

KENDRICK GAZETTE

KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, APRIL 4, 1940

NO. 14

WHAT HAPPENED HERE 20 YEARS AGO THIS WEEK

Kendrick Court Proceedings—An automobile agent drove into Kendrick last week too late to get his car into one of the garages. He drove it along the sidewalk, parked it in front of one of the buildings on the parking strip along the sidewalk and the curb. The next morning he was arrested and taken before Justice of the Peace Judge Stanton, being of a doubtful mind, asked to see the evidence that covered the case. The evidence book was produced before him. It was contained in the evidence concerning motor vehicles. The ordinance was evidently passed before motor cars were commonly used. The auto agent said he had the license, the night he drove in, and that his car frozen fast in the mud. He chose the latter of the two ways.

Stump of Southwick last week purchased a five-acre tract in Clarkston. The property is located on Abby street, west of 18th. The tract is said to have been purchased for \$40,000. Mr. Stump expects to build a house on his new property with the expectation of making it his home.

Various kinds of weather visited Kendrick Tuesday. At times it had the appearance of spring; then the temperature would drop as the sun hid behind a cloud. The next minute it would be raining, snowing or blowing. Along with it came a dust storm. Along toward evening it rained hard, which was the ending of a perfectly punk March day.

Review News—Mr. and Mrs. T. J. Flesham made a business trip to Lewiston Sunday, returning Tuesday.

Mr. and Mrs. J. L. Glenn were in the city visitors Tuesday. Mr. and Mrs. Glen Flesham visited relatives in Clarkston last week. Miss Lola Fitzpatrick spent the week-end in Welppe with friends.

Mr. and Mrs. Marvin Vincent and Chester were Sunday dinner guests of Mr. and Mrs. Alex Larson.

Mrs. Herman Johnson has been caring for her mother, Mrs. Julia Flesham, who has been ill with flu.

Mr. and Mrs. Floyd Crocker and Elgin Flesham called at the Oral Craig home Sunday evening.

Herman Beyers left Sunday for St. Maries.

Miss Betty Lueth and Elwin Flesham called on Mrs. Laurel Flesham and Mrs. Lloyd Craig Sunday evening.

Laurel Flesham and Lloyd Craig left for Kellogg Sunday.

Little Russell Smith spent the past week with his grandparents, Mr. and Mrs. Harry Smith.

Mr. and Mrs. Donald Morgan were Sunday guests of Mr. and Mrs. Chas. Hoffman.

Mrs. Emma Cook has been quite ill the past week.

Mr. and Mrs. Marvin Vincent were Lewiston visitors Monday.

Mr. and Mrs. Golden Hylton spent Thursday with Mrs. Hylton's mother, Mrs. Grace Cole.

Mr. and Mrs. Clifford Powell and family were Sunday dinner guests of Rev. and Mrs. J. E. Walbeck.

Mr. and Mrs. Clifford Powell and family were Sunday dinner guests of Rev. and Mrs. J. E. Walbeck.

Mr. and Mrs. Ben Hoffman and family spent Sunday with Mr. and Mrs. Allen Hoffman.

Mr. and Mrs. Walter Crawford and Mrs. Jennie Hund were Sunday guests of Mr. and Mrs. Kenneth Hund of Lewiston.

Rev. and Mrs. J. E. Walbeck called on Mr. and Mrs. L. L. Yenni Friday evening.

Mr. and Mrs. Fred Arnold and Mrs. Harry Smith and Beatrice were Lewiston visitors Saturday.

Charlie Thornton is visiting his father, Royal Thornton.

Baseball Meeting

Friday evening of last week a baseball meeting was held in the City hall, with quite a number of interested citizens present, and an organization for the summer worked out.

R. L. Blewett was elected manager, and a board of directors, consisting of Geo. Brooks, Wade Keene, Fred Newman, Ted Mielke and Roy Ramey also elected, with Roy Ramey being installed as secretary and treasurer.

If possible, it is planned to hold all home games on the Kendrick diamond. It is also hoped that the local team may join the Lewis-Clark league, as was the case last season.

DOINGS OF LELAND FRIENDS AND NEIGHBORS

Mr. and Mrs. Ed. Flesham, L. L. Yenni, Leo Peters, Marvin Vincent, Mr. and Mrs. Lloyd Craig, Mr. and Mrs. Oral Craig, Mr. and Mrs. Laurel Flesham and family and Mr. and Mrs. Herman Johnson were among the Lewiston visitors last week.

Mrs. Marvin Vincent and Chester are spending the spring vacation with Marvin Vincent.

Mr. and Mrs. Roy Craig and Marvin Vincent spent Wednesday with Mr. and Mrs. Lloyd Craig.

Mrs. O. A. Walker and son Neal and Mr. and Mrs. Orval Walker called at the Floyd Flesham home in Clarkston Saturday.

Miss Lola Fitzpatrick spent the week-end in Welppe with friends.

Mr. and Mrs. Marvin Vincent and Chester and Mr. and Mrs. Ed. Heinrich were Sunday dinner guests of Mr. and Mrs. Alex Larson.

Mrs. Herman Johnson has been caring for her mother, Mrs. Julia Flesham, who has been ill with flu.

Mr. and Mrs. Floyd Crocker and Elgin Flesham called at the Oral Craig home Sunday evening.

Herman Beyers left Sunday for St. Maries.

Miss Betty Lueth and Elwin Flesham called on Mrs. Laurel Flesham and Mrs. Lloyd Craig Sunday evening.

Laurel Flesham and Lloyd Craig left for Kellogg Sunday.

Little Russell Smith spent the past week with his grandparents, Mr. and Mrs. Harry Smith.

Mr. and Mrs. Donald Morgan were Sunday guests of Mr. and Mrs. Chas. Hoffman.

Mrs. Emma Cook has been quite ill the past week.

Mr. and Mrs. Marvin Vincent were Lewiston visitors Monday.

Mr. and Mrs. Golden Hylton spent Thursday with Mrs. Hylton's mother, Mrs. Grace Cole.

Mr. and Mrs. Clifford Powell and family were Sunday dinner guests of Rev. and Mrs. J. E. Walbeck.

Mr. and Mrs. Clifford Powell and family were Sunday dinner guests of Rev. and Mrs. J. E. Walbeck.

Mr. and Mrs. Ben Hoffman and family spent Sunday with Mr. and Mrs. Allen Hoffman.

Mr. and Mrs. Walter Crawford and Mrs. Jennie Hund were Sunday guests of Mr. and Mrs. Kenneth Hund of Lewiston.

Rev. and Mrs. J. E. Walbeck called on Mr. and Mrs. L. L. Yenni Friday evening.

Mr. and Mrs. Fred Arnold and Mrs. Harry Smith and Beatrice were Lewiston visitors Saturday.

Charlie Thornton is visiting his father, Royal Thornton.

INTERESTING NEWS ITEMS FROM KENDRICK SCHOOLS

Senior Play
"China Boy," the play which the Senior class has been working on and worrying about for quite some time, was presented Monday evening, April 1, to a full house in the Kendrick Theater. All knew their parts very well and everyone who saw it thoroughly enjoyed it.

The play was directed by Mrs. W. B. Deobald. The cast and additional entertainment was as follows: Mrs. Parker, a somewhat harrassed mother, Marie Havens; Mr. Parker, her husband and principal of the local High school, Kenneth Wolff; Annie, their maid of all work young but not bright, Maxine Bigelow; Bill Parker, their seventeen-year-old son, Lloyd Farrington; Selma Parker, their sixteen-year-old daughter, Myra Kanikkeberg; Bob Troutman, Bill's school chum, Pete Stump; Lulu-Mae Robinson, a twelve-year-old terrorist, Darlene Cardinal; Charlotte Mack, a wealthy Miss, Barbara Long; George Robinson, meanest boy in town, Vern Wegner; Mark Willis, a very young philosopher from China, Ray McGraw; Radio Announcer, Sidney Ciemenhagen.

Between each of the acts the Kendrick High School band gave selections, which were much appreciated and given a good hand.

Mr. Mason Back
Our superintendent, Mr. Mason, who had been ill for almost a week, is again with us, and though it may sound as though we were trying to "polish the apple," we really mean it when we say we're glad he has returned to school. It's funny that students can miss teachers, but we have to admit we do.

Junior Prom
Since we've already told you the theme of the Junior Prom, "Fairyland," and no new ideas have been developed, there's nothing we can tell you except the exact number of animals, birds, etc., we've cut out of cardboard. Be we would rather you would come and see for yourselves. Remember the date—Friday evening, April 12.

Practice Teacher
Roy Long, student of the U. of I., has been for the past week, and will continue next week, teaching the not too bright students in K. H. S. When asked what he thought of the school, he just said, "It isn't what it used to be." Of course, we know how he means that.

Vacation
Wednesday, Thursday and Friday of this week the Kendrick schools have been enjoying vacation. But not the teachers. They all went to Teachers' Institute in Spokane. The faculty, along with the rest of the school, is looking forward to summer vacation. Imagine! Only six weeks left.

University To Receive Bust
A bronze bust of the late Senator William Edgar Borah by one of the nation's leading sculptors will be sent to the University of Idaho soon as a gift from Mrs. Borah.

President H. C. Dale accepted the gift on behalf of the university after Mrs. Borah wrote that she would like to add it to the late senator's bequest of books, documents and personal letters. A total of 18 mail pouches and six large packing cases of this material have been received by the university library to date.

The bust will be used as the central theme of the Borah collection on the main floor of the library, and will remain there until provisions have been made for the erection of the Borah Memorial library, President Dale said.

In addition to the Borah collection, the university administers the William Edgar Borah Foundation for the Outlawry of War, a \$50,000 endowment donated in 1928 by Salmon O. Levinson, Chicago corporation lawyer, world peace advocate, and admirer of Senator Borah. Proceeds of this endowment are used to bring speakers to the campus to discuss international relations. Last was Mrs. Franklin D. Roosevelt, two years ago.

Signals Are Important
Hand signals by the motorist to indicate intention of turning or stopping are important. Judging from the multitudinous movements observed, there is a wide variance in the understanding of prescribed signals, says the Bureau of Safety.

Signals are simple, and but three in number. 1—Left turn, hand and arm extended horizontally. 2—Right turn, hand and arm extended upward. 3—Stop or decrease speed, hand and arm extended downward.

The signal to turn must be given continuously for the last 100 feet traveled, and all signals given from the left side of the vehicle.

When a car is parked or standing, it may enter traffic only when the driver is assured of reasonable safety; no signal given entitles driver to right-of-way.

Was Too Persistent
Back in Wausau, Wisconsin, the other day, perseverance brought the downfall of Seth Trumbel. 18 Sheriff Gunzel said the boy told him this story:

Trumbel broke into a garage here and took a car. The car got stuck in a snowbank. He went back to the garage and took a wrecker. He backed the wrecker up to the first car. The wrecker got stuck. He went back to the garage and took a milk truck to pull out the other cars. The milk truck got stuck. He went back a fourth time and there was only one truck left. He took that. It too got stuck. He walked home—and the sheriff did the rest.

WHAT KENDRICK FOLKS DID OVER THE WEEK-END

H. B. Thompson of Colfax was a Kendrick visitor Thursday evening of last week. He attended a Masonic lodge session while here.

Almost all the local college students are home for the Easter week vacations. Among them are Frank Homer Rider, Joe Watts, Roy Long, Elmer Emery, Arlene Deobald, Tom Keene, Herman Renfrow, Rex Blewett, Chester Vincent and Nolan Weeks. Roy Long will practice teach here for a week as part of his University training.

Mrs. Eugene Garrison and children and Vere Brummond of Lewiston, spent Tuesday visiting Mrs. L. Ameling.

Mr. and Mrs. Ralph White and daughter Lorene of Lenore came Friday to visit over the week-end in the R. L. Blewett home. On Monday Mrs. H. Dunham and two sons of Culeasac came, staying until Wednesday. Mr. and Mrs. Ben Cook and family were Sunday callers and Rex is spending the vacation period here.

Mr. and Mrs. Wm. Bartlett of Gifford and Mr. and Mrs. Chas. Dismore of Wardner came Wednesday to stay until Thursday in the R. L. Blewett home.

Mr. and Mrs. Boyd Cook and family of Lenore were Sunday dinner guests in the Oscar Raby home.

Mr. and Mrs. J. E. Key of Spokane visited Sunday in the home of her mother, Mrs. N. B. Long.

Mr. and Mrs. Raleigh Smith of Mullan, Ida., spent the week-end visiting her mother, Mrs. McAllister.

Mr. and Mrs. W. B. Deobald and daughters, accompanied by Mrs. S. Cook and Alma Bailey left Wednesday morning for Spokane, returning that evening.

Wm. Fitzpatrick went to Spokane Saturday to return Sunday, driving his mother, Mrs. M. J. Fitzpatrick down for a few days' visit in the Rider home. They returned to Spokane Tuesday evening, with Miss Fattu accompanying them.

Mr. and Mrs. Clifford Davidson moved Monday to the O. E. Havens apartment. Mrs. Davidson will continue her work in Dr. Christensen's office as usual.

G. W. Phillips of Long Beach, Calif., has been visiting two days this week in the home of his daughter and family, Mr. and Mrs. Harold Thomas.

Mr. and Mrs. Lowell Mason and son Jimmie left Wednesday morning for Moscow, where Mrs. Mason will stay with her parents while Mr. Mason goes on to Spokane, where he will attend Teachers' Institute. Ross Armitage accompanied the Masons.

Mrs. Ross Armitage and children left Sunday for Koozka, where she will spend the week visiting her father, E. W. Blewett.

Last Wednesday evening Rev. and Mrs. Wm. Gray, accompanied by Mrs. Paul Lind and O. E. Havens drove to Pomeroy to attend a church fellowship meeting.

Mr. and Mrs. Marvin Long and Mr. and Mrs. Walt May attended the banquet of the Latah County Wild Life Federation at Moscow Monday night.

Earl Alden of Troy was a Kendrick business visitor Wednesday afternoon.

Win Second Place
Kendrick Future Farmers placed second in a weed and plant seed identification, weed plants, and the judging of seed grains in a contest at Moscow Saturday, with Lawrence Biddison placing third high among the contestants.

Other members of the Kendrick team were Kenneth Woody and Deryl Ingle. These boys all made a creditable showing and were beaten by Moscow by but a few points.

At this same meeting Kenneth Woody was elected vice-president of the district association, succeeding Kenneth Wolff, who held that office last year.

Boy Scout Plan Camporee
The Kendrick Boy Scouts are planning an over-night camp at Fields Spring, near Anatone, this Saturday and Sunday.

This camp will give the boys an opportunity to meet other Scouts of this section and a real chance for a touch of out-of-door life.

A nominal fee for transportation will be the only charge, the boys, of course, furnishing their own eats and bedding.

Big Egg Contest On
Mrs. Harry Langdon started the Gazette's "Big Egg" contest on its way Tuesday afternoon by bringing in the first big egg received thus far.

If you have any big eggs, bring them to the Gazette office and have them measured; they may be worth a six month's subscription to the Gazette.

Receive Word From Daughter
Mr. and Mrs. Clifford Davidson have received several letters from their daughter, Mary, who is taking nurses training at Sacred Heart hospital, Spokane.

She reports she is much interested in her work, that everyone is very friendly and almost best of all: "the food is swell."

Commercial Club Meeting

The regular monthly meeting of the Kendrick Commercial club will be held next Monday evening in the City hall, at 7:30 p. m., with no dinner being served.

The attention of all is called to the new meeting place and the new hour—the City Hall—7:30 p. m. The new time and place for the meeting, with no dinner being served, is something of an experiment, but due to difficulties of serving the meals, it was decided to try this hour and place. If they prove unsatisfactory, the dinner and old meeting hour will again be used.

Come out and meet with the club, whether you are a member or not.

THIS AND THAT ABOUT FRIENDS AT CAMERON

Mrs. Gerald Schmidt spent Thursday with Mrs. Glen Wegner.

August Brammer and Fred W. Silflow attended the school trustees meeting at Lewiston Friday.

Mr. and Mrs. Gerald Schmidt returned to their home in Riggins on Monday, having spent several weeks here with relatives and friends.

Mr. and Mrs. Walter Denner and Tom and Martin Denner of Fix ridge were Sunday dinner guests of Mr. and Mrs. John Schwarz and sons.

Bob and Dickie Bresgal of Spokane are spending their spring vacation with their uncle and aunt, Mr. and Mrs. Lyle Harrison and family.

Mr. and Mrs. Edwin Mielke spent Wednesday evening with Mr. and Mrs. Walter Silflow.

Mrs. Minnie Heltman and sons of Lewiston and Mr. and Mrs. August Brammer spent Sunday with Mr. and Mrs. Carl Koepf.

Rev. and Mrs. Meske called in the A. F. Wegner home Wednesday evening.

Mrs. Emma Hartung and Mrs. Ida Stoneburner were Sunday guests of Mrs. Kennedy and Miss Lily Henningsen in Kendrick.

Sunday dinner guests of Mr. and Mrs. Albert Glenn were Mr. and Mrs. John Glenn and son Harold, Mr. and Mrs. Fred Glenn and daughters and Mr. and Mrs. Bruce Glenn and daughter.

Mrs. Glen Wegner called on Mrs. Edwin Mielke Saturday.

Mr. and Mrs. Alex Larson were callers in the F. W. Silflow home Monday afternoon.

Mr. and Mrs. Wilbert Brunseck were in Lewiston Tuesday, where they saw the show, "Gone With The Wind."

Mr. and Mrs. Glen Wegner and son were callers in the Charley Schultz home Friday evening.

A. F. Wegner, Ted Mielke, Glen Wegner and Edwin Mielke were Lewiston visitors on Saturday.

Mr. and Mrs. A. H. Blum, Mr. and Mrs. Wilbert Brunseck and Kenneth Slead motored to Pullman on Sunday to visit with Mr. and Mrs. Gus Blum and family.

Herbert, Ernest and Lawrence Schwarz, Miss Emma Hartung and Mrs. Ida Stoneburner spent Sunday evening with Mr. and Mrs. G. F. Criddlebaugh.

Mr. and Mrs. Walter Koepf were visitors in the Glen Wegner home Sunday afternoon.

Mrs. Ida Silflow spent Sunday in the Henry Wendt home.

Mrs. Geo. A. Wilken and Mrs. F. W. Newman called on Mrs. R. H. Peck Thursday afternoon.

Mrs. Ida Stoneburner and Miss Emma Hartung were shoppers in Lewiston Saturday.

Short Skirts The Cause
The census bureau points out that the short skirt has played a mean trick on the cotton consumption in the United States. The average girl now wears a skirt of knee length—and only one at a time. It is said that knee length styles cut the demand for cotton by a million bales a year. Less food and fewer and scantier clothes—here are conditions which have affected agriculture in the United States. And the mechanized age has played its part too. With the work formerly done by horses and mules now performed in a goody part by automobiles, trucks and tractors, there is a less demand for animal food such as oats, corn and hay.

The question to be asked is, naturally: "What are we going to do about it?" There seems to be little chance of ending the mechanical age, and women's fashions and men's styles are hard to change. Perhaps the easiest thing to do will be to find new uses for what the farmer raises in this era of manufacturing. Here is where our chemists and other research experts' come in handy.

PACIFIC NORTHWEST WHEAT PRICES DECLINE

Wheat futures markets in the Pacific Northwest declined about the same amount as occurred in important midwestern markets during the week ending March 29, states the Agricultural Marketing Service in the Weekly Grain Market Review.

Cash wheat prices in this area were relatively weaker than futures, reflecting only moderate demand from mills and operators, and principal classes showed declines of 1/4c to 2/8c per bushel from the previous week. For the country as a whole, it was indicated that selling pressure by way of liquidation of old crop supplies apparently more than offset the buying interest created by poor 1940 crop prospects and the European war situation.

On March 29, cash wheat prices at Portland were shown as: soft white 82 1/2c, western white 82 1/4c, western red, 82c and hard red winter 82 1/4c per bushel, all basis No. 1 grade in bulk.

Wheat receipts at Puget Sound and Columbia river terminals were moderate during the week at 571 cars. Export flour indemnity payments were \$1.15 to the Philippines and \$1.40 per barrel to China and Hong Kong. Only moderate sales of flour to the Philippines were reported during the period. Trade reports indicate another cargo of wheat from the Pacific Northwest was sold to Russia during the past week. For the most part, however, the cash wheat market situation in this area was almost wholly one of transportation. Recent widening of the spread between midwest and Northwestern wheat prices has made possible the sale of both wheat and flour for rail movement from interior points in Oregon and Washington to midwestern markets. Demand from California was light and confined to occasional lots of special grades. Lack of water freight space was tending to restrict flour sales from this area to the southeast and Atlantic seaboard ports. As a result of these factors, mill demand was not urgent for cash wheat and the general market situation rather slow with a slightly weaker tone as the week ended.

The San Francisco wheat market was dull with a somewhat weaker tendency during the last week in March, influenced principally by declines in northern and eastern markets and continued slow local demand. Sharp declines in feed barley to the lowest point since early in the crop year also proved a weakening influence.

Heavy redemptions of wheat from federal loans took place in Kansas City early in the week when market prices registered strength and consequent hedging operations connected with the marketings of this wheat had a depressing effect on values. Receipts at Kansas City increased to 844 cars and were the largest since the first week in August.

Receipts of cash wheat at Minneapolis were liberal, amounting to 1,559 cars, reflecting in part further liquidation of wheat carried under federal loans. Duluth unloaded 579 cars. Demand was about equal to the increased offerings however, and the cash price situation showed little change during the week.

Little change was reported in the prospects for wheat either in the United States or abroad. Cold weather retarded growth quite generally in the domestic winter wheat belt and some injury was feared in the southern sections of the Ohio valley. The crop continued to make fair progress in Texas and Oklahoma but development was slow in Kansas and Nebraska. Wheat made little growth in the more northern states but progress was excellent in the Pacific Northwest with good rains toward the close of the week of considerable benefit.

Homer Hayward Passes
Homer Hayward, for many years a resident of the Southwick country, and well-known farmer, passed away at his home there Thursday night at 12:30, after an illness of some two months, having been a paralysis sufferer during the time.

Mr. Hayward was born in Ohio, August 24, 1872, and passed away March 29, 1940, at the age of 68 years.

Survivors include his wife, Mrs. Mable Hayward; two sons, Delbert and Doyle, Southwick; a sister, Mrs. Tom Armitage, Southwick, and a brother, George, of Aurora, Oregon. Three grandchildren also survive.

Funeral services were held in the United Brethren church, Southwick, Sunday afternoon at 2:00 o'clock, with the Rev. Atkinson officiating. Interment was in the Southwick cemetery.

Music was furnished by Mr. and Mrs. Frisbee, who sang, "Saved By Grace." Rev. and Mrs. Atkinson sang "There'll Be No Tears In The Sky." Mrs. Geo. Calvert sang "Going Down The Valley."

Palbearers were Henry Brammer, Nels Longetig, Jake Newman, Joe Tschantz, Gordon Harris and John Lettenmaier.

To Hold Clean-Up Day
Tuesday, April 9th has been designated by the Village Trustees as "Clean-Up" day in Kendrick, at which time the village will haul away free your collection of rubbish, tin cans, etc., providing you place them in handy containers and put the containers where they may be easily picked up.

This is a very commendable move, and one in which every citizen should take part. The fewer rubbish piles and can containers left about, the fewer flies, mice, rats, etc., we will have. Do your part. Clean-Up!

When a man is longing for the good old days he is merely wishing he could again get excited about everything.

The income tax forms have been simplified and now the only thing to worry about is getting the income.

TEAKEAN GOSSIP

(Delayed)
Farmers are repairing fences and some have begun their seeding, but there is too much rain to do much farming.
Alda, eldest child of Mr. and Mrs. Orval Choate, was taken to Lewiston last week where she was operated on for appendicitis. She has been in a critical condition since.
Mr. and Mrs. John Lind and Mrs. Lottie Brock attended the auction sale held by Grover Reece at Nez Perce Wednesday.
Mr. and Mrs. Elwood Brock and family spent Easter week-end with her parents, Mr. and Mrs. James Chladek at Lapwai. They also visited Lewiston on Saturday.
Mrs. Merton Preussler has been helping Mrs. Wm. Groseclose do housecleaning this week.
Mrs. Lena Harp is at the Orval Choate home caring for the family while Mrs. Choate is in Lewiston with Alda.
The Sunday School presented their Easter program at Cavendish in the new church, in conjunction with the Cavendish Sunday School program. There was a big dinner served at noon and in the afternoon Rev. J. E. Walbeck delivered the Easter sermon, with communion service following.

(This Week)
We are still having lots of rain, but there is plenty of time for farm work, and the rain is needed to make good crops.
Marie, six-year-old daughter of Mr. and Mrs. Merton Preussler had a bad attack of croup Friday. She was taken to a doctor at Orofino, and is greatly improved.
Grover Groseclose was a week-end visitor at the home of Mr. and Mrs. Wm. Groseclose.
Mrs. Orval Choate, who has been in Lewiston with Alda, came home for a short stay but returned to Lewiston Sunday. She is reported as getting along better now.
Wm. Groseclose has been busy pruning the orchard and berries.
Mrs. Anna Harless and Mr. and Mrs. Ed. Choate were Orofino visitors Monday.
Ned Harless was a visitor at the home of Mr. and Mrs. Carroll Groseclose Saturday evening. Mrs. Groseclose is Ned's sister.
Don Miller, recently purchased a small dwelling from Cecil Choate and had it hauled by truck to his place here. They expect to live in it for a time, until they can build.
There was a meeting of the patrons of the schools held at the Grange hall Sunday afternoon to discuss the consolidating of the school with the Cavendish school.
Rev. and Mrs. A. R. Fike of Moscow were here for church services Sunday.
George Kime recently traded his truck for a pick-up.

Solve Secrets Hidden In Wood
On the fourth floor of the U. S. Forest Products laboratory, at Madison, Wis., is located the interesting wood identification division of the government's wood research institution. To this division come thousands of silvers, shavings, as well as larger pieces of wood from all over the country to be identified for interested citizens. Never a day passes without someone submitting wood specimens to the laboratory for identification. Many a Mayflower antique has been disclosed to be of wood grown in Oregon.

Often the laboratory technologists are called upon to settle disputes of a commercial nature. During the building of a railroad a contract called for white oak ties. When the ties arrived on the job many thought they were of red oak and accordingly culled, but the laboratory, on examination, found them all to be white oak. On one occasion, a mail-order house requested examination of a large number of wooden articles in order to be sure of describing them correctly in their catalogue. Pipe smokers often want to know if their pipes are of French briar and not of some wood which it resembles. Several years ago, some wood was found in making a cut for a railroad 50 feet below the level. This wood, which according to geologists, had been covered up by a glacier over 500,000 years ago, was still sound enough to be identified as spruce.

Interesting historical events are brought to light with the work of wood identification at the laboratory. A piece of log from prehistoric Biskupin, a pre-slavic city near Pozan in Poland, was recently identified by scientists at the laboratory as oak. This city, known as the Polish Pompei, served as a stronghold in a marsh some 2,500 years ago. Its wooden fortifications, its streets and dwellings, covering six acres, were preserved when it was inundated by the lake which surrounded it on three sides and buried it under water, sand and mud—a unique record of early Iron age civilization. Excavations have been in progress for several years and over one-third of the city had been uncovered when the current war intervened.
Under high-powered microscopes, and sometimes with polarized and ultraviolet light to bring out the differences that cannot be seen in ordinary light, wood, which has even been ground into wood flour, petrified or burned into charcoal, has been identified by experts at the Forest Products laboratory.

Weather Freakish
Weather in the Potlatch section the past ten days has caused those with an out-door urge to tear their hair, and local gardeners have been in no happier mood—for we have certainly had rain in copious quantities, Tuesday and Wednesday being the only days so far this week, and for a large part of last, in which no rain fell.
Lawns are fairly shooting into the air, but the ground is so soft and full of water that a lawn mower would almost bog down—and as for digging in the garden or flower beds—that's out for a few days yet.
The hills surrounding Kendrick are beautiful, presenting the appearance of waves of green velvet, and farmers report pasture to be the best in many years. Wheat is said to be starting growth, and a few warm, sunny days will really give it a "push."
All prospects point to ample moisture for all needs this year.

Chevrolet Shows Gains
Continued gains over the second best February in the history of the company were reported by Chevrolet Motor Co., at Detroit this week, with release of its dealers' new passenger car and truck sales figures for the second ten days of March.
The increase totaled 55.8 per cent over the same period of February, total sales being 33,510. New car sales gained 23.4 per cent over the first 10 days of March.
The period showed a 38.4 per cent gain over the second 10 days of March, 1939, when 9,303 fewer units were retailed.
Used car sales also showed a strong upward trend, with a gain of 26.2 per cent over the comparable period last year, a total of 52,853 used cars being retailed. Used car sales for the second period of the month also surpassed the showing made during the first 10 days, with a gain of 30.4 per cent over the 40,528 used cars sold during that period.

Main Street Re-Conditioned
Main street in Kendrick received a thorough smoothing up Tuesday at the hands of Ed. Dammarrell and Ed. Brown, of the state maintenance crew—and it is now in the best shape it has been since last fall. Other roads into town are also being shaped up, and if no more rain falls soon, will be in fine shape for spring use.

Making It Specific
"Sorry I can't accept you Bill, said a Kendrick girl in response to a proposal, "but circumstances over which I have no control prevents."
"What circumstances?" he demanded.
"Your circumstances."

Ill In Spokane
Supt. L. W. Mason, who went to Spokane Wednesday morning to attend the Teachers' institute, suffered a relapse of flu and is confined to bed in a Spokane hotel.

17,385 INLAND EMPIRE FAMILIES ARE ENJOYING THE LUXURY OF LOW-COST ELECTRIC WATER HEATING

SAFE, CLEAN CAREFREE AS Electric Light

Now, you too, can enjoy low-cost automatic **ELECTRIC HOT WATER!**

"Life is duck soup," Donald says, "when you have ELECTRIC water heating!" Install it...and forget it! Turn the tap and it is always there...ready and right...a teacup full or a tub full! It's cheap, too! 17,385 Inland Empire families will tell you so. Ask them...investigate...install your electric water heater now!

SEE THE NEW **LOW-COST Electric WATER HEATERS** at your favorite store!

INLAND EMPIRE ELECTRICAL EQUIPMENT ASSOCIATION

Electric Service Is Cheap

Take advantage of electric water heating at 7/10th of 1c per kilowatt hour, it's bargain electricity. Besides, it lowers your cost for other electric services.

IT HOLDS FIRST PLACE in Pep, Power and Pick-up among all low-priced cars!

1st in Value, just as it's 1st in Sales!

\$ 659 MASTER 85 BUSINESS COUPE

Other models slightly higher

All models priced at Flint; Mich. Transportation based on rail rates, state and local taxes (if any), optional equipment and accessories—extra. Prices subject to change without notice.

You drive the leader when you drive a Chevrolet for '40—the leader in pep, power and pick-up—and the leader in style, stamina and sales!

It holds first place in acceleration—first place in hill-climbing—first place in all-round performance with all-round economy—among all cars in its price range.

That's why Chevrolet for '40 is first in sales... why more people buy Chevrolets than buy any other make of car... and why your Chevrolet dealer strongly recommends that you eye it—try it—buy it—today!

LITTLE BEAR RIDGE

Virginia Johnson spent Wednesday night with Eldora Bovenkamp. Lorraine Johnson spent Wednesday night in the Henry Hanson home. Mr. and Mrs. Bill Nilson and daughter visited at the Harry Arneburg home Thursday.

Mr. and Mrs. Boyier Nilson and Mrs. James Benjamin were Moscow visitors Thursday afternoon.

Beverly Carson spent Thursday night at the Henry Hanson home. Boyier and Joe Nilson, and Ted Nilson of Troy made a business trip to Moscow Saturday morning.

Henry Hanson took the Dist. No. 42 school bus to Lewiston Saturday. Mrs. Bertha Hanson, Mrs. John Thomas and Mary Thomas rode down with him and visited Mrs. Ruth Hunter, in St. Joseph's hospital.

Mr. and Mrs. Leonard Wolf and sons spent Sunday at the John Thomas home. Joe Nilson and John Thomas, Jr. were also guests.

Bill Nilson was a Sunday afternoon caller at the John Thomas home.

Many from the ridge went to Troy Monday and took the trolley. It was given to the high school and grade students, and to anyone else who wished it.

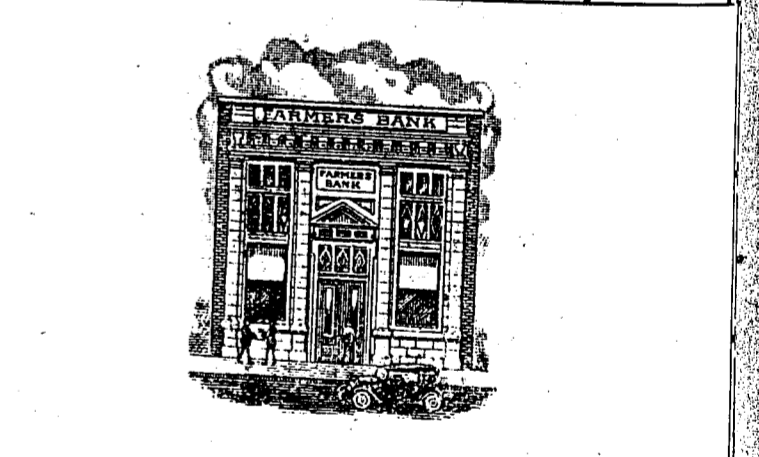

Mr. and Mrs. John Thomas and son Roy were dinner guests in Gunder Reiseron home Monday. John Thomas, Jr., went to Troy Monday with Reynold Shepar Troy.

Fred Gants has withdrawn application for admission to county poor farm, having discovered that there is no garage out there his car.

"Drums Along The Mohawk"
When drums along the Mohawk warned of Indian terror the peaceful Mohawk valley was aflame with battle, its colonists meeting fire and musket the onslaught of savage Iroquois Indians.

The story, "Drums Along the Mohawk" is set in New York's peaceful, beautiful Mohawk valley in early days, and depicts the bravery of the colonists under the onslaught of the savage Indians. Battle scenes in the film reach a pitch of realism and excitement never equalled on screen. Claudette Colbert and Her Fonda have the leading roles. The picture is entirely in technicolor and gives a realism seldom seen. The feature is at the Kendrick Theatre this week-end. If you like historical action-pictures, don't miss it.

The other regular features will also be shown.

11 Lighthouses in U. S. in 1789

300 Erected Since Control Passed to Federal Government.

WASHINGTON.—When in 1789 the United States took over under federal control the existing lighthouse system, there were only 11 lighthouses standing. At Cape Henry, the Commonwealth of Virginia had a tract of land for erecting a permanent lighthouse. Plans had been drawn and materials purchased when the government assumed control. The state deeded the land to the national government and the stone and other materials purchased for the construction of the lighthouse. In the act authorizing the deed of gift to the government, there was included a clause stipulating that the national government should within a specified time erect the lighthouse, writes John William Edwards in the Richmond Times-Dispatch. Default meant the land reversion to the Commonwealth of Virginia. In a short time, the new lighthouse atop the landing at Cape Henry began its century of uninterrupted service to the Chesapeake commerce of the Chesapeake bay.

Now More than 300. There are more than 300 lighthouses in service in the United States today. Some of them have been for a long, long time, while others are as new as next year's motor car.

Winged Ledge lighthouse at the entrance to Boston's harbor is a familiar landmark to those who voyage to city by the way of the sea. This lighthouse stands upon a sea of rocks seldom seen above the surface of the water.

Cape Race lighthouse on the Newfoundland headland is another familiar lighthouse. Near unto this point lies the shortest sea route from New York and Boston to England and ships going and coming from the St. Lawrence river also pass close by it. It has a modern light of more than a million candlepower.

On the west coast of Oregon stands the Tillamook Rock lighthouse. This huge rock, which lies some 100 feet off shore, was a great danger to passing ships, and it was with difficulty that the rock was scaled, a foothold gained, and later from the tower a light with a candlepower of 160,000 cast its flashes 18 miles to sea.

Down Cape Hatteras way, that ever alluring shore, there are several lighthouses familiar to Virginians in story as well as actual life.

Guards Boston Harbor. Another early lighthouse is the one on Little Brewster island on the south of the main entrance to Boston harbor. It was built in 1816, although the lighthouse now occupying the site was erected in 1859. It has been erroneously said that this was the first lighthouse built by the new government. The Cape Henry stone lighthouse bears that distinction.

The story of lighthouses would be incomplete were not some mention made of the lightship. And these are the floating lighthouses. To those who have crossed the Atlantic perhaps the most familiar of these is the Ambrose lightship, that rolls at its anchors outside the entrance to New York harbor. But the most famous lightship on the entire Atlantic seaboard is the one that marks Diamond Shoals, that most dangerous spot just off Cape Hatteras. On several occasions the national government has made attempts to build a lighthouse on this shoal, but all these attempts have invariably been frustrated by the angry sea. A famous lightship does mark the cape proper, but Diamond Shoal runs out beneath the stormy waters for as much as 10 miles from the cape, and it is this dangerous submerged sandbar that the lightship guards.

'Fancy' Name Is Wanted For Public Landing, Md. PUBLIC LANDING, MD.—A movement is under way to rename this 150-year-old Worcester county community.

Capt. Jack Lilliston, boatman and self-styled "Mayor of Public Landing," suggests that an Indian name would be more appropriate.

"One hundred and fifty years ago when Public Landing was named," he said, "it was a bay port for the shipping of crops. Today it is a nice resort and should have a fancy name."

Four Trappers Earn \$607 in Two Months CHARDON, OHIO.—Trapping is good in South Hamden, near here, according to the four Pokorney brothers, who obtained \$607 worth of furs in two months.

Between November 15 and January 14, the trapping season, the brothers bagged 407 muskrats, 25 mink, 41 opossums, four raccoons, one fox and four skunks.

The brothers, Andy, 27; John, 24; Frank, 20; and Joe, 19; began trapping 10 years ago. Last year they collected \$300—which they spent installing electricity in their farm house.

FARM TOPICS

SUGGESTS SEEDING TOMATOES IN FIELD

Lower Cost Will Offset Smaller Yields.

By W. A. HUELSEN
Seeding tomatoes directly in the field thus eliminating the expense of transplanting has considerable commercial promise, according to the college of agriculture, University of Illinois, Urbana.

Experiments conducted by the agricultural college last year comparing direct seeding with transplanting in the usual way showed only a slight increase in yields in favor of the transplanted tomatoes. However, this advantage is more than compensated by the lower cost of direct seeding.

Interplanting tomatoes with field corn is another new and novel method of growing tomatoes, a method that protects the tomato fruits from sun scald. In experiments conducted at Urbana by the college of agriculture, tomatoes planted the usual way in 1938 produced a total of 7.6 tons an acre. The interplanted tomatoes produced 4.7 tons of tomatoes and 55 bushels of shelled corn an acre. The acre income was \$87.50 for the tomatoes planted in the usual way and \$81.50 for the interplanted acre, valuing corn at 45 cents a bushel.

Additional tests indicate the importance of early planting. Tomatoes planted on May 12 produced 10 tons an acre, but when setting was delayed until June 5, the yields dropped to four and one-half tons an acre. Still later plantings reduced the yields further.

Good Roughage Is Aid In Developing Rations

Roughage of good quality helps to build good rations for all kinds of stock. Pasture and good legume hay are roughages providing practical and economical sources of vitamins and protein to improve grain rations.

A study made recently by the United States department of agriculture showed that pasture averaged nearly one-third of the nutrients consumed by milk cows during the year, whereas the cost of the pasture was only one-seventh of the total feed cost.

Legumes make the most nourishing pasture and also the most nutritious hay. Most farmers had a generous supply of legume hay for winter feeding and live stock is reported to have thrived unusually well. On many farms the brood sows have had the alfalfa hay which they need to put pep into little pigs. Calves have been wintered cheaply and with good gains, largely because good legume hay was a big part of the feed. Plentiful pasture favors continued success with the stock.

Watch Sleeping Sickness Among Horses, Is Advice

The division of animal pathology and hygiene at the University of Illinois college of agriculture, Urbana, offers this advice for protecting horses and mules from sleeping sickness:

In infested areas, keep the animals in screened stables.

Use burlap or muslin fly covers on animals at work and spray them with an insect repellent.

Keep stables clean.

Vaccinate animals early, so they will develop a strong immunity.

Staff members of the division said only about one of every four animals in an exposed area develops the disease and about eight of every ten infested horses can be saved with prompt treatment.

The disease is seasonal, appearing in July or August and continuing until the first killing frost. It is believed to be carried by mosquitoes, although biting flies also are suspected of transmitting it.

Farm Facts

Turkeys, to make the most economical gains, must have a constant supply of clean, fresh water.

American agriculture is now said to use more machinery than any other industry in this country.

Feeding experiments indicate that beef heifers fatten faster than steers in a feeding period of less than 150 days.

Sales of wheat and flour for export totaled approximately 91,600,000 bushels from July 1, 1938, to March 18, 1939, of which about 77,000,000 bushels have been exported.

Strains of tomatoes that do well in greenhouses will usually do well outside if trained on a trellis, according to Professor Grant B. Snyder, head of the Massachusetts State college vegetable gardening department.

There are over 1,000,000 milk goats in the United States, about 4 per cent of the number of cows. Goats find their use as the "poor man's cow" and also as a source of easily digested milk for infant feeding.

THUMB-NAIL IDAHO HISTORY

By Glenn Balch

In the heyday of its mining prosperity, Hailey, queen camp of the booming Wood River country, awoke one July morning to find its business section a charred area of fire-swept ruins. That was in the year 1889. On the Fourth the present residents of Wood River country and a large section of the citizens of southern Idaho celebrated the fiftieth anniversary of the fire.

Back in the days when men's minds were occupied principally with gold and the precious metals that could be taken from Idaho's side-hills, they built hastily of the material closest at hand, which in most instances was fresh-sawed lumber, and did not worry about the possibility of fire. All the protection deemed necessary was a rain barrel sitting in the corner of the house and a couple of buckets that were supposed to be kept at the rain barrel but seldom were.

As a result of this type of construction and carelessness, most of the towns built in Idaho during the early days of the gold rush have been practically destroyed by fire at least once, some of them twice. Hardly a summer passed when some sun-baked frame-built mining camp did not go up in smoke. Idaho City burned twice, each fire practically destroying the business section.

The burning of Hailey is an early-day fire worthy of mention in the same breath with the spectacular conflagration which destroyed Idaho City in the 60's.

Idaho City's fire started on the second floor of a "honky-tonk." Hailey's started in a bakery. The Hailey fire, so the report goes, started about 1:30 in the morning and spread with "wonderful" rapidity.

It was in the Nevada Bakery, at the corner of Main and Carbonate streets, that the conflagration got its start. A strong wind helped it in its march along Main street. At the Merchants' Hotel corner the fighters made a desperate attempt to stop it; but leaping tongues of flame, stinging sparks and blinding smoke drove them back. The intense heat blasted through the night, withering all resistance.

Hurdling the street, the fire roared its fiery spark-belching way through the next block—and the next. In less than two hours after the first alarm the business district lay in smoking ruins. Of four business blocks only Freidman's store was saved. All that remained of the business firms were two printing offices, a lumber yard, the Alturas hotel, a couple of livery stables, two stores and a saloon. Losses ran close to half a million dollars, of which about \$150,000 was insured. Hailey is noted today for its Fourth of July fireworks displays, but the 1889 fire holds the record for being the most elaborate and expensive.

Rebuilding, as was true in the case of most burned mining camps, started immediately. Gov. Shoup headed a subscription list for sufferers with a round \$200. Ketchum, just twelve miles up the river, experienced a plague of badly singed tramps.

It is noteworthy that within a period of a few weeks Hailey, Seattle, Ellensburg, Wash.; and Bakerville, California, were all destroyed by fire.

THINK IT OVER

By F. R. Stevens

The German Library of Information, in its publication "Facts in Review," under date of February 13, makes the following statement, as to the agricultural policy of Germany and publishes it in this country (propaganda) to show us the advantages of Dictatorship:

"More important, however, than the existence of huge reserves of agricultural products have been the successful efforts of the National Socialist Government in bringing agricultural production to optimum efficiency. Agriculture was made independent of the exigencies of the fluctuating capitalist markets. A policy of fixed prices and of regulated sales through government markets, provides for the needs of the consumers and assures a fair return to the farmers."

This is an official German statement. That is the policy of the German government, and it is their business.

National Socialism, however, is certainly not the government of this country. It never has been and it is our fondest hope that it never will be. Here the individual is the unit. His right to progress by natural impulse is our principal concern.

Note the word "fair" in the above quotation. It could more accurately have been "fixed." The return to the Dictator's agent as to your needs—food, clothing, etc., and would never exceed that. No extras for the good things of life nor hope of any. The farmer would simply be a slave of the state. There would be no fear of want nor hope of reward to spur one on to that last effort which develops the individual.

Sound natural growth comes from within. So-called government assistance, which if followed by regulation, weakens that natural growth. A farmer, with a block and tackle, can raise a small tree until it is six or eight inches taller. It will then look taller than its neighbors, have more air and sunshine, but its own source of strength is weakened and it will die.

This proposal from abroad that our free farmers shall take orders from a government as to when and what they shall sow and reap and how much they shall receive for their labor should raise the fighting blood of every red blooded man, woman and child who loves the independence and freedom of life on the farm.

Different Kind Of Dollars

American farmers earned cash incomes of \$11,200,000,000 in 1929; \$7,625,000,000 in 1939. So Mr. Roosevelt took a generous share of what they earned in taxes to bolster up their deficiency with federal appropriations. Besides their 1929 incomes were calculated in hundred cents dollars and the 1939 incomes in sixty cents dollars.—Somerset, Pa., American.

Reduce Accidents 50 Per Cent

Urging cooperation of every right-minded citizen, Governor C. A. Bottolfsen asks that the 50th Anniversary of the state be celebrated with a reduction of 50 per cent in motor vehicle fatalities for the year.

This will be possible, the Governor declared, if all will exercise a little more care, use a little more courtesy, when driving.

The problem of making our streets and highways safe, the Governor said, will not be solved until people face the situation squarely. The person who has a serious accident due to his carelessness or negligence, is a potential criminal, and should be so considered. The weight of community opinion can do more than laws.

Idaho's motor vehicle death toll last year was just above 160; a reduction of 50 per cent would place the figure at 80. If each of us will solemnly pledge: "I will help," we will accomplish our objective and make a worthwhile contribution to the 50th anniversary of our great state.

Report of Condition Of THE FARMERS BANK,

of Kendrick, in the State of Idaho, at the close of business on March 26th, 1940.

Assets	
Loans and discounts (including \$74.89 overdrafts)	\$100,137.54
United State Government obligations, direct and guaranteed	83,730.49
Obligations of States and political subdivisions	7,107.50
Cash, balances with other banks, including reserve balances, and cash items in process of collection	172,768.55
Bank premises owned \$3,500.00, furniture and fixtures \$1,150.00	4,650.00
(Bank premises owned are subject to \$ none liens not assumed by bank)	
Real estate owned other than bank premises	3,575.00
TOTAL ASSETS	\$371,969.08

Samoyede Dog Gets Name From Mongolian Hunters

The Samoyede dog takes its name from the ancient Mongolian hunters and fishermen of northeastern Siberia. The Samoyede people found this dog was an excellent assistant in hauling sleds, in hunting and in herding reindeer. The dog was picked to pull sleds because less food was required for his maintenance than for the reindeer, the traditional motive power for Arctic trucking.

The Samoyede people, from the region between the Ob and Yenisei rivers on the shores of the Arctic ocean, trained their rugged dogs to herd reindeer, which are of vital importance to both food and clothing. The dogs kept the reindeer on the range desired and guarded them from marauding animals and sounded an alarm at the approach of hostile or strange humans.

It might be added that the faithful dog frequently met the same fate as the reindeer, being transformed into food and clothing, as the show dogs in China.

To perform the duties required of it in that rigorous climate, states an authority in the Cleveland Plain Dealer, the Samoyede must be a hardy, sturdy dog with a coat that enables him to withstand the most severe weather. As might be expected he is related in varying degrees to the chow, Alaskan malamute, Norwegian elk hound, Siberian huskie, Eskimo dog and several other breeds, including, odd as it may seem, the Pomeranian.

The breed made its appearance in England along toward the end of the last century. It was brought to the United States soon afterward. Although he is used as a working dog in his native land, the Samoyede is not used seriously in a working capacity in this country.

Wild Animals Organize To Procure Food, Fight

Wild cats can do what chimpanzees, horses, and elephants cannot accomplish. They can combine to find food.

On Frigate, a lonely coral island northeast of Mauritius, live hundreds of wild cats descended from survivors of a wreck. Since there is no other food for them, they have learned to live on fish and to organize for catching them. They form a circle on the dry reef, and just before low water closes in, driving in the fish which have remained behind in the many small pools and channels. A single drive may yield a ton of fish.

The wild dog is equally clever, states a writer in London Answers magazine. The hyena dog of South Africa, an oddly colored animal, with markings of yellow, black, and white, hunts in packs. Part of the pack gets on the trail of a buck; the rest go ahead and wait until the first lot drive the quarry close to them, then they take up the chase.

The best example of combination among animals is offered by the beaver. Men who have spent years in watching these most intelligent creatures, say that every individual in the colony has its own task in building and keeping up the dam which forms the pool in which the whole colony lives.

The shaggy musk ox of the Far North lives in small herds. When attacked by wolves, the bulls form a ring, with the cows and calves in the center. The buffalo of the plains had the same method of defending their young.

Keeping a White Elephant

Most of us have unwanted and usually unsightly objects about the house which we keep because somebody gave them to us, or because we spent good money on them in a weak moment. We call them "white elephants." This phrase came to us from Siam, where the white elephant is sacred, notes a writer in Pearson's London Weekly. Being white, it could only be possessed by royalty, it could not be worked, and it had to be kept in a royal state. A favorite method of ruining a courtier was for the reigning monarch to make him a present of a white elephant. The cost of maintaining the animal in its proper state was a ruinous business, for the recipient could neither give it away nor sell it. In the end the king would have his wish and regain his elephant.

Most Southerly Large Glacier

Palisade glacier, at the head of Big Pine creek, about 15 miles west of Big Pine, is California's largest and also the most southerly large glacier in the United States. Its highest elevation is 13,400 feet and is about three miles long by half as wide, with a drop from head to foot of 1,100 feet. Its background is a series of skyscraper peaks, including Mt. Palisade, elevation, 14,254 feet; Mt. Sill, 14,190; Agassiz Needle, 13,882, and Mt. Winchell, 13,749.

Nature's 'Limits'

Some of the biggest things in Nature include Everest, in the Himalayas, the highest mountain, 29,200 feet high. The longest river is the Amazon, in South America, 4,000 miles. The deepest waterfall is the Kaletur, in British Guiana, 741 feet. The greatest desert is the Sahara, 3,500,000 square miles. The largest island, apart from Australia, is Greenland, 827,300 square miles. The largest ocean is the Pacific, 63,986,000 square miles.

Old Bell, Steelyard Inn Links Town to the Past

A link with the days when the quiet town of Woodbridge, England, was a busy center of shipping and sea-borne trade, the Old Bell and Steelyard is one of the famous inns of Suffolk, says the Sunday Times, of London.

Woodbridge ships set forth from the River Deben to join the English fleet that met the Invincible Armada, and throughout the Seventeenth century there was a brisk traffic to the Continent, so that the people of Ipswich complained of Woodbridge competition.

It was during these busy times—probably about 1650—that the steelyard, which is the chief feature of the inn, was constructed. Steelyards were used for weighing wagonloads of hay, corn and other produce, and their use can be traced back to the Roman settlers in Britain.

The steelyard at Woodbridge had not been in use for some years, when in 1897 it was taken down and sent to London for the Victorian Era exhibition. It was re-erected, and the lead poise weight of 112 pounds is preserved in the inn. As far as is known, only one other steelyard—at Coham, in Cambridgeshire—survives in England.

The inn is of much earlier date than the steelyard, for it was built in the second half of the Fifteenth century, and though its timber frame shows signs of its antiquity, it is still in excellent condition.

As far back as 1740 it was known as the "Stillards," and it has since been called the Bell, the Blue Bell and now Old Bell and Steelyard.

English Monetary Unit Once Was Pound Weight

The English monetary unit, the pound, was originally a pound weight of silver, and corresponded to the Roman libra (Latin pound weight), from which is derived the "£" designating this denomination. This pound was soon known as the Pound Tower because the chief mint of the country was established in the Tower, and by it the weight of English coins was regulated. It contained 5,400 grains and was divided into 12 ounces of 20 pennyweights each. The Pound Troy superseded the Pound Tower in 1527, and contained 5,760 grains, writes Flora MacFarland in the Cleveland Plain Dealer.

The shilling, a division of the pound weight of silver, corresponded to Roman solidus, and the penny, which represented the 240th part of a pound, corresponded to the Roman denarius. Hence we have the abbreviations L, s and d.

The Roman system of computation was adopted by all European countries after they had accepted Roman Christianity. In England it was adopted by Ethelbert of Kent at the beginning of the Seventh century.

The District of Columbia

The tract of land known as the District of Columbia, which is co-extensive in area with the city of Washington, was acquired by the federal government in 1789 from Maryland in pursuance of Article I, Section 8 of the Constitution, which provides: "Congress shall have power to exercise exclusive legislation in all cases whatsoever over such district (not exceeding 10 miles square) as many, by cession of particular states, and the acceptance of congress, become the seat of government of the United States."

Maryland, in 1788, and Virginia, in 1789, passed acts together to cede 10 miles square for the seat of government of the United States. But in 1846, the tract of land south of the Potomac ceded by Virginia was, upon petition of the inhabitants, receded by congress to the parent state.

Exhibit of Crystallized Gold

The finest mass of crystallized gold in existence is owned by the American Museum of Natural History and is on exhibition in the hall of minerals and gems. It was found in the Mother Lode district of Nevada county, California. The specimen weighs three and three-quarter ounces and has a lace or sponge-like structure, making a good size handful. The gold took this form when the rock in which it was originally a minor adulterant cooled and crystallized. The rock substances solidified at a much higher temperature than the gold, and the liquid metal finally gathered in one place under heavy pressure. The cooling process was long and slow, giving the gold a chance to crystallize. Nuggets of gold so formed are common, but the crystalline form of gold is rare.

Cacao Tree an Evergreen

The cacao tree is one of those plants which does better in a foreign land than its home country. Native to Latin America, it is cultivated chiefly in West Africa. An evergreen, says the Washington Post, it bears buds, flowers and seed pods, all at the same time. Oddly, they grow on the trunk bark, not on branches or twigs. Though the tree is called "cacao," its bean is named "cocoa." The two drinks, chocolate and cocoa, are both made from it, their only difference being in richness. Cocoa beans go through many roasting and curing processes before ending up in a cup, but their original growers, American Indians, merely dried them in the sun and ate them "as is."

MUCH WOOD CONSUMED IN NORTHERN IDAHO

Fuel wood rather than lumber is the principal timber product consumed in northern Idaho, according to a report on timber consumption issued this week by C. N. Whitney and S. Blair Hutchison of the Northern Rocky Mountain Forest Experiment station at Missoula. During the average year approximately 339 thousand cords of wood are burned for heat and power. Although the lumber production has averaged over one-half billion board feet annually in the past year, most of it has been shipped out of the state and only 102 million board feet are consumed locally in the average 12-month period.

Discussing the lumber consumption the authors state that about 50 million board feet a year has been manufactured locally into boxes, millwork and other products. The Coeur d'Alene mines rank next in consuming almost 16 million feet of sawed material annually. Farm construction requiring nearly 14 million board feet a year represents the third largest type of consumption, followed by the railroads at 13 million feet. The rest of the 102 million board feet total is largely used in non-farm buildings, in the construction and maintenance of state and county highways, and by federal agencies and public utilities.

Containing estimates of the consumption of all timber products in northern Idaho, Montana, and northeastern Washington, the report is a project of the Forest Survey. It is the first attempt to measure the timber product requirements on so extensive a scale, and an effort has been made to analyze the factors contributing to the trends in use. It is but one part of the big Forestry Service survey job to find facts for intelligent planning in the management of the forest resources.

AND YOU PAY THE BILL By Glenn Balch

The tax committee has learned through its numerous hearings that inequality of taxation may sometimes be traced back to the assessing methods used in the various 44 counties.

The assessor in each county is elected by the people of that county. It is his duty to examine the property of his county that is legally taxable and to place a value or assessment on it. There the element of individual judgment enters our tax system.

It is generally agreed that assessments within the various counties are fair and equitable. These assessments are all made by one man, the county assessor.

But the committee hearings have brought out, there may be wide variations in the assessments of the similar classes of property in two or more counties. This is illustrated as follows: A dairy cow in one county is valued for taxation purposes at \$20, but when this same cow walks or is moved across the line into an adjoining county her value becomes \$30. She might go into still a third county and her owner would find her value to be \$18 or possibly \$32.

Similar variations may be found in other classes of property such as farms, dwellings, merchandise and business buildings, with the result that assessed valuations of counties of similar wealth may differ many thousands of dollars.

Variations between counties would not be so important if all the taxes from property in each county were used in that county. Regardless of the values arrived at, citizens of the county would pay only the proportionate share of the costs of local governing units, provided of course, that the county assessor was consistent in his assessments.

During the past few years, however, there has developed an increasing tendency to have the larger governing units collect taxes which are in turn to be remitted back to the local units. As an illustration, the state will this year collect approximately \$1,000,000 which it will turn back to the counties for educational or school purposes.

The state levy is state wide and is levied on the sum total of all the valuations reported by the county assessors. Therefore, a high valuation county pays more than one with a smaller valuation, which is proper. But we find that the man owning ten dairy cows in the \$20 county pays only two-thirds as much as the owner of ten similar cows in the \$30 county, and that may be unjust.

The county assessors have been quick to learn that the lower they keep their respective valuations the state tax will be. The rule has therefore become low valuations with increased levies to compensate local governing units for decreases.

This trend is amply indicated by the fact that Idaho's taxable wealth, as reported by the assessors, has decreased from \$485,000,000 to \$385,000,000, or roughly, 21 per cent, since 1921.

The committee believes that this condition may be improved by observance of consistent assessment methods throughout all the counties, and the assessors have expressed their willingness to co-operate.

Debunked At Home

The pulpit and press are repeatedly reminding us of what world democracy owes the brave little republic of Finland for stopping the Russian armies cold—and when we say cold we mean cold. The editorial writers and cartoonists picture the hosts as starting a march to the west which, the Communists hope, will end in the destruction of western civilization.

The commentators point, too, to the fact that the Finns have punctured the myth of Russian military supremacy and thoroughly debunked Stalin and his red army.

All of this is true. But the Finns have performed a special service for the people of the United States. They have thoroughly and completely debunked the Communists within our own gates and made them a laughing stock to the public. Formerly most people tolerated them as a nuisance not worth mentioning and were even inclined to believe

them when they said they were only interested in saving American democracy from Fascism. But the conduct of these American reds since the Russians invaded Finland has proved to every unbiased person the sort of intriguers they are.

While practically all of our people have sympathized with the Finns in their hour of danger, Communists in the United States have obediently followed Stalin. They hint that the situation is still "cloudy" and we haven't heard the truth of it, that the Russians were obliged to invade Finland to "protect" Leningrad. The American Student Union, a "fellow traveler," in a convention recently in Milwaukee by an overwhelming vote refused to condemn the Russian invasion of Finland. The so-called Abraham Lincoln Brigade, which fought with the red front in Spain, by its public pronouncements has shown its public sympathy with Stalin in this latest outrage.

Many of the excuses made for Russia in this latest war of conquest are almost laughable. So while the Finns were debunking the Russian army at home they have very thoroughly debunked the Communists in the United States and stripped them of all pretence of working for democracy and the salvation of their fellow men.

PINE CREEK GOSSIP

Lois Bogar of Deary is visiting this week at the home of her aunt, Mrs. Fred Bailey and family.

Mr. and Mrs. Roy Glenn went to Kendrick Friday after baby chicks.

Artalee Bailey visited over the week-end on Big Bear ridge at the A. W. Jones home.

Mr. and Mrs. Jack Bailey were Lewiston visitors Saturday.

The two little Tout children spent Saturday night with their grandmother, Mrs. A. Riley.

Nolan Weeks is visiting this week with home folks.

Mr. and Mrs. Jack Bailey and son visited Sunday in the Fred Bailey home.

Fred Bailey was a Lewiston visitor Tuesday and Wednesday.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Fix Ridge Common School District No. 17, Latah County, Idaho

Notice is hereby given, that the annual school meeting of Fix Ridge Common School District No. 17, County of Latah, State of Idaho, will be held on Saturday, the 20th day of April, 1940, at the schoolhouse in said District; the said meeting shall convene at 1:00 o'clock p. m. on said day and continue uninterruptedly until the business properly coming before said meeting is disposed of. The following business will be transacted:

1. One trustee to serve a term of three (3) years will be elected.
2. The length of time school will be taught in said District for the ensuing year and the seasons of the year in which the same shall be taught will be determined.
3. At the said annual meeting in said District the amount of money to be raised by special taxation shall be determined, the levy for which purpose shall not exceed ten (10) mills on each dollar of taxable property of the District; the purposes for which the money derived therefrom shall be expended shall also be determined, and in each instance the proportion of the whole amount which is to be used for the various and separate purposes shall be named.
4. At said meeting general questions pertaining to school interests will be taken up and disposed of.

The name or names of all candidates for election of trustees together with the term for which nominated shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election.

The election at said meeting will be by secret and separate ballot.

Dated this 29th day of March, 1940.

RALPH RICHARDSON, Clerk of Fix Ridge Common School District No. 17 of Latah County, Idaho. 14-3

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In American Ridge Common School District No. 22, Latah County, Idaho

Notice is hereby given that the annual school meeting of American Ridge Common School District No. 22, County of Latah, State of Idaho, will be held on Saturday, the 20th day of April, 1940, at the schoolhouse in said District; the said meeting shall convene at 1:00 o'clock p. m. on said day and continue uninterruptedly until the business properly coming before said meeting is disposed of. The following business will be transacted:

1. One trustee to serve for a term of three (3) years will be elected.
2. The length of time school will be taught in said District for the ensuing year and the seasons of the year in which the same shall be taught will be determined.
3. Mr. and Mrs. Ward Helton of Southwick visited Sunday in the home of Mrs. Helton's sister and brother-in-law, Mr. and Mrs. Wayne Kuykendall. Fred Glenn delivered hogs to Lewiston Tuesday.

Seeks To Enjoin Federal Census

Lewis C. Warden, Columbus, Ohio, attorney, has asked the federal district court to enjoin the director of the census from asking 24 questions which he contended are objectionable. Warden said the questions violated the federal constitution by invading his rights of privacy, depriving him of liberty without due process of law and invading the powers reserved to the people. The action, which asked a permanent injunction, was filed in behalf of himself and all citizens of the United States.

The new Bulgarian cabinet is headed by a college professor. The cables do not state whether he is a New Deal professor.

The Game Of Life
To each is given a bag of tools, A shapeless mass and a book of rules, And each must fashion ere life has flown, A stumbling block or a stepping stone. Isn't it strange that princes and kings, And dawns that caper in sawdust rings, And common folk like you and me, Are builders of eternity?

When Sleepy--Sleep!

When the eyes grow heavy, Eternal Rest beckons to the driver of a motor vehicle, warns the bureau of safety. The auto is a highly efficient engine of destruction, potentially. A driver needs full possession of all his faculties. It is dangerous to drive when drowsy during the day; it is suicidal at night. When on the road and drowsy, quit driving and sleep it off--it is the only safe way--for yourself and the other fellow!

Watch Cattle Movements

Farmers are warned not to drive cattle from one county to another, at night, unless they have a certificate of brand inspection and a bill of sale, says the bureau of safety, for this constitutes felony under the law. Farmers should acquaint themselves with the provisions of the law, since state police are becoming increasingly vigilant.

Samoyede Dog Gets Name From Mongolian Hunters

The Samoyede dog takes its name from the ancient Mongolian hunters and fishermen of northeastern Siberia.

The Samoyede people, from the region between the Ob and Yenisei rivers on the shores of the Arctic ocean, trained their rugged dogs to herd reindeer, which are of vital importance to both food and clothing.

It might be added that the faithful dog frequently met the same fate as the reindeer, being transformed into food and clothing, as the show dog is in China.

To perform the duties required of it in that rigorous climate, states an authority in the Cleveland Plain Dealer, the Samoyede must be a hardy, sturdy dog with a coat that enables him to withstand the most severe weather.

The breed made its appearance in England along toward the end of the last century. It was brought to the United States soon afterward.

Wild Animals Organize To Procure Food, Fight

Wild cats can do what chimpanzees, horses, and elephants cannot accomplish. They can combine to find food.

On Frigate, a lonely coral island northeast of Mauritius, live hundreds of wild cats descended from survivors of a wreck. Since there is no other food for them, they have learned to live on fish and to organize for catching them.

The wild dog is equally clever, states a writer in London Answers magazine. The hyena dog of South Africa, an oddly colored animal, with markings of yellow, black, and white, hunts in packs.

The best example of combination among animals is offered by the beaver. Men who have spent years in watching these most intelligent creatures, say that every individual in the colony has its own task in building and keeping up the dam which forms the pool in which the whole colony lives.

The shaggy musk ox of the Far North lives in small herds. When attacked by wolves, the bulls form a ring, with the cows and calves in the center.

Keeping a White Elephant

Most of us have unwanted and usually unsightly objects about the house which we keep because somebody gave them to us, or because we spent good money on them in a weak moment.

Most Southerly Large Glacier

Palisade glacier, at the head of Big Pine creek, about 15 miles west of Big Pine, is California's largest and also the most southerly large glacier in the United States.

Nature's 'Limits'

Some of the biggest things in Nature include Everest, in the Himalayas, the highest mountain, 29,200 feet high.

Old Bell, Steelyard Inn Links Town to the Past

A link with the days when the quiet town of Woodbridge, England, was a busy center of shipping and sea-borne trade, the Old Bell and Steelyard is one of the famous inns of Suffolk, says the Sunday Times, of London.

Woodbridge ships set forth from the River Deben to join the English fleet that met the Invincible Armada, and throughout the Seventeenth century there was a brisk traffic to the Continent, so that the office of Ipswich complained of Woodbridge competition.

It was during these busy times—probably about 1650—that the steelyard, which is the chief feature of the inn, was constructed.

The steelyard at Woodbridge had not been in use for some years, when in 1897 it was taken down and sent to London for the Victorian Era exhibition.

The inn is of much earlier date than the steelyard, for it was built in the second half of the Fifteenth century, and though its timber frame shows signs of its antiquity, it is still in excellent condition.

As far back as 1740 it was known as the "Stillards," and it has since been called the Bell, the Blue Bell and now Old Bell and Steelyard.

English Monetary Unit Once Was Round Weight

The English monetary unit, the pound, was originally a pound weight of silver, and corresponded to the Roman libra (Latin pound weight), from which is derived the "£" designating this denomination.

This pound was soon known as the Pound Tower because the chief mint of the country was established in the Tower, and by it the weight of English coins was regulated. It contained 5,400 grains and was divided into 12 ounces of 20 pennyweights each.

The shilling, a division of the pound weight of silver, corresponded to Roman solidus, and the penny, which represented the 240th part of a pound, corresponded to the Roman denarius. Hence we have the abbreviations L, s and d.

The Roman system of computation was adopted by all European countries after they had accepted Roman Christianity. In England it was adopted by Ethelbert of Kent at the beginning of the Seventh century.

The District of Columbia

The tract of land known as the District of Columbia, which is co-extensive in area with the city of Washington, was acquired by the federal government in 1789 from Maryland in pursuance of Article I, Section 8 of the Constitution, which provides: "Congress shall have power to exercise exclusive legislation in all cases whatsoever over such district (not exceeding 10 miles square) as many, by cession of particular states, and the acceptance of congress, become the seat of government of the United States."

Exhibit of Crystallized Gold

The finest mass of crystallized gold in existence is owned by the American Museum of Natural History and is on exhibition in the hall of minerals and gems. It was found in the Mother Lode district of Nevada county, California.

Cacao Tree an Evergreen

The cacao tree is one of those plants which does better in a foreign land than its home country. Native to Latin America, it is cultivated chiefly in West Africa.

Debunked At Home

The pulpit and press are repeatedly reminding us of what world democracy owes the brave little Russian armies cold—and when we say cold we mean cold.

MUCH WOOD CONSUMED IN NORTHERN IDAHO

Fuel wood rather than lumber is the principal timber product consumed in northern Idaho, according to a report on timber consumption issued this week by C. N. Whitney and S. Blair Hutchison of the Northern Rocky Mountain Forest Experiment station at Missoula.

During the average year approximately 339 thousand cords of wood are burned for heat and power. Although the lumber production has averaged over one-half billion board feet annually in the past year, most of it has been shipped out of the state and only 102 million board feet are consumed locally in the average 12-month period.

Discussing the lumber consumption the authors state that about 50 million board feet a year has been manufactured locally into boxes, millwork and other products. The consumption of almost 16 million feet of sawed material annually, Farm construction requiring nearly 14 million board feet a year represents the third largest type of consumption, followed by the railroads at 13 million feet.

Containing estimates of the consumption of all timber products in northern Idaho, Montana, and northeastern Washington, the report is a project of the Forest Survey. It is the first attempt to measure the timber product requirements on so extensive a scale, and an effort has been made to analyze the factors contributing to the trends in use. It is but one part of the big Forestry Service survey job to find facts for intelligent planning in the management of the forest resources.

AND YOU PAY THE BILL By Glenn Balch

The tax committee has learned through its numerous hearings that inequality of taxation may sometimes be traced back to the assessing methods used in the various 44 counties.

The assessor in each county is elected by the people of that county. It is his duty to examine the property of his county that is legally taxable and to place a value or assessment on it.

It is generally agreed that assessments within the various counties are fair and equitable. These assessments are all made by one man, the county assessor.

But the committee hearings have brought out there may be wide variations in the assessments of the similar classes of property in two or more counties. This is illustrated as follows: A dairy cow in one county is valued for taxation purposes at \$20, but when this same cow walks or is moved across the line into an adjoining county her value becomes \$30.

Similar variations may be found in other classes of property such as farms, dwellings, merchandise and business buildings, with the result that assessed valuations of counties of similar wealth may differ many thousands of dollars.

Variations between counties would not be so important if all the taxes used in that county. Regardless of the values arrived at, citizens of the county would pay only their proportionate share of the costs of local governing units, provided of course, that the county assessor was consistent in his assessments.

During the past few years, however, there has developed an increasing tendency to have the larger governing units collect taxes which are in turn to be remitted back to the local units.

The state levy is state wide and is levied on the sum total of all the valuations reported by the county assessors. Therefore, a high valuation county pays more than one with a smaller valuation, which owning ten dairy cows in the \$20 county pays only two-thirds as much as the owner of ten similar cows in the \$30 county, and that

The county assessors have been quick to learn that the lower they keep their respective valuations the less their proportionate share of the state tax will be.

This trend is amply indicated by the fact that Idaho's taxable wealth, as reported by the assessors, has decreased from \$485,000,000 to \$385,000,000, or roughly, 21 per cent, since 1921.

The committee believes that this condition may be improved by obviating of consistent assessment methods throughout all the counties, and the assessors have expressed their willingness to co-operate.

The pulp and press are repeatedly reminding us of what world democracy owes the brave little Russian armies cold—and when we say cold we mean cold.

The editors and cartoonists picture the red hosts as starting a march to the west, when the Communists hope, will end in the destruction of western civilization.

The commentators point, too, to the fact that the Finns have punctured the myth of Russian military supremacy and thoroughly debunked Stalin and his red army.

All of this is true. But the Finns have performed a special service for the people of the United States. They have thoroughly and completely debunked the Communists within our own gates and made them a laughing stock to the public.

Formerly most people tolerated them as a nuisance not worth mentioning and were even inclined to believe

them when they said they were only interested in saving American democracy from Fascism. But the conduct of these American reds since the Russians invaded Finland has proved to every unbiased person the sort of intriguers they are.

While practically all of our people have sympathized with the Finns in their hour of danger, Communists in the United States have obediently followed Stalin. They hint that the situation is still "cloudy" and we haven't heard the truth of it, that the Russians were obliged to invade Finland to "protect" Leningrad.

Many of the excuses made for Russia in this latest war of conquest are almost laughable. So while the Finns were debunking the Russian army at home they have very thoroughly debunked the Communists in the United States and stripped them of all pretence of working for democracy and the salvation of their fellow men.

PINE CREEK GOSSIP

Lola Bogar of Deary is visiting this week at the home of her aunt, Mrs. Fred Bailey and family.

Mr. and Mrs. Roy Glenn went to Kendrick Friday after baby chicks. Artalee Bailey visited over the week-end on Big Bear ridge at the A. W. Jones home.

Mr. and Mrs. Jack Bailey were Lewiston visitors Saturday. The two little Tout children spent Saturday night with their grandmother, Mrs. A. Riley.

Nolan Weeks is visiting this week with home folks. Mr. and Mrs. Jack Bailey and son visited Sunday in the Fred Bailey home.

Fred Bailey was a Lewiston visitor Tuesday and Wednesday.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Elk Ridge Common School District No. 17, Latah County, Idaho

Notice is hereby given, that the annual school meeting of Elk Ridge Common School District No. 17, County of Latah, State of Idaho, will be held on Saturday, the 20th day of April, 1940, at the schoolhouse in said District; the said meeting shall convene at 1:00 o'clock p. m. on said day and continue uninterrupted until the business properly coming before said meeting is disposed of.

1. One trustee to serve a term of three (3) years will be elected. 2. The length of time school will be taught in said District for the ensuing year and the seasons of the year in which the same shall be taught will be determined.

3. At the said annual meeting in said District the amount of money to be raised by special taxation shall be determined, the levy for which purpose shall not exceed ten (10) mills on each dollar of taxable property of the District; the purposes for which the money derived therefrom shall be expended shall also be determined, and in each instance the proportion of the whole amount which is to be used for the various and separate purposes shall be named.

4. At said meeting general questions pertaining to school interests will be taken up and disposed of. The name or names of all candidates for election of trustees together with the term for which nominated shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election.

The election at said meeting will be by secret and separate ballot. Dated this 29th day of March, 1940.

RALPH RICHARDSON, Clerk of Elk Ridge Common School District No. 17 of Latah County, Idaho.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Joint Common School District No. 24, Latah County, Idaho

 Fred Glenn delivered hogs to Lewiston Tuesday.
Seeks To Enjoin Federal Census
 Lewis C. Warden, Columbus, Ohio, attorney, has asked the federal district court to enjoin the director of the census from asking 24 questions which he contended are objectionable.
 Warden said the questions violated the federal constitution by invading his rights of privacy, depriving him of liberty without due process of law and invading the powers reserved to the people.
 The action, which asked a permanent injunction, was filed in behalf of himself "and all citizens of the United States."
 The new Bulgarian cabinet is headed by a college professor. The cables do not state whether he is a New Deal professor.

THE Bullitin

WE NEED MORE CONTENTED COWS
HAROLD THOMAS, Editor

EDITORIAL
Well, folks—Seems like it just can't quit raining. It was just getting to the place where one could get off a concrete sidewalk without bogging down—and then it rained. Seemed kind of funny two weeks ago to see Ed. Long and the old sprinkling wagon in operation—And then "The Rains Came." But such is life.
However, these rains have certainly made the pastures grow—and they in turn are bound to increase cream output—and that's something we are looking for. We need more cream—and our cash is ready to trade for it.
By the way—Are you using our butter? If not, why not? You can obtain it at any of the local stores. All you need to say is: "Pride O' The Potlatch" creamery butter, please. Try it for yourself. You'll buy it again and again.
Read the Bullitin—keep posted.

Surgeon: "Go and get the name of the accident victim so that we can inform his mother."
Attendant: "He says his mother knows his name, sir."
Here's to man! He is like a kerosene lamp; he is not especially bright; he is often turned down; he generally smokes; and he frequently goes out at night.
Politicians think they do no wrong. Their actions frank have shown it. They've milked the public treasury so long. They really feel they own it!
The lowly cub reporter who was assigned to cover the class play of a high school came in for his share of literary fame when the following turned up in his writeup: "The auditorium was filled with expectant mothers, eagerly awaiting the appearance of their offspring."

ECLIPSE OF THE SUN (By Wickliffe E. Smith)

There will be an annular eclipse of the sun next Sunday, April 7. In most parts of the United States it will be known as a partial eclipse. In some of the south central states it will be annular. In Idaho and the surrounding states only about a third of the sun's face will be hidden. To the states further south, such as California, Arizona and New Mexico, more than half of the sun will be obscured. Away back in South Carolina the eclipse will be almost total.

A solar eclipse occurs when the moon comes between the earth and sun. This takes place not less than two nor more than five times a year, but always at new moon. It cannot be at any other time. If the moon's orbit around the earth coincided with the plane of the ecliptic there would be an eclipse of the sun at every new moon. Let us make this a little clearer—suppose the sun were cut through the center by a circular plate large enough to extend a hundred million miles beyond the surface of the sun. Now suppose this plate passes through the center of the earth along the equator. Now as the earth moves around the sun imagine it makes a yellow line on that plate. The yellow line would represent the ecliptic; and the plate would represent the plane of the ecliptic. Remember, the sun is the center of the yellow circle. If the moon, in its journey around the earth, followed the plate, or disk, as the earth does, we would have thirteen solar eclipses every year. But the moon does not do this. Its orbit is inclined five degrees from the earth's orbit. Therefore, half of the time the moon is north of the circular plate and half of the time south of it. The place where the moon passes through the plane of the ecliptic in going southward is called the "descending node," and where it cuts through on its way northward it is called "ascending node." Whenever a solar eclipse occurs the moon is always at or near one of its nodes.

Now do you know just what an annular eclipse is? This is how it happens. When the moon is in apogee—farthest from the earth—it is 26,000 miles further away from us than when it is in perigee—closest to the earth. If an eclipse occurs when the moon is in apogee the shadow is not long enough to reach the earth; and the apparent diameter of the moon, being less than that of the sun, the visible portion of the sun appears as a ring, or annulus. The moon is now north of the ecliptic and will be in apogee on April 5. It will then start toward the earth again and be in descending node on April 7. The eclipse will begin here about noon.

Spring Check-Up Important

Motorists who want to get maximum satisfaction from their cars next summer should take time out within the next few weeks for the spring check-up, lubrication and adjustment which every car needs in order to give a perfect account of itself during the months of warm weather ahead.

This is the advice of Ed Hedner, national service and mechanical manager for Chevrolet.

Dealers experience has shown that motorists are much more careful about installing their winter lubricants and anti-freeze in the fall than they are about taking the reverse step when spring rolls around. This is probably because they know that if the matter is neglected they are likely to awake some morning and find their engine frozen, or their transmission-case lubricant so thick that they cannot shift gears. There is no such worry to remind them to remove winter lubricant and drain out anti-freeze at warm weather's approach. But these details should be taken care of promptly with the coming of spring.

COMINGS AND GOINGS OF SOUTHWICK RESIDENTS

Mr. and Mrs. Paul Cherish are spending several days at the home of his brother in Spokane.
Mr. and Mrs. Nels Longteig spent last Wednesday with Mrs. Donna Berriman.
Mr. and Mrs. Given Mustoe and Jack spent last Wednesday evening in the Otto Schoeffler home.
George Hayward of Aurora, Ore., arrived Saturday morning to attend funeral services for his brother, Homer Hayward.
Those that spent last Friday in Lewiston were Mr. and Mrs. H. H. Morris, Mr. and Mrs. Fry, Mr. and Mrs. Carl Mustoe, Mr. and Mrs. John Cuddy, Ross and Jay Armitage, Geo. Hayward and Alfred Fry.
Mr. and Mrs. Willie Harris and family of Pullman spent Monday and Tuesday in the Gordon Harris home. Willie has had the misfortune to suffer a broken arm.
Sunday evening guests of Mr. and Mrs. Given Mustoe were Mr. and Mrs. Otto Schoeffler, Mr. and Mrs. Harve Southwick, Mr. and Mrs. Carl Mustoe and Mr. and Mrs. Virgil Harris and family.
Mr. and Mrs. Otto Schoeffler and Mr. and Mrs. Carl Mustoe helped paper at the Given Mustoe home on Tuesday.
Mr. and Mrs. Nels Longteig called at the Harl Whiting home on Tuesday evening.

CRESCENT CLIPPINGS

(Delayed)
Mr. and Mrs. Walter Dorendorf and family had as Easter guests Mr. and Mrs. Mike Forest, and Burton, Mr. and Mrs. Frances Forest, Gene, Jack, Ruby and Dollie Smith. In the afternoon Mrs. W. H. Loeser called.
Mr. and Mrs. Arne Kloster attended the Easter services in Kendrick and were dinner guests of her mother, Mrs. Rose Farrington.
Mr. and Mrs. Alfred Swanson and baby visited with Mr. and Mrs. Bill Riley and family Sunday.
Mr. and Mrs. John Darby and daughters attended the Easter services in Southwick. In the afternoon they visited with Mr. and Mrs. Wm. Kauder.
Mrs. Mabel DeLong visited with relatives in Moscow and Viola over the week-end.
Mrs. Charles Greenwood and Mrs. Arne Kloster visited one day this week with Mrs. Frances Forest.
(This Week)
Mrs. W. H. Loeser visited Sunday afternoon at the John Darby home.
Several are entertaining colds and the flu these days. Dorothy Dorendorf and Richard Watson were absent from school the first of the week, due to illness.
Saturday visitors in Lewiston included Mr. and Mrs. L. A. Watson and son, Gloria Swanson, Charlie Greenwood and John Darby.
Mrs. Mabel DeLong spent the week-end in Moscow.
Mr. Hanson and his partner are cruising timber for the Potlatch Forests. They are staying at the Knight home.
Herman Loeser and Theodore Dorendorf were Southwick visitors Saturday.

Marital Doings Make Odd News
The national matrimonial merry-go-round hit a new high in monkey-shines last week—

A Knoxville, Tenn., bank cashier's secretary married the cashier's assistant, and the cashier married the assistant's secretary.

A Danbury Conn., man sought a divorce on the ground his wife threw a pie at him, and a Birmingham, Ala., woman got a divorce because her husband threw a copy of "Gone With the Wind" at her.

A Framingham, Mass., man was arrested for heckling his estranged wife by pouring sugar in the gas tank of her car. A Wilkes-Barre, Pa., man who hadn't seen his wife for six years bumped into her (literally) in his car while she was marching in a parade.

When a Kennebunkport, Me., man's car broke down, he had a state policeman write a note to his wife attesting the delay.

A Boston man explained officially that the reason he was repeatedly late for work was that every time his bride started getting a meal for him, "she gets lost in pots and pans."

Lodi, N. Y.'s woman tax collector, running for reelection, was opposed by her husband. A 51-year-old New York man wrote the premier of Canada in search of a wife who could play the bagpipes.

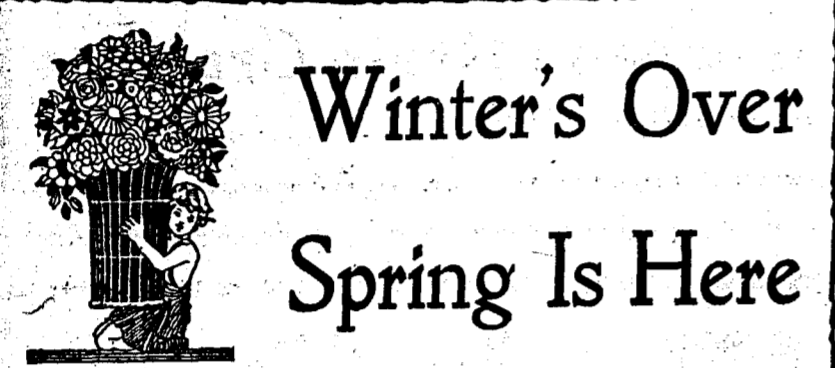

A 93-year-old San Jose, Calif., man rode to court on a bicycle to get a divorce. The National Divorce Reform league proposed that men be given alimony.

A Utah man won the hand of a Bushnell, Ill., woman who rejected him 50 years ago.

A Berlin, N. H., woman had a 12-pound 24th baby, and a Cadiz, Ohio, woman had her 24th and 25th.
And a 64-year-old Webster Spring, W. Va., woman married a man 22 years younger than many of her 47 grandchildren.

Isn't It The Truth?

Give the Kiowa County Signal, published at Greensburg, credit for the most effective safety program preached recently. Across the top of the front page in type as black as a hearse, it warns tersely—"drive like hell, and you'll get there."

Winter's Over Spring Is Here

Prepared Cereals Are In Order

- SHREDDED WHEAT BISCUITS, a New Price, 3 packages **29c**
- KIX, 2 Packages for 25c, and a Marmalade Jar for 1c, total cost **26c**
- 40% BRAN FLAKES, 3 Packages **29c**
- RICE KRISPIES, 2 Packages **25c**
- PEP, Large Packages, 2 for **25c**
- WHEATIES, 2 Packages for **25c**

OTHER SPRINGTIME ITEMS

Besides our many varieties of Fruit Juices, we also have a good supply of CANNED FRUITS — WE LIST: APRICOTS — PEECHES — PRUNES — PEARS — FIGS — GRAPES — CHERRIES — GRAPEFRUIT — and last, but not least — PINEAPPLE IN ALL CAN SIZES!

COME IN — See for yourself. Our prices are right — and quality the very best!
