

KENDRICK GAZETTE

VOLUME 52

KENDRICK, LATAH COUNTY, IDAHO, THURSDAY, AUGUST 6, 1942

NO. 32

WHAT KENDRICK PEOPLE WERE DOING 20 YEARS AGO

The Kendrick Theatre will introduce an innovation at its regular program tonight and Saturday. A radio outfit will be installed by A. V. Dunkle and a demonstration of the machine covering an hour will be given. This will be a new feature that has never been publicly shown here.

Dan Guy arrived the first of the week from Nez Perce for a brief visit with his parents. Dan recently accepted a position as manager of the Consolidated Commercial company's store at Nez Perce.

Pete Stump and family from Southwick returned Monday from a visit at Lewiston and Clarkston.

Mr. and Mrs. C. F. Byrne and children arrived from Lewiston on Monday to spend a few days on the farm on Potlatch ridge.

A. Onstott returned from Lewiston Thursday afternoon, where he has been taking treatments for inflammatory rheumatism. He has had a severe case and is hardly able to walk.

Miss Beulah Long left yesterday (Thursday) for Oakesdale, where she will visit in the home of Rev. and Mrs. Howard Mort. From there she will go to Spokane for a short stay and will then go to Leavenworth, Wash., to visit her sister, Mrs. F. A. Varo. She expects to return when school starts.

Warehouse Almost Ready

Remodeling work on the Lewiston Grain Growers warehouse "conversion job," better known as remodeling a sack warehouse into a bulk grain warehouse, is making good progress under the direction of Geo. Davidson, and Mr. Davidson stated Wednesday that he expected to have the job almost completed by Monday of this coming week — at least enough of it will be completed so that grain may be received.

This warehouse, better known as the old Vollmer-Clearwater warehouse, was purchased by the Grain Growers a few weeks ago, and the work of rebuilding, shoring-up and remodeling begun almost at once.

It has been a real job, but results should certainly justify the expenditure of time and money.

Have You Registered

Registration books for the primary and general elections this fall will be open Friday and Saturday, August 7 and 8, at the LaHatt jewelry store, where Mrs. LaHatt will register your name between the hours of 10 a. m. and 9:00 p. m.

This will be your last chance to register before the primary election, but the books will again be open for the general election later on. If you do not register now, it will mean, however, that you will be unable to cast your vote at the primary.

Better make sure your name is listed in the registration book.

Return From Bayview

Mr. and Mrs. Silvie Cook and daughters returned Friday of last week from Bayview, where he has been employed for the past several weeks. Mr. Cook's health would not permit a continuation of the work in which he was engaged, so the family returned to Kendrick.

Silvie reopened his barber shop Saturday morning, and since that time has been a plenty busy fellow, reducing the heads of hair and growths of whiskers that accumulated during his absence — as well as the tonsorial needs of busy harvesters.

Take Marriage Vows

A quiet home wedding was solemnized Friday evening, July 31, in the home of the bride's parents, Mr. and Mrs. John Davis, when their daughter, June, was united in marriage to Orville Storer of Kendrick. Rev. Roy Murray officiated at the marriage ceremony. The only witnesses were the immediate family.

Mr. Storer will leave this Friday for the army and his wife will continue her work in the Kendrick Table Supply.

Car-Truck Collision

Friday morning of last week the Chevrolet sedan belonging to George Brocke, and driven by Bernard Jones, collided with a loaded logging truck while ascending the Wauncher gulch grade. Bernard was blinded by the sun and failed to see the truck until too late to avert the crash.

Both vehicles were moving slowly and as a result no one was hurt, although both suffered damage, the car, of course, getting the worst of it.

More Rattlesnakes

Rattlesnakes seem to be quite plentiful these days, the crop apparently being far more abundant than usual judging from the number reported killed.

The last one we have heard of was killed by Don Miller in Brady gulch, a whopping big fellow with nine rattles and a button.

It behooves everyone to keep on guard when out in the hills or in the fields.

Tire Inspector Named

We have been told that a tire inspector has been named for Kendrick, but to date we have been unable to find out who it may be.

As soon as we learn more about it his name will be published. It will undoubtedly save a great deal of time and needless running to have an inspector here.

Saturday Night Town

It isn't hard to guess, even if one did not know, that harvest is really coming on with a rush in the Potlatch section, for Kendrick has again become a "Saturday night town."

The past two Saturday evenings the streets have been lined with cars and trucks, and local stores stayed open until about 11:00 p. m. to care for the brisk farmer trade.

Except on rush occasions it is generally a toss-up between Friday, Saturday and Monday as to which is the better business day — but not when harvest is on.

HOLDUP AND SHOOTING NEAR MYRTLE MONDAY

Marion Edward Evans, 16-year-old hitch hiking assailant of William A. Nieman, Sandpoint, who pumped eight .22 caliber bullets into the body of his host and then stole his car last Monday, and who was captured that same day near Moscow, was Tuesday bound over to the district court under \$10,000 bond when arraigned for preliminary hearing before Probate Judge John L. Phillips at Lewiston. He was charged with "knowingly, intentionally, willfully and feloniously taking personal property and money from Nieman against his will and by means of force and fear." He was remanded to the custody of the sheriff to await the fall term of district court.

Evans was picked up by Nieman at Plummer, while traveling from Sandpoint to Orofino, and near the Cheerylanes bridge, about 20 miles east of Lewiston, near Myrtle. Evans drew a revolver, forced Nieman down the river bank, fired eight bullets into his body and then escaped in Nieman's car.

Nieman is in St. Joseph's hospital at Lewiston where physicians Tuesday night gave him a good chance for recovery.

When questioned Evans said: "I was born at Goldhill, up in the woods near Kendrick. My father and mother live at Irrigon, Ore. My father, Alfred Evans, is an electrician and is now employed on defense work near Pasco. My three sisters are all younger than I am. Yes, I'm 16, but people tell me I'm large for my age. I attended the seventh and eighth grades in junior high school at Lewiston and left here about two years ago for Irrigon, where I was a freshman in high school. I passed a civil service examination and got a job paying \$1,440 a year helping the surveying crew on the Umatilla ordinance depot near Hermiston and took this trip to visit relatives."

"Where did I get that gun? Why I borrowed it from Lowell Tiller to go hunting. I usually go hunting when I visit relatives around here. When I shot at the man who was driving the car, it was the first time I had fired the revolver. Why did I shoot him? Humph. Why I wanted that car so I could take a vacation in California."

The long-barreled revolver used by Evans is an Iver Johnson .22 super-shot, sealed eight and holds eight cartridges.

Physicians attending Evans Tuesday described the location of bullet holes in this manner:

One through each hand between the thumb and index finger.

One on top of the head, which did not penetrate the skull.

One through the left elbow that failed to penetrate the bone.

One through the right shoulder that did not enter the bone or cause a break.

One through the lower end of the shoulder blade near the spine that emerged near the base of the neck.

One in the back of the neck that emerged on the left side of the neck without hitting a vital spot.

One that fractured the right jaw, the bullet still being in the jaw.

W. R. Foster Passes Away

Wilbur R. Foster, 40, Pullman resident for the past two years, died suddenly Wednesday morning of last week while working on a combine at the Gordon Klemgard farm in the Ewartsville area.

Mr. Foster was employed in the commercial department of the Washington Water Power company at Pullman, and had been an employee of the concern for the past 14 years. He was working for Klemgard during his vacation. He suffered cramps and death was instantaneous.

Mr. Foster was local manager of the Washington Water Power company at Troy for some years, going from Troy to Pullman in 1940. Previous to that he was the company's local agent at Kamiah. He is survived by his wife and two daughters, Emma Lou and Patty.

Mr. Foster was well known in Kendrick, being a frequent visitor here during his managership at Troy. Funeral services were held at Pullman at 10:00 a. m. Saturday.

Receives New Appointment

Mrs. N. B. Long received word this week that her son-in-law, J. E. Key of Spokane, had received an appointment from Washington, D. C., making him foreman of all mail carriers in Spokane.

Picnic at Spalding Park

Mr. and Mrs. George Brocke were hosts at a picnic Sunday in Spalding Park for the employees of the Kendrick Bean Growers association and their families. A very pleasant time was reported.

Girl Scouts

The Girl Scouts met Tuesday afternoon in the village park to study First Aid under the direction of their leader, Mrs. Marvin Long.

SWEENEY & SON

by AL POSEN

REPORT OF COMPANY 9, IDAHO VOLUNTEER RES.

Albert Glenn of Cameron enrolled in Company 9 at last Sunday's meeting.

In the absence of Capt. Marvin Vincent, the company was in charge of Lieut. Denzil Kuykendall.

Those present at Sunday's meeting were assigned to a permanent position in the various squads. As new members enroll or old members return, who were absent Sunday, they also will be assigned permanent positions. Those present Sunday, and the squad to which each was assigned, are as follows:

Squad I—In charge of Corp. Lyle Harrison: Ervin Draper, Wilbert Brunseik, Chester Vincent, William Clem, Jr., Herbert Harrison, Boyd Harrison, James Whiting and Walter Cook.

Squad II—In charge of Corp. Gordon Peters: Jesse Hoffman, Angus Fry, Harold Whittinger, Eldie Hunt, Enoch Harrison, Kenneth Stead, Raymond Blankenship and Ted Weyen.

Squad III—In charge of Corp. Roy Craig: Warren Locke, William Thornton, Alex Larson, Charles Hoffman, Homer Parks, Ben Hoffman and Harry Smith.

Squad IV—In charge of Corp. John Irwin: Alfred Locke, Arthur Locke, Walter Crawford, Wayne Thornton, Willis Thornton and Albert Glenn.

Next Sunday's meeting, which will start promptly at 2:30 and be dismissed promptly at 4:30, will be devoted chiefly to the studying of the "Manual Of Arms." All members are asked to bring a gun of whatever type he may have — but no ammunition.

Communications are being carried on with the nearest chapter of the American Red Cross to provide us with an instructor to teach First Aid. As soon as some definite information is received some plan will be worked out whereby a First Aid class will be conducted for both men and women.

Eight more members paid their deposit on their uniforms. These will be issued just as soon as they are available.

The monthly report to the Adjutant General at Boise showed a total enrollment of 63. The attendance at each of the six meetings since June 28 was: 14, 16, 30, 41, 37 and 35.

Election Officers

At a recent meeting of the Board of County Commissioners the following officers were appointed by the Board to serve at the Primary and General Election to be held in Latah county on August 11 (Primary) and November 3 (General): Deary Precinct — Goldie Anderson, Edith A. Howell, Henry L. Hansen, Marvel Grantlund, Veria E. Hall, Ethel Littler.

Julietta Precinct — Mary E. Otosen, Myrtle Cochran, August Hanson, Earlene Taylor, Nellie Bly Bid-dison, Frank Spray.

Kendrick Precinct — Stella Leith, John Waide, Mrs. Geo. Brocke, Clarence Fry, W. D. Woodward.

Linden Precinct — Mattie E. Garner, Eva L. Smith, Bert McAntire.

Bear Creek Precinct — James S. Nelson, W. E. Hecht, Mrs. Claude Jones.

Texas Ridge Precinct — Eula Miller, M. L. Pierce, Algert Sandquist.

Sawmill In Operation

Thursday of last week the Thomas Sawmill began operations for the season. However, due to an unexpected breakdown of logging machinery, it was forced to close down temporarily after a run of but two days, resuming operations Wednesday of this week.

The mill has been leased this year by the Morthland Lumber Company of Seattle, which also operates a mill at Asotin, and Mr. Morthland is in direct charge of mill operations.

Harold however, has not severed his connections with the logging business, and expects to supply the mill with logs from his timber holding near Kendrick.

New Arrival

Mr. and Mrs. John Wilson, residing on American ridge, are the parents of a baby daughter, born Wednesday morning at the home of Mrs. Clifford Davidson.

WHAT KENDRICK FOLKS ARE DOING THESE DAYS

Mrs. Jack Johnston of Spokane is spending a couple of weeks with her parents, Mr. and Mrs. L. J. Herres.

Clarence Hund of Seattle arrived Saturday morning for a brief visit with his mother, Mrs. Elwood Pearson, and other relatives, and to get his wife and children, who have been visiting here for some two weeks. On Sunday Mr. and Mrs. Hund were the honor guests at a family picnic and get-together in the city park. They returned to Seattle Sunday night, so that Clarence might be on the job Monday. He reports that under the present set-up no vacations are allowed defense workers.

Mrs. Roy Jump and children, Marjorie and Tommy, have returned to their home at Pasco, after spending a few days at the home of her parents, Mr. and Mrs. Harold Thomas.

Frank Harris and daughter and son, formerly of Lewiston Orchards, have moved into the apartment behind the postoffice, which they will occupy at least temporarily. Mr. Harris has been elected manager of the Kendrick Co-operative Creamery, but pending final arrangements, is at present employed by the Thomas Creamery.

F. B. Higley, accompanied by his niece, Donna Harding, drove to Nezperce Sunday to spend the day with her parents, Mr. and Mrs. M. C. Harding. Little Phyllis Harding returned with them to spend a week here.

Miss Marian Lowery came last Friday from Walla Walla to spend a couple of weeks here with her sister and brother-in-law, Mr. and Mrs. Marvin Long.

Tom Keene and Herman Renfrew are batching at Julietta, while working in the warehouse there.

Mr. and Mrs. Darrell Waide and son of Potlatch spent Sunday here in the home of his parents, Mr. and Mrs. John Waide.

Mr. and Mrs. Roy Ramey, Jr., came Sunday to spend several days with his parents, Mr. and Mrs. Roy Ramey, Sr. They left Monday morning for Nezperce to spend the rest of the week with her parents. Mr. and Mrs. Roy Ramey, Jr., have been at Odair, Wn., where he was depot agent, but has now been transferred to Pullman.

Mrs. Boyd Cook and baby of Lenore spent Monday and Tuesday at the Paul Lind home.

Mrs. Lester Hill of Clarkston was a guest Tuesday in the Edgar Long home.

Miss Ethel Fraser of Colfax, spent the week-end here with her parents, Mr. and Mrs. Everett Fraser.

Mrs. Everett Fraser left Friday for a point in Utah, upon receiving word of the serious illness of her sister.

Outstanding Grain Yields

Three outstanding grain yields have been reported to date, they are:

Homer Parks, who received a yield of 55.3 bushels per acre from 40 acres of Mosida wheat. The quality was said to be excellent.

Reinhart Wilken reported a yield of 3,800 pounds per acre for 40 acres of white winter barley, also of excellent quality.

Swartz Bros. received a yield of 3,800 pounds per acre for some 25 acres of white winter barley, with quality excellent.

There are doubtless others who have received or are receiving fine yields, but of whom we have not learned.

Records "Rolling In"

On the call of last week for old phonograph records to go to U. S. O. centers, citizens of this section responded quite generously, some 300 to 350 records being turned in at the Kendrick Gazette, Kendrick Garage and Blewett's Grocery.

Mrs. Clay Albright, who collects for the organization, picked them up Tuesday afternoon, and wishes to thank the donors. However, the drive is far from over — and anyone having old records, no matter what their condition may be, and who are willing to give them for the benefit of the boys in the services, are asked to leave them at the Gazette, the Kendrick Garage or at Blewett's Grocery.

Commercial Club Meeting

The regular monthly meeting of the Kendrick Commercial club will be held in the basement of the Community church on Monday evening, August 10, at 6:30 p. m., with the W. S. C. S. of that organization serving the lunch.

It is realized that this is a very busy time for everyone, but all members are urged to be present, as a number of special committee reports will be made.

Remember the date, Monday, Aug. 10th — the hour, 6:30 p. m. — the place, basement of the Community church — and be there.

LIGHTNING SETS FIVE BLAZES ON POTLATCH

Following the hottest day so far this year, Monday, when the thermometer reached a high of 98 degrees, and climaxing a dust and electrical storms, five distinct fires were reported in the Potlatch section.

Three of these blazes were near Leland — one on the Rhinehart Wilken farm, another on the W. H. Weyen farm, and another between the Ernest Schmidt and Herman Meyer farms.

These three blazes, in grass and brush, caused no heavy damage with the exception of the destruction of a large hay stack belonging to Vester Daniels, and located on a piece of bench land below the canyon rim.

Residents of the Leland area turned out in force and fought the blazes, which, driven by gusts of wind, raced here and there through the knee-high and powder dry "cheat grass" and brush. On receipt of a phone call for help, Manning Onstott, local fire warden, took a load of tools and other equipment to the conflagrations, and by dint of much hard work, all were brought under control and extinguished by morning.

On the other side of the Potlatch canyon, from Kendrick, occurred the two most hazardous strikes in this section, the lightning setting fire to and destroying a barn and shed on the Wm. Freytag place, and almost simultaneously touching off a big timber fire between what is known as the "old Westendahl place" and the "old Van Horne mill" on the Little Bear ridge side of Bear creek.

The fire at the Freytag farm was held to the barn and shed, and prevented from spreading to timber and adjacent buildings.

The Little Bear ridge fire, however, was not nearly so simple, and local volunteer fire fighters, as well as the local fire warden Manning Onstott, Doy Tout, Frank Abrams and Edgar Long, were hard pressed to bring the big blaze within fire trenches and a semblance of control by daylight Tuesday morning. Local residents of that area of course, were on the job to a man, and the women provided drinks, lunches, tubs of water and did everything within their power to help.

This blaze was in powder-dry territory and steep, the brush also bone dry, and added to the fighting difficulties.

The fire was held below the fields and above the old "Van Horns" mill road, so the loss in dollars and cents was not great, although, unchecked, it could easily have gotten in the fine timber further up the canyon and caused tremendous damage.

At the time of going to press numerous old snags, windfalls and stumps were still burning in the area, and patrols have been on constant duty.

Tuesday afternoon the canyon fire near the Reinhard Wilken farm was fanned into life again, and threatened to get into stubble and grain fields, and a call for volunteer fire fighters was again sounded. However plows were brought into use and aided by the volunteers, under the direction of Manning Onstott, the blaze was soon brought under control. Some damage was done, but prompt action saved the fields.

There Are Huckleberries

Chas. Jessup of Julietta brought to the Gazette office Tuesday morning a fine jar of huckleberries, with the remark: "I thought you might like to have a pie," at the same time placing a jar of these luscious and very scarce berries on the desk.

When asked where they (Mr. and Mrs. Jessup) were able to find them he grinned and said: "On Big Rock Candy Mountain." Well, we have often heard of that place in song, but never in reality, and we know that a man must have a large heart to part with such prized and scarce berries this year. We know they're going to be mighty good.

Birthday Party

Mrs. Lester Crocker entertained a group of little boys Tuesday afternoon honoring her young son David's eighth birthday anniversary.

The afternoon was spent playing games, after which birthday cake and ice cream was served.

Those present were Jimmy Mason, Douglas and Charles Christensen, Mark and Gordon Murray, Bobby McCall, Parker McCreary, Dee Miller, Alfred Anderson, Dickie Cross and David Crocker.

Picnic in Park

A picnic in the park Sunday was enjoyed by the following group: Mr. and Mrs. Clarence Hund and children of Seattle; Mr. and Mrs. Fred Zimmerman and sons, Mr. and Mrs. Ray Butler and daughter, Mr. and Mrs. Walter Silflow and family, Mr. and Mrs. Kabbleish and son of Orofino, Mrs. Conrathbone of Santa Monica, Calif. and Mr. and Mrs. Elwood Pearson.

DOMESTIC WHEAT MARKETS DEVELOP WEAKER TREND

Domestic wheat futures markets fluctuated rather irregularly during the week ending July 31, but were generally easy and slightly lower, the Department of Agriculture reports. Depressing influences complicated the already crowded storage conditions that have resulted from a record carry-over of old crop grain, and the unfavorable trend of war on the Russian front.

About the same declines in wheat futures occurred at Portland as at the principal midwestern markets during the period. Cash wheat prices were very irregular here and fluctuated according to local supply and demand conditions on different classes. White wheats were firm and ranged from unchanged to slightly higher, while red wheats were weak and 3/4c to 4c per bushel down from a week ago. Trade reports indicated practically no sales of white wheat were made due to a lack of offerings. With prices of all classes of grain continuing well below government loan values, offerings at country points were very light. Comparatively heavy receipts of about 800 cars of wheat at Puget Sound and Columbia river terminals continued to represent largely government owned old wheat moving to coast terminals. Mills were in the market most of the period but offerings were mostly limited to stocks in terminal elevators, rather than from the country. Harvesting of winter wheat is under way in all but the latest areas of Oregon and some spring grain has been cut in warmer districts. High temperatures recently injured grain less than anticipated and yields are mostly good. Some inquiry from the midwest for white wheat from this area was reported but light offerings of this type restricted trading.

Cash wheat bid prices at Portland, July 31, for deferred shipment, warehouse receipt basis showed soft white at \$1.01 1/2; soft white, no Rex at \$1.05; white club \$1.05; western red at \$1.05; ordinary hard red winter 92c per bushel. For 15-day shipment soft white was quoted at \$1.00; soft white, no Rex, at \$1.01; white club \$1.02; western red \$1.02; ordinary hard red winter at 89c per bushel, all basis No. 1 grade in bulk.

The San Francisco wheat market averaged quiet but generally held about steady. Demand from all classes of trade was only moderate, but this was offset by light offerings and prices generally showed no change compared with a week ago. Harvesting of the new crop continued in the principal producing areas, but growers generally were placing grain in storage rather than releasing at prevailing quotations. Bids to growers averaged around \$1.85 to \$1.90 per 100, f. o. b. country shipping points.

Lifting of the Kansas City embargo on shipments of salable wheat has so far had little effect in reviving the flow of grain to that market. Receipts for the week totaled 1,507 cars, against 1,973 the previous week. It was becoming increasingly apparent that as long as market values remain 18c to 20c below federal loan levels, as they are at present, growers will hold their grain for loans if they can qualify. The moderate receipts were in good demand by millers and merchandisers.

Receipts of cash wheat continued rather liberal at Minneapolis with the entire grain trade trying to make room for the new crop, and Minneapolis receipts of all classes of wheat continued to mount to 2,407 cars, while Duluth unloaded 971. White flour sales were irregular, but averaged better and mills were more willing buyers of the better milling qualities.

Winter wheat harvesting is about completed except in some late western and northwestern sections and threshing is progressing favorably in those areas. In the western belt, returns continue uniformly good to excellent, but disappointing yields are reported in parts of the Ohio valley, where wet weather persisted into late spring. In the spring wheat belt conditions on the whole continue satisfactory with cutting progressing in southern sections and harvesting expected to begin in the Red River valley of Minnesota next week.

Stem rust has increased noticeably on the durum wheats in the United States, with infection in the Whitestone valley of southeastern Dakota ranging up to 100 per cent in prevalence, and from 5 to 10 per cent in severity. Further north in the Red River valley there is only a slight trace of rust on durum and none has appeared as far north as Crookston.

Stocks of wheat in the four major exporting countries on July 1, were the largest on record with a total of about 1,450 million bushels, which was 265 million bushels above the previous record set last year. Crop conditions in these countries indicate a slightly larger harvest this year than last. The Canadian crop may be more than large enough to offset the prospective decrease in the United States, and probably reduction in Australia.

Red Cross First Aid Classes

The first of a series of Red Cross First Aid classes was held Wednesday evening in the Kendrick High School building.

A Public Health doctor from Lewiston was present and showed two motion pictures. No definite dates for further meetings were decided upon, but arrangements will be completed and an instructor selected as soon as possible. Watch this paper for further information.

SACKS

Are scarce. We have a small quantity of Osnaberg (cotton) wheat bags.

THE PEOPLE ARE DEMANDING A CHANGE!

VOTE
for
John C. Sanborn

Candidate for
United States Senator
Republican Primaries
August 11, 1942

The People Demand a Younger, More Active Senator — One Who Stands On His Own Convictions As Their Representative Rather Than Following Some One For Political Reasons.

SANBORN is the outstanding candidate who embodies the qualifications the people are demanding — proven legislative ability directed for the common good, educated, active, sound. He will work to win the war with all speed. He will work to maintain the integrity and independence of our country. He will work to develop Idaho. He will work for you.

Seven terms in the Idaho Legislature has given him a broad and understanding knowledge of Idaho's problems and a valuable legislative training. The Grange Legislative Committee recently released a compilation of last-session Senate votes on important bills. Sanborn's vote was identical with the way they said they would have voted.

Sanborn is a graduate of Oberlin College, a graduate of Columbia University Law School and has a Master's Degree in Political Science from Columbia University, New York City.

Sanborn is a farmer in Hagerman Valley, Gooding County, where he has operated a Holstein dairy and raised diversified crops for many years.

SANBORN ADVOCATES:

Drastic curtailment of all non-essential government agencies and spending for the duration.

Congress recover its independent place in the American scheme of government with all haste, where not in conflict with the war effort.

Immigration be drastically curtailed.

Pensions for those unable to maintain themselves.

Correcting the inequalities of the Taylor Grazing Act.

Encouragement and protection for our basic industries.

Development of processing plants for Idaho similar to Utah.

Establishment of stock piles and access roads.

WHAT'S GOING ON IN THE LELAND COMMUNITY

E. Willman of Spokane, who has been appointed supply pastor for the Methodist church, arrived Saturday. He was accompanied by his father, who delivered the sermon Sunday. Mr. Willman, Sr., returned to his home in Spokane Monday.

Delbert Hoffman, who is working in Seattle and who was to have been inducted into the army there, was rejected because of physical disability.

Vivian Draper, who has been visiting in Spokane, returned home Sunday.

Mr. and Mrs. Herman Johnson drove to Lewiston Sunday evening, calling in the home of Chas. Larson and Mr. and Mrs. Andy Dreps.

Mr. and Mrs. Harry Smith and family were Sunday dinner guests of Mr. and Mrs. O. A. Walker, Mr. and Mrs. L. L. Yenni of Teakean called in the afternoon.

J. B. Fleishman was a Lewiston visitor Monday.

Everett Farrington of Bayview and Mr. and Mrs. Lyle Harrison and family and Mr. and Mrs. Gordon Peters and family were guests of Mr. and Mrs. A. G. Peters and family Sunday.

Mrs. R. C. Winegardner and son Ralph and grandson Jackie Gjoavaag visited in the home of Jesse Hoffman Wednesday.

Nearly all of the men of the community helped fight fire Monday night, which burned over a large area between here and the Clearwater river.

Oral Craig delivered a load of hogs to Lewiston last Tuesday.

Miss Marie Hoffman, who is attending business college in Spokane, spent the week-end with her parents, Mr. and Mrs. Ben Hoffman.

Mr. and Mrs. J. E. Fleishman and son Jewell returned Sunday evening from Kellogg, where they had been visiting their daughters and families.

Mr. and Mrs. Chas. Hoffman and Donna Lea called in the home of Mr. and Mrs. G. F. Criddlebaugh Sunday afternoon.

Mr. and Mrs. Geo. Baugh and son of Orofino visited Sunday with Mrs. Baugh's sister, Mrs. Jess Thornton and family.

Mr. and Mrs. Robert Draper and Mr. and Mrs. Roy Craig returned Saturday night from the Bungalow country where they were fishing.

Mr. and Mrs. Eldie Hunt were Lewiston visitors Sunday evening.

Mrs. Minnie Blankenship is visiting her sister, Mrs. Chas. Hoffman.

Mr. and Mrs. Marvin Vincent and Mr. and Mrs. Weyne Weyen were visitors in Coeur d'Alene Sunday.

Little Sandra Peters is on the sick list.

Mr. and Mrs. Donald Morgan called in the Herman Johnson home Sunday.

The Walker, Hunt and Harry Smith families and Mrs. Don Morgan had a lawn party at the Smith home Thursday night.

Some of the women of the community cleaned the parsonage Thursday.

Mrs. Ercil Woody was taken to a Lewiston hospital last week for medical treatment.

Jesse Hoffman and daughter Betty and Mr. and Mrs. Ben Hoffman were Lewiston visitors last Friday.

Mrs. W. Sanford and son of Kamiah and nephew from Palouse were guests of Mr. and Mrs. A. A. May Saturday.

Remember to turn in your old records!

STONY POINT VICINITY

Lewiston visitors Saturday were Mr. and Mrs. John Glenn, Mrs. Michels, Mr. and Mrs. Marion Stevens and Bernice Heimgartner.

A birthday anniversary party was given Saturday evening, honoring Norma Hall at her home. Birthday cake, iced and cool drinks formed the refreshments.

Mrs. Farley and infant son, Gerald LaVerne, returned to their home at Cherry Lane Sunday evening.

A farewell picnic, honoring Earl Heimgartner, was held at the Spalding Park Sunday. About 75 friends and relatives were present.

Sunday callers at the Ernest Steigers home were Mrs. A. Johnston and sons Alvin and Clifford Johnson; Mr. and Mrs. Lloyd Brown and children and Alvin Weichman.

Donald Heath, who has been employed at Portland on defense work, spent a few days at the home of his parents, Mr. and Mrs. Newt Heath, this past week.

Fire of undetermined origin destroyed the residence of Vester Daniels Thursday evening of last week. All household furnishings and clothing were lost, as none of the family were at home at the time. Neighbors, noting the smoke and flames, rushed to the scene, but too late to save the home. They did, however, prevent the flames from reaching other buildings. The Civilian Defense Fire wardens with equipment were present. Following the night's vigil guarding the fire, Mr. Daniels had the misfortune to fall asleep while driving down Hubbard gulch after returning Earl Parks to his home, and overturned his pickup. The machine struck the upper bank and suffered dented fenders, etc. Mr. Daniels escaped without injury.

Friends and neighbors plan to help replace the necessary furnishings and clothing, and anyone wishing to help may leave small articles at the John Maund home. Larger household furnishings will be stored at the Ernest Steigers home until arrangements are completed.

Girl's Death Said Accidental

The death of Aileen Pearson, Chilquinn, Ore., 18-year-old quarter-breed Indian girl student at Lewiston business college, was caused by a fractured skull resulting from an accidental fall into the elevator shaft of the Brier building in the heart of downtown Lewiston, according to the verdict of the coroner's jury.

First indications were that the girl had been murdered were disproved by evidence at the inquest.

Death Of Relative

Mrs. Johanna Nelson left Friday for East Stanwood, Wash., upon receiving word of the death of a relative.

ITEMS OF INTEREST FROM THE CAMERON SECTION

Mr. and Mrs. A. F. Wegner and Mrs. Augusta Hull spent Saturday in the Curtiss Hull home in Lewiston Orchards. The occasion was Mrs. Hull's birthday anniversary.

Glen and Harry Newman were business visitors in Lewiston Monday.

Mr. and Mrs. Roy Ramey, Sr., and Mr. and Mrs. Roy Ramey, Jr., were guests of Mr. and Mrs. Walter Koeppe Tuesday evening.

Mrs. Lyle Harrison spent Tuesday with Mrs. Enoch Harrison.

Mr. and Mrs. Herbert Bethke and daughter Joyce of Minnesota, Fred, Ted and Henry Mielke were dinner guests of Mr. and Mrs. Fred Newman on Thursday. On Friday they were entertained at dinner in the Edwin Mielke home.

Mr. and Mrs. Henry Wendt were business visitors in Lewiston Monday.

Mr. and Mrs. Geo. Wilken and family and Mr. and Mrs. Glen Wegner and family spent Sunday evening at the Myrtle beach.

The Luther League enjoyed a picnic and swimming party on the Clearwater river Sunday evening.

Mrs. Gus Kruger was a visitor in Lewiston Saturday.

Mr. and Mrs. F. W. Newman attended the Kendrick Bean Growers picnic at Spalding park Sunday.

Mr. and Mrs. Gus Kruger and daughters picnicked at the Myrtle beach Sunday afternoon.

Mr. and Mrs. Walter Dennler and family of Pix ridge were Sunday visitors in the John Schwarz home.

Mrs. Stoneburner and Miss Hartung were Saturday dinner guests in the home of Mr. and Mrs. G. F. Criddlebaugh at Leland.

Mr. and Mrs. F. W. Silflow and Mr. and Mrs. Otto Silflow spent Sunday in Lewiston, visiting Herman Silflow, who is convalescing at St. Joseph's hospital, following a recent operation.

Mr. and Mrs. Ernest Heimgartner and family picnicked at the Spalding park Sunday.

LINDEN ITEMS

Mr. and Mrs. Earl Dunham and Mrs. Louis Alexander visited their uncle, Bill Jenks, who is seriously ill in Orofino.

Mrs. McPhee has returned from a visit with her daughters at Orofino.

Bert McAntire started combining barley on Stewart Wilson's place Tuesday. This week several combines and binders are in operation as the grain is ripening fast.

Mr. and Mrs. Ray Morgan and Mr. and Mrs. Lester Weaver were Lewiston visitors Saturday.

Beatrice Ann and Russell Dee Smith returned to Spokane Saturday after visiting their grandparents, Mr. and Mrs. C. H. Keeler and other relatives.

Mr. and Mrs. Earl Dunham have returned to their home in Walla Walla after a visit in the Louis Alexander home.

Miss Pearl Weaver is assisting Aunt Carrie Allen with her household work.

Mr. and Mrs. Arthur Foster have moved into the Starr home, recently vacated by Mrs. Anna Thompson.

Mr. and Mrs. Fred Magee and family returned Thursday from Carlyle, Canada.

Evelyn McAntire, Miss Eva Smith and Mrs. Mattie Garner have been appointed judges of election for Linden precinct.

Mrs. Ernest Goodnight has returned to her home at Nampa, accompanied by her mother, Mrs. E. L. Longfellow.

Mr. and Mrs. Roy Florence of Clarkston visited in the J. H. Hunt home Sunday.

Mr. and Mrs. Dan Lyons and Mr. and Mrs. Coolbaugh of Spokane spent the week-end in the Lyons home. Miss Joyce Lyons accompanied them home for a visit.

Howard Hunt moved his family to Kendrick the first of the week.

Jim Cuddy of Cathlamet, Wash., visited his parents, Mr. and Mrs. Ray Cuddy, recently.

Donna Galloway of Kendrick is assisting Mrs. Addison Alexander with her household work.

A large crowd attended the party given at the Forest Grayson home Sunday evening in honor of Robert Grayson, who will leave soon for a training camp.

Santford Weaver and Howard Hunt went to Bayview Wednesday, where they expected to find employment.

T. P. Fisher is in Troy this week on business.

Thelma Garner and Omie Weaver, who are working in Kendrick, spent Sunday at their homes here.

SOUTHWICK ITEMS

Mr. and Mrs. T. J. Armitage, Artalee and Jack were dinner guests in the Wade Candler home Sunday.

Mrs. Wilmer Hank and Mrs. Elton McCoy visited at Leland Thursday.

Virgil Harris and John Ziemann were callers in Orofino Monday.

Mr. and Mrs. James Skinner of Harpster spent the week-end here.

Mr. and Mrs. Homer Betts were dinner guests of Mr. and Mrs. L. J. Southwick Sunday.

Mrs. Mary Cobble, from Oregon, and daughter from Los Angeles and Mrs. Ralph Wright of Lewiston visited friends and relatives in this vicinity the past week.

Mr. and Mrs. Arne Cuddy were dinner guests in the Given Mustoe home Sunday.

Mr. and Mrs. Nels Longeteig and son John and grandson Bobby Boles called in the Gordon Harris home Sunday afternoon.

Mrs. Margaret Williams and sons returned to their home Friday at Fruitland after spending a week visiting in the Longeteig home.

Mr. and Mrs. Oral Craig and family and Mrs. Gordon Harris visited in the Virgil Harris home Saturday evening.

Neil Southwick of Wallace is visiting in the home of his parents, Mr. and Mrs. Howard Southwick.

Mr. and Mrs. Alvin Shenaman visited with Mrs. Clara Candler Sunday evening.

Mr. and Mrs. Howard Southwick and family visited in Lewiston Sunday.

Everything but Squeal Of Animal Is Valuable

One need only follow the progress of a carcass through a packing house to realize the complexity of production and the multifariousness of the uses to which an animal can be put.

After butchering, the hide is removed by experts who accomplish their task with the least possible damage to the skin. The hide is then cured in brine for 30 days before being sold for the manufacture of shoes, harness, saddlery, belting and related goods.

The tail hair is preserved for employ in upholstering, in the manufacture of brushes and like products. The body hair, removed in the process of tanning, is sold for felting or for mixing with plaster. Ear hair makes the best-known artists' brushes. Whatever hide trimmings remain are turned to account in the manufacturing of glue or as tankage, which is an excellent fertilizer. Even the fat, scraped from the hides, joins the other fats in giant tallow tanks from where it is removed to be rendered into soap.

Most of the body fats are generally found immediately under the hide. These are divided into two groups—the edible oleo fats and the inedible tallow. From oleo fats is derived the oil for the bakery trade and for oleomargarine. Cremol from the same source is extensively used in the confectionery industry, while oleo stearine and residue tallow are destined for lard compounds and oleomargarine.

From tankage, remaining after the removal of other edible products, animal and poultry feeds and fertilizers are manufactured.

Ulcer Death Rate Cut With New Treatment

A dramatic new method of treating bleeding stomach ulcers, which has cut the death rate to a third of its usual figures, and a better understanding of how certain cancers spread through the body were significant medical advances reported at a session of the American College of Physicians in Boston.

The new treatment for ulcers, reported by Dr. T. Grier Miller of the University of Pennsylvania school of medicine, is the direct opposite of previously accepted methods of treatment.

Heretofore, physicians have treated ulcers almost invariably by starving the patient. Dr. Miller told the 2,500 leading physicians attending the congress that he had achieved "dramatic improvement in results" through adequate feeding of patients.

This feeding treatment, combined with a reasonable amount of fluid, is begun as soon as the patient comes under observation, even if still in the midst of hemorrhage, Dr. Miller said.

"The reduction in the death rate," he declared, "on the average from 9 to 3 per cent, is comparable to that in pneumonia from the sulfonamides, though it has not been brought about by the elaboration of a new drug, by the discovery of the cause of ulcer or by the use of any special diet."

Ryegrass Helps New Lawn

New lawns that are seeded during the summer will please the home owner if domestic ryegrass is used at the rate of 5 pounds per 1,000 square feet, according to the Penn State College Agricultural Extension service.

Demonstrations conducted by Fred V. Grau and Charles K. Halliwell of the Penn State office, show that results in establishing good lawn grasses are satisfactory if the following program is followed:

Work at least 50 pounds of lime and 25 pounds of a complete fertilizer, such as a 4-12-4 or 4-18-4, into each 1,000 square feet. Rake the soil until it is fine and firm, then seed the domestic ryegrass. Mow, when grass is more than 3 inches high, at a height of 1½ inches. September 1 cut grass at ¾ inch; apply 25 pounds of organic nitrogen fertilizer, such as cottonseed meal, to each 1,000 square feet; seed with a mixture of two pounds of Kentucky bluegrass and one pound of Cheering's fescue to each 1,000 square feet. After that continue cutting at 1½ inches.

Island of St. John

The island of St. John in the Virgin island group, has an area of about 21 square miles and lies about four miles east of St. Thomas. Although it is the least important in size of the major islands, St. John possesses a harbor at Coral bay, which, according to engineers, requires only development to make it a rival of the better known harbor at Charlotte Amalie. Sugar cane is grown on a very small acreage, but the chief industry is the growing of bay leaves and the distillation of the bay oil from which bay rum is made. The inhabitants, about 765, are colored or of mixed blood, with few exceptions.

Cloudiness in Jellies

Cloudiness in jellies usually is caused by improper straining. Pour the juice into a jelly bag and let drip dry. One end of the bag can be tipped to allow more flow of the juice, but never squeeze the bag. Straining the juice twice will produce a very clear jelly, but of course will reduce the quantity.

Distressing Experience With Prickly Pear Ends

Man often gets his knuckles rapped when he monkeys with the balance of nature. Starlings were introduced into the U. S. to crowd out English sparrows. Now the starlings are a great nuisance in some eastern cities, while the replacement of horses by automobiles hit the sparrows harder than the starlings did. When rabbits were taken into Australia they proliferated enormously for lack of natural enemies. Wholesale slaughter has not suppressed them. Australia also had a distressing experience with the prickly pear—but in this case there was a happy ending.

North and South American prickly pears, members of the cactus family, were taken to Australia in the Nineteenth century, planted for hedges and as a source of fodder. By 1925 they threatened to crowd out native vegetation on 30,000,000 acres of land, and on 30,000,000 more acres the pears had completely won, standing in a dense, solid growth two to five feet thick. The cost of fighting them with chemicals, by digging or plowing, stacking and burning, would have been more than the land was worth. So, year after year, more land was abandoned, more homesteads deserted.

Meanwhile the Australian government sent agents to the Americas to see what the prickly pear's natural enemies were. The agents investigated about 150 insects that fed on cactus and nothing else, but a few of the most promising work in Australia. By far the most potent destroyer proved to be a little moth borer, *Cactoblastis cactorum*. The larvae of this insect at the inside of the pear plant, eaten the roots, and their depredations promote rotting due to bacteria and fungi. Armed with strings of moth borer eggs glued to strips of paper, fieldworkers swarmed rough prickly pear land, pinned their deadly eggs on the plants.

Largest Sharks Harmless If Wine-Hued in Color

Among the many strange creatures that inhabit the depths of the sea there is a curious wine-colored shark, according to a recent publication of the Smithsonian institution, written by Dr. Henry W. Fowler, of the Philadelphia Academy of Sciences.

This curious denizen of the deep has 20 rows of teeth in its huge mouth, and its whole underside shines with a ghostly light at night. It is found in tropical waters the world around, and its shining, as in the case of other marine animals, worms, and insects such as fireflies, is produced by phosphorus. The luminous parts of this weird shark will continue to shine for several hours after death.

The biggest sharks, Dr. Fowler writes, are the most harmless of all. They are known as basking sharks. They attain lengths of from 30 to 36 feet and are the largest of all sharks. They are found occasionally around American shores, but chiefly inhabit Arctic waters.

The basking shark gets its name from its habit of lying motionless on the surface of the water in the sun, often in schools. In spite of its huge size, it is quite harmless, being either so good-natured or so stupid that it never molests anyone and if attacked will try to get away, swimming very slowly. It feeds on fish.

Party for Lonely Hearts

Because he had known what it is to be lonely in a big city, Carl H. Caro inaugurated his Studio Parties. Their purpose is to provide a social life for the shy and friendless. To his Greenwich Village come guests for an evening of music (Caro is a pianist-composer), dancing, games—and refreshment that contains no hint of alcohol. Subscriptions for most affairs are \$1 a person; Saturday evenings the rate is \$1.25. Guests of all ages are drawn by advertisements in local papers and through recommendations of friends. Within the past year and a half Caro has entertained some 5,000 persons. His home has come to be a recognized social center, appealing not merely to the lonely, who have no place to go, but to those who feel they can have a better time at Caro's than at most of the conventional entertainment centers. Result: Twenty-six marriages, four suicides averted, seven jobs found. Host Caro met his bride at one of his parties.

Versatile Labor Savers

Household labor savers, running to fly-executing machines, can openers, ant control traps, personal beauty aids, such as a bathing cap equipped to massage the bald scalp, thus stimulating hair growth; travelers conveniences—like the tiny plastic washboard to launder hosiery in a hotel washbowl, and a dog exerciser were recently on display at an inventor's convention in Los Angeles.

Trick Lighter

Catch a mouse and light a cigar in one simple operation. The mouse takes the cheese, and that springs the trap, knocking down a ball that pushes a lever—and it strikes a match. That is one of the newest gadgets—a combination cigar lighter and better mousetrap—on the market.

Hatchery Production Is Billion and a Half Fish

Back in 1875 Wisconsin sportsmen and conservationists figured that if you caught two fish where one grew before you had better help that one grow into two. And so that year Wisconsin's first fish hatchery was opened at Madison.

Fish were spawned, reared, and "planted" for 60 years until, in 1935, hatchery production and distribution reached a figure of 523,245,145 annually. Next year the figure crept up 49,023,978 more to reach 572,269,123.

Then, in 1937, a good many people looked twice and accused their reporter of adding too many ciphers, when Wisconsin was reported as producing nearly twice as many young fish that year—a record-breaking total of 1,096,739,759.

Since that time it has taken 10 digits annually to announce Wisconsin's hatchery fish crop. In 1938 it was 1,124,884,750. In 1939 it was 1,133,472,849. Now the figure for 1940 has just been received: an increase over 1939 of 395,736,155, or a new year's total of 1,529,208,004.

The increase in 1940 over 1939 is a figure larger than that for all the fish planted in many previous years, and the difference between these two years alone is a larger figure than the total fish-plant figure for most other states.

Crown Chicken Champ, Egg Layer of World

A Corvallis, Ore., white leghorn, owned by J. A. Hanson, has been crowned the champion egg layer of the world.

The leghorn, known as 97-5, was one of a team of 13 which made a world record during the 51-week International Egg Laying contest, conducted by the University of Connecticut.

The champion biddy, competing against 1,299 other hens, ran up a total of 369 individual points. In team competition, the Hanson leghorns laid 4,041 eggs in the 51 weeks, for a total of 4,233 points. Another team entered by Hanson took second place with 3,658 eggs, and 3,893 points.

Judges announced that the winning team's "astonishingly high performance was made in spite of a 1,300-mile journey across the continent."

There were 100 teams of 13 hens each in the competition. In all, they laid 277,932 eggs.

It was announced that "all computations were based on the original 1,300 hens entered, with no leeway or allowance for losses during the laying year. In other words, this system put it squarely up to the breeder to enter pullets that could both lay and live."

Tulips of Netherlands

The tulips of The Netherlands, world famous for almost four centuries, are being crushed by German invasion. The bulbs which have been Holland's pride are going into Nazi ersatz food substitutes and livestock fodder.

There's little room in Hitler's "new order" for flowers, Netherlands tulip growers report. Tulip bulbs are processed to make a coffee substitute, with real coffee costing \$2.50 a pound. Hyacinths have become cattle feed; narcissus bulbs yield starch. An ersatz flour is being made from various other bulbs.

Before the invasion The Netherlands' tulip acreages were reduced about 50 per cent by defense preparations.

The tulip is not a native of Holland. The first bulbs were brought from Persia in the Sixteenth century. Dutch growers have developed nearly 2,000 varieties. Export of bulbs has been a major item of trade with United States.

Gaur Bulls

Water buffaloes belong to the cattle family. They were given their name because they like to lie in the water of marshes, pools and streams during hot hours of the day.

Many water buffaloes run wild in India. Others have been tamed and are used in plowing and for other purposes on farms.

Water buffaloes are seldom more than five feet high at the shoulders. They are not such big animals as other cattle—the gaur—which also are found wild in India.

Gaur bulls are among the giants of the cattle world. Often they have a height of six feet at the shoulders. The horns of a gaur bull are large and strong. They are six or seven inches thick at the base, and a pair of them may spread out three feet.

Efforts to tame the gaur have met little success. The big animals like their freedom, and it is dangerous for men to try to keep them as they would common cattle.

Classify Foods Properly

Count salt pork, fatback and bacon as fat, not as meat. Use butter or vitamin-rich fat every day. Count spaghetti, macaroni, noodles, grits and white rice along with white bread and cereals—not as vegetables. Count 1 pint of undiluted evaporated milk (a little more than 1 tall can), or 1/4 pound of dry milk, or 1/2 pound of cheese as having about the same food value as 1 quart of milk. In economical diets use dried beans or peas as the main dish several times a week. Use liver, kidney and such salt-water fish as salmon, herring and mackerel occasionally.

FARM TOPICS

ORCHARDS NEED AMPLE NITROGEN

Vital Element Is Essential For Heavy Growth.

By E. F. SERR

(Extension Horticulturist, University of California)

Springtime is time for fruit growers to think of nitrogen. Fruit trees draw heavily on soil supplies of nitrogen while making heavy spring growth. Deficiencies are likely to develop, especially when most of the nitrogen is tied up in a cover crop. Consequently, early fertilizer applications are often needed to carry the trees through in good condition.

The foliage of trees suffering from lack of nitrogen is pale yellow rather than bright green in color. Usually the individual leaves are also smaller and the tree has a more open appearance, the foliage being relatively sparse in comparison with the dense growth of normal trees. The shadows cast by trees well supplied with nitrogen are noticeably darker than those of trees whose nitrogen supplies are low.

Supplies of available nitrogen in the soil vary greatly throughout the year. They tend to be high in late summer and low in early spring. This brings the low point in supply just when the trees need the largest quantities in order to make spring growth.

A late growing cover crop will increase the natural shortage of nitrogen because it will tie up large quantities used in its growth. This may not become available to the trees for a considerable time after the green manure has been turned under. When the cover crop is allowed to become mature additional nitrogen will be tied up while soil organisms are decomposing the woody material. These organisms actually take up more nitrogen from the soil. This competition for nitrogen from late growing cover crops is especially important in unirrigated orchards where summer rainfall is light or does not occur at all.

Nitrogen fertilizers applied early enough so that the nitrates are available in sufficient quantities during the period of rapid spring growth have been found effective and profitable in many areas. Peaches are especially responsive to fluctuations in the nitrogen supply in the soil.

Broody Chickens Waste Feed, Lower Egg Profits

A nest of broody birds is a sign of poor poultry management, says J. C. Taylor, associate extension poultryman at the New Jersey college of agriculture, Rutgers university. With the prevailing narrow margin of profits in the poultry business, no poultryman can afford to tolerate broodiness in his laying flock, he reminds poultry owners.

"It should be remembered that for every day a broody bird stays on the nest, it takes three days to break up her broodiness," Taylor points out.

"Good management requires the removal of all birds showing any tendency to broodiness to special pens or coops," he says. "All laying pens should be inspected the last thing in the evening for broody birds. They can be readily identified by their presence on the nests. Brood coops in individual pens provide a satisfactory way of confining them, or if the number is large the use of a summer shelter for confining the broody birds is very satisfactory.

"It is not advisable to restrict any of the feed in an effort to break up broodiness. Confining the birds in small coops is all that is necessary. The important point is to remove them from the nests at the first indication of broodiness."

Sudan Safe Pasture If Caution Is Used

To farmers who are wondering whether or not it is safe to pasture cattle on Sudan grass, W. L. Boyd, chief of the veterinary division at University farm, St. Paul, advises that there is little or no danger from prussic acid (cyanide) poisoning as a result of feeding this crop.

Exhaustive tests by members of the veterinary staff have failed to develop a single case of poisoning where Sudan alone was fed to stock. With sorghum or cane, however, the situation is different. Under some conditions sorghum is a very dangerous feed and even if there is only a little of it mixed with the Sudan pasture trouble may result.

Feeding Iodine to Cattle

The most convenient method of feeding iodine to dairy cattle is to combine it with salt at the rate of about one ounce of potassium iodide to 300 pounds of salt. To facilitate mixing this small quantity of iodine, first mix one ounce with eight ounces of slaked lime or cornstarch.

Another method of feeding iodine is to use the iodine tablets that you can secure from the regular veterinary supply houses, dissolving these in water as recommended.

New Recipe for Use in Canning Tomato Juice

Directions for canning tomato juice—To preserve the natural flavor and color, use stainless steel knives and avoid copper, brass, and iron utensils. Use only fully ripe, firm tomatoes, preferably bright red, as fresh from the vines as possible. Wash thoroughly, remove cores, and cut into small pieces. The skins may or may not be removed. Handle the tomatoes in quantities of one to two gallons and avoid delay at any stage of the procedure. Precook the tomatoes at about 170 degrees F. to 180 degrees F., or if a thermometer is not available, simmer until softened. Avoid boiling. Put the softened, hot tomatoes at once through a fine sieve, preferably a bowl, or cone-shaped sieve because it allows the least air to be incorporated in the pulp. If the tomato juice is for infant or invalid use, omit salt; otherwise add one-half to one teaspoon salt to each quart. Spices tend to darken the color of tomato juice and change the flavor undesirably; hence it is better to add them at the time of serving. Reheat the juice at once after putting through the sieve. If glass containers are used, heat the juice to 190 degrees F. (or just to boiling), pour into sterilized containers, and seal. No processing is necessary. Invert the bottles while cooling.

English Drink 'Porter'; Named for Worker-Porter

Deriving its taste, appearance and flavor from the use of well-dried malt and hops, why should this tonic, full-bodied and not particularly intoxicating drink be called porter?

The answer harks back to the first half of the Eighteenth century, in London, where, then as now, the popular brews of the day were ale, beer and a concoction known as two-penny.

"It was customary," writes one Malone, a researchist of a former generation, "for the drinkers of malt liquors to call for a pint or tankard of half-and-half, and in course of time it became common to call for a tankard of three-thirds, meaning a third of ale, a third of beer, and a third of two-penny."

"To avoid the inconvenience of going to three casks for every draft of ale, a brewer conceived the idea of making a liquor which should partake of the united flavors of ale, beer and two-penny."

"He did so, and succeeded, calling it entire, or entire butt; and as it was a very healthy and nourishing liquor, suitable for porters and other working people, it obtained the name of porter."

What's in a name!

Gibbons in Siamese Forests

If, as some evolutionists think, man came from a remote ancestor whose family also gave rise to the various branches of apes, then the present day Siamese gibbon shows what may have been like the beginnings of human family life a million years or more ago.

It is thought possible that the Siamese gibbons have lived about unchanged in their present environment for a million years or more.

The report was made by C. R. Carpenter, assistant professor of psychology at the Pennsylvania State college. He studied 93 gibbons, in 21 families, in their native forests.

Their substitutes for speech are near human, comprising sounds and gestures. Gestures of friendliness or the opposite are unmistakable, a sort of sign language. For example, in a friendly meeting the hands are held with backs forward in a position unsuitable for striking or punching.

Their vocal range is near human. Sound films, taken of their voices in the forest, were played back to the same animals. These gibbon audiences seemed to understand the sounds and talked back to the pictures.

Dangerous Sharks

There are many different species and varieties of sharks that are dangerous, particularly the white shark or man-eater, which is white below and brown on the upper parts. The man-eating shark is probably the best known of the sharks.

Most sharks, being extremely active and roving, are found widely distributed in the seas of the world. There are perhaps not more than five or six different kinds of them that are not dangerous, all the others being noted for their ferocity. Their teeth-filled mouths, as you have often seen in pictures, are usually on the undersurface of the head, so that in order to bite conveniently objects on the surface of the water, they are compelled to turn on their backs.

Shark fisheries have been developed in various parts of the world. Some sharks yield a large quantity of valuable liver oil and other products, such as fins and scales used in the manufacture of purses and other commercial objects.

Wash Thoroughly

Flower vases should always be thoroughly washed with hot soapy water between uses. Fill the flower containers with sudsy water, let stand about 10 minutes, then wash and rinse with clear water. New bouquets will flourish better in a clean vase, last longer and retain their perfume and freshness for a longer period.

WE'RE MARCHING ALONG TOGETHER to Win the WAR ON WASTE!

Economy is a "natural" for Reddy Kilowatt. He helps save your energy; saves foods; protects your family's health; gives you precious time for Red Cross, Civilian Defense and other important activities.

Use your electric appliances to save, careful not to waste electricity. Keep your appliances in good repair. The same electricity that helps you save time, energy and money in your home is helping build planes, ships and tanks to win this war.

HERE IS HOW YOU CAN HELP PREVENT WASTE

WASTE NOTHING! Learn the delicious ways leftovers can be used to make new dishes; store perishable foods correctly to avoid spoilage.	BUY CAREFULLY! Plan food purchases for health value and for economical quantity buying.	TAKE CARE OF THINGS! Make the things you have last as long as possible. Keep your electrical appliances in repair.	COOK PROPERLY! Make sure full food values, vitamins and minerals are retained in your cooking; learn how to use your electric range most efficiently.

★ THE WASHINGTON WATER POWER COMPANY
A SELF-SUPPORTING, TAX-PAYING, BUSINESS ENTERPRISE

Scrap Metal Very Important
War production during the critical months immediately ahead will be hampered seriously unless scrap and junk can be kept freely flowing, in increasing quantities, to war plants producing materials for our fighting forces, Denver regional officials of WPB warn.

The warning came as defense councils and salvage committees throughout the Rocky mountain and western areas completed organization for the National Salvage program, which opened July 13, and for the "National Scrap Harvest" of junk from farms.

Facts and figures of the war production situation show clearly, it was pointed out, that the supply of raw materials is now the most important limiting factor in the production of planes, tanks, guns and ships.

WPB officials appealed to all localities to organize for the scrap campaigns and to all citizens to do their patriotic share in the collection of junk now, in order that war plants will not have to slow down this winter.

A reserve scrap pile of 10 million tons of scrap iron and steel, for example, is needed to keep mills running this winter when weather hampers the movement of junk from homes and farms, through dealers to the production line.

Needed in the National Salvage Program are metals, particularly iron and steel, rags, burlap, rubber and household fats.

Meat dealers in the west and throughout the nation—more than 300,000 of them—are cooperating in the fats collection campaign.

Housewives are asked to strain off their waste fats and greases into a shortening or coffee can and to keep the can in their refrigerators until they have a pound or more. This is sold to the nearest meat dealer, who passes it on to be rendered. Eventually the waste fats become glycerine for explosives.

This wooden soldier really fights

PIN a distinguished service medal on the lumber industry! When wood is wanted, and wanted fast—for army camps, shipyards and ships, ammunition boxes, bomb crates—lumber flows smoothly from mills to thousands of building and manufacturing tasks. No bottle-necks. No retooling. No plant expansion.

The Northern Pacific takes the stage, too, to help lumber play its fighter role. During '40 and '41, trainload after trainload of forest products rolled east from Montana, Idaho, Oregon and Washington on the "Main Street of the Northwest". Now that national defense has become national offense, this year will see 'em roll as never before!

NORTHERN PACIFIC RAILWAY

Art: Thought you'd like to see how NP is advertising the war effort in the Northwest in Newsweek, U.S. News, Business Week, Nation's Business and Forbes magazines.

NOTICE OF TIME AND SALE OF REAL ESTATE

IN THE PROBATE COURT, COUNTY OF LATAH, STATE OF IDAHO

In the Matter of the Estate of WILLIAM M. BARCLAY, Deceased

NOTICE IS HEREBY GIVEN that the undersigned administrator, and administrator with Will annexed, of the estate of William M. Barclay, deceased, will, on or after the 15th day of August, 1942, at 10:00 o'clock A. M. of said day, at the office of Tom Felton, in the Idaho First National Bank Building in Moscow, Idaho, sell at private sale to the highest bidder, all the right, title, and interest in the above estate of said decedent in and to the following described real property in Latah County, State of Idaho: The Northwest Quarter of the Northeast Quarter (NW¼NE¼) of Section Eighteen (18), the Southwest Quarter of the Southeast Quarter (SW¼SE¼) and the Northeast Quarter of the Southeast Quarter (NE¼SE¼) and the Northwest Quarter of the Southeast Quarter (NW¼SE¼) of Section Seven (7), Township Thirty-eight (38) North, Range One (1), W. B. M.

Such sale will be for cash, if a reasonable cash offer be received, or by title retaining contract, Ten per cent (10%) of the purchase price to be paid to the administrator and to accompany the bid on the day of the sale, and the balance of the purchase price to be paid on the date of the confirmation of the sale by the Probate Court, or as the Court may order, by title retaining contract.
 Bids must be in writing and may be left at the office of Tom Felton in Moscow, Idaho.
 EDGAR BOHN, Administrator and Administrator with Will Annexed of the estate of William M. Barclay, deceased.
 1st pub. July 30, 1942
 2nd pub. Aug. 6, 1942.

MORE SOLDIER LETTERS

Camp Roberts, Calif. July 28, 1942

Dear Friends:
 Will drop just a line to you tonight and let you know I received my first issue of the Gazette today. I also want to say that I am very glad to get it, as that's the only way I get to hear the news from places other than Big Bear ridge. Thank you very much.

I am stationed here at Camp Roberts, Calif., for the present, at least for six weeks from day of my arrival. I like this life fine and will say its a great training for everyone who gets into one branch or another of the service.

Lloyd (Buz) Nye from Juliaetta is in the same Battery as I am, and I see him every night and at show time. It's nice to have someone from the same community around home to visit with.

Thanks again for the paper. I look forward to receiving it every week.
 Sincerely yours
 J. E. Forest.

July 26, 1942
 Merced Field, Calif.

Dear Friends:
 It's high time for me to write you a few lines and thank you once again for the paper. I want you to know I certainly appreciate reading the news of what the home folks are doing.
 I might say I like the army fine, even though I do have trouble understanding their methods — I have my ups and downs, but I get along pretty well at that.
 I'm not much of a hand at writing, but sincerely want to thank you for the paper.

Yours truly,
 Cpl. Elgin W. Flesham.

July 31, 1942

Dear Friends:
 Due to the frequent changes and uncertainty of my address in the future, I thought I had best write and say that for the present my name had better be left off the mailing list of the Gazette, which you have so kindly been sending me boys in the armed services. I have greatly enjoyed the paper and looked forward to receiving it each week, and I'll certainly miss getting all the news from home. I'll send my address again as soon as I have one I can be sure of.
 Wishing to again thank you, and with my best regards,
 Cpl. Oscar R. Knutson.

JULIAETTA NEWS ITEMS

Mrs. Rose Long, Leta and Zada were Pullman visitors over the weekend.

Conrad Kaylor and Don Candler of Portland spent Sunday and Monday at the Lloyd Candler home.

HAROLD THOMAS, Editor

EDITORIAL

Well Folks — Here it is harvest time again — and as well as almost at the same time we've got to thresh our crop of political candidates, separate the grain from the chaff as it were, and prepare the whole for cleaning at the general election this fall.

Now that the Kendrick Bean Growers have an electric eye picker for the extraction of 'off color beans,' we would like very much to be able to put the political candidates through the machine. It would undoubtedly save lots of time and expense to the voters.

However, enough of that — remember we want to buy that can of cream. As an additional time saver you'll find all our cans steam-sterilized and ready for use when you get them back — and that means labor saved in a busy season. Try us with a can. Bring in a can of cream. You are sure to like our cash.

She: "Why is a bee so happy and always humming when he leaves his hive?"
He: "He has just made his honey."

Mother: "Where do bad little girls go?"
Girl: "Most everywhere."

"If there were four flies on the desk, Mary, and I killed one, how many would be left?"
"One," promptly replied Mary — "the dead one."

"Jones has eleven children."
"Gosh! He's gone stork mad, hasn't he?"

We know a girl so dumb that she thinks a dental laboratory is a place where they fix fenders.

We work to earn our bread to gain the strength to do our work.

Kendrick Theatre

FRIDAY, SATURDAY, AUG. 7-8

Also Cartoon
Show Starts At 7:00 P. M.
25c Admission 10c

CRESCENT CLIPPINGS

Mrs. Bertha Wright, Mrs. Mary Cobble and daughter were Friday dinner guests of Mrs. Ben Baker. They visited in the afternoon at the Ray Cuddy home and in the evening in the Frank Souders home.

Mr. and Mrs. Alfred Swanson and children were up on the hill over the week-end.

Mr. and Mrs. Oral Craig and children visited Sunday afternoon with Mr. and Mrs. Kloster.

Mrs. Frank Souders and Marion visited Sunday evening at the Ben Baker home.

Mr. and Mrs. Bert Kloster and children visited Saturday evening in the Arne Kloster and John Darby homes.

Mrs. Elmer Souders visited Sunday afternoon with her mother, Mrs. Lena Swanson.

John Darby took a load of hogs to Moscow Monday for himself and Ben Baker.

Idaho Volunteer Enlistments

Enlistments are proceeding quite steadily, if at not too rapid a pace, in the Idaho Volunteer Guards, where a company, which we understand is to be the first in Latah County, will be formed.

In last week's issue the dates of enlistment were listed as August 7 and 8, 7:00 to 10:00 p. m. at the City Hall. This has been changed, enlistments may be made at the Farmers Bank or at Dr. G. W. McKeever's at any time previous to these two evenings, but if you have not already signed up — please do so on those two evenings.

Organization plans are as yet rather an unknown quantity, but Tom Felton, commanding officer of Latah county, advises that they will be completed as soon as possible.

Preliminary advices are to the effect that this company's number will be 2K1, the designation 2K being county, and the "1" meaning Company, in Latah county.

All able bodied males between the ages of 17 and 70 are eligible to join — and all residents of Latah county adjacent to Kendrick are urged to sign up at once. Below the ages of 17 parents consent must be obtained.

Be Sure Grain Is Ripe

Despite the fact that more and more grain is flowing into local warehouses and elevators, the local managers of both concerns, again wish to emphasize the fact that wheat should be dry and ripe before combining or threshing.

The storage situation, at least nationally, does not permit the special handling of moist or unripe grains — so be sure it is ready before you start that combine or thresher.

Each day that passes sees more and more of the golden kernels rolling into town. However, farmers and grain dealers agree it will be at least another week before the peak harvest rush begins.

WHAT'S GOING ON IN AMERICAN RIDGE SECTION

Mr. and Mrs. John Wilson are the proud parents of a baby girl, born Wednesday morning, Aug. 5. Albert Cox of Moscow is spending his vacation here with his mother, Mrs. Wm. Cox.

Mr. and Mrs. Willard Cox of Twin Falls are spending their vacation at the Cox home here.

The ridge Red Cross meets with Mrs. Harold Roberts, Friday, Aug. 7. Mrs. Ella Benscoter attended a bridal shower honoring Mrs. Clinton Dyer (nee Doris Harland) on the upper end of American ridge.

Miss Mary Harland has departed for San Francisco, where she will marry James Springer, formerly of Genesee, but now employed in California.

Mr. and Mrs. Robert Cain and daughter Rita, Johnnie Wilson and daughter Lottie called at the Harry Benscoter home Tuesday evening.

Grandma Benscoter spent Sunday and Monday at the Harry Benscoter home. She is now visiting with the Frankie Benscoters.

Mr. and Mrs. Carroll Cox and family of Ferdinand spent Sunday at the Wm. Cox home.

Miss Rita Cain spent Tuesday with the Walter Benscoter girls.

Ben Callison of Lewiston was a visitor of his daughter, Mrs. Walter Benscoter and family, Tuesday. Mr. and Mrs. Norla Callison and daughter came for him that evening, as Ben is going to help Norla with combining.

Jermore and Charles Woody are spending a couple of weeks with their grandparents, Mr. and Mrs. John L. Woody, after visiting at the Bruce Glenn home for some time.

Mrs. Joe Ebson and daughters of Rogersburg, have returned to their home, after visiting for a week at the home of her parents, Mr. and Mrs. John L. Woody.

Mrs. Wm. Wolff and Mrs. Clarence Johnston of Kendrick visited with Mrs. Harry Langdon Thursday.

Mrs. Harry Langdon made her final check-up with the doctor on Saturday. She is getting along very nicely.

Harry Langdon was a Lewiston visitor Friday, securing combine repairs.

Raymond Harland was a visitor at the Geo. Havens home Friday evening.

A group of friends and relatives gathered at the Moscow park Sunday to celebrate the birthday anniversaries of Harold Roberts, Lanova Roberts, Troy and Stanley Grangers of Clarkston.

All the combines on the ridge are now running at top speed.

Mrs. Perry Mattoon helped Mrs. Harry Lanedon can berries and cherries last Friday.

Mrs. Geo. Havens picked berries at the Langdon home Friday and Monday.

Mrs. Mary Deobald was a caller on Potlatch ridge last Wednesday.

Sunday Mrs. Mary Deobald attended the Christian S. S. in Troy and was a dinner guest of Mrs. Lizzie Stinson. Mrs. Grace Stinson of Juliaetta and Mrs. Smith of Troy were also guests, and that evening Mrs. Deobald took the two Mrs. Stinsons to Juliaetta.

Frankie Dammarel is doing the chores at the Harry Langdon home. He arrived there Monday.

Little Charles Havens visited with his grandparents, Mr. and Mrs. Ira Havens, in Kendrick, a few days this week.

Mr. and Mrs. Norla Callison and daughter were Lewiston visitors on Monday. Ben Callison came up with them.

The Norla Callison and Claude Jones families went to Clarkia Sunday. The men fished and the women picked huckleberries. They reported the berries as pretty scarce.

Mr. and Mrs. E. P. Roberts went fishing in the North Fork section Sunday. They reported no huckleberries in that country.

Mr. and Mrs. Chester Woody came up from Clarkston Saturday evening, got Mrs. John L. Woody and all went to Spokane to see Claud, who is in the Sacred Heart hospital there. His condition is reported as serious. The group returned home that evening with the exception of Miss Gladys Woody, who is in Spokane with Claud.

Storage Room

The Lewiston Grain Growers, Inc., wish to announce to the public that we believe we will have ample room for all dry wheat, oats and barley they may wish to haul.

Since operating in Kendrick there has never been a year in which we were not overcrowded on storage space, however, this year, we feel that we will have room to spare.

Working on the theory that it is better to have room and not need it — than to need room and not have it — we have added some 400,000 bushels of additional storage within the last two years.
