Subject: "Play the Game."

### PERSONALS

Mr. and Mrs. E. A. Deobald were Lewiston visitors Monday.

Mr. and Mrs. J. M. Lyle, Jr., and children were in Lewiston Saturday. Betty and Walt Morey were Lewiston visitors recently, where Betty purchased a new sedan.

Mr. and Mrs. Willard Eichner of Troy called on Mr. and Mrs. W. A. Watts Sunday evening.

Mrs. Ethel Emery left Wednesday for Clarkston, where she has a position and plans to spend the winter.

Mr. and Mrs. N. E. Walker were business visitors in Coeur d'Alene Monday, returning that evening.

Mrs. E. H. Field left Monday for Moscow, where she will spend several days before returning to Genesee.

Mr. and Mrs. Carl Hartung and sons are engaged in construction work in Lewiston, returning home only on week-ends.

Mr. and Mrs. W. A. Watts and sons, accompanied by R. Christensen, drove to Spokane early Monday morning, returning that evening.

Rev. T. E. Poindexter drove to Lewiston Wednesday to attend the sub-district conference of the M. E. church, now being held there.

Mr. and Mrs. Roy Ramey and family drove to Lewiston Sunday where they left Miss Jeanne. She will attend the normal there this year.

Mr. and Mrs. Chas. Snowing of Salt Lake arrived Monday evening to spend several days visiting their daughter and family, Dr. and Mrs. D. A. Christensen.

Mrs. H. B. Thompson and daughter Miss Mary Elizabeth Thompson, returned Friday from Spokane where they have been the past week visiting with Mrs. Thompson's father.

Miss Maxine Keene, accompanied by her house guest, Miss Elaine Brown of Pocatello, left Tuesday evening for Pocatello, where Miss Keene will enter the southern branch of the University of Idaho. The young ladies are classmates and are taking a pharmacy course.

Mrs. Frank Curtiss and daughter, Miss Beatrice, left Saturday for Spokane, called there on account of the severe illness of Mrs. Curtiss' mother, Mrs. D. D. McMillan, who passed away Monday morning. Mr. Curtiss left Wednesday morning for Spokane to attend the funeral.

Mr. and Mrs. J. H. Cairns motored to Colfax Thursday (today) to see an aunt of Mr. Cairns, Mrs. Margaret C. Munns of Evanston, Ill., who is world treasurer of the W. C. T. U., and one of the speakers at the convention held there for all parts of eastern Washington.

Elbert Long of Moscow spent the week-end with his grandmother, Mrs. N. B. Long.

### P.-T. A. Meeting

The P.-T. A. will hold its first meeting of the year in the school Monday evening at 7:30. It will be a hospitality meeting to welcome new patrons, and new projects and plans for the year will be discussed. Everyone interested in our school, whether you have children attending or not, are cordially invited to attend. Those from Big Bear ridge interested are especially urged to attend.

Buy it in Kendrick. It pays.

### LEWISTON ROUND-UP BE HELD SEPTEMBER 24-25-26

The greatest array of big-time rodeo talent ever assembled in a single show in Idaho will be featured competitors at the second annual Lewiston Round-Up next Thursday, Friday and Saturday, September 24, 25 and 26, with advance ticket reservations indicating capacity attendance at Recreation park.

Lewiston's mild weather makes it possible to stage the show after other western rodeos have been held and hence it draws the "cream of the crop" of the top-notch cow hands who come to Lewiston enroute east for the annual Madison Square Garden show at New York. The fact that points won in the Lewiston roundup count toward the national championships awarded by the Rodeo Association of America is another incentive for participation by the stellar cowboys.

The barns at Recreation park are already well filled with bucking horses and racing mounts, while Lewiston is in festive attire for the roundup, its citizens clad in ten-gallon hats and gaudy garments under the watchful eye of "kangaroo court" officials. All bucking horses are required to show their wares in preliminary tests to assure that only the meanest sunfishers will be sent out of the eight chutes during the roundup.

The night attraction of the roundup will be "The Bunkhouse," which will occupy all three floors of the Elks temple building, featuring fun and frolic in frontier style with dancing old-time western gambling games and a refreshment bar.

The roundup program will start each afternoon at 1:30.

New bleachers have been erected at Recreation park, bringing the total seating capacity to more than 7,000. Reserved seats may be secured in advance by writing to the Lewiston Roundup Association headquarters at Lewiston.

### FIX RIDGE NEWS

Mr. and Mrs. Robert Hall and Mr. and Mrs. Paul Hall went to Lewiston Friday.

Mr. and Mrs. S. S. Taber went to Lewiston Thursday.

Elsie Denner is in a Colfax hospital under medical care. Her many friends hope she will soon be well again.

Mr. and Mrs. Hunt, Mrs. Carr, Sanford and Dana Weaver were visitors at the Adolph Denner home Sunday.

Miss Dahl went to her home at Deary over the week-end.

Mr. and Mrs. Robert Farrell and children of Clarkston Heights were visitors at the Robert Hall home Sunday.

Mrs. Kuni Denner, Tom, Norton and Emma were Lewiston visitors Sunday.

Ralph Richardson was a Kendrick visitors Tuesday.

Marsh Carlton was in Kendrick Tuesday.

Mr. and Mrs. Caus Clark and children visited at the home of Mr. and Mrs. Charles Cox in Cameron Sunday.

Mr. and Mrs. Paul Hall have moved to their new home on Potlatch ridge. Mr. and Mrs. Alvin Nye and children went to Julietta Wednesday.

### GOLDEN RULE

Irene Martin left Monday for Kendrick to assist Mrs. Walter Bencotter with her work.

Mrs. Robert Ballard and baby daughter returned home from Kendrick the first of the week.

Mrs. Kenneth Pearson spent the past week with her folks, the Roy Martin family. Her husband came for her Monday and they left for Spokane Tuesday.

School started this week with Miss Helen Williams as teacher. There are 19 students enrolled.

Mrs. Glen Betts spent Wednesday with Mrs. John Starr.

Mr. and Mrs. W. A. Cowger, Mr. and Mrs. Abner Cowger and son

### LUNCHES

Remember—We serve lunches of all kinds, at all hours. The ingredients are fresh and we know how to make them just right.

### CANDY BARS

We have a new stock of fresh Candy Bars of all kinds for the school kiddies—and older ones.

### ICE CREAM

The *Recall* Store

were Lewiston and Orofino visitors Wednesday.

Miss Williams and the Glen Betts family enjoyed a visit from Mr. and Mrs. Ross Armitage Tuesday evening. Mr. and Mrs. Oscar Lawrence were Kendrick visitors Friday.

Miss Helen Williams spent the week-end with Mr. and Mrs. Ross Armitage. Sunday evening Mrs. Armitage and Miss Williams called at the Martin home.

Mrs. N. E. Ware spent from Friday until Monday with her daughter, Mrs. Carl Finke and family. Sunday they had dinner at the Glen Betts home.

Glen Betts was a Lewiston visitor Monday.

### Borah Of Idaho

Nearly 30 years ago Idaho sent to the United States Senate a man who for a long time has been almost as well known as the state itself. He has been elected five times to the upper chamber and is now first in length of continuous service. Throughout he has thought of the office in the national sense. He would say with the late Senator Lodge: "I am a senator of the United States."

Fidelity to that concept may prove his greatest weakness in his present campaign for another term. His Democratic opponent, Gov. Ben Ross, shrewdly plays on the theme that "It is time something were done for Idaho."

The most satisfying thing about the vote for Borah in the primary is the size of his majority over the Townsend plan candidate, nearly three to one. The whole country, long interested in the veteran senator, will watch this autumn what promises to be a tense struggle for his seat.

Long ago the people of all parties recognized the sincerity, honesty and ability of Senator Borah. His mastery of our constitution, his belief in the inviolability of America, his distrust

of Europe, his hatred of windy demagogues, and his indifference to his own material interests, all are well understood and admired.

What has often exposed him to justified criticism is his inability to pull with other men in behalf of a good cause. He ploughs a lonely furrow. In many great dramas he has played the part of the twelfth juror, but isolation never bothers him.

A senate of 96 Borahs would be an aggregation of stars, a collection of talented individuals so extremely individualistic and incalculable that nobody could say what the morrow would bring forth. A senate without a Borah would be tame, disappointing and pedestrian.—Boston Herald.

### Rebekahs Entertain

Tuesday evening the Rebekahs entertained after lodge with a birthday party in honor of Mrs. Joe Davis and a farewell party for Mrs. Ethel Emery, who left for Clarkston Wednesday.

Ice cream and cookies were served by Mrs. Ira Havens and Mrs. Lester Hill.

"You love her very much?"  
"So much that when her first husband died I married her so that I might share her grief and so lessen it."  
"And how did it work?"  
"Fine! I'm sorer now for his death than she is."

### DR. SIMMONS COMING

Dr. Charles Simmons, eye-sight specialist of Lewiston will be at the Heacox Confectionery, Julietta, from 9 until 12 o'clock Tuesday, September 29th, and at the Raby Hotel, Kendrick, from 1:00 until 5:00 on the same date.

Those wishing to consult him should call early in order to avoid the congestion that usually comes late in the day.

## THE FARMERS BANK

Herman Meyer, President  
Warney May, Vice-President  
O. E. Havens, Cashier

Hours 9:00 to 12 Noon 1:00 to 3:00 P. M.  
Saturdays 9:00 to 12:00 Noon

**Banks Fishing Gets Its Name From Ocean Bottom**

Banks fishing gets its name from the banks or hilly portions of the ocean bottom, found between the shore and the deep waters of the Atlantic. The main banks range from the Grand Banks, off Newfoundland to the George's Banks, off Nova Scotia. Deep sea vessels are very sturdily built. Most of them are driven by sails, supplemented by auxiliary power, but some of them are steam driven, having a relatively large displacement of from 250 to 800 tons gross. The fish taken in banks fisheries, says the Montreal Herald, are mainly cod, haddock, hake and pollock, and are caught for the dried fish trade. The long line method is chiefly used. Ten or more dories are usually carried by each boat and these are put to sea with two fishermen in each boat. The long line or trawl has been attached to it, at intervals of about six feet, a succession of short lines, each carrying a hook. One of the dory fishermen baits the hooks and pays out the line as the other rows. Sometimes the line reaches a mile or more in length. It is buoyed and anchored at both ends and is allowed to stay in the water for half an hour or so, then hauled in. The dory goes back to the vessel, unloads the fish and repeats the process. These "bankers" sometimes remain in the fishing grounds as long as two months, until a full cargo has been obtained, before returning to the home port.

**Charivari, Mock Serenade, Once Used for Newlyweds**

Charivari is pronounced Sha-ri-va-re, a as in father, e as in end, accent on third syllable, or colloquially as if it were spelled chiv-er-er. It is a mock serenade of a newly married couple. It originated in the Middle Ages in France where it was customary to raise the charivari only against persons just married for the second time, says a writer in the Indianapolis News. Neighbors would gather round the home of the couple, and make a tumultuous noise by shouting, whistling, hissing, groaning, ringing bells, beating tin pans, etc. The crowd, generally in masks and special costumes, would not stop the charivari until the newly married couple bought their peace with a ransom, which usually consisted of food and drink, or supply money to buy it. The charivari of the rural districts of the United States is similar, except it is raised against any newly married couple. In German it is called "katzenmusik," which means "cat's concert."

**Desert Yields Precious Stones**

Precious stones weighing as much as five pounds have been found in the Libyan desert. They are of a beautiful greenish-yellow color and extremely hard. It is believed that they were formed out of desert sand by the terrific heat of a great aerolite or meteor which fell long ago in this district. Similar stones have been found around a meteoric crater at Wabar, Arabia. These are supposed to be remains of a broken planet. The crater is similar to the nineteen discovered in 1881 in the Central Australian desert, blasted out by giant meteorites. Some of these craters are more than 200 yards in diameter. Scattered around are fragments of the meteorites, composed of pure nickel and iron.

**Liverpool Once Watch Center**

Liverpool, England, was the home of many large watch manufacturers in the Eighteenth and Nineteenth centuries; here lovely watches were made and many of them came to America; these were all open faced and rather large. Women wore them on black silk cords and they were wound with tiny gold keys. The cases were receptacles for pictures of loved ones. The tiny screw holes in the works were often set with semi-precious stones, and many of them, although nearly two hundred years old, still keep correct time.—Boston Transcript.

**Roger Bacon's Prophecy**

Approximately 700 years ago Roger Bacon said: "Machines for navigating are possible without rowers, so that great ships suited to river or ocean, guided by one man, may be borne with greater speed than if they were full of men. Likewise cars may be made . . . so that without a draught animal they may be moved with inestimable speed . . . and flying machines are possible so that a man may sit in the middle turning some device by which artificial wings may beat the air in the manner of a flying bird."

**The Name "Dolphin"**

The name "dolphin" is a misnomer, and properly belongs to the group of cetaceans known as porpoises, which are not fish. The "dolphin" is built for speed. The body is elongated and compressed and the head elevated. The dorsal fin has no spine and extends practically the entire length of the body. It inhabits the high seas of warm climates and is an excellent food fish.—Tit-Bits Magazine.

**Most Beautiful Cemetery**

Santiago, Chile, claims only one superlative for itself: possession of the most beautiful cemetery in the world. It is truly a city of the dead. Beyond the entrance are stately chapels and streets laid out at right angles. Some of the avenues, says the Detroit News, are lined with statues and columns. All are shaded by flowering magnolias, rosewoods and orange trees.

**Rome's No. 1 Attraction Is Nero's Town Palace**

From Prince Hill in Rome one sees straight across towards St. Peter's dome, the open space that was the Garden of Nero, where crucified Christians expiated their imaginary crime of burning Rome. Though condemned to death by the senate, Nero's remains were buried with honors and a fine tomb reared above it, says a writer in the Detroit News. But soon "demon-crows" possessed themselves of his villa ghost—so runs the holy legend—and made Pincine hill hideous with their noises until Pope Paschal himself cut down their roosting trees roundabout and, leveling the tomb, on its foundations erected a church, Santa Maria del Popolo it was called, and there it stands today! The marble urn holding the imperial ashes was used as a public measuring cup for salt in the marketplace. No one living has seen that urn. His temporal home, that magnificent golden house built after the burning of Rome, with mile long porticoes, gilded and carved columns, mother-of-pearl inlaid walls, outdid all imperial palaces in sumptuous luxury. Trajan built great baths over its ruins; in the stretches of its game preserves stands the Colosseum. Wings long underground have been cleared, disclosing fine murals. In one room was found, four centuries ago, the celebrated Vatican group of Laocoon and his sons, executed in Nero's time. Visitors enter the ruins of a municipal rose garden.

**Natives of Samoa Island Can All Read and Write**

American Samoa consists of the islands of Tutuila, Annuu, Ofu, Olosega, Tau, Swain's Island (which was made part of American Samoa on May 11, 1925), and the uninhabited coral atoll of Rose Island. These islands notes a writer in the Cleveland Plain Dealer, became possessions of the United States by virtue of the tripartite treaty with Great Britain and Germany in November, 1899. The census of 1930 gave American Samoa a population of 10,055. The islands are located about 4,200 miles southwest of San Francisco, and about 2,000 miles east of Australia. The natives can all read and write. The history of American Samoa commenced in the year 1872, when the harbor on Pago Pago (Island of Tutuila) was ceded to the United States by the native king for a naval and coaling station. This is the most valuable harbor in the South Pacific and possibly in the entire Pacific ocean. All of the land on the island is privately owned.

**Muskellunge**

Wisconsin has been long and favorably known for its muskellunge fishing, having acquired a reputation for this sport far in the lead of any other state. And so when Wisconsin tells you that there is only one way to spell the name of this big game fish it ought to be accepted by the fishing public as being final. The state conservation commission, after considerable research, has decided that the old Chippewa or Ojibwa name for this fish, masklonje, can be spelled in English in only one way, "Muskellunge" and from now on muskalunge, maskilonje, muskelonge, masklonje, mascalunge, mascononge and maskanong are out. It is O. K. if you want to abbreviate to "Muskie" but otherwise stick to Muskellunge.

**Golfers Wear Red Coats**

There are golf courses in England that compel the golfers to wear red coats. This custom originated when golf first started in England, where, because of the requirement of great open spaces, the common lands, where villagers had grazing rights for cattle, were used. Because of the danger to peasant and live stock from this strange round, white missile, all golfers were required to wear red coats. In this land of tradition, there is one club, only twelve miles from London, where this practice still holds.

**District of Columbia**

The District of Columbia is the seat of the United States government, provided by the state of Maryland for the purposes of government in 1791. It contains the city of Washington, and embraces an area of sixty-two square miles. The district has no municipal legislative body, and its citizens have no right to vote in national elections. By an act of congress of 1878, its municipal government is administered by three commissioners, appointed by the President.

**Georgia's Natural Wonders**

The seven natural wonders of the state of Georgia, according to a state librarian, include Amicolola Falls, in Dawson county, the highest natural waterfall in the state; Okefenokee swamp, near Waycross, Ga.; marble vein in Longswamp valley, in Pickens county; Warm Springs, in Meriwether county; Stone mountain, in DeKalb county; Tallulah river gorge, in Rabun county; Jekyll Island forest, near Brunswick, Ga.

**The White Squall**

When a squall, or sudden fierce rush of wind, comes unaccompanied by any loss of light, it is known as a white squall, which is usually heralded by dark clouds and heavy rain. The white squall is the more dangerous of the two, as there is no warning of its coming, save the white foam it raises on the surface of the sea and a thin haze.—Tit-Bits Magazine.

**DOMESTIC AND FOREIGN GRAIN MARKETS FIRM**

Minneapolis and advance in ocean freight rates curtailed export business while inquiry from the Atlantic coast was slow. Flour business with southeastern markets was of moderate volume but sales of flour to the Philippines was light. The indemnity payment on Sept. 11 was 30c per barrel. At the close of the week, hard white (Big Bend Bluestem or baart) was quoted at Portland at \$1.09, soft white and western white at 95½c, hard winter at \$1.00 and western red at 96½c per bushel, all basis No. 1, sacked. California wheat markets were dull with prices about unchanged. Growers generally were selling slowly but local demand was light with the result that prices failed to follow the advance at other markets. The feed industry was mostly substituting barley for wheat. At the close of the week No. 1 hard white was quoted at San Francisco at 99c and No. 1 soft white at 96c per bushel, sacked. At Los Angeles No. 1 soft white and hard white wheats were both quoted at \$1.00 per bushel, sacked.

Foreign wheat markets were relatively firmer than domestic markets with prices at Winnipeg up 1c per bushel. Country marketings continued liberal with Winnipeg receipts totaling 7,963 cars for the week. Export demand, however, was active and offerings were readily taken, with No. 1 Manitoba northern quoted at \$1.01½ and No. 3 at 97½c per bushel. Unfavorable harvesting weather in Europe tended to strengthen the Liverpool market despite heavy shipments from Danubian countries. Black Sea shipments totaled 3,552,000 bushels, while southern hemisphere clearances amounted to only 2,302,000 bushels. At the close of the week No. 2 Canadian Manitoba northern from Atlantic ports was quoted at Liverpool

at \$1.14½. Pacific Northwestern barley markets remained steady although trading was of limited volume. Good malting barley, which was in light supply, was quoted around \$2.00 to \$2.05 per 100, basis FOB cars country shipping points in the Willamette valley, while feeding grades at Portland held around \$1.75 per 100, sacked basis. Oats markets shared in the strength of other grains with prices tending upward. In the Pacific Northwest, some slackening in demand for medium to lower grade offerings was a weakening factor. Eastern inquiry for Northwestern oats was still in evidence but requests were generally for top grades of heavy white oats which were in limited supply. The local market inquiry in Pacific Northwestern markets was mostly quiet except for offerings of gray oats for cereal milling interests which moved readily at current price levels. No. 2 white oats testing 38 pounds per bushel were quoted September 10, at Portland at \$1.50 per 100, and No. 2 gray oats at \$1.45 per 100, both sacked basis. No. 2 red oats at San Francisco were quoted at \$1.55 to \$1.65 per 100.

**"Charlie Chan At The Circus"**

Charlie Chan (Warner Oland) is perhaps one of the best "screen detectives" this generation has known, and in this, one of his latest and best pictures, special emphasis has been laid on the comedy aspect and capitalized to the full without in any degree detracting from the suspense and drama of the murder mystery, which, as usual, is the basis of the story. This time Detective Chan takes his wife and 14 children to the circus, holiday bent, and is called into consultation by one of the owners of the circus, who has been receiving threatening letters. Chan's eldest son, Lee, attempts to solve the mystery

by methods learned from his father, but consistently follows erroneous leads.

This is one of the most interesting detective stories you have ever seen or heard and Detective Chan, of course, finally unravels the plot and brings the guilty party to justice. Then there will be the usual short features, including a Buster Keaton comedy.

**Canada Refuses Mrs. Hauptmann**

Mrs. Anna Hauptmann, widow of the man executed for the Lindbergh baby kidnap-murder, was refused entry to Canada recently because she could not prove United States citizenship and failed to produce credentials enabling her to reenter the United States.

Canadian immigration authorities at Cantic, Que., entry point opposite Rouses Point, N. Y., said the widow of the Bronx carpenter was accompanied by a man who said he was her lawyer but would not give his name.

They said the man told them Mrs. Hauptmann was on the way to Montreal to check information on the Lindbergh kidnaping, still trying to prove her husband was innocent.

The country vicar was giving a milkmaid a lift home in his car, and when he came to her house he set her down. The girl proceeded to thank him. "Oh, don't mention it," said the vicar. The girl blushed and then replied: "All right, mum's the word."

**AUCTION SALE**

The undersigned will sell at public auction, at the Walter Hoffman ranch, on Potlatch ridge, 3 miles southwest of Leland, on

**Wednesday, Sept. 23, '36**

Commencing at 10:00 A. M., the following property

### Revolutionary Calendar of the French Republic

The revolutionary calendar was the calendar of the first French republic, says a writer in the Indianapolis News. It was substituted for the ordinary calendar by a decree of the national convention in 1793. The 22nd of September, 1792, the day from which the existence of the republic was reckoned, was the date of the new calendar. The year began at midnight of the day of the autumnal equinox, and was divided into twelve months of 30 days, with five additional days (sans-culottides) for festivals, and six in every fourth year. Each month was divided into three decades of ten days each, the week being abolished. The names of the months, with their English significance, and the approximate dates of their commencement, are as follows: Vendémiaire (vintage), September 22; Brumaire (fog), October 22; Frimaire (sleet), November 21; Nivose (snow), December 21; Pluviose (rain), January 20; Ventose (wind), February 19; Germinal (seed), March 21; Floreal (blossom), April 20; Prairial (pasture), May 20; Messidor (harvest), June 19; Thermidor or Fervidor (heat), July 19, and Fructidor (fruit), August 18. The five regular sans-culottides were dedicated respectively to the Virtues, Genius, Labor, Opinion and Rewards. This calendar was abolished by Napoleon at the end of 1805.

### Numerous Varieties of Bothersome Cockroaches

While there are many varieties of cockroaches belonging to the same family, among which are the German and Australian, the American is the most common and widely distributed species in the corn belt, according to an authority in the Missouri Farmer. About eleven months' time is required for a cockroach to hatch and grow to maturity. The female lays a number of eggs which she deposits in a brown capsule. This capsule she retains in her body until the young are about ready to hatch, whereupon she deposits it along the run-ways of the insect. When the young hatch they live for a time with the old pair. At night they sneak into kitchen and pantry and track around over the food. They excrete a material over food and in their run-ways that has a foreign, and very offensive, odor. That they are exceedingly filthy and dangerous to human health is obvious when it is known that they eat and track over anything from a dead mouse, a bed bug, an empty egg capsule, to all kinds of human foods.

### Knew Their Winds

The ancient Greek navigators knew enough about the seasons and directions of certain winds, such as the easterlies and the Indian monsoons, to utilize them in making voyages that would have been difficult or impossible without such knowledge, states a writer in the New York Tribune. After the Fifteenth century the trade winds of the Atlantic and the Pacific were similarly turned to account. At the close of the Seventeenth century the earliest attempt to chart ocean winds was made by Halley, the English astronomer, whose crude map of the trade winds and monsoons implies that he had a certain amount of statistical information at his disposal.

### Water as Food

Commonly speaking, foods are those substances eaten or drunk for the building up and maintenance of the human body and to supply energy for its activities. In the more exact scientific sense, only those constituents of the foods consumed which are actually assimilated are considered foods, the remainder being waste. Water may be regarded as the most important of foods, constituting nearly 70 per cent of the human body. It is an absolute necessity for the maintenance of life. The average weight of water consumed per day, only part of which is assimilated, exceeds the dry weight of all the other foods combined.

### Patchwork Quilts

Patchwork is older than history, originating doubtless through primitive economic need of utilizing scraps of cloth. It was one of the first decorative arts practiced by such ancient civilizations as the Egyptian and Chinese. In Europe it was flourishing at the time of the Crusades when applique was employed in the making of battle banners and draperies. In America the handcraft arrived with the earliest settlers, being a direct heritage from England.

### Most Widely Used Word

The world's most widely used word is "Amen," the old Hebrew expression meaning "So it is" or "So be it." It is employed by nearly one billion Christians, Jews and Mohammedans, or just half of the population of the world, says S. D. Kent, Seattle, in Collier's Weekly. The Mohammedans even end their letters and other manuscripts with it.

### The "Cool Spell"

Geologists state that the earth has been having a period of cool summers for the last 4,500 years. This "cool spell" will last for 6,500 more years.

### An Early Passion Play

A Passion Play was performed in Lucerne as early as 1470 in the Weinmarkt square. Clergymen and town councilors played the chief roles.

### Oat Straw Best, Most Nutritious for Stock

Much straw will go into the mangers, rather than into the stalls, on farms this winter, because of the unusual scarcity of hay and the better roughages. Feeding straw to live stock is not new, however, as straw has long been used as roughage for horses, cattle, and sheep.

A. L. Harvey, animal husbandry division, University farm, St. Paul, says the feeding value of straw differs widely. Oat straw is the best and most nutritious. Its stems are softer and more pliable than those of the other cereals. Oat straw has about as much total digestible nutrients as corn stover, but only about one-half as much digestible protein. Barley straw is second in feeding value, followed by wheat and rye straw.

On farms where hay or corn stover is available as roughage, it would be preferable to use the straw for bedding or to use it in limited amounts as part of the roughage for wintering stock. On farms where there is a limited amount of hay or corn stover, straw can be used successfully as the sole roughage.

Because straw lacks the protein so necessary for growing animals, it should not be fed extensively to them. It had better be fed to idle work horses, dry cows, or other live stock requiring maintenance only during the fall and winter.

### Coyotes May Be Beneficial Instead of Doing Damage

Suffering from the results of a bad reputation which he has been building up for a period of years the coyote finds that he is a pretty badly treated animal, says Pathfinder Magazine. The average human is pretty apt to act without making a very thorough investigation and therefore the coyote is shot at on sight, trapped and poisoned. Scientists at the bureau of biological survey, however believe only what they see and so have made a little investigation into the private life of the coyote. They have found that in many localities instead of preying on poultry, young live stock and wild game and doing things generally detrimental to the farmer he does him a service. In these particular regions the animal lives almost exclusively on rodents which are enemies of the farmer.

### Feed for Dairy Cow

Feed for a dairy cow depends upon the individual animal but as a general rule each cow will require two tons of legume hay, two acres of pasture, 16 bushels of corn, 16 bushels of oats, and 600 pounds of cottonseed meal. Where wheat bran is available this may be substituted for a part of the oats, pound for pound. Good producing animals are necessary for profit and the herd should average between 250 and 300 pounds of butterfat to the cow. If this average is not maintained then the animal is not paying for her feed and should be taken from the herd.

### F. H. DeATLEY CO. WINS EXCAVATION CONTRACT

By the time University of Idaho students attend their first classes next Monday morning dirt will be flying at the rate of 12 cubic yards a crack on the site of their new stadium.

Meeting in Boise Tuesday the board of regents of the university accepted the bid of the F. H. DeAtley Co. of Lewiston to move 115,000 cubic yards of dirt at 14.99 cents per cubic yard. Bids ranged from the low of the Lewiston concern to 24 cents per cubic yard. All excavating will be completed by December 1, according to President M. G. Neale. Building materials for the stadium, to be of the horseshoe type with a seating capacity of 25,000, will be brought to the site as soon as possible after excavation is completed. Construction will proceed as weather conditions permit.

To move this enormous pile of dirt the contractors will use dirt moving equipment like that used on Grand Coulee dam. Three shifts, working with 100 h. p. tractors and (le tourn-eau) dirt moving machines, each carrying 12 cubic yards, will work 21 hours a day. All of the dirt moved will be used in building footings for the stadium and the large playfield adjoining it on the open end.

Deepest fill on the project will be 45 feet and the deepest cut 41 feet. Fills are to be made in layers of not to exceed 12 inches deep, each layer to be thoroughly compacted before the next is applied. This assures a solid footing so that construction of the stadium will not be held up for the natural settling of the ground. Compacting the dirt with heavy power machinery also will mean that it will occupy 15 per cent less space in its new location than it did in the old. The 31 tiers of seats will rest directly on the compacted ground, eliminating all frame understructure, which will give the university a stadium of the

safest possible type. Stadium and playfield will total 208,000 square feet. This entire area will be tile drained. The rich top-soil involved in the excavation is to be preserved and spread out over the surface of the area to assure a good turf. A 10-acre parking space for automobiles is to be provided west of the stadium.

The board also approved the appointment of Robert F. Greene as manager of the new student union building, formerly the Blue Bucket Inn. This responsibility will be in addition to Mr. Greene's duties as proctor of men. Robert Middleton was appointed assistant proctor of men to help Mr. Greene manage Lindley hall. Middleton will have charge of the feeding of the 200 men who will be quartered in Lewis court but will eat at Lindley hall.

### A Jig-Saw Puzzle

Exact relationship between alcoholic indulgence since repeal and the toll of traffic accidents, between increases in the liquor trade and decreases in other lines of industry directly affected thereby, is, at the present moment, like a badly scrambled jig-saw puzzle. Up to this time, no adequate effort has been made on a nationwide scale to gather facts and statistics to accurately determine the effects of repeal.

Scattered statistics show increases in drunken drivers in some states, gains in the number of women arrested for drunkenness in large cities, and a slump in the coffee trade; a decrease in the cost of drunkenness control, and an increase in federal revenues; but up to this time only a smattering of such material is available.

A much more exhaustive and far-reaching survey is needed in order that the jig-saw puzzle of repeal may be placed together.

See the home merchant first.

# ADVERTISING - is the "Public's Screen"

INSTINCTIVELY the public turns to it for word of your offerings, whether they be merchandise or your services. It's a "spotlight" no business man can dodge and hope to prosper . . . yes, the only "screen" on which he can make his appeal for trade. And if you think it doesn't "talk and GET RESULTS" just try:

Three Auto Fatalities

Mrs. Linnie E. Flanary, about 30 years old, a resident of Lewiston, was instantly killed when the new sedan she was driving crashed into the rear of a truck that had stopped to make some adjustment, about five miles south of Uniontown, Wash., on the Inland Empire highway. The impact was so great that the cowl of the car, Mrs. Flanary was driving was forced under the rear of the truck bed. The front of the car was smashed and Mrs. Flanary caught in the seat. The striking force was so great that her feet were drawn from her oxfords and these rested against the pedals where she had placed them. All signal lights on the truck were reported as burning when the crash came.

Too much speed while trying to negotiate a turn on the Kamiah highway, a mile and a half northeast of Nezperce, about 3 o'clock Monday morning, was given as the cause of the loss of two lives and serious injury to two others, said the Lewiston Tribune. Those killed and injured in the last instance were all Indians. They were driving an old touring car that had been made over into a "pick-up". The machine careened off the highway, smashing a telephone pole and fence posts, landing in a field after it had turned over.

Predatory Animals Reduced

Idaho coyote trails aren't as congested as they once were. WPA hunters and trappers reduced the population 3,530 since January 2. The crews also took seven bear, 191 bobcats and six mountain lions. The animals were trapped, poisoned, shot, snared or killed in dens.

Notice for Publication

Notice is hereby given that on August 29th, 1936, James H. Nesbit, who gives Avon, Idaho, as his Post Office address, filed in this office his formal application to exchange: T. 41 N., R. 2 W. B. M. Sec. 23-E 1/2 NE 1/4, SE 1/4 Sec. 24-W 1/2 NW 1/4 for timber of equal value to be cut from a portion of Section 32, T. 53 N., R. 1 W. B. M.

This notice is to allow any and all persons, having or claiming to have any interest in the lands offered or the timber to be cut, or desiring to protest or contest the legality of this exchange for any reason, to file their affidavits of protest or contest in the office of the Register of the United States Land Office at Coeur d'Alene, or before October 5th, 1936.

ARTHUR J. EWING, Register.  
1st Publication Sept. 4, 1936  
Last Publication Sept. 25, 1936.  
ORDINANCE NO. 230

Entitled an ordinance relative to the issuance of licenses to traveling shows held outside of local show houses.

BE IT ORDAINED by the Board of Trustees of the Village of Kendrick, Latah County, Idaho, Section No. 1. That Section No. 2 of Ordinance No. 112 be changed to read that all traveling shows, medicine shows, performances, (etc.) held outside of local show houses, shall be required to pay a license fee of \$25.00 per day, excepting Dog and Pony shows, which shall be required to pay a license fee of \$5.00 per day.

Section No. 2. That this ordinance shall be in full force and effect from and after its passage, approval and publication.

Last pub. Sept. 25, 1936.

NEW VISIBILITY METER FOR USE IN FORESTS

Another step forward in the use of scientific instruments developed specifically for use in forest fire control is made with the installation of a new visibility meter on each of nine National forests in western Montana and northern Idaho, just having been completed. The visibility meter is a small, optical instrument which determines the distance at which a lookout may be expected to see the smoke of a small fire under the atmospheric conditions existing.

Installations on the Lolo and Bitterroot National Forests were made by H. T. Osborne of the Northern Rocky Mountain Forest and Range Experiment Station. For the Flathead, Kootenai, Kaniks, St. Joe, Clearwater, Nezperce and Cabinet National forests the installations were made by D. B. Brown, general science instructor at Missoula County high school, employed for the purpose jointly by the experiment station and Region One of the forest service.

The race against fires in the forests is not greatly different in principle from the 100 yard sprint in track-meets. A great deal depends upon a split second start as well as sustained speed after the runner gets under way.

Detection of a fire while it is still very small is the "sprinter's start" in forest fire control. On days of good visibility, a lookout will be reasonably sure of sighting a small smoke 10 or more miles away. On other days, a similar smoke only four or five miles distant is likely to escape detection until much greater volume—meaning greater burning—makes itself apparent.

The condition of visibility is one of the factors in measuring forest fire danger. Additional guards are necessary in the forests as visibility range decreases, in order to detect fires while they are small.

The visibility meter just installed is the invention of Dr. G. D. Shallenberger and Dr. E. M. Little of Montana State University. They undertook the study of visibility questions under the employment of the Experiment Station a couple of years ago. The development of the meter resulted.

Human Hog Consumes 366 Apples

Tony de Laurentis, Hathboro, Pa. barber famed for his appetite, put on his annual apple gorge last week for residents of the Montgomery county town.

He consumed 366 run-of-orchard apples in an elapsed time of two hours and six minutes, with 18 minutes out for photographs.

Three or four hundred persons stood in the street while Tony munched in his shop window. Four men pored and quartered the apples and tossed them into a bowl of tepid water. Tony grabbed a handful at a time, crushed them in his huge hands to squeeze out the juice, then stuffed them into his mouth.

All this came two hours after a breakfast which he said consisted of six soft-boiled eggs, a pound of fried ham, a quart of wine, a half package of cereal and three cups of coffee.

After the disappearing apple act Tony said he was looking forward to dinner in two hours.

Hobbies

There are many kinds of hobbies. In one or another of which people find recreation and enjoyment. Here is suggested a new one, which is recommended for the attention of a certain class of motorists:

Clip the stories of motor accidents from the daily papers each day for a month, and paste them in a scrap book after cataloging them with respect as to how they were caused. They'll show that by far the most of the accidents could have been avoided by observance of the traffic laws by drivers. Grade crossing accidents, most horrible of all, can generally be traced to a lack of watchfulness, though it will be found that some moronic drivers deliberately try to beat the train. Collisions are for the most part caused by somebody's carelessness or incompetency. Anyway, it would be a good hobby for some of the drivers that every careful motorist has met up with at one time or another, and might have a reforming influence on the hobbyist. —Latah County Press (Troy).

Getting In The Hair

As a means of boosting beer consumption, a national publicity bureau for the brewers has just sent out a news release recommending the amber fluid as useful in setting the wave in midday's coiffure. "Some people think the darn stuff has been getting in the women's hair too much as it is, without pouring it on their skulls," says one critic. "Anything for beauty," says another.

Tongue twisters have always been amusing, but we have one that we guarantee will send any party goofy. All that is needed is a few drinks and the most amazing things will result from attempting to master the following: "A skunk sat on a stump. The skunk think the stump stunk and the stump think the skunk stump." —Jester.

A Threadbare Subject

There have been hundreds of columns of newspaper space used up on the unemployment situation—some giving ways and means of solving it and others wondering what has become of all the billions that have been set aside for the purpose of taking care of those who want to work but have no jobs.

A look at any freight train these days will tell anyone that the unemployment situation is just about as badly out of joint today as it has ever been, for these trains are literally covered with "bums"—some of whom would work if they could find something suitable to their temperament, but the large majority of them would not work if they had an opportunity. The wanderlust has gotten into them and there are thousands riding freight trains in every part of the country who undoubtedly used to work for a living, while now it would seem that they board the first freight train that comes along—no matter which way it is headed. They keep moving for fear a job might catch up with them if they stayed too long in one place. They wander aimlessly, as if a nest of ants moving their larvae, only an ant has a general direction in which to travel.

Their main object, seemingly, is any old direction, just so they can keep away from work and eke out an existence by begging something to eat and wear—knowing that when winter comes Uncle Sam will feed and clothe them—in transient billets.

Beware Of Hitch Hikers

It would seem that hitch hikers are again becoming rather numerous—and some people just can't keep from feeling sorry for them and offering them a ride in their car or truck, but it is a good idea to pass them all up, then one will be sure to keep out of trouble from that source.

The following incident, taken from the Lewiston Tribune, is one of mild form, but nevertheless a crime was committed:

It will be a long time before C. N. Archer, Glenn Jones and Walter Crawford give a lift to another hitchhiker. Their experience caused them to lose confidence in folks thumbing their way along the highway. The youths were traveling home from a visit at Boise and Weiser. Near Weiser they saw Ed Chalgren, 24, trudging along the highway and gave him a ride. Chalgren was furnished several meals on the trip and otherwise provided for.

At Dayton, Wash., after Chalgren had taken his departure, the young men asserted they missed some of their wearing apparel from a suit case. Suspicion attached to the man they had befriended. They located

Church Bids Due

Final authorization for the restoration of the historic Spalding church, where Henry Harmon Spalding first preached the gospel to the Nez Perce Indians nearly 100 years ago, was received at Lewiston by the Rev. Dr. L. C. McEwen, chairman of a committee which has been working toward that goal for several months, from the Rev. Dr. E. Graham Wilson, New York, secretary of the board of national missions of the Presbyterian church. Dr. McEwen announced the bids are being received and work will be started on the building at once.

Following plans outlined by the Rev. Dr. McEwen and approved by the Rev. Dr. Arthur L. Limouze and the Rev. Dr. John M. Somerndike, the main part of the old building will be restored with a veneer brick exterior. The interior will be plastered throughout and hardwood floors will be laid.

At the rear a 20 by 40 foot addition will be made with a basement excavated for a heating plant and fuel storage space. The grounds will be graded and completely landscaped.

The first floor will house an assembly and dining room 20 by 30 feet and a kitchen 10 by 20 feet. Classrooms will occupy the bulk of the second floor. Work is expected to be completed next month, according to the Rev. Dr. McEwen.

Working with him on the restoration committee have been W. Porter Shafer and Floyd S. Brown, Lewiston; the Rev. James Dickson, Sam Waters, Josiah Redwolf and David Arthur.

Beaver Work Overtime

Junction, Tex.—John Tanner, who operates a 1,215 acre irrigated tract near here, recently cut a hole in a beaver dam on his place on the South Llano river.

He placed an electric light at the point, believing beaver would work at night to repair the dam. They kept on working and filled in the hole.

Tanner took down the light, saying he was not going to furnish electricity for beaver to work overtime.

"Hey, Jake, where are the old cuspidors?"  
"I threw them away."  
"Gosh, I'm going to miss them."  
"You always did."

HAROLD THOMAS, Editor

### EDITORIAL

Well, folks: Here it is wet and cold, with snow having fallen already in the high spots—and the big game hunters polishing up their gas-pipe specials to go out and chase the wiley elk about the landscape—but be that as it may—we still can't afford to overlook the possibilities of a fine income from cream. If you doubt it, just bring us a can and let us do the rest. We're prepared to give you the service you have a right to expect—plus right-now payment. We also return a steam-sterilized can—one that does not reek of washing chemicals. Try us.

Half a peanut, a scientist declares, will furnish enough mental energy for a half hour's thinking, but skiff and cautious stoking is required. We believe a brain-truster probably ate a whole one and his brain boiler burst, if all the stuff we read about drought control is an example.

Nurse: "I think he is regaining consciousness, doctor; he tried to blow the foam off his medicine."

Junior: "Daddy, what is dew?"  
"The rent, the note at the bank and the installment on the car."

## We All Like a Piping Hot Cup of Coffee

TO START THE DAY WITH A "BANG" THESE CHILLY MORNINGS. AND WHAT GOES BETTER WITH A BREAKFAST — LIGHT OR "HEAVY" THIS KIND OF WEATHER THAN A PIPING HOT CUP OF COFFEE. fast creek.  
Harry Langdon of American ridge spent Friday night at the Arley Allen home.

Miss Blanch Harris spent a few days last week with Jean Fry in Kendrick.

Jimmy Carmin returned to Spokane last Saturday after spending the summer at the Addison Alexander home.

The first snow of the season was seen Monday morning when Tamarac mountain was white, the snow reaching far down the hillside. It makes us realize that winter is just around the corner.

Mr. and Mrs. Austin McCoy of Southwick have recently purchased Mrs. Millie Abrams' place and have taken possession.

Mrs. McPhee and Mrs. Edgar Bohn and daughter Alfrida spent Sunday with Mr. and Mrs. Arthur Foster.

Mr. and Mrs. Chas. Keeler and son John spent Sunday with Mr. and Mrs. Ted Vaughn.

Jim Cuddy went to Juliaetta Sunday, where he will attend high school.

John Keeler is attending high school in Kendrick.

Donald Kuykendall of Kendrick is staying with Mr. and Mrs. Lester Weaver and going to school with their son, Theodore.

(Delayed)

Mr. and Mrs. Earl Gaskill and Mr. and Mrs. Arley Whybark left Thursday afternoon for Huntington, Indiana, to attend school.

Several from the ridge attended the sale of Mrs. Hayward at Southwick on Tuesday.

Mrs. Matilda Garner came over from Southwick Tuesday to visit Mrs. Mattie Garner and family.

Miss Marjory Riebolt of Grangeville has returned to spend the school year with her aunts, Mrs. Addison Alexander and Mrs. Etta Dicks, and attend school here.

Billy and Teddy Weyen entered high school at Kendrick Monday.

Mr. and Mrs. Frank Lyons and small children were Lewiston visitors Saturday.

Mr. and Mrs. Allen Hudson and daughter and son of Seattle and Ersel Hudson of Springdale, Oregon, arrived Thursday to attend the funeral of their mother. Mr. and Mrs. Allen Hudson returned home Sunday while Ersel stayed for a longer visit with his brother, Elmer and family.

Mr. and Mrs. J. H. Hunt are visiting relatives in Missouri.

School opened Monday with Mr. Jenkins of Lewiston as instructor. There are 26 pupils attending this year.

Mr. and Mrs. Jenkins and four children are living in the Ray Cuddy

house on the Mattson place, recently vacated by Mr. and Mrs. Ray Butler when they moved to Mrs. Lena Gilman's place.

Mr. and Mrs. Richie have moved to Juliaetta to make their home.  
Sunday, August 30, Mr. and Mrs. Walter Hunt had a family reunion at a picnic on Cedar creek. Every member of the family was present. They were: Mr. and Mrs. Walter Hunt, Mr. and Mrs. Eldie Hunt and family, Mr. and Mrs. Denzil Hunt and family, Mr. and Mrs. Jim Farrington and son Everett, Mr. and Mrs. Fred Zimmerman and family, Mr. and Mrs. Jake Peterson and family of Lewiston, Mr. and Mrs. Lorin Bartlett and daughter, Mr. and Mrs. Wayne Bartlett, Hayse, Howard, Gilbert, Ruth and Louis Hunt.

Grain threshing was finished last week, except for Dan Whybark and son Raymond, who own and operate their own machine. They will finish this week.

Bean threshing is in full swing this week, with W. H. Weyen's and Ramie Hunt's machine. The weather is ideal and the beans seem to be yielding very good.

### CAMERON NEWS

Mrs. August Meyer visited in the Carl Wegner home Saturday afternoon.

Mr. and Mrs. A. O. Wegner and family visited Sunday afternoon in Kendrick.
