U. S. WHEATS MAKE RAPID RECOVERY FROM SET-BACK

Domestic grain markets fluctuated within narrow limits during the week ended. April 22, states the Weekly Grain Market Review of the Bureau of Agricultural Economics. Wheat markets continued particularly sensitive to crop developments with generally favorable prospects in North America about offset ting prospective drought damage in Italy and North Africa. Oats was independently firm as a result of a more active inquiry. Barley held about unchanged. Winter wheat in the United States

of-town folks haven't anything to made rapid recovery from the redo, just take a drive down Potlatch cent, set-back aided by warmer weather and beneficial moisture but some permanent injury resulted from early April frosts in Oklahoma, Texas; and southern sections of Kansas where the crop was well advanced. Rain was still needed in portions of the northern great plains but elsewhere in the west winter wheat was generally reported in excellent condition. The crop made excellent growth in most of the Ohio valley although _occasional .. yellow spots were reportetd in low wet land. Seeding of spring wheat was near-ing completion in Minnesota, North and South Dakota, with early sown grain up to good stands in South Dakota. Seeding in Canada was extending gradually from Manitoba and southern Saskatchewan to the west and north, with surface moisture

favorable to germination. India has again harvested wheat-crop in excess of domestic requirements and liberal offerings of new Indian wheat are competing with United States wheat at Livers pool. The quality of the new crop is reported generally good with grains well filled and of satisfactsix weeks.

The rate for the sale of power to zation of wheat in India is norm. world markets.. During the past two seasons, however, exports have shown substantial gains.

Marketings of domestic wheats increased sharply during the third week in April with arrivals at the principal terminals, totaling 3,000,000 bushels. Stocks of wheat remaining in country mills and elevators at the first of April were officially estimated at 73,075,000, bushels compared with only a little over 39,000 000 bushels a year ago. Stocks on farms at the first of April were placed at 124,883,000 bushels while tocks in terminal markets total 54,426,000 bushels, giving a total in these three positions on 252,384,000 bushels, compared with 145,213,000

bushels a year ago Data on merchant stocks at the first of April are not yet available. Marketings of winter wheat were about double those of the previous week with arrivals at the principal: terminals reported at 1,408 cars. With continued favorable prospects for the new crop growers were more inclined to dispose of remaining stocks. Demand for cash grain was fairly active from mills and elevat-or interests and premiums held about

unchanged se of spring wheat in-creased slightly with 241 cars reeived at Minneapolis and 144 cars unloaded at Duluth Premiums advanced 1c to 2c perabushel on 15 per cent protein or better. A steady demands prevailed for high grade wheat for shipment via Duluth where cargoes of high protein wheat were being made up for Lake shipment to Eastern mills.

Durum wheat declined about 1c per bushel and the May future at Duluth closed April 22 at 7%c. The bulk of sales of durum at Minneapolis ranged from 18c to 25c over the Duluth May price with an occasional car bringing as much as 33c premium over the May.

Intermountain and Pacofic coast markets fluctuated with local supply and demand conditions. At the close of the week, Denver mills were bidding 67c per bushel FOB Colorado common points for No. 2 hard winter and No. 2 northern spring. At Ogden, local mills were bidding 62c for No. 2 soft white, 60c for No. 2 hard white and 59c per bushel for No. 2 northern spring and hard winter FOB Utah-Idaho com-

mon points. At Portland, No. 1 hard white, 12 per cent protein, was quoted at 84c with soft white and western white at 82c and western red at 81c per bushel, all basis No. 1 grade sacked. Receipts at Puget sound and Columbia river terminals dropped to 580 cars, much of which were deliveries on earlier sales. Demand generally was slow, with mills confining purchases to special protein lots for immediate needs. Export business included several parcel lots and totaled around 5,000 tons for the

California markets were slightly weaker with central California growers offering more freely from relatively large remaining supplies and with buyers in southern California awaiting early movement of new wheat from the Imperial valley.

Abundant supplies of green feed restricted demand for feed wheat. Local prices were generally too high for sale to exporters or to other domestic markets. At the close of the week No. 1 hard white was quoted at San Francisco at 85%c to 87c, No. 1 soft white at 72½c to
