"FIGHT WASTE — as our forces fight the enemy."

Admiral E. J. King, Commander in Chief, U. S. Fleet.

One important way to FIGHT WASTE is to take better care of our electric appliances so that they can continue to serve on the home front.

New appliances can't be had, and repairs are getting more difficult to obtain. Your appliances are vital—short-cutting housework, saving time and effort, giving you more time for war tasks.

FREE! APPLIANCE CHECK-CHART

We've enlisted in a nationwide campaign to help keep appliances running longer. A new calendar check-chart of "do's" and "don't's" to keep your appliances in the fight has been prepared. Ask for your Appliance Check Chart at your nearest Water

DOUBLE FEATURE

PUBLISHED BY THE KENDRICK CO-OPERATIVE CREAMERY

CREAM AND EGGS ARE VITAL WAR FOODS!

Today, on the eve of "D Day", foods are of vital importance, and butter and eggs are among the most important.

Butter, as you know, is very high in food content and requires but little packing space — and when "D Day" arrives our men must have vital nourishment as well as arms and ammunition. Therefore, take good care of your cows and cream, and market it with us as often as possible. Keep it clean and cool, and - sweet if possible.

Eggs, too, are important. Care for them as you would cream and be sure they reach us as soon as practical.

And Remember Co-operative marketing will assure you of high returns. If you are not now a member or selling through us — come in and let's talk this over.

Lois: "Is my dress too short?" Belle: "It's either too short or you're in it too far."

Only uncomfortable chairs become antiques; comfortable chairs are worn out by use in a single

generation. Chub: "Is it true that Bjones has brain fever?" Chum: "No, but he's got the

next thing to it."
Chub: "What's that?" Chum: "Spring fever!"

A college professor says that this civilization will last 40,000 years. That's nice . . . and now what we want to know is when will it begin!
