The Snake and Clearwater rivers are shriveling, the flow of each being at its lowest ebb in more than two years, according to Saturday's readings, while the Salmon river was reported at its lowest stage in more than 30 years by Ben Reeves, upper river stockman, a visitor in the city, said the Tribune.

The Snake measured .3 of a foot below zero, and the Clearwater's flow was 1,875 second-feet at Spalding, compared to a record low of 1,200 second-feet since the dam was constructed in 1926.

Kendrick Community Church

T. Earl Poindexter, Pastor. There will be no meetings at the church until further notice. Health authorities ask that all church services be discontinued on account of the danger of the spread of disease. The minister and people of the church are anxious to cooperate in stamping out infantile paralysis, and will do what they can to discourage any public gatherings.

This is a time when the average man thinks of his dependence upon God. It is a good time to pray. The Father is interested. He is concerned. With much more confidence may we approach Him, however, if we have already established a habit of prayer. Let us now set out to make daily communion with God a reality with us.

"Prayer is the simplest form of speech That infant lips can try; Prayer the sublimest strains that reach The Majesty on high."

Peck Bridge Wrecked

While commissioners from Clearwater and Nez Perce counties met in joint session last Thursday to consider ways and means of repairing the structure, the middle span of the Peck bridge slid some 30 feet into the river.

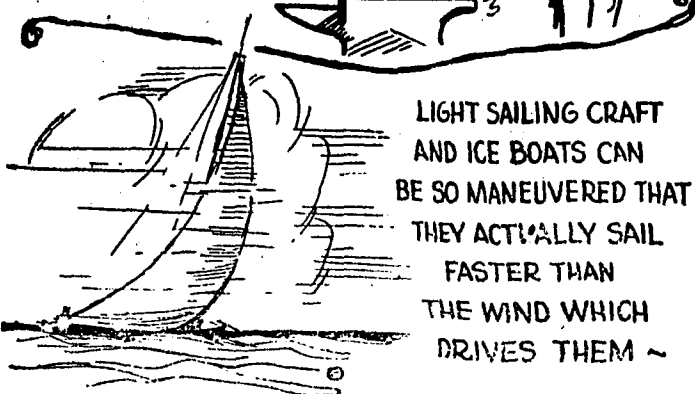

Several small children playing on the span, condemned Monday, hurried from the bridge just a few minutes before the structure collapsed. The span was more than 100 feet long.

A guard was placed at the bridge after it was condemned Monday to keep traffic from the dangerous crossing. Prior to that heavy grain trucks and other laden vehicles used the bridge regularly.

Drought States Cold

They stoked the furnaces in the mid-continent Friday night and old settlers predicted it would be an early and severe winter. Unusual cold descended suddenly in sections which only recently had been besieged by protracted heat waves. Fires were kindled in many homes and a few office buildings. Frost whitened fields in Minnesota, North Dakota, Wisconsin and Iowa. Snow flurries, reported in Billings, Mont., and at Pueblo, Col., grounded a plane at Big Timber. The citizenry made ready to feed the straw hats to the drought distressed cows.

Shipped Car Alsike Clover Seed

The Kendrick Rochdale company on Monday shipped a car of Alsike clover seed to a Lewiston seed house. While it does not seem to be generally known, several farmers in this section have garnered in good-sized checks from the sale of this seed, it bringing 15 cents a pound. One farmer received a check for \$1,900 for his crop, which is not a bad thing to take. It is very evident that the Potlatch country is capable of producing more than one kind of crop and it seems that the farmer that has the nerve to try something new often wins out.
