DE ATLEY IS LOW BIDDER ON ROAD

F. H. DeAtley & Co., Lewiston, was successful bidder for the con-struction of 5.929 miles of highway highway south from Juliaetta with a low bid of \$97,499, according to \$139,569. The project includes construction of roadbed, drainage and

crushed gravel surfacing. Residents of the Juliaetta and Kendrick districts, working with leaders of the Lewiston Chamber of Commerce, have for years been urging completion of the Juliaetta-Aring completion of the Juliaetta-Ar-row stretch of highway to permit Liverpool for August shipment at traffic in that area to flow to the Lewiston trade center. Two years ago the James Crick Co. completed the contract for grading the 312 miles now being used, between the two points.

The contract let yesterday calls for completion of the highway be-tween Juliaetta and Arrow. The contract will start at the end of the Crick_project and extend through Juliaetta, according to Clyde Hum-phrey, Lewiston district highway engineer. Specifications call for a 30foot subgrade with a 24-foot finished roadway. New alignment revisions have been made and the proposed route now follows the railroad track. Elimination of Indian right of way difficulties has enabled the letting of the contract, said Engineer Hum-

phrey. Contracts are expected to be let on three more projects in the Lewis-ton district within a short time, said Engineer Humphrey. These include the Bundy school-Culdesac stretch providing for underpasses along the Palmer from waterioo, lowa. P. C. DOMESTIC WHEAT DOWN; DUE TO FOREIGN DROP

NO. 30.,

Domestic grain markets continued on a downward trend during the week ended July 21, influenced by "Chic Sales Specials" that occupied favorable crop prospects, abundant a place of prominence just behind supplies of old grain, and weaker it. tural Marketing Service in the Weekly Grain Market Review, Pressure of offerings of subsidized e ports and a slow European demand forced Liverpool prices to the lowest point in history. This, together with large remaining stocks of old wheat and favorable prospects for North American spring wheat, was principally responsible for the weakness in the domestic market. Oats were slightly lower, while barley held at about the previous week's level.

The general wheat situation be came quite weak under continued pressure of North American and southern hemisphere offerings. The world stocks of old wheat are unusually large and from present inan Associated Press dispatch from dications the increase in the carry-Boise. The engineer's estimate was over of old wheat will more than over of old wheat will more than offset the prospective decrease in the 1939 harvest. As a result of this situation, demand from im-porting countries was dull and the prices at Liverpool dropped to the lowest point on record. At the close of the week, United States No. 1 54c, Australian wheat afloat at 55c; No. 3 Canadian Manitoba from Atlantic ports at 601/2c and Argentine and French wheats at 49c per bushel.

> Spring wheat continued to make favorable progress both in the United States and Canada. However, some deterioration in the Canadian prairie provinces resulted from a week of high temperatures and very little precipitation. Early sown wheat fields in central and southern districts on Manitoba and Saskatchewan were badly burned and filling of heads was impeded. High temper-atures were also reported to have done considerable damage in western South Dakota and Montana and in some sections of North Dakota, but cooler, temperatures toward the close of the week with general rains over practically the entire area brought

material recovery. Harvesting was making progress in South Dakota and was begun in North Dakota. Wheat futures in the Pacific north-

west declined about 1c per bushel 2c to 21/2c per bushel at Portland mand for wheat and flour from this area was principal weakening influence in cash wheat markets. On July 21, at Portland, soft white wheat was quoted at 68½c; western white 67½c; western red 66½c; hard red winter 65c per bushel, all basis No. 1 grade, in bulk. Wheat receipts. at Puget sound and Columbia river terminals included some new wheat and totaled 645 cars for the week. Indemnity prices on flour for export were unchanged at \$1.15 to Philippines \$1.20 general from Pacific coast ports and \$1.25 per barrel to China. Trade reports indicated that no export sales of wheat were made from this area during the week and that export flour sales were light. Do-mestic mills furnished principal outlet for current market offerings of wheat. At Seattle, western white was quoted at 68c, western red 67c, hard winter 65½c and 12 percent protein hard white (baart at 70c per bushel, in bulk. 16 percent protein dark northern spring from Montana was quoted at 83c per bushel in bulk. Barley markets in the Pacific Northwest declined again during the past week in further adjustment toward a new crop basis. No. 2 bright western barley weighing 45 pounds per bushel dropped 5c per 100, and was quoted July 19, at \$1.05 per 100, sacked basis. At Seattle eastern Washington white barley was quoted July 19 at \$1.00 per 100, sacked. Twelve carlots of barley arrived in Portland while nons were reported in Seattle during the period. Crop prospects are reported day morning at Troy, in the home very good in the principal barley of her son, Wm. Gephart. Funeral services were held this morning west and this was an important weakening market influence. Oats markets also declined in the Pacific Northwest along with barley and other grains. Prices at Portland were 5c per 100 lower for the week with No. 2 white oats quoted July 20, at \$1.20 per 100, sacked. No. 2 gray oats remained only nomi-nal. At Seattle, eastern Washington white oats were quoted July 19 at \$1.25 per 100, sacked.

Why Not Build More

According to the news dispatch appearing on the front page, and announcing the giving of the road contract to F. H. DeAtley Co., Lewiston, for the construction of the Arrow-Juliaetta link of the Arrow-Deary highway, the contract was let for some \$40,000 less than the engineers estimate. Since, as we understand it, the egineers estimate is the amount the state is willing to spend on a given section of road, the state has some \$40,000 left in its pockets that it expected to spend.

We are wondering why this \$40,-000 can't be used to construct that many more dollars worth of road in the direction of Kendrick.

We realize that that amount would not put the road through Kendrick to the Bear Ridge link, but at least it would make a fine start, including the necessary bridge at the outskirts of Kendrick - equipment and men will be on the job — why not make a continuation of the contract? Surely the rate could not be too high, taking the other bid as a basis

The more road we build today, the less we have to build tomorrow.

Swine Enteritis

Necrotic or infectious enteritis is a wide spread disease affecting all breeds. Pigs under six months are the most commonly affected. This disease belongs to the group known as "filth born" diseases and is commonly found in dirty and long-used hog lots. The disease attacks the intestines causing an inflamation of the membrane lining. This in turn causes a diarrhea which is usually one of the common signs of infection

At first the appetite of the pigs may not be affected, but as the disease continues the desire for food may be decreased, and the animals generally show signs of unthriftiness. The skin becomes harsh, dry and wrinkled. Many of the infected pigs die from

Well, Folks - Here it is the end of the last week in July, and harvest has started with a and harvest has started with a real bang. The hot weather of the last few days has surely brought on the crops with a rush —and when the crops ripen the harvest work both in the field and in the kitchen really begins. The man in the field has no time to think of the things on time to think of the things on the table—that is woman's prob-lem — and a real problem it often turns out to be, for the feeding of hungry men is no child's play.
