DR. ELLIOT'S Veterinary Supply

In Wisconsin it was found that cows whose joints swelled, bones became brittle, and that were stiff and lame as if affected with rheumatism, merely lacked Phosphates. Slow

breeders can be helped in this way.

VIAMINERAL is a Calcium Phosphate Compound that supplies all the essential elements that are lacking even in the best of rations.

The owner of a large farm flock of sheep, about 200, just came in and reported that he had never had his ewes in such fine condition. He said, "We had an excellent opportunity to try out Viamineral on the ewes. We had them divided, part receiving Viamineral and others, on just a good ration with salt. Before ten days we could see a difference, and now they all receive Viamineral—it pays." The ewe that had pregall receive Viamineral—it pays." The ewe that had pregnancy disease has completely recovered. We formerly gave exercise, but now we use Viamineral to prevent this disease.
