

# KENDRICK GAZETTE

VOLUME XIV

KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, JULY 12, 1935

NO. 28

## HIGHLIGHTS OF THE WEEK'S NEWS DISPATCHES

Independent Mongolia Saturday formally accused the Japanese army, already virtual master of north China, of plotting to seize Mongolian territory. A communique issued at Ulan Bator, Mongolian capital, and published in the official soviet press, said Manchoukuan and Japanese forces had delivered an ultimatum demanding the right to maintain military observers in Mongolian territory. It made this charge: "Recent events prove that Manchoukuan, with the Japanese army's support, wishes to avoid peaceful settlement of border incidents and prepare the way for further occupation of our territory."

The foundation for a third party was laid July 6 by 200 liberals from more than half the states of the nation. Its keystones were "production for use," and a sharing of the wealth. The perspiring delegates, after many hours of hectic debate, called for a unification of all liberal factions under the name of "the American commonwealth political federation" until a convention of "left wingers" can be held later in the year formally to launch a new party. Congressman Thomas R. Amie, Wisconsin progressive, was chosen as chairman of the federation and other officers and members of the executive committee were named to "sell" the conference program to the nation's electorate.

Fast-expanding differences over the scope of the president's wealth-tax program prompted opposing predictions that it would be dropped temporarily, and that it would hold congress in session well into September. On one side was Senator McNary of Oregon, republican leader. He forecast that congress either would recess and reconvene in the fall or enact the tax bill at the session beginning next Jan. 3. On the other side were house ways and means committee democrats, still sticking by their pledge to bring out a bill this session. They doubted, almost to a man, that final congressional action on the bill—not even drafted yet—could be obtained before the first week of September.

France's intention of leaving Italy a free hand in Ethiopia was officially indicated Sunday. Authoritative quarters regarded Premier Mussolini's determination to go ahead with his plans, expressed by him in a speech July 6, as blocking any chance England might have to win France over to sanctions against Italy. "France, like the United States, is not inclined to participate in an economic blockade," it was said in informed quarters, "for we prize the friendship which links us to the Italian people above everything."

### Near Fire at Depot

As Harold Parks was driving a tractor on the back street in Kendrick last Friday evening, he reported seeing smoke emerging from under the platform at the depot. A volunteer crew from the Kendrick Garage secured a crowbar, spade, bucket of water, etc., and went to the scene of the blaze. Upon arriving at the depot, it was found that a real fire was in the making, blaze issuing from between two of the platform planks, which had evidently been started by the dropping of a cigaret butt or a lighted match, probably by someone on the evening passenger train, which had been gone about half an hour. The blaze was extinguished without any trouble, but another half hour would have made a nasty fire to handle.

### Learn How to Swim—Free

A Red Cross swimming and life saving campaign will be held at the Recreation Park in Moscow, Idaho, July 15th-20th inclusive. Any one interested in taking this free instruction may register with M. K. Cline at the City Hall in Moscow or with Mr. Roberts, lifeguard at the pool, until July 13th. Classes will be arranged after the close of registration July 13th.

Thos. A. Gill, a member of the American Red Cross Life Saving Service, will conduct the campaign assisted by Mr. Roberts, Babe Brown and others. The campaign is open to every man or woman, and children eight years or older, without cost. Your registration card entitles you to free admittance to the pool for the classes and instruction.

A nickle isn't supposed to be as good as a dollar, but it goes to church more often.

## W. W. P. To Hold Cooking School

Word has been received in Kendrick that on Thursday, July 25, the Washington Water Power Company will put on a cooking and refrigeration school that day. Electric cooking of all kinds as well as refrigeration will be demonstrated to all users of electricity, as well as prospective users. More definite information as to the hour and place will be given next week.

## TREASURY ASKS \$500 MILLION DOLLAR LOAN

Washington, July 7.—A \$500,000,000 loan was asked by the treasury today in the first new deal borrowing since the 1936 financial year opened just a week ago.

For this half-billion the government offered to pay 1 3-8 per cent interest, a rate described by officials as unprecedentedly low for a similar year. The securities put on sale were 4-year, 5-month notes, dated July 15, and maturing December 15, 1939.

The loan asked was the first portion of more than \$4,000,000,000 in new money the government must borrow if it spends the \$8,520,000,000 estimated by President Roosevelt for this year and collects only \$3,991,000,000 in estimated receipts.

Preparedness for heavy work-relief expenditures was believed a factor in the financing. It was the first time new money had been borrowed in large sums since December, though there was a \$738,000,000 refunding operation in June.

Undersecretary Coolidge, in announcing the operation, said special significance should be attached to the issue.

"Our cash is low," Coolidge said, "and this seemed a good market to get the money."

The undersecretary declined to estimate how much will be borrowed to finance the work-relief program.

"Our borrowing," he said, "will depend on how much they spend." The new notes will be issued in bearer form in denominations of from \$100 to \$100,000. Applications will be received at federal reserve banks and branches and at the treasury.

### Lightning Starts Fire

The lightning storm of Sunday night started what might have been a very bad fire, in the sub-station of the Washington Water Power company here, when it struck the wires and ignited the oil in one of the big transformers at about 2:30 a. m. on Monday morning.

Herman Schupfer happened to be awake at that time, with a light turned on, and when the lights went off and failed to come on within the prescribed time of the automatic switch, he donned clothing and investigated, finding the substation alight with the blaze.

Edgar Long, Otto Schupfer, W. R. Foster and Pearl Chaney of Troy were summoned, and the fire fought with fire extinguishers, as the oil made water impossible. Finally, with the aid of the city jail bedding, soaked in water and used as a "lid" and the aid of the fire extinguishers, it was extinguished.

Had it not been for prompt and early action a bad fire might have resulted, as burning oil is one of the hardest of flames to combat.

### Drivers' Examinations Going Forward

According to recent news reports, some 300 Nez Perce county drivers out of a possible 10,000 have appeared to take the required tests to obtain a driver's license. Out of the 300 taking the tests, there is a possibility of some three to five being denied their licenses, due to defects in sight, hearing or physical disabilities.

The tests are said to be quite simple, taking only eight to ten minutes, part being oral and part a written test. The written test is then forwarded to Boise, and the license issued from there.

Approximately 90 days yet remain in which to obtain the license. Tests were (and will be held) at Moscow July 10, 11 and 12. We presume the smaller towns will be visited at a later date, although authoritative information to that effect is lacking.

### Entertains At Dinner

Mrs. Sam Bigham had as her dinner guest Mrs. M. A. Deobald on July 4. The couple then motored to Troy, where they visited Mr. and Mrs. Theo. Hanson and daughter Evelyn, who royally entertained them. The music of the day was the "Star Spangled Banner," heard over the radio. Mrs. Deobald says it isn't necessary to ride in airplanes to enjoy the world.

## W. W. P. CO. CUTS RESIDENTIAL ELECTRIC RATES

A new promotional residential electric rate schedule which will result in substantial savings for customers making liberal use of electricity has been filed with the Public Utilities Commission of Idaho by the Washington Water Power Company. The new rate takes effect with meter readings on and after August 1.

Based on present customer use it is estimated that the adoption of the new schedule will give residential customers a saving of approximately \$68,000 a year.

The major reduction will result from the establishment of a third step in the residential schedules whereby customers making liberal use of household electrical appliances will enjoy a 2-cent rate after a certain amount of energy has been used.

Under the former schedules there was a first step of 32 kilowatt hours at a charge which varies in certain districts. All over 32 kilowatt hours monthly was furnished at 3 cents per kilowatt hour, except the rate for flat rate water heating and the off-peak water heating rate of eight tenths of a cent per kilowatt hour which was put into effect May 5, 1934, and which continues in force.

Under the new schedule the first step remains the same, the three cent charge applies to the next 110 kilowatt hours and all over 142 kilowatt hours is furnished at two cents per kilowatt. The water heating rates remain the same.

The new rates will be effective throughout the territory of The Washington Water Power Company in Washington and Idaho, the schedules having been filed simultaneously with the Washington Department of Public Service and the Idaho Public Utilities Commission.

Following the conference Lewis A. Lewis, assistant general manager in charge of sales, stated, "The new rates in effect bring 2-cent electricity for electric cooking and refrigeration and also make feasible the utilization of electricity for supplemental heating during the spring and autumn season."

"We are putting these new rates into effect in the hope and expectation that the use of electricity by our customers will be materially increased. The company will stage an active campaign to sell and to help dealers to sell the many appliances that bring added comfort, convenience and efficiency and economy to the modern home. The new low prices of these modern electric appliances together with the new low rate should make their use economical for everyone."

"The people of the Inland Empire have always been electricity conscious, and the average residential use of electricity in their homes is the highest in the country. Our rate history is one of continued reduction in our electric rates, and this increased use of electricity by our customers has been a very important factor in bringing this about."

### Went Fishing

A party made up of Ben and Norla Callison, Wade Keene and Ernest Roberts left early the morning of the Fourth for a fishing trip on the Little North Fork of the Clearwater, but found they could not get into that section on account of snow so they spent the day on the St. Maries. They report fishing as good but the catch only "tolerable."

Wade said the party met up with a real live bear, but was unable to figure out which was scared the worst, he or the bear. They both ran—and did not come together, so it was easy to figure out they were not running in the same direction. Accurate measurements showed tracks from six to eight feet apart—going in the direction Wade took.

### Will Work In Blister Rust

Clarence Hund and George Crocker left Monday morning for Clarkia, where they will report for work in the blister rust camps. They are classed as experienced woodsmen and will therefore receive higher pay than the average worker.

### Has Accepted Position

Howard Damarell, who has been working in the Blewett Cash Grocery for the past several months, left the latter part of last week for Lewiston where he has accepted a position in the Safeway store.

### Had Tonsils Removed

Elsie Kruger, daughter of Mr. and Mrs. Gus Kruger, had her tonsils removed at the office of Dr. D. A. Christensen Monday morning.

## AAA ANNOUNCES 33 CENTS FOR 1935 WHEAT CROP

Latah county farmers who signed 1934-35 wheat production control contracts with the federal government will "reap" a \$407,000 harvest in allotment payments for complying with the 1935 provisions of their two-year contracts.

The 1935 allotment payments will be made on the basis of at least 33 cents a bushel, the AAA has announced. Allotment payments in 1934 were on the basis of 29 cents a bushel, minus one cent a bushel local administrative costs.

The 1934 allotments totaled \$350,000 in Latah county, but only \$250,000 has been paid. The balance, an estimated \$100,000, is scheduled for payment sometime this fall.

The AAA said it was able to boost 1935 allotment payments as a result of money collected in processing taxes on flour processed from wheat raised by farmers who had not signed contracts.

This assertion was interpreted in some quarters as meaning that the AAA has money available for paying the 1935 allotments as well as the balance of 1934 premiums and payment, therefore, will not be held up as a result of various court actions started by milling concerns to test constitutionality of the AAA.

AAA officials said the 1935 payments will be made in two installments with the first installment on the basis of 20 cents a bushel.

The 33 cents a bushel basis gives farmers in the state of Idaho a total of \$4,023,000 and farmers of Latah county a total of \$407,000. The 1934 payments, on the basis of 28 cents a bushel, totaled approximately \$350,000 in Latah county.

The AAA estimated the increased allotments in 1935 will boost the income of the nation's farmers a total of 14,000,000. The total payments in 1935 should be at least \$115,000,000, compared with \$101,000,000 in 1934.

Officials pointed out that payment of neither the final eight cents remaining due farmers on their 1934 contract provisions, nor the 33 cents in 1935, is in any way contingent on the signing of new contracts which are supposed to be ready in the very near future.

### Legislature Making Progress

Statehouse, Boise, July 9.—A 16-cylinder legislative juggernaut crushed all opposition in both houses of the Idaho lawmaking body today and tonight seemingly was headed for adjournment within 24 hours.

Called together specifically to pass highway legislation which would permit the state to use federal allocations in municipalities and to regulate motor caravanning, the second day of the second extraordinary session of the 23rd legislature went far in accomplishing its functions under provisions of Governor Ross' proclamation.

The principal stumbling block appeared in the house when that body declined to suspend the rules to pass a measure which would impose a \$5 tax on each unit in automobile caravans. The bill was placed on general orders for final passage tomorrow. Previously the house passed a bill providing for not more than \$15,000 for expenses of the special session. It later was passed by the senate without opposition.

The other measure approved by the house today called for validation of highway contracts into which the state has entered with federal funds. They involve approximately \$870,922, it was announced by J. H. Day, (D., Jerome), chairman of the house highways committee.

### Future Farmers Meet

The Future Farmers of the Kendrick chapter will hold a summer meeting Saturday evening, July 13, at seven o'clock in the high school building. Mr. Wiswall will be present to discuss the state meeting and the judging contest plans with all who are interested. Those who can, please be there.—By Fred Reed, Secretary.

### Report Nice Business

As an indication that many people of the community appreciate the fact that they can get good meals right here in Kendrick, both the Raby Hotel and the McDowell Cafe report that they were well patronized for Sunday dinner—each place serving full meals every day, in addition to lunches.

The Governor of Delaware was appointed a Mosquito Control Commission. We trust that mosquitos will be limited in their biting to a forty-hour week.

## Entertain At Sunday Dinner

Guests at the Wade T. Keene home Sunday were Miss Orene Hardman, Mrs. Almeda Oglesby and son, Mr. and Mrs. Owen Hardman, Burton Hunter, Doug Hunter, all of Peck, and Miss Marguerite Manion of Firth, Idaho. Miss Hardman and Miss Manion were en route to Moscow, where they are attending summer school.

## KENDRICK COMMERCIAL CLUB IN REGULAR MEET

The Kendrick Commercial club met in regular monthly session Monday evening in the dining room of the Raby Hotel. A splendid dinner was served by Ray Jackson and Mrs. Johnson, which was duly appreciated, as shown by the clean plates at the close of the meal.

After the reading and approval of the minutes of the previous meeting, owing to the lack of regular attendance, for various reasons, the meeting resolved itself into a round-table discussion of various topics of interest to the community at large, among which was that of soil erosion and weed control, both of which were conceded to be of vast importance to this entire community. The question was raised as to which would yield the most good, soil erosion or weed control. Both of these topics have been taken up and discussed at length by both farmers and townspeople, and County Agent L. V. Benjamin has shown an active interest in both and is doing all within his power to put these government-aided projects within the reach of the farmers of this community.

Upon motion, the secretary was instructed to forward to the Soil Erosion Control association at Pullman the unqualified endorsement of both these projects by the Kendrick Commercial club.

There was no direct report on the road situation owing to the fact that the chairman of the Highway committee was not present, nor anyone else in position to give any first-hand information, although it was stated that the district engineers had endorsed practically all the surveys made in this section and the supposition is that practically all await the decision of the present session of the state legislature now in session, which will give the state something over \$1,100,000 for road work that is now being held up by a recent ruling of Judge Koelsch at Pocatello.

There being no further business to transact, the meeting adjourned to meet again on August 12.

### Cameron-Kendrick Drops Game

The Cameron-Kendrick ball club met its second defeat last Sunday at the hands of Gifford on the latter grounds. Costly errors by the local boys mostly accounted for the upset.

Our boys outbit Gifford 16 to 9, and Tommy Blevins struck out ten Gifford boys, while only four Cameron-Kendrick lads fanned the air, but we lost 11 to 13. The score was tied at 4-all, 8-all and 9-all, and in the ninth inning with the score 11 to 13, Cameron-Kendrick filled the bases with one out, when Koopp hit to the pitcher for a double play, ending the game.

Southwick will come to Kendrick next Sunday for a game at 2:15 p. m.

Lineups for the game follow:

### More Rain Sunday

Quite a nice shower fell Sunday morning and again Monday morning, clearing the air and dampening the lawns. It didn't do the hay or the cherries any good, however, and all are hoping that this will be the last one for a couple of weeks, anyway.

## GRAIN MARKETS DECLINE FOLLOWING ADVANCE

Grain markets turned sharply downward toward the close of the week ended July 5, following sharp advances earlier in the period, according to the Weekly Grain Market Review of the U. S. Bureau of Agricultural Economics. Improvement in crop prospects as a result of more favorable weather, lack of confirmation of any serious rust damage in either the winter or spring wheat areas and a continued dull demand for the moderate offerings, were the principal weakening factors. Wheat lost most of its recent gain with weakness in Canadian and European markets contributing to the decline. Oats and barley dropped sharply, influenced by favorable new crop prospects and increased offerings of new grain.

Crop developments were again the dominant influence in the wheat situation. Private agencies at the first of July forecast a winter wheat crop slightly above the official June forecast and a spring wheat harvest of around 256,000,000 bushels, compared with only 91,000,000 bushels harvested last year. The weather turned more favorable for the ripening and harvesting of winter wheat and cutting was begun as far north as southern Ohio, central portions of Indiana and Illinois and southeastern Nebraska. No rust damage of importance has yet occurred according to reports from field representatives of the department. Stem and leaf rust was prevalent at the first of July in Oklahoma, Kansas, Missouri and Nebraska, but with the exception of eastern Nebraska, wheat crops are sufficiently matured that only slight damage from stem rust is probable. In the spring wheat areas, traces of stem rust were found in eastern South Dakota, western Minnesota and North Dakota. Infestation in this area, however, is no more prevalent than at the same period in average years. While an abundance of moisture during late May and June was favorable to the development of stem rust, the eradication of barberry is materially reducing the sources of infection.

Moisture conditions throughout Canada remained generally favorable for growing crops with dry areas confined principally to parts of lower British Columbia, districts in southern Alberta and parts of southwestern and west central Saskatchewan. Crops, however, are still late and warm weather is needed to promote growth except where moisture is limited. The wheat in Manitoba averaged about 20 inches high, in Saskatchewan 12 to 15 inches, and in Alberta 10 to 12 inches, according to the Manitoba Free Press. No serious losses have occurred from hail or grasshoppers.

Cash wheat markets turned downward with futures but were influenced also by somewhat larger offerings and the weakness in foreign markets. Canadian prices at Winnipeg dropped to the pegged level of 80c per bushel, while July delivery at Liverpool declined to 70c compared with 76½c a week ago. Marketings of winter wheat increased but were only about one-fourth as large as for the corresponding week last year. Receipts at the principal central and southwestern terminals totaled 2,759 cars compared with 10,995 cars a year ago. About half of the local arrivals at Kansas City were new wheat, the bulk of which graded very "tough" because of excess moisture. Most of the new grain went direct to mills and only a few cars were offered in the open market. New wheat sold generally 2c to 3c below the old crop grain of similar grades. With mills the principal buyers, old wheat was preferred although arrivals of new sold readily at prevailing discounts. Premiums for cash grains were about unchanged at Chicago, where No. 2 hard winter was quoted nominally at 94c per bushel. Offerings were very light at St. Louis where No. 2 hard winter was quoted at 91c per bushel. Intermountain and Pacific Northwest markets weakened with the decline in central Western markets. At the close of the week Denver mills were bidding 80c per bushel FOB Colorado country points for No. 2 hard winter and No. 2 northern spring. At Ogden, mills lowered their bids to 63c per bushel for No. 2 soft white, 71c for No. 2 northern spring and 65c for No. 2 hard winter FOB Utah-Idaho common points.

Prices at Portland declined 4c to 4½c despite continued light offerings. Receipts at Puget Sound and Columbia river terminals totaled only 283 cars. Showers improved wheat prospects in the Pacific Northwest during the week.

**PERSONALS**

Mr. and Mrs. Dick Blewett were Genesee visitors July 4th.  
Mrs. Ethel Emery was transacting business in Lewiston Tuesday.  
J. F. Brown was a business visitor in Lewiston Monday afternoon.  
Miss Helen Sharp of Filer, Idaho, is visiting with Miss Maxine Keene.  
Herman Hartung went to Culesac Tuesday for a several days' business visit.  
Oscar Hartung and Carl Hartung left for Culesac Monday where they are doing carpenter work.  
Miss Phyllis Thomas returned Saturday night from a month's visit with relatives in St. Paul, Minn.  
Miss Annabelle Davis of Moscow, spent Tuesday and Wednesday with her parents, Mr. and Mrs. Joe Davis.  
The D. A. Christensen and Harold Thomas families took their picnic dinners to Southwick and spent the Fourth.  
Mrs. Lydia Ameling drove with Mr. and Mrs. Ward Howell to Grangeville, where they spent the Fourth.  
Roy Long, Howard Dammarell and Carl Emery took in the baseball

game at Lewiston the afternoon of the Fourth.  
Wayland Davis returned home last Thursday from Priest Lake, where he spent two and a half months in a CCC camp.  
Mrs. Roy Kent and daughter left by train Monday for Boise, where she will visit her parents, Mr. and Mrs. E. L. Whisler.  
Mr. and Mrs. Richard Blewett spent the Fourth in Genesee visiting with Mr. Blewett's sister, Mrs. Ben Cook, and family.  
Mr. and Mrs. Ed. Long and Barbara, Mr. and Mrs. Arlos Crocker and children spent the Fourth at the Gunder Reierson ranch.  
Mr. and Mrs. Roy Bacharach went to Orofino Wednesday evening to spend the week-end with her parents, Mr. and Mrs. W. A. Shaw.  
Rev. T. E. Poindexter and family and Mr. and Mrs. H. B. Thompson and family drove to Clarkia on a fishing trip the Fourth.  
Mr. and Mrs. Mason Reed and family of Spokane spent from Thursday until Sunday visiting Mr. Reed's sister, Mrs. Ben Cummings, and family.  
L. E. Obenland, prescription clerk

at the Red Cross Pharmacy during the absence of B. F. Nesbit, spent Sunday visiting his family at Pomeroy.

Roy Ramey, accompanied by Mr. and Mrs. F. B. Higley, Tommy Keene, Elmer Emery and Paul Dammarell, took in the baseball game at Lewiston the Fourth.

Mr. and Mrs. Dick Blewett drove to Gifford Monday evening and brought his brother, Aaron Blewett, to Kendrick, where he will spend the summer working with Dick.

Mr. and Mrs. James Emmett were Clarkston and Genesee visitors the Fourth. At Genesee they visited Mr. Emmett's brother, Robert Emmett, and family.

G. M. Henry returned Saturday from Medical Lake, Wn., where he has been visiting at his old home. He reports crops along the route are looking fine.

Roy Ramey, Jr., Walter Koepp, Ted and Edwin Mielke, Fred Newman, George Wilkin left the morning of the Fourth on a fishing trip back of Elk City on Little Breakfast creek.

The Rider family and McCreary family, Mrs. Wade Keene and Maxine, Mrs. Noria Callison, Helen Sharp and Mary Thimas pooled their dinners and picnicked in the yard at the Rider home on the Fourth.

Mr. and Mrs. Frank Crocker, Mr. and Mrs. Don Miller and children and Mr. and Mrs. Lester Crocker and children took a picnic dinner and drove to Cedar Creek to spend the Fourth.

Earl Thomas, son of Mr. and Mrs. John Thomas, who was operated on for mastoid at Lewiston Thursday, and who had returned home Saturday, had to be taken there again Monday for further treatment.

Mr. and Mrs. Philip Asplund and children came over from Elk River Sunday for a visit at the home of her parents, Mr. and Mrs. E. H. Dammarell. Mrs. Asplund and Roger and Linda remained for a week's visit.

Mr. and Mrs. Ivan Craig and Mrs. Stella Plummer returned home Sunday after having spent the week-end visiting relatives in Kellogg. They were accompanied there by Mrs. Burton Souders, who has been visiting at the Claude Craig home.

Patty Flaig, little daughter of Mr. and Mrs. Ignaz Flaig of Lewiston, is visiting at the home of her grandparents, Mr. and Mrs. George Leith. Mr. and Mrs. Leith were in Lewiston Thursday to celebrate the Fourth and brought Patty home with them.

Mr. and Mrs. Carl Hartung and sons, Carl and Oscar, and Mrs. Herman Hartung returned Sunday from spending the week-end visiting in Sandpoint. They visited Walter Hartung and Mrs. Herman Hartung's folks, Mr. and Mrs. R. Geldgen.

Mr. and Mrs. John White of Cornucopia, Oregon, arrived Sunday for a short visit at the home of Mrs. White's parents, Mr. and Mrs. T. C. Blevins. They returned to Cornucopia Tuesday, accompanied by Mr. and Mrs. Ralph Blevins, who will spend some time there.

Mr. and Mrs. Frank Wadman of Seattle, an old-time resident of Kendrick, having left here in 1912, is visiting old scenes here. Mr. Wadman's mother and step-father, Mr. and Mrs. Hardison, formerly operated the Raby Hotel, known then as the Success Restaurant.

John Miller and Miss Loretta Hoppe of Odessa, Wash., left for their home last Friday after a two weeks' visit at the home of Mr. and Mrs. George Brocke. They were accompanied to Odessa by Miss Esther Renick, who has spent the

past month with her sister, Mrs. Brocke.

Mrs. N. E. Walker and Mrs. Herman Schupfer were Lewiston visitors Tuesday.

Mrs. George W. McKeever and Paula Mae were passengers for Lewiston Tuesday, Dr. McKeever driving after them in the evening.

Andrew Wilnot of Tempe, Arizona, spent a short time in Kendrick last Thursday en route to Spokane. Mr. Wilnot plans to visit for a few days here before returning home.

Mr. and Mrs. N. E. Ware were very pleasantly surprised on the Fourth by a visit from Mr. and Mrs. A. L. Ware, Eugene Ware and Mrs. John Apple and three children, all of Stayton, Oregon, who spent the Fourth and the week-end at the Ware home. The visitors are nephews and niece of Mr. Ware.

Walter Thomas arrived from Spokane Sunday for a several days' visit with his brother, Harold Thomas, and family and his mother, Mrs. Lucy Thomas. He was joined Wednesday by his wife and children, who have been visiting in Lewiston. They left for their home Wednesday, accompanied by Mrs. Lucy Thomas, who will visit there.

Mr. and Mrs. Herman Schupfer were Moscow visitors on last Saturday.

Mr. and Mrs. H. B. Thompson drove to Spokane last Sunday to get Mary Elizabeth, who has been visiting there, and John Brewster, who has been attending scout camp at Diamond Lake, Camp Cowles.

Kyle Anderson, who is working near Moscow, was a Kendrick visitor on Wednesday.

**Eclipse of the Moon  
(By Wickliffe R. Smith)**

An eclipse of the moon occurs when the earth passes between the sun and the moon; or, in other words, when the moon gets in the shadow of the earth. This can take place only when the moon is full, and when it is at or near one of the nodes. But perhaps you do not understand just what we mean by nodes. Let us imagine a great circular piece of sheet iron, two hundred million miles in diameter passing through the center of the sun and extending out to the earth, cutting it through the center at the equator and reaching still another million miles beyond. Again, imagine a mark drawn around this circular piece of iron about eight million miles from its outer edge. This mark will represent the path of the earth around the sun. About a quarter of a million miles above the mark and five degrees north of the sheet of steel, place a dot. Follow on around toward the east in a circular path near the sheet of steel until you have covered one-thirtieth of the distance around the sun. There place another dot five degrees to the south, and a quarter of a million miles nearer the sun; that is, below the earth's orbit. Thence back north another thirtieth of the way and place another dot similar to the first in position. Continue this until you have thirty imaginary dots—the first north; the second south of the earth's orbit; the first, a fourth of a million miles farther from the sun than the earth is; the second, a fourth of a million miles nearer. Now connect these dots with a circular line to represent the path of the moon around the sun and the earth.

Let the circular sheet of iron represent the plane of the ecliptic. Beginning with the first dot let every second dot represent the position of the moon when it is full. The even-numbered dots will represent the new moon. Now it is easy to see that in order for the moon to go from the first dot to the third, it is necessary for it to cut through the ecliptic twice; first in going south, called the descending node; in going north, the ascending node. Of course, the moon is not always full or new when at the dots mentioned. We only took them as starting points. Sometimes the moon is full at or near one of the nodes. It is then that an eclipse of the moon occurs. If the moon's orbit lay in the same plane as the ecliptic, we could see a total eclipse of the moon every month at the time of full moon, and an eclipse of the sun at every new moon.

Next Monday night, July 15, there will be a total eclipse of the moon. It will last for several hours, centering about midnight. It will begin about ten p. m.

**"Baboona" At Theatre**

The picture, "Baboona," filmed by Mr. and Mrs. Martin Johnson, of world-wide hunt and travel fame will be shown at the Kendrick Theatre this Friday and Saturday nights. This picture is said to be one of the sensations of the time, with its wild animals, filmed in their native habitat, a land seldom seen by man—the African jungle. Its title will perhaps tell you more than hundreds of words written about it. A large part of the picture was filmed from the air, making possible scenes never before obtainable. Besides its educational features it abounds in thrills.

The fourth episode of "Rustlers of Red Dog" and the other usual features will also be shown.

We ask for new business because we are capable of rendering the best banking service and accommodations, and because we offer that high measure of security that appeals to the prudent and conservative people of this community.

Deposits in this Bank are insured by Federal Deposit Insurance Corporation in the manner and to the extent provided by the terms of the Banking Act of 1933.

## GOVERNMENT BANK UNSUITED TO U. S.

Would Serve Politics Rather Than Business Needs, Says R. S. Hecht, Citing Previous Experiences.

### QUOTES PRESIDENT JACKSON

Extent and Diversity of This Country Presents Different Situation From Europe and Makes Regional Banking Necessary.

WASHINGTON, D. C.—A refutation of arguments in favor of a government-owned central bank system for the United States is presented in a statement by R. S. Hecht, President of the American Bankers Association, based on exhaustive studies of European central banks. He also points out the disastrous consequences of previous central bank experiments in the United States.

"Our present regional Federal Reserve System under private ownership is infinitely better for this country than would be a government-owned and controlled central bank," Mr. Hecht says. "If history teaches us anything, it is that it is almost certain that a central bank so owned would be run to meet the varying exigencies of the government in power rather than to serve the commercial needs of the country."

Central banking has been tried twice in the United States, but was finally abolished because the credit control which the central banks exercised became objectionable and unpopular, he goes on to say.

What Andrew Jackson Said

"The continued existence of the Second Bank finally became a bitter political issue and President Jackson succeeded in abolishing it," Mr. Hecht says. "Permit me to quote from his farewell address: 'The immense capital and peculiar privileges bestowed upon it enabled it to exercise despotic sway over the other banks in every part of the country. From its superior strength it could seriously injure, if not destroy the business of any of them which might incur its resentment. . . . If you had not conquered, the government would have passed from the hands of the many to the hands of the few; and this organized money power, from its secret conclave, would have dictated the choice of your highest officers. . . . The forms of your government might, for a time, have remained, but its living spirit would have departed from it.'"

When the Wilson Administration considered banking reform it carefully kept away from vesting central banking powers in a single institution and instead introduced the regional idea by creating twelve reserve banks located in different economic and geographical sections of the country, Mr. Hecht says, a plan that has worked exceedingly well because the separate banks are under the guidance of men chosen on account of their intimate acquaintance with the problems and needs of their respective territories. He continues: "The great size and diversity of America tends to make a central bank undesirable. The central banks of Europe such as the Banks of England, France and Germany, cover areas not as large as some of our states. A central bank in the United States on the other hand would be called upon to administer the financial policies of an area larger than all of Europe, in which there are quite a number of central banks."

Subservient to Popular Demands

"Moreover, history has proven that any banking system entirely owned and dominated by the government usually demonstrates much greater ability in aiding expansion of credit than in putting on the brakes at the right time to prevent undue inflation by restraining and contracting credit. This is easy to understand because in times of depression everyone is urging the government to make money and credit easy and to encourage expansion."

"On the other hand, it always has been and always will be a difficult task for any government to call a halt in time of apparent prosperity because in the very nature of things the government would be very sensitive to public criticism and would hesitate to take any action which would tend to curtail business activity. It is such undue susceptibility to popular demands which makes government banking inherently weak."

"Our studies show that of all the central banks at present existing there are only four whose stock is owned by the government. The newest central bank is that of Canada, which opened its doors only a few months ago after a most exhaustive study had been made of the experience of all nations with the result that the stock of the Bank of Canada is privately owned."

The American Bankers Association, Mr. Hecht says, is convinced that a central bank would not be in the interest of the public or the banks. This position, he added, is "well understood by the President and the leaders in his Administration for we have been absolutely frank with them in all of our discussions and have missed no opportunity for emphasizing that in our opinion no banking system will, in the long run, be sound if it is dominated entirely by the ever-changing political administrations. We should do all we can to keep our banking mechanism as far removed from partisan politics as possible."

## GRAIN MARKETS DECLINE FOLLOWING ADVANCE

ing the week and harvesting was being started in earlier sections. The surplus emergency relief administration was offering 77½¢ per bushel at the close of the week for No. 1 soft white and red wheats, delivered at tidewater terminals. At Seattle western white, western red and hard winter were quoted at 75¢ and baart hard white at 95¢ per bushel, basis No. 1, sacked. Shipments of wheat and flour from Pacific Northwest terminals for the 1934-35 season totaled 39,793,000 bushels compared with 49,244,000 bushels for the previous year. Most of the decrease was accounted for in smaller shipments to the Orient.

Pacific Northwest barley markets maintained a steady tone despite the pressure of new crop offerings from the large California harvest. No. 2 bright western sacked was quoted at Portland July 3 at \$1.12 per 100.

No. 2 white and gray oats were quoted at Portland July 3 at \$1.30 per 100, sacked basis. Eastern Washington oats were quoted at Portland July 3 at \$1.25 per 100, sacked.

### Future Farmers' School

That approximately 200 Future Farmers of America and Smith-Hughes vocational agriculture instructors will take back to their homes in Idaho the fundamentals of soil saving practices, was the plan of University of Idaho officials today.

The Future Farmers and Smith-Hughes instructors will be in Moscow, July 15 to 20 for nearly a week's convention, officials said.

The Soil Conservation Service announced that through the cooperation of H. E. Lattig of the University of Idaho, arrangements are now completed for an illustrated lecture July 15. This is to be followed by a tour of the 100,000 acre demonstrational project to acquaint the group with the scope of the erosion problem and how the methods of control now being practiced in the Northwest meet these difficulties and further add to the soil conservation program.

This project is one of 40 demonstrational projects in the United States fostered by the Soil Conservation Service. Its purpose is to assist the farmers of the United States to check the run-off and soil losses amounting to billions of dollars annually.

The methods of the Soil Conservation Service include the retirement of submarginal grain land to grass and grass-legume mixtures; the restoration of soil fertility; the control of gullies; the reforestation of denuded mountain slopes; the regulation of grazing; and the control of rodents. Properly coordinated, these methods will reduce run-off, check erosion, increase the ground water supply, stabilize stream flow and reduce harbor and reservoir silting.

### Do Not Burn Straw

Likening the relationship between subsoil and soil productivity to the camel and its hump, Soil Conservation Service experts urged today that farmers conserve crop residues by plowing under the straws of wheat and peas instead of burning them.

Like the water storing properties of the camel's hump, the subsoil possesses the property, if correct tillage methods are applied, to act as a reservoir to store up the moisture necessary to insure plant growth during the summer's long dry periods.

The conservation of the crop refuse adds to the organic supply of the soil, increasing its water holding capacity, and thus allows more water to reach the subsoil before evaporation, experts explained.

If the straw is burned, the stubble which should become the new organic material is destroyed, as is much of the organic material already present in the soil, and the soil becomes dry and cracked. This condition permits air to enter and dry the subsoil.

When straw is added, tilth is im-

proved, which means a good seed bed at a minimum of cost and labor. Also the straw content added to the soil by this process enables the soil to absorb more moisture.

In addition to value to the soil, the conservation of crop residue was seen to be an important means of checking run-off.

### Announcement of Vacancy

I am advised by the War and Navy Departments that I have one vacancy in the United States Naval Academy at Annapolis and one vacancy in the United States Military Academy at West Point.

In order that every qualified boy who is interested in attending the military or naval academy may have an opportunity to do so, I expect to call for a Civil Service examination to be held October 26, 1935. Any boy in Idaho who meets the age requirements of Annapolis and West Point may participate in this examination.

I will appreciate receiving a letter as soon as possible from any young man who desires to compete. The letter should specify which academy the applicant desires to enter. Those who are successful in the Civil Service examination must then pass qualifying mental and physical examinations for entrance to the academy.

The age requirements for Annapolis are: minimum 16 years, maximum 20 years. The age requirements for West Point are: minimum 1 year, maximum 22 years.

J. P. POPE, United States Senate, 327 Senate Office Bldg., Washington, D. C.

### TEAKEAN GOSSIP

Haymakers are getting busy now. The alfalfa is all taken care of and they are beginning on timothy.

The auction sale at the J. S. Lehman place was well attended Monday afternoon. Folks seemed to have plenty of money and spent it freely. Miss Della Herring and Clifford Benjamin came up from Juliaetta on Sunday evening and visited home folks.

Our community was very much divided on the Fourth. Several families went to the woods or up the river to spend the day. Others went to the celebration at Orofino, and those who did not care to go so far had a community picnic under the pine trees on the Wm. Groseclose place. They had a good picnic lunch with coffee, ice cream and strawberries. There were 43 people present. Members of the Lind, Clanin, Orval Choate, Sewell, Harless, Peterson, Brock, Herring, Harrington, Preussler and Groseclose families made up the party.

Mrs. Elwood Brock and little son, Dale, left last Friday for Pasco, Wn., to visit her parents, Mr. and Mrs. James Chladek. She expects to be away about two weeks.

The 4-H club, with Mrs. Fred Schlifer as leader, are planning a picnic this week.

Mr. and Mrs. Lehman expect to leave for their new home at Portland within a few days.

Mrs. Phoebe VanAirdale passed away at her home here Saturday afternoon after a lingering illness. The funeral was held at the Brethren church. Rev. Cooper of the Orofino Methodist church had charge of the services. Mrs. VanAirdale's children were all present. There are five children: Lester, Ted, Lloyd, and Mrs. Rena Cole and Mrs. Ethel Daniels. Interment was in the Teakean cemetery.

Rev. H. L. Graybeal preached for us last Sunday afternoon. Mrs. Graybeal was with him, also Mr. and Mrs. Woodward and daughter.

As we get it, tho our knowledge of the monetary is no great shakes: A 60-Cent dollar is the kind that is expected to make business go like Sixty.

### First Hatch Is Out

We have mentioned a time or two that we have (securely confined) two very fine specimens of the black widow spider—which, by the way, have been viewed by many people who were anxious to see what they looked like.

Well, the other day, when the bottle containing one of the dangerous insects was examined, it was found that there were seemingly hundreds of small children that the widow had brought forth.

There are three egg containers, about the size of a filbert nut, some half-inch across. It is evident that one of them has brought forth a myriad of small spiders. Just how many there will be when the other two have hatched is problematical—but there will undoubtedly be aplenty. Stop and take a look at them if you have never seen such a display before.

### Land Bank Reduces Interest

By using the cooperative financing facilities which are available through the Federal Land Bank, local farmers may now obtain first mortgage loans at the lowest rate in agricultural history—4 per cent.

Passing along full benefits from the present cheap money market, the Land Bank put this record low interest rate into effect on Monday of this week (June 24), according to word received. This is the third successive reduction by this cooperative mortgage institution in three months.

"While the new reduction applies only to new loans closed after June 24, all Land Bank borrowers have been given a temporary reduction until 1938, under special provision by congress," President Ehrhardt explains. "Emergency Land Bank 'commissioner' loans, however, made out of a special fund, are not affected and will continue to bear 5 per cent interest."

### Alabama Remain Dry

Alabama, which two years ago voted for repeal of national prohibition, is on record, through a popular referendum, in favor of retaining its own rigid dry laws.

Counties marked in the "wet" column on repeal of the 18th amendment returned dry majorities to whittle down an early modification lead and then overturn it.

Advertise in the Gazette and your message will work while you take it easy.

### Raps "Sob Sisters"

A ringing plea for a "surcease of criminal coddling" and a "public sentiment that supports government" was made before the western states anti-crime conference Friday by U. S. Webb, California's attorney-general.

"We want a citizenship that stands for the law and law's enforcement. We want a public sentiment that supports government. We want a surcease of criminal coddling."

Webb's address drew applause from the approximately 150 conference delegates, including representatives of five western states. California peace officers and prosecuting attorneys and officials of federal crime agencies.

They gathered at Sacramento at the request of Gov. Frank F. Merriam for a conference which the governor hopes will lead to new cooperation among the states for the prevention of crime and the apprehension of criminals.

The attorney general spoke with scorn of the "sob sisters, male and female, whose tears flow in abundance" for those who commit offenses against society.

### PSALM

Mr. Roosevelt is my shepherd, I am in want,  
He maketh me to lie down on park benches,  
He leadeth me beside still factories,  
He disturbeth my soul, He leadeth me in the paths of destruction for his parties sake—  
Yea tho I walk through the valley of the shadow of depression I anticipate no recovery,

For he is with me,  
His policies and diplomacies they frighten me—

He prepareth a reduction in my salary—  
And in the presence of mine enemies He annointeth my small income with taxes.

My expenses runneth over,  
Surely unemployment and poverty Shall follow me all the days of my life

And I shall dwell in a mortgaged house forever. —Contributed.

### Georgia Remains Dry

Prohibitionists, with a lead of 243 votes, were officially certified as the winners of last Wednesday's prohibition repeal referendum in Georgia. Secretary of State John B. Wilson certified the result to Governor Eugene Talmadge as follows: For repeal, 81,891; against repeal, 82,134.

### Idaho Pig Crop Short

The spring crop of pigs farrowed in Idaho was the smallest in several years, according to indications from the survey made early in June. The crop was estimated at 149,000 pigs saved. This number is about 24 per cent smaller than the spring 1934 crop of 196,000 pigs, and compares with the 234,000 saved in the spring of 1933, and 243,000 saved in the spring of 1932.

### DR. SIMMONS COMING

Dr. Charles Simmons, Eye-sight Specialist of Lewiston, will be at Heacox Confectionery, Juliaetta, from 9:00 until 12:00 Friday, July 12th, and at the Raby Hotel, Kendrick, from 1:00 until 5:00 the same afternoon on his regular professional visit. Kendrick people desiring appointments later than five o'clock should call the hotel and arrange for them.

The idea that schools are for children only will be badly out of date in the next few years.

## The Washington Water Power Co.

NOW MAKES AVAILABLE  
For the Increased Use of Service

## ELECTRICITY

to SPOKANE and INLAND EMPIRE HOMES

"In keeping with the long established policy of passing on to its customers the benefits of the growing use of electric service, The Washington Water Power Company now brings you, with your increased use of service, 2c electricity!"

"This voluntary rate reduction places within the reach of every customer the multitude of conveniences and services offered by electricity...better lighting for the home...the food, protection and joys of electric refrigeration...the kitchen freedom and better cookery of the electric range...the labor saving of electric washing and ironing...and a hundred other services and conveniences that make a home modern."

"The new 2c step is one of many substantial voluntary rate reductions made by The Washington Water Power Company during its 46 years of public service. While the cost of everything else has

been going up and up, the cost of electric service has been continually down, down and down. And now with 2c electricity and, the 6/10ths of a cent water heating rate that day of better living made possible by the more abundant use of electric service is a reality, here and now!

"The reduction is effective with all meter readings after August 1, the 2c step beginning at 142 kilowatt hours. Take advantage of this cheap electricity and the low cost of electric appliances to have NOW those electric services and conveniences you have long wanted."

**Says He's Charlie Ross**  
If Gustav Blair, Chicago, can get some money together—and he'll consider all offers—he says he is going to Philadelphia to prove he is the missing Charlie Ross, the child whose kidnaping July 1, 1874, has never been solved.

Interviewed while painting his house in suburban Riverside, Blair said he has 12 affidavits to prove and countless witnesses to testify that he

is Charlie Ross.  
His story is that he was brought to Compton, Ill., 80 miles west of Chicago, by the last surviving member of the kidnap gang and reared as a member of the family of Reinart Miller, deceased. He assumed the name of Gustav Blair, he added.

**Useless Expense**

On Monday morning we consigned to the flames some 17 pieces of mail (the collection of just one week) that the government had sent out for the "information" of the newspapers, so that they would be sure to have something to "fill" their space with. The mail was housed in envelopes of all sizes and kinds up to 6x8 inches, and contained everything that the alphabetical soup concoctor has in stock. This same kind and number of pieces of mail are sent to every newspaper in the United States—large or small—and there are thousands of them, at government expense; or, rather, at the expense of the taxpayer, for it is the tax payer that eventually pays all government bills, of whatsoever kind. So you, Mr. Taxpayer, can just figure that whenever the government puts on a project of any kind, or even sends you a copy of the Congressional Record, you are going to help pay for it in the form of taxes.

Hundreds of thousands of tons of printed matter is sent out from the government printing office each year, and most of it, like in our case, is consigned to the big round "filing case" that stands at the end of the desk, the contents of which are later burned.

**California Youths Attacked by Shark**  
Marking the second incident of its kind to occur within two days, two Hayward youths were attacked by a shark July 7, as they waded in shallow water in San Francisco bay near Hayward, Calif.

The waders, John Rexelle, 24, and his brother, Joseph, 20, were casting for bass when they spotted a shark fin flashing through the water and heading in their direction. It was about 150 feet away.

They raced toward shore, with the shark in pursuit. The two youths picked up heavy pieces of driftwood and beat the shark to death as it floundered about in the shallow water. It weighed 200 pounds and was 8 1-2 feet long.

Last Saturday two 16-year-old Alameda boys, Russ Peterson and Ulysses Slater, were attacked in the bay near that city by a slightly smaller shark. They clubbed it to death with oars.

**Grazing Woodlands Harms Trees, Cows**

**3-Year Experiment Shows Practice Far From the Best Judgment.**

By F. W. Dean, Extension Specialist in Forestry, Ohio State University.—WNU Service.

Not only does the woodlot suffer, but the cows suffer, too, when woods are pastured. This is a conclusion reached after three years of experimentation in Indiana.

When two, four, or even six acres of woodlot pasture were allowed for each animal unit, and no outside range provided, the cows in the experiment lost weight rapidly and had to be moved to other range.

Effects noted upon the woodlot were destruction of the young trees, damage to the roots of the older trees, hard-packing of the soil, and disappearance of moisture-conserving layers of leaf mold. Many farmers have observed these effects and have fenced their woods area from their pasture.

According to the last census, however, over 70 per cent of the farm woods in Ohio are grazed by live stock. Of the total pasture acreage in the state, eight million acres, fully two million acres are woodlands.

With the removal from cultivation of a half million acres of crop land, through the adjustment programs, that amount of land is available for grazing, relieving much of our woodlands from serving double duty as woodlot and pasture.

**Buckwheat Is Not Good**

**Feed for Fattening Hogs**

Unless buckwheat should become much cheaper than the price of corn, it cannot be highly recommended to farmers as a fattening feed for hogs, says W. E. Carroll, chief in swine husbandry at the College of Agriculture, University of Illinois.

If, however, the market price of buckwheat should fall materially below that of corn, it might be fed in limited quantities, but never more than one-fourth to one-third of the hogs' rations. Such a reduction in the price of buckwheat is considered quite improbable, and farmers with this small grain in their granaries will generally find it more profitable to sell the buckwheat and buy corn for their hogs. In fact there has been less than 60,000 bushels of buckwheat produced annually in Illinois during the past three years.

In composition buckwheat resembles oats more closely than it does any of the other more common grains, explains Carroll. This fact alone suggests that it should not be used extensively as a hog feed unless it is cheaper pound for pound than corn. Likewise, because it contains more than 10 per cent crude fiber, its extensive use will tend to produce slower gains and in the end will add to the production cost of the hogs. Heavy feeding of buckwheat is also credited with producing pork of poor quality, although if used in moderation this difficulty should not be encountered.

**How to Inoculate Land for Growing of Alfalfa**

A good crop of sweet clover, Burr clover or Black medic grown within the past three to five years is sufficient inoculation for most soils, says an authority at the North Carolina State college. Where these crops have not been grown, soil from a field that has been planted to them may be used. From 200 to 400 pounds of this soil should be applied to each acre of land seeded to alfalfa. Dampen the seed with a mixture of equal parts of water and molasses and sift on a small quantity of the soil from the inoculated field. Stir the seed until they are well coated with the soil. Commercial inoculating materials may also be used if inoculated soil is not available.

**Denmark, Butter Country**

In the Nineteenth century the Danes excelled in the art of butter-making, though history relates they imported their dairy maids from the Netherlands. Danish butter has long occupied a foremost place. Denmark is the leading butter-exporting country of the world. And, too, in the United States the production of butter has made rapid growth since the introduction of the creamery system. It exceeds over two billion pounds a year.

**Make Woodlands Pay**

Farmers and others who have a "woodlot" will find it worth while to treat it just as they would treat other land and make it pay its way as far as possible. Any amount of work can be put onto woodlands, in trimming the poor trees out and giving the good ones a chance to develop, burning the brush and undergrowth at the proper time, keeping out fires that will destroy the timber and otherwise caring for it.

**The Wheat Supply**

The experts of the bureau of agricultural economics have concluded that the drought has not endangered the food supply. In a normal year the people of the United States eat, or feed to animals, and save for seed for the next year's crop, 625,000,000 bushels of wheat. With a carry-over of some 260,000,000 bushels and a production which certainly cannot fall below 520,000,000 bushels, there will be plenty of wheat for normal consumption.

**Conserve Hay Crop, Warning to Farmer**

**Do Not Plow Up; Save All to Make Good for Shortage During Season.**

Prepared by the United States Department of Agriculture.—WNU Service.

"Don't plow up timothy, alfalfa or any other crop, which will produce hay in 1935."

This is the admonition of Dr. A. J. Pieters of the United States Department of Agriculture, who for a quarter of a century has kept tab on forage crops of the United States. He says, "Farmers would normally plow up a certain part of their timothy and alfalfa acreage. But in view of present conditions, it would seem wise to leave these fields, even though they do not produce a full crop."

His conclusion, that a shortage of hay is certain next year no matter how fast farm conditions might improve from now on, is substantiated by these facts:

Our greatest production of hay each year is from clover and timothy, an average of about 80,000,000 tons for the last ten years. Most of the 1935 crops would normally be produced from clover and timothy seeded in 1934. But this year's seeding is almost a total loss. Clover and timothy tonnage in 1935 is bound to be light.

Alfalfa comes next in annual production—around 25,000,000 tons. The acreage of this legume in 1935, if changed, will be less than this year. Thousands of acres seeded to alfalfa in the fall of 1933 and the spring of 1934 have failed for want of moisture. Many old alfalfa fields have been killed by the extreme drought. The shortage of this year's crop cannot possibly be made up in 1935.

Seed for the annual hays such as millet, Sudan grass and soy beans, may not be very abundant next year. In any event we are likely to need all the seed we can get. There is no way of immediately increasing the acreage of wild hays, which produce less than 15,000,000 tons annually.

"The present and future shortage of hay can be partially solved," says Doctor Pieters, "by saving every available acre of grasses and legumes for future use, even if such hay will not be needed by the farmer who cuts it or by farmers in that part of the country. There will be a market for the better grades of hay in the drought areas. Hay of poorer quality can be fed profitably at home. Besides the profit, it is the patriotic duty of every farmer to conserve every available pound of feed and forage. Our live stock and dairy industry depend upon it."

**Lice on Young Animals**

**Check Normal Growth.**

Farm animals are sometimes infested with lice which may cause general unthriftiness, especially in young animals. Each species of farm animal has its own kind or kinds of lice which pass their entire life cycle on the animal, says the United States Department of Agriculture. Calves or colts badly infested with lice do not grow normally and may become permanently stunted. For this reason treatment should begin when parasites are first observed.

Animals affected with lice may be dusted with insect powder at any time, although the best method of eradication is by means of dipping or spraying animals. In the fall, in arsenical, coal-tar creosote, or nicotine solutions.

**Cow Requires Much Water or Milk Flow Is Reduced**

About 87 per cent of milk is water, and if the cow is unable to get an ample supply of water, she is likely to reduce her milk flow. Cows producing large quantities of milk naturally need more water than dry cows or those producing only a small amount of milk.

According to the state college man, studies indicate that the average cow needs about 12 gallons of water a day, but some high producing cows have been found to drink as much as 25 gallons a day, especially during hot weather.

Cows produce more milk when they have water available at all times during the day, either in drinking fountains in the barn or at a stream, well, or some other outside source.

**Agricultural Squibs**

The washing-away of soil from farm lands has resulted in the destruction of 85,000,000 acres for agricultural purposes.

Three hundred community canneries for the benefit of farmers have been established in Georgia within the last few years.

Dropping fruit into picking containers, and carelessness in emptying containers cause needless stem punctures and bruises.

Crotalaria has come into wide favor as a soil-improvement crop among farmers of North Carolina.

A short collar chokes a horse when pulling, while, when it is too long, the shoulder points will be bruised.

Two major units of the United States Department of Agriculture, the bureau of entomology and the bureau of plant quarantine, have been merged into one. The new unit will be known as the bureau of entomology and plant quarantine.

**Utility Demanded in All Live Stock**

**Better Judgment Suggested in Selecting Breeders for Meat Use.**

By E. T. Robbins, Live Stock Extension Specialist, University of Illinois.—WNU Service.

Prize-winning live stock fashions may come and go like feminine styles, but producers who strive to obtain the maximum returns from their meat animals should select their breeding stock more along utility lines.

Only farmers who raise the type and size of animals demanded by consumers can expect to sell their live stock for the highest prices, regardless of the latest mode at the live stock shows.

At present many cattle raisers are finding that the fashionable little beef heget calves that grow too slowly. When ready for market these yearlings will weigh only 800 pounds, while somewhat coarser stock will tip the scales at half a ton. It is the larger yearlings that are making the most money because they more nearly fit the needs and desires of the market. Larger sires will aid many cattlemen in producing the larger, more desirable yearlings.

Likewise, early lamb producers are coming to realize that they need rams of considerable size, if they are to get the largest possible market returns. For this reason, many farmers are changing to the larger breeds. What the sheep man wants is a lamb that will grow fast enough to weigh 70 to 80 pounds at four months of age, and lambs from small parents will not do it.

Hog producers, however, have a different problem. Some of the present breeding stock has such great size that the pigs are still gangling and thin at weights which the market desires. The utility standard in this case is a pig that will grow rapidly and yet become fat at around 200 pounds. For this purpose, boars weighing considerably less than 1,000 pounds are more likely to fit the needs of most producers, rather than the excessively huge sires seen at fairs and live stock exhibitions.

Some breeds of live stock need more stretch while others need more compactness to supply sires for most farms herds and flocks. Thus the breeder who develops his stock along utility standards will render a practical service for the live stock industry.

**Selection of Seed Corn Demands Close Attention**

The cheapest and surest way to increase corn yield is by the use of better seed, and the best way to procure better seed, other than buying it from a seed specialist, is to select one's own seed corn from one's best field.

Ears should be selected from stalks that are of average height, or best ears at a height convenient for shucking. The ears that hang downward are most desirable since these more readily shed water and are not so easily damaged by bad weather. Ears and stalks that have been damaged by insects and disease should not be selected; disease-free seed may be resistant. The main thing to bear in mind is the selection of ears from the best producing plants grown under average conditions. The ears should be well filled out with grain of uniform size. If ample time is taken for the purpose and the selection of seed made with due care with the seed properly dried and kept until planting time, better returns from succeeding corn crops may be expected by the farmer. Because of the drought very few farmers will raise good seed corn this year and therefore if they have some good old corn left over they should take good care of it.—Missouri Farmer.

**Rodents Like Jap Beetle**

In their search for effective control measures for the Japanese beetle, entomologists of the Department of Agriculture have discovered that much help may be expected from the small rodents, such as moles, mice and skunks, which are natural enemies of the bugs. They claim that Japanese beetle grubs are choice tidbits for these small animals, although the animals themselves are considered nuisances. The useful part they play in man's struggle against this insect pest of lawns, gardens and orchards, however, may give them a new lease on life.

**Agricultural Hints**

Thinning apples has proved most profitable during dry seasons.

Columbus brought sugarcane to America on his second voyage.

The average value of owned farm homes is \$1,135, and tenant farm homes \$300.

There are about 100,000 colonies of bees in Colorado, where honey production is an old, established business.

Drouth has caused soaring agricultural prices in Germany this year.

More farmer bankruptcies occurred during the last fiscal year than in the preceding one.

British fruit canners expect this to be a record year; they state that they require some 25,000 tons of soft fruits.

Experimentalists find that the vitamin C content of the cow's feed influences the amount of this vitamin in the milk.

**LINDEN NEWS ITEMS**

Mr. and Mrs. W. H. Weyen and sons, the Whybark family, Mrs. McPhee and Cleve, Mrs. Mattie Garner and family spent the Fourth in Lewiston.

Dan Lyons went to Moscow Saturday, where he has work for a while.

Mrs. Chas. Keeler returned from Moscow Friday, where she visited her son and daughter-in-law. Jim is recovering nicely from his operation.

Raymond Lyons went to Headquarters Monday where he has work.

Louis Alexander of Clarkston is helping his brother, Addison, in the hay.

Mrs. Longfellow spent the day Friday with Aunt Carrie Allen.

Hayse Hunt returned from the CCC camp the first of June. He is helping hay for Bud Harris.

Miss Doteline Whybark came up from Clarkston to spend the Fourth with her parents, Mr. and Mrs. D. W. Whybark.

Nevelyn and Bill Whybark and the Weaver boys returned to their work near Elk River Sunday after spending a few days with home folks.

Arthur Foster left last week for the Pierce country where he has employment.

Mrs. Starr and Aunt Carrie Allen spent the day of the Fourth with Miss Eva Smith.

Mr. and Mrs. Arley Whybark of Lenore spent several days visiting relatives here.

Mr. and Mrs. F. C. Lyons and family, Mr. and Mrs. Clem Israel and sons, Mrs. Longfellow and Miss Eva Smith attended the birthday dinner in honor of John Darby and Mr. Keeler at the home of Mr. and Mrs. John Darby at Crescent Sunday.

Melvin Garner and Eldie Hunt went to work in the Bovill camps Tuesday morning.

**CRESCENT CLIPPINGS**

(Last Week)

Mr. and Mrs. Fred Dorendorf (nee Mary Forest) motored from Kellogg Friday to visit with relatives here. They were accompanied by his daughter, Miss Viola. Friday evening about thirty or more friends and neighbors gave them a grand serenade with tin cans, cowbells, etc. Treats were served and after visiting a while, the neighbors left, wishing the newly married couple a long and happy life together. They were married May 25 at the home of the groom's brother, Henry, in Kellogg. They left for home Sunday morning. Nellie and George Dorendorf, who have been staying with their grandparents, Mr. and Mrs. Mike Forest, for the past winter, went with their mother.

Mrs. W. H. Loeser visited with her sister, Mrs. Elmer Hudson, Monday.

Hjalmer Stephenson and Inghard Gjovaag went to Moscow Friday. While there Bud (Hjalmer) purchased a new Ford car, which he brought back Friday evening.

J. H. Buckallew carpentered for John Darby Monday and Tuesday, putting in doors, fitting screens and other finishing work.

Mrs. Axel Swanson and daughters, Esther and Gloria, Mrs. L. A. Watson and son, Dickie, Inghard Gjovaag and Hjalmer Stephenson motored to Lewiston Saturday in the latter's new Ford.

W. H. Loeser and children were Southwick visitors Monday.

Mrs. Ray King visited with relatives in Kendrick Friday and Saturday.

Sunday visitors at the L. A. Watson home were Mr. and Mrs. Axel Swanson and family and Mr. and Mrs. Roy Kent and daughter, Jane.

Sunday callers at the John Darby home were Mr. and Mrs. Dick Winegardner and sons, Arne Kloster, Inghard Gjovaag, Hjalmer Stephenson, Mrs. L. A. Watson and Dickie and Mrs. Roy Kent and Janet.

Miss Mary Loeser spent the week-end with her parents, Mr. and Mrs. W. H. Loeser. She likes her job in Lewiston fine, she says.

Mr. and Mrs. Fred Dorendorf and children spent Saturday with Mr. and Mrs. Alfred Swanson.

Hjalmer Stephenson and Inghard Gjovaag left Monday morning for South Dakota to visit with relatives and friends. They expect to motor day and night so as to be there to celebrate the Fourth. Inghard may go on to Norway to see his folks if nothing prevents, but Hjalmer will return sooner.

**(This Week)**

Frank Slodski was a Lewiston visitor Friday.

We understand that Mr. and Mrs. Claud Craig are building quite a large new home in Leopold Canyon, but have not been able to learn much about it.

Friends of John Darby and E. B. Keller of Coeur d'Alene met at the Darby home Sunday to help celebrate their birthdays. Mr. Keller's birthday was July 5th, and John's was the 10th, so they celebrated together. A delicious basket dinner was served, and the day was spent visiting and generally enjoying each other's society.

Sunday visitors at the Bert Kloster home were Mr. and Mrs. G. E. Granberg of Lewiston, and in the afternoon Mrs. Emma Longfellow of Gold Hill.

Elmer Souders of Kellogg visited with home folks from Tuesday until Thursday.

Mrs. Burton Souders and son returned to their home in Kellogg Wednesday. Mr. and Mrs. Ivan Craig took them home and visited until Sunday.

Mrs. Frank Helm is enjoying a visit from her grandmother, who is 82 years old, from Dillon, Montana.

Walter Dorendorf and Burton and Francis Forest left Monday for the Elk River country to look for work.

J. H. Buckallew of Juliaetta came back Tuesday to do more carpenter work and painting for John Darby.

How the Fourth was spent by the Crescentites:

Mrs. Anna Kimbley and children motored with Mr. and Mrs. Alva Craig to Lewiston and Orofino.

Mrs. Nettie Trail and Dean went to Genesee.

Mr. and Mrs. Mike Forest and sons and Mr. and Mrs. Walt Dorendorf and baby celebrated in Lewiston.

Mr. and Mrs. Chas. Greenwood visited at the F. Souders home until after dinner, then, accompanied by Mrs. Souders and Marvin, went first to Helmer and then Genesee.

Others who took in both Helmer and Genesee celebrations were Mr. and Mrs. Alfred Swanson, Mrs. Axel Swanson and children, Mr. and Mrs. L. A. Watson and Dickie and Johnnie Kirchknopf.

Mr. and Mrs. Roy King visited with her folks, Mr. and Mrs. Jeeter Chandler, and also his folks, Mr. and Mrs. King.

The Darby family, Mrs. D. J. Hammond and E. B. Keller visited with Mr. and Mrs. Dick Winegardner and family.

Mrs. Julius Ekman had company, Mrs. Ziemann and the twins from Southwick.

**FAIRVIEW ITEMS**

Mrs. Walter Cochran of Juliaetta, Miss Gertrude Morgan and Floyd Gage of Tacoma visited Tuesday afternoon at the Fred Glenn home.

Mrs. Herbert Wolff spent Tuesday with Mrs. Wm. Wolff.

Those from here who attended the rodeo at Genesee July 4th were Mr. and Mrs. Hefel and Ruby, Mr. and Mrs. Clifford Davidson and daughter, Mary, Mr. and Mrs. Paul Dageforde and Mr. and Mrs. Ed. Heinrich.

Mr. and Mrs. Fred Glenn, Mr. and Mrs. John Glenn and son, Harold, and Lester Slead spent the Fourth at Orofino.

Mr. and Mrs. T. J. Flesham were host and hostess at a family dinner at their home the Fourth. Guests present were Mr. and Mrs. Joe Piper of Agatha, Mr. and Mrs. Milton Parsons and son, Dale, of Kimberly, Mr. and Mrs. Oney Walker and sons, Mr. and Mrs. Virgil Flesham and sons, Mrs. Herbert Wolff, Warren Walker of Deer Park, Mr. and Mrs. Glen Flesham.

Mr. and Mrs. R. E. Woody were dinner guests the Fourth at the R. B. Woody home at Sweetwater.

The J. M. Woodward family were fishing in Elk River the Fourth.

Mr. and Mrs. Harold Parks and children spent the Fourth at Lewiston.

Mr. and Mrs. Fred Glenn, Mr. and Mrs. Glen Flesham were Lewiston visitors Saturday. Mr. and Mrs. Flesham stayed over until Monday.

The Wayne Kuykendall family went fishing in Dix creek the Fourth.

Wilbur Corkill, Philip Wods, Orval Walker, Warren Walker were Lewiston visitors Friday.

Miss Ruby Hefel and Miss Beulah Hoskins spent the week-end at the Marvin Vincent home doing the chores while the Vincents were in Oregon visiting.

WE NEED MORE CONTENTED COWS  
HAROLD THOMAS, Editor

Well, Folks—Did you ever see such weather for July? Talks about wet—say, those poor hay shocks have been turned so much the edges are getting threadbare, if you can say that about hay. But here's a remedy—put green glasses on the cows and they won't know the difference—and it won't affect the cream any—and that's a sure source of income. Just bring it to this place—take the money and the sterilized can home. It's a simple procedure. Most everyone loves ice cream—invented many years ago by a France chef—but it didn't taste like ours—you'll like ours.

With things picking up the way they are, perhaps the girls will be able to get their finger nails out of the red.

Son: "Pape, what is dew?"  
Papa: "The rent, the note at the bank, and an installment on the car!"

Here's one that's going the rounds: A small girl handed in her arithmetic problems signed "Mae West." The teacher asked her why and received the answer, "Because I done 'em wrong!"

Try a pound of our butter—you'll like it—we will too.

## HOW MUCH DO YOU SPEND FOR YOUR GROCERIES

Does It Seem High OR JUST UNSATISFACTORY? IN EITHER CASE—SEE US—

We specialize in the things most folks like to eat at prices they can afford to pay—For your dollar buys a quality item here—not a poor item at poor quality—but a quality item at a reasonable price.

Quality cannot be advertised into an item by a fancy label or blatant statements—it must be "built in" to the contents—and the contents of the cans on our shelves are top notch. Only standard brands will be found—and standard brands are the best buy of all.

Plan to buy your next list of groceries at this store and you will soon be convinced of the truth of our statements.

Mr. and Mrs. Chas. Hoffman and family spent the Fourth in Lewiston. Mr. and Mrs. P. B. Daugherty and Mr. and Mrs. Virgil Flesman and son, Cecil, called on Mrs. Klopfer Sunday evening.

Miss Georgine Smith and Fred Arnold accompanied the J. M. Woodward family to Lewiston Monday afternoon.

Mrs. Bertha Percil spent the Fourth with Mrs. Harry Smith.

Quite a number are attending the daily vacation Bible school.

## SOUTHWICK NEWS ITEMS

Mrs. Aaron Wells was brought to the home of her mother, Mrs. Clara Bateman, after being confined in bed for five weeks at the George Wells home at Cavendish with pneumonia. She is still in bed, and only able to sit up a little while at a time, but is slowly improving. We all hope she will soon be able to be up again.

Mr. and Mrs. Given Mustoe and son, Jack, and Mr. and Mrs. Jake Cobble were Sunday guests at the Arnie Cuddy home.

The Fourth was celebrated in various ways and at various places. Orofino was chosen by the most of the families, namely, John Lettenmaier, Cecil Harris, Joe Tschantz, Jake Newman, Wm. Cowger, Oscar Lawrence, Nels Longeteig, J. E. Hoppe, Harl Whiting, Homer Betts and John Phillips.

The Howard Southwick family visited Sunday at the George Hayward home.

Calvin McFadden came up from Portland to spend the summer with his grandparents, Mr. and Mrs. Julius Hoppe.

Rev. Platt was a Sunday guest of Mr. and Mrs. Wm. Henderson.

The John Lettenmaier family spent Friday and Saturday in Clarkston with Mr. and Mrs. Edwin Wetmore. Donald Wetmore came home with them for a week's visit.

Mr. and Mrs. Roy Southwick were Sunday guests of the Tom King family.

Mr. and Mrs. Clarence Henderson and Vera spent the week-end in Lewiston at the Ralph Wright home. Mrs. Eva Wright, who had been visiting there, came home with them.

The J. E. Hoppe, Arnie Cuddy, Darwin Tarry, Roy Southwick, Fred Estes, Howard Southwick and Homer

Betts families got their strawberries at the Fritz Olson place one day last week, picking about 26 crates.

The J. R. King, Claud King, Mrs. Ella Hanks, J. Pontius, Ray King, Wilmer Hanks and Ralph Hanks families enjoyed a picnic on Dix Creek the Fourth.

Gordon Harris, who suffered with a very bad case of quinsy, is able to be up again.

The Cecil Hayward family from Pasco spent a week, including the Fourth, at the Charlie Hayward home.

Mr. and Mrs. Jeder Candler, Mr. and Mrs. Ray King, Mrs. Leone McCoy and Ben Baker were Sunday guests of Mr. and Mrs. J. R. King.

Rev. Graybeal of Leland stayed overnight with Mr. and Mrs. Homer Betts Thursday night.

Mr. and Mrs. Harold Whiting and James visited Sunday at the Dick Winegardner home at Crescent.

Those spending the Fourth at the Clarence Henderson home were Mr. and Mrs. Clarence Whiting and Mr. and Mrs. Ralph Wright of Lewiston, Mr. and Mrs. Marion Wright of Kenzu, Oregon, and Mrs. Eva Wright.

Several from here attended the Lehman sale at Teakean Monday.

Mrs. Leona McCoy and Ben Baker drove to Grangeville and spent the Fourth.

Norman and Elmer Wright of Longview spent a week here visiting relatives.

Eva McCoy went to Leland Monday to help her sister, Mrs. Harry Smith, with the berry picking. Mrs. Elton McCoy is still there.

Mr. and Mrs. Jake Cobble spent the Fourth in Pottlatch.

The Alex Lawrence family drove to Genesee and spent the day of the Fourth.

## LITTLE BEAR RIDGE

Little Earl Thomas was again taken to the St. Joseph's hospital at Lewiston July Fourth for mastoid infection. Only a few months ago he underwent a serious mastoid operation. It is hoped a second operation will not be necessary.

Mary Thomas visited at the home of Wade Keene while her folks were at the hospital July Fourth.

Mrs. Sten from Blaine is visiting with her daughter, Mrs. Westendahl this week.

The Genesee celebration seemed to be favored by several families on the ridge. Among those who attended were Mr. and Mrs. Oloi Reierson, Mr. and Mrs. Harry Arneberg and family, Roy and Gilbert Rudy, Roy and Johnny Thomas and Mrs. C. Westendahl and Ben.

Some of the people from here who attended the Helmer dance the evening of the Fourth were Mr. and Mrs. Gunder Reierson, Mr. and Mrs. Jim Benjamin and Eileen and Mr. and Mrs. E. Bovencamp and family.

Mrs. H. Galloway and children visited at the K. D. Ingle home on Big Bear Ridge and enjoyed a trip with the Ingle family to the University campus July Fourth.

Miss Ada Candler was home from Lewiston over the Fourth.

Henry Emmett left Sunday morning for Helena, Montana, where he will visit his daughter. Before returning home, he expects to tour the Yellowstone National Park.

Truly the interest of the highway board in our road manifests itself in so many ways that it is almost pathetic. Some time ago two men were observed walking up the creek road shouldering rakes; one would naturally think their intention was to rake the rocks from the track, but they must have been sent out to count the rocks instead, and their rakes were merely used to balance the weight of their lunch kits. Then, too, they may have been out sightseeing, as there are several points of interest out our way, such as Kendrick's garbage and junk yard near the ruins of the old deflection dam and farther up the graveyard for Kendrick's undesirable canine population. It is probably necessary to count the rocks to see if there are enough to go around to make this road the next relief project. The setup must be just right, so we're told, neither too large nor too small. Is it possible to find something to fit? It is rumored that the proposed Little Bear Ridge project is too small. It will, no doubt, be just too bad for Little Bear Ridge as far as getting its name in the pot for a wee bit of the \$4,800,000,000 is concerned, but is it not at least entitled to its quota of road tax money?

## Infant Swallows Penny

The infant son of Mr. and Mrs. Claud Clark of near Juliaetta, Wednesday morning was given a penny to play with by his older sister, while the mother was at work, and the youngster immediately tried to swallow it, which lodged in his throat. The baby was brought to Kendrick and Dr. McKeever made an X-ray which showed the penny plainly. The little fellow was taken to Lewiston at once for the removal of the money.

'Maybe families aren't as large as they used to be, but we know a lot of them that can talk and act mighty big, says an exchange.
