certain matters have come to my attention as Governor, with reference to investments of the endowment fund, the State Insurance fund and purchase of the State prison farm at Boise. The information is of sufficient importance that it justifies an investigation, and I recommend that a legislative investigating committee be named by your body, provided with sufficient funds and with full power to do all things necessary to make thorough and impartial investigation.

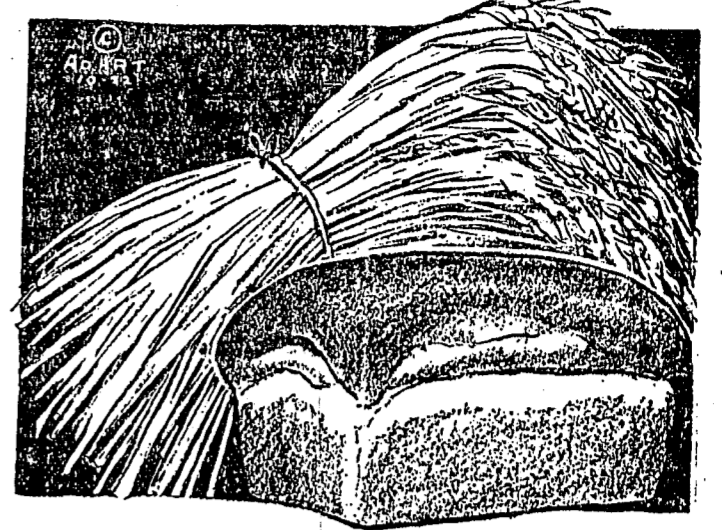

State Game Department

Recognizing the value and interest of the citizens of this State in our wild life, I call your attention to the fact that climatic conditions greatly effect some seasons, areas and limits in the administration of the department of fish and game, and serious thought should be given to the practical question of adequately protecting our fish and game.

Ratification of the 1932 Code

The last Legislature authorized the compilation and publication of a Code. This Code has been published and a proclamation has been made as required by the Act, but there remains the question now as to whether it is really in effect at this time. I suggest the advisability of a legislative Act adopting this Code as declaring the law of the State. Such Act should be passed at the earliest possible moment.

Injured When Sled Overturns
Automobiles are not the only thing
that may turn over during this slip-
pery weather—even a sled may act
up occasionally. Last Saturday when
Herman Lohman was driving on the
Sperry grade, he was quite badly in-
jured when the horses and sled he
was driving slepped and overturned
on the grade. He was pinned beneath
the sled where he remained until Cecil
Emmett happened along and released
him.

Kendrick to Play Lapwai
Kendrick will play the Lapwai Fu-
ture Farmers' Basketball team in the
local gym, Friday, January 6. The
Lapwai squad is composed of high
school students and former Lapwai
high school stars. From all reports
they have a team that compares very
favorably with the regular teams of
the Conference and a close game is
predicted.

Basketball Schedule
The first conference game of the
season was played with Culesac on
December 16 in the high school gym.
Kendrick was defeated by a score of
31-20.
Practice games will be scheduled
at various times on open dates. Fol-
lowing is the schedule of conference
games:
January 6—Lapwai Farmers.
January 13—Open.
January 20—Southwick at Kendrick
January 21—Genesee at Genesee.
January 27—Culesac at Culesac.
February 2—Southwick at South-
wick.
February 10—Lapwai at Kendrick.
February 15—Lapwai at Lapwai.
February 25—Genesee at Kendrick.

Christmas Program Cancelled
Due to the closing of school it has
been necessary to cancel the Christ-
mas program which was to have
been given before the holidays. In
place of the Christmas program a
May Fete will be given in the spring.
The fete will be put on by the high
school glee clubs, the orchestra and
all of the grade school students.

Juniors To Give Play
Practice for the Junior play will
begin in a few days, according to
Mrs. Lightfoot, who has charge of
the dramatics.
A Senior play will be given, as
has been the custom in previous years,
with practices scheduled for later in
the year.

New Arrangement For Study Hall
During this week Mr. Brigham
has been coaching the boys' second
team during the last period. The
grade school teachers have been al-
ternating in taking charge of the
study hall. This change was thought
necessary in order to give the re-
serves more adequate training.

Deer In Sparber Yard

A fine white-tail doe strayed down
into the H. H. Sparber dooryard on
Friday of last week and Walt Spar-
ber secured a very good picture of
the animal. It did not seem to be
the least bit afraid and charged the
Sparber dog during its stay around
the premises. Walt secured a hand-
ful of alfalfa hay and succeeded in
getting within 15 feet of it.

Hunting Deer

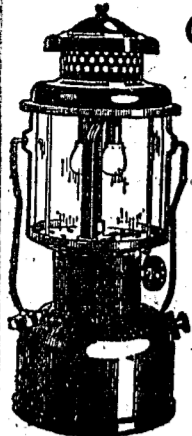

Very authentic reports have drifted
in to the Game committee of the
Kendrick Commercial club to the
effect that certain parties are hunting
deer and elk in the Cedar creek,
Potlatch canyon and Rock creek
section, and they are warned to cease
this, or definite steps will be taken
to put a stop to it.

**THE HIGH COST OF "FREE"
HOT WATER**

Don't fool yourself....because you don't get
a hot water bill every month don't think your
hot water costs nothing!
Putting water coils in your furnace is only
robbing Peter to pay Paul and inviting trouble
in the bargain.
In a test conducted by B. H. Steele, while
Professor of Physics at the State College of
Washington, it was demonstrated that:
It actually costs you more, in increased fuel con-
sumption, figuring coal at only \$10 a ton, to heat
water in your furnace than to have hot water in
abundance from an automatic electric water
heater.
Your furnace was not intended to be a hot
