The giraffe and the turtle tell their own story. . . . They help to remind you that ELECTRICITY. almost alone among household necessities, IS STILL SOLD AT LOW PREWAR PRICES.

You realize HOW low these prices are when you know that the average American family now gets about TWICE as much electricity for its money as it did 15 years ago.

If your bill isn't smaller, it is because you have more electric servants and are using more electricity today than you did then.

It's a real achievement to keep electric service CHEAP in spite of rising costs and taxes — and to keep it PLENTIFUL in the face of war's tremendous demands for power.

The credit goes largely to the hard-working men and women of your electric company. Their skill and experience - plus the planning and foresight of sound BUSI-NESS management—have made this record possible.
