**WHERE A MILLION DOLLARS
IS "COFFEE MONEY"**

---From a Potlatch Forests, Inc., man in Corsica

It has been a long time since I have seen any of you, but I get the company magazine regularly and am pretty well posted on what you fellows are doing back home. I makes me proud too.

We use a hell of a lot of everything over here and when I say a lot, I'm not kidding. You can have no accurate idea of how much unless you've seen part of it. A million dollars would be mere coffee money.

I get to see quite a bit of Idaho White Pine where I am. All our aircraft engines come crated in White Pine, but there are no markings on the boxes to indicate what mill produced the lumber. No doubt some of it comes from the plant at Lewiston.

Best of luck to each of you for 1945 . . . and may peace come with it.

—Pete.
T-Sgt. R. J. Peterson

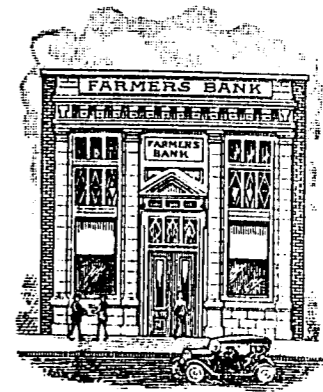

— V-MAIL —

Yes . . . some of the lumber mentioned unlobtably came from P. F. I. More important, we're still turning it out and trying hard to increase the output.

Meantime, we're eagerly thinking ahead to the day when Sgt. "Pete" Peterson and over 800 other P. F. I. men can return to the jobs they left, or to better jobs, in the production of lumber and wood for homes and peace.

REMEMBER FOLKS:

Suppose a farmer had a hired man and gave him \$12 and told him: "Go to town and get three bags of feed."
The hired man was able to get the feed for \$11, so he brought back \$1.00, which he turned over to the farmer for whom he acted as agent.
Now suppose this same farmer and 499 of his neighbors joined together in a farmers' cooperative which they used as their agent to set up facilities and employ "hired men" to help them get their farm production supplies or sell farm products.
On each transaction they pay about the going rate for service, and they don't settle up with their co-op after each transaction, but wait until the end of a year, when the figures are all in, and they can determine how much was left over and what should be retained in the business to keep it running.
What is left is returned to the farmer-member in cash or some

evidence of ownership, each member getting back an amount in proportion to the use he has made of the co-op.
This return, appropriately enough, is called a "Patronage Refund."

The Japanese have their own ideas about a draft board greeting. The commanding officer of the company to which the new draftee is assigned writes: "Greetings to the Father and Elder Brother. We have learned that your son and brother will shortly experience the greatest joy and satisfaction possible to one of our nation by joining soon our sacred company. We congratulate you."

Nervous Suitor: "Sir, er—that is, I would like to—er—that is, I mean I have been going with your daughter for five years—er."
Father: "Well, waddya want—a pension?"

and five feet wide and travels between thirty-five and forty miles an hour. I can carry three people at that speed and four or five at about twenty-five. We ran through several schools of Spanish mackerel at the mouth of the river, they were headed for deep water — too many sharks around. We shot at a couple of the sharks, but don't know whether we got any because they would dive to the bottom every time they were hit.

We took a couple of the natives as guides. The one that was with me said: "You fellow, go along side this fellow John, findum plenty much croc. This fellow Mary cookum bloody well tail long croc. You fellow givem this fellow John two pack cigarettes, this fellow bloody well findum you fellow croc." What he meant was if I would give him two packs of cigarettes he would show me where to get the croc and that his wife Mary would cook them. I gave him the cigarettes but didn't fancy any meal his wife would have cooked.

It would surprise you to know just how well these natives are educated. They write beautifully in Dutch and can speak Dutch, pidgeon English and Japanese. And don't think you can beat them in a bargain. You can't do it. They hook you every time.
