ATTENTION! ALL **HOME CANNERS**

Before you begin your 1944 canning, Good Housekeeping Magazine advises you: use the boilingwater bath method for tomatoes and fruits, only. Can all vegetables except tomatoes by the correct use of a pressure cooker to be sure of killing botulinus germs. In the last few years, cases of botulinus food poisoning have cropped up in widely different parts of the country. Buy, borrow, share a pressure cooker—but don't can low-acid vegetables any other way. If you want further informetion write Good Housekeeping Magazine, 959 Eighth Avenue, New York 19, N. Y.
