THE KENDRICK GAZETTE THURSDAY, DECEMBER 16, 1943

TN 1927 our company drafted plans for permanency in North Idaho and during the intervening years, 1927 to 1943, we have observed and followed to the best of our ability the three basic principles of all good forestry-"to protect"-"to harvest"-and "to grow" trees. We have done this so that those plans, the execution of which began in 1927, can be made to materialize.

Recognition of the high ideals underlying the plans developed to achieve permanency for our operations was recently made to our company by the Western Pine Association. This recognition was in the form of a certificate proclaiming the forest acreage in our ownership within the Clearwater drainage to be a Tree Farm, and naming it the . . .

## **CLEARWATER TREE FARM**

We are happy to receive the recognition for which this certificate is the token and to have the people of Idaho share with us the pleasure of such recognition. The Clearwater Tree Farm is the first area of land to be certi-

fied as a Tree Farm in Idaho. In return for this certification we have pledged a continuation of forest practices that will protect, harvest and grow future crops of trees.

It will be our job to fulfill this pledge. We shall do so, full of confidence in the future that lies ahead of our country and its people!
