I'll predict no-miles-an-hour.

I'll hand it to folks. They've had the patriotism to hold down their speed. But imagine war restrictions ended. Man, you'll see old cars overdoing till they can't chug another mile. You'll see every repair shop crowded for months, but I'm figuring to duck that! Of course, I couldn't see everything coming when I originally had this engine OIL-PLATED. I'd simply overheard that any engine forms dangerous corrosive acids. It made sense to try protecting the engine by OIL-PLATING it with Conoco Nth motor oil. I switched to Nth. You can suit yourself about thinking it's the only oil or not, but first read

the whole label. You'll see where Conoco Nth oil's special synthetic fastens oil-plating to your engine's fine inside finish. Then OIL-PLATING is really sort of a special surface to block steady acid corrosion. When repairs might be just a promise, and you can only pray for a new car, you're way ahead with your engine safely OIL-PLATED by Conoco Nth.
