KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, APRIL 11, 1940

NO. 15

WHAT HAPPENED HERE 20 YEARS AGO THIS WEEK

Arrangements have been completed by Alfred Crow, a former Kendrick resident, to put in a first-class bakery and confectionery. He has rented the building next to the millinery store and will remodel and renovate it. Mr. Crow went to Moscow Tuesday to purchase a 120-leaf oven and bakery fixtures, which will be installed as soon as the building has been put in shape. It has needed a bakery for many years and it will be a very substantial addition to the town. He has this new enterprise.

Man Meyer of Cameron returned from Lewiston Monday morning. He will return to the hospital next intervals to take further treatment as he has not fully recovered from his operation. Reece of Potlatch ridge returned Monday from Elk River, where he was called on account of the illness of his brother-in-law. He said the snow was three feet deep Sunday and that it was said to be further back in the timber it was four feet deep.

J. E. Nessley and her mother, E. E. Calkins, of Moscow, spent Sunday in the Knepper home. Mrs. Calkins will remain here several weeks with her daughter, Mrs. Knepper.

According to information received this week, the Cameron postoffice will be re-established. No one has as yet been named to act as postmaster. The service for the Cameron people is satisfactory and they prefer to have their own office again located in Cameron.

V. G. Brooks of Moscow, deputy state game warden, was in Kendrick Tuesday morning. While here he appointed Charles McKeever as game license vendor for Kendrick. Mr. Brooks stated that a change in the game laws will require farmers who wish to shoot squirrels to buy game licenses. The law now reads that anyone who wishes to carry a gun in a field or forest must first purchase a license. According to the new law anyone caught carrying a gun without a license is breaking the game laws of the state.

Big Bear Ridge-Ingvold Aas came over from Culebas the first of the week for a short visit with home folks. Mr. and Mrs. Bernice Nelson and little daughter, Bernice, left last week for Miss. They had spent the winter with her parents, Mr. and Mrs. Anton Nelson. About 20 young folks were entertained at the Kletth home last Saturday evening. A jolly time was had playing games and singing. At midnight a delicious luncheon was served.

Linden Items—The Misses Eva and Anna Smith are home from Whitbird, where Miss Anna has taught the past two years. Miss Eva was visiting friends there and attended the closing of school exercises. It is surprising to see so many farmers hauling hay from Kendrick to this vicinity. Tuesday eight loads were brought up. This is the first time in the history of this neighborhood that so many have been without hay. The unusually long and extremely cold winter accounts for it. If winter weather continues until April 13th, we will have had six months of winter. Mrs. Grant Peterson, who has been visiting her parents, Mr. and Mrs. Ira Foster, went to Southwick Saturday to visit relatives there. Quite a number of friends and neighbors gathered at the Clem Israel home Saturday and spent the evening in dancing. A good time was reported by those present.

Southwick Items—a carload of alfalfa hay, ordered shipped by a number of farmers arrived in Kendrick Monday. The hay came from Sunnyside, Wash. The farmers who received this shipment are: L. J. Southwick, Frank Thornton, Fred Whitinger, Wm. McClelland, J. L. Mabry, Henry Lettenmaier, Math Kazda, R. G. Farris and Lou Stalaker. Another carload is expected to arrive at Kendrick soon. Joe Kazda is absent on a trip to Chicago.

Are You Interested in Flax?
We have on our desk an article which came from a grain buying concern advocating the planting of flax. It says that there has been imported into this country from 11 to 15 million bushels of seed annually and that this year should be a profitable one for the growers of flax. The advances of ocean freight rates, including war risk insurance, has increased the cost of importing this product. Flax seed also enjoys the high tariff protection of 65 cents a bushel.
In 1935 we consumed 17 million bushels of flax. In 1939 this figure had climbed to 40 million bushels and another increase is anticipated this year. Farmers are permitted to seed flax under the soil conservation program as a nurse crop to specified legumes and grasses.
If farmers in this locality are interested in this crop they can obtain all necessary information from either of the local warehouses, both of whom will be prepared to put out contracts on this crop.

Among The Sick
Mrs. Elwood Pearson has been on the sick list for some weeks. She is up and about occasionally, but spends the greater part of her time in bed. She is improving slowly, however.

Confucius say: The way to keep out of fight is not to go where fighting is.

Speeding Serious Offense

Speeding is a serious traffic offense in the Beehive state, with the running of stop signs a close second, if we are to judge from arrest tickets issued Idaho motorists during the first quarter of the year, declared Capt. H. E. Carlson of the Idaho state police.

Utah has commandeered the services of some outstanding traffic authorities of the country and Idaho may well profit by their experience. If these men consider speeding and running stop signs dangerous to the public safety, why perhaps they are—so Idaho state police are going to hear down more heavily on these offenses in the future.

COMMERCIAL CLUB MEET IN CITY HALL MONDAY NIGHT

The regular monthly meeting of the Kendrick Commercial club was held in the City hall Monday night, convening at 7:30, with some 20 interested persons present. The usual dinner was dispensed with, due to the fact that the club did not feel financially able to guarantee the number of dinners required.

After the reading and approval of the minutes of the last meeting committee reports were asked for, but few were forthcoming as most of the committee heads seemed to be absent or had no report.

N. E. Walker of the Highway committee gave a report on the amount of money Idaho would receive during the year 1940 for various road activities and he also stated that work on the Texas ridge road was doing as well as could be expected but that the weather man was holding things up to a very unsatisfactory degree and work being much hampered.

Don Lyle reported that the F. F. A. boys were grooming several well-bred steers for exhibition at the Spokane Fat Stock show next month. The principal subject of the evening was the Boy Scout movement in Kendrick, which is being sponsored by the Kendrick Commercial club. Don Lyle also gave quite an enlightening talk on this subject and later showed several reels of pictures which had been furnished free of charge for use in furthering the Boy Scout movement. The subject of the picture was an extensive trip made by Scouts in the east. It was put out by the Goodyear Tire & Rubber Co.

N. E. Walker also announced that the regular meeting of the Latah County Planning board and the Latah County Chambers of Commerce will be held at Troy Monday night, April 15, and urged all that could to attend.

Since the meeting was devoted principally to the Boy Scout problem, there were some 20 or 25 Scouts present. They presented a very neat appearance, most of them having neckerchiefs and several had on full uniforms. Scouting is a splendid movement and the Commercial club is glad to sponsor it.

Reseal Farm Stored Wheat

Latah county farmers who have commodity loans on their 1939 wheat have until April 30 to pay off their loans and take full title to the wheat, or arrange to re-seal farm-stored wheat for another 12-month period. It will not be permissible to re-seal warehouse stored wheat for 1940.

The announcement was made this week by Clarence V. Brabb, member of the county Agricultural Conservation Committee in charge of wheat loans.

Of 50 loans in the county, involving 919,953 bushels, 217 loans already have been liquidated up to March 31. Over the state approximately 50 per cent of both farm-stored and warehouse-stored loans have been liquidated.

If borrowers on warehouse stored wheat do not pay back the note, plus interest and carrying charges, they will be expected to surrender the collateral wheat to the Commodity Credit Corporation.

If farmers have wheat under loan stored in bins on their own farms, they may redeem it, deliver it to the corporation and receive a 7 cents per bushel storage payment, or re-seal it by extending their loan until April 30, 1941.

Farmers who re-seal their farm-stored wheat are paid 7 cents per bushel storage advance immediately, from which is deducted, however, interest on the loan and cost of insurance carried by the corporation from the date the loan was made until April 30, 1940. If sealed wheat is redeemed by the grower between April 30, 1940, and April 30, 1941, he must repay the loan and the 7 cents storage advance as well, plus interest from April 30, 1940. If the wheat is delivered to the corporation after April 30, 1941, growers will be paid an additional 6 cents storage.

Borrowers who re-seal their wheat must renew their own insurance on the stored wheat.

The wheat market has been holding very steady in recent weeks despite the large marketings of loan wheat. Because of the favorable price, it is hard to predict how much wheat will be re-sealed. Liquidations of farm-stored wheat so far have kept pace with warehouse-stored wheat liquidations. Last year, in the nine Idaho counties in which re-sealing was possible, approximately 271,000 bushels were resealed by borrowers.

Remodeling Home

Lester Crocker is quite busy these days in his spare time remodeling the interior of his home, and when the improvements are finished it will add greatly to the comfort and convenience of it.

The 4-H club girls are getting along quite nicely with their club work.

L. J. Southwick was a Lewiston caller Tuesday.

Preparing To Remove Logs

Wm. Dahmen is preparing to take out about 500,000 feet of logs from the Lohman place in Waucher gulch. He has re-enforced the bridge across the Potlatch creek and has built a bridge across the small creek coming down the gulch by putting in some 200 logs to fill up the ravine level with the highway.

Rain And More Rain

This section of the country has certainly been blessed with an abundance of moisture. Sunday was quite a pretty day, although it carried its usual shower, Monday was almost a repetition of Sunday, but on Tuesday the usual heavy rain fell—with Wednesday a repetition of Tuesday.

This is the season when the man who takes a cold bath every morning in the year quits being a liar.

Duck Pond Drained

Ed. Long has been quite busy the past week installing a large culvert to drain the big "duck pond" which has existed for months between the W. A. Perryman and the Davis homes on the "S" curve in the west part of town.

This pond has always presented quite a problem, in that a car coming into town and meeting one headed out at this point, had to take a "ducking" or else stop.

However, this trouble has now been eliminated, and we want to say it is a real improvement.

New Soap Orator

Eleanor Roosevelt, one of the three presidents of our great and glorious U. S. A., has taken a job of orating for a soap company over the radio, twice a week. It wouldn't be so bad if she, or someone else could recommend a soap that would take the dirt out of politics.

As our late lamented "Teddy" Roosevelt used to call them: there are still plenty of "mollycoddles" and "muckrakers" on both sides of the fence.

Work Progressing

Work on the new Texas Ridge road project, sponsored by the Kendrick Highway District, and using WPA labor, is said to be progressing at a satisfactory rate, although better progress could have been made had it not been for the excessive rains of the past weeks.

When completed this road will indeed be a boon to the residents of that section, as well as a boost for the Kendrick trade area.

No New Word

Nothing new has been received on the road reconstruction program on the "missing link" between Kendrick and Juliaetta, but if original plans are adhered to, work should start on it some time the latter part of this month.

The state maintenance crew have been doing their best, but it's just impossible to make a silk purse out of a sow's ear. There just isn't any gravel left to work with.

MRS. J. M. KIME, SOUTHWICK PIONEER, PASSES

Flora Bell Graham was born on February 6, 1856, in Warren County, Iowa, and departed this life April 6, 1940, at the home of her daughter near Spokane, Wash., at the age of 84 years and two months.

In 1874 she was married to Jarvis M. Kime, who preceded her in death, passing away in 1930. To this union was born six children, three sons and three daughters; two daughters, Grace and Mary, preceding her in death.

In 1901, she, with her husband and four children moved to Southwick, Idaho, where she resided until about six months ago, when she went to stay with her daughter. She was a member of the United Brethren church of Southwick.

She leaves to mourn their loss one brother, M. B. Graham of Ahsahka, Ida.; three sons, Claude of Southwick, George and Charley of Teak-ean, Ida.; and one daughter, Mrs. E. H. Rozelle of Spokane. Twelve grandchildren, 10 great grandchildren and a host of other relatives and friends also survive.

She will be remembered throughout the community for her help in times of sickness among friends and neighbors.

Funeral services were held in the United Brethren church at Southwick at 10:30 a. m. Tuesday, April 9, with Rev. Elmer Atkinson officiating, assisted by Rev. Willard Turner. Music was furnished by Mr. and Mrs. M. N. Benjamin and Mr. and Mrs. Clarence Henderson with Xena Weatherly at the piano.

Ballbearers were John Lettenmaier, Wm. Kauder, Glen D. and Russell S. Betts, Roy Martin and Harve Triplett, with Dan Ziemann in charge. Interment was in the Southwick cemetery, by the side of her husband, J. M. Kime, the last Civil War veteran of this territory.

Card Of Thanks

We wish to think the kind friends and neighbors who so kindly assisted during the illness and death of our mother and grandmother, Mrs. Flora B. Kime—Mr. and Mrs. E. H. Rozelle, Mr. and Mrs. Claud Kime and family, Mr. and Mrs. George Kime and daughter, Mr. and Mrs. Charley Kime and family, Mr. and Mrs. Earl Kime and family, Mr. and Mrs. B. W. Pressnall and family, Mr. and Mrs. Herman Smith and family.

Bean Acreage Intentions

According to the March 1 intentions, to plant report, just released, farmers in the United States plan to increase the acreage of beans in 1940 by 11 per cent. This intended acreage of 1,935,000 acres for 1940 is about 1 per cent less than the 1939 average acreage planted for the country as a whole. The 10-year average planting has been 1,949,000 acres, during which time the average harvested acres has been 1,730,000. If the acreage reported as intended is actually planted, there should be about the same abandonment and crop failure as over the 10-year period, the harvest of beans in 1940 will be from a slightly smaller than average number of acres. On this basis, assuming a yield the same as last year of 898 pounds per acre harvested, the total production in 1940 would be about 15,000,000 million bags of 100 pounds each. This would be about two million bags above the normal consumption, but only about one million bags above the record 1935-36 consumption of 14,000,000 bags.

However, with an average yield, production will be about one and a half million bags less than normal consumption. The increase in acres over last year is general throughout the important bean producing states of the United States, and the increase ranges from 7 to 20 per cent in all states except California, where only a 2 per cent increase in intended acreage is reported.

Idaho bean growers showed intentions of planting 128,000 acres to beans in 1940. This is an increase of 15 per cent over the 1939 planted acres. Although this is a large increase over last year, it is only 3 per cent above the 10-year average acres planted.

United States exports of beans during January were the largest for any month in recent years and amounted to 97,430 bags, over half of which went to Europe. January exports brought the season's total since September 1 up to 353,214 bags, compared with 71,437 bags during September through January of last season and only 32,110 bags the average for the corresponding five months during the previous five years.

Returns From California

Frank Roberts, who has spent the past several months in Oakland, Calif., returned home Friday, stopping off enroute to visit the home of a daughter in Rainier, Oregon, and of another daughter in Irrigon, Oregon.

Mr. Roberts reports a most pleasant time, saying that he visited as far south as Modesto, Calif., but most of the winter was spent in Oakland. He reports a great deal of building going on in that section, and everybody busy, although just how good times are he was unable to say, since appearances to a stranger, are often deceiving.

Constructs New Wrecker

Jay Stout last week finished the construction of a new wrecker—utilizing for the purpose a 1½-ton truck. The new unit is complete with power lift crane, tow bar, etc., and should prove very satisfactory.

NORTHWEST WHEAT PRICES ADVANCE SLIGHTLY

Wheat futures in Pacific Northwest markets advanced slightly along with Midwest markets during the week ending April 5, states the Agricultural Marketing Service in the Weekly Grain Market Review. Cash wheat was also slightly higher along with futures, principal classes showing advances of ¼c to 1c per bushel from a week ago. A feature of the market situation was the continued movement of cash wheat from this area to central western markets, due to the spread between prices at Chicago and the Northwest. Export demand was light with sales possible only at relatively large subsidies. Sales of around 1,400 tons to Norway was reported from this area during the period, with no sales to other importing countries reported.

Cash wheat prices at Portland on April 5 were shown as: soft white and western white, 83¼c; western red at 83c; and ordinary hard red winter at 83¼c per bushel, all basis No. 1 grade in bulk.

Wheat receipts at Puget Sound and Columbia river terminals were moderate at 640 cars for the week. Indemnity prices on flour for export remained at \$1.15 to the Philippines and \$1.40 per barrel to China and Hong Kong. Reports indicated sales to the Philippines were only moderate during the period and very small to China under the indemnity program. Demand for Pacific Northwest wheat from California remained light and confined to small lots of special classes. Continued sales of both wheat and flour for rail shipment to midwestern points from interior Oregon and Washington points was reported.

Wheat millfeeds markets maintained a firm tone in the area due to good demand and light output. Crop conditions were reported very good with ample moisture making for good winter wheat conditions and also for spring wheat plantings.

The San Francisco wheat market was quiet but maintained a steady tone during the past week, since light offerings and advances in other markets tended to offset the limited demand. Prices held practically unchanged from a week ago.

At Chicago wheat futures were 1½c to 2¼c higher with private crop reports and weather conditions in the southwest dominating the price situation. Receipts were somewhat higher for the week but there was fairly good demand for cash wheat and premiums were steady, following the advance in futures closely. On April 5 No. 2 red was quoted in that market at \$1.08 to \$1.09½ and No. 2 hard at \$1.08 per bushel.

Large receipts at Minneapolis kept the tone of the cash market slow with the premium range at around the season's low point. Minneapolis receipts were 1,800 cars of all classes of wheat, while Duluth unloaded 694 cars. Mills were reported already holding large cash supplies and so gave the market only fair buying support. Elevator interests were the large takers.

Liquidation of Federal loan wheat, while continuing at a good rate, exerted less pressure on the cash market and premiums at Kansas City regained a part of last week's losses. Receipts were again large, totaling 712 cars. All classes of buyets remained active during the week, the inclination seeming to be to accumulate supplies because of the unfavorable new crop report. Wheat continued to come to Kansas City from wide areas, including Texas, upper Missouri river markets and the far west, because of the relatively firmer basis at this point than elsewhere. Receipts at other winter markets also remained large, the total at nine markets including Kansas City, aggregating 1,661 cars against 1,969 the previous week and 1,337 a year ago. At the close of the week No. 2 hard winter was quoted at Kansas City at \$1.03 to \$1.05.

Private trade estimates as of April 1, forecast a winter wheat crop about 30 million bushels larger than was estimated on the basis of the official December 1 conditions. Final outturns, however, are still uncertain since moisture supplies are still well below normal except in California and in the Pacific Northwest. Precipitation during the week ending April 2 was slightly above normal in the spring wheat territory but still well below normal in all of the hard winter wheat areas and most of the soft winter wheat producing sections.

Reports from the Danubian countries in Europe showed less winter damage than was expected earlier in the spring, but damage was still threatened from floods in Hungary and Yugoslavia. Warmth was generally needed for proper growth.

The Australian wheat board has appointed a selling committee in Shanghai, consisting of Shanghai representatives of three large exporters. Reports indicate that Australian wheat is being offered in North China at prices which would require a subsidy of more than 35c per bushel on United States wheat to compete with the Australian offers.

Local Clean-Up Day Observed

Local "Clean-Up" day, Tuesday, April 9, was quite well observed, but it seems to us there is a lot more that might have been eliminated here and there. The village crew did their part, but they can't be expected to clean up the premises as well as haul off the junk.

It seems to us that a "Clean-Up" day about once a month would be a mighty fine thing, since the stuff just will accumulate.

A Long Step Toward Success Is Attitude

You Have All Heard the Old Saying: "A Winner Never Quits; And a Quitter Never Wins"

It's an old, old saying, but it is just as true today as it was when first uttered. As it is with people, so it is with towns. It's the continuous, never ending urge for bigger and better things that causes a town, a community or an individual to grow, to become more important, more of a success.

For many years you have called Kendrick the "Home Town," and you have helped it grow from a single store in a creek bottom to what it is today.

Cooperation started Kendrick growing — and it will be the prime factor in continued growth of our community. Hard times have come and gone. Fire and floods have wiped out the town, not once, but three times—and still Kendrick has grown. It's business houses and business men are here to serve you. As the busy spring season progresses we want you to feel that Kendrick business men are every-ready with the spirit of cooperation.

Kendrick's business houses are filled with the items you will need during the busy spring season. Make your headquarters here—in the town you helped to build.

We are prompted to sponsor this message to the people of Kendrick and vicinity through our interest in community welfare.

THINK IT OVER

By F. R. Stevens

The Bill of Rights — Plus!
Much has been said recently about our Bill of Rights, freedom of religion, of speech, of the press, of petition, etc. Much more should be said of them now that foreign theories are threatening to wipe them out. These liberties are basic. If any one of them is thrown out our American government goes out with it.
However, the Bill of Rights does not define all our liberties. No Bill of Rights could do this. Individual rights cover such a wide range that to detail them in a constitution would weaken them.
Alexander Hamilton, one of the soundest and most constructive members of the Convention, opposed a Bill of Rights as part of the Constitution on the ground that the Declaration of Independence and the preamble to the Constitution constituted an unchangeable Bill of Rights. I quote from him as given

in the Federalist No. 84: "The preamble to the Constitution is a much better recognition of popular rights than volumes of such apophorisms as commonly compose bills of right."
Our people wanted to make absolutely and legally sure of certain inalienable rights so that they were written in detail in the Constitution as the first ten Amendments. Thus these amendments emphasize these rights which originate in the Declaration of Independence. They accepted Hamilton's contention that our liberties were protected under the Constitution where no amendments could alter them. Therefore Article 9 of the Bill of Rights was inserted: "The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people."
Our flag speaks for the Declaration in all its purity. It waved over the Land of the Free before the Declaration of Independence and the preamble to the Constitution constituted an unchangeable Bill of Rights. I quote from him as given

imate personal actions are controlled by a Dictator; where life, religion, speech, property, belong to that dictator, not the individual; where a dictator can inflict degradation, suffering and death without reason.
There is Dictatorship. Here is Freedom. Although this freedom has been threatened, there is a nationwide surge of patriotism that has come repeatedly in the past and will come again to sweep the enemies of American democracy from our midst.
On the "Farm and Home Hour" broadcast of March 30th, we heard the story of a German immigrant, one Harry Straus by name, who has brought to this country a process of utilizing excess agricultural material in making fine paper of the type heretofore imported. In his North Carolina plant he now employs 700 men, using excess material and labor in a new industry.
In Delaware the DuPont company has developed a process for making a fabric claimed to be superior to silk. After experimentation sufficient to warrant success, the company will erect a large manufacturing plant to supply this fibre for the manufacture of stockings and other clothing.
The comparatively new crop to the American farmer, soy beans, is coming to the front for many uses. Its food value is being recognized and it is now taking its place in industry. From it scientists have produced a substitute for imported oils and metals in automobile manufacture.
Flax is again being grown on land previously devoted to crops for which the need is now diminishing. Thus we shall have more clothing fibre and linseed oil to take the place of imports. Tung oil is being slowly developed. The utilization of the waste of such crops as potatoes would give us added starch, potato flour and alcohol.
Once more, American initiative is finding the solution for some of our domestic problems.
Many people seem to be worried over the disappearance of our land frontiers. It is claimed that this indicates that we have reached the saturation point as to population. The fact remains that our soil can yet produce twice its present output. Science each day develops new uses for old products.
In these new frontiers lie the possibilities of material for more and better food, more comfort in clothing, housing, transportation, more beauty for the home and grounds, more life and freedom for the individual.
Freedom comes with expansion, not with restriction and regulation. Individual initiative, which is the basis for our American institutions, will again open the doors to peace and prosperity.
Many words and well known expressions of American thought have lost the meaning with which our founders clothed them and the landmarks of our progress are lost in the fog. The terms "Liberty" and

"Americanism" have been maliciously wound around the most vicious Old World propaganda that this land of the Free has ever known.
For that reason in discussing Communism I quote its definition from a standard dictionary: "Common ownership of property, and state control of labor, religion and social relations."
Compare this with Article One of our Bill of Rights, the anniversary of whose birth we celebrated recently: "Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof."
The whole spirit of the Declaration of Independence breathes of our inalienable right to worship God as we choose. We are entitled to the dollar we have earned by the "sweat of our brow" and to enjoy our social relations with our neighbor.
Communism is a direct antithesis of Freedom. It denies every individual Right which we Americans claim as inalienable. As a government it has been a failure throughout all history. It brought colonial Virginia to the starvation period where 88 per cent of the people perished by hunger. In smaller units, such as Oneida community of New York State, it found itself in conflict with American thought and disappeared.
The Russian government used it as a springboard to place in power dictators who ignored human rights as did the Czars whom they displaced. Yet the Communists of this country are brazen enough to call Communism "20th Century Americanism," when it is not Americanism of any time or place. It wars against every principle which we consider sacred.
To promote its vicious doctrine in this country the Russian group has purchased outright those of feeble American thought, has engineered fake passports in violation of our laws and agreements, and has supplied those dupes of foreign ideals with money to overturn our American liberty.
They are working not only as a Communist party but are boring into our established institutions with the hope of wrecking them.
Communism is a representative, together with Nazism, of a collectivistic government of dictatorship. The Nazi-Soviet pact is evidence of this similarity.
It is not sufficient to say that this potential party must be thrown out of our country if Freedom is

to continue, but the communistic line of thought that is showing itself in much of our legislation must be absolutely eradicated by education or otherwise. Our greatest danger lies there.
AND YOU PAY THE BILL
By Glenn Balch
One type of taxation receiving considerable attention just now is the "Sales Tax." This tax has been popular to the front by the educational association, which is sponsoring a movement to have it placed on the ballot as an initiative measure at the November election.
The history of this type of taxation is interesting. Idaho had a sales tax a few years ago, but it was voted out by a decisive majority when put up to the voters in a general election.
In deciding to sponsor the new initiative the educational association has displayed considerable courage. It is the generally accepted conclusion that this type of tax is not popular with Idaho citizens. Yet the association has undertaken to secure the approximately 18,000 signatures necessary to place the measure on the ballot. It is the association's contention that the people should be permitted to express themselves as to whether they wish to use "his form of taxation to support the public school system."
There are some very decided and outspoken partisans on both sides of the sales tax question. Some contend that it is a fair form of taxation and should be used to reduce the burden on real property. Others insist that it places the burden on the man least able to pay, the poor man who spends practically all of his earnings buying clothing and supplies for his family.
Then, too, there is the question in the minds of some as to whether the sales tax, if enacted, would be used to reduce other taxes. These insist that taxes are never reduced and that new forms of taxes are just added to the total to "give the politicians more money to spend."
The idea is prevalent in some quarters that the educators desire to use the sales tax as an opening wedge for a teachers' retirement plan. Whether true or not, this idea is working strongly against the proposal.
With but few exceptions those persons of prominence have refrained from taking either side of the controversy. Both the governor and his tax committee have very carefully maintained a position of neutrality. The governor takes the position that the matter is being put up to the people and that, either way, he will cheerfully abide by their decision. One of the principles announced by the committee when it first started its study was that it would neither seek nor advocate any new forms of taxation.
It will be interesting to watch the progress of the movement and its success or failure may have an important bearing on the 1941 legislature, which will undoubtedly devote a large share of its time to tax legislation.

High Spots on Record-Breaking Run

Signs of the times in a motor age—these highway markers tell the story of a two-year, 100,000-mile truck test run recently completed by Chevrolet. In Canada, Mexico and every state of the Union, the truck operated on all types of highways and under every conceivable weather hazard, setting a new world mark for sustained and certified automotive operation, under the sanction and official observation of the American Automobile Association. The unit carried a 4,500-pound "load." An average of 15.1 miles per gallon of fuel was maintained throughout the 100,000 miles, at an average operating speed of 33.07 miles per hour. Oil mileage was correspondingly high—1,072 miles per quart.

Calls For Economy

Economy in government can't be anything but a dream until the advocates of economy start making as much noise as the groups that continually demand more government spending. During the first session of the 76th Congress, 1,236 petitions of a total of 6,000 presented had to do with expenditures—and of these 1,236 petitions, 1,212 advocated federal expenditures for various purposes, while only 24 urged reduced spending.

That's a ratio of 50 to 1. For every request for economy, Congress received more than half a hundred requests for spending. More than 500 of the petitions demanded the enactment of various old-age pension bills; more than 300 urged increased appropriations for relief and WPA. Significantly, 17 petitions came from state legislatures and 42 from local government units and officials.

There can't be economy, there can't be lower taxes until the citizens take action designed to counteract the effect upon lawmakers of the spending demands of organized pressure groups. The heavily burdened taxpayers must make their voice heard. It's going to be difficult, not to say impossible, to stop government extravagance unless those who believe in economy make

ORDINANCE NO. 240

AN ORDINANCE GRANTING TO THE WASHINGTON WATER POWER COMPANY, a corporation organized under the laws of the State of Washington, and its successors and assigns, the right to construct, erect, maintain, operate and use wires for conveying electricity for electric light, electric heat and electric power purposes, and also to erect, construct, maintain, operate and use wires for telephone purposes in its private business, and to erect poles and other necessary supports therefor and to place thereon cross-arms and other equipment, and to construct conduits on, over, along, under and across the streets and alleys within the corporate limits of the Village of Kendrick, Idaho, as they now exist or as they may hereafter be changed, and granting the use of the streets and alleys therefor within the corporate limits of the Village of Kendrick, Latah County, State of Idaho.

BE IT ORDAINED by the Chairman and Board of Trustees of the Village of Kendrick, Latah County, Idaho:

1. That THE WASHINGTON WATER POWER COMPANY, a corporation organized under the laws of the State of Washington, its successors and assigns, hereinafter called the "Grantee", be and it is hereby granted, for the term of twenty-five (25) years from and after the passage of this Ordinance, the right, privilege and franchise to construct, erect, maintain, operate and use wires for conveying electricity for electric light, electric heat and electric power purposes, and also to erect, construct, maintain, operate and use wires for telephone purposes in its private business, and to erect poles and the necessary supports therefor and place thereon cross-arms and other equipment, and to construct conduits over, on, along, under and across the streets and alleys within the incorporated limits as they now exist, or as they may hereafter be changed, of the Village of Kendrick, Latah County, Idaho.

2. There is further given in connection herewith, unto the said The Washington Water Power Company, its successors and assigns, the right during the life of this franchise to cut and trim any and all trees growing in or over the streets or alleys of the said Village of Kendrick, Latah County, Idaho, that might or may interfere with any wires, poles, conduits or other apparatus of the said The Washington Water Power Company, its successors and assigns, provided that in no case shall any of said trees be cut or trimmed to a height of less than twenty-five (25) feet above the level of the streets or alleys, except on Main Street where the trees may be trimmed to a height of not less than thirty-five (35) feet.

3. The poles, wires and other apparatus mentioned herein shall be constructed, erected and maintained in accordance with the laws of the State of Idaho relating to electrical construction, and any rules or regulations adopted by any commission of the State of Idaho having jurisdiction over electrical construction in the State of Idaho, and also said construction shall be in such manner as to prevent and guard against accidents or damages as nearly as possible to any persons who may be properly using said streets and alleys.

4. The said Grantee herein shall have and is hereby given the right and privilege to make any and all necessary or proper excavations and obstructions in any of the streets and alleys of the said Village for the purpose of building, erecting, repairing or changing any of the poles, wires, conduits, cross-arms or other appliances or apparatus used or to be used in connection with the above purposes. Provided, however, that if and whenever the said Grantee, its successors or assigns, shall excavate in or obstruct any of the said streets or alleys of the said Village of Kendrick, Idaho, for the purpose aforesaid, it shall return the same to the order and condition that they were in, before they were excavated or obstructed, as soon as practical and within a reasonable time after such excavation or obstruction, and that the said Grantee herein, its successors or assigns, shall at all times hold the Village of Kendrick, Idaho, free and clear from any and all damages that may result to any person, persons, firm or firms, corporation or corporations, or to any property of the same, by reason of any erection, construction, maintenance or operation of any of the things herein authorized to be constructed and maintained by it.

5. The said Village of Kendrick, Idaho, reserves the right to cut away and remove any of such wires, poles or apparatus herein provided for in case of general conflagration and necessity therefor. The said Village in such case shall not be held liable for any damages to the Grantee, its successors or assigns, on account of any cutting away or removal of any poles, wires, or other appliances under the last named circumstances.

6. The said Grantee, or request of the Board of Trustees of the Village of Kendrick, Idaho, shall remove or raise its wires so as to permit the removal of any house or building when the same may be necessary to permit the removal of said building on, over and along the streets, alleys or public highways of the said Village to the point of destination, provided that the party to whom a permit has been granted to remove any such building, on, over and along any of the streets or alleys of the said Village of Kendrick, Idaho, shall pay to the Grantee hereunder the cost incurred in removing or changing the wires of the Grantee so as to permit the removal of said building as aforesaid.

7. That in consideration of the rights, privileges and power herein granted to the Grantee herein, its successors and assigns, it, the said Grantee, its successors and assigns, shall at all times keep and maintain a plant of sufficient size and capacity to supply the Village of Kendrick and the inhabitants of the Village of Kendrick, with such an amount of electricity as they may reasonably require, and shall, in the absence of accident or misfortune from some cause beyond its control, furnish a continuous, twenty-four (24) hour service, and should the said plant, or any part thereof, become broken, injured or destroyed, the same shall be replaced as soon as it is reasonably practical. The Grantee shall also furnish to the Village of Kendrick to be used within the incorporated limits of said Village of Kendrick, as many street lights and of such candle power as may be designated by the authorities of the said Village; Provided, that the said Grantee, its successors and assigns, may have and it is hereby given the privilege of making and enforcing such regulations and rules for the installation of any service to the Village of Kendrick, or to the inhabitants of the Village of Kendrick, and require such advance deposits to be made as may be necessary to insure the making of payments as may be permitted and approved by the Public Utilities Commission of the State of Idaho, or such other body acting for the said State of Idaho in the capacity that the said Public Utilities Commission now acts.

8. The rates to be charged by the Grantee herein, its successors or assigns, for the electric service, shall be filed with the Public Utilities Commission of the State of Idaho in accordance with the laws of the said State. 9. It is understood that this franchise is not an exclusive franchise, and the said Village of Kendrick, Idaho, reserves unto itself the right to grant other franchises for the purpose for which this one is granted. 10. This franchise and all of its provisions shall be void, inoperative and of no force or effect whatsoever, unless the said Grantee named herein shall, within thirty (30) days after the passage and publication thereof, file with the Clerk of said Village of Kendrick, Latah County, Idaho, its acceptance thereof, in writing. Introduced and read the first time the 2nd day of April, 1940. Read the second time the 2nd day of April, 1940. Read the third time the 2nd day of April, 1940. Passed the 2nd day of April, 1940.

INTERESTING NEWS ITEMS FROM KENDRICK SCHOOLS

Junior Prom The annual Junior Prom, about which you have been hearing so much for the past month, will become a reality next Friday evening, April 12, at 9:00 o'clock. As previously announced Frank Fix and his Lewiston Troubadors have been engaged for the evening. Admittance will be by invitation, which must be presented at the door. This past week the Juniors and their advisor, Miss Graham, have really been both working and worrying constantly about the decorations, the theme of which will be "Fairyland," the dance programs carrying out the motif. They are expecting a large crowd, so don't disappoint them. Come on out to this really worthwhile event.

Senior Annual With less than six weeks of school remaining, the Senior class has been laboring (and we do mean laboring) on their year book. Editor Barbara Long, with her chief assistants, Helen Newman, Lloyd Farrington, Myra Kanikkeberg and Ervin Draper, work nightily, and very seriously, too. But they promise it will be completely finished by the end of school.

Apologues Due to the fact that there was a vacation for three days last week while the teachers were attending institute, there seemed to be a real scarcity of school news—but we'll try to have more next week.

CRESCENT CLIPPINGS

Mr. and Mrs. Erle Hudson and family and Lloyd Kimbley visited Saturday evening in the Charlie Greenwood home.

Mrs. Francis Forest is visiting at the Mike Forest home. Miss Gloria Swanson is doing the work for Mrs. Forest while she is away.

EDITORIAL

Well, Folks—Seems like nobody is ever just satisfied with the weather, anymore. Our local squirrel "Dan'l Boones," Ed. Deobald, Joe Watts, Marvin Long and Bill McCreary are complaining that the rain and resultant tall grass and alfalfa are interfering with their squirrel shooting operations—but frankly, it pleases us. Tall grass and alfalfa means fine pastures, and fine pastures mean more cream—and more cream is what we need—and expect to pay for—in cash. No waiting, no fuss, no bother. Cash on the line and a steam-sterilized, ready to use can returned to you. Bring in the cream, take home the cash and can.

By the way—this fine spring cream makes mighty fine butter. You can obtain ours at any of the local stores. Ask for it by name. It will please you.

Sponsor Animal Circus
The Parent-Teacher Association of the Kendrick schools has booked an animal circus to appear in the H. S. gym. on Thursday evening, April 25, at 7:30 p. m. The principal part of the "circus" will be different acts by a troupe of monkeys, they doing all sorts of tricks, such as wire walking, barrel rolling, etc. There will also be live mammals, reptiles, birds, etc.
The menagerie will include marsupials with a pocket for carrying the young; denizens of the American desert 100 years old; birds with four toes; animals with 36 teeth and strong retractible claws, and a very strange specimen, the connecting link between the past age of reptiles and the present age of mammals.
Please remember the date—April 25—in Kendrick gym.

To Hold Bull Sale
Lewiston's sixth annual Combination Hereford and Shorthorn bull sale is scheduled to be held on Wednesday, April 24, at Round-Up park, Lewiston, at which time a number of Hereford and Shorthorn bulls will be sold, as will a few shorthorn heifers. All these animals have been T. B. and Bangs tested.
Judging and placing of bulls will begin at 10:00 a. m., and the sale at 1:00 p. m. A catalog of the animals may be had by writing J. W. Thometz, manager, Lewiston, Ida. The Stockmen's banquet will be held the evening preceding, Tuesday, at 6:30 p. m.
