Itemize Your Electric Bill

Do you ever stop to think . . . as you look at your electric service bill that it covers 30 days of service? That during those 30 days electricity was "right there" when you pressed a switch for lighting, or for the use of your various appliances?

How much was your electric service bill for last month? Divide this amount by 30 and discover what this service cost you per day.

In how many ways do you use electric service ? Besides the basic service of lighting, for what other purposes are you using electricity? Check over the following list:

Ironing Water Heating Cooking Percolator Refrigeration Radio Air Heating Washing Toaster Vacuum Cleaner L **Curling Iron** Grill

There are many other uses, some of which may apply in your home. When you consider this widespread use of electric service you realize the VALUE of it.

Isn't electric service, therefore, just about the cheapest thing you buy? Use more of it!
