KENDRICK HAPPENINGS OF TWENTY YEARS AGO

Leslie Roberts of the Kendrick Auto company was in Moscow on business on Monday.

Miss Eula Crocker is assisting Postmaster John Brown with the work in the local office this week.

Miss Florence Stanton, who has been attending school in Spokane, visited relatives here the first of the week. From here she went to her home at Nezperce.

A shipment of hogs from Montana to the Union Stockyards at Spokane last week, brought \$11.50 per 100, for the entire lot of 78 animals.

Theo. Hanson, manager of the Kendrick Rochdale company went to Spokane the first of the week on business.

Mrs. John Kite and children went to Juliaetta the first of the week to visit friends.

The members of the Okoke Klouthman club and their husbands spent Saturday evening at the Knepper home. Several hours were devoted to "500," Mrs. Lutz carrying off the honors with high score.

In a letter from George Barnum, under date of March 30, he says he is still working for Uncle Sam, but figures on getting back to Kendrick this summer to stay.

Herman Meyer of Cameron recently closed a deal for the purchase of 80 acres of farm land near Cameron. The place was bought from Mrs. Elizabeth Lange Renner, now living in Germany, the deal being made through her attorney's in New York. During the war the land was confiscated by the alien property custodian, and was only recently returned to her.

Word has been received from Henry Mielke, who is in the internal revenue service, that he had joined the ranks of the benediks. He was married last month at Honolulu to a Miss Potter, a nurse. Mr. and Mrs. Mielke have moved from Honolulu to San Francisco, where they will make their home. Mr. Mielke is a son of Mr. and Mrs. Fred Mielke of Cameron.

Because of the fact that there are but four members in the senior class of the Kendrick High school, it has been decided to eliminate the senior class play and unite the entire efforts of the four classes in putting on a high school play, which will be given some time toward the middle of May. Last year there were so many school plays that they very seriously interfered with the work of the students.

It is reported that Fred Crocker has purchased the Harry Fowler place, near Kendrick, this week, trading in his Kendrick residence as part payment on the deal. The ranch comprises 70 acres of bench land, about a mile from town.

School Notes—Those who won in the spelling contest last week in the third and fourth grades were: Howard Dammarrell, Juanita Stanton, Eleanor Herres, Helen Clem and Ira Johnson. Officers elected were as follows: President, Nell Ameling; vice president, Nora Cox; secretary-treasurer, Violet Riley.

They were accompanied by Mrs. Dean, Mrs. Ralph Oylear and Mrs. Claud Craig. Mr. and Mrs. J. M. Woodward were dinner guests Sunday of Mr. and Mrs. R. M. Smith. Monday night some thief or thieves broke into both the Smith and De Winter & Goudzward stores, taking what money they could find, which consisted mostly of nickles and pennies which had been left in the tills. Some cigars were also taken. They entered the Smith store by prying out a window in the back, and the DeWinter & Goudzward store by prying the back door open.

Big Bear Ridge—Mr. and Mrs. Will Elliott, and Mr. and Mrs. Rufus May spent last week at the Leonard Davis home near Leland. M. J. Sudeth of Sandpoint was a visitor in the A. Hooker home the first of the week. John Heath returned from Texas ridge the first of the week. Ingvald and Miss Emma Aas were Lewiston visitors Friday and Saturday.

Many Items Not Be Made

The green light for war production necessarily means the red light for many types of non-essential civilian production. The following "stop" orders have been issued recently by the war production board: No more lawn mowers may be manufactured after June 30.

Toys, games and Christmas tree ornaments made of metal, plastic and other materials needed for the war effort can not be produced after June 30, and the use of certain paints in toy manufacture is prohibited. Officials say, however, that there will be plenty of toys for the 1942 Christmas season.

Production of vacuum cleaners will halt April 30.

After July 1, no metal of any kind may be used in the manufacture of non-essential household and miscellaneous articles.

Fluorescent lighting fixtures no longer can be produced except for essential uses.

SENIOR CLASS PLAY MEETS APPROVAL OF AUDIENCE

The Senior class play, "Foot Loose," presented to a near-capacity house in the big gymnasium Monday evening, met with the hearty approval of the audience, for so true to life was it, that everyone present was reminded of their own family associations, or those of their friends. Its fine presentation also attested to the many weary hours of preparation on the part of those taking part, and of their coach, Mrs. W. B. Deobald.

Save Those Old Toothpaste Tubes

Since March 31 the government has required that persons buying tubes of toothpaste or shaving cream from retailers must turn in a used tube before the purchase can be completed. The order is designed to stop tin waste. In addition, the war production board has issued drastic regulations on the use and production of collapsible tin tubes, completely eliminating their use for foods, cosmetics and most toilet preparations.

At the local drug store will be found a box in which to deposit your old tube when you secure a new one. This tube, states Mr. Nesbit, need not be of the same brand or size.

Fix Ridge Correspondent Needed

The Gazette badly needs a correspondent on Fix ridge—and surely there is someone willing to take upon themselves the sending of news to this paper.

We realize that it is not always convenient for a correspondent to send news every week, but one who is willing to send most of the time would be a welcome addition to our columns from Fix ridge.

We furnish all the necessary supplies, paper, envelopes, stamps, etc., and, of course, send the Gazette.

Organization Proceeding

The articles of incorporation for the new co-operative creamery and cannery proposed for Kendrick, and which now seems assured, were returned from Boise this week for technical changes, have been corrected, and are now on their way back to Boise.

The successful organization of this business venture now seems assured, however, and rapid progress is being made on final details.

No new meetings have been held as yet, pending the return of the corrected incorporation papers from Boise.

The final word, however, is that a cannery will be a definite part of the organization's work.

It was stated some time ago that no more combines would be available—but this organization got a carload just the same.

CASH WHEAT PRICES UN-CHANGED TO HIGHER

Pacific Northwestern cash wheat markets ranged from unchanged to slightly higher during the holiday shortened week-end of April 3, according to the U. S. Department of Agriculture. Quotations at Portland on April 2, showed wheat about unchanged to 1c per bushel higher, with price quotations varying according to local supply and demand conditions on the various classes.

The firmer prices reflected light offerings rather than any important demand. Mills continued to furnish the principal outlet for the light offerings in the open market, but their needs were mostly confined to special quality lots for immediate needs. Wheat receipts totaled 437 cars at Puget Sound and Columbia river terminals for the week. Movement of wheat eastward from this area was reported light and California takings of Northwest wheat remained moderate, except for feed wheat under the Department's sales plan. Export flour sales under the indemnity plan were reported as somewhat better to the Americas, as compared with the previous week, but still only of moderate volume. Further sales of flour to the government were reported by mills in this area, mostly at Puget Sound markets. The cash wheat market tone, however, remained very quiet as the period ended, reflecting the Easter holiday week-end. Weather was reported generally favorable for the growing winter wheat crop in Northwest producing areas and all spring seeding of wheat was progressing rapidly in most districts.

Cash wheat bid prices at Portland on April 2, showed soft white at \$1.00; soft white with red not applicable, \$1.02; white club \$1.02½, western red at \$1.02 and ordinary hard red winter at 99c per bushel, all basis No. 1 grade in bulk.

The San Francisco wheat market continued dull with no important changes. Demand was slow, particularly for feeder grades, but this was offset by light offerings. Prices generally held unchanged compared with a week ago. Central California growers generally showed a strong holding tendency and offerings were confined to small, scattered lots, principally of lower qualities.

Wheat prices continued easy at Kansas City, with trading rather dull and narrow. Favorable prospects for the new winter wheat crop in the southwest, with indications of liberal yields in spite of a reduced acreage, appeared the principal weakening influence. Bins are well-filled with old crop grain at present, and the problem of how to store the new wheat which will be harvested within 90 days, is becoming more and more important.

Light daily offerings tended to firm the cash wheat situation at Minneapolis, even though general demand was slow. Stormy weather and impassable country roads slackened country marketings materially and movement of cash grain to the Minneapolis market during the week was the smallest in months.

The outlook for wheat remained favorable at the close of March, with moisture generally satisfactory except in Texas. In Oklahoma, subsoil moisture is still ample, but the top soil is drying rapidly and rain would be helpful. Only a small amount of spring wheat has been seeded in southern portions of the belt, but seeding is nearly completed in the earlier sections of Washington. Very little oats seeding has been possible in the eastern Great Plains because of continued wet soil. In the heavy producing sections of the upper Mississippi valley, warm dry weather must come soon or seeding will be seriously delayed. In the Great Plains, seeding made better progress and was reported well advanced as far north as Kansas.

Continued low temperatures have retarded growth of winter grains in Europe, where conditions are reported below normal in most sections. Spring work is still backward and is being further delayed by labor shortages. Harvesting of the 1942 crop is well advanced in India.

The Commodity Credit Corporation sold around two million bushels of wheat during the last week in March, and about 116,866,000 bushels still were held at the close of the month.

The grain storage capacity of the U. S., according to a survey taken as of February 16, is 1,602,258,000 bushels, compared with 1,534,568,000 bushels as of March 1, last year. Bulk storage capacity was increased about 75 million bushels, while sacked storage capacity was reduced about 7,500,000 bushels. New construction planned or under way at the middle of February, this year, totaled nearly 35,000,000 bushels.

Wheat stocks in all commercial storage positions totaled 593,877,000 bushels on February 16, compared with 414,266,000 bushels on March 1, 1941.

Halt Appliance Manufacture

Manufacturers of electrical appliances have been ordered to stop production after May 31, on a long list of articles commonly found in the American home, and production of such articles between now and May 31, is placed under strict control. The order, designed to conserve vital war materials, applies to electric toasters, waffle irons, flat irons, roasters, grills, table stoves, portable heaters, food mixers, juice extractors, persolators, dishwashing equipment, dry shavers, hair dryers, permanent wave equipment, hair clippers, cigar and cigarette lighters, and heating units for new electric ranges and water heaters and radiating heaters.

WHAT DO YOU MEAN—
THE *American Way*
of Life?

Joe knows — from experience! He grew up in a small town, worked hard, saved his money and soon had a little shop of his own. Today Joe's little shop is a factory, a part of industrial America, making things to win the war.

Yes, Joe knows what the American Way of Life means . . . the right to live our lives as we would live them . . . the right to invest our savings and our strength in a business of our own, and make it grow and prosper by our own efforts, without regimentation and control by political management!

Let us never forget that one of the things that has made America great, is the free enterprise system.

And let us be sure that when victory comes it means the full enjoyment by all of us forever of these precious rights that mean the American Way of Life!

Bicycle Sales "Frozen"
 By order of the war production board, the sale, shipment, delivery or transfer of all new adult bicycles was halted at midnight, April 2. Officials explained that the order was issued because of "the terrific rate at which bicycles have been going to people who don't need them, with too few going to people, like defense workers, who have to have them now or soon will need them."
 Stocks frozen, and future production, will be made available on the basis of essential needs, with defense workers getting first call, essential civilian needs second, and then anyone else — if more are available.

Double Bill At Theatre
 This week's offering at the Kendrick Theatre will be another of those popular double features.
 The first of these is "The Gay Caballero," starring Cesar Romero and Shelia Ryan. It's another of those fun-packed, thrill-packed pictures of the southwest in which Romero plays at his best. The action is, of course laid in the southwest, and scenes are authentic of the period.
 The second offering of the evening is "Accent On Love," starring George Montgomery and Osa Massen. It's the story of a man who wanted to make good on his own, and of a woman who loved him and wanted to help. It, too, is packed full of action, mystery and love.

100% Campaign Pledge Asked
 The Universal Pledge Campaign that starts in Latah County (and all over the state) on April 20, for the purpose of securing the pledges of citizens to purchase Defense Stamps and Bonds at regular intervals, is in all probability the most important activity that will be undertaken by the citizens of the United States as a group, during our entire war period, states R. M. Logsdon, Deputy State Administrator, Idaho Defense Savings staff.

The complete and wholehearted acceptance of the Universal Pledge by the American people will do a great deal more than merely provide a reasonably accurate census of the amount of money that the Treasury department can expect to receive from the sale of Defense Bonds.

It will provide an indication of national unity and determination on the part of the American people to win the war at all costs. Both Germany and Japan know that a united America is unbeatable. They know that the America that can build 20,000 new motor cars in a single day, the nation that has contributed more constructive inventions to mankind than any other, can quickly and certainly cause their defeat if her people remain united.

It is urged that every income earner in Latah County give courteous attention to the Defense Savings Staff canvassers and indicate on your pledge card the amount you will endeavor to invest each month in Defense Savings Bonds or Stamps.

Every person signing a "Universal Pledge" will receive a beautifully lithographed "Minute Man" sticker for car or home window, that says: "We are buying Defense Bonds or Stamps." These stickers cannot be obtained by any other method except by signing the pledge.

Spring Work Making Progress
 Spring farm work is making very rapid progress these days, the past two weeks of "drying weather" now permitting almost general field work, although seeding in some particular sections is now progressing as rapidly as the farmers desire, due to "swampy low places" and north side "coves" not yet being ready.

The spring-toothing and discing of alfalfa is said to be almost completed.

The planting of "Victory Gardens" has made rapid progress, and all those handling seeds here in town report a very brisk sale. Marvin Long states that their store has sold more garden seeds than for many years past, and others almost to a man, say the same.

Trees in the canyon are leafing rapidly, the long "caterpillars" from the poplars showering cars parked near the postoffice. Maple trees, too, are shedding "bud cases."

Forstvihs are in full bloom, as are daffodils, jonquils and hyacinths.

EDITORIAL

Well, Folks — It "kinda seems like spring has sprung," at last, and from the way Ed. Deobald and Bill McCreary have been going after the squirrels, it seems like they are embarking on a "squirrel sabotage program" that may prove destructive to the rodents before they have a chance "to harvest" anything. But, be that as it may, with the coming of really green grass, the cream flow will increase, and your income with it — for we pay spot cash for your cream.

There is no waiting, no fuss, no bother when you sell to us. And remember, that with the sugar shortage at hand, you can still can berries of all kinds, peas, beans, etc., in a locker box without sugar. If you do not have one of these boxes, better come in and pick one out today. They are mighty handy all the time.

"Why didn't you salute me?" roared a major to a rookie.

"Well, sir," was the candid reply. "I didn't want to attract the attention of any officers, because I'm out of camp without a pass."

Two drunks sat on the curb meditating. One spoke: "Whatsch your wife shay when you shtay out late like thish?"

"Haven't got a wife."

"Then whatsch idea in shtayin' out sho late?"

Police Judge: "Well, Rastus, about your son stealing those chickens, I've decided to let him off this time, but why don't you show him the right way?"

Rastus: "Ah done tried, Judge, but he goes and gets hisself caught anyhow."

And don't forget — we want to buy your cream!

Roy Fairfield Writes

Fort Lewis, Wn.
April 5, 1942

Dear Mac:

Thought I would drop you a line or two and thank you for the paper again. It sure is a mighty welcome thing around here. All the boys in this camp that are from around Kendrick or vicinity, love to read the paper and learn the news that our parents and friends do not mention.

We are still stationed here at the Fort, but for how long we don't know. We have all our equipment, including our trucks, loaded and on now—but where we do not know.

Thanking you again for the kind gesture you have taken upon yourself for sending us the paper, and I do hope that all the other boys in the service who get this paper will write a few lines now and then for you to publish, so we can all hear from them indirectly, if nothing more.

I remain,
Sgt. Roy Fairfield.

Work Started On Building

Work began Monday morning of this week on the building which is to house the new Electric Eye bean picker of the Kendrick Bean Growers. This building will be constructed between the alley and the railroad track just south of their present bean warehouse, and west of and adjoining the Herman Meyer warehouse.

The story was out last week that the Growers would take over the Herman Meyer warehouse, but Geo. Brocke stated Tuesday morning that such was not the case, and that a new building would be built from the ground up.

This Electric Eye picker will be one of but few in the northwest, and will indeed prove a valuable addition to this organization's equipment.

No Copper in Zippers

The use of copper and copper base alloy, steel, zinc and zinc base alloy in the manufacture of slide fasteners (zippers), hooks and eyes, brassiere hooks, snap fasteners and other garment closures has been prohibited by the war production board. The saving in copper alone is expected to amount to about 8,000 tons a year.

Ship Many Cars Of Wheat

What is probably one of the biggest shipments of wheat to ever leave Kendrick under a single order was completed by the Lewiston Grain Growers last week, when that organization loaded and shipped 50 cars of grain as fast as they could pour it from their elevator and shift the freight cars about.
