FOR HORSES AND COLTS

In the Fall is an excellent time to prepare Horess for winter and to prevent winter Impactions, Indigestion and Colic cases. — We have a powder especially prepared to build up HORSES AND COLTS. This powder can be given in the daily ration to Colts that have just ben weaned.

It cleans out the digestive tract and gives them an excellent chance to make a good growth during the winter and will prevent the loss of the milk fat they now have.

A pound of thi spreparation given to each horse colt will save feed and prevent most of the digestive troubles that usually occur during the winter.
