O. K. EGG MASH

If your laying hens have begun slowing-up on egg production, or your pullets are slow about laying, give them O. K. Egg Mash.

You will need trap nests—but they must be of the basket type—to hold the eggs after your hens and pullets have received a few feeds of O. K. Egg Mash. There is none better—ask the hens.

An electric light and O. K. Egg Mash is all you need to bring your egg production up to standard.

Add Minerals to Stock Feed

When a severe drouth occurs, as during the past summer, the hot sun stops plant growth, and destroys the Vitamin A content. Cows from such pastures go into the winter without a reserve of the necessary vitamin that green pastures supply. This condition can be corrected for the small sum of 12 cents per month for each cow, by adding VIAMINERAL to the ration.

Conomineral adds the necessary vitamins, minerals, iodine and balances the ration for the small sum of 9 cents per day for 100 laying hens.

EDITORIAL

Hi, There, Folks—Remember the old raisin slogan, "Had Your Iron, Today?" Well to be honest with you we've borrowed a part of it to read, "Have You Had Your Milk Today?"—For everyone, big, little, old and young should drink milk for health's sake—and we claim our milk is second to none. Machine milked, steam sterilized containers and scientific filtering and cooling are used for your protection. Come in and see this milk cared for if you like—visitors always welcome. Oh, Yes—Don't forget to bring us that can of cream—we need it

in our business.
