THE KENDRICK GAZETTE FRIDAY, SEPTEMBER 14, 1934

Why Wait?

Some candidates for political office are issuing promises of "cheap power," and are seemingly oblivious of the fact that the people of this territory already have very low rates for electric power.

The benefits of electric service are widely enjoyed throughout the Inland Empire. Among the customers of this company one out of every four uses an electric range . . . and practically all of our customers use several electric appliances.

This widespread use of electricity is proved by the fact that the residential average for our customers for the month of August was 136 kilowatt hours . . . the highest in the state and more than double the national average. And the average August bill of our 49,604 residential customers was only \$2.95. Consider your own use of electricity ... isn't this service worth much more than what you pay for it? and strength and

This company, which has been serving the Inland Empire for 45 years, pays more than a million dollars a year in taxes and still gives you excellent electric service at exceptionally low cost.
