

# HARVEST TIME IS HERE...

## AND WITH IT HARVEST NEEDS!

Why Not Purchase Them In Kendrick? . . . It's Your Home Town!

No one can know your harvest needs better than the Home Town Merchant, for, in daily contact, he realizes the immediate needs you may have — whether it be in the line of personal services or equipment. He is qualified through years of service to help and advise you.

In the busy days ahead every minute counts — and the immediate presence of these personal aids or supplies are of vital importance — so plan to lean on the Kendrick community this year in the supplying of your harvest needs. You will find just the items desired — and the price as low or lower than those requiring many more miles of travel.

So this year — as in years gone by — headquarter in the Old Home Town — Kendrick!

We are prompted to sponsor this message to the people of Kendrick and vicinity through our interest in community welfare.

**Poor Evidence**  
Jemima Johnson had haled her ex-prize-fighting husband into court, charging him with constant wife-beating. Displaying a couple of cauliflower ears, a broken nose, lacerated mouth and blackened eyes,

she demanded that Rastus be punished.  
"Rastus," said the judge, "you've heard what your wife testified. Have you anything to say?"  
"Aw, jedge, don't pay no 'tenshun t' her," replied Rastus. "She's punch drunk."

**BIG BEAR RIDGE NEWS**

The Home Demonstration club met Friday afternoon. Hostesses were Mrs. Gerald Ingie and Mrs. Floyd McGraw.  
The Vacation Bible school of Big Bear ridge will give their closing program Friday evening at 8:00 o'clock at the Chapel. Children will give stories and verses learned during the Bible school. Everyone is cordially invited.

**Another Double Feature**  
 The week's offering at the Kendrick Theatre will be another double feature. The first offering of which will be Gene Autrey, the singing cowboy star in "Back In The Saddle," and he will be assisted, as usual, by Smiley Burnett.  
 The second offering will be the Weaver Brothers and Elviry, in "Arkansas Judge." The Weavers are a favorite hill-billy family, and thus, their newest offering, is said to be full of laugh-packed adventure, and of course, the moonshine still plays its part.  
 For those who love comedy and singing, these offerings should prove satisfying.  
 In addition the usual cartoon will be shown.

The old story that army shoes come in two sizes, too big and too little, is no longer true. Present day camp stores stock 90 different regular sizes of service shoes ranging in size from 5's to 12's in A to EEE widths. It can also furnish extra sizes up to 16's and 4 1/2's. Each issue of two pairs is supposed to last 270 days, including two mendings for each pair.

We have often heard the expression used as a joking comment: "The Dutch have taken Holland." But the next time it happens it won't be any joke—especially for Hitler.

**NOTICE TO CREDITORS**  
 Estate of Amos Moore, Deceased

Notice is hereby given by the undersigned, executor of the estate of Amos Moore, deceased, to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers within six months after July 3, 1941, the first publication of this notice, to the said executor at the law office of Adrian Nelson, Moscow, Idaho, the same being the place for the transaction of the business of said estate, in Latah County, State of Idaho.

CHARLES W. MOORE,  
 Executor.

Dated at Moscow, Idaho, June 28, 1941.  
 First pub. July 3, 1941.  
 Last pub. July 31, 1941.

**TENANT PURCHASE PLAN REOPENED FOR LOANS**

Latah County tenants, farm laborers and sharecroppers who wish to be considered for loans to purchase family-type farms under provisions of the department of agriculture's tenant purchase plan, should file applications now with the Farm Security Administration, announced C. P. Mix, county FSA supervisor, Thompson Abstract building, Moscow.

Under the tenant purchase plan five farmers are purchasing farms in Latah county. Two more additional loans will be made during the 1941-42 fiscal year. Applications are being taken now to give all the eligible farm families in the county an opportunity to have their qualifications reviewed and allow sufficient time to select farms and set up farm plans for the next crop year.

Only bona fide farm families with sufficient experience to qualify them for successful farm ownership are eligible. Preference will be given to married persons, those with dependent families, and to persons having sufficient livestock and equipment to carry on farm operations. They must be unable to secure credit for farm purchase from other sources.

Families approved for tenant purchase loans by the county tenant purchase committee will be made loans sufficient to purchase land, construct buildings and improvements, or to repair existing buildings and improvements if necessary. The loans are made for 40 years with interest at 3 per cent. Applications and full details of the program may be secured at the county supervisor's office.

**GRAIN MARKET**  
 (Continued From Page 1)

ed as far north as northeastern counties. In the Pacific Northwest grain crops remained in excellent condition although high temperatures in eastern Washington were unfavorable for spring wheat. Conditions at the first of July indicated a spring wheat crop of 241,000,000 bushels, of which 38,754,000 bushels were durum. The winter wheat crop was estimated at 682,321,000 bushels, making a total of 923,613,000 bushels, or approximately 107,000,000 bushels more than the 1940 crop.

No serious damage from stem rust in the spring wheat area has been reported but with an unusual supply of moisture, rust can still develop abundantly, according to official reports.

In the Canadian Prairie Provinces local showers were received in most sections with heavier rains occurring in scattered points in Saskatchewan and Alberta. The crop is well advanced and heading in Manitoba but conditions are poor in the south central and central districts of Saskatchewan, where stubble crops are virtually failures. Conditions in Alberta are fair to good but rain is needed to check deterioration in parts of the southwest and eastern central districts.

In Europe, weather was favorable for harvesting in the Balkan states. Crops showed some improvement during the month in Italy and Spain. War operations were hampering harvesting in southern Russia and considerable damage appears probable. In Australia good rains during July are needed to give the crop a good start. Cold weather has checked excessive growth and the crop is reported in favorable condition.

**Northwest Gets "Hot Seat"**  
 Hot spot of the nation for the past four days, the scorched Pacific Northwest look in vain for a promise of change in weather, which sent the mercury skyrocketing to 108 degrees Tuesday, and to even higher levels Wednesday.

Weatherman Edward L. Wells of Portland said he thought Wednesday might see temperatures drop slightly from yesterday's record highs, but that "there is nothing yet to indicate a break."

The heat sizzled from California to Alaska with North Dalles, Wash., again reporting the top mark of 108. Salem and Hood River, Ore., and Lewiston, Idaho, followed at 107 and Yakima and Stevenson, Wash., had 106. Ketchikan, Alaska, reported 85 degrees, the highest in four years.

Seattle's 97 was the hottest ever recorded in July and was only one degree below the city's all-time high. Portland wilted under a mark of 103 for the third successive day. Olympia's 103 tied a record established in 1876. It was 104 at Tacoma.

Shelton, Wash., had a top of 104 which broke its former all-time high of 97. A thermometer placed in the sun there registered up to 148 degrees.

Oregon towns reported these marks: Medford, 101; Roseburg and Eugene 102; Albany 104; Pendleton 103; Arlington 105. In Washington Walla Walla had 104, Ellensburg 101, Spokane 97, Wenatchee 104. Port Townsend on the usually cool Olympic peninsula had a new record of 82.

In Spokane the thermometer hit 97 in midafternoon but a breeze blowing steadily relieved somewhat the oppressiveness of the heat. The temperature rose to 90 at 9 a. m. and at 6:00 p. m. it was still 96.

The mercury played a bewildering game of dippy-doo at Seattle. After the peak of 97 was reached at 4 p. m., the temperature started to slide until it had dropped to 90 at 5:00 p. m. Then, within 10 minutes, it climbed back five degrees to 95. It stayed there until 6:00 o'clock.

"Nuts to you"—the idiom of present popularity, meant a rejection of a proposal during the medieval ages in England. The suitor would invite himself to supper at the home of the girl he desired to wed and if, at the end of the meal, the girl served him a plate of nuts, it meant his proposal was rejected.

The family skeleton used to be hidden in the closet—now we find it in beach pajamas.

## EDITORIAL

Well, Folks—Here it is the middle of July, and the warm, dry weather we have wished for so long seems to be at hand—and with that warm, dry weather, comes canning season (part of which is already gone) and this should serve as a last-minute reminder to get that locker box and have it well filled before harvest and the close of the canning season. If you haven't one, make a selection today.

And with harvest comes the busiest season of the year for the farmer and his family—so forget churning, bring in your cream and take out what butter you need. Remember, we pay "cash on the barrel head" for your cream. Bring in can when you next come to town.

about fifteen years.  
"And is your wife as pretty as she used to be?" asked the first.  
"Oh, yes," replied the second, "but it takes her much longer."

"I suppose you carry a memento of some sort in that locker of yours?"  
"Yes, it's a lock of my husband's hair."

"But your husband is still alive!"  
"Yes, but his hair is gone."

"John," she said, "I've got a lot of things I want to talk to you about."

"Good," John interrupted. "I am certainly glad to hear it. Usually you want to talk to me about a lot of things you haven't got!"

## NEW DRAFT SELECTIONS TO BE "NIXED" WITH OLD

The 21-year-old men who registered for Selective Service on July 1, will be integrated for induction among previous registrants with order numbers larger than the last inductees of their local board, Gen. M. G. McConnel, state director says.

Rather than to place these youthful new registrants ahead of or after the older registrants on their local board lists, it has been decided to integrate them proportionately.

For an example, if there should happen to be 10 new registrants in an area and 100 old registrants awaiting call, one new registrant would be placed after each group of 10 old registrants.

The order in which the new registrants will be integrated with the old ones will be determined by a national lottery to be held in the national capital within the next few weeks. A set of serial numbers, each preceded by the letter "S", from "S-1" to include the largest number used by any local board in assigning serial numbers to the July 1st registrants, then will be drawn by lot. The serial numbers in the order they are drawn in the lottery will constitute a master list to be used by local boards in assigning "Sequence Numbers" to their July 1st registrants, in this manner:

The registrant in each local board area whose serial number appears at the top or nearest the top of this second list will be given "Sequence Number 1" in his area; the registrant whose serial number is next closest to the top will receive "Sequence Number 2," and so on until each July 1st registrant has a sequence number.

As was the procedure in connection with the previous national lottery in October, 1940, local boards will cross off on the second master list and ignore those serial numbers that are not held by any registrant in their areas.

## TREES MENACED BY APHIDS AND ELM SCALE, MOSCOW

If Moscow wants to save between 70 and 80 per cent of its shade trees, Dr. W. E. Shull warned, inhabitants will have to band together in a concentrated spraying campaign that will repel destructive invasions of maple and elm aphids and European elm scale.

The head of the University of Idaho entomology department declaring that infestation of aphids "are the worst I've even seen here," called upon civic groups and the city administration to "wake up to this real danger."

"Taking an Idahoan representative with him for an inspection of aphid damage, Dr. Shull was unable to find a tree on the east side of the city that had not been visited by, or did not at present, harbor aphids."

Bare limbs attested to the destruction of last year's visitations and blackened and drooping leaves were ample evidence of this summer's attack.

Every leaf of every hard maple in the city park was either sucked dry or playing host to from 50 to 200 of the minute winged destroyers, which sprout wings after they have finished foraging on one leaf and fly to another.

Elm scale, small white globules, have been matching aphid damage in its own insidious way, Dr. Shull declared, pointing to striped branches and dead limbs on many of the east side's finest shade trees.

Damage to both elms and maples was made all the more evident by the shade pattern infested trees threw on the ground.

"The situation has reached such a degree of gravity," Dr. Shull declared, "that condemnation may have to come if we want to save our shade trees."

One hundred per cent cooperation is essential, he explained, because aphids will travel from non-sprayed trees to sprayed trees after the spray has worn off.

"My suggestion would be that the city obtain a spray machine to take care of its own trees and with that machine do private trees for a reasonable amount."

He believed that complete loss of Moscow's maple and elm population would result in the next two or three years if an effective spraying campaign is not immediately inaugurated.

Hand sprayers lack the range to reach higher branches on the taller trees, according to Dr. Shull, who recommended purchase of a powerful mechanical sprayer and that from 25 to 50 gallons of spray be applied to every tree.

Dr. Shull disclosed that a smaller sprayer new operating in Moscow did not throw a heavy enough or strong enough mixture to knock out the aphids. He estimated that a complete spray job would cost between \$1.00 and \$1.50 per tree.

Dr. Shull ascribed this year's very heavy aphid infestation to unusual dampness, which has prevented hover flies, a parasite which lives on the aphids, from arriving on schedule. He said he had noticed the year's first hover flies at work just a few days ago.

Editor's Note—There are many fine maple and elm trees in Kendrick, and it would seem to us that a campaign for eradication in Kendrick should be undertaken by the Village trustees, working in conjunction with the tree owners. The damage these pests are doing to Kendrick trees is plainly visible, and action should be taken at once.
